Global business

Financial year ended **31st December 2015****Code****0201 Section 148 Waivers****Rate of interest 1829142**

The Prudential Regulation Authority, on the application of the firm, made a direction under section 138A of the Financial Services and Markets Act 2000 in September 2014. The effect of the direction is to modify the provisions of INSPRU 3.1.35R and IPRU(INS) Appendix 9.3 so that a more appropriate rate of interest is used for assets taken in combination.

Counterparty Exposures 2187644

The Prudential Regulation Authority, on the application of the firm, made a direction under section 138A of the Financial Services and Markets Act 2000 in October 2015. The effect of the direction is to modify the provisions of INSPRU 2.1.22R so that the exposure limits to unsecured debt and unsecured loans is (i) 5% if the exposures do not include public private finance contracts; and (ii) 8% if the exposures include public private finance contracts and no more than 5% of the exposures are non-public private finance contracts.

0203 Quota share reinsurance

On 31 December 2013, the Company entered into a Quota Share reinsurance arrangement with its immediate parent undertaking Aviva Life & Pensions UK Limited (UKLAP). Under the terms of the Quota Share, 12.5% of the Long Term Fund of the Company was reinsured to its immediate parent undertaking. On the 1 January 2014, the Company increased the percentage of the quota share to 22.5%.

On 1 January 2014, the Company entered into a Quota Share reinsurance with Aviva International Insurance Limited (All). Under the terms of this Quota Share, 10% of the Long Term Fund of the Company was reinsured to All.

During the year, a proportionate share of new business premiums, claims, investment returns and expenses of the Company have been ceded to UKLAP (22.5%) and All (10%).

Included within the Quota Share reinsurances are index linked liabilities of £1,887m, which have been reflected in Form 54 net of the Quota Share Reinsurance. As the assets backing the reinsurance have been deposited back with the company, the assets backing the index linked liabilities have been presented gross of the Quota Share Reinsurance in Form 13 at Line 58 and in Form 56.

Global business

Financial year ended **31st December 2015****Code****1301 Aggregate values of assets****1308**

The aggregate values of assets in Form 13 as specified below are:-

	Category 1 £'000	Category 10 £'000
Unlisted investments on line 46 and 48	-	1,778,881
Listed investments on lines 41, 46 and 48 which are not readily realisable	-	-
Units in collective investment schemes that are not schemes falling within the UCITS Directive or are not authorised unit trust schemes or recognised schemes within the meaning of Part XVII of the Act	108,875	135,257
Reversionary interests or remainders in property other than land or buildings	-	-

1304 Amounts set off**1310**

Amounts have been set off to the extent permitted by generally accepted accounting principles.

1305 Counterparty limits**1319**

The maximum permitted exposure to counterparties is set out in the Investment Management Agreement with Aviva Investors Global Services Limited and approved by Aviva Life Investment Committee, as follows:

Deposits

The total UK Life Group credit risk exposure to any single institution limit for a particular counterparty holding at the end of the financial year was £400m for Tier 1, £300m for Tier 2 and £150m for Tier 3.

Each product cannot hold more than 2% of funds under management (but subject to minimum of £20m and a maximum of £150m) with individual 'Tier 1' counterparties, 1.5% of funds under management (but subject to a minimum of £15m and a maximum of £100m) with individual 'Tier 2' counterparties and 0.5% of funds under management (but subject to a minimum of £10m and a maximum of £75m) with individual 'Tier 3' counterparties. Tier 1 represents AAA rated institutions, Tier 2 represents institutions rated AA- or better whilst Tier 3 represents institutions rated A- or better.

Fixed income securities

Exposure to non-government bonds is limited to holdings which are deemed to be of a suitable quality determined by financial management. The maximum holding across all funds of a single issue is limited to 25% of the issue. Private placements are limited to 5% of the non-government bond portfolio. The maximum net exposure (measured by market value and including derivatives) to a single non-Government issuer should not exceed (only AAA-rated or UK government guaranteed debt is excluded from these limits) £540m for covered Bonds, £450m for AAA-rated, £300m for AA-rated, £220m for A-rated and £110m for BBB-rated.

Commercial mortgages

Gross capital exposure to any one commercial mortgage borrower should not exceed 5% for companies or 0.8% for individuals of the Long Term Business amount without Fund authority to explicitly approve alternative limit.

Derivatives

Exposure to derivatives is considered in the management of the funds within the overall risk limits. Where appropriate, constraints are in place over the nature of derivative instruments and the duration.

Supplementary notesName of insurer **Aviva Annuity UK Limited**

Global business

Financial year ended **31st December 2015****Code****Counterparty credit framework**

Whilst asset and counterparty specific limits exist within investment mandates the counterparty credit framework takes a more holistic approach in aggregating shareholder exposures across all relevant funds and asset classes. The maximum permitted exposure to individual counterparties within the company is determined through a counterparty credit framework which is applied in a consistent manner throughout the Aviva Group. The nature and structure of this framework, along with the approach to calibrating limits is determined centrally within the Aviva Group, with specific limits set for each legal entity. A limit for maximum shareholder exposure (SHE) has been set at £653m.

Breaches

There were no limit breaches during 2015.

1306 Counterparty exposure**1312**

Exposure to any single counterparty at the end of the financial year did not exceed 5% of the sum of the insurer's base capital resources requirement and its long-term insurance liabilities, excluding property linked liabilities and net of reinsurance ceded.

1309 Hybrid securities

The aggregate value of hybrid securities is £110m.

1318 Other asset adjustments

Amounts included in Form 13 line 101 are analysed as follows:

2015

	Category 1 £'000	Category 10 £'000
Net down of derivatives	-	781,264
Revaluation of Aviva loan from amortised cost to FV	-	(19,748)
Fair value to prudent value adjustment in respect of rights under derivative contracts	-	2,415
Total	-	763,931

2014

	Category 1 £'000	Category 10 £'000
Net down of derivatives	-	641,129
Revaluation of Aviva loan from amortised cost to FV	-	(27,206)
Fair value to prudent value adjustment in respect of public private finance initiative assets	-	170,000
Revaluation of tax from IFRS to PRA basis	-	(62,670)
Total	-	721,253

1321 Asset valuation adjustments

A review by senior management of asset positions that are valued at marked to market and marked to model has determined a valuation adjustment should be made to a portfolio of OTC derivatives pursuant to GENPRU 1.3.30R to GENPRU 1.3.33R. The adjustment takes into account close-out costs which were not reflected in the valuations based on mid-market inputs.

Supplementary notesName of insurer **Aviva Annuity UK Limited**

Global business

Financial year ended **31st December 2015****Code****1401 Provision for reasonably foreseeable adverse variations****1501**

The methods and assumptions disclosed in the valuation report, under IPRU (INS) Appendix 9.4, appropriately allow for the determination of any provision for reasonably foreseeable adverse variations. It has been determined that no provision for reasonably foreseeable adverse variations is required.

A review by senior management of asset positions that are valued at marked to market and marked to model has determined a valuation adjustment should be made to a portfolio of OTC derivatives pursuant to GENPRU 1.3.30R to GENPRU 1.3.33R. The adjustment takes into account close-out costs which were not reflected in the valuations based on mid-market inputs.

1402 Contingent liabilities**1502**

The Company has granted a floating charge to its parent Company, Aviva Life & Pensions UK Limited, in respect of the exposure to the funds withheld by the Company under the terms of a 12.5% quota share reinsurance agreement entered into on 31st December 2013 and a further 10% quota share reinsurance agreement entered into on 1 January 2014 (combined 22.5%). The Company has also granted a floating charge to a fellow subsidiary Company, Aviva International Insurance Limited, in respect of the exposure to the funds withheld by the Company under the terms of a 10% quota share reinsurance agreement entered into on 1st January 2014.

The charges noted above are subordinate to policyholders, and are issued over the long term business assets of the Company, excluding the financial investments of the bulk purchase annuity schemes and those providing cover for derivative transactions as required by regulatory reporting regulations.

The Company has also indemnified the overdrafts of certain other group companies.

Other than those noted above there are no additional charges over any assets of the Company or guarantees, indemnities or any other contractual commitments in respect of related companies.

There are no provisions for deferred tax liabilities and no potential liabilities for corporation tax on unrealised gains.

There are no contingent liabilities applicable to long term insurance business.

There are no other fundamental uncertainties.

1404 Implicit provision required by INSPRU 3.2.17R(3)

The amount of implicit provision required by INSPRU 3.2.17R(3) included in line 38 is £609,828k.

1405 Other adjustments to liabilities

Amounts included in Form 14 line 74 are analysed as follows:

	2015	2014
	£'000	£'000
Adjustment to mathematical reserves	(219,041)	(340,414)
Revaluation of tax from IFRS to PRA basis	36,686	27,134
Net down of derivatives	781,264	641,129
Revaluation of derivative liabilities	(13,197)	-
Revaluation of deposit received from reinsurers	4,078	52,292
Total	589,790	380,141

Supplementary notes

Name of insurer **Aviva Annuity UK Limited**

Global business

Financial year ended **31st December 2015**

Code

1601 Rates of exchange

4005

The Company conducts all its business in the UK, the Channel Islands and the Isle of Man. Currency swaps are in place in respect of all investments denominated in currencies other than Sterling.

1700 Form omitted

No Category 1 Form 17 has been prepared on the basis that there are no derivative contracts for this category of assets.

1701 Variation margin

The aggregate amount of variation margin which has been received by the Company is £479,763k and has been allocated to Form 13 line 44.

No amounts included on Forms 13 reflect the liability to repay any excess.

4002 Other income

Included in other income on Form 40 line 15 is the proportionate share of ceding commission payable to the Company under the terms of the quota share arrangements with UKLAP (22.5%) and All (10%).

4008 Management services

Management services have been provided throughout the financial year to the Company by Aviva Life Services UK Limited.

Investment management services have been provided by Aviva Investors Global Services Limited.

4009 Related party transactions

Other than the quota share reinsurance arrangements referred to in note 0203 above, there were no other related party transactions during the year which exceeded 5% of the long-term insurance liabilities net of reinsurance ceded.

4012 Interest payable

Included in Interest payable on Form 40 line 23 is the proportionate share of investment returns ceded by the Company under the terms of the quota share arrangements with UKLAP (22.5%) and All (10%).

4702 UK and overseas annuities

UK Life and Overseas new immediate annuities are all assumed to be 395 Annuity non-profit (PLA) contracts and not to arise as a result of any funds held within a pension arrangement.

4703 Apportionment between product codes

Where a policyholder holds a plan with both non-linked and index-linked benefits the policyholder count is assigned to column 5 for the index-linked product code. Where a policyholder holds more than one plan, the policyholder count is assigned to column 5 for each plan.

Supplementary notesName of insurer **Aviva Annuity UK Limited**

Global business

Financial year ended **31st December 2015****Code****4802 Expected income**

Expected income from four debentures currently in default is not included in column 3 of Form 48. The total expected income is £2.4m. The yield on these assets is not required to support the valuation basis rates of interest in Forms 51 and 57.

Expected income from commercial and healthcare mortgages currently in default with market value of £24.8m (approximately 0.2% of the UKCF mortgage portfolio by market value) is not included in column 3 of Form 48. The yield on these assets is not required to support the valuation basis rates of interest in Forms 51 and 57.

4803 Redemption of securities

Where securities may be redeemed over a period at the option of the guarantor or the issuer, it has been assumed within the yield calculation that they will be redeemed at the earliest callable date. The value of the assets that contain this option is £297.7m.

4804 Yield for assets line 18

The yield shown in column 4 for the following assets is significantly different from the weighted average of the yields for each asset of that type determined in accordance with INSPRU 3.1.34R(2) before any allowance for tax required by INSPRU 3.1.29R.

	Yield
Deposits not subject to time restriction (Form 13 Line 81)	0.59% pa
Shares in non-insurance dependants (Form 13 Line 25)	Nil
Other debtors (Form 13 line 78)	Nil

4901 Credit rating**5601**

The credit rating analysis on Forms 49 and 56 have been prepared using the second highest published rating of those provided by Standard & Poor's, Fitch, and Moody's. Where only two ratings are available, the lowest rating is used and where only one rating is available, the only available rating is used.

Internally assigned ratings have been used for securities that are not rated by external agencies.

5102 Number of policyholders**5402**

Where a policyholder holds a plan with both non-linked and index-linked benefits the policyholder count is assigned to column 3 for the index-linked product code. Where a policyholder holds more than one plan, the policyholder count is assigned to column 3 for each plan.

Supplementary notesName of insurer **Aviva Annuity UK Limited**

Global business

Financial year ended **31st December 2015****Code****5705 Yields to which risk adjustment is applied**

Form 57 Column 5 includes yields after risk adjustment, in accordance with INSPRU 3.1.35R.

The following table shows the yields to which the risk adjustment was applied (after the deduction of investment expense allowances):

	Risk adjusted yield on matching assets (Form 57 Column 5)	Yield before risk adjustment
UK L&GA NP Form 51	3.71	4.36
UK Pens NP Form 51	3.71	4.36
OS L&GA NP Form 51	3.71	4.36
UK L&GA NP Form 54	3.30	4.06
UK Pens NP Form 54	3.30	4.06
OS L&GA NP Form 54	3.30	4.06

Valuation report prepared by the actuarial function holder – IPRU (INS) Appendix 9.4Name of Insurer **Aviva Annuity UK Limited**

Global business

Financial year ended **31 December 2015****1. Introduction**

- (1) The **valuation date** is 31 December 2015.
- (2) The previous valuation was completed with an effective date of 31 December 2014.
- (3) No interim valuations have been carried out.

2. Product Range

New features were added to the individual pension annuity product in April 2015. We now offer guarantee periods for the policyholder to select up to 30 years (previously the maximum was 10 years). We also offer value protection as an additional feature to the product.

There were no other changes to the product range during 2015.

3. Discretionary charges and benefits

- (1) There is no accumulating with-profits business.
- (2) Not applicable.
- (3) There are no deposit administration benefits.
- (4) The guaranteed annuity benefit is calculated incorporating an allowance for service charges.
- (5) Not applicable.
- (6) There is no accumulating with profit business.
- (7) Not applicable.
- (8) Not applicable.
- (9) Not applicable.
- (10) Not applicable.

4. Valuation basis

- (1) The conventional immediate and deferred annuity business is valued by discounting future benefit payments and maintenance expenses.

The mathematical reserve for inflation linked annuities is determined using a market-consistent inflation curve as the allowance for future increases in annuity payments. This is a change from 31 December 2014 where a single flat inflation rate was used (3.31% pa at 31 December 2014). This is consistent with the treatment of the matching assets. Some inflation linked annuities are subject to maximum and minimum percentage annual increases which are valued accordingly.

- (2) The following table gives the valuation interest rates at 31 December 2015 compared with those at 31 December 2014. Non-linked and index-linked liabilities are backed by different assets and hence have different valuation interest rates. The 31 December 2015 Index-linked yields quoted below are nominal yields, with annuity inflation modelled explicitly using an inflation curve based on swap rates. The 31 December 2014 Index-linked yields are real yields.

Product Group	Valuation interest rates	
	31/12/2015 %	31/12/2014 %
Non-linked pensions annuities	3.60	3.49
Non-linked life and general annuities	3.60	3.49
Index-linked pensions annuities	3.19	-0.49
Index-linked life and general annuities	3.19	-0.49
Bulk Purchase Annuities – Non-linked	3.60	3.49
Bulk Purchase Annuities – Index-linked	3.19	-0.49

Valuation report prepared by the actuarial function holder – IPRU (INS) Appendix 9.4Name of Insurer **Aviva Annuity UK Limited**

Global business

Financial year ended **31 December 2015**

- (3) In accordance with INSPRU 3.1.41R, a prudent adjustment for that part of the yield estimated to represent compensation for credit risk, was made to the gross yield on assets.

This adjustment took account of:

- (a) Market margins of gross yield over the yields of risk-free investments of a similar term in the same currency, where available
- (b) The reasonableness of the net-of-adjustment yields over the yields of risk-free investments of a similar term in the same currency, taking account of the points above
- (c) The future outlook for credit risk experience
- (d) The historic experience of credit risk for each of the major asset classes
- (e) The need to take a prudent view of the above

The deductions for credit risk were:

Asset Category	31/12/2015	31/12/2014
Commercial mortgages	0.72%	0.72%
Healthcare mortgages (GPFC/PFI)	0.10%	0.10%
Non-linked equity release mortgages	0.97%	1.15%
RPI linked equity release mortgages	3.04%	3.42%
Index-linked property	1.16%	1.13%
Corporate Bonds – AAA	0.19%	0.19%
Corporate Bonds – AA	0.42%	0.37%
Corporate Bonds – A	0.64%	0.64%
Corporate Bonds – BBB	1.09%	1.07%
Corporate Bonds – BB	2.78%	2.67%
Corporate Bonds – B	6.91%	6.79%
Corporate Bonds – unrated	1.09%	1.07%
Private placements	<i>See Note</i>	<i>See Note</i>
Gilts and Swaps	0.00%	0.00%
Barclays liquidity swaps	0.01%	0.05%
Morgan Stanley Libor Generator	0.13%	0.30%
Infrastructure – Sodor	0.25%	n/a
Infrastructure – Ecotricity	0.23%	n/a

Note: Rating-specific deductions were applied to private placements in line with the corporate bond deductions in the above table.

In addition, supplementary reserves are held for credit risk in respect of healthcare / infrastructure mortgages. These are detailed in Section 8.

The valuation rate of interest used is net of a deduction of 0.022% pa which provides a prudent margin for cash flow reinvestment and disinvestment risk. This is an increase from the 0.02% used at 31 December 2014. In addition, a further deduction of 0.09% (Fixed Interest) and 0.08% (Index Linked) is made as required under INSPRU 3.1.28R.

- (4) Mortality is based on UK standard published tables with prudent allowance for current experience, and adjustments for improving longevity. The policyholders predominantly reside in the country of operation, except for business written in the Minor Sterling category.

In 2015 the base tables and the allowances for future mortality improvements were reviewed, resulting in revised assumptions for use at 31 December 2015. The base table assumptions include an adjustment for anti-selection that varies by individual year of entry.

Details are provided in the tables below.

Valuation report prepared by the actuarial function holder – IPRU (INS) Appendix 9.4

Name of Insurer

Aviva Annuity UK Limited

Global business

Financial year ended

31 December 2015

The following tables summarise the underlying Aviva Annuity UK Limited individual annuity mortality basis and improvement rates:

Individual annuity business					
	Base table	31/12/2015		31/12/2014	
		Male %	Female %	Male %	Female %
Pension Annuity Pre 1997	PCMA00 / PCFA00	99.5	94.5	99.5	94.5
Pension Annuity 1997 to 2013		The base table percentages for the intervening years are in the range between those for Pre 1997 and 2014.		The base table percentages for the intervening years are in the range between those for Pre 1997 and 2014.	
Pension Annuity 2014		80.5	76.5	79.5	75.5
Pension Annuity 2015		91.5	87.0	n/a	n/a
General Annuity	IML00 / IFL00	98	98	98	98
Structured Settlements	ONS National Life Tables UK 2006-2008 adjusted	n/a	n/a	95	95
	ONS National Life Tables UK 2010-2012 adjusted	95	95	n/a	n/a
Improvement rates applied to Pension and General Annuities	CMI_2013	CMI_2013 (applicable from 2001)		CMI_2013 (applicable from 2001), plus a 0.5% constant addition from 2014 onwards	
		_M[2.25]	_F[2.0]	_M[1.75]	_F[1.5]
Improvement rates applied to Structured Settlements	ONS 2012-based National Population Projections improvement table, Principal Projection	100% of ONS improvements from 2013 plus an additional 0.5% pa from 2015 onwards		100% of ONS improvements from 2013 plus an additional 0.5% pa from 2014 onwards	

The mortality basis for long term care immediate annuities is based on the same base tables as general annuities with individual loadings as advised by the underwriters at the point of sale and an additional margin for prudence.

The mortality basis for enhanced annuity policies includes a reserve of £(23.6)m in respect of adjusting the modelled standard annuity basis to apply to enhanced annuity policies.

A reserve of £(13.5)m is held in respect of particular longevity data, which suggests that heavier mortality rates could be assumed for lower-income annuitants than currently assumed using the Aviva Annuity longevity basis.

The 2014 and 2015 mortality bases and improvement rates for ex-Provident Mutual business are set out in the table below:

Financial year ended **31 December 2015**

(5) Not applicable.

(6) The value of future maintenance expenses is calculated from current maintenance expense levels by broad category of business, increasing by future expense inflation over the lifetime of each contract. The following expense assumptions are based on the terms of the Management Services Agreement between Aviva Life Services UK Limited and Aviva Annuity UK Limited and increased by 10% in respect of project costs. Expense assumptions are shown for pension annuities only. The per policy expenses are shown gross and no tax relief is assumed:

	Per policy expense £ per annum	
	2015	2014
Annuity non-profit CPA (400)	12.29	12.10
Annuity non-profit (bulk transfer) (401)	33.27	32.75

An additional reserve of £9.5m has been established in respect of project cost overruns.

A reserve of £(13.9)m is held to reflect expected reductions to the expenses charged by Aviva Life Services UK Limited.

The assumed future inflation rate applying to maintenance expenses is 1.46% pa.

(7) Not applicable.

(8) Not applicable.

(9) Not applicable.

(10) The valuation interest rates are adjusted to allow for investment expenses based on actual investment charges incurred. There are no other material basis assumptions.

(11) The Company holds the following derivatives to back policyholder liabilities:

One interest rate swap provides fixed interest cash flows in exchange for variable interest cash flows from certain mortgage assets used to back long-term fixed interest liabilities. Five interest rate swaps are held in respect of matching asset and liability cash flows for fixed interest business, and provide long-term fixed interest cash flows in exchange for short and medium term cash flows.

Two swaps provide fixed interest cash flows in exchange for RPI linked cash flows from two corporate bond assets used to back long-term fixed interest liabilities. One hundred and two swaps are held to provide fixed interest cash flows in exchange for LIBOR cash flows, and these are used to back long-term fixed interest liabilities.

Sixty five fixed interest credit default swaps have been bought to hedge the risk of default on certain assets backing the liabilities. A further forty five fixed interest credit default swaps have been sold to actively manage the risk associated with certain counterparties.

The Company holds forty four currency swaps to hedge the risk of currency movements on corporate bonds denominated in US dollars (forty one) and Euros (three) backing liabilities denominated in Sterling.

Sixty five inflation swaps are held to hedge the risk of inflation arising from RPI and LPI linked liabilities, backed by fixed interest corporate bonds.

The valuation interest rate used to determine the value of long-term index linked liabilities is derived from the rate of interest that equates the discounted value of aggregate cash flows, including cash flows arising from each of the swaps, with the total market value of the asset portfolio, including the market value of each of the swaps.

Supplementary note 0201 gives details of the valuation interest rate approach.

(12) There is no impact on mathematical reserves arising from changes in the INSPRU valuation rules effective from 31 December 2006.

Valuation report prepared by the actuarial function holder – IPRU (INS) Appendix 9.4

Name of Insurer **Aviva Annuity UK Limited**

Financial year ended **31 December 2015**

5. Options and Guarantees

- (1) Not applicable.
- (2) Not applicable.
- (3) Not applicable.
- (4) There are no other guarantees or options with any value.

6. Expense Reserves

Note that the figures quoted in this section are gross of the 32.5% quota share reinsurance treaties between UKA and UKLAP/AII.

- (1) Based on the business in force at 31 December 2015, the reserving allowance for expenses during 2016 is £40.3m. All expenses have been treated as attributable.
- (2) The implicit reserving allowance for investment expenses of £26.1m (included in the above £40.3m) was estimated by applying the investment expense deductions by asset class assumed in the valuation interest rate calculation to the assets allocated to the valuation liabilities.
- (3) The 2015 maintenance expenses in line 14 of Form 43 are £62.8m. The reserving allowance for 2016 expenses in 6(1) above is £40.3m. The £22.5m difference mainly relates to the following:
 - a. Accounting one-off adjustments totalling £8.7m. These amounts represent corrections (write-offs and write-backs) to historic accounting postings made to balance sheet control accounts. Due to the one-off nature of such adjustments, they are not included in the reserving allowance.
 - b. Higher Solvency II project costs in 2015 of £4m, contributing £4m to the difference.
 - c. Other differences include the modelled investment fees for Commercial and PFI mortgages being reduced for fee income, which is not allowed for in Form 43, and the modelled investment fees only including fees on assets allocated to match liabilities.
- (4) The costs of acquiring new business assumed in the next twelve months would be charged to the new business written.
- (5) An assessment was made of the cost of closure of the Company to new business at the end of 2015 and a reserve of £11.2m, corresponding to the full cost, was included in Form 51.
- (6) There are no expenses which have been treated as non-attributable.

7. Mismatching Reserves

- (1) Mathematical reserves for overseas business as reported in Forms 51 and 54 are all in respect of sterling liabilities. These are matched by sterling assets, except for £784.9m of US dollar bonds and £49.0m of Euro bonds whose cashflows are converted into sterling using currency swaps.
- (2) There are no liabilities in non-sterling currencies.
- (3) No reserves are held for currency mismatching because there are no significant liabilities in currencies different from the matching assets.
- (4) Two tests were applied at December 2015, in line with INSPRU 3.1.16R:
 - (a) a rise in risk free interest yields for all outstanding terms of 20% of the long term gilt yield, accompanied by a fall in property values of 20% plus a fall in rental income of 10%
 - (b) a fall in risk free interest yields for all outstanding terms of 20% of the long term gilt yield, accompanied by a fall in property values of 20% plus a fall in rental income of 10%

For those fixed interest securities that are not risk free, we assume the yield differential to risk free does not reduce in a resilience test.

The most onerous scenario as at 31 December 2015 was test (b).

Valuation report prepared by the actuarial function holder – IPRU (INS) Appendix 9.4Name of Insurer **Aviva Annuity UK Limited**

Global business

Financial year ended **31 December 2015**

- (5) Two tests were applied at December 2015, in line with INSPRU 3.1.23R, for the assets invested outside of the UK. For Aviva Annuity UK Limited the only significant territory is the US, in which the holding of corporate bonds makes up approximately 3.5% of the overall portfolio of assets backing liabilities.

- (a) a rise in risk free interest yields for all outstanding terms of 20% of the long term US risk free yield
 (b) a fall in risk free interest yields for all outstanding terms of 20% of the long term US risk free yield

For those fixed interest securities that are not risk free, we assume the yield differential to risk free does not reduce in a resilience test.

The most onerous scenario as at 31 December 2015 was test (b).

- (6) The assets and liabilities have been revalued on this interest basis as set out in (4) and (5) above.
- (a) The calculations have led to a resilience capital requirement of £7.4m.
- (b) The aggregate value of liabilities increased by £1,254.3m.
- (c) The aggregate value of assets increased by £1,246.9m.
- (7) The valuation liabilities include an allowance of a 0.022% pa deduction from the valuation interest rate for duration mismatch as mentioned in section 4(3). No further reserve is required to satisfy INSPRU 1.1.34R.

8. Additional Special Reserves

A reserve to cover potential data quality issues is established at a level of 0.15% of the reserve for future annuity payments and expenses. The data quality reserve is £33.9m.

A reserve of £62.8m is held for additional credit risk in respect of healthcare / infrastructure mortgages.

A reserve of £69.3m is held for adverse deviations in respect of credit risk from reinsurer defaults. The exposure to each reinsurer by credit rating is identified, and using a probability of default for each rating, the risk amount in each calendar year is assessed. The Counterparty Risk reserve is the discounted value of the future annual counterparty risk amounts for each reinsurer. This includes £58.5m in respect of the internal quota-share arrangements between UKA and UKLAP/All (as described in Section 9(2) below) and £10.8m in respect of other treaties.

9. Reinsurance

- (1) The Company has no facultative reinsurance with a reinsurer who is not authorised to carry out business in the United Kingdom.
- (2) There were 11 reinsurance treaties with external reinsurers and 3 internal reinsurance treaties, where the Company was the ceding insurer and under which business was in force at the valuation date.

	Treaties 1 to 3
Reinsurer	Munich Re (Treaty 1 and 2) and Hannover Re (Treaty 3)
Nature of cover	50% (Treaty 1) or 90% (Treaties 2 and 3) Quota share on UK Long Term Care (Immediate Care) business
Premiums payable in 2015	£0m
Deposit back arrangements	Not applicable
Open/closed to new business	Treaty 1 was closed to new business in March 2001. New business is placed with either Munich Re under Treaty 2 or Hannover Re under Treaty 3.
Undischarged liabilities	None
Mathematical reserves ceded	Total reserves ceded under the 3 treaties are £2.0m
Retention limit for new policies	10% retained of each new annuity

Statement on derivatives required by IPRU (INS) 9.29

Name of Company **Aviva Annuity UK Limited**

Global business

Financial year ended **31st December 2015**

The following summarises investment policy for the use of derivatives: -

- Derivatives will only be used in accordance with PRA Guidelines for the purpose of efficient portfolio management or reduction in investment risk.
- Derivatives must not be used for speculative purposes.
- Derivatives must be fully covered by the assets of the fund and must not be used to 'gear up' a fund.
- Counterparty risk – for exchange traded contracts, the exchange must be classed as "regulated" by an investment committee. Over the counter contracts, transactions must only be transacted with approved counterparties.
- Counterparty limits are consistent, and monitored in line with the fund's aggregate exposure guidelines.
- Controls and Monitoring – delegated authorities exist for each member of staff using derivatives. Derivatives transactions are priced, settled and profit and losses reconciled in an area independent of the fund managers involved.

The speculative use of derivative contracts is prohibited.

There are no specific guidelines for the use of contracts that were not reasonably likely to be exercised at the start of the contract.

No derivative contracts were held at any time during the financial year that required a significant provision under INSPRU 3.2.17R, and where appropriate, all contracts held fell within the definition of a permitted derivative contract.

All shares are voting shares.

Certificate by the directors required by IPRU (INS) 9.34(1) and IPRU (INS) Appendix 9.6

Name of insurer **Aviva Annuity UK Limited**

Global business

Financial year ended **31st December 2015**

We certify that:

1 (a) the return has been properly prepared in accordance with the requirements in IPRU(INS), GENPRU and INSPRU; and

(b) the directors are satisfied that:

(i) throughout the financial year in question, the insurer has complied in all material respects with the requirements in SYSC and the Fundamental Rules as well as the provisions of IPRU(INS), GENPRU and INSPRU.

The certificate required by IPRU(INS) Appendix 9.6 paragraph 1(1)(b)(ii) in respect of compliance since the end of the financial year in question with the requirements of SYSC, Fundamental Rules and the provisions of IPRU(INS), GENPRU and INSPRU and ongoing compliance has not been provided. This is because these requirements have been replaced as from 1 January 2016, the commencement date of Solvency II, so the firm is subject to a new regulatory regime.

2 (a) in the directors' opinion, premiums for contracts entered into during the financial year and the resulting income earned are sufficient, under reasonable actuarial methods and assumptions, and taking into account the other financial resources of the insurer that are available for the purpose, to enable the insurer to meet its obligations in respect of those contracts and, in particular, to establish adequate mathematical reserves;

(b) the sum of the mathematical reserves and the deposits received from reinsurers as shown in Form 14, constitute proper provision at the end of the financial year in question for the long-term insurance liabilities (including all liabilities arising from deposit back arrangements, but excluding other liabilities which had fallen due before the end of the financial year) including any increase in those liabilities arising from a distribution of surplus as a result of an actuarial investigation as at that date into the financial condition of the long-term insurance business; and

(c) the directors have, in preparing the return, taken and paid due regard to advice from every actuary appointed by the insurer to perform the actuarial function in accordance with SUP 4.3.13R.

Independent auditor's report to the directors pursuant to rule 9.35 of the Interim Prudential Sourcebook for Insurers

Name of insurer **Aviva Annuity UK Limited**

Global Business

Financial year ended **31st December 2015**

We have audited the following documents prepared by the insurer pursuant to the Accounts and Statements Rules set out in Part I and Part IV of Chapter 9 to IPRU(INS) the Interim Prudential Sourcebook for Insurers, GENPRU the General Prudential Sourcebook and INSPRU the Prudential Sourcebook for Insurers ('the Rules') made by the Financial Services Authority under section 137G of the Financial Services and Markets Act 2000:

- Forms 2, 3, 13 to 17, 40 to 43, 48, 49, 56, 58 and 60, (including the supplementary notes) ('the Forms');
- the statement required by IPRU(INS) rule 9.29 ('the statement'); and
- the valuation reports required by IPRU(INS) 9.31 ('the valuation reports');

We are not required to audit and do not express an opinion on:

- Forms 46, 47, 50, 51, 54 and 57 (including the supplementary notes);
- the statements required by IPRU(INS) rules 9.30; and
- the certificate required by IPRU(INS) rule 9.34(1).

Respective responsibilities of the insurer and its auditors

The insurer is responsible for the preparation of an annual return (including the Forms, the statement and the valuation reports under the provisions of the Rules. Under IPRU(INS) rule 9.11 the Forms, the statement and the valuation reports are required to be prepared in the manner specified by the Rules and to state fairly the information provided on the basis required by the Rules. The methods and assumptions determined by the insurer and used to perform the actuarial investigation as set out in the valuation reports are required to reflect appropriately the requirements of INSPRU 1.2 and 1.3.

It is our responsibility to form an independent opinion as to whether the Forms, the statement and the valuation report meet these requirements, and to report our opinion to you. We also report to you if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the Forms, the statement and the valuation report are not in agreement with the accounting records and returns; or
- we have not received all the information we require for our audit.

This report has been prepared for the directors of the insurer to comply with their obligations under IPRU(INS) rule 9.35 and for no other purpose. We do not, in providing this report, accept or assume responsibility for any other purpose save where expressly agreed by our prior consent in writing.

Basis of opinion

We conducted our work in accordance with Practice Note 20 'The audit of insurers in the United Kingdom (Revised)' issued by the Auditing Practices Board. Our work included examination, on a test basis, of evidence relevant to the amounts and disclosures in the Forms, the statement and the valuation reports. The evidence included that previously obtained by us relating to the audit of the financial statements of the insurer for the financial year. It also included an assessment of the significant estimates and judgements made by the insurer in the preparation of the Forms, the statement and the valuation reports.

We planned and performed our work so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the Forms, the statement and the valuation reports are free from material misstatement, whether caused by fraud or other irregularity or error and comply with IPRU(INS) rule 9.11.

In accordance with IPRU(INS) rule 9.35(1A), to the extent that any document, Form, statement, analysis or report to be examined under IPRU(INS) rule 9.35(1) contains amounts or information abstracted from the actuarial investigation performed pursuant to IPRU(INS) rule 9.4, we have obtained and paid due regard to advice from a suitably qualified actuary who is independent of the insurer.

Independent auditor's report to the directors pursuant to rule 9.35 of the Interim Prudential Sourcebook for

Insurers

Name of insurer **Aviva Annuity UK Limited**

Global Business

Financial year ended **31st December 2015**

Opinion

In our opinion:

(i) the Forms, the statement and the valuation report fairly state the information provided on the basis required by the Rules and have been properly prepared in accordance with the provisions of those Rules; and

(ii) the methods and assumptions determined by the insurer and used to perform the actuarial investigation as set out in the valuation reports appropriately reflect the requirements of INSPRU 1.2 and 1.3.
