

News Release

Aviva plc

Interim management statement to 30 September 2015

29 October 2015

Aviva plc Third Quarter 2015 Interim Management Statement

Mark Wilson, Group Chief Executive Officer, said:

"We are maintaining the momentum of Aviva's transformation with a further quarter of improved performance. In life insurance, value of new business was up 25%¹, the eleventh consecutive quarter of growth. The general insurance combined ratio of 94.0% is a more than adequate result. This level of consistency is important as we transform and grow Aviva.

"The acquisition of Friends Life is everything we expected it to be. We have now achieved £91 million of savings against our target of £225 million. At the same time our UK Life business continues to grow and our customers are responding positively to the full range of pensions freedoms we offer.

"In asset management, our flagship fund range, AIMS, continues its strong investment performance and the Target Return Fund has recorded returns of 6.6% over the past 12 months. AIMS now has £1.9 billion of funds under management. We expect this growth to continue."

9M15 numbers include Friends Life from 10 April 2015, the acquisition completion date. 9M14 is Aviva standalone.

Life Insurance	<ul style="list-style-type: none">Value of new business² (VNB) grew 25%¹ to £823 million (9M14: £685 million)UK Life VNB grew 36% to £404 million (9M14: £297 million), up 13% excluding Friends LifeAviva platforms continue to grow with over £2.2 billion of net inflows in the nine months to 30th September 2015 taking AUM to £7.3 billionEurope² VNB grew 11%¹ to £284 million with particularly strong growth in Italy² up 55%¹ to £57 million. Asia² VNB up 21%¹ to £115 million (9M14: £92 million)
General Insurance	<ul style="list-style-type: none">Combined operating ratio (COR) improved to 94.0% (9M14: 95.9%)UK & Ireland COR of 92.8% (9M14: 94.2%), Canada COR of 94.2% (9M14: 96.8%), Europe COR of 97.1% (9M14: 99.8%)GI and health net written premiums up 2%¹ to £6,110 million

⁵ In preparing the MCEV information, the directors have done so in accordance with the European Insurance CFO Forum MCEV Principles.

Group Chief Executive Officer's report

Overview

We are maintaining the momentum of Aviva's transformation. Value of new business is up 25%¹ to £823 million (9M14: £685 million²), the combined operating ratio has improved to 94.0% (9M14: 95.9%) and run-rate synergies from the Friends Life acquisition have grown to £91 million (HY15: £63 million).

Our economic capital has remained resilient at 172% despite significant market volatility in the third quarter, with our capital sensitivities proving accurate. We expect a positive outcome to our Solvency II internal model application, due to be announced in December this year. We have completed two projects to further improve our balance sheet, reinsuring the majority of our UK general insurance latent risk portfolio in September and disposing of a £2.2 billion portfolio of non-core commercial mortgages in October.

Work continues to transform Aviva into a leading digital insurer and we will open our second Digital Garage in Singapore in December. We are seeing encouraging growth in the volume of customer interactions that are completed online, albeit from a low base. We continue to develop our suite of digital propositions to be implemented across our business units.

Life Insurance

Value of new business, our growth measure for life insurance, increased 25% in constant currency to £823 million (9M14: £685 million²).

- Value of new business up 25% in constant currency
- UK Life up 36%

VNB in the UK grew 36% to £404 million. Excluding Friends Life, UK VNB was 13% higher at £335 million, principally reflecting improved performance in pensions. All UK Life customers are now able to benefit from the full range of pensions freedoms on our consumer platform. Total assets on our platforms now stand at £7.3 billion with 25% of platform net flows being invested with Aviva Investors. Ireland Life VNB grew 110%¹ to £11 million as a result of higher margins in pensions and savings products.

In our developed European markets, France VNB grew 2%¹ to £144 million principally due to higher sales and improved margin on protection products, partly offset by lower margins on savings products as a result of lower risk free rates. Italy² continued its strong turnaround, with 55%¹ growth in VNB to £57 million (9M14: £41 million), reflecting improved margins on savings and protection products, while in Spain² VNB grew by a creditable 15%¹.

Performance in our growth markets remained positive with attractive underlying trends. These businesses account for 22% of our Group VNB and we will look to allocate more capital to these areas. Poland² VNB was 11%¹ higher at £46 million despite the non recurrence of an £8 million benefit to VNB in 2014 from pension regulatory change. In Turkey, VNB fell 15%¹ to £17 million (9M14: £23 million) as the impact of underlying growth was offset by a reduction in our share of the business following the partial IPO. Asia² grew 21%¹ as strong performances in China and Singapore were partly offset by India.

Friends Life Integration

At the end of the third quarter we have secured run-rate synergies of £91 million, an increase of £28 million from the half year against a £225 million target. The transfer of £23 billion of Friends Life assets from AXA Investment Managers is due to occur in November. Overall capital synergies from the acquisition are expected to be material. The integration is progressing well and ahead of our internal timetable.

The acquisition of Friends Life has created the largest life insurer in the UK. As a result we are in a strong position to look after our customers' entire savings, pensions and retirement needs. For example, we offer the full range of pension freedoms; we are the number one corporate pension provider and have recently launched our new combined Group protection proposition.

¹ On a constant currency basis.

² Poland includes Lithuania, Italy excludes Eurovita, Spain excludes CxG and Asia excludes South Korea.

General Insurance

- *COR improved 1.9pp to 94.0%*
- *GI and health net written premiums 2% higher in constant currency*

Our general insurance combined operating ratio (COR) improved 1.9 percentage points to 94.0% (9M14: 95.9%) due to lower weather losses and improved efficiency. General insurance and health net written premiums were 2% higher in constant currency at £6,110 million.

The UK & Ireland COR improved 1.4 percentage points to 92.8% (9M14: 94.2%), with growth in net written premiums continuing with a 1%¹ improvement. We continue to reshape our distribution and portfolio mix, exiting unprofitable lines of business and reallocating capital to our Digital & True Customer Composite propositions. Further to our announcement at the half year of our new distribution agreement with TSB, we are announcing today a new exclusive five year agreement to underwrite home assistance products for HomeServe's 2 million UK customers.

In Canada, the COR improved 2.6 percentage points to 94.2% (9M14: 96.8%) reflecting better overall weather experience, offset mainly by large loss experience in personal property. Net written premiums are 2%¹ higher despite selected exits from unprofitable business lines.

The European COR improved to 97.1% (9M14: 97.7%²) through a combination of better weather in France and a lower expense ratio across all markets. General insurance and health net written premiums grew 3%² to £1,067 million on a constant currency basis.

Asset Management

- *AIMS now has £1.9 billion of FUM*

Aviva Investors continues to make progress on its turnaround during a period of difficult industry conditions. Gross sales of £4.0 billion are encouraging and are at a higher margin than redemptions, which remain too high at £4.5 billion.

The AIMS flagship range of funds continues its strong performance versus peers and now has £1.9 billion of funds under management. During the third quarter, performance has been broadly flat versus the FTSE 100 which has dropped 6%, and over the past 12 months the Target Return Fund has outperformed peers and recorded returns of 6.6%. Our partnership with Virtus Investment Partners in the United States launched successfully and we continue to seek more international distribution agreements.

Balance sheet

- *Economic capital surplus³ £10.1 billion*

Aviva's balance sheet remains strong with a 3Q15 economic capital surplus³ of £10.1 billion (HY15: £10.8 billion). Our coverage ratio of 172% has been resilient during the volatile investment markets seen in the third quarter and has performed as expected and in line with published sensitivities.

Our IFRS book value per share increased 2% over the quarter to 387p per share (HY15: 380p). Operating profits and a small increase in our pension surplus more than offset the negative impact of investment variances.

During the quarter, we completed a reinsurance transaction that includes provision of c.£0.8 billion of adverse development cover for our UK General Insurance latent reserves. This provides significant protection against claims volatility from mesothelioma, industrial deafness and other long tail risks. The transaction produces an economic capital benefit of c.£0.1 billion and will lead to a one-off IFRS loss before tax of c.£56 million. There will be an on-going reduction in investment income, estimated at c.£10 million per annum, as a result of transferring assets to settle the reinsurance premium.

In UK Life, we disposed of £2.2 billion of non-core commercial mortgages in October.

Solvency II

We expect to obtain approval for our internal model in December 2015 and whilst we are in the process of finalising the remaining issues, we are comfortable with our level of capital and satisfied that it will be within our expected Solvency II range.

We will report our Solvency II numbers for the first time at our full year results in March 2016 and we will also provide our target capital range, sensitivities and roadmap for capital going forward at that time.

¹ On a constant currency basis.

² Excluding the Turkish general insurance business disposed of in December 2014.

³ The economic capital surplus represents an estimated position. The economic capital requirement is based on Aviva's own internal assessment and capital management policies. The term 'economic capital' does not imply capital as required by regulators or other third parties.

Digital

Digital remains crucial to our future success and our position as a True Customer Composite gives us a strategic advantage. Our second digital garage will be opened in Singapore in December. Good progress has been made in hiring our global digital leadership team, bringing industry leading expertise in digital design and digital marketing. We are seeing encouraging growth in the volume of customer interactions that are completed online, and continue to develop our suite of digital propositions to be implemented across our business units.

Outlook

Our near term priorities are clear; we are focused on delivering the benefits from the Friends Life integration and the transition to Solvency II. Beyond that, there exists significant upside from better capital allocation and a more effective digital customer proposition.

The third quarter results are further evidence of our progress since we started our turnaround. We remain focused on showing improvement in our key metrics year after year.

**Mark Wilson**

Group Chief Executive Officer

Notes to editors

Notes to editors

All comparators are for the 9 months to 30 September 2014 unless otherwise stated.

Income and expenses of foreign entities are translated at average exchange rates while their assets and liabilities are translated at the closing rates on 30 September 2015. The average rates employed in this announcement are 1 euro = £0.73 (9 months to 30 September 2014: 1 euro = £0.81) and CAD\$1 = £0.52 (9 months to 30 September 2014: CAD\$1 = £0.55).

Growth rates in the press release have been provided in sterling terms unless stated otherwise. The following supplement presents this information on both a sterling and constant currency basis.

Cautionary statements:

This should be read in conjunction with the documents filed by Aviva plc (the "Company" or "Aviva") with the United States Securities and Exchange Commission ("SEC"). This announcement contains, and we may make other verbal or written "forward-looking statements" with respect to certain of Aviva's plans and current goals and expectations relating to future financial condition, performance, results, strategic initiatives and objectives. Statements containing the words "believes", "intends", "expects", "projects", "plans", "will", "seeks", "aims", "may", "could", "outlook", "likely", "target", "goal", "guidance", "trends", "future", "estimates", "potential" and "anticipates", and words of similar meaning, are forward-looking. By their nature, all forward-looking statements involve risk and uncertainty. Accordingly, there are or will be important factors that could cause actual results to differ materially from those indicated in these statements. Aviva believes factors that could cause actual results to differ materially from those indicated in forward-looking statements in the announcement include, but are not limited to: the impact of ongoing difficult conditions in the global financial markets and the economy generally; the impact of simplifying our operating structure and activities; the impact of various local political, regulatory and economic conditions; market developments and government actions regarding the sovereign debt crisis in Europe; the effect of credit spread volatility on the net unrealised value of the investment portfolio; the effect of losses due to defaults by counterparties, including potential sovereign debt defaults or restructurings, on the value of our investments; changes in interest rates that may cause policyholders to surrender their contracts, reduce the value of our portfolio and impact our asset and liability matching; the impact of changes in short or long term inflation; the impact of changes in equity or property prices on our investment portfolio; fluctuations in currency exchange rates; the effect of market fluctuations on the value of options and guarantees embedded in some of our life insurance products and the value of the assets backing their reserves; the amount of allowances and impairments taken on our investments; the effect of adverse capital and credit market conditions on our ability to meet liquidity needs and our access to capital; changes in, or restrictions on, our ability to initiate capital management initiatives or an acceleration of repayment of intercompany indebtedness; changes in or inaccuracy of assumptions in pricing and reserving for insurance business (particularly with regard to mortality and morbidity trends, lapse rates and policy renewal rates), longevity and endowments; a cyclical downturn of the insurance industry; the impact of natural and man-made catastrophic events on our business activities and results of operations; our reliance

on information and technology and third-party service providers for our operations and systems; the inability of reinsurers to meet obligations or unavailability of reinsurance coverage; increased competition in the UK and in other countries where we have significant operations; the effect of the European Union's "Solvency II" rules on our regulatory capital requirements; the impact of actual experience differing from estimates used in valuing and amortising deferred acquisition costs ("DAC") and acquired value of in-force business ("AVIF"); the impact of recognising an impairment of our goodwill or intangibles with indefinite lives; changes in valuation methodologies, estimates and assumptions used in the valuation of investment securities; the effect of legal proceedings and regulatory investigations; the impact of operational risks, including inadequate or failed internal and external processes, systems and human error or from external events; risks associated with arrangements with third parties, including joint ventures; our reliance on third-party distribution channels to deliver our products; funding risks associated with our participation in defined benefit staff pension schemes; the failure to attract or retain the necessary key personnel; the effect of systems errors or regulatory changes on the calculation of unit prices or deduction of charges for our unit-linked products that may require retrospective compensation to our customers; the effect of fluctuations in share price as a result of general market conditions or otherwise; the effect of simplifying our operating structure and activities; the effect of a decline in any of our ratings by rating agencies on our standing among customers, broker-dealers, agents, wholesalers and other distributors of our products and services; changes to our brand and reputation; changes in government regulations or tax laws in jurisdictions where we conduct business, including decreased demand for annuities in the UK due to changes in UK law; the inability to protect our intellectual property; the effect of undisclosed liabilities, integration issues and other risks associated with our acquisitions; and the timing/regulatory approval impact, integration risk and other uncertainties, such as non-realisation of expected benefits or diversion of management attention and other resources, relating to announced acquisitions and pending disposals and relating to future acquisitions, combinations or disposals within relevant industries, including specifically the acquisition of Friends Life; the policies, decisions and actions of government or regulatory authorities in the UK, the EU, the US or elsewhere, including the implementation of key legislation and regulation. For a more detailed description of these risks, uncertainties and other factors, please see Item 3d, "Risk Factors", and Item 5, "Operating and Financial Review and Prospects" in Aviva's most recent Annual Report on Form 20-F as filed with the SEC on 16 March 2015 and also the risk factors contained in the Euro Note Programme prospectus published on 1 May 2015. Aviva undertakes no obligation to update the forward looking statements in this announcement or any other forward-looking statements we may make. Forward-looking statements in this presentation are current only as of the date on which such statements are made.
