**STRONG  
OPERATING  
PERFORMANCE,  
BEATING  
OUR TARGETS**

### **Jason Varner**

---

Jason went the extra mile to help a customer complete a life insurance claim when her father died. He went to her home on a Saturday morning to help her fill in the paperwork. In Jason's team – and across Aviva – performance means giving of our best for every customer, so that they want to stay with and recommend Aviva.

[www.aviva.com/2011ar](http://www.aviva.com/2011ar)

“We delivered a strong operating performance in 2011. Despite challenging market conditions we have beaten all our operating targets. We have made good strategic progress focusing on markets where we will grow and earn higher returns.”

Andrew Moss  
Group chief executive

**£2.5 billion**

operating profit<sup>1</sup>,  
up 6% on a  
continuing basis<sup>2</sup>

**2%**

increase in total  
dividend to  
26 pence

### 2011 has been a year of good strategic progress...

We have continued to focus on markets where we will grow and earn the highest returns. For example:

- We sold a further 15% stake in Delta Lloyd, reducing our exposure to the Benelux countries, which raised around £0.4 billion. We also sold our roadside breakdown business RAC for £1 billion.
- We left six markets – Australia, the UAE, Hungary, Romania, the Czech Republic and Slovakia<sup>3</sup>.
- We grew our market share in profitable markets such as individual annuities in the UK.

### ...and strong operating performance, beating our targets...

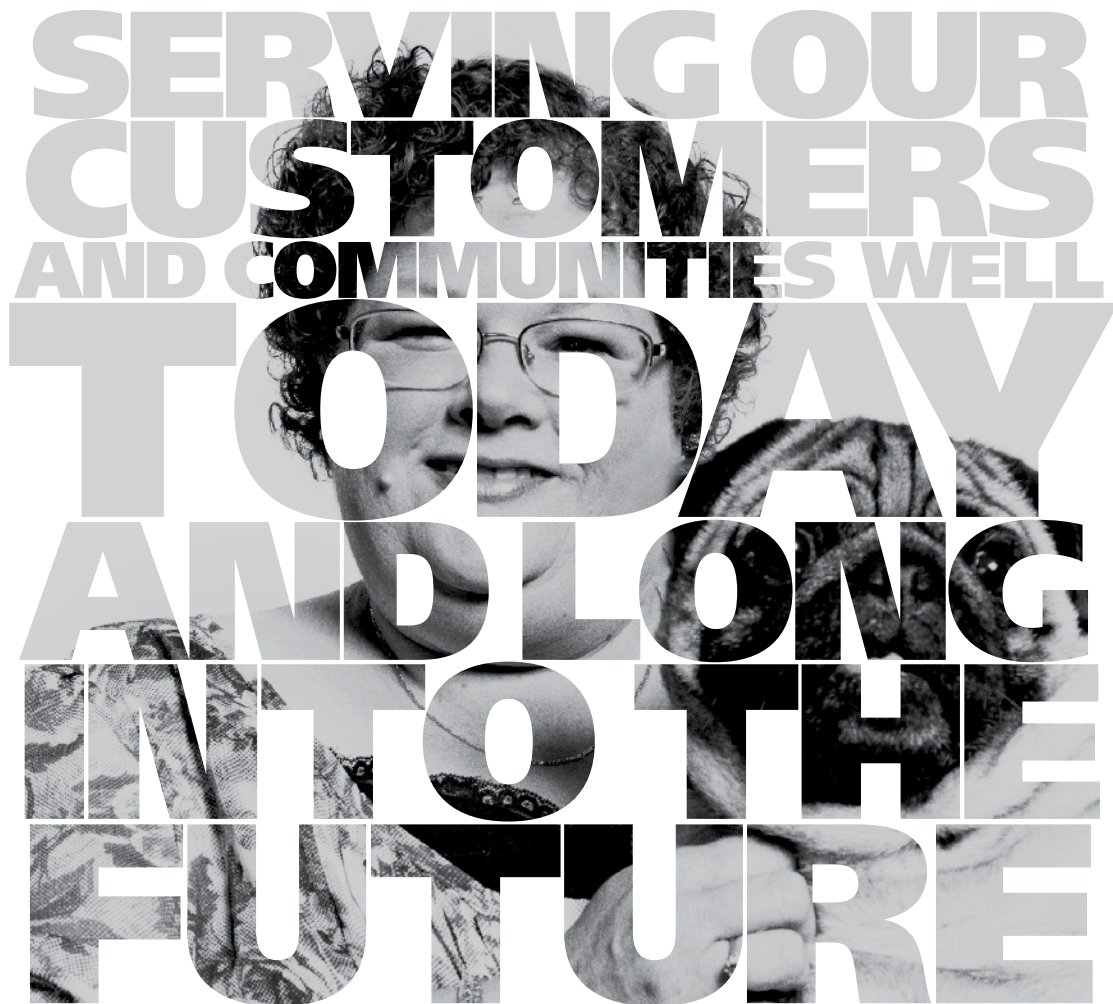

- We delivered a good operating performance in both our life and general insurance businesses.
- We are focused on balance sheet strength, through careful management of our assets and risks.
- We've beaten our operating targets.
- Our strong operating capital generation and financial discipline have enabled us to pay an increased dividend.

### ...even when times are tough.

- We achieved all of this during a year dominated by uncertainty in Europe.
- We are a long-term business and, especially with governments under increasing budget pressure in pensions and long-term savings, the prospects are promising.
- We are well-placed to build on last year's success and have increased our operating targets for 2012.

1 Operating profit on a continuing basis, excluding Delta Lloyd, was £2.2bn (FY2010: £2.0bn).  
2 The Group's accounting policy for operating profit (also referred to as Group adjusted operating profit) remains consistent with prior periods and is set out on page 168.  
3 We agreed the sale of our operations in Hungary, Romania, the Czech Republic and our exit from Slovakia in January 2012.

**SERVING OUR  
CUSTOMERS  
AND COMMUNITIES WELL  
TODAY  
AND LONG  
INTO THE  
FUTURE**

### **Sherri Voutier**

In Canada, Sherri Voutier was assigned to help Dorothy, an Aviva customer who had returned home to find she had been robbed. Dorothy, recently divorced, was devastated by the break-in, which left her "scared to death". When Dorothy called Aviva to register her claim, Sherri recognised the fear and distress that the robbery had caused and, for weeks after the robbery, Sherri supported Dorothy, providing the encouragement she needed to move forward.

[www.aviva.com/2011ar](http://www.aviva.com/2011ar)

We are committed to serving our customers and communities well in order to build a stronger, sustainable business, which makes a positive contribution to society and for which our people are proud to work.

**Jim's story**  
You are the Big Picture II

"I've worked for two other insurers prior to Aviva. Aviva just blows them out of the water..."

## Without our customers, there is no Aviva

- Over the last year we have won more than 50 awards in 10 countries for our customer service, innovation and performance.
- Our Customer Cup is a group-wide competition to identify ways to improve customer service. Last year's winners reduced the time for UK customers to receive payments from investment bond products to two days, which increased customer satisfaction by 42%.
- We've been changing the way we do things for our UK customers using an approach called 'systems thinking'. By simplifying our processes we've increased employee engagement and customer satisfaction. More than 50% of our UK business uses 'systems thinking'. This year applying its principles has, among other things, reduced the time it takes to pay death claims from 30 days to 3.
- Last year more of our customers were willing to recommend us. We continued to improve our customer satisfaction measure, Transactional Net Promoter Score® and more than half our businesses operate in the upper quartile relative to their competition.
- In 2011 we paid out £33 billion in claims and benefits to our customers across the world.

## Engaging our people

- We continue to improve employee satisfaction levels, empowering our people to make decisions and respond to customers in the way they know to be right.
- We strive to recognise all our customers and employees as individuals. It is by understanding customers' individual needs and listening to them that our people can really help them.

**Daniel Parker**  
Systems thinking

"It's actually giving our customers what they want, not what we think they want."

Watch the video online:  
[www.aviva.com/2011ar](http://www.aviva.com/2011ar)

## Playing a responsible role in society

- Our global Street to School programme has helped 400,000 children since it started in 2009.
- In 2011 we invested £12.4 million in community and charity projects and our employees dedicated 60,000 hours of their time to volunteering schemes.
- We have been carbon neutral since 2006.
- We are ranked in the top five companies globally in the FTSE4Good's rating of companies' corporate responsibility commitments and performance.
- We are the most reputable financial services company in the UK, according to the Reputation Institute.

## Chairman's statement

# Ensuring stability and flexibility in changing times

Lord Sharman of Redlynch <sup>OBE</sup>  
Chairman

*"In terms of the service we offer, we are still a company that our first customer would recognise: one that is flexible and fast to respond, sustainable and equipped to endure the rigours of ever changing investment markets and international economies."*

John McFarlane <sup>OBE</sup>  
Chairman designate

This is my sixth and final chairman's statement. In June John McFarlane will take my place, having been chairman designate since January. John did a sterling job as chief executive of Australia and New Zealand Banking Group Limited (ANZ) for ten years. I wish him every success and am confident that he will be a huge asset to this company.

In 2011 Aviva produced another strong operating performance. We have done this in a year which has been dominated by concerns over macro-economic conditions, particularly in the eurozone. Against a backdrop of market volatility, we have remained focused on our strategy and served our customers well.

In this regard, 2011 was a year very much like many others. When I took up this role six years ago the financial sector was enjoying the heights of a bull market. Before too long, Northern Rock and Lehman Brothers had collapsed and the sector found itself languishing in the depths of a bear market. Some in the financial community went from believing that the good times would never end, until they did, to expecting the world to stop turning on its axis, until it did not.

Whilst these six years certainly have been eventful, our business spans five centuries. When our first customer bought house insurance from our founder firm the Hand in Hand insurance company in 1697 he could not have known that we would still be writing business 12 generations later. He paid around two shillings to insure his property for seven years for £200. Millions more have followed.

Throughout my business career I've believed that successful organisations are those which are ready for anything. It's a belief to which Aviva readily subscribes. If businesses want to survive, they must be flexible and fast to respond to changing circumstances. They must be agile.

The solution is good management of our balance sheet and good leadership. Our chief executive Andrew Moss and his executive committee have continued to execute the Company's strategy during the last twelve months despite challenging markets. Under his leadership the Company has sold RAC, agreed the sale of our businesses in Hungary, Romania and Czech Republic, reduced our shareholding in Delta Lloyd and renewed our focus on our core markets. Through these actions, we are financially stronger and better able to ride uncertain economic conditions.

### Dividend for 2011

I am happy to report that the final dividend for 2011 will be 16 pence, bringing the total dividend to 26 pence, an increase of 2% over 2010. We continue to retain the dividend at a sustainable level for business growth.

### Strength of the board

In addition to appointing John McFarlane as a non-executive director in September 2011, we strengthened the board through a number of executive and non-executive appointments. Most recently, Glyn Barker joined the board in February 2012 as a non-executive director, bringing long-standing experience as a senior finance and audit professional. In October 2011 Gay Huey Evans joined the board as a non-executive director and subsequently became chair of the Corporate Responsibility Committee. Gay brings significant financial services and regulatory experience, having held key positions in financial and banking institutions and at the Financial Services Authority. Gay replaced Carole Pivnica who stepped down from the board in December, having been a non-executive director for over eight years. Trevor Matthews joined the board in December 2011 as chief executive, Aviva UK, replacing Mark Hodges who stepped down from the board in June. Trevor was formerly vice-chairman of Friends Life and has over thirty years of global executive experience in the financial services industry. All appointments were made on merit, having regard to the benefits of board diversity and to the targets set by the company of having a minimum of 25% female representation on the board by 2013.

### Effectiveness of the board

The board takes its governance responsibilities very seriously and I am pleased to confirm that the board is compliant with the principles of the UK Corporate Governance Code relating to leadership and effectiveness. In applying these principles, the board continues to ensure there is a clear distinction between it and the executive leadership of the company by the group chief executive officer. Detailed terms of reference for the board and its committees clearly set out their respective responsibilities. There continues to be a rigorous and transparent procedure for the appointment of new directors. The effectiveness of the board, its committees and directors is assessed annually through a formal evaluation process. Further details of how we have applied the principles of the Code in this regard are set out in our Corporate Governance Report on page 97.

Aviva is a 21st century company, ready to compete in a modern economic environment. But in terms of the service we offer, we are still a company that our first customer would recognise: one that is flexible and fast to respond, sustainable and equipped to endure the rigours of ever changing investment markets and international economies.

Lord Sharman of Redlynch OBE  
Chairman

## Group CEO's review

# Good progress – beating operating targets

**Andrew Moss**  
Group chief executive

*"Despite challenging market conditions we have beaten all our operating targets. We have made good strategic progress."*

**£2.5 billion**

operating profit,  
up 6% on a  
continuing basis<sup>5</sup>

**Full year dividend** pence

Concerns over the macro-economic environment in Europe dominated market sentiment, resulting in exceptional market volatility and uncertainty in 2011. Against this backdrop, I am pleased to report a year of good progress and operating profits<sup>4</sup> of £2.5 billion.

### **We have beaten our operating targets...**

During the year we beat our operating targets. We generated £2.1 billion of operating capital. In life insurance, we delivered an internal rate of return (IRR) of 14.4%. In general insurance, we achieved a combined operating ratio (COR) of 96.8%. We also remain on track to meet our £400 million cost and efficiency target by the end of 2012.

### **...and we are paying an increased dividend...**

In a challenging year, our resilient performance enabled us to pay a total dividend to our shareholders of 26p for 2011, an increase of 2% over 2010.

### **...because our strategy is working.**

Our strategic priorities for 2011 were to increase operating capital generation, allocate capital to our chosen markets where we can grow and earn the highest returns, and simplify our portfolio. We have made good progress against each priority.

We have significantly increased operating capital generation. In our 12 priority markets operating profits increased by 9% and we have delivered a strong performance in a number of our other markets. We have achieved this by making tough choices, supporting new business growth in markets where we can earn a strong return, such as the UK, and writing less capital intensive business in other markets. As a result, whilst life and pensions sales are marginally lower we are growing the business profitably.

In the UK, which accounts for approximately half of our profits, we have made good progress in our ambition to be the undisputed market leader. With our broad product range and our strengths in underwriting, claims and distribution we have grown operating profits, sales and market share and are well prepared to take advantage of changes such as the Retail Distribution Review and auto-enrolment.

In Europe, we increased operating profits and improved new business profitability and delivered strong operating performances in major markets such as France, Spain and Poland. In markets where conditions have been difficult we've taken action. In Ireland, for example, we have decided to combine the business with the UK region so that it can benefit from the UK's scale and underwriting expertise. Whilst in the short term trading conditions in some European markets will be challenging, in the medium-term, Europe contains some of the most attractive insurance markets in the world with strong savings rates.

<sup>4</sup> The Group's accounting policy for operating profit (also referred to as Group adjusted operating profit) remains consistent with prior periods and is set out on page 168.

<sup>5</sup> Operating profit on a continuing basis, excluding Delta Lloyd, was £2.2bn (FY2010: £2.0bn).

**Life new business internal rate of return %**

**General Insurance combined operating ratio %**

In North America, operating earnings increased in both our US and Canadian businesses. In Asia, our investment in our relatively young businesses is clearly paying off as we successfully grow profits and build an attractive franchise.

Aviva Investors made good progress with net external sales at a record £5.6 billion on an underlying basis<sup>6</sup>.

In 2011, consistent with our focus on investing our capital where we can grow and earn the highest returns, we sold a further 15% stake in Delta Lloyd, raising around £0.4 billion and reducing our presence in the Benelux markets. We also sold our roadside breakdown business RAC at 17 times earnings for £1 billion.

In addition we sold Aviva Investors business in Australia, concluded our partnership in the UAE and, in January 2012, we agreed the sale of our operations in Hungary, Romania, the Czech Republic and our exit from Slovakia.

Our progress in 2011 owes much to the actions we have taken over a number of years to transform Aviva. Since 2009 we have increased operating profits from £2.0 billion to £2.5 billion, doubled operating capital generation and reduced our cost base from £5.1 billion to £4.1 billion<sup>7</sup>. In addition, the pension deficit of £1.7 billion has now moved into a surplus. As a result Aviva is a leaner and stronger company today. You can read more about how we have transformed Aviva on pages 12 and 13.

**We delivered further profitable growth in life insurance...**

Life insurance performance was strong in 2011. We have allocated capital to more profitable areas, such as unit linked and term assurance, and away from more capital intensive products such as with-profits in Europe. We improved the profitability of our life insurance business with a 14.4% life new business IRR, ahead of our target of at least 12%, and increased life insurance operating profits by 7% to £2,123 million.

In the UK, the life insurance result is a real highlight. We grew our share of an expanding life and pensions market and sales increased 10% to £11,315 million. We have a 25% market share in individual annuities and are number two in the life insurance protection market. UK life insurance operating profits increased by 8% to £920 million, double the level six years ago, and new business profitability remained strong with an IRR of 15%.

**...and achieved a good general insurance result.**

We continued to grow our general insurance business profitably reflecting progress made in recent years to reduce costs and improve pricing. Our underwriting strength is a major competitive advantage and we increased underwriting profits significantly last year. Total general insurance and health net written premiums increased 8% to £9,162 million and we grew operating profits by 3% to £935 million.

UK general insurance performance has been particularly strong. General insurance and health sales increased 8% and we delivered a COR of 96%. We are the market leader in the UK and we hold top three positions in all our major classes of business, including personal motor (with 413,000 net new customers in 2011), homeowner, commercial motor and commercial property.

In Aviva Europe general insurance and health net written premiums increased 5% to £2,059 million driven by successful rating actions in a number of markets. General insurance profitability improved and we delivered a COR of 101% (FY 2010:103%).

<sup>6</sup> Underlying sales exclude an exceptional impact (-£0.5 billion) arising from the sale of Aviva Investors' Australian equity manufacturing business which completed 1/10/11.

<sup>7</sup> On a continuing basis excluding Delta Lloyd.

## Over 100

for customer  
service, innovation  
and performance

### And we have remained focused on balance sheet strength

The strength of our balance sheet is a clear priority and we have taken steps to ensure our capital position remains resilient. Over the last few years we have de-risked the business and strengthened our capital position which enabled us to withstand the extreme volatility in the European sovereign debt market in the second half of 2011. Our estimated IGD solvency surplus at 29 February 2012 was £3.3 billion (31 December 2011: £2.2 billion) as a result of market improvements and actions we have taken since the beginning of 2012.

Aviva has an excellent track record of managing our assets and market exposures. We suffered minimal defaults on our financial investments in 2011. Whilst our balance sheet has been impacted by unrealised losses, we hold the vast majority of our assets for the longer term and the equity hedging we have in place means our capital is largely protected against adverse market movements.

We continue to engage constructively with regulators and policy-makers and take the necessary steps to ensure that we are well prepared for the introduction of Solvency II.

### Our customers are central to our success...

We serve 43 million customers and we know that for Aviva to be a sustainable and successful business we must continue to provide good value and excellent service. As governments face increasing budget pressure, there will be an increasing demand for insurers, like Aviva, to fill the long-term savings gap. But customers will only choose Aviva, stay with us and recommend us if we look after them well.

### ...so we continue to invest in new ways to serve them...

We continue to invest and innovate in digital technology and social media so that we can serve our customers more effectively. We have made good progress and currently have a number of research and development pilots underway in areas such as claims, underwriting and customer service and we were ranked 8th, and the top financial services company, in the FTSE 100 Social Media Index.

### ...with the support of our distribution partners...

We continue to work closely with our distribution partners around the world so that we can serve our customers effectively. Our diverse network of partners – including banks and brokers – is one of Aviva's core strengths and an area in which we will continue to invest.

We have created one of the largest and most successful bancassurance franchises in the insurance sector with 130 partners. In the UK alone last year we expanded our distribution network with new agreements with HSBC, Santander and Barclays.

**£33 billion**

in claims and benefits paid out to customers

**60,000 hours**

employee volunteering hours

**400,000**

children we have helped through our Street to School programme

**...so that more and more customers recommend us.**

Last year more of our customers were willing to recommend us than ever before. We improved our customer satisfaction measure, Net Promoter Score™, last year and now more than half of our businesses operate in the upper quartile relative to local competition. We won more than 50 awards across 10 countries for customer service, innovation and performance including being named general insurer of the year by Insurance Times in the UK; Aviva France's product range was recognised by several awards from specialist industry publication "Les Dossiers de l'Épargne" and our Singapore business won the service channel innovation award for our direct channel at the IDC Financial Insights Awards.

**Our success depends on our people...**

I am grateful to all my colleagues for their dedication, hard work, and professionalism. I am delighted that we have made encouraging progress in improving employee satisfaction during 2011 and we will continue to work hard at this.

During the year we further strengthened the senior management team. Trevor Matthews, a highly experienced and well-regarded insurance industry leader, became UK CEO in December. We also appointed Cathryn Riley to the group executive committee as chief information officer to lead our global IT strategy and drive the best use of emerging technology for Aviva and its customers.

**...and we play a responsible role in society.**

Aviva is a profitable and sustainable business able to meet our responsibilities not just to our shareholders but also to our customers, our employees and society. During 2011, we paid out £33 billion in claims and benefits to our customers, and our staff across the group dedicated 60,000 hours of time to volunteering schemes.

We have an important role to provide our customers with prosperity and peace of mind. But we also have a wider commitment to society, supporting those who are not our customers through our Street to School programme where we have now helped 400,000 children. We have been ranked in the top five companies globally in FTSE4 Good's rating of companies' corporate responsibility commitments and performance, and recognised as the most reputable financial services company in the UK by the Reputation Institute.

**Well placed to build on our strong performance**

We are well placed to build on last year's performance and we are therefore increasing our operating targets. Although the economic environment is likely to remain tough for the foreseeable future, we have built a strong, sustainable and diverse business well positioned for further profitable growth.

**Andrew Moss**  
Group chief executive

# Transformation of Aviva

"We've done a huge amount to transform Aviva over the past few years. We've built a strong, sustainable and diverse business, well positioned for future growth. We are making good progress, and, of course, there is more to do."

**Andrew Moss**

Group chief executive

## Sharper focus

Over the last few years we have simplified and streamlined Aviva. In the last three years, we have sold the majority of our stake in Delta Lloyd, exited Australia and the UAE, agreed the sale of our Czech and Hungarian operations, and agreed our exit from Slovakia. In 2011 we completed the sale of RAC for £1 billion, reflecting our focus on insurance and savings businesses in priority markets. We will continue to prioritise our investment in markets where we can grow and earn the highest returns, such as the UK, which accounts for approximately half of our profits, and Europe, where savings rates remain high and we have strong franchises.

## Balanced earnings

The mix of our business – combining life, general insurance and asset management – better balances earnings and cash flows through different operating environments than for a single-line insurer. This combination of our businesses provides capital benefits by diversifying risks. Aviva can hold 30–40% less capital to write new general insurance business than the general insurance business would need to hold on a standalone basis. It is anticipated that this benefit will be reinforced under Solvency II which means that, in the future, our business will be stronger than ever. We have been proactively managing our in-force book for profit, reducing the capital intensity of our life new business. Another feature of our business is that 80% of our life operating profits come from business written in previous years, giving our profitability greater resilience.

## Concentrating capital and effort

### Successful disposals

- Aviva Global Services, India.
- RAC non-core (HPI, AW, BSM),
- Delta Lloyd IPO
- Aviva Life Insurance, Australia
- Mederic life insurer/broker, France
- Aviva Investors, Romania
- Delta Lloyd sell down, Benelux
- RAC
- Aviva Investors Australia
- UAE
- Hungary, Romania, Czech Republic and Slovakia\*

\* Exit agreed in January 2012.

## Combination of life & general insurance – operating profits\*

\* Operating profit before tax. The Group's accounting policy for operating profit (also referred to as Group adjusted operating profit) remains consistent with prior periods and is set out on page 168.

## Improved efficiency

Following the successful delivery of our £500 million cost savings target a year early in 2010, we are on track to deliver our commitment of additional cost savings of £200 million and a further £200 million efficiency gains by end of 2012. We have large businesses with strong efficiency and our business and geographic mix allows us to transfer key skills and capabilities across the organisation and share back-office functions, IT and finance resources. As a result of our disposals and improved operational effectiveness we have significantly reduced the Group's headcount of 54,700 in 2008 to 36,600<sup>8</sup> in 2011. Reducing roles is never an easy decision, but it is a necessary step in ensuring the long-term sustainability of the business.

## Improved profitability

At the same time as growing volumes in general insurance we also improved profitability, particularly benefiting from the actions taken over a number of years on pricing and operating costs. These actions have contributed to our improved combined operating ratio of 96.8%.

Our disciplined management of new business mix has driven an improvement in the group's life insurance new business internal rate of return to 14.4%, ahead of our target of at least 12%. Operating profits increased in the UK and Europe, despite tough economic conditions. We are beating all of our operating targets and are well-placed for 2012.

## Managing risk

Managing risk is fundamental to what we do. As a long-term holder of assets which are carefully matched to our long-term commitments to policyholders, our balance sheet has in-built resilience. The Group's pension deficit of £1.7 billion in 2009 has now moved into a surplus. Our reduced shareholding and deconsolidation of Delta Lloyd further de-risked our balance sheet. We manage our assets to reduce risks and to deliver a good return for our customers and our shareholders. We have an excellent track record of managing credit risk through what has been a challenging external environment in recent years.

## Cost base

## Headcount

## GI combined operating ratio

## Life IRR

## Reduced shareholder exposure to equities

## Group CFO's review

# Strong operating capital generation

The actions we took in 2011 to improve profitability, increase operating capital generation and focus on our balance sheet strength, have underpinned Aviva's resilience.

**Patrick Regan**  
Chief financial officer

*"By focusing on balance sheet strength, operating capital generation and effective allocation of capital, Aviva has shown its resilience in 2011."*

### Net operating capital generation £bn

### Growing profits...

Operating profit was £2.5 billion<sup>9</sup>, broadly in line with 2010 despite the reduced contribution from Delta Lloyd following its deconsolidation in May 2011. On a continuing basis, excluding Delta Lloyd, operating profit increased 6% to £2,155 million (FY 2010: £2,026 million). This was the result of successfully allocating capital to our most profitable markets, disciplined underwriting and management of expenses and the underlying strength and scale of our in-force portfolios.

### ...and significantly increased operating capital generation

In 2011 Aviva increased operating capital generation by £0.4 billion to £2.1 billion, an excellent result especially in the context of challenging financial markets.

Improved profitability in both life insurance and general insurance businesses meant that capital generation from the in-force life portfolio increased to £2.3 billion and the general insurance business contributed £0.6 billion overall. At the same time we reduced capital consumed in writing new life business by £0.3 billion, driven by both improved capital efficiency and our management of business volumes.

Since 2009 we have more than doubled the amount of operating capital we generate. This has been achieved through cost management on our in-force portfolio and the active management of new business volumes, mix and profitability. We have also benefited from key management initiatives such as the reattribution of the inherited estate in the UK life business.

The disciplined allocation of capital to areas where we can earn the greatest returns means that we increased our life new business IRR to 14.4% with each region delivering new business profitability levels above our target.

In Europe we have significantly reduced sales of capital intensive with-profits products which led to an improvement in the life new business IRR to 14%. In the UK we have rapidly grown market share in individual annuities and delivered an IRR of over 25% in this product area.

### A strong life insurance result...

Our life insurance performance was strong with operating profits of £2,123 million, an increase of 7% (FY 2010: £1,988 million). This improvement was driven by increases in a number of drivers of

our profits. Underwriting margin increased by £63 million to £815 million (FY 2010: £752 million) particularly as a result of higher expense margins.

New business income contributed £1,037 million, with strong annuity volumes and profit growth in the UK offsetting lower volumes in Europe and the US. New business income margin, as a percentage of annual premium equivalent sales, was stable at 29%.

Investment return was another important driver of operating profits, up 6% at £2,760 million (FY 2010: £2,606 million), underlining our strong track record of effective management of credit risk. Within this total, credit spread income on our annuity portfolio increased by £125 million to £813 million, reflecting our ability to earn good margins in a low interest rate environment.

### ...and a good contribution from general insurance

We have successfully grown our general insurance business and delivered high quality earnings as a result of actions we've taken in pricing, underwriting and costs. General insurance and health profits increased by 3% to £935 million. The Group delivered a strong underwriting result up by 10% to £224 million.

The improved combined operating ratio (COR) of 96.8% (FY 2010: 97.1%) was a result of the significant improvements we have made in pricing and efficiency over the last few years. These results are driven by current year profitability with the current year COR at 96.4%, and are not dependent on prior year reserve releases giving us confidence in the sustainability of this performance.

We have successfully increased rates in a number of markets. In the UK for example we delivered a particularly strong performance as we took action to increase rates in personal and commercial motor and net written premiums were 8% higher at £4,371 million.

Our strength in underwriting also contributed significantly. In the UK, for example, our direct book has seen a decreasing trend in bodily injury claims frequency in the last three years whilst the market has seen an increasing trend.

### Total earnings impacted by market conditions

IFRS profit before tax was £87 million (FY 2010: £2.4 billion). This includes a loss of £726 million relating to Delta Lloyd for the first four months of the year as a result of the reversal of investment

**Life operating profit** £m**GI and health operating profit** £m

variance gains seen in 2010. Profits from Aviva's continuing operations (including our share of Delta Lloyd as an associate) were £813 million for the year. Operating profits were offset by adverse investment variances of £1,062 million, the vast majority of which were unrealised, which arose largely from widening credit spreads on government and corporate bonds. The profit on disposal of the RAC business was offset by restructuring and integration costs and write downs in the value of our holdings in Delta Lloyd.

Aviva has high quality, well managed and diverse fixed income portfolios and we have delivered a consistently strong performance across these assets over a number of years.

Operating earnings per share (EPS) was 53.8p (FY 2010: 55.1p). Total EPS was 5.8p (FY 2010: 50.4p) reflecting those credit spread movements seen in the year and the impact of the reversal of investment gains in Delta Lloyd in 2010.

**Capital management**

The actions we have taken in 2011, particularly with the sell down of Delta Lloyd and the sale of RAC, provided important support to our capital position as economic conditions worsened in the second half of the year.

The sale of a further 15% in Delta Lloyd deconsolidated Delta Lloyd from Aviva's accounts and significantly de-risked our balance sheet.

We also sold RAC for cash consideration of £1.0 billion, at 17 times earnings, at the same time increasing Aviva's tangible net assets by £1.0 billion. The deficit in the Group's pension schemes was eliminated during 2011 and now shows a surplus on an IAS19 basis.

We have substantially reduced our asset risk: our mortgage book has reduced from £35 billion in 2010 to £21 billion in 2011 as a result of the deconsolidation of Delta Lloyd and equity holdings in shareholder assets has decreased from £5.3 billion to little more than £1.3 billion over the same period.

The group estimated regulatory capital surplus based on the EU Groups Directive (IGD) was £2.2 billion at 31 December 2011. This was impacted by adverse market movements seen in the second half of the year, particularly in interest rates and credit spreads in continental Europe, which reduced the total by around £1.5 billion. This was offset by the positive contribution from operating profits and capital management actions we have taken.

Asset valuations improved in the first two months of 2012 and the estimated IGD solvency surplus at 29 February 2012 was £3.3 billion which represents a coverage ratio of 150%.

Aviva's estimated economic capital surplus<sup>10</sup> coverage was approximately 125% at 31 December 2011 (FY 2010: 140%). This was impacted by negative movements in credit markets offsetting the increase in retained profits. Since the end of the year as a result of market improvements and

management actions the estimated economic capital surplus coverage has increased to approximately 145% to 150% as at 29 February 2012.

Our IFRS net asset value was 435p (FY 2010: 454p). This reflects the profits of the business, the sale of RAC and actuarial gains on the pension scheme, offset by the sell down of Delta Lloyd and the adverse impact of falls in equity, credit and foreign exchange markets.

Aviva's EEV equivalent net asset value per share was 595p (FY 2010: 621p) with the reduction from 2010 driven by the impact of the sell down of Delta Lloyd more than offsetting the increase in retained earnings. Total undiscounted expected profits increased slightly to £33.0 billion (FY 2010: £31.4 billion).

**We have a well managed and high quality asset portfolio**

Overall asset quality remains strong with modest impairments seen in 2011. In UK corporate bonds, for example, we had very limited default experience of less than 5 basis points and the £770 million UK mortgage provision remains in place.

Our direct shareholder asset exposure (net of minorities) to debt securities of the governments of Greece, Portugal, Ireland, Italy and Spain (including local authorities and government agencies) at 31 December 2011 was £1.3 billion (FY 2010: £1.6 billion), 1% of total shareholder assets.

**Focused on capital generation and effective balance sheet management**

By focusing on balance sheet strength, operating capital generation and effective allocation of capital, Aviva has shown its resilience in 2011. This has enabled us to pay a healthy dividend.

Our robust performance in life insurance was underpinned by further improvements in capital efficiency and a reduction in costs. Aviva's general insurance business has gone from strength to strength as we delivered a strong underwriting performance and growth in net written premiums.

We are well placed to build on last year's performance and are therefore increasing our operating targets for 2012. We are targeting a general insurance COR of 97% or better, excluding RAC which was a positive contributor to the COR; a life new business IRR of 13%; and between £1.6 and £1.9 billion of operating capital generation.

We are confident about our prospects in 2012 as we continue to focus on operating capital generation and manage our balance sheet effectively to ensure that Aviva remains financially strong.

**Pat Regan**  
Chief financial officer

<sup>10</sup> The economic capital surplus represents an estimated unaudited position. The capital requirement is based on Aviva's own internal assessment and capital management policies. The term 'economic capital' does not imply capital as required by regulators or other third parties. Pension scheme risk is allowed for through five years of stressed contributions.

## UK and Europe – the world's largest life and pensions markets

### UK – 14 million customers

- 48% of group operating profits<sup>11</sup>
- Nine major centres in the UK

### Europe – 18 million customers<sup>12</sup>

- 32% of group operating profits
- France, Ireland, Italy, Lithuania, Netherlands, Poland, Russia, Spain, Turkey
- Delta Lloyd: Belgium, Luxembourg, Netherlands

● UK  
● Europe

## North America – 4 million customers

- 15% of group operating profits
- Canada, United States

## Asia Pacific – 7 million customers

- 2% of group operating profits
- China, Hong Kong, India, Indonesia, Malaysia, Singapore, South Korea, Sri Lanka, Taiwan, Vietnam

## Aviva Investors

- 3% of group operating profits
- Canada, China, France, Netherlands, Ireland, Italy, Luxembourg, Poland, Singapore, Spain, Taiwan, United Kingdom, United States

● North America  
● Asia Pacific

## UK

- Operating profit up 8% to £1,451 million
- Life operating profits up 9% to £931 million<sup>13</sup> with sales up 10% to £11,315 million and new business IRR of 15%
- General insurance and health operating profit<sup>14</sup> up 7% to £520 million with net written premiums up 8%<sup>14</sup> at £4,844 million and COR of 96%

As the UK's leading insurer, having our life and general insurance businesses under one powerful brand, combined with our scale and broad product offering and distribution, gives us a strong competitive advantage.

Our life insurance business goes from strength to strength, with operating profits<sup>11</sup> at a record level. Our broad product range and unrivalled distribution network helped to drive up our overall share of the UK life and pensions market to 12%<sup>15</sup> with gains in our core markets of workplace savings, 'at retirement' (annuities and equity release) and protection.

As we continue to serve customers and price our products well, customers are choosing to stay with us. For example we have achieved further increases in the already high proportion of people continuing to invest with us when their Aviva pension policies mature.

The general insurance business, which is the UK market leader, generated good, profitable growth as a result of our expertise in underwriting and claims management, our risk selection and sophisticated pricing. We achieved particularly strong results in personal motor insurance with net written premiums (excluding RAC) up 32% at more than £1.1 billion.

We have more than two million personal motor customers in the UK, as a result of the successful roll out of direct pricing to brokers and the launch of quotemehappy.com, which offers low-cost insurance to careful drivers and already contributes more than 10% of our total new personal motor customers.

Customer satisfaction levels and employee engagement have increased, with customer complaints down 20% in 2011. We've been changing the way we look after our customers by simplifying our processes and making them more customer-friendly. In our existing annuity business this has delivered a 26 point improvement in our Transactional Net Promoter Score™, achieved significant cost savings and helped reduce call volumes by around 20%.

Our progress has been recognised by the industry. We were voted General Insurer of the Year (Insurance Times) and Health Insurer of the Year (Health Insurance Awards).

Looking ahead, we aim to become the undisputed UK market leader in life and general insurance. We will focus on

underwriting and disciplined risk-selection in general insurance. In life insurance, our strategy and strong market positions mean we are well-placed to take advantage of regulatory changes, such as the Retail Distribution Review and auto-enrolment. We will also maintain our strong position in markets less likely to be affected by these changes, such as protection and annuities.

## Europe

- Operating profit up 4% to £937 million
- Life operating profits up 1% to £898 million with sales down 20% at £10,891 million and life new business IRR of 14%
- General insurance and health operating profit up 26% to £137 million with net written premiums up 5% at £2,059 million and COR of 101%

Aviva has a strong presence in France, Spain, Italy, Poland and Ireland, and growing businesses in Russia and Turkey. We are a top six life insurer in all our markets, which together account for 15% of the world's insurance premiums.

Consistent with our strategic aim to sharpen our geographic focus we ended our partnership in UAE and, in January 2012, we agreed the sale of our businesses in the Czech Republic, Hungary, Romania and our exit from Slovakia.

In France our pricing and underwriting expertise enabled us to deliver a very strong general insurance result. Our life business is resilient and delivered robust profits. We continued to focus on value over volume reducing sales of capital intensive with-profit products. Sales through Credit du Nord grew 13%, a successful performance in a challenging market.

Spain, despite difficult economic conditions, delivered record operating profits of £216 million. As part of our focus on delivering good value and service for customers we introduced a new unit-linked product, helping to support our strong life new business IRR at 23%.

In Italy our key focus was value over volume, taking strong actions to reduce sales of capital intensive with-profit products, resulting in increased life operating profits and a smaller Italian balance sheet. Our general insurance business in Italy was significantly impacted by adverse development on prior year reserves in motor. We initiated management actions to start to return COR to Group target.

In Poland we refocused our direct sales force ahead of pension legislation changes, equipping them with the skills and tools to offer customers a broader range of insurance products. This resulted in significant growth in unit-linked products, protection sales and general insurance.

<sup>11</sup> The Group's accounting policy for operating profit (also referred to as Group adjusted operating profit) remains consistent with prior periods and is set out on page 168.

<sup>12</sup> Excluding Delta Lloyd.

<sup>13</sup> Includes £11 million of fund management operating profit.

<sup>14</sup> Excludes Aviva Re and agencies in run-off.

<sup>15</sup> Q3 2010 ABI returns.

We are combining the Irish business with the UK to improve competitiveness and efficiency and management actions have begun to capitalise on our UK capability and scale.

In Russia and Turkey our life and pension sales growth continues as we begin to take advantage of the market potential.

In the short-term we expect that volume and mix in our mature markets of France, Italy and Spain, will be impacted by subdued consumer demand as a result of the macro-economic environment.

In the longer term our combination of life and general insurance, strong market franchises and our underwriting and pricing expertise will enable us to benefit from the significant opportunity in Europe.

## North America

- Operating profit<sup>16</sup> up 15% to £433 million
- Life operating profits up 13% to £197 million with sales down 17% at £3,932 million and life new business IRR of 14%
- General insurance operating profit up 14% to £254 million with net written premiums up 6% at £2,083 million and COR of 95%

In North America we produced a third consecutive year of growth in operating profits as a result of our pricing, sophisticated underwriting and cost management. While the insurance market in North America is exceptionally competitive, we improved operating profits by 15% and generated £0.4 billion of operating capital.

We increased profits in the US as a result of pricing discipline and the growth in profitability of our life and annuity in-force book. We've increased sales of life insurance products, which now account for more than a quarter of our total US sales. We've achieved this by offering attractive products which provide financial security for our customers, delivering excellent customer service and by maintaining deep relationships with our key distribution partners.

In Canada, where we are the second-largest general insurer, we continued to improve our results by focusing on profitable business, reducing our costs to make Aviva significantly more competitive and using technology to enhance our underwriting capabilities. We believe we are one of the more sophisticated insurers in the market at assessing and selecting risks.

We are confident that by maintaining strong pricing discipline, focusing on customer service, and building on strengths in underwriting, we will deliver further profitable growth.

## Asia Pacific

- Operating profit up 126% to £70 million
- Life operating profits up 52% to £108 million with sales up 10% to £1,782 million and life new business IRR of 13%<sup>17</sup>

We more than doubled operating profit as we redesigned and promoted products to address consumers' changing needs, reduced our costs and developed new ways to reach our customers, including internet sales and the introduction of Aviva Advisors in Singapore and Hong Kong.

We produced a strong performance in Singapore, where our bancassurance agreement with DBS Bank grew from strength to strength. This enabled us to reach more customers and contributed to a 56% increase in life and pension sales.

In China, a combination of regulatory changes, coupled with the impact of high interest rates on short term deposits led to reduced sales across the industry. Throughout this period, we continued to focus on building our customer base in the high-net-worth market, restructured our agency force and emphasised the importance of long term savings and retirement planning to our customers. As a result our profitability increased.

In India regulatory changes caused the industry to shift towards traditional endowment and protection products. We were early in identifying the trend and started to offer these products in 2010, resulting in significantly higher margins in 2011.

The longer-term outlook for our business in Asia remains positive with the low penetration rates of insurance products in many markets, high GDP growth, a growing middle-class and rising wealth. We remain focused on increasing our franchise value through profitable, organic growth.

## Aviva Investors

- Operating profit down 9% to £91 million
- Underlying<sup>18</sup> net funded external sales excluding liquidity funds up 137% to £5.6 billion
- 60% of institutional funds performed above benchmark
- Further improvement in internal and external client service rankings (Investit)

We achieved record net funded external sales up 137% on an underlying basis<sup>18</sup> with in addition £1 billion of committed but unfunded sales. We did this by focusing our sales effort on a range of core investment solutions and strategies in key institutional markets. Independent internal and external client service rankings also improved.

We continued to invest in our global infrastructure to support future business growth and meet the increasing expectations of regulators and clients. Combined with market movements and the impact of clients' lower risk appetite, this led to slightly lower operating profits of £91 million.

In the fourth quarter we reviewed our business to ensure we are well-placed to prosper despite challenging market conditions. We propose to streamline our business, concentrating on our core strengths in fixed income, real estate and multi asset solutions, and focusing sales and marketing activity on institutional markets.

We plan to scale back distribution to retail investors, although in the UK in particular we will continue to offer investment products and solutions to retail investors through Aviva and our network of banks, insurers and brokers.

<sup>16</sup> The Group's accounting policy for operating profit (also referred to as Group adjusted operating profit) remains consistent with prior periods and is set out on page 168.

<sup>17</sup> Excluding Taiwan, regional IRR is 14%.

<sup>18</sup> Underlying sales exclude an exceptional impact of -£0.5 billion arising from the sale of Aviva Investors' equity manufacturing business which completed on 1/10/2011.

# Key performance indicators

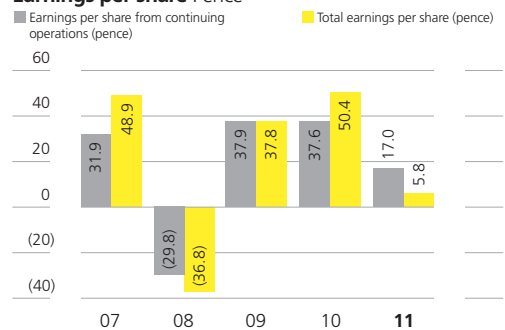

## Earnings per share

Our IFRS earnings per share for 2011 was 5.8 pence (2010: 50.4 pence). The decrease was driven by adverse investment return variances and economic assumption changes on long-term business partially offset by profit on sale of the RAC. Our IFRS earnings per share from continuing operations for 2011 was 17.0 pence (2010: 37.6 pence).

## Relevancy

- Focusing on earnings per share allows us to align our strategic priorities with what our shareholders receive.
- Total IFRS return takes into account everything affecting shareholder value, not just operating profits.

## Earnings per share Pence

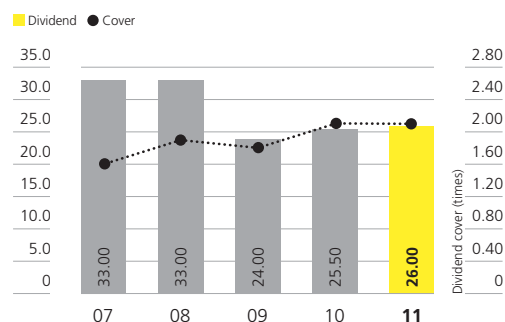

## Proposed ordinary dividend per share and dividend cover

Our Board has recommended a final dividend of 16.00 pence per share (2010: 16.00 pence). This brings the total dividend for the year to 26.00 pence and gives a dividend cover of 2.0 times (2010: 2.1 times) based on total adjusted operating earnings after tax.

- Our intention is to pay a dividend on a basis judged prudent using dividend cover of 1.5–2.0 times, while retaining capital to fund future growth.

## Proposed ordinary dividend per share and dividend cover Pence

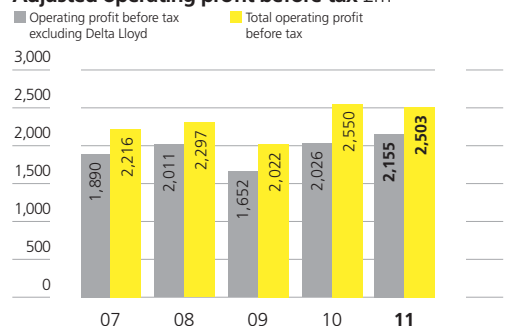

## Adjusted operating profit before tax

Adjusted operating profit<sup>1</sup> decreased by £47 million, or 2%, to £2,503 million (2010: £2,550 million). The decrease is impacted by the partial disposal of Delta Lloyd on 6 May 2011, which reduced Delta Lloyd's contribution to Aviva's operating profit.

Adjusted operating profit from continuing operations (excluding Delta Lloyd as an associate) increased by £129 million, or 6%, to £2,155 million (2010: £2,026 million), reflecting good performance in the UK long-term business, as well as in general insurance in Europe and North America.

- We aim to achieve steady sustainable growth in our operating profit. In seeking to achieve this growth, we continue to adopt strict financial management discipline underpinned by strong corporate governance.

## Adjusted operating profit before tax £m

## Worldwide sales

Worldwide sales from continuing operations decreased by £1,534 million, or 4%, to £40,555 million (2010: £42,089 million) reflecting management actions in respect of pricing and capital discipline in Europe and North America.

Long-term savings sales from continuing operations decreased by £2,174 million, or 6%, to £31,393 million (2010: £33,567 million). General insurance and health sales from continuing operations increased by £640 million, or 8%, to £9,162 million (2010: £8,522 million).

- While our focus is on capital efficiency and profit rather than volumes, sales remain an important indicator. Worldwide sales from continuing operations comprise the PVNBP of long-term savings new business sales and net written premiums from the general insurance and health businesses.

## Worldwide sales excluding Delta Lloyd £m

### Operating capital generation

Our focus on capital allocation and management has enabled us to achieve £2.1 billion of operating capital generation in 2011, up from £1.7 billion in 2010. Profits from existing life business remain strong, generating £2.3 billion of capital (2010: £2.1 billion), with a further £0.6 billion (2010: £0.6 billion) generated by the general insurance, fund management and non-insurance businesses. Capital invested in new business has reduced to £0.8 billion (2010: £1.0 billion) and includes investment in life new business of £0.9 billion, a reduction of £0.3 billion compared with 2010.

### Return on equity shareholders' funds

Return on IFRS equity shareholders' funds decreased to 12.0% (2010: 14.8%) as a result of growth in the capital base from £10.4 billion at the start of 2010 to £12.8 billion at the start of 2011, driven by profits in the period and actuarial gains on staff pension schemes.

### Employee engagement and leadership

Key performance indicators relating to our employees' views on Aviva are based on questions in our annual global 'Employee Promise' survey. We report and set targets in line with global financial services (GFS) benchmark norms and monitor our internal performance by using our historical data to assess annual progress.

### Customer advocacy

The 2011 Relationship Net Promoter Score<sup>®1</sup> survey showed an improvement on 2010.<sup>2</sup> We maintained the proportion of businesses operating in the upper quartile (relative to local competition benchmarks), and reduced the proportion of business operating below the market average as they moved into a market average position. We are pleased with the progress made however we are committed to improving the performance of our markets which are below the market average.

### Relevancy

- Operating capital generation is the operating movement in our free capital in the year.
- Return on equity shareholders' funds is calculated as total after-tax operating return, on opening equity shareholders' funds, including life profits.
- Employee engagement represents the degree to which people believe Aviva is a great place to work and are contributing to help meet our collective goals and ambitions.
- The survey results are used each year to determine and implement actions with the aim of achieving continuous improvement. The survey measures employees' perceptions of leadership, engagement and more, verifying alignment with our strategic direction and immediate business plans.
- Our aim is to improve both measures over time and meet or exceed a global financial services benchmark.
- Customer advocacy gives us, in a single, simple measure, an accurate predictor of customer retention and cross-sell opportunity.

## Financial and operating performance

We are the sixth-largest insurance group in the world based on gross worldwide premiums for the 2010 year.

Our main activities are the provision of products and services in relation to long-term insurance and savings, fund management and general insurance.

### Factors affecting results of operations

Our financial results are affected, to some degree, by a number of external factors, including demographic trends, general economic and market conditions, government policy and legislation and exchange rate fluctuations. See 'Performance review – Risk and capital management' for more information on risks associated with these and other factors. In addition, our financial results are affected by corporate actions taken by the Group, including acquisitions, disposals and other actions aimed at achieving our stated strategy. We believe that all of these factors will continue to affect our results in the future.

### Demographic trends

Our results are affected by the demographic make-up of the countries in which we operate. The types of products that we sell reflect the needs of our customers. For example, in regions and countries with a high proportion of older people, a larger proportion of our sales will reflect their needs for pre- and post-retirement planning. Our sales levels will also be impacted by our ability to help provide useful information to such policyholders on retirement planning and to offer products that are competitive and respond to such policyholders' needs.

In our long-term insurance and savings business we make assumptions about key non-economic factors, such as the mortality rate that we expect to be experienced by our policyholders. In countries where the life expectancy is growing, this will need to be reflected in our pricing models as lower mortality rates will increase profitability of life insurance products but will reduce the returns on annuity products. We review our assumptions against our own experience and industry expectations.

### Economic conditions

Our results are affected by the levels of economic activity in our geographic markets and, consequently, by economic cycles in those markets. High levels of general economic activity typically result in high levels of demand for, and sales of, our products and services. Economic activity in turn is affected by government monetary and fiscal policy as well as by global trading conditions and external shocks such as terrorist activity, war and oil price movements.

During 2010, we saw improved economic activity across our regions. Although customers continued to prefer cash deposits, we saw movement towards investment products resulting in increased investment sales, primarily across Europe and Asia.

During 2011, concerns over slowing economic growth, higher levels of sovereign debt within, and to a lesser degree outside, the eurozone, the stability and solvency of financial institutions, longer-term low interest rates in developed markets, inflationary threats as well as geopolitical issues have contributed to increased volatility in the financial markets. The continued market volatility across global financial markets saw customers reassert their preference for less complex products and reduce their exposure to investment markets.

### Capital and credit market conditions

An important part of our business involves investing clients, policyholders and shareholders funds across a wide range of financial investments, including equities, fixed income securities and properties. Our results are sensitive to volatility in the market value of these investments, either directly because we bear some or all of the investment risk, or indirectly because we earn management fees

for investments managed on behalf of policyholders. Investment market conditions also affect the demand for a substantial portion of our life insurance products. In general, rising equity price levels have a positive effect on the demand for equity-linked products, such as unit trusts and unit-linked life insurance products, and conversely have a negative effect on the demand for products offering fixed or guaranteed minimum rates of return. Declining equity price levels tend to have the opposite effects.

During 2011, the continued market volatility impacted our results of operations. The total adverse life investment variance of £1,616 million (2010: £791 million positive) included a negative variance of £820 million relating to Delta Lloyd for the first four months of the year prior to its deconsolidation.

Over the period from the start of 2011 to the partial disposal of Delta Lloyd on 6 May 2011, the AAA collateralised bond spread narrowed by about 80bps as a result of changes in the underlying bond index. This movement was the main driver of the negative variance of £820 million noted above, largely reversing the positive variance reported in the prior year.

For continuing operations, the adverse life investment variance of £796 million relates largely to the impact of lower risk-free interest rates, wider credit spreads and increased market volatility in the UK and Europe. Any future increases in credit spreads on corporate and government bonds would cause further negative investment variances.

The additional allowances for credit defaults on UK corporate bonds and commercial mortgages remain at overall consistent levels.

### With-profits business

We write products through our with-profits funds mainly in our UK operating segment, with smaller funds in Ireland and Singapore. These funds enable policyholders to participate in a large pool of diverse investments, therefore reducing their exposure to individual securities or asset classes. The investment pool is managed by us with returns to with-profits policyholders paid through bonuses which are added to the value of their policy. In order to provide an element of stability in the returns to policyholders, bonuses are designed to reduce policyholders' exposure to the volatility of investment returns over time and to provide an equitable share of surplus earned, depending on the investment and operating performance of the fund. Shareholders also have a participating interest in the with-profit funds and any declared bonuses. Generally, policyholder and shareholder participation in with-profit funds in the UK is split 90:10.

The level of bonuses declared to policyholders is influenced by the actual returns on investments and our expectation of future rates of return. While bonuses can never be negative, a predicted sustained fall in equity markets could lead to a reduction in regular and final bonus rates, thereby reducing both policyholder returns and shareholders' profit under IFRS. During 2008 and 2009, the worsening economic conditions impacted UK bonus levels but the annual effect of this for both policyholders and shareholders was offset by the benefit from the one-off special bonus mentioned below. Improving investment returns over 2010 increased bonus rates although the impact of smoothing inherent within bonus calculations meant that this was not universal. In 2011, low investment returns and the difficult economic outlook led to reductions in regular and final bonus rates.

Shareholders' profits arising on with-profits business under IFRS depend on the total bonuses declared to policyholders on an annual basis. A special bonus distribution was announced for policyholders of two of our UK with-profits funds, with the final payment made in 2010. This special bonus reflected the financial strength of those funds, and provided an uplift to IFRS profits in 2008, 2009 and 2010. The uplift in 2010 was approximately £58 million, net of tax. No special bonus was paid in 2011.

### General insurance and health underwriting cycle

Our general insurance and health business is comprised of our property and casualty insurance and health insurance operations. In 2011, general insurance and health sales accounted for 32% of group net written premiums from continuing operations. Demand for general insurance is usually price-sensitive because of the limited degree of product differentiation inherent in the industry. As a result, the price of insuring property and casualty risks is subject to a cycle (called an underwriting cycle). In periods when the price of risk is high, the high profitability of selling insurance attracts new entrants and hence new capital into the market. Increased competition however drives prices down. Eventually the business becomes uneconomic and some industry players, suffering from losses, exit the market while others fail, resulting in lower capital invested within the market. Decreased competition leads to increasing prices, thereby repeating the cycle. Although our various general insurance markets are not always at the same stage of the underwriting cycle, price competition has been increasing within the UK and the rest of the world across most of our general insurance business lines in recent years. We are now seeing evidence of increased rating discipline in the UK resulting from volatile investment markets.

We expect the underwriting cycle to continue in the future but to be less pronounced than in the past because of structural changes to the industry over the past decade. Capital markets are imposing financial discipline by being increasingly more demanding about performance from insurance companies before extending new capital. Such discipline, together with the increased concentration of competitors within the market, recent natural disasters and the adoption of more scientific pricing methods, is expected to make the underwriting cycle less pronounced in the future.

### Natural and man-made disasters

Our general insurance and health business results are affected by the amount of claims we need to pay out which, in turn, can be subject to significant volatility depending on many factors, including natural and man-made disasters. Natural disasters arise from adverse weather, earthquakes and other such natural phenomena. Man-made disasters include accidents and intentional events, such as acts of terrorism. These events are difficult to predict with a high degree of accuracy, although they generally occur infrequently at a material level. Our exposure to large disasters has been somewhat reduced through the recent strategic refocusing of our general insurance business mainly towards personal lines business and small- to medium-sized commercial risks. The Group cedes much of its worldwide catastrophe risk to third-party reinsurers but retains a pooled element for its own account gaining diversification benefit. See 'Financial statements IFRS – Note 56 – Risk Management' and 'Financial statements IFRS – Note 42 – Reinsurance Assets'.

In 2009, the UK, Ireland and France incurred some weather-related losses. In 2010, the UK was impacted by severe freezes in January, November and December. In 2011, France and Ireland were impacted by storm and flood losses and Canada incurred losses from a wildfire in Slave Lake.

### Government policy and legislation

Changes in government policy and legislation applicable to our business in many of the markets in which we operate, particularly in the UK, may affect the results of our operations. These include changes to the tax treatment of financial products and services, government pension arrangements and policies, the regulation of selling practices and the regulation of solvency standards. Such changes may affect our existing and future business by, for example, causing customers to cancel existing policies, requiring us to change our range of products and services, forcing us to

redesign our technology, requiring us to retrain our staff or increase our tax liability. As a global business, we are exposed to various local political, regulatory and economic conditions, and business risks and challenges which may affect the demand for our products and services, the value of our investments portfolio and the credit quality of local counterparties. Our regulated business is subject to extensive regulatory supervision both in the UK and internationally. For details please refer to the section 'Shareholder information – Regulation'.

### Exchange rate fluctuations

We publish our consolidated financial statements in pounds sterling. Due to our substantial non-UK operations, a significant portion of our operating earnings and net assets are denominated in currencies other than sterling, most notably the euro and the US dollar. As a consequence, our results are exposed to translation risk arising from fluctuations in the values of these currencies against sterling. Total foreign currency movements during 2011 resulted in a loss recognised in the income statement of £35 million, compared to a £34 million gain in 2010.

We generally do not hedge foreign currency revenues, as we prefer to retain revenue locally in each business to support business growth, to meet local and regulatory market requirements and to maintain sufficient assets in local currency to match local currency liabilities.

Movements in exchange rates may affect the value of consolidated shareholders' equity, which is expressed in sterling. Exchange differences taken to other comprehensive income arise on the translation of the net investment in foreign subsidiaries, associates and joint ventures. This aspect of foreign exchange risk is monitored centrally against limits that we have set to control the extent to which capital deployment and capital requirements are not aligned. We use currency borrowings and derivatives when necessary to keep currency exposures within these predetermined limits, and to hedge specific foreign exchange risks when appropriate; for example, in any acquisition or disposal activity. During 2011, sterling strengthened in value against the euro, but marginally weakened against the dollar, resulting in a foreign currency loss in other comprehensive income from continuing operations of £254 million (2010: £55 million gain).

The impact of these fluctuations is limited to a significant degree, however, by the fact that revenues, expenses, assets and liabilities within our non-UK operations are generally denominated in local currencies.

### Subsequent events

In January 2012, we announced the sale of our Czech Republic, Hungary and Romania life and pensions businesses to MetLife Inc. The transaction, which is subject to regulatory approvals in each jurisdiction, is expected to be completed during 2012. Further details can be found in the section 'Financial statements IFRS – Note 3c – Subsidiaries'.

Following a detailed structural review, Aviva has proposed to make its Irish business part of a new UK and Ireland region, aligning many of the activities and services provided for customers. The Irish business would benefit from Aviva UK's investment in technology, underwriting capability and significant purchasing power, enabling Aviva Ireland to offer more competitive pricing and to introduce new products and services.

Aviva's distribution arrangement with Allied Irish Bank (AIB) for long-term business will cease in 2012 and the bancassurance partnership with AIB is being unwound. A strategic review is underway to determine the most effective distribution channels going forward. Further details can be found in the section 'Financial statements IFRS – Note 3c – Subsidiaries'.

### Acquisitions and disposals

Over the last three years we have engaged in a series of acquisitions and disposals, some of which have had a material impact on our results. These transactions reflect our strategic objectives of maximising value for our shareholders by building top five positions in key markets, withdrawing from lines of business or markets that do not offer the potential for market-leading positions and taking advantage of particular opportunities as they arise.

#### Activity in 2011

On 6 May 2011, the Group sold 25 million shares in Delta Lloyd reducing our holding to 42.7% (41.9% as at 31 December 2011) of Delta Lloyd's ordinary share capital, representing 40% (39.3% as at 31 December 2011) of shareholder voting rights. Accordingly, the Group has ceased to consolidate the results of Delta Lloyd in its financial statements.

Cash consideration of £380 million was received for the sale of shares, and £8 million of costs were attributable to the disposal transaction.

The transaction resulted in the loss of control of a major geographical area of operations, previously presented as 'Delta Lloyd' in the segmental reporting note. The results of Delta Lloyd as a subsidiary for 2011 as well as those for the comparative periods have therefore been classified as discontinued operations. The Group's share of the profits of its retained interest in Delta Lloyd as an associate are shown separately within continuing operations.

On 30 September 2011, the Group sold RAC Limited (RAC) to The Carlyle Group for £977 million, realising a profit of £532 million. Aviva is continuing its commercial relationship with RAC, both as a key underwriter of motor insurance on RAC's panel and as a partner selling RAC breakdown cover to our customers. The Group has retained the RAC (2003) Pension Scheme which, at 31 December 2011, had an IAS 19 deficit of £51 million.

On 1 October 2011, the Group sold its Australian fund management business, Aviva Investors Australia Ltd, to nabInvest, National Australia Bank's direct asset management business, for £35 million, which includes contingent consideration with a fair value of £3 million. This resulted in a profit on disposal of £20 million, increased to £23 million after recycling £3 million from currency translation reserve to the income statement.

#### Activity in 2010

On 17 February 2010, we sold our 35% holding in Sogessur SA to that company's main shareholder for a consideration of £35 million, realising a profit on disposal of £24 million.

On 24 February 2010, we acquired 100% of River Road Asset Management, a US equity manager, to support the expansion of Aviva Investors' third-party institutional asset management business. The total consideration was estimated as £83 million (US\$128 million).

On 31 December 2010, the Group entered into transactions with RBS Group plc (RBSG) and agreed that, with effect from 31 December 2010, the Group would take ownership of the back book of RBS Life in exchange for RBSG taking 100% ownership of RBS Collective. Separately, a new distribution agreement was signed between our UK Life business and RBSG, with the new structure providing more flexibility in our long-term business operations.

#### Activity in 2009

On 1 October 2009, we completed the sale of our Australian life and pension business and wealth management platform to National Australia Bank for A\$902 million (£443 million). The sale supported Aviva's strategy of focusing on the key growth markets in Asia where leading positions can be achieved.

On 3 November 2009, we completed the Initial Public Offering (IPO) of approximately 42% of Delta Lloyd N.V. raising €1.1 billion (£1 billion). The IPO enabled Aviva to monetise part of its holding in Delta Lloyd, giving Aviva greater financial flexibility, including the option to explore balance sheet restructuring and further growth opportunities.

Continuing with the Group's strategy to exit non-core operations, we disposed of the British School of Motoring Limited for a consideration of £4 million.

### Basis of earnings by line of business

Our earnings originate from three main lines of business: our long-term insurance and savings business, which includes a range of life insurance and savings products; fund management, which manages funds on behalf of our long-term insurance and general insurance businesses, external institutions, pension funds and retail clients; and general insurance and health, which focuses on personal and commercial lines. These lines of business are present in our various operating segments to a greater or lesser extent. In the UK, we have major long-term insurance and savings businesses and general insurance businesses; in Europe we have long-term insurance and savings businesses in all countries in which we operate, large general insurance businesses in France, Ireland and Italy, and smaller general insurance operations in several other countries; in North America we have a large long-term insurance and savings business in the US and a major general insurance business in Canada; in Asia Pacific we predominantly have long-term insurance and savings businesses. Our fund management businesses operate across all our four regions.

### Long-term insurance and savings business

For most of our life insurance businesses, such as those in the UK and France, operating earnings are generated principally from our in-force books of business. Our in-force books consist of business written in prior years and on which we continue to generate profits for shareholders. Nevertheless new business written in these markets, with the exception of our UK with-profits business which is discussed below, has a significant direct effect on our operating earnings. Under IFRS, certain costs incurred in acquiring new business must be expensed thereby typically giving rise to a loss in the period of acquisition, though the degree of this effect will depend on the pricing structure of product offerings. In markets where we have experienced strong growth in recent years, such as Spain, Italy, the US and Asia, current year sales have a more significant effect on current year operating earnings.

### UK with-profits business

With-profits products are designed to pay policyholders smoother investment returns through a combination of regular bonuses and final bonuses. Shareholders' profit emerges from this business in direct proportion to policyholder bonuses, as shareholders receive up to one-ninth of the value of each year's bonus declaration to policyholders. Accordingly, the smoothing inherent in the bonus declarations provides for relatively stable annual shareholders' profit from this business. The most significant factors that influence the determination of bonus rates are the return on the investments of the with-profits funds and expectations about future investment returns. Actual and expected investment returns are affected by, among other factors, the mix of investments supporting the with-profits fund, which in turn is influenced by the extent of the inherited estate within the with-profits fund.

The annual excess of premiums and investment return over operating expenses, benefit provisions and claims payments within our with-profits funds that are not distributed as bonuses and related shareholders' profit is transferred from the income statement to the unallocated divisible surplus. Conversely, if a shortfall arises one year, for example because of insufficient investment return, a transfer out of the unallocated divisible surplus finances bonus declarations and related shareholders' profit.

The unallocated divisible surplus consists of future (as yet undetermined) policyholder benefits, associated shareholders' profit and the orphan estate. The orphan estate serves as working capital for our with-profits funds. It affords the with-profits fund a degree of freedom to invest a substantial portion of the funds' assets in investments yielding higher returns than might otherwise be obtainable without being constrained by the need to absorb the cash-flow strain of writing large volumes of new business and the need to demonstrate solvency.

#### **Other participating business**

Outside of the UK, most of our long-term operations write participating business. This is predominantly savings or pensions business, where the policyholders receive guaranteed minimum investment returns, and additional earnings are shared between policyholders and shareholders in accordance with local regulatory and policy conditions. This may also be referred to as "with-profits" business.

#### **Other long-term insurance and savings business**

Non-profit business falls mainly into two categories: investment type business and risk cover and annuity business. Investment type business, which accounts for most of our non-profit business, includes predominantly unit-linked life and pensions business where the risk of investing policy assets is borne entirely by the policyholder. In addition, investment type business includes life and pensions business where the risk of investing policy assets is typically shared between policyholders and shareholders, subject to a minimum rate of investment return guaranteed to policyholders. Operating earnings arise from unit-linked business when fees charged to policyholders based on the value of the policy assets exceed costs of acquiring new business and administration costs. In respect of remaining investment type business, investment return generated from policy assets has an effect on operating earnings though this is often non-proportional. Finally, in respect of all investment type business, shareholders bear the risk of investing shareholder capital in support of these operations.

Risk cover business includes term assurance, or term life insurance business. Annuity business includes immediate annuities purchased for individuals or on a bulk purchase basis for groups of people. The risk of investing policy assets in this business is borne entirely by the shareholders. Operating earnings arise when premiums, and investment return earned on assets supporting insurance liabilities and shareholder capital, exceed claims and benefit costs, costs of acquiring new business and administration costs.

#### **General insurance and health business**

Operating earnings within our general insurance and health business arise when premiums and investment return earned on assets supporting insurance liabilities and shareholder capital, exceed claims costs, costs of acquiring new business and administration costs.

#### **Fund management**

Fund management operating earnings consist of fees earned for managing policyholder funds and external retail and institutional funds on behalf of clients, net of operating expenses.

Arrangements for the management of proprietary funds are conducted on an arm's length basis between our fund management and insurance businesses. Such arrangements exist mainly in the UK, France, Ireland, the US and Canada. Proprietary insurance funds in other countries are externally managed.

#### **Other business**

Other business includes our operations other than insurance and fund management. This primarily consisted of the RAC roadside recovery operation in the UK up to its sale on 30 September 2011.

#### **Financial highlights**

The following analysis is based on our consolidated financial statements and should be read in conjunction with those statements. In order to fully explain the performance of our business, we discuss and analyse the results of our business in terms of certain financial measures which are based on 'non-GAAP measures' and which we use for internal monitoring and for executive remuneration purposes. We review these in addition to GAAP measures, such as profit before and after tax.

#### **Non-GAAP measures**

##### **Sales**

The total sales of the Group consist of long-term insurance and savings new business sales and general insurance and health net written premiums. We classify our long-term insurance and savings new business sales into the following categories:

#### **Long-term insurance and savings new business sales**

Sales of the long-term insurance and savings business consist of: Covered business or life, pensions and savings products:

- Insurance and participating investment business
  - This includes traditional life insurance, annuity business and with-profits business
  - There is an element of insurance risk borne by the Group therefore, under IFRS, these are reported within net written premiums.
- Non-participating investment business
  - This includes unit-linked business and pensions business
  - The amounts received for this business are treated as deposits under IFRS and an investment management fee is earned on the funds deposited
  - For new business reporting in the UK, companies continue to report non-participating investment business within their 'covered business' sales, in line with the historic treatment under UK GAAP.

Non-covered business or investment sales:

- These include retail sales of mutual fund type products such as unit trusts and OEICs.
  - There is no insurance risk borne by the Group therefore under IFRS, these are treated as deposits and investment management fee income is earned on the funds deposited. These have never been treated as 'covered business' for long-term insurance and savings reporting so we show these separately as investment sales.

Sales is a non-GAAP financial measure and key performance indicator that we report to our key decision makers in the businesses in order to assess the value of new business from our customers and compare performance across the markets in which we operate. We consider sales to be a critical indicator of new business, and are the basis on which we provide analysis of our results to our shareholders and analysts. The non-GAAP measure of sales is also used internally in the determination of bonus awards as an executive performance measure.

For long-term insurance and savings new business, we define sales as the sum of the present value of new business premiums (PVNBP) of life, pension and savings products and investment sales.

PVNBP is equal to total single premium sales received in the year plus the discounted value of annual premiums expected to be received over the terms of newly incepted contracts and is calculated as at the date of sale. We adjust annual premiums to reflect the expected stream of business coming from this new business over future years. In the view of management, this performance measure better recognises the relative economic value of regular premium contracts compared to single premium contracts. PVNBP is a European insurance industry standard measure of new business.

For our long-term insurance and savings business, we believe that sales is an important measure of underlying performance and a better measure for new business than IFRS net written premiums. We consider the use of sales over IFRS net written premiums provides:

- Consistent treatment of long-term insurance and investment contracts: IFRS net written premiums do not include deposits received on non-participating investment contracts. Long-term insurance contracts and participating investment contracts also contain a deposit component, which are included in IFRS net written premiums, in addition to an insurance risk component. Therefore, to appropriately assess the revenue generated on a consistent basis between types of contracts, we evaluate the present value of new business sales of long-term insurance and investment products on the basis of total premiums and deposits collected, including sales of mutual fund type products such as unit trusts and OEICs.
- Better reflection of the relative economic value of regular premium contracts compared to single premium contracts: sales recognise the economic value of all expected contractual cash flows for regular premium contracts in the year of inception, whereas IFRS net written premiums only recognise premiums received in the year.
- Better reflection of current management actions in the year: IFRS net written premiums include premiums on regular premium contracts which incepted in prior years, and therefore reflect the actions of management in prior years.

In comparison to IFRS net written premiums, sales do not include premiums received from contracts in-force at the beginning of the year, even though these are a source of IFRS revenue, as these have already been recognised as sales in the year of inception of the contract. In addition, unlike IFRS net written premiums, sales do not reflect the effect on premiums of any increase or decrease in persistency of regular premium contracts compared to what was assumed at the inception of the contract.

PVNBP is not a substitute for net written premiums as determined in accordance with IFRS. Our definition of sales may differ from similar measures used by other companies, and may change over time.

#### General insurance and health sales

General insurance and health sales are defined as IFRS net written premiums, which are premiums written during the year net of amounts reinsured with third parties, as set out in the segmental analysis of results in 'Financial statements IFRS – Note 4 – Segmental information'. For sales reporting, we use the GAAP measure for general insurance and health business.

The table below presents our consolidated sales for the three years ended 31 December 2011, 2010 and 2009 for our continuing operations, as well as the reconciliation of sales to net written premiums in IFRS.

	2011 Continuing operations £m	2010 Continuing operations £m	2009 Continuing operations £m
Long-term insurance and savings new business sales	31,393	33,567	31,546
General insurance and health sales	9,162	8,522	8,030
<b>Total sales</b>	<b>40,555</b>	<b>42,089</b>	<b>39,576</b>
Less: Effect of capitalisation factor on regular premium long-term business	(7,020)	(6,378)	(6,883)
Share of long-term new business sales from joint ventures and associates	(604)	(1,446)	(1,277)
Annualisation impact of regular premium long-term business	(611)	(431)	(454)
Deposits taken on non-participating investment contracts and equity release contracts	(4,577)	(3,803)	(3,481)
Retail sales of mutual fund type products (investment sales)	(3,473)	(3,387)	(3,208)
Add: IFRS gross written premiums from existing long-term business	5,142	4,410	5,185
Less: long-term insurance and savings business premiums ceded to reinsurers	(1,085)	(983)	(1,685)
<b>Total IFRS net written premiums</b>	<b>28,327</b>	<b>30,071</b>	<b>27,773</b>
Analysed as:			
Long-term insurance and savings net written premiums	19,165	21,549	19,743
General insurance and health net written premiums	9,162	8,522	8,030
	<b>28,327</b>	<b>30,071</b>	<b>27,773</b>

#### ■ **Effect of capitalisation factor on regular premium long-term business:**

PVNBP is derived from the single and regular premiums of the products sold during the financial period and is expressed at the point of sale. The PVNBP calculation is equal to total single premium sales received in the year plus the discounted value of regular premiums expected to be received over the term of the new contracts. The discounted value of regular premiums is calculated using the market consistent embedded value methodology proposed by the CFO Forum Principles.

The discounted value reflects the expected income streams over the life of the contract, adjusted for expected levels of persistency, discounted back to present value. The discounted value can also be expressed as annualised regular premiums multiplied by a weighted average capitalisation factor (WACF). The WACF varies over time depending on the mix of new products sold, the average outstanding term of the new contracts and the projection assumptions.

#### ■ **Share of long-term new business sales from joint ventures and associates:**

Total long-term new business sales include our share of sales from joint ventures and associates. Under IFRS reporting, premiums from these sales are excluded from our consolidated accounts, with only our share of profits or losses from such businesses being brought into the income statement separately.

#### ■ **Annualisation impact of regular premium long-term business:**

As noted above, the calculation of PVNBP includes annualised regular premiums. The impact of this annualisation is removed in order to reconcile the non-GAAP new business sales to IFRS premiums and will vary depending on the volume of regular premium sales during the year.

#### ■ **Deposits taken on non-participating investment contracts and equity release contracts:**

Under IFRS, non-participating investment contracts are recognised on the statement of financial position by recording the cash received as a deposit and an associated liability and are not recorded as premiums received in the income statement. Only the margin earned is recognised in the income statement.

### ■ Retail sales of mutual fund type products (investment sales):

Investment sales included in the total sales number represent the cash inflows received from customers to invest in mutual fund type products such as unit trusts and OEICs. We earn fees on the investment and management of these funds which are recorded separately in the IFRS income statement as 'fees and commissions received' and are not included in statutory premiums.

### ■ IFRS gross written premiums from existing long-term business:

The non-GAAP measure of long-term and savings sales focuses on new business written in the year under review while the IFRS income statement includes premiums received from all business, both new and existing.

### Adjusted operating profit

We report to our chief operating decision makers in the businesses the results of our operating segments using a financial performance measure we refer to as 'adjusted operating profit'. We define our segment adjusted operating profit as profit before income taxes and non-controlling interests in earnings, excluding the following items: investment return variances and economic assumption changes on long-term and non-long-term business, impairment of goodwill, joint ventures and associates, amortisation and impairment of other intangibles (excluding the acquired value of in-force business), profit or loss on the disposal of subsidiaries and associates, integration and restructuring costs and exceptional items.

While these excluded items are significant components in understanding and assessing our consolidated financial performance, we believe that the presentation of adjusted operating profit enhances the understanding and comparability of the underlying performance of our segments by highlighting net income attributable to ongoing segment operations.

Adjusted operating profit for long-term insurance and savings business is based on expected investment returns on financial investments backing shareholder and policyholder funds over the period, with consistent allowance for the corresponding expected movements in liabilities. The expected rate of return is determined using consistent assumptions between operations, having regard to local economic and market forecasts of investment return and asset classification. Where assets are classified as fair value through profit and loss, expected return is based on the same assumptions used under embedded value principles for fixed income securities, equities and properties. Where fixed interest securities are classified as available for sale, such as in the US, the expected return comprises interest or dividend payments and amortisation of the premium or discount at purchase. Adjusted operating profit includes the effect of variances in experience for non-economic items, such as mortality, persistency and expenses, and the effect of changes in non-economic assumptions. Changes due to economic items, such as market value movement and interest rate changes, which give rise to variances between actual and expected investment returns, and the impact of changes in economic assumptions on liabilities, are disclosed as non-operating items.

Adjusted operating profit for non-long-term insurance business is based on expected investment returns on financial investments backing shareholder funds over the period. Expected investment returns are calculated for equities and properties by multiplying the opening market value of the investments, adjusted for sales and purchases during the year, by the longer-term rate of return. This rate of return is the same as that applied for the long-term business expected returns. The longer-term return for other investments is the actual income receivable for

the period. Changes due to market value movement and interest rate changes, which give rise to variances between actual and expected investment returns, are disclosed as non-operating items. The impact of changes in the discount rate applied to claims provisions is also treated outside adjusted operating profit.

Adjusted operating profit is not a substitute for profit before income taxes and non-controlling interests in earnings or net income as determined in accordance with IFRS. Our definition of adjusted operating profit may differ from similar measures used by other companies, and may change over time.

The table below presents our consolidated adjusted operating profit for the three years ended 31 December 2011, 2010 and 2009, as well as the reconciliation of adjusted operating profit to profit before tax attributable to shareholders' profits under IFRS.

### Sales (from continuing operations)

#### Year ended 31 December 2011

Sales in 2011 decreased £1,534 million, or 4%, to £40,555 million (2010: £42,089 million). Sales in the UK increased for both long-term insurance and savings, by £1,158 million, or 10%, to £13,004 million (2010: £11,846 million) and general insurance and health increased by £373 million, or 8%, to £4,912 million (2010: £4,539 million). Sales in Europe for long-term business and savings, decreased by £2,650 million, or 18%, to £12,237 million (2010: £14,887 million) and was primarily driven by management actions to reduce sales of capital intensive participating business in France and Italy. Sales in Europe for general insurance and health increased by £106 million, or 5%, to £2,059 million (2010: £1,953 million) primarily driven by successful pricing actions in personal motor and growth in health sales in Ireland. North America long-term insurance and savings sales decreased by £796 million, or 17%, to £3,932 million (2010: £4,728 million), and general insurance sales increased by £125 million, or 6%, to £2,083 million (2010: £1,958 million). Sales in Asia Pacific increased £150 million, or 7%, to £2,328 million (2010: £2,178 million) due to higher life and pension sales from bancassurance channels.

#### Year ended 31 December 2010

Sales in 2010 were £42,089 million, an increase of £2,513 million, or 6%, from £39,576 million in 2009. Sales in the UK increased for both long-term insurance and savings (19% increase on 2009) and general insurance and health (6% increase on 2009). Europe sales were slightly higher at £16,840 million (2009: £16,258 million) with lower sales in Poland and Spain and offsetting growth in Italy and Other Europe. North America long-term insurance and savings sales increased by 4%, or £183 million, and general insurance sales increased by 9%, or £158 million. Sales in Asia Pacific decreased by £534 million, or 20%, with the impact of the sale of the Australian life business in 2009 more than offsetting growth in other Asian markets.

### Income (from continuing operations)

#### Year ended 31 December 2011

Net written premiums in 2011 decreased by £1,744 million, or 6%, to £28,327 million (2010: £30,071 million). General and health insurance increased by £640 million, or 8%, to £9,162 million (2010: £8,522 million), with growth primarily in the UK, Europe and North America. Long-term insurance and savings decreased by £2,384 million, or 11%, to £19,165 million (2010: £21,549 million), driven by lower sales in Europe and North America.

#### Year ended 31 December 2010

Net written premiums in 2010 were £30,071 million, an increase of £2,298 million, or 8%, from £27,773 million in 2009. All regions reported increases on 2009 levels. General and health insurance increased by 6% on 2009, and life insurance and savings increased by 9%, fuelled by strong annuity sales in the UK. Europe reported a £586 million increase in net written premiums over 2009, while North America and Asia showed increases in net written premiums of 4% (£267 million) and 27% (£124 million) respectively.

### Net investment income (from continuing operations)

#### Year ended 31 December 2011

Net investment income for the year decreased by £12,758 million, or 68%, to £5,991 million (2010: £18,749 million). Investment returns were impacted by continued market volatility in 2011 resulting in higher unrealised losses on investments (2010: unrealised gains).

#### Year ended 31 December 2010

Net investment income for the year was £18,749 million, a decrease of £3,161 million (2009: £21,910 million). Investment returns were generally lower than in 2009, with lower unrealised gains on investments in 2010 and improved fair value adjustments on investment properties.

### Other income (from continuing operations)

#### Year ended 31 December 2011

Other income (which consists of fee and commission income, share of profit/(loss) after tax of joint ventures and associates, and profit on disposal of subsidiaries and associates) increased by £167 million, or 10%, to £1,921 million in 2011 (2010: £1,754 million). The increase was primarily due to the profit on disposal of RAC of £532 million, which was partly offset by a loss from Aviva's share of joint ventures and associates of £123 million (2010: £141 million profit).

#### Year ended 31 December 2010

Other income increased by £532 million to £1,754 million in 2010 (2009: £1,222 million). The increase was primarily due to improved financial performance by joint ventures and associates, with the share of profit in the year being £141 million against a loss in 2009 of £463 million.

### Expenses (from continuing operations)

#### Year ended 31 December 2011

Claims and benefits paid net of reinsurance in 2011 increased by £2,016 million, or 8%, to £26,934 million (2010: £24,918 million) reflecting increased claims payments in our life businesses.

Changes in insurance liabilities in 2011 decreased by £2,878 million, or 44%, to a charge of £3,730 million (2010: £6,608 million). This was primarily due to changes in economic and non-economic assumptions.

The change in investment contract provisions of £1,224 million credit (2010: £8,693 million charge) was a result of deteriorating investment market conditions across our regions causing a decrease in contract liabilities.

The change in unallocated divisible surplus (UDS) was £2,721 million credit (2010: £362 million). UDS in Italy and certain funds in Spain and France are negative as at 31 December 2011, impacted by increased government bond yields. The change in UDS includes losses of £17 million in Italy and £49 million in Spain relating to negative UDS considered unrecoverable.

Fee and commission expense, other expenses and finance costs decreased by £56 million to £8,649 million (2010: £8,705 million). See 'Financial statements IFRS – Note 6 – Details of expenses'.

#### Year ended 31 December 2010

Claims and benefits paid net of reinsurance in 2010 were £24,918 million, an increase of £936 million over 2009 (2009: £23,982 million) reflecting the overall growth of the portfolio and surrender values. This included a marginal decrease in claims payments to general insurance and health policyholders.

Changes in insurance liabilities in 2010 were a charge of £6,608 million, an increase of £2,374 million on the prior year (2009: £4,234 million charge). This was primarily due to changes in economic and non-economic assumptions.

The change in investment contract provision of £8,693 million charge (2009: £10,946 million charge) was a result of improved investment markets across our regions resulting in increases in our contract liabilities.

The change in UDS of £362 million credit (2009: £1,479 million charge) reflected rising government bond yields in Italy, Spain and Ireland in the fourth quarter of 2010.

Fee and commission expense, other expenses and finance costs of £8,705 million decreased by £100 million from £8,805 million in 2009. Increased fee and commission expenses were offset by lower other expenses, impairment charges and finance costs: See 'Financial statements IFRS – Note 6 – Details of expenses'.

#### Profit/(loss) before tax attributable to shareholders' profits (from continuing operations)

##### Year ended 31 December 2011

Profit before tax attributable to shareholders was £813 million (2010: £1,545 million profit). The decrease was primarily due to the drop in net investment income.

##### Year ended 31 December 2010

Profit before tax attributable to shareholders in 2010 was £1,545 million against a profit of £1,795 million in 2009. The decrease was primarily due to the drop in net investment income, which was partially offset by an increase in premiums and a decrease in expenses.

#### Adjusting items (from continuing operations)

##### Year ended 31 December 2011

The investment return variances and economic assumption changes on long-term insurance business produced a £796 million charge (2010: £219 million charge). The short-term fluctuations and economic assumption changes on the non-life business produced a £356 million charge (2010: £260 million charge). This was due to unfavourable market movements in a number of our regions.

The impairment of goodwill, associates and joint ventures was £392 million in 2011 (2010: £23 million). An impairment of £217 million was recognised in respect of the associate, Delta Lloyd. The fair value has been calculated based on the market price of the ordinary shares of Delta Lloyd NV quoted on the NYSE Euronext Amsterdam as at 31 December 2011. Following the announcement of the termination of Aviva Ireland's bancassurance distribution contract, management reviewed the recoverability of the goodwill associated with this business and an impairment loss of £120 million was recognised, reducing

the carrying value of goodwill relating to this business to nil. The UK long-term business had an impairment of £29 million. In Italy, an impairment of £11 million was recognised in respect of Aviva Assicurazioni Vita Spa, as a result of a reduction in management's estimates for the future profitability of the business due to current economic circumstances. There was an impairment charge of £15 million recognised in respect of goodwill within interests in joint ventures relating to Korea.

Amortisation of intangibles decreased by £22 million, or 11%, to £171 million (2010: £193 million).

Profit on disposal of subsidiaries and associates was £565 million (2010: £163 million). The profit comprises principally of a £532 million profit in relation to the sale of RAC, as described in note 3 to the IFRS financial statements.

Integration and restructuring costs for 2011 were £268 million (2010: £225 million). This includes costs associated with preparing the businesses for Solvency II implementation of £96 million, a £30 million charge in the UK relating to the reattribution of the inherited estate and expenditure relating to the Quantum Leap project in Europe of £51 million. Expenditure relating to other restructuring exercises across the group amounted to £91 million.

Exceptional items in 2011 were £57 million unfavourable (2010: £276 million favourable) relating to a £22 million provision for compensation scheme costs for the leveraged property fund in Ireland, and a £35 million expense for the discounted cost of strengthening latent claims provisions in the UK written a significant number of years ago. In 2010, exceptional items mainly related to a £286 million benefit from the closure of the final salary section of the UK staff pension scheme.

##### Year ended 31 December 2010

The long-term insurance and savings business investment variances and economic assumption change was a £219 million charge (2009: £273 million gain) driven by a reversal of Aviva Europe's position going from a £194 million gain in 2009 to a £154 million charge in 2010 as economic conditions worsened.

The short-term fluctuations and economic assumption changes on the non-life business were a £260 million charge (2009: £175 million credit). This was due to unfavourable market movements in a number of our regions.

Impairment of goodwill was £23 million in 2010 (2009: £61 million). The charge primarily related to an impairment recognised in an Italian associate and £9 million against Taiwan.

Amortisation of intangibles increased by £68 million to £193 million in 2010 (2009: £125 million) due to a £66 million higher amortisation charge recognised in UK Life relating to an accelerated amortisation period for certain assets.

Profit on disposal of subsidiaries and associates was £163 million (2009: £122 million). The profit principally comprises of a £128 million profit in relation to the transaction with RBSG.

Integration and restructuring costs for 2010 was £225 million (2009: £286 million) including expenditures relating to restructuring programmes across the Group of £123 million; costs in relation to the European 'Quantum Leap' transformation programme of £40 million; and costs associated with preparing the businesses for Solvency II implementation of £59 million.

Exceptional items in 2010 were £276 million favourable (2009: £45 million favourable). This included a net gain on the closure of the UK pension schemes of £286 million.

#### Adjusted operating profit (from continuing operations)

##### Year ended 31 December 2011

Adjusted operating profit (including Delta Lloyd as an associate) increased by £286 million, or 14%, to £2,312 million (2010: £2,026 million) for the reasons set out above.

Adjusted operating profit (excluding Delta Lloyd) increased by £129 million, or 6%, to £2,155 million (2010: £2,026 million) for the reasons set out above.

#### Year ended 31 December 2010

Adjusted operating profit (excluding Delta Lloyd) increased by £374 million, or 23%, to £2,026 million (2009: £1,652 million) for the reasons set out above.

## Regional performance

### United Kingdom

Our operations in the UK consist of our long-term insurance and savings business, which provides products such as bonds and savings, pensions, protection, annuities, equity release and investment products, including both with-profits and non-profit business, and our general insurance and health business, which provides a range of general and health insurance products focused on personal and business customers, such as household, motor and liability insurance.

The table below presents adjusted operating profit and profit before tax attributable to shareholders' profits under IFRS from our operations in the UK for the three years ended 31 December 2011, 2010 and 2009.

	2011 £m	2010 £m	2009 £m

<b>Profit before tax attributable to shareholders' profits</b>	<b>401</b>	<b>784</b>	<b>611</b>

### Year ended 31 December 2011

On a PVNBP basis, sales in our UK long-term insurance and savings business increased by £1,158 million, or 10%, to £13,004 million (2010: £11,846 million). Protection sales grew by 9%, including a 7% increase in core protection products. Pension sales increased by 31% supported by a 65% increase in group personal pensions. Annuities increased by 21% supported by a 23% growth in bulk purchase annuities and a 20% increase in the sale of individual annuities. Bonds decreased 53% reflecting our continued stance on writing profitable business, the changing distributor landscape pre- Retail Distribution Review (RDR), and relative attractiveness of bonds following tax treatment changes. Investment sales increased by 9%, reflecting growth in managed funds and good performance from global property. Equity release sales decreased 27% following an exceptional performance in 2010 when the market was less competitive.

Net written premiums in our UK long-term insurance and savings business increased by £396 million, or 7%, to £5,865 million (2010: £5,469 million). The increase is primarily due to higher sales of group personal pensions and individual annuities, offset by lower sales of single premium bonds.

Adjusted operating profit increased by £70 million, or 8%, to £920 million (2010: £850 million). The non-profit result increased by £151 million, or 21%, to £854 million (2010: £703 million) driven by continued strong performance in annuities, increased annual management charges and inclusion of the full results of RBS Life, following its purchase by Aviva at the end of 2010. Included in the result are one-off benefits of £93 million relating to the Part VII transfers of the former RBS JV entities, and £30 million relating to the release of tax provisions associated with the reattribution of the inherited estate. The with-profit result, which includes the shareholders' share of regular and terminal bonus payments, was £66 million (2010: £147 million) with the variance from 2010 mainly driven by the absence of the final special distribution (2010: £84 million).

Profit before tax decreased by £383 million, or 49%, to £401 million for 2011 (2010: £784 million) reflecting an adverse impact from market movements in 2011.

### Year ended 31 December 2010

On a PVNBP basis, sales in our UK long-term insurance and savings business increased by £1,883 million, or 19%, to £11,846 million (2009: £9,963 million). Protection sales stayed broadly level as a 14% increase in core protection products offset a reduction in other areas. Pension sales increased by 8% supported by a strong performance in group personal pensions. Annuities increased by 67% supported by higher sales of bulk purchase annuities and a 34% increase in the sale of individual annuities. Bonds decreased 17% as we continued to manage for value rather than volume. Investment sales increased by 48% due to growth in managed and structured fund sales and as consumers reinvested in property as an asset class. Equity release showed an increase of 58%.

Net written premiums in our UK long-term insurance and savings business were £5,469 million, an increase of £1,080 million, or 25%, from £4,389 million in 2009. The increase was primarily due to higher bulk purchase annuity sales.

Adjusted operating profit in our UK long-term insurance and savings business increased by 26% to £850 million (2009: £672 million) reflecting the full year benefit of the Reattributed Inherited Estate External Support Account (RIEESA), increased annuity profitability and improved market conditions resulting in higher annual management charge (AMC) income. This was partly offset by a reduction in with-profits shareholder transfers driven by reduced bonus rates and a lower, final special distribution.

Profit before tax was £784 million for 2010 (2009: £611 million) which includes a £128 million one-off benefit from the restructuring of our joint venture with the Royal Bank of Scotland.

### General insurance and health

The table below presents sales, net written premiums, adjusted operating profit and profit/(loss) before tax attributable to shareholders' profits under IFRS from our UK general insurance and health business for the three years ended 31 December 2011, 2010 and 2009.

	2011 £m	2010 £m	2009 £m
<b>Sales/net written premiums</b>	<b>4,912</b>	4,539	4,298
<b>Adjusted operating profit</b>	<b>552</b>	579	535
<b>Profit before tax attributable to shareholders' profits</b>	<b>825</b>	457	434

### Year end 31 December 2011

UK general insurance and health net written premiums (NWP) increased by £373 million, or 8%, to £4,912 million (2010: £4,539 million). Performance is driven by our UK general insurance operation where NWP increased by £325 million, or 8%, to £4,371 million (2010: £4,046 million). In personal motor, NWP (excluding RAC) rose by £272 million, or 32%, to £1,126 million (2010: £854 million) reflecting rating action, strong growth in direct sales and the roll out of direct pricing to brokers.

Adjusted operating profit in 2011 decreased by £27 million, or 5%, to £552 million (2010: £579 million) and includes a reduction of £59 million within our group captive reinsurer to £32 million (2010: £91 million). Our UK general insurance operation has seen an increase of £32 million, or 7%, to £508 million (2010: £476 million). Excluding RAC, adjusted operating profit has grown by £42 million, or 11%, to £433 million (2010: £391 million), with the 2011 result benefiting from favourable weather and a further improvement in underlying profitability. These factors have been offset in part by small strengthening in prior year claims reserves (excluding adverse 2010 freeze development) of £37 million (2010: £87 million release). This primarily reflects adverse experience on 2010 commercial motor business (for some vans, taxis and scheme accounts) and on one historic professional indemnity account. We have already taken rating action and selective exits with respect to these poor performing business lines.

Profit before tax increased by £368 million, or 81%, to £825 million (2010: £457 million). The increase is driven by the profit on disposal of RAC of £532 million.

### Year end 31 December 2010

UK general insurance and health net written premiums were £4,539 million, an increase of £241 million, or 6%, on 2009 (2009: £4,298 million). The increase reflects a combination of factors, including excellent retention, substantial growth in our direct channel, rolling out our direct prices to brokers, good levels of commercial new business and the launch of our corporate risks offering.

Adjusted operating profit in 2010 was £579 million, an increase of £44 million, or 8% (2009: £535 million). The increase in adjusted operating profit results from an improvement in current year profitability which more than offsets an adverse impact from weather-related claims of £40 million compared to long-term average (2009: neutral), an £11 million reduction in investment return to £406 million (2009: £417 million) and lower savings on prior year claims development of £87 million (2009: £105 million).

Profit before tax was £457 million, an increase of £23 million from a profit of £434 million in 2009. The increase in operating profit and lower levels of restructuring costs were broadly offset by adverse movements in economic assumption changes and an increase in pension deficit funding in the year.

### Aviva Europe

Aviva Europe has substantial long-term insurance and savings businesses in France, Ireland, Italy, Poland and Spain. We also have a growing presence in Russia and Turkey. We have large general insurance businesses in France, Ireland and Italy as well as smaller operations in Poland and Turkey. Our Europe fund management operations are managed primarily by Aviva Investors.

The table below presents sales and net written premiums from our operations in Europe for the three years ended 31 December 2011, 2010 and 2009, including amounts relating to investment sales from Aviva Investors.

	2011 £m	2010 £m	2009 £m

<b>Total adjusted operating profit</b>	<b>937</b>	898	797
<b>(Loss)/profit before tax attributable to shareholders' profits</b>	<b>(8)</b>	608	931

### Year ended 31 December 2011

Long-term insurance and savings sales decreased £2,650 million, or 18%, to £12,237 million (2010: £14,887 million) and was primarily driven by management actions to reduce sales of capital intensive participating business in France and Italy.

In France, our focus on value over volume has resulted in a decrease of £871 million, or 18%, in life and pension sales to £4,047 million (2010: £4,918 million). Sales in AFER decreased £1,007 million, or 38%, to £1,639 million (2010: £2,646 million) offset by strong sales through Credit du Nord which increased by 13% to £1,407 million.

In Italy, management actions to emphasise capital efficient products and move the product mix led to a 42% drop in participating business sales, driving sales down £1,463 million, or 33%, to £2,993 million (2010: £4,456 million).

In Spain, sales decreased by £158 million, or 8%, to £1,926 million (2010: £2,084 million).

Our general insurance and health sales increased £106 million, or 5%, to £2,059 million (2010: £1,953 million). The increase in general insurance of £71 million, or 4%, to £1,728 (2010: £1,657 million) was driven by successful pricing actions in personal motor as we focused on value generation. The increase in health net written premiums of £35 million, or 12%, to £331 million (2010: £296 million) reflects continued growth in Ireland offset by a small decline in France as customers reduced protection cover in a difficult economic environment.

Aviva Europe net written premiums decreased £1,777 million, or 14%, to £11,264 million (2010: £13,041 million) primarily driven by the deliberate management actions to reduce sales of participating business leading to a 27% decline in this sector of the business.

Total adjusted operating profit increased £39 million, or 4%, to £937 million (2010: £898 million).

Our adjusted operating profit for long-term insurance and savings business in 2011 was £898 million (2010: £893 million), demonstrating the resilient performance from our markets of France, Spain and Italy where we have strength and scale. Ireland's adjusted operating profit in 2010 included a release of reserves following a review of assumptions of £75 million.

General insurance and health adjusted operating profit increased by £28 million, or 26%, to £137 million (2010: £109 million) with growth in general insurance profit in France offset by a reduction in Italy and an overall reduction in health insurance profits.

We also released surplus reserves margins of around £45 million to align with the Group's reserving policy but the benefit of this was fully offset by some reserve strengthening in Italy in respect of prior year.

Aviva Europe's loss before tax attributable to shareholders' profits was £8 million in 2011. The loss primarily reflects investment losses in France, Ireland, Italy and Spain. This also includes impairment of our goodwill and intangibles in Ireland following AIB's decision not to review the distribution agreement in respect of long-term business.

In Italy, the UDS balance was £1,449 million negative as at 31 December 2011 (2010: £420 million negative). The method for estimation of the recoverable negative UDS balance was changed in 2011 to a real-world embedded value method. Further details on this including the impact of this change are set out in section 'Financial statements IFRS – Note 44 – Unallocated divisible surplus'.

### Year ended 31 December 2010

Aviva Europe sales in 2010 were £16,840 million, marginally increased on the prior year (2009: £16,258 million) primarily due to increased sales in Italy and Other Europe more than offsetting lower sales levels in Poland and Spain.

Aviva Europe long-term insurance and savings sales were £512 million higher than the prior year at £14,887 million (2009: £14,375 million) despite the challenging economic environment.

Sales through our bancassurance channel increased 9% to £8,040 million (2009: £7,353 million) primarily as a result of strong sales in Italy.

Retail sales decreased 11% to £5,497 million (2009: £6,170 million). Nearly 60% of the decline in sales was from Poland as a result of significant pension legislation changes.

General insurance and health sales increased 4% to £1,953 million (2009: £1,883 million). We saw growth in all our general insurance and health markets except in Ireland. In Ireland, health insurance sales grew 19%, but general insurance sales declined as the market continued to be challenging.

Net written premiums in long-term insurance and savings business were £13,041 million, an increase of £586 million, or 5% (2009: £12,455 million), driven by sales of our profit sharing single premium products in Italy.

Total adjusted operating profit increased to £898 million (2009: £797 million). Adjusted operating profit for long-term insurance and savings business in 2010 increased by £132 million to £893 million (2009: £761 million) reflecting increased profits from existing business in France, Italy and Spain offset by increased new business strain in Italy. The 2010 result includes £75 million from release of reserves for protection business following the adoption of realistic reserving in 2010.

Aviva Europe's adjusted operating profit of our general insurance and health businesses was £109 million in 2010, a decrease of £23 million, or 17%, over £132 million in 2009, primarily due to lower longer-term investment returns as a result of lower interest rate yields.

Europe's profit before tax attributable to shareholders' profit was £608 million in 2010, a decrease of £323 million from 2009.

### North America

Aviva North America includes the long-term insurance and savings business in the US, which provides life insurance and annuity products, and the general insurance business in Canada.

The table below presents sales, net written premiums, adjusted operating profit and IFRS profit/(loss) before tax attributable to shareholders for the three years ended 31 December 2011, 2010 and 2009.

	2011 £m	2010 £m	2009 £m
Protection	1,093	999	871
Annuities	2,839	3,729	3,674
General insurance	2,083	1,958	1,800
<b>Sales</b>	<b>6,015</b>	6,686	6,345
<b>Net written premiums</b>	<b>5,703</b>	6,443	6,176
<b>Adjusted operating profit</b>			
Long-term insurance business	197	174	85
General insurance	254	222	144
Non-insurance	(18)	(20)	(16)
	<b>433</b>	376	213
<b>Profit before tax attributable to shareholders' profits</b>	<b>507</b>	309	244

**Year ended 31 December 2011**

Sales in Aviva North America decreased by £671 million, or 10%, to £6,015 million (2010: £6,686 million).

Annuity sales in 2011 declined by £890 million, or 24%, to £2,839 million (2010: £3,729 million), primarily driven by our focus on value over volume, with strong annuity price competition and increased consumer demand for variable annuity products in the first half of 2011.

Our protection sales increased by £94 million, or 9%, to £1,093 million (2010: £999 million) reflecting our focus on growth in life business. Life sales account for 28% of our long-term savings sales (2010: 21%).

General insurance sales in Canada increased by £125 million, or 6%, to £2,083 million (2010: £1,958 million), reflecting growth in both Personal and Commercial Lines.

Aviva North America's net written premiums decreased by £740 million, or 11%, to £5,703 million (2010: £6,443 million). The decrease was due to lower annuity sales in the US partially offset by premium growth in general insurance.

Adjusted operating profit increased by £57 million, or 15%, to £433 million (2010: £376 million). Long-term insurance and savings adjusted operating profit increased by £23 million, or 13%, to £197 million (2010: £174 million) as our in-force book grew and we maintained strong spread management and disciplined pricing in a competitive environment. General insurance adjusted operating profit improved by £32 million, or 14%, to £254 million (2010: £222 million) driven by growth in underwriting profit.

Aviva North America's profit before tax attributable to shareholders' profits increased by £198 million, or 64%, to £507 million (2010: £309 million). The increase was mainly as a result of improved operating results, favourable short-term investment variances in both our life and general insurance businesses, and lower amortisation of intangibles.

**Year ended 31 December 2010**

Sales in Aviva North America were £6,686 million, an increase of £341 million, or 5% (2009: £6,345 million).

Annuity sales in 2010 grew to £3,729 million, slightly above the previous year's levels (2009: £3,674 million) reflecting focus on our key distribution partners while balancing productivity, profitability and capital efficiency.

Compared to the prior year, our protection sales increased by 15% to £999 million (2009: £871 million) and accounted for 21% (2009: 19%) of our total new business sales in the US reflecting our continued focus on business diversification. The US business experienced its second consecutive year of double digit internally generated growth in 2010.

General insurance sales in Canada increased by £158 million, or 9%, to £1,958 million (2009: £1,800 million), benefiting from the impact of foreign exchange, which more than offset a 3% decline on a local currency basis reflecting our actions to eliminate poorly performing personal lines business.

Aviva North America's net written premiums increased by £267 million, or 4%, to £6,443 million (2009: £6,176 million). The increase was a result of higher protection product sales in the US and foreign exchange driven increases in Canada as noted above.

Adjusted operating profit was £376 million, an increase of £163 million, or 77% (2009: £213 million). Long-term insurance and savings adjusted operating profit increased 105% to £174 million (2009: £85 million) driven by spread management, expense discipline and an improved economic environment. General insurance adjusted operating profit improved 54% in 2010 to £222 million (2009: £144 million) due to improved risk selection, product pricing and cost savings combined with benign weather in the early part of 2010.

Aviva North America's profit before tax attributable to shareholders' profits was £309 million, a 27% increase (2009: £244 million). The increase was mainly as a result of improved operating results that more than offset short-term investment variances in both our life and general insurance businesses.

**Asia Pacific**

Aviva Asia Pacific currently operates in ten countries across the region through both joint ventures and wholly-owned operations. We have businesses in markets at various stages of development, with established businesses in Singapore and Hong Kong, high potential businesses in India and China and developing businesses in South Korea, Malaysia, Sri Lanka, Indonesia and Vietnam. Our joint venture in Taiwan is classified as held for sale – see section 'Financial statements IFRS – Note 3 – Subsidiaries'

The table below presents the sales, net written premiums, adjusted operating profit and profit/(loss) before tax attributable to shareholders' profits under IFRS of Aviva Asia Pacific for the three years ended 31 December 2011, 2010 and 2009.

	2011 £m	2010 £m	2009 £m

Australia long-term insurance and savings business	—	—	40
General insurance and health	<b>(8)</b>	(6)	6
Fund management and non-insurance	<b>(30)</b>	(34)	(21)
<b>Adjusted operating profit</b>	<b>70</b>	31	77
Profit before tax attributable to shareholders' profits – Asia Pacific	<b>34</b>	39	101
Profit before tax attributable to shareholders' profits – Australia	—	—	45
<b>Profit before tax attributable to shareholders' profits</b>	<b>34</b>	39	146

**Year ended 31 December 2011**

Total Asia sales increased by £150 million, or 7%, to £2,328 million (2010: £2,178 million) despite uncertain economic conditions and regulatory climates in China and India. The strong performance reflects the success of our existing bancassurance partnerships. Life and pension sales increased by 10% mainly from the bancassurance channel, whilst investment sales fell due to investor caution in the region.

Net written premiums increased by £4 million, or 1%, to £583 million (2010: £579 million) reflecting the growth in the health and online (direct) general insurance platform in Singapore, and momentum gained after entry into the Indonesia health market in 2010.

Adjusted operating profit increased by £39 million, or 126%, to £70 million (2010: £31 million). This includes a reserving change benefit in Hong Kong of £25 million in 2011. The 2010 result included £27 million profit from changes to China's GAAP accounting basis.

Profit before tax decreased by £5 million, or 13%, to £34 million (2010: £39 million) due mainly to goodwill impairment of £15 million in Korea.

**Year ended 31 December 2010**

Total Asia sales excluding Australia increased by £461 million, or 27%, to £2,178 million (2009: £1,717 million<sup>1</sup>) underpinned by improving economic conditions and reflecting our business expansion in Asia and the success of our bancassurance partnerships. Life and pensions sales (in PVNBP terms) increased by 48%, with more than half of our sales coming from bancassurance channels. Investment sales through Navigator (our wrap administration platform) declined although total funds under administration grew by 23% over the year.

Net written premiums increased by £202 million to £579 million (2009: £377 million<sup>1</sup>). This strong growth reflected the new online (direct) general insurance platform in Singapore, our entry into the Indonesia health market as well as growth in existing markets. This more than offset the drop in net written premiums due to the disposal of the Australian business.

Excluding one-off impacts on adjusted operating profit (2010: £27 million from a change in China GAAP basis; 2009: £68 million release of reserves in Singapore) and excluding the contribution from Australia, the underlying adjusted operating profit increased by £40 million reflecting scale and focused cost management.

Profit before tax of £39 million was lower than the prior year (2009: £146 million) due to the profit arising in 2009 on the sale of the Australian business and the contribution from substantial investment market movements in 2009.

**Aviva Investors**

Aviva Investors, our fund management business, operates across all four regions providing fund management services to Aviva's long-term insurance and savings and general insurance operations as well as to a growing number of third-party investors.

The table below presents the adjusted operating profit, profit before tax attributable to shareholders' profits under IFRS and funds under management of Aviva Investors for the three years ended 31 December 2011, 2010 and 2009.

	2011 £m	2010 £m	2009 £m
Fund management	88	97	115
Long-term insurance and savings business – Pooled Pensions	3	3	—
<b>Total Adjusted operating profit</b>	<b>91</b>	<b>100</b>	<b>115</b>
<b>Profit before tax attributable to shareholders' profits</b>	<b>71</b>	<b>61</b>	<b>91</b>
<b>Assets under management</b>	<b>262,506</b>	<b>259,787</b>	<b>249,630</b>

**Year ended 31 December 2011**

Aviva Investors' adjusted operating profit for fund management decreased by £9 million, or 9%, to £88 million (2010: £97 million). The fall in adjusted operating profit reflects the impact of ongoing investment in our global infrastructure and clients re-evaluating their risk appetite in the face of continuing economic downturn which, in some instances, has led them to re-allocate towards lower fee-bearing asset classes, with a consequential impact on revenue.

Profit before tax attributable to shareholders increased by £10 million, or 16%, to £71 million (2010: £61 million), which benefited from the £23 million profit recognised on the sale of our Australian asset management subsidiary, offset by an impairment charge made against the value of an intangible asset.

Aviva Investors' funds under management, increased by £3 billion, or 1%, to £263 billion (2010: £260 billion). The increase is a result of positive net funded sales, and capital appreciation, partially offset by the impact of the sale of our business in Australia.

**Year ended 31 December 2010**

Aviva Investors' adjusted operating profit in 2010 was £100 million, a decrease of £15 million from 2009. The reduction in operating profit was as a result of higher than expected redemptions and ongoing investment in the business which was starting to bear fruit as we saw an increase in higher-margin external assets. During 2010, we re-oriented our business towards more durable, higher-margin funds, which resulted in an increased average fee rate on gross external sales, excluding liquidity funds.

Profit before tax attributable to shareholders was £61 million, a decrease of £30 million, or 33%, on 2009 (2009: £91 million). Amortisation expenses were higher than 2009, the acquisition of River Road Asset Management resulting in an intangible asset, and restructuring costs were higher than 2009 reflecting the phasing of our business transformation programme.

Aviva Investors' funds under management were £260 billion, an increase of £10 billion, or 4%, on 2009. The increase was a result of capital appreciation and the inclusion of River Road within the 2010 figures, partially offset by the impact of sterling's appreciation against the euro.

**Delta Lloyd (discontinued operations)**

Delta Lloyd operations include long-term insurance and savings, general insurance and fund management.

The table below presents sales and net written premiums from Delta Lloyd for the three years ended 31 December 2011, 2010 and 2009.

	2011 £m	2010 £m	2009 £m
<b>Sales</b>			
Long-term insurance and savings business	1,255	3,793	4,329
General insurance and health	557	1,177	1,163
<b>Total sales</b>	<b>1,812</b>	<b>4,970</b>	<b>5,492</b>
<b>Net written premiums</b>	<b>2,043</b>	<b>4,340</b>	<b>4,341</b>

The table below presents adjusted operating profit and profit before tax attributable to shareholders' profits under IFRS from Delta Lloyd for the three years ended 31 December 2011, 2010 and 2009.

	2011 £m	2010 £m	2009 £m
<b>Adjusted operating profit</b>			
Long-term insurance and savings business	185	330	277
General insurance and health	1	146	143
Fund management	11	103	28
Non-insurance	(2)	(43)	(49)
Group debt costs and other interest	(4)	(12)	(29)
<b>Total adjusted operating profit – discontinued operations</b>	<b>191</b>	<b>524</b>	<b>370</b>
<b>(Loss)/profit before tax attributable to shareholders' profits</b>	<b>(726)</b>	<b>895</b>	<b>10</b>

**Year ended 31 December 2011**

On 6 May 2011, the Group sold 25 million shares in Delta Lloyd, reducing our holding to 42.7% of Delta Lloyd's ordinary share capital, representing 40% of shareholder voting rights. As the Group no longer commands a majority of shareholder voting rights, it no longer controls Delta Lloyd. Accordingly, from 6 May 2011, the Group has ceased to consolidate the results and net assets of Delta Lloyd.

Delta Lloyd's adjusted operating profit for the period to 6 May 2011, when it was deconsolidated, was £191 million.

The Group's share of the adjusted operating profits of its retained interest in Delta Lloyd as an associate for the remainder of 2011 was £157 million.

From the start of 2011 to the partial disposal on 6 May 2011, the AAA collateralised bond spread narrowed by about 80 bps as a result of changes in the underlying bond index. This movement was the main driver of the adverse life investment variance of £820 million and the loss before tax of £726 million seen in the first four months of 2011.

#### Year ended 31 December 2010

Delta Lloyd reported long-term and savings sales of £3,793 million, a decrease of £536 million, or 12%, on 2009 (2009: £4,329 million). Life and pension sales decreased by 13% to £3,178 million with investment sales reported at £615 million, a decrease of 7% on 2009. Excluding Germany, life and pension sales were 3% lower on a local currency basis.

General insurance and health sales at £1,177 million were in line with prior year (2009: £1,163 million) and 5% higher on a local currency basis. This includes amounts from accelerating the reporting of brokered business onto an actual basis; excluding these amounts net written premiums were stable year on year.

Delta Lloyd reported net written premiums of £4,340 million in line with 2009 (2009: £4,341 million) primarily due to lower group pension contracts and the closure of the German operation to new business being offset by an increase in annuity product sales.

Adjusted operating profit was £536 million, an increase of £137 million on £399 million in 2009. Improved profits in the fund management segment resulted from a substantial one-off performance fee received in late 2010 while life operating profit benefited from increased technical margins and a reduction in administration costs.

#### Corporate centre and group debt costs and other interest (from continuing operations)

The table below presents corporate centre and group debt costs and other interest for the three years ended 31 December 2011, 2010, 2009.

	2011 £m	2010 £m	2009 £m
Corporate centre	(138)	(143)	(108)
Group debt costs and other interest	(657)	(644)	(608)

#### Year ended 31 December 2011

Corporate centre costs decreased by £5 million, or 3%, to £138 million (2010: £143 million). The decrease principally reflects a reduction in project spend of £18 million in the year, and is offset by central spend which increased by £11 million arising from continued commitment to meeting increased regulatory and reporting requirements.

Group debt and other interest costs increased by £13 million, or 2%, to £657 million (2010: £644 million). This increase principally relates to higher interest costs on internal lending arrangements of £287 million (2010: £246 million) driven by changes in internal loan balances throughout the year.

Group debt costs and other interest includes net pension charge of £46 million (2010: £87 million). This represents the difference between the expected return on pension scheme assets and the interest charge on pension scheme liabilities.

#### Year ended 31 December 2010

Corporate centre costs were £143 million, an increase of £35 million, or 32%, on £108 million in 2009. The increase principally reflected a higher project spend of £26 million in the year, and higher central costs of £7 million arising from enhanced capacity to meet greater financial and regulatory reporting requirements.

Group debt and other interest costs were £644 million, an increase of £36 million or 6% on 2009. The increase principally relates to higher lending arrangement costs in 2010 of £246 million; (2009: £227 million) driven by changes in internal loan balances throughout the year.

Group debt costs and other interest includes the net pension charge of £87 million (2009: £74 million). This represents the difference between the expected return on pension scheme assets and the unwind of the discount on pension scheme liabilities.

## Selected consolidated financial data

### Selected consolidated financial data

The following table sets forth our selected consolidated financial data for the periods indicated. This data is derived from our consolidated financial statements prepared in accordance with IFRS as issued by the IASB.

The selected consolidated financial data for the five years ended 31 December 2011 has been derived from, and should be read in conjunction with, our audited consolidated financial statements and the related notes in these financial statements.

The Group's shareholding in Delta Lloyd was reduced to 42.7% following the sale of shares on 6 May 2011. The results of Delta Lloyd up to the transaction date, as well as those of the preceding years, have therefore been classified as discontinued operations.

## History and development of Aviva

### General

Aviva provides around 43 million customers with long-term insurance and savings, general and health insurance, and fund management products and services. Over the last few years we have simplified and streamlined Aviva, changing it from a federation of insurance businesses into a unified operation united under a single brand.

We are committed to serving our customers well in order to build a strong, sustainable business which makes a positive contribution to society and which our people are proud to work for.

We are a public limited company incorporated under the laws of England and Wales.

Our main activities are the provision of long-term insurance and savings, fund management and general insurance products and services.

### Our history

The Group was formed by the merger of CGU plc and Norwich Union plc on 30 May 2000. CGU plc was renamed CGNU plc on completion of the merger, and subsequently renamed Aviva plc on 1 July 2002.

CGU plc and Norwich Union plc were both major UK-based insurers operating in the long-term insurance business and general insurance markets. Both companies had long corporate histories. Hand in Hand, which was incorporated in 1696, was acquired by Commercial Union in 1905, which itself was incorporated in 1861. General Accident plc was incorporated in 1865. Norwich Union plc was founded as a mutual society in 1797 and operated as such until 1997 when it demutualised and became an English public limited company. CGU plc was formed in 1998 from the merger of Commercial Union plc and General Accident plc.

Between 2000 and 2002, we actively withdrew from lines of business and markets that did not offer the potential for market-leading positions or superior returns, or did not otherwise meet our strategic objectives. We did this principally through the disposal of property and casualty businesses in the UK London Market, the US, Australia, New Zealand and certain European countries. In 2005 we acquired RAC, which was subsequently sold to buyout firm Carlyle Group in 2011 for £1 billion. In 2006, we acquired US financial services company AmerUs.

During 2009, we disposed of our long-term savings and wealth management business in Australia and through an IPO we sold approximately 42% of our Dutch business, Delta Lloyd.

In January 2010, we integrated our life, general insurance and health businesses in the UK. We also announced the acquisition of River Road Asset Management, a US equity manager, to support the expansion of Aviva Investors business.

In 2011, we sold a further 15% of Delta Lloyd bringing our holding down to approximately 43%. We also sold the Aviva Investors business in Australia and we exited UAE as part of our geographic focus.

In January 2012, we announced the sale of Czech Republic, Hungary and Romania life and pensions businesses to MetLife Inc. The transaction, which is subject to regulatory approvals in each jurisdiction, is expected to be completed during 2012.

Aviva's distribution arrangement with Allied Irish Bank (AIB) for long-term business will cease in 2012 and the bancassurance partnership with AIB is being unwound. A strategic review is underway to determine the most effective distribution channels going forward.

Further details of recent acquisitions and disposals can be found in the section 'Financial statements IFRS – Note 3 – Subsidiaries'.

## Business overview

### Our aims and strategy

We have simplified and streamlined the Group, moving from a federation of independent businesses to a successful global business under a single brand, Aviva. However, there is no doubt the world has changed significantly in the last few years.

This is particularly true for Aviva's customers, who are responding to the uncertain economic climate and lower disposable incomes by paying off debt and saving more, to ensure a more secure financial future for themselves and their families. For insurance companies such as Aviva, current capital constraints demand investment discipline, greater strategic focus and strong balance sheets.

In 2010, we assessed our strategic direction against the backdrop of these changes and came away with three principal conclusions:

- **Increasing geographic focus**

We will focus on markets where we have strength and scale. In determining our focus, we will judge markets on their potential to generate both US\$100 million of adjusted operating profits and a 12% return on capital employed, or US\$1 billion of franchise value for younger businesses. This focus will allow us to capitalise on our leading market positions in the UK and Europe, the world's largest life and pensions market.<sup>1</sup>

- **Benefiting from the combination of life and general insurance**

Our life and general insurance operations are excellent businesses in their own right, but in addition to their inherent strengths there are significant advantages to running these businesses under one brand and in one group, supported by Aviva Investors.

- **Building on our core strengths**

To be the best in both life and general insurance, we will focus on our four core strengths of marketing and distribution, financial discipline, technical excellence and operational effectiveness, benefiting from a powerful brand and growing customer franchise.

## Our business

### Overview

We provide around 43 million customers with long-term insurance and savings, general and health insurance, and fund management products and services.

Our business is managed through a regional management structure based on four geographic regions: UK, Europe, North America and Asia Pacific. The four regions, together with Aviva Investors, function as six operating segments. Due to the size of the UK region it is split into the UK Life and UK General Insurance segments, which undertake long-term insurance and savings business and general insurance, respectively. Aviva Investors, our fund management business, operates across all four regions providing fund management services to third-party investors and to our long-term insurance businesses and general insurance operations.

On 6 May 2011, the Group ceased to hold a majority of the shareholder voting rights in Delta Lloyd. The results of Delta Lloyd up to that date are therefore presented as discontinued operations.

For information on the main categories of products sold in each of these geographic segments over the last three years, see 'Financial and operating performance – Regional performance'.

<sup>1</sup> Based on Swiss Re, Sigma, No2/2011

### Life insurance and savings business

Long-term insurance and savings business from continuing operations accounted for over 77% of our total business based on worldwide total sales from continuing operations for the year ended 31 December 2011. We reported total long-term insurance and savings new business sales from continuing operations of £27.9 billion and investment sales of £3.5 billion for the year ended 31 December 2011. Our focus remains on growing our business profitably and improving our operational efficiency so that we can fully benefit as our major markets return to economic growth.

### Market position

In the UK we have a market share of 12% based on annual premium equivalent (APE)<sup>2</sup> according to the Association of British Insurers (ABI) quarter three 2011 data. Long-term insurance and savings products in the UK represented 32% of our worldwide sales for the year ended 31 December 2011.

In Aviva Europe long-term insurance products represented 30% of total Group worldwide sales for the year ended 31 December 2011.

In North America our life and annuity business is a leading provider of both fixed indexed life and fixed indexed annuity products.<sup>3</sup>

In the Asia Pacific region we operate in ten countries.

### Brands and products

We have operated under the brand name Aviva globally since June 2010.

Our long-term insurance and savings businesses offer a broad range of life insurance and savings products. Our products are split into the following categories:

- Pensions – a means of providing income in retirement for an individual and possibly his or her dependants. Our pension products include personal and group pensions, stakeholder pensions and income drawdown.
- Annuities – a type of policy that pays out regular amounts of benefit, either immediately and for the remainder of a person's lifetime, or deferred to commence from a future date. Immediate annuities may be purchased for an individual and his or her dependants or on a bulk purchase basis for groups of people. Deferred annuities are asset accumulation contracts, which may be used to provide benefits in retirement, and may be guaranteed, unit-linked or index-linked.
- Protection – an insurance contract that protects the policyholder or his or her dependants against financial loss on death or ill-health. Our product ranges include term assurance, mortgage life insurance, flexible whole life and critical illness cover.
- Bonds and savings – accumulation products with single or regular premiums and unit-linked or guaranteed investment returns. Our product ranges include single premium investment bonds, regular premium savings plans, mortgage endowment products and funding agreements.
- Investment sales comprise retail sales of mutual fund type products such as unit trusts, individual savings accounts (ISAs) and Open Ended Investment Companies (OEICs).
- Other, which includes equity release and structured settlements.

Some of our insurance and investment contracts contain a discretionary participating feature, which is a contractual right to receive additional benefits as a supplement to guaranteed benefits. These are referred to as participating contracts.

### General insurance and health insurance

General insurance and health insurance together accounted for 23% of our total worldwide sales for the year ended 31 December 2011. In the year ended 31 December 2011, we reported general and health insurance net written premiums of £9.2 billion.

### Market position

We are a leading general insurer in the UK and we are the second-largest general insurer in Canada (based on gross written premiums for the year ended 31 December 2010). The Group has general insurance operations in France, Italy, Poland, Ireland and Turkey, and in Asia Pacific we sell general insurance and health products in Malaysia, Singapore, Indonesia and Sri Lanka.

In the year ended 31 December 2011, 54% of our total general insurance and health new business from continuing operations was written in the UK.

### Brands and products

The sale of RAC in September 2011 means that our general insurance business now operates under a single brand across the world.

Our general insurance business concentrates on:

- Personal lines – motor, household, travel and creditor;
- Commercial lines – fleet, liability and commercial property insurance;
- Health insurance – private health insurance, income protection and personal accident insurance, as well as a range of corporate healthcare products; and
- Corporate and speciality risks – products for large clients or where the risk is specialist.

### Distribution

Customers can buy our products through a range of distribution channels, including:

- Direct – In many of our markets, customers can buy our products over the telephone or via the internet. This method of distribution is most commonly available for simple, low-cost products which do not require advice.
- Direct sales force – In some of our European and Asia Pacific markets we operate direct sales forces that only sell Aviva's products and the sales forces receive commission on the products they sell.
- Intermediaries – We offer a range of long-term insurance, savings, retirement, general insurance and health insurance products which can be bought through an intermediary, such as an independent financial adviser or an insurance broker. Intermediaries receive a commission on sales of Aviva's products.
- Corporate partnerships, bancassurance and joint ventures – Aviva is a corporate partner for many organisations, including banks and other financial institutions, who wish to offer their customers insurance products. We have various distribution agreements with bancassurance partners and joint ventures across the markets in which we operate. Depending on our line of business in that market, the agreements offer long-term insurance products, general insurance and health products, asset management services or a combination thereof. In return for offering our products to their customers, the bank or joint venture partners receive a commission as a percentage of sales and in some cases achieve extra commission if agreed target levels of sales are met. Certain agreements have a profit sharing element based on predetermined percentage. In some cases, if the agreed targets are not met, certain terms of the contract can be renegotiated. Under the joint venture agreements, the costs of running the venture are often split between the partners.

Further details of the distribution channels specific to each market are included in the following regional analysis.

### Fund management

Aviva Investors, our fund management business, provides fund management services to Aviva's long-term insurance and savings, and general insurance operations as well as to a growing number of third-party investors. The main fund management operations are in the UK, North America, Europe, Asia Pacific and the Middle East. All sales of retail fund management products are included in our long-term insurance and savings business sales.

### Market position

Aviva Investors is ranked 42nd globally by assets under management, according to the Towers Watson World 500 largest asset managers study 2010 ranking of asset managers by assets under management. Aviva Investors operates under a single brand across our regions of the UK, Europe, North America and Asia Pacific. Total worldwide funds managed by Aviva Investors at 31 December 2011 was £263 billion, the substantial majority of which currently relates to Aviva's insurance and savings operations.

### Brands and products

Our business invests in most significant asset classes on behalf of institutional, pension fund and retail clients.

### Operating segments

Each operating segment has a member of our executive management team who is responsible for it and who is accountable to the group chief executive for the operating performance of their segment. The full membership of our executive management team is set out on page 92. This structure for our operating segments is intended to ensure the Group's ability to take advantage of market opportunities, improve speed of response, eliminate duplication of effort, and encourage the sharing of best practice in the interests of our customers and shareholders, while providing local knowledge.

## Aviva United Kingdom

### Business overview and strategy

Our aim is to provide prosperity and peace of mind to our 14 million customers, who trust us with their long-term savings, general insurance and healthcare needs. We have a broad distribution network and our products can be bought direct, through intermediaries, or via our partnerships with leading UK banks and other institutions.

We employ more than 17,500 people and operate from a number of locations throughout the UK, including York, Norwich, Perth, Glasgow, Eastleigh, London and Sheffield.

Our combination of life, general insurance and health is exceptional, we believe, exceptional in its scale and breadth in the UK market. We aim to excel in each of these markets and create significant additional value for stakeholders by operating our businesses together.

We have a strong brand, and awareness levels reached their highest levels yet in 2011.<sup>4</sup>

### United Kingdom Aviva Life

#### Business overview and strategy

We are a leading long-term insurance and savings provider in the UK with an overall market share of 12%, based on third quarter 2011 ABI returns.

Our strategy is to hold dominant positions in workplace savings, individual annuities and protection while delivering strong

margins and an Internal Rate of Return (IRR) in excess of the Group's minimum of 12% overall and at a product level.

We are focused on increasing our market share in Group Personal Pensions ahead of auto-enrolment. During 2011, we grew sales at more than twice the market rate, largely in the small and medium-sized enterprise (SME) marketplace where we expect to see the most growth following auto-enrolment.

We lead the 'at retirement' market covering individual annuities and equity release with market shares of 25% and 36%, respectively.<sup>5</sup>

We have made significant headway in our aim to be the clear market leader in protection by extending our distribution through partnerships with Santander and Barclays during 2011.

In our opinion, our underwriting, and risk management expertise, together with our strong brand, service and broad distribution, give us a competitive advantage.

### Market and competition

The industry is entering a period of unprecedented change with significant regulatory changes, such as the Retail Distribution Review (RDR) and auto-enrolment, which will transform the way that long-term savings products are bought and sold.

We are well positioned ahead of the implementation of RDR and have an extensive programme underway to ensure both regulatory compliance and ongoing success in our chosen markets. We also hold strong positions in the protection and annuities marketplaces which will be largely unaffected by the RDR.

The UK long-term savings market is highly competitive and we consider our main competitors to be Standard Life, Prudential, Legal & General, and Lloyds Banking Group. The principal competitive factors for our life insurance business in the UK are:

- financial strength and ratings;
- brand strength and our customer advocacy;
- risk management;
- focus on customers' needs and quality of service;
- product range and the quality of products on offer;
- breadth of distribution;
- pricing; and
- investment management performance.

The underlying fundamentals for our business remain compelling. Research by Aviva and Deloitte<sup>6</sup> shows there is potentially a total annual pensions gap of around £317 billion in the UK. This gap represents the difference between what individuals in the UK save today and what they need to save to maintain a comfortable standard of living in retirement. In addition, there is an estimated total protection gap of £2.4 trillion in the UK according to analysis by Swiss Re.<sup>7</sup> It shows the overall gap between the protection cover individuals in the UK have and what they need to meet their requirements.

### Products

We provide a comprehensive product range focused on both the consumer and corporate market with a 70%:30% split.

The pensions and 'at retirement' products we offer include stakeholder and personal pensions, equity release, annuities, income drawdown and with-profits products. Our annuity offerings include immediate life, enhanced, fixed-term annuities and with-profits pension annuities.

We provide a number of traditional life insurance products, including level-term, decreasing-term (with or without critical illness), guaranteed whole life insurance, and guaranteed lifelong protection plans.

<sup>5</sup> 25% market share in the individual annuities market based on ABI returns and 36% market share in equity release based on Safe Home Income Plans (SHIP) returns

<sup>6</sup> Europe's Pension Gap, Aviva and Deloitte, 2010

<sup>7</sup> Term and Health Watch, Swiss re, June 2010

Our savings and investment products include ISAs, investment bonds, funds, base rate trackers, investments with guarantees and with-profits products.

Our products are predominantly non-profit with some with-profit business. Non-profit business means that shareholders retain 100% of the distributed profit. The with-profits products share the profits or losses of the with-profits fund between shareholders and policyholders. This is achieved through a system of bonuses. Aviva aims to smooth the return of the policyholder's plan through declaring regular bonuses. As bonuses are added to the plan, valuable guarantees build up. These guarantees are unique to with-profits investments. At the close of the plan the investor receives a terminal bonus based on the performance of the fund.

### Distribution

We have a multi-distribution strategy, which means we sell our products through intermediaries, corporate partners, in the workplace, and directly to customers. We are a leading provider in the intermediary market with a 13.4% share.<sup>8</sup>

In 2011, we extended our distribution agreements with Santander and Barclays. We are also the provider of choice to the Royal Bank of Scotland and other leading organisations including the Post Office. We remain committed to building on our existing relationships and distribution partnerships as well as growing our workplace and direct channels.

### United Kingdom Aviva General Insurance Business overview and strategy

Aviva is a leading general insurer in the UK.<sup>9</sup> We focus on personal and commercial insurance. We hold top three positions in all our major classes of business, including personal motor, homeowner, commercial motor and commercial property. We are also the leading insurer in the SME marketplace.<sup>10</sup>

We believe our key strengths include underwriting excellence, and product and distribution leadership. We aim to build on our market-leading position while focusing on the fundamentals of the insurance business to maximise returns through the insurance cycle. We seek to provide excellent customer service, maintain disciplined underwriting and pricing and control the impact of claims inflation.

We are growing our capability in corporate and speciality risks (CSR), and building on our core underwriting and pricing strengths to win in these markets.

We were named General Insurer of the Year at the 2011 Insurance Times awards in December 2011 based on our financial performance, service performance and broker reviews. We were identified in the 2011 Brand Finance rankings in September 2011 as the strongest general insurance company in the UK, based on brand strength and customer service.

### Market and competition

The UK is the third-largest insurance market in the world according to the ABI based on data for 2010. In 2010, the top four companies had an approximate 35% share of the general insurance market, based on Datamonitor figures for gross written premiums.

We consider our main competitors to be Direct Line Group, RSA, AXA, Zurich, Lloyds Banking Group, Allianz and The Admiral Group. The principal competitive factors for our general insurance business in the UK are:

- range and quality of our products;
- access to distribution;
- pricing and underwriting discipline;
- risk management;

- strong brand;
- customer satisfaction;
- claims handling skills; and
- management of costs.

Insurance profits in the UK general insurance market are cyclical in nature, with different segments of the market at different stages in the cycle. In 2011, the general insurance market remained competitive and we managed the cycle with disciplined underwriting across all lines of business while seeking to grow in attractive sectors. In personal motor we continued to see significant premium rate increases in 2011 in response to recent increases in claims costs and frequencies. Commercial motor rates have also hardened noticeably over the course of the year, and this is expected to continue into 2012. Homeowner rates (excluding indexation) have seen little movement reflecting a competitive environment and the depressed housing market, although underlying profitability remains good. Conditions in commercial non-motor lines have remained competitive.

In recent years, the growing proportion of commercial brokers seeking to trade with us online has led us to invest more heavily in our e-commerce propositions, ensuring we remain competitive and alert to evolving customer needs in this important distribution channel.

### Products

We provide a wide range of general insurance products focused on personal and commercial customers with a business mix of approximately 60% personal lines and 40% commercial lines.

Our products include personal motor, home, travel, payment protection, commercial motor, commercial property and commercial liability insurance.

Our personal motor insurance product range includes cover for cars, motorcycles and vans. For businesses we offer cover for fleets and commercial vehicles. Our home insurance products include building and contents insurance and home emergency cover. We also offer single trip and annual travel insurance.

Our commercial products focus on insurance for SMEs and the larger UK CSR market.

### Distribution

We have a multi-distribution strategy. Our personal products are sold directly to customers over the phone and through our websites [www.aviva.co.uk](http://www.aviva.co.uk) and [www.quotemehappy.com](http://www.quotemehappy.com), via brokers and through more than 100 corporate partnerships. We are a member of RAC's panel of insurers. Our quotemehappy insurance products are also available through price comparison websites. For commercial insurance, we focus on broker distribution and believe that independent brokers remain the best source of the advice required by business customers.

As part of our strategy to grow in CSR, we have a bespoke trading floor, in the City of London, providing brokers with direct access to our underwriting specialists.

### Europe

#### Regional overview and strategy

We have a major presence in the five markets of France, Ireland, Italy, Poland and Spain, which between them represent over 90% of our Europe new business premiums.<sup>11</sup> We are also focused on increasing our presence in the growing markets of Russia and Turkey.

Through our multi-distribution bancassurance franchise and established retail networks, we offer a range of life, pensions, and general and health insurance, providing the diversity and competitive strength that we believe only a composite insurance

8 ABI Stats Q3 2011

9 Based on GWP from FY11 published results

10 Datamonitor, 2010

11 As calculated on both a long-term savings PV/NBP basis and a general insurance net written premium basis

model can offer. We are a top six provider in our seven largest markets for life products<sup>12</sup> and have a strategy to grow our general insurance presence.

### Aviva Europe

We are geographically focused on the markets of France, Ireland, Italy, Poland, Spain, Russia and Turkey. We operate a composite model, selling life and pensions products, general insurance products in all locations, except Russia and Spain, where we only sell life products.

This model enables us to exploit our existing relationships and networks in order to develop higher margin customer-targeted products, to improve our product mix by increasing sales of protection and unit-linked products and to expand our general insurance distribution. Our strategy is focused on building on our:

- geographic focus in the five markets of France, Ireland, Italy, Poland and Spain;
- growth in Turkey and Russia;
- customer-focused multi-channel distribution;
- multi-distribution strength through established retail and bancassurance models; and
- excellence in life and general insurance.

We have a strong bancassurance model that serves customers throughout Europe via 63 banking agreements. We have strong partnerships, including Credit du Nord, a subsidiary of Société Générale in France, six savings banks in Spain and relationships with three major banks in Italy.

We also have a significant retail franchise, with a presence in all of our markets, operating through more than 8,000 direct and tied agents across 30 networks and with an independent sales force of 6,000 consultants.

### France

#### Business overview and strategy

Aviva France is one of the top ten insurance businesses in France, being sixth in life insurance and seventh in general insurance as measured by gross written premiums, according to L'Argus de l'Assurance, as at 31 December 2010. Our life business has a 4.5% market share according to the Fédération Française des Sociétés d'Assurances (FFSA) as at 31 December 2010, based on gross written premiums. Our general insurance business has a 1.9% share of the market as based on 2010 premium income, measured by gross written premiums. Our health business has a 2.2% share of the market based on 2010 premium income.

We offer a range of long-term insurance and savings products, primarily for individuals, which focus on the unit-linked market. We have a longstanding relationship with the Association Française d'Épargne et de Retraite (AFER), which is the largest retirement savings association in France with 735,000 members as at 31 December 2011. We have a strong partnership with Crédit Du Nord, which operates through 936 bank branches according to its website as of December 2011. Aviva France operates through two main companies: Aviva Vie and Antarius (JV structure with Crédit Du Nord).

In our general insurance business we predominantly sell personal and small commercial lines insurance products through an agent network and our direct insurer, Eurofil.

Aviva France's strategy is to continue to diversify and grow our business and to maintain a high level of profitability. We seek to accomplish these goals through our distribution expertise, innovation of products and services, greater communication and brand visibility.

### Market

The life insurance market is driven by individual savings. The market is dominated by bancassurance, which has accounted for around 60% of the life insurance market over the past decade according to the FFSA. We believe that the long-term insurance and savings market in France has longer-term growth potential due to the ageing population and the growing need for private pensions. We also believe that the current volatility in the financial markets has affected customer confidence in purchasing risk-bearing products, although we believe that over a longer period multi-funds policies and unit-linked funds are the best insurance vehicles for performance. We believe our customers want to be reassured and protected financially, and need to safeguard their wealth and make provisions for long-term care.

The general insurance market in France is mature and highly competitive. For several years, price competition was high as insurers fought to gain market share, particularly in the personal lines market. We believe that price competition has, however, reached its limits as the market faced increased claims frequency and a higher average claims cost. In our opinion, the market has now entered a phase of price increases that currently makes up the majority of its marginal growth.

### Products

Aviva France provides a wide range of insurance solutions: life and long-term savings, general insurance and asset management through Aviva Investors France. The products sold through our life channel are long-term savings, pensions and regular premium products and a broad range of protection products. We are the manufacturer and main distributor of the AFER product which we believe is a leading savings product benefiting from high customer confidence, a strong reputation and strong financial performance.

Aviva France holds a majority stake in Union Financière de France (UFF) which we believe has gained a reputation for expertise in managing, selecting and distributing mutual funds and sourcing tax optimisation products.

In the general insurance market, our product range includes household, motor, health, legal protection products and also a broad range of insurance products for farms, craftsmen, tradesmen and small to medium-sized entities and specific products for building firms and motor fleets.

### Distribution

Aviva France has developed a multi-distribution model combining retail, direct and bancassurance networks through owned distribution channels, independent networks and partnerships. Our retail networks sell through 896 tied agents, a direct sales force made up of more than 280 advisers and over 700 UFF consultants and more than 1,000 active brokers in the life, health and construction markets. Direct distribution is sold through Eurofil for personal general insurance, Aviva Direct for health and protection and Epargne Actuelle for the AFER product.

Eurofil is the second-largest direct general insurer and Aviva Direct is the leading provider of direct protection in France and the third-largest insurer of funeral expense plans in France by number of policies according to the FFSA as at 31 December 2011.

We also operate in the bancassurance market through our partnership with Crédit du Nord, a subsidiary of Société Générale, selling life, savings, protection and general insurance products. This partnership gives Aviva access to over 1.9 million customers, as at December 2011. We also have several partnerships with car manufacturers, including Volvo, Ford, Mazda, Mercedes Benz and GM through whom we sell motor insurance.

<sup>12</sup> Based on regulatory data from the FFSA (Fédération Française des Sociétés d'Assurances), IIF (Irish Insurance Federation), ANIA (Associazione Nazionale fra le Imprese Assicuratrici), KNF (Polish Financial Supervision Authority), ICEA (Investigación Cooperativa entre Entidades Aseguradoras y Fondos de Pensiones), AIRCT (Association of Insurance and Reinsurance Companies of Turkey) and the FSMS (Federal Securities Market Service)

## Spain

### Business overview and strategy

Aviva Spain is the country's fifth-largest long-term insurer by gross written premiums with a market share of 6% in the third quarter of 2011 according to Investigación Cooperativa entre Entidades Aseguradoras y Fondos de Pensiones (ICEA). Aviva Spain sells long-term insurance and savings, and health and accident insurance in Spain through a bancassurance network based on joint ventures with six banks (Bancaja, Caja España, Caixa Galicia, Unicaja, Caja Granada and Cajamurcia) and through Aviva Vida y Pensiones, the wholly owned Aviva branded long-term insurance company.

Our strategy in Spain is to further develop our bancassurance and retail operations and attract new partners when the opportunities arise. The close of 2011 saw the signing of a new exclusive distribution agreement with Spanish Mutual Insurance Company Pelayo to expand its national life and pensions distribution capability. We also intend to develop general insurance offerings through our existing partnerships. Overall, we will continue to be customer-focused, to react quickly to market trends and to maximise the sales of our core products, such as pensions and savings.

### Market

We believe Spain's savings banks, 'the cajas', will continue to be under pressure given the current financial sector restructuring process and the number of mergers taking place. Any opportunities arising from this will be considered by Aviva on their merits. In relation to distribution agreements with bancassurance partners, Aviva is protected financially within our contracts with the cajas should a merger result in the insurance services of the newly merged company being awarded to the insurer of the other party involved.

The top positions in the long-term insurance market are dominated by bank-owned or bank-insurer joint ventures, with the overall bancassurance channel accounting for more than 73% of gross written premiums at the end of 2010 in the Spanish life insurance market according to ICEA in the publication *Canales de Distribución – Estadística 2010*.

Customers in Spain are accustomed to receiving advice through banking channels, and we use our relationship with the cajas to capitalise on this.

### Products

We offer a wide range of bonds, savings and protection products. Investment products include both unit-linked and traditional plans, where profit sharing is regularly used to increase the policy return. Our traditional plans include savings schemes and income products. Pension savings products have valuable tax advantages. We offer a flexible range of individual and group plans with alternative investment choices. We also offer protection products, covering both mortgages and credit loans typically providing cover for the family in the event of death or disability.

### Distribution

Through bancassurance partnerships we have established subsidiaries to distribute our products with each of the banks as set out below:

- Aseval – in conjunction with Bancaja since 2000;
- Unicorp Vida – in conjunction with Unicaja since 2001;
- CxG – in conjunction with Caixa Galicia since 2001;
- Caja España Vida – in conjunction with Caja España since 2001;
- Caja Granada Vida – in conjunction with Caja Granada since 2002; and
- Cajamurcia Vida – in conjunction with Cajamurcia since 2007.

Aviva Vida y Pensiones distributes our products through professional intermediaries (financial advisers, agents and brokers) and a direct sales force, supported by a branch office network and call centres; 2012 will see the start of distribution through Pelayo's network of 200 branches and around 1,000 exclusive agents.

We believe the strength of our distribution relationships has enabled us to maintain our position as the second-largest provider of protection products in the market according to the ICEA at 30 September 2011.

## Italy

### Business overview and strategy

Aviva Italy is the country's seventh-largest life insurer, with a market share of 5% based on 2010 premiums excluding Eurovita, according to Associazione Nazionale fra le Imprese Assicuratrici (ANIA). We believe that we are in the top six largest life insurers based on 2010 premiums when we include Eurovita. We are the 12th-largest general insurance company in Italy with a market share of 1% according to ANIA as at 31 December 2010, with over 2.5 million customers.

Our strategy is to continue to work with our partners on new products, suited to the current markets, to develop our bancassurance relationships and to expand our customer reach through customer penetration and distribution reach.

### Market

The Italian life market is dominated by big insurers such as Generali, Fonsai, Allianz and Poste Vita. The top four providers wrote over 40% of the life premium income in 2010 according to ANIA.<sup>13</sup> The life insurance industry in Italy reported a decline in volumes as of 30 September 2011 with gross written premiums down by 19% against the same period in 2010 according to the local regulator Istituto per la Vigilanza sulle Assicurazioni Private (ISVAP). The general insurance segment grew by 3% in the same period according to ISVAP, due mainly to increased motor insurance sales.

In the Italian market, we believe many customers prefer to buy investment products from well-established providers. We also think that Italy's consumers prefer a personal relationship with financial services providers, and are reluctant to buy over the telephone or on the internet.

Over the last few years, the Italian government has introduced legislation breaking the exclusive relationship between general insurance companies and their 'tied' agents. This has opened up the general insurance marketplace to increased competition.

### Products

Our long-term insurance and savings business offers a wide range of products covering protection, bonds and savings and pensions. The largest segment is single premium savings and investment products. These include unit-linked policies linked to a range of investment funds as well as profit-sharing policies where there is a minimum annual return credited to the policy and the potential for an additional bonus. Also, we provide index-linked products where there is typically some protection of capital at the end of the policy term and a pay-out linked to the performance of an index or basket of shares.

We have been focusing on selling protection products and as at 30 September 2011 our share of this market was over 35%, making us a market leader for sales of protection products in Italy based on gross written premiums according to ISVAP. Individual and group pension plans are also available and this part of the market is expected to grow in the long-term given the ageing population and government reforms to reduce the cost of state retirement provision. Our general insurance business in Italy mainly provides motor and home insurance products to

<sup>13</sup> ANIA: [www.ania.it/PUBBLICAZIONI/Premi\\_del\\_Lavoro\\_diretto\\_Italiano\\_.html](http://www.ania.it/PUBBLICAZIONI/Premi_del_Lavoro_diretto_Italiano_.html)

individuals, as well as small commercial risk insurance, including marine insurance, to businesses. For reporting purposes, the Italian general insurance business is shown within 'Other Europe' in the general insurance segment.

### Distribution

Our products are distributed principally through bancassurance partnerships with UniCredit Group, Banco Popolare Italiana Group (BPI), Banca Popolari Unite (BPU) and Unione di Banche Italiane (UBI). These partnerships give us access to more than 6,400 branches. In addition, we also have more than 690 insurance agents and access to approximately 5,700 sales advisers as at 30 January 2012.

We distribute general insurance products primarily through agents and brokers, with a growing proportion of bancassurance sales.

## Ireland

### Business overview and strategy

Ireland is one of Aviva's 12 priority markets and the company is fully committed to ensuring that its Irish customers continue to receive excellent service and products at competitive prices. However, the economic environment in Ireland is challenging and there is a pressing need to ensure the Irish cost base is at a market-leading level to secure the long-term success of the business.

Following a detailed structural review, Aviva has proposed to make its Irish business part of a new UK and Ireland region, aligning many of the activities and services provided for customers. The Irish business would benefit from Aviva UK's investment in technology, underwriting capability and significant purchasing power, enabling Aviva Ireland to offer more competitive pricing and to introduce new products and services.

Aviva's distribution arrangement with Allied Irish Bank (AIB) for long-term business will cease in 2012 and the bancassurance partnership with AIB is being unwound. A strategic review is underway to determine the most effective distribution channels going forward.

Aviva Ireland had a 15% share of the Irish long-term insurance and savings market in 2010 based on new business APE (excluding investment only business) according to the Irish Insurance Federation (IIF),<sup>14</sup> and is the fourth-largest life and pension provider in Ireland. Our general insurance business is the largest in Ireland, with a market share of 16% in 2010 according to the IIF. Aviva has a 14% market share of the lives insured according to the Health Insurance Authority (HIA)<sup>15</sup> at the end of 2010 making it the third-largest health insurer in Ireland. Aviva Ireland has over one million customers across its general insurance, life and pensions, asset management (which is managed by Aviva Investors) and health insurance businesses.

### Market

The economic environment in Ireland remains challenging. During the past three years, there has been a constant and unprecedented decline in the Irish life insurance market. The market contracted by 29% in 2008, a further 28% in 2009 and 6% in 2010 (based on the IIF Factfile).

The life insurance market in Ireland is largely consolidated with approximately 81% of the market share held by the top four providers, including Aviva, according to a report by IFF based on 2010 new business APE. Some 50% of the life and pensions market is now controlled by companies which are, or will be, under government control following the state control of Irish Life & Pensions (2010 market share of 27.9%). The government also has a minority shareholding in New Ireland through Bank of Ireland (2010 market share of 20.5% based on IIF Factfile).

We believe that customers have moved away from traditional life products in Ireland because of volatility in the stock markets and a slowdown in the housing market in the last three years.

The general insurance operating environment remains difficult as competition is intense and the economic downturn is adversely impacting business volumes. The market contracted by 7.6% in 2008, a further 6.3% in 2009 and 2.6% in 2010.<sup>16</sup> The market has been slow to harden with a market combined operating ratio (COR) of 108.9% in 2009. We expect rates to remain soft.

There have been significant changes in GI distribution with competitors seeking to grow market share. RSA acquired the 123.ie brand in September 2010 and continues to develop it through marketing spend. Liberty entered the market in 2011 through a joint venture. Aggressive competition continues in the private motor market. The home insurance market is showing signs of softening. Rate increases have been put through on less profitable commercial business by Aviva and Liberty in an attempt to drive profitability. However, these actions are being used by some competitors to target business to increase market share.

### Products

Our long-term insurance and savings business offers a comprehensive range of protection, bonds and savings and pension products. Our protection products include life insurance, mortgage protection, specified illness and guaranteed whole life cover products. The pension range covers retirement and investment products including government promoted personal retirement savings account (PRSA) schemes. Our general insurance business provides a wide range of products, including property, motor, travel, farm and business insurance. Our health insurance business provides a range of plans in both the personal and company plan sector.

### Distribution

Aviva Ireland has a wide range of distribution channels, including intermediary channels such as brokers, bancassurance partners, corporate partners and direct channels including call centres, the internet and a nationwide branch network.

Our long-term insurance and savings products are distributed through our broker network. Our general insurance business is sold through all of our distribution channels, with an increasing proportion offered by direct and corporate partners. We also provide branded products for financial institutions such as AIB, Ulster Bank and One Direct. Traditionally, the majority of our health business was sold via our direct channels; however there was a significant increase in the business sold through the intermediary channel in 2010 which has continued to grow in 2011.

Aviva's distribution arrangement with AIB for long-term business will cease in 2012 and the bancassurance partnership with AIB is being unwound. A strategic review is underway to determine the most effective distribution channels going forward.

## Poland (including Lithuania)

### Business overview and strategy

Our Polish life operation is the fourth-largest overall life insurer in Poland (including JV Life), with a market share of 8% based on total premium income as at 30 June 2011 according to the Polish Financial Supervision Authority (KNF).<sup>17</sup> Aviva Poland completed its rebrand to Aviva in June 2010. It has more than 830,000 individual and group life customers and manages over £2.9 billion of customers' assets, providing both long-term insurance and savings products as at 30 September 2011. Our businesses have approximately 2,400 direct sales force members with 56 sales branches across the country as at 31 October 2011.

<sup>14</sup> Irish Insurance Federation: <http://www.iif.ie>  
<sup>15</sup> Health Insurance Authority: <http://www.hia.ie/>

<sup>16</sup> Based on GWP reported IIF Factfile 2008, 2009, 2010 and the draft IIF GWP data for 2010  
<sup>17</sup> KNF: [www.knf.gov.pl/Images/A\\_Informacje\\_Ilkw\\_2011k\\_tcm75-27692.xls](http://www.knf.gov.pl/Images/A_Informacje_Ilkw_2011k_tcm75-27692.xls)

Aviva Poland has been one of the leaders of the second-pillar pension fund market since its launch in 1999. The second-pillar market consists of the obligatory (but privately managed) pension funds. The first pillar is an obligatory, state run, pay as you go system where reserves are not accumulated and in which the current contributors to the system pay the expenses for those currently drawing their pensions. The third pillar funds are made up of voluntary contributions.

We have witnessed two significant legislative changes to the second pillar in Poland in the last two years. In 2010 a change was made to pensions legislation limiting pension funds' potential income by reducing contractual fees and capping total asset management revenues. From 1 May 2011, a further change was introduced whereby contributions received by the second pillar pension funds were reduced from 7.3% of gross salary to 2.3%.<sup>18</sup>

As a consequence, our pensions business in Poland has a market share of around 23% (down from 24% last year) and 2.7 million customers as at 31 December 2011.<sup>18</sup> Our product strategy for pensions is to retain our status as one of the market leaders in terms of assets and customers. In the short term we overhauled our pay and bonus structure for our sales force to link compensation directly with the value generated by the sale.

Our general insurance business in Poland started in 1997 and continues to develop. For reporting purposes the general insurance business is shown within 'Other Europe' in the general insurance segment.

### Market

The Polish market for protection products has seen significant growth since 1999, although penetration rates remain relatively low according to our analysis of KNF statistics.

In 1999, Poland launched a comprehensive reform of its state pension system and created privately managed funds. This allowed private companies to offer pension products and made it obligatory for all employees under 30 years of age to join one of them. As described above, from 2010 the Polish government started to implement restrictions on the fees that pension fund management companies can charge, and in 2011 changed the allocation of premiums between the first and second pillar, with a reduction of contribution to the latter.

The general insurance market is continuing to grow, driven mainly by increases in rates in motor and property insurance in 2011 following increased weather-related claims in 2010.

### Products

Our life business in Poland provides a broad range of unit-linked, annuities and bonds and savings products. For individuals it offers unit-linked life policies, annuities, single premium savings and health insurance. For institutions it offers group life insurance and employee pension programmes, which are both unit-linked products.

Our pension business offers a standard product for all customers as part of the privately managed second pillar pensions market.

We offer general insurance products to both commercial entities and individuals in Poland. For institutions we offer selected commercial lines risks such as fire and loss-of-profit insurance, technical insurance, insurance against loss of property during transportation, civil liability insurance and commercial health insurance. For individuals we offer home, accident and travel insurance, which are primarily sold by tied agents, as well as motor insurance, which is sold primarily through our direct operation.

### Distribution

The direct sales force is the main distribution channel for most of the Polish group and is made up of 2,200 tied insurance agents whose work is co-ordinated by a network of our sales branches run by over 220 sales managers.

We are developing our bancassurance distribution channel. Our biggest relationship is a joint venture with Bank Zachodni WBK (a subsidiary of Banco Santander) that sells both life and general insurance products through the bank's network of over 620 branches.<sup>19</sup>

We also co-operate with independent insurance agencies and brokers. We believe that these insurance brokers play a key role in selling commercial lines general insurance. Our mutual funds are also sold in brokerage houses and our individual products are supported by call centre and website sales. We also have a direct platform (internet and call centre) for distribution of motor insurance.

### Turkey

#### Business overview and strategy

AvivaSA, our long-term insurance and savings business in Turkey, is the second-largest pension provider in the market in terms of assets under management, with a market share of 20.7% as at 11 November 2011 as reported by the Turkish Pensions Monitoring Centre ([www.egm.org.tr](http://www.egm.org.tr)). Our largest competitor in this market, Anadolu, ranks first with a market share of 21.3%. We are also the sixth-largest life insurer in Turkey with a market share of 5% as at 31 August 2011, as reported by the Association of Insurance and Reinsurance Companies of Turkey.

AvivaSA has a bancassurance agreement with Akbank T.A.S., Turkey's fourth-largest privately owned bank based in terms of total assets according to The Banks Association of Turkey.

Aviva Sigorta, our general insurance business in Turkey, is the 15th-largest general insurer in Turkey with a market share of 1.9% as of September 2011 according to the TSRBS (Insurance Union of Turkey).<sup>20</sup> Aviva Sigorta has over 675,000 customers and a sales force of over 750 independent agents and brokers.

Our strategy in Turkey is to pursue the high growth potential that we believe this market offers.

### Market

We believe that Turkey, with its large population and strong economic growth, is a highly attractive market in the medium term. The life market, for example, is growing very fast. It grew by 32% in the year to 30 August 2011 according to the TSRBS<sup>20</sup> as measured in life premiums, including accidental death. The general insurance market is slightly more tempered, growing 21% in the year to 30 September 2011, according to the TSRBS.<sup>20</sup>

### Products

AvivaSA's life and savings products include unit-linked pensions, supplemented by protection insurance and other savings products, which are aimed at medium to high-net-worth customers and the leading national and multinational corporations in Turkey.

Aviva Sigorta sells a diverse range of products including personal motor, household, commercial property, SME, personal accident, marine and travel insurance.

<sup>19</sup> Bank Zachodni WBK: <http://indywidualni.bzwbk.pl/kontakt/wyszukiwarka-placowek-i-bankomatow/wyszukiwarka-placowek-i-bankomatow.html>

<sup>20</sup> Insurance Union of Turkey: <http://www.tsrbs.org.tr>

## Distribution

In Turkey, we operate through a multi-channel distribution framework consisting of bancassurance, direct sales force, corporate sales, agencies, telemarketing and brokers.

## Russia

### Business overview and strategy

Aviva's business in Russia is made up of a life company and a non-state pension fund.

As at 30 September 2011, Aviva Russia had 1.4 million customers compared with 966,000 as at 31 December 2010.

Aviva Russia is ranked fifth in the life insurance market with a 7.2% market share according to the data published by the market regulator, the Federal Securities Market Service (FSMS),<sup>21</sup> and first in the non-captive Pillar III pension market with a 19.3% market share, as at 30 June 2011.<sup>22</sup> We began trading in early 2006, with a strategy to position the business to take advantage of the growth expected to occur as the Russian life insurance industry develops.

### Market

Over the last six years the life insurance market in Russia has grown rapidly. It has an estimated compound annual growth rate (CAGR) of 24% (2006-2011) according to the Russian insurance market regulator. However, we believe it is still underdeveloped. Life insurance penetration in Russia was at only 0.08% of GDP in 2010, and is much lower than in other BRIC countries (Brazil, Russia, India and China). We expect that the overall insurance and savings culture will improve and be a key driver for growth in insurance. In the long term we believe the potential for Russia is significant as the outlook for growth is stronger than its counterparts in more established markets.<sup>23</sup>

### Products and distribution

In Russia, we sell a range of products, including credit life and standalone personal accident products which are distributed via the bancassurance channel. We sell group life contracts (including accident, disability and death cover) which are distributed via a dedicated corporate channel and through brokers. We also sell personal accident products which are distributed via a worksite marketing channel, and voluntary (Pillar III) corporate pension plans.

Aviva Russia has 21 distribution agreements with banks, operating in 63 out of 83 Russian regions.

### Other Europe

In January 2012, Aviva announced the sale of Aviva Czech Life, Aviva Hungary Life and Aviva Romania Life & Pensions to MetLife Inc. This transaction is consistent with Aviva's strategy to focus on markets where it has strength and scale. The transaction, which is subject to regulatory approvals in each jurisdiction, is expected to be completed during 2012.

### Delta Lloyd – associate

The Group's share of the profits of its retained interest in Delta Lloyd as an associate are shown within the Delta Lloyd segment within continuing operations. Please see page 49 for more information on Delta Lloyd.

## North America

### Regional overview and strategy

Aviva North America consists of two businesses: an indexed life insurance and annuity business in the US, and a general insurance business in Canada. The region is a net capital contributor to the Group and our strategic priorities are to continue to grow profitably and to improve our position and competitiveness. We plan to do this by:

- Providing our customers with competitive products that are tailored to their individual needs, with an enhanced and personalised customer services experience;
- Building on our strong relationships with our distribution partners;
- Growing our life insurance business and strengthening our leading annuity franchise;
- Maximising the opportunities created by the proven sophisticated underwriting capabilities of our general insurance business; and
- Becoming the most recommended company in our markets.

### Market and competition

The North American region is home to two of the world's largest and richest economies, which are served by a large number of insurers in highly fragmented and competitive markets. Our competitors in North America include global insurers such as Allianz, RSA, ING and AEGON and local market competitors such as Intact Financial, John Hancock, Hartford, Pacific Life and American Equity.

We consider our competitive advantages in the North America region to be:

- skilful product innovation with a clear customer focus;
- sophisticated pricing and underwriting capabilities;
- the quality of our distribution partnerships;
- high-quality investment management; and
- financial strength.

## USA

### Business overview and strategy

Aviva USA is a leading provider of fixed indexed life insurance and fixed indexed annuities according to AnnuitySpecs Indexed Sales & Market Report for the third quarter 2011. Aviva USA has approximately one million customers and employs more than 1,700 people across the country, with headquarters in West Des Moines, Iowa and offices in Topeka, Kansas and Melville, New York.

Our strategy is to accelerate the growth of our life insurance business and strengthen our leading annuity franchise. Underpinning our strategy is a focus on compelling customer value propositions, enhanced product offerings, personalised service and deeper relationships with key distribution partners.

Our market research shows consumers want to be understood and recognised as individuals with unique financial needs. In 2011, Aviva USA expanded its brand campaign, 'Building Insurance Around You'. The campaign seeks to demonstrate our commitment to treating customers as people, not policies. The national brand launch, agent training sessions in Aviva USA's home offices, plus other proactive steps to strengthen customer relationships, resulted in favourable feedback from our agents.

### Market

The US is the world's largest economy based on 2010 Gross Domestic Product.<sup>24</sup> It is also the largest insurance market based on total premiums and has more than 79 million members of the nation's 'baby boomer' generation moving into retirement in the next few years.<sup>24</sup>

<sup>21</sup> FSMS: [http://www.fsn.ru/www/site.nsf/web/doc\\_23092011103744.html](http://www.fsn.ru/www/site.nsf/web/doc_23092011103744.html)

<sup>22</sup> FSMS: [http://www.fsm.ru/ru/contributors/poll\\_investment/npi/reports/](http://www.fsm.ru/ru/contributors/poll_investment/npi/reports/)

<sup>23</sup> Russian Federation Federal State Statistics Service:

[http://www.gks.ru/free\\_doc/new\\_site/vvp/tab1.xls](http://www.gks.ru/free_doc/new_site/vvp/tab1.xls)

<sup>24</sup> World Insurance in 2010, New Swiss Re Sigma study "World insurance in 2010"

The indexed annuity and indexed life markets in which Aviva USA operates are dominated by a small number of insurers. According to third quarter 2011 data compiled by AnnuitySpecs.com, the top five indexed annuity providers hold 58% of the indexed annuities market (3Q10:61%), with the top five indexed life insurance providers accounting for 56% of the market (3Q10:68%). The indexed life product segment grew 38% over the prior year through the third quarter of 2011, attracting new carriers and increasing market competition. The market for index annuity sales did not grow in the first nine months of 2011, as consumers increased purchases of variable annuity products by 18% according to the Life Insurance and Market Research Association (LIMRA).<sup>25</sup>

### Products

Aviva USA's broad product portfolio offers flexible solutions to a wide variety of customer needs. We offer both protection and savings products, with traditional fixed as well as indexed accumulation options that pay interest based on the movement of a market index. Depending on such movement, indexed policies can deliver higher returns than traditional fixed products, especially when interest rates are low. Indexed products also serve to protect the customer's investment and provide a guaranteed income even when the market is down.

Aviva USA also offers a wide array of optional extras or 'riders' that can be added to policies to meet customised individual needs. An example would be our 'Wellness for Life' rider, which allows life insurance customers to reduce the cost of their policies if they maintain certain medical criteria. Through an exclusive relationship with Mayo Clinic Health Solutions, a best in class healthcare provider, participants are provided with a range of practical and accessible health information and wellness services to help them lead a healthier lifestyle.

In the savings market, Aviva USA's fixed annuity portfolio offers tax-advantaged savings opportunities and protection against the risk of outliving one's assets. We provide, for example, a guaranteed lifetime withdrawal benefit, a feature that allows customers to make guaranteed minimum withdrawals from their annuity for the entirety of their lives.

We also operate within the managed account guaranteed investment contract (GIC) market with a product that leverages the investment management capabilities of both our life insurance business and those of Aviva Investors North America. Aviva also issues funding agreements in the institutional market.

### Distribution

Aviva USA uses a multi-channel distribution strategy to bring its products to market by focusing on more than 50 key distribution partners. Our distribution channels include career marketing organisations, independent marketing organisations, brokerage general agents and personal producing agents. We work with them to promote and sell our annuity and life insurance products nationwide. Our network covers all 50 states with over 33,000 active agents largely contracted through key distribution partners.

## Canada

### Business overview and strategy

Aviva Canada is the country's second-largest general insurer.<sup>26</sup> Through its distribution partners it provides a range of personal and commercial lines insurance products to nearly 3 million policyholders. It has an 8.2% market share and a top-five position in all major provinces.<sup>26</sup> The company employs 3,600 people and operates from a head office in Toronto, with offices located throughout Canada.

We believe that we are well placed for continued growth and that our success is underpinned by our two strategic priorities of building strong broker relationships and maintaining sophisticated pricing and underwriting. The transformation of our personal lines business over the last few years has ensured the business is highly competitive. We expect that continued refinement to our models will allow us to leverage this position to positively react to market opportunities. We are using the lessons learned from personal lines to enhance and grow our commercial lines business. We will also continue to address increasing customer demand for choice, simplicity and self-service by working with our broker partners on processes and technology solutions to help them compete with other channels.

### Market

As the eighth-largest in the world, Canada's general insurance market is established and stable.<sup>27</sup> The four largest provinces generate around 89% of total premiums with Ontario, the largest, representing 48% of total Canadian premiums.<sup>28</sup>

The Canadian general insurance industry is highly fragmented with many small players and no dominant consumer brand. Steady consolidation has resulted in the top five companies representing 40% of the market and the top two companies, Intact Financial and Aviva, controlling 24% of the market.<sup>28</sup> The rest of the industry includes several national carriers as well as smaller, provincially based or niche companies.

While direct and affinity channels are gradually increasing in market share, the traditional broker channel accounts for over 65% of distribution.<sup>29</sup> In addition to the growth of direct and affinity channels, insurance carriers are increasingly supporting and controlling distribution through investment in brokers.

### Products

The general insurance products we provide through our Canadian companies are:

- personal, home and motor insurance;
- small and medium-size enterprise commercial insurance, including motor, property, liability, boiler and machinery, and surety; and
- niche personal insurance products including holiday and park model trailers, hobby farms, boats as well as antique, classic and custom cars.

### Distribution

We operate in Canada through a distribution network focused on approximately 1,700 independent group and retail brokers who distribute our core personal and commercial line products. In addition, we work closely with both independent and wholly owned specialty brokers to distribute specialty personal line products.

## Asia Pacific

### Regional overview and strategy

Aviva's Asia Pacific business operates in ten countries across the region through associates, joint ventures and wholly owned operations. We have a balanced portfolio, comprising businesses in key strategic markets such as China and India, which have large populations and relatively high economic growth. Singapore is our largest business in the developing markets in South East Asia, and we are growing strongly in the more mature South Korean market. We serve our customers through a multi-channel distribution strategy, with particular strength in bancassurance. Aviva Asia Pacific is focused on creating franchise value through organic growth. Increasing the value of our new business remains

our first priority. We are achieving this through scale benefits and by focusing our product mix on higher margin products.

### Market and competition

We believe that the fundamentals of the Asian markets are attractive and that strong domestic demand and intra-regional trade are likely to sustain the region's growth.

We expect Asia to be the fastest growing region for life insurance globally over the next decade with strong double-digit growth. We expect the Asian insurance market to continue to outpace the West owing to currently low penetration rates of insurance products in many markets, high GDP growth, the presence of a growing middle class and rising wealth.

Changing customer attitudes also open up new opportunities such as retirement, wealth management and protection. The demand for products with guarantees is increasing due to current market volatility. Local companies are our main competitors in most markets.

We have several strengths that we believe give us a competitive advantage, which include:

- multi-channel distribution, with particular strength and expertise in bancassurance;
- balanced portfolio of fast-growing and high-margin markets; and
- sharp focus in promoting higher margin products and improving persistency.

### Business overview and strategy

Operating in ten markets in Asia, we have a range of businesses at different stages of development.

In China, through our 50% joint venture with COFCO Ltd, we are ranked in the top three among the foreign life insurers in China in terms of APE.<sup>30</sup> We have a presence in 12 provinces at 31 December 2011, and over 50 branches. Faced with regulatory changes in bancassurance sales model at bank outlets, we aim to defend volumes and margins by developing alternative distribution channels to reach high net worth customers as well as 'mass affluent' customers with an annual household income of at least RMB 200,000.

In India, with a wide distribution network of 140 branches spreading across nearly 3,000 towns and cities, we operate in partnership with the Dabur Group through a 26% interest in Aviva Life Insurance Company India Ltd. Tighter regulations on unit-linked products are driving an industry shift towards traditional products such as endowment and health policies. We currently rank 13th among the private life insurance companies in India based on APE as at 31 August 2011 according to the Insurance Regulatory and Development Authority (IRDA).<sup>31</sup>

Our Singapore subsidiary ranks fifth by APE as at 30 June 2011 according to the Life Insurance Association.<sup>32</sup> We are one of the biggest providers of employee benefits and healthcare insurance. We have a strong relationship with DBS Bank. In September 2010, we launched our financial advisory channel Aviva Advisors.

In South Korea, we own a 47% stake in Woori Aviva Life Insurance Co., Ltd. through a partnership formed with state-owned Woori Finance Holdings Company Ltd, South Korea's third-largest financial company. Woori Bank is the second-largest commercial bank in South Korea by market capitalisation. By November 2011, we had market share of 2.1%<sup>33</sup> based on initial monthly premiums.

In Hong Kong, our business is ranked 22nd in the long-term insurance market by APE as at 30 June 2011 according to the Office of the Commissioner of Insurance. Our strategy is to build

scale and profitable distribution business in this competitive market by expanding our distribution channels and broadening our products.

In Malaysia, our business is a joint venture with CIMB Group, Malaysia's second-largest financial institution and one of South East Asia's leading universal banking groups. We own a 49% stake in two companies, Commerce Life Assurance Berhad and Commerce Takaful Berhad. At 30 June 2011, we ranked 12th by APE in Conventional Life & Family Takaful Players in Malaysia.<sup>34</sup>

In Sri Lanka, we own a 51% stake in listed company Aviva NDB Insurance. We were ranked the second-largest life insurer with 25% market share and fifth-largest general insurer with 8% market share in the country based on gross written premiums in 2010 according to the Insurance Board of Sri Lanka.<sup>35</sup>

In Indonesia, we have a 60% stake in PT Asuransi Indonesia, in partnership with PT Asuransi Wahana-Tata, a private national general insurer. We are a major provider of group health and pension products and we have started to offer traditional life products such as credit life protection and group life during the year to provide a full suite of general and life products to the local market.

In Vietnam, Aviva has a 50:50 joint venture with Vietinbank, a state-owned bank ranked second in the country in terms of its retail branch network. We are capitalising on an untapped retail and SME customer base and aim to be the leading bancassurance player and top market share leader by new business premium within five years.

Our joint venture in Taiwan is classified as held for sale. See section 'Financial statements IFRS – Note 3–Subsidiaries'.

### Market

We believe the fundamentals of the Asian markets are strong. The Asian Development Bank predicts GDP growth for emerging markets in Asia of 7.2% in 2012.<sup>36</sup> Despite inflationary pressures, we believe, Asia's strong domestic demand and intra-regional trade is likely to sustain this growth momentum, with China and India driving the overall trend.

We expect Asia to be the fastest growing region for life insurance globally, with the potential for 15–20% average market growth per annum over the next decade. We believe that South East Asia in particular offers one of the highest insurance margins in the world.

By strengthening our multi-channel distribution capability as well as managing our product portfolio for margin and profit, we believe we are well-positioned to continue delivering strong growth in franchise value.

### Products

Our Asian businesses offer a range of protection, bonds and savings and pension products, including universal life, participating and non-participating endowments, unit-linked single and regular premium life insurance, other savings and pensions products and a range of accident and health insurance products.

Due to the internationalisation and appreciation of China's currency the Renminbi (RMB), we launched RMB insurance savings products in Hong Kong and Singapore, thereby tapping into the growing demand for RMB insurance products in this market.

### Distribution

We operate a multi-distribution strategy in Asia, with particular strength in bancassurance. We aim to continue to harness the benefits of multi-distribution in all of our markets so that we can expand our presence to a wider range of profitable customer segments.

36 Asian Development outlook 2011 update, December 2011.

Aviva Singapore has a multi-channel distribution strategy building on a core bancassurance relationship with DBS Bank, expanding the network of IFAs and Aviva Advisors and online general insurance platform.

In China and South Korea, we distribute the majority of our products through bancassurance and IFAs.

In Hong Kong, India and Malaysia, bancassurance is the main distribution channel. We are investing in other channels such as direct marketing to diversify our sources of revenue.

## Aviva Investors

### Business overview and strategy

Aviva Investors was established in 2008 when the Aviva Group combined all of its major fund management components into a single global fund management business. We have £263 billion in assets under management as at 31 December 2011 and offer a broad range of expert investment skills and experience around the world, most notably in the UK, Europe, the US, Asia Pacific and the Middle East.

Our largest clients are the long-term insurance and savings, and general insurance businesses of Aviva, to whom we provide bespoke asset management services across a broad spectrum of asset classes.

We provide external clients with bespoke segregated solutions or offer access to a variety of fund ranges. Our principal target clients for the larger segregated solutions tend to be large pension funds and financial institutions such as insurance companies and banks.

Our strategy is to rapidly grow our share of higher-margin, external business, offering client-focused solutions and products to our customers across our international network.

### Business review

In the final quarter of 2011, we undertook a detailed review of our business to ensure that Aviva Investors remains well-placed to compete in what we expect will be a period of continuing economic instability, subdued growth, increased regulatory scrutiny and reduced risk-appetite among investors.

The conclusion of the review was that the business strategy is sound but that greater focus in core areas of strength would improve profitability and enable us to continue to make important investments in the development of our global infrastructure.

As a result, we propose to streamline our business, concentrating fund management activity in fixed income, real estate and multi asset solutions, where we see growth potential and already have a strong competitive position. We remain committed to the active management of local equities in the UK, continental Europe, the US and Singapore, but we have seen a reduced appetite for riskier assets such as equities, notably in Europe, and we propose to respond to this, and eliminate duplication, by reducing the scope of active equity management in London.

A majority of business already comes from institutional clients, so we are proposing to focus sales and marketing activity on key institutional markets. We will, however, continue to support Aviva networks distributing to retail investors globally. In the UK in particular, we will continue to offer high-quality investment products and solutions to retail investors through our network of banks, insurers (including Aviva), and brokers.

### Market and competition

We consider our competitor peer group to include large insurance-owned asset managers and major independent global asset managers.

Key identified competitive factors for Aviva Investors include:

- Our Aviva Group parentage and the associated brand strength, reach and recognition;

- Deep knowledge of the needs of sophisticated institutional clients such as pension funds, local government organisations and sovereign wealth funds;
- Clear focus on, and commitment to, our major strengths in fixed income, real estate and regional equities;
- Our ability to combine these strengths in multi-asset solutions suitable for the volatile environment in which we are operating;
- Our large-scale, low-cost provider status, which enables us to prosper in an intensely competitive market; and
- Our risk management expertise, which helps us to deliver returns that are matched to our clients' risk appetite.

### Investment capabilities

Aviva Investors offers a wide range of investments across all asset classes in all significant financial centres worldwide. Where we do not directly manage assets, we believe we have the skills and experience to select the right third-party asset managers to complement our own products.

Our primary investment capabilities include:

- Fixed income – our fixed income teams cover a comprehensive product set: UK government securities, liquidity products, corporate bonds, European and global sovereigns, index-linked bonds, emerging markets (hard and local currency debt) and high-yield instruments;
- Real estate – we offer funds specific to property assets in the UK, Europe and Asia, in addition to a global multi-manager service;
- Multi asset solutions – constructing client solutions across markets and asset classes;
- Equities – locally based teams focused on generating above market performance; and
- Alternatives – we offer a range of alternative investment products including private equity fund of funds and single hedge funds.

### Investment strategies and solutions

Aviva Investors and Aviva have long recognised that the most important driver of investment returns for any institutional manager is asset allocation. We have built capabilities to create an optimal mix of assets according to our clients' needs. This capability lends itself to tailored dynamic strategic asset allocation, medium-term asset allocation and tail risk hedging strategies.

We have built a comprehensive range of global, local and specialist fixed income capabilities which draw upon a range of sources to deliver investment solutions for sophisticated institutional clients. To satisfy the growing demand for diversified fixed income solutions we have created a flexible platform, Global Markets Alpha, to match our clients' liabilities and we believe, deliver excess returns by drawing on and combining a range of fixed income capabilities.

Our insurance background also means that we have the skills to offer Liability Driven Investment (LDI) solutions to clients, focusing our efforts where we believe we have a competitive advantage – in particular insurance LDI in Europe and pensions LDI in North America.

Within real estate we are seeking to leverage our expertise to address long-term requirements from pension funds. In 2011 we created REaLM (Return Enhancing and Liability Matching), a proposition whereby the investor gives up potential future capital gains on underlying real estate assets in favour of enhanced returns throughout the life of the funding (typically 30 to 40 years). Originally developed for our Aviva client, REaLM has already attracted interest and financial commitment from external clients.

Where a client is looking for a solution, outcome focused product or is working within a specific risk budget our multi-manager, asset allocation and multi-asset fund teams draw on the wider capabilities within Aviva Investors or externally to create the required outcome.

Our global platform has enabled us to generate significant sales across borders with successes in 2011 including a substantial mandate from a Middle East client into River Road Asset Management, our US equity investment manager. Similarly, our Real Estate Multi Manager platform offers global exposure to real estate markets that we believe few competitors can match.

### Products

Our product range covers a broad range of asset classes. In Europe, we have a range of SICAVs (open-ended collective investment schemes), which are domiciled in France, Luxembourg and Poland. These funds have different share classes depending on the size and type of investor. Our traditional distribution model for these funds focuses on wholesale distributors, asset allocators and small to mid-size institutional investors but following our business review we propose to focus our pooled fund range and segregated capabilities on institutional clients' needs.

In the UK, we supply products to the retail and wholesale markets, principally distributing equity and bond funds in our UK domiciled OEIC range, and a market-leading range of open ended real estate funds. These are promoted to investors via IFAs, fund platforms, fund supermarkets and discretionary asset managers and we remain fully committed to this business. In addition, we have a range of pooled pension funds which are aimed at the smaller pension fund market. These funds are normally defined benefit schemes and tend to be advised by investment consultants.

We manage hedge funds in the UK and the US. These funds are generally registered offshore and are primarily sold to the hedge funds industry, although we also promote single strategy funds to institutional clients, family offices and wealth managers. The asset classes include fixed interest, multi-asset and convertibles.

We also have an expanding range of specialist property funds. These funds are targeted at specialist real estate buyers and large institutions (mostly pension funds and local authorities), and provide real estate solutions to a wide range of risk appetites, ranging from secure income generating funds to highly leveraged growth funds.

We have six money market funds, domiciled in Dublin and Paris, addressing the sterling and euro money market segments. These funds are sold by a specialist sales team based in London and Paris and target corporate treasury functions.

### Delta Lloyd

Delta Lloyd is a financial services provider in the Netherlands and has a growing operation in Belgium. The business has been listed on the NYSE Euronext Amsterdam since November 2009.

When it was listed Aviva retained 58.3% of the ordinary share capital and 54.0% of the voting rights in Delta Lloyd. The IPO raised £1 billion of gross disposal proceeds. In May 2011, Aviva sold a further 25 million shares in Delta Lloyd, reducing our holding to 42.7% of Delta Lloyd's ordinary share capital. This represents 40% of shareholder voting rights. As Aviva no longer commands a majority of shareholder voting rights, it no longer controls Delta Lloyd.

Accordingly, the results of Delta Lloyd up to 6 May 2011 are presented as discontinued operations. After this date, Aviva ceased to consolidate Delta Lloyd. Aviva's share of the profits of its retained interest in Delta Lloyd as an associate are shown within the Delta Lloyd segment within continuing operations.

During 2011, Delta Lloyd offered a scrip dividend. Aviva did not exercise this option which resulted in a further dilution of Aviva's shareholding by 0.8% to 41.9% of ordinary share capital, and 39.3% of shareholder voting rights.

The recoverable amount of Delta Lloyd NV has been determined based on fair value less costs to sell. The fair value has been based on the market price of ordinary shares of Delta Lloyd NV quoted on NYSE Euronext Amsterdam as at 31 December 2011. As a result of this test an impairment of £217 million has been recognised in respect of the associate, reducing its carrying amount to fair value.

### Business overview and strategy

Delta Lloyd operates in the life insurance and pensions, general insurance, fund management and selected banking markets in the Netherlands and Belgium. The group employs approximately 5,400 permanent staff as at 31 December 2011.

In September 2011 Delta Lloyd announced the sale of its German business to Nomura Holdings Inc. The sale was in line with Delta Lloyd's stated strategy of focusing on its core markets. It follows Delta Lloyd's decision, announced in March 2010, to place its German business into run-off and to stop writing new policies. The German business is not reported as held for sale as at 31 December 2011 by Delta Lloyd. This is due to the year-end valuation of the German business which under year-end market conditions did not support a probable sale.

### Market

Delta Lloyd continues to operate in competitive and mature markets. Customers in the Netherlands increasingly demand that suppliers provide value-for-money, high-performing products with transparent charges. The Dutch savings market is competitive with banks now able to offer retirement products on the same terms as insurers. Delta Lloyd has taken the opportunity to sell these bank saving products. In addition, Delta Lloyd expects growth in the Group pension market. Delta Lloyd has taken the opportunity to extend its distribution of the Group pension market through its Be Frank joint venture.

In the general insurance market there continues to be competition on premium rates, particularly in the motor sector, due to increasing claims frequencies linked with the economic downturn and weather-related events.

### Products

The long-term insurance and savings business of Delta Lloyd offers a range of protection, bonds and savings and pensions services, including group pension schemes, annuities, unit-linked bonds, savings products and protection insurance. The general insurance business offers a well-diversified product portfolio including personal, motor, travel and home insurance and small to medium-sized commercial policies. Delta Lloyd also sells retail investment fund and mortgage products in the Netherlands and retail banking products in Belgium.

### Distribution

Delta Lloyd distributes long-term insurance and savings and general insurance products under three brands: Delta Lloyd, OHRA and through a joint venture with ABN AMRO.

Individual investment products are sold through private banks including ABN AMRO, ING and Rabobank. On 30 December 2011, Delta Lloyd Group confirmed a 30-year joint venture for the exclusive distribution and sales of insurance products under the Friesland Bank (Insurances) label. Friesland Bank Assurantiën BV is a 100% subsidiary of FBA Holding BV. Delta Lloyd Group has acquired 51% of the shares of FBA Holding BV.

# Organisational structure

## Organisational structure

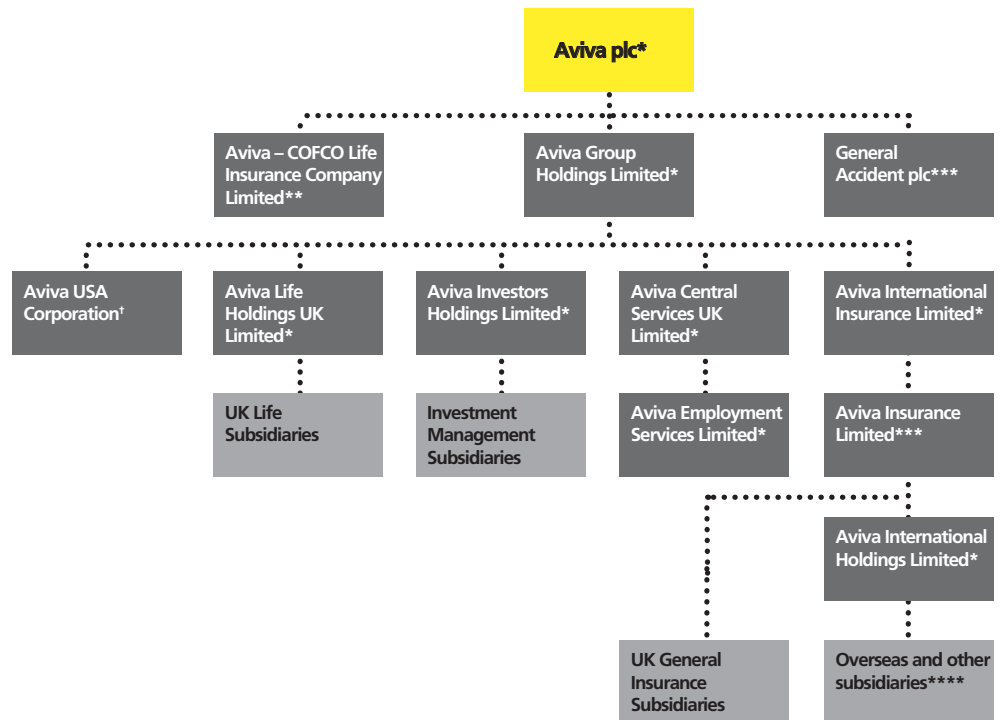

The following chart shows, in simplified form, the organisational structure of the Group as at 31 December 2011. Aviva plc is the holding company of the Group.

### Parent company

Aviva plc

### Subsidiaries

The principal subsidiaries of the Company are listed below by country of incorporation. All are wholly owned, directly or indirectly, and transact insurance or reinsurance business, fund management activities or services in connection therewith, unless otherwise stated.

\* Incorporated in England and Wales

\*\* Incorporated in People's Republic of China  
Aviva plc has a 50% interest in the joint venture

## Analysis of investments

We invest our policyholders' funds and our own funds in order to generate a return for both policyholders and shareholders. The financial strength of our Group and both our current and future operating results and financial performance are, therefore, in part dependent on the quality and performance of our investment portfolios in our UK, continental European, North America and Asia Pacific operations.

For additional information on our financial investments, see 'Financial statements IFRS – Note 25 – Financial investments'. For a quantitative analysis of funds under management by Aviva and third-party fund managers, see 'Financial statements IFRS – Note 58 – Assets under management'.

### Investment strategy

Our investment portfolio supports a range of businesses operating in a number of geographical locations. Our aim is to match the investments held to support a line of business to the nature of the underlying liabilities, while at the same time considering local regulatory requirements, the level of risk inherent within different investments, and the desire to generate superior investment returns, where compatible with this stated strategy and risk appetite.

### Long-term insurance and savings business

As stated above, we aim to optimise investment returns while ensuring that sufficient assets are held to meet future liabilities and regulatory requirements. As different types of life insurance business vary in their cash flows and in the expectations placed upon them by policyholders, we need to hold different types of investments to meet these different cash flows and expectations.

The UK with-profits business is comprised largely of long-term contracts with some guaranteed payments. We are therefore able to invest a significant proportion of the funds supporting this business in equities and real estate. This is because the long-term nature of these contracts allows us to take advantage of the long-term growth potential within these classes of assets, while the level of guaranteed payments is managed to mitigate the level of risk that we bear in relation to the volatility of these classes of assets.

Non-UK participating business, annuities and non-participating contracts in all countries, have a high level of guaranteed future payments. We endeavour to match the investments held against these types of business to future cash flows. We therefore have a policy of generally holding fixed income securities and mortgage loans with appropriate maturity dates.

With unit-linked business, the primary objective is to maximise investment returns, subject to following an investment policy consistent with the representations that we have made to our unit-linked product policyholders.

### General insurance and health business

The general insurance and health business is comprised of shorter-term liabilities than the long-term insurance business. Furthermore, all the risk attaching to the investments is borne by our shareholders. As a result, the investment portfolio held to cover general insurance liabilities contains a higher proportion of fixed income securities than the portfolio held to cover life insurance liabilities.

### Property partnerships

As part of their investment strategy, the UK and certain European policyholder funds have invested in a number of property limited partnerships (PLPs), either directly or via property unit trusts (PUTs), through a mix of capital and loans. The nature of our involvement in property partnerships is set out in the second and third paragraphs of the investment vehicles section of 'Financial statements IFRS – Accounting policies – (C) Consolidation principles'. Property partnerships are accounted for as subsidiaries, joint ventures or financial investments depending on our participation and the terms of each partnership agreement. For each property partnership accounted for as a subsidiary, joint venture or financial investment, we are exposed to falls in the value of the underlying properties which are reflected as unrealised gains/losses on investment properties, our share of joint venture results and unrealised gains/losses on financial investments, respectively. However, the majority of these are in policyholder funds (rather than shareholder funds) so such losses are offset by changes in the amounts due to policyholders or unitholders, or in the unallocated divisible surplus (UDS).

### Analysis of investments

We distinguish between policyholder, participating fund and shareholder investments, which are terms used to reflect the differing exposure to investment gains and losses. Policyholder assets are connected to our unit-linked business, where the policyholder bears the investment risk on the assets in the unit-linked funds. Our exposure to loss on policyholder assets is limited to the extent that income arising from asset management charges is based on the value of assets in the funds. Participating fund assets relate to some of our insurance and investment contracts which contain a discretionary participating feature, which is a contractual right to receive additional benefits as a supplement to guaranteed benefits. Our exposure to investment losses on participating funds is generally limited to our participation in the fund. Shareholder assets are other assets held within our long-term businesses that are not backing unit-linked liabilities or participating funds.

Investments held at 31 December 2011 and 31 December 2010 are listed below:

	Policyholder assets £m	Participating fund assets £m	Shareholder assets £m	Total assets analysed £m	Less assets of operations classified as held for sale £m	Balance sheet total £m
<b>2011</b>						
Investment property	4,168	6,384	1,086	11,638	—	11,638
Loans	917	6,471	20,728	28,116	—	28,116
Financial investments						
Debt securities	15,295	79,450	58,600	153,345	(93)	153,252
Equity securities	20,602	10,788	1,293	32,683	(37)	32,646
Other investments	23,233	5,078	2,066	30,377	(217)	30,160
<b>Total</b>	<b>64,215</b>	<b>108,171</b>	<b>83,773</b>	<b>256,159</b>	<b>(347)</b>	<b>255,812</b>
<b>Total %</b>	<b>25.1%</b>	<b>42.2%</b>	<b>32.7%</b>	<b>100.0%</b>		<b>100.0%</b>
2010	78,455	119,706	111,265	309,426	—	309,426
2010 %	25.4%	38.6%	36.0%	100.0%	—	100.0%

As the table indicates, approximately 32.7% of total investments can be directly attributed to shareholders. The apportionment of our shareholder assets is predominantly weighted towards debt securities and loans. In comparison, policyholder and participating funds contain a greater proportion of equities and other investments (e.g., unit trusts), reflecting the underlying investment mandates.

Financial investment balances included in the remainder of these disclosures include financial investments of operations classified as held for sale.

### Measurement basis

We carry investments on our statement of financial position at either fair value or amortised cost. As shown in the table below, at 31 December 2011, approximately 96% of the group's total investments were carried at fair value on the statement of financial position.

	2011			2010		
	Fair value £m	Amortised cost £m	Total £m	Fair value £m	Amortised cost £m	Total £m
Investment property	11,638	—	11,638	13,064	—	13,064
Loans	18,486	9,630	28,116	21,028	22,046	43,074
Financial investments						
Debt securities	153,345	—	153,345	167,482	—	167,482
Equity securities	32,683	—	32,683	49,076	—	49,076
Other investments	30,377	—	30,377	36,730	—	36,730
<b>Total</b>	<b>246,529</b>	<b>9,630</b>	<b>256,159</b>	<b>287,380</b>	<b>22,046</b>	<b>309,426</b>
<b>Total %</b>	<b>96.2%</b>	<b>3.8%</b>	<b>100.0%</b>	<b>92.9%</b>	<b>7.1%</b>	<b>100.0%</b>

For more information about financial investments analysed according to their accounting classification and valuation approach, as well as the cost, unrealised gains and losses, impairments, fair value and other information concerning financial investments, see the 'Financial statements IFRS – Note 25 – Financial investments'.

### Debt securities

We grade debt securities according to external credit ratings issued at the balance sheet date. The credit rating used for each individual security is the second-highest of the available ratings from Standard & Poor's, Moody's and Fitch. If a credit rating is available from only one of these three rating agencies then this rating is used. If an individual security has not been given a credit rating by any of these three rating agencies, the security is classified as 'non-rated'.

For the tables below we have expressed our rating using Standard & Poor's rating scale whereby investment grade debt securities are classified within the range of AAA (extremely strong) to BBB (good) ratings, with AAA being the highest possible rating. Debt securities which fall outside this range are classified as less than BBB. Where we use a rating provided by Moody's or Fitch, we have expressed it as the Standard & Poor's equivalent rating. For example, we consider Standard & Poor's rating of AA (very strong) to be equivalent to Moody's rating of AA (excellent) and Fitch's rating of AA (very strong).

Despite the market downgrade activity during 2010 and 2011, debt securities with a credit rating of A or above at 31 December 2011 represented 75% of total holdings (2010: 77%). Approximately 39% of total debt security holdings are

in government bonds and 33% of total debt security holdings were in corporate bonds with a credit rating of A or above, as of 31 December 2011.

'Wrapped credit' is credit exposure that has been insured with monoline insurers to achieve a better credit rating. The monoline insurers suffered further downgrades during 2010 and 2011 and this is reflected in the analysis that follows. The exposure is diversified across several monolines and the underlying bonds are diversified across many different counterparties. In general, we are a long-term holder of this debt, although we continue to review our holdings with reference to the underlying quality and prospects.

The majority of the residential mortgage-backed securities (RMBS) are US investments and over 71% of this exposure is backed by the US government-sponsored entities (GSEs) Fannie Mae and Freddie Mac. Under the conservatorship arrangements with the US government implemented in September 2008, these securities have an implicit guarantee, although they are not expressly backed by the full faith and credit of the US government. The majority of the remaining US RMBS are backed by fixed-rate loans that originated in 2005 or before.

At 31 December 2011 our exposure to collateralised debt obligations (CDO) and collateralised loan obligations (CLO) was limited to £51 million (2010: £332 million). Investments in structured assets (excluding agency RMBS that are backed by GSEs) were £6.2 billion, representing approximately 4% of total debt securities.

At 31 December 2011, the proportion of our shareholder debt securities that are investment grade remained relatively stable at 87% (2010: 88%). The remaining 13% of shareholder debt securities that do not have an external rating of BBB or higher can be split as follows:

- 4% are debt securities that are rated as below investment grade;
- 5% are US private placements which are not rated by the major ratings agencies, but are rated an average equivalent of A- by the Securities Valuation Office of the National Association of Insurance Commissioners (NAIC), a US national regulatory agency; and
- 4% are not rated by the major rating agencies or the NAIC.

Of the securities not rated by an external agency or NAIC, most are allocated an internal rating using a methodology largely consistent with that adopted by an external ratings agency, and are considered to be of investment grade credit quality; these include £2.4 billion of private placements and other corporate bonds held in our UK Life business which have been internally rated as investment grade.

### Debt securities analysed by credit rating and sector

Total debt securities analysed by credit rating and product type are set out in the table below. Government and corporate debt securities are further analysed by type of issuer.

In respect of the wrapped credit investments, the table below shows the credit rating of the securities as they are officially rated, and an estimate of their rating without the guarantee. As rating agencies do not provide credit ratings for individual wrapped credit securities without consideration of the insurance guarantee, the credit ratings disclosed in the table below are based on internal best estimates.

### Total assets

2010 %	64.1%	25.0%	10.9%	100.0%

At 31 December 2011, shareholder investment in equity securities amounted to £1.3 billion, the majority of which relates to our Italian business. The investments include £439 million strategic holding in UniCredit and other financial institutions where we have a strategic relationship (£288 million net of minority interest).

Of our £6.3 billion exposure to equity investments in banks, trusts and insurance companies, £0.6 billion relates to shareholder investments, which includes our strategic holding as mentioned above.

**Exposures to peripheral European countries**

As with other disclosures in the analysis of assets section, all current and comparative figures stated below exclude Delta Lloyd.

Included in our debt securities and other financial assets are exposures to peripheral European countries. All of these assets are valued on a mark to market basis under IAS 39, and therefore our statement of financial position and income statement already reflect any reduction in value between the date of purchase and the balance sheet date. The significant majority of these holdings is within our participating funds where the risk to our shareholders is governed by the nature and extent of our participation within those funds.

Net of non-controlling interests, our direct shareholder assets exposure to the governments (and local authorities and agencies) of Greece, Ireland, Portugal, Italy and Spain has reduced since 2010 and is detailed below; 86% (2010: 80%) of our shareholder asset exposure to Greece, Ireland, Italy, Portugal and Spain arises from investment exposure in businesses domiciled in the respective countries.

**Direct sovereign exposures to Greece, Ireland, Portugal, Italy and Spain (net of non-controlling interests, excluding policyholder assets)**

### Property

Our global headquarters are located in St Helen's, 1 Undershaft, London, England. We also have the following regional headquarters:

- UK – UK Life: York, England;
- UK – UK General Insurance: Norwich, England;
- Europe – London, England;
- North America – Chicago, Illinois, USA;
- Asia Pacific – Singapore; and
- Aviva Investors – London, England.

In addition to the above, our regions have major offices in the following locations:

- North America: Scarborough, Ontario, Canada and West Des Moines, Iowa, USA; and
- Europe: Paris, France; Dublin, Ireland; Madrid, Spain; Warsaw, Poland; and Milan, Italy.

We own or lease space in 24 countries around the world. As at 31 December 2011, we owned and occupied land and buildings for our own use with a total book value of £215 million (2010: £440 million). We believe that these facilities are adequate for our present needs in all material respects. We also hold other properties, both directly and indirectly, for investment purposes, valued at £9,848 million at 31 December 2011 (2010: £11,241 million).

# Contractual obligations

## Contractual obligations

— Current and deferred tax liabilities	1,403
— Other liabilities	2,828
<b>Total liabilities per statement of financial position</b>	<b>297,013</b>

1 Amounts shown in respect of long-term insurance contracts represent estimated undiscounted cash flows for the Group's life assurance contracts. In determining the projected payments, account has been taken of the contract features, in particular that the amount and timing of the contractual payments reflect either surrender, death or contract maturity. In addition, the undiscounted amounts shown include the expected payments based on assumed future investment returns on assets backing insurance and investment contract liabilities. The projected cash flows exclude the unallocated surplus of with-profits funds (see below).

2 All linked contracts and almost all non-linked investment contracts may be surrendered or transferred on demand. For such contracts the earliest contractual maturity is therefore at the current statement of financial position date, for a surrender amount approximately equal to the current statement of financial position liability. Although we expect surrenders, transfers and maturities to occur over many years, the total liability for non-linked investment contracts is shown in the 'Less than one year' column above.

3 Amounts shown in respect of general insurance contracts are based on undiscounted estimates of future claim payments, including for those classes of business for which discounted provisions are held, see 'Financial statements IFRS – Note 39 – Insurance liabilities'. The timing of cash flows reflects a best estimate of when claims will be settled.

4 The Group has no material finance leases for property and equipment.

5 Includes obligations for repayment of collateral received under stock lending arrangements and derivative transactions amounting to £5,229 million.

6 When subordinated debt is undated or loan notes perpetual, the interest payments have not been included beyond 15 years. Annual interest payments for these borrowings are £73 million. Contractual undiscounted interest payments are calculated using fixed interest rates or prevailing market floating rates as applicable.

7 The unallocated divisible surplus represents the excess of assets over liabilities, including policyholder 'asset share' liabilities in the UK, which reflect the amount payable under the realistic Peak 2 reporting regime of the FSA. Although accounted for as a liability, as permitted by IFRS 4, there is currently no expected payment date for the unallocated divisible surplus.

8 Provisions include pension obligations, which have been excluded from the contractual obligations table above, due to the uncertainty of the amount and timing of future cash flows. The Group operates both funded defined benefit and funded defined contribution pension schemes around the world, full details of which are provided in 'Financial statements IFRS – Note 47 – Pension obligations'. We have a contractual obligation to fund these schemes. However, the amount and timing of the Group's cash contributions to these schemes is uncertain and will be affected by factors such as future investment returns and demographic changes. Our cash funding of defined contribution schemes is based on percentages of salary. Our cash contribution to defined benefit schemes is agreed in advance with scheme trustees. In 2010 and 2011 respectively, long-term funding agreements were agreed with the trustees of the main UK and RAC schemes which are expected to eliminate the funding deficits over time. Contributions to these and the other schemes are regularly reviewed in light of changes in expectations of investment returns and other assumptions. The discounted scheme liabilities have an average duration of 20 years in the main UK scheme, 22 years in the RAC scheme, 19 years in the Irish scheme and 13 years in the Canadian scheme.

## Risk management objectives

As a global insurance group, risk management is at the heart of what we do and is the source of value creation as well as a vital form of control. It is an integral part of maintaining financial stability for our customers, shareholders and other stakeholders. Our sustainability and financial strength are underpinned by effective risk management, which allows us to predict future changes, move more quickly and take better decisions for our customers, giving them prosperity and peace of mind. The Group's risk strategy is to invest its available capital to optimise the balance between return and risk while maintaining an appropriate level of economic (i.e. risk-based) capital and regulatory capital in accordance with our risk appetite. Consequently, our risk management objectives are to:

- Embed rigorous risk management throughout the business, based on setting clear risk appetites and staying within these;
- Allocate capital where it will make the highest returns on a risk-adjusted basis; and
- Meet the expectations of our customers, investors and regulators that we will maintain sufficient capital surpluses to meet our liabilities even if a number of extreme risks materialise.

In 2011, in support of these objectives, the Group continued its work to enhance the risk management framework across the Group and to promote a strong risk management culture supported by a robust governance structure.

## Risk management framework

Aviva's risk management framework forms an integral part of the management and Board processes and decision-making framework across the Group. The key elements of our risk management framework are described below:

### Risk appetite

Risk appetite is an expression of the level of risk we are willing and able to accept in pursuit of our strategic objectives and thus provides the context for our risk and capital management.

The following appetite statements, which are reviewed and approved by the Board, demonstrate a key focus on balance sheet strength and protection of the franchise value. They supplement risk appetite statements relating to the regulatory solvency position.

- **Economic capital:** the Aviva Board requires that the Group has sufficient capital to remain able to meet its liabilities in extreme adverse scenarios, on an ongoing basis, calibrated consistently with the Group's strategic target of maintaining a credit rating in the AA range.
- **Liquidity:** the Board requires that the Group maintains significant liquid resources to meet both planned cash outflows and cover unexpected cash requirements under stress conditions. In addition, the Group maintains substantial unutilised committed credit facilities to cover extreme adverse scenarios.
- **Franchise value:** we recognise that our long-term sustainability depends upon the protection of our franchise and our relationship with customers. As such, we will not accept risks that materially impair the reputation of the Group and we will require that customers are always treated with integrity.

Qualitative statements on the Group's appetite for taking and retaining particular risk types, the Group's risk preferences, are set out in the risk management framework policy. The Group's position against the quantitative risk appetite statements is monitored and reported to the Board on a regular basis. Economic capital risk appetites by risk type and by business unit are set in support of the aggregate Group risk appetite based on the Board approved business plan. More granular risk tolerances and limits are set out in our risk management policies and supporting guidance, which are implemented across the Group.

### Risk management

The Group's approach to risk management ensures that significant existing or emerging risks are actively identified, measured, managed, monitored and reported on a continuous basis. Risks are measured considering the significance of the risk to the business and its stakeholders (both internal and external) in the context of our strategy, objectives and risk appetite. Monitoring ensures that risk management approaches are effective, and also seeks to identify risk-taking opportunities to improve the risk-adjusted performance of the Group. Risk management is not only embedded throughout the business but is also aligned with the strategic planning process. We set our business plans guided by our overarching strategy, risk appetite and goal of improving risk-adjusted returns.

We integrate risk considerations and capital needs into day-to-day management and decision-making processes. We actively manage our risk profile through a wide range of techniques, including product design, pricing, underwriting, asset allocation, investment management, duration matching, hedging, reinsurance, acquisitions and disposals, management of the capital structure and of committed credit facilities.

The development and evaluation of our business plans and our various capital and risk management actions are supported by risk modelling, which has been a key area of further enhancement throughout 2011.

### Risk modelling

For the purposes of risk identification and measurement, risks are usually grouped by risk type: credit, market, liquidity, general insurance, life insurance and operational risk. Risks falling within these types may affect a number of key metrics including those relating to balance sheet strength, liquidity and profit. They may also affect the performance of the products that we deliver to our customers and the service to our customers and distributors, which can be categorised as risks to our brand and reputation.

To evaluate the impact of these risks, we carry out a range of stress (where one risk factor, such as equity returns, is assumed to vary) and scenario (where combinations of risk factors are assumed to vary) tests and consider the management actions available to respond to the conditions envisaged. These stress and scenario tests are sometimes prescribed by supervisory authorities, but are supplemented by management-defined scenarios drawn from historical periods of adverse conditions, from risk models and from management discussions.

In addition, 'reverse stress tests' are generated where the intention is to identify the extreme scenarios which would test the business model to the point of failure. These are used to facilitate discussions on whether business plans should be modified.

More details on our capital modelling, including our internal risk-based economic capital model, can be found on page 66.

Risk modelling is an area of focus for continued enhancement and development.

### Risk management responsibilities

Roles and responsibilities for risk management in Aviva are based around the 'three lines of defence' model where ownership for risk is taken at all levels in the Group. Line management in the business is accountable for risk-taking, implementing the risk management framework and embedding a risk culture (1st line of defence). The risk function is accountable for quantitative and qualitative oversight and challenge of the identification, measurement, management, monitoring and reporting of key risks and for developing the risk management framework (2nd line of defence). Internal audit provides an independent assessment of the risk framework and internal control processes (3rd line of defence).

### Risk policies and procedures

To promote a consistent and rigorous approach to risk management across all the businesses and locations in which we operate, we have a set of formal risk policies and business standards. These set out risk management and control requirements for the Group's worldwide operations. As our business responds to changing market conditions and customer needs, we regularly monitor the appropriateness of our risk policies and business standards to ensure that they remain up-to-date.

Businesses regularly identify and review risk exposures. Where risks are outside of tolerance, action plans are required. Similarly, controls are regularly reviewed for effectiveness and remediation actions implemented where necessary. This process is supported by a semi-annual sign-off by the business chief executive and chief financial officers of policy compliance and of the completeness of the list of risks identified. This helps to provide assurance to the various risk oversight committees that there are appropriate controls in place for all our core business activities, and that the processes for managing risk are understood and followed consistently across our global businesses.

A top-down, key risk identification and assessment process is carried out monthly in the risk function at Group level based on Group and regional chief risk officer (CRO) and functional risk director input. This includes the consideration of emerging risks and is supported by deeper thematic reviews.

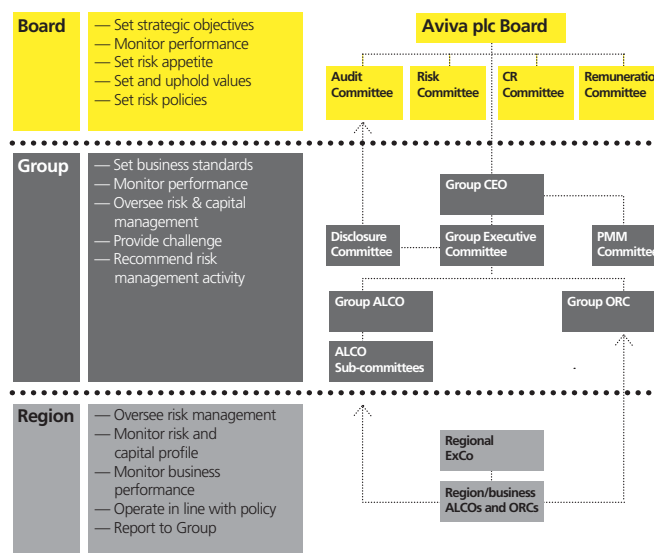

The bottom-up and top-down risk assessment processes are used to generate risk reports which are shared with the relevant committees.

As part of the annual business planning process, we formally consider the risks present in, and to, the draft plan, the consistency of the draft plan with the Group's risk appetite and the appropriate management actions and controls to address any risks identified. The risk assessment forms part of the formal plan submitted to the Group Executive Committee (GEC) and Board for discussion and approval.

### Risk governance and oversight

As described in the corporate governance report on page 97, the Aviva plc Board is responsible for setting the Group's risk appetite and monitoring the establishment and operation of prudent and effective controls in order to assess and manage risks associated with the Group's operations. The Risk Committee (RC) assists the Board in its oversight of risk and risk management across the Group. The GEC assists the Group CEO with regard to strategic, monitoring and controls aspects of day-to-day management including monitoring the development and implementation of group strategies, plans and policies, the monitoring of performance, the assessment and control of risk and the maintenance and ongoing development of a robust framework and environment.

The GEC has established the Asset Liability Committee (ALCO) and the Operational Risk Committee (ORC) to assist it with the execution of its duties. The ALCO provides a key focus on business and financial risks and the ORC provides a key focus on operational risks. The group-level committees are in turn supported by similar governance structures in the regions. These relationships are summarised in the diagram below.

## Principal risks and uncertainties

In accordance with the requirements of the FSA Handbook (DTR 4.1.8) we provide a description of the principal risks and uncertainties facing the Group here and in note 56. Our disclosures covering 'risks relating to our business' in line with reporting requirements of the Securities Exchange Commission (SEC) provide more detail and can be found in the shareholder information section 'Risks relating to our business' on page 155.

### Risk environment

The first half of 2011 was characterised by relatively benign investment market conditions. However, the third quarter saw a sharp worsening in the global economic outlook and substantial deterioration in equity and credit markets in the US, the UK and Europe. While equity markets recovered to some degree in the fourth quarter, the ongoing stressed conditions in the eurozone led to further widening in sovereign bond spreads for a number of countries and weighed heavily on corporate bond prices. The continued political and economic uncertainty relating to the eurozone combined with the high levels of debt in many western economies act as a brake on economic growth and lead to the potential for a low growth, low interest rate environment to persist for some time.

### Risk profile

The types of risk to which the Group is exposed have not changed significantly over the year and remain credit, market, insurance, liquidity, operational and reputational risks as described in the risk factors table on pages 64–65 and in note 56 of the financial statements. However, the decision to sell a 15% stake in Delta Lloyd reduced our IFRS balance sheet sensitivity to equity markets and mortgages and the sale of the RAC reduced our strategic equity exposure. The risk profile was also modified by the extension of the equity hedging programme, implementation of credit and inflation hedges and by reducing sales of products with onerous guarantees.

## Risk factors

This table sets out the definitions of each key risk type, the Group's risk preferences, the key risk drivers and a summary of the related risk mitigation in 2011.

### Risk type

#### Credit

Risk of financial loss as a result of the default or failure of third parties to meet their payment obligations, or variations in market values as a result of changes in expectation related to these risks

#### Market

Risk of adverse financial impacts due to changes in fair values or future cash flows from fluctuations in interest rates, foreign currency exchange rates, equity prices and property values

#### Liquidity

Risk of not being able to make payments as they become due because there are insufficient assets in cash form

#### Life insurance

Risk of adverse movements in mortality, morbidity, longevity, persistency and expenses (including commissions), and policyholder behaviour around take-up of insurance guarantees and options

#### General insurance

Risk of adverse movements in claims, underwriting, catastrophe experience and reserving

#### Operational

Risk of direct or indirect loss resulting from inadequate or failed internal processes, or from people and systems, or from external events, including changes in the legislative or regulatory environment

#### Brand and reputation

Risk of loss of franchise value due to damage of our brand or our reputation with customers, distributors, investors and regulators

### Risk preferences (risks we like/dislike)

- Credit risk is an area where we can provide the returns required to offer competitive products to our customers and generate returns for our shareholders
  - In general we prefer to take credit risk over equity and property risks, due to the better expected risk adjusted return, our credit risk analysis capability and the structural investment advantages conferred to insurers with long-dated, relatively illiquid liabilities
- 
- We actively seek some market risks as part of our investment and product strategy
  - We have a limited appetite for interest rate risk as we do not believe this is adequately rewarded
  - We actively seek to manage foreign currency risk by matching assets and liabilities in functional currencies at business unit level and by hedging
- 
- The relatively illiquid nature of insurance liabilities is a potential source of additional investment return by allowing us to invest in higher yielding, but less liquid, assets such as commercial mortgages
- 
- We take measured amounts of life insurance risk provided that the relevant business has the appropriate core skills to assess and price the risk and adequate returns are available
- 
- We take general insurance risk in measured amounts for explicit reward, in line with our core skills in underwriting and pricing
  - We have a preference for those risks that we understand well, that are intrinsically well managed and where there is a spread of risks in the same category
- 
- Operational risk should generally be reduced to as low a level as is commercially sensible, on the basis that taking operational risk will rarely provide us with an upside
  - We continually seek to improve processes through reduction of errors, rework and broken promises with the outcome of reducing operational losses, improved customer proposition and employee satisfaction and reduced operational risk
- 
- Brand and reputation risk should generally be reduced to as low a level as is commercially sensible
  - We continually seek opportunities to improve processes, with the outcome of improved customer proposition, sustained customer confidence and a positive regulatory reputation

**Key drivers**

- Credit spread: changes in the likelihood of default losses perceived by the market or changes in the default or liquidity risk premium demanded by the market
  - Counterparty default: includes a delay in repayments or interest payments, restructuring of borrower repayments/interest schedule, bankruptcy
  - Rating migration: changes in rating agency perspective on credit risk
- 
- Equity: market dynamics (e.g. price/index moves and volatility)
  - Property: changes in market value or volatility of portfolios
  - Interest rate: changes in interest rates or shape of the yield curve
  - Currency: changes in spot/forward prices, volatility, correlations
- 
- Cash inflows: from premiums, investment income, capital injections, dividends and loans
  - Cash outflows: for claims and redemptions, debt service requirements, tax payments, dividends to group and expenses
  - Cash collateral requirements
- 
- The actual experience on mortality, morbidity, longevity, expenses or persistency (lapse rates) is adverse to the pricing assumptions
  - Poor underwriting criteria allow risks to be accepted at inadequate premium levels, or proposals to be accepted, which should be declined
  - Policyholder behaviour differs from that assumed such as in the exercise of valuable options
- 
- Claims incurred from catastrophic events, such as flooding or windstorm
  - Financial impact of worsening claims ratios and inadequate reserves
  - Claims inflation is higher than assumed
  - Poor design or inadequate pricing of products
- 
- Failure of key processes and controls resulting in mis-selling, fraud or losses requiring customer compensation
  - Systems errors or failure of information and communications systems that affects the delivery of services to our customers
  - Adverse changes in external environment including competitive landscape, customer behaviour and distribution models
- 
- Media speculation and negative publicity, adverse market and customer perception
  - Products or services recommended by us not performing as expected
  - Velocity of near-instantaneous global transmissions of failure and use of social networking sites

**Risk mitigation in 2011**

- Reduction in aggregate direct shareholder assets exposure to the governments (and local authorities and agents) of Greece, Ireland, Portugal, Italy and Spain
  - Credit risk hedging
  - Investment restrictions on sovereign and corporate exposure to some eurozone countries
  - Specific asset de-risking
- 
- Active asset management and hedging in business units
  - Increased size of Group-level equity hedging programme
  - Pension fund de-risking
  - Asset and liability duration matching limits impact of interest rate changes and actions taken to manage guarantee risk, through product design
- 
- Maintaining committed borrowing facilities (£2.1 billion) from banks
  - Asset liability matching methodology develops optimal asset portfolio maturity structures in our businesses to ensure cash flows are sufficient to meet liabilities
  - Commercial paper issuance
- 
- Enhanced pricing risk selection reflected in improved new business internal rate of return (IRR)
  - Product mix changes that reduce overall capital strain
  - Use of reinsurance to mitigate mortality/morbidity risks
  - Enhanced guidelines to support businesses through the complete cycle of product design, development and pricing
- 
- Use of reinsurance to help reduce the financial impact of a catastrophe and manage earnings volatility
  - Extensive use of data, financial models and analysis to improve pricing and risk selection
  - Underwriting and claims management disciplines
  - Digital mapping to better manage property flood risk
  - Focus on personal lines, small and medium-sized enterprises
  - Inflation hedging
- 
- Roll out of enhanced business standards covering key processes
  - Ongoing monitoring of controls
- 
- Building our brand prominence and regularly monitoring brand metrics
  - Targeting the delivery of exceptional experience to our customers and treating customers fairly in line with the FSA principles
  - Monitoring metrics including customer advocacy, retention and complaints

## Capital management

### Capital management objectives

The primary objective of capital management is to optimise the balance between return and risk, while maintaining economic and regulatory capital in accordance with risk appetite. Aviva's capital and risk management objectives are closely interlinked, and support the dividend policy and earnings per share growth, while also recognising the critical importance of protecting policyholder and other stakeholder interests.

Overall capital risk appetite, which is reviewed and approved by the Aviva Board, is set and managed with reference to the requirements of a range of different stakeholders including shareholders, policyholders, regulators and rating agencies. Risk appetite is expressed in relation to a number of key capital and risk measures, and includes an economic capital risk appetite of holding sufficient capital resources to enable the Group to meet its liabilities in extreme adverse scenarios, on an ongoing basis, calibrated consistently with the Group's strategic target of maintaining credit ratings in the AA range.

In managing capital we seek to:

- maintain sufficient, but not excessive, financial strength in accordance with risk appetite, to support new business growth and satisfy the requirements of our regulators and other stakeholders giving both our customers and shareholders assurance of our financial strength;
- optimise our overall debt to equity structure to enhance our returns to shareholders, subject to our capital risk appetite and balancing the requirements of the range of stakeholders;
- retain financial flexibility by maintaining strong liquidity, including significant unutilised committed credit facilities and access to a range of capital markets;
- allocate capital rigorously across the Group, to drive value adding growth through optimising risk and return; and
- declare dividends on a basis judged prudent, while retaining capital to support future business growth, using dividend cover on an operating earnings after tax basis\* in the 1.5 to 2.0 times range as a guide.

In line with these objectives, the capital generated and invested by the Group's businesses is a key management focus. Operating capital generation, which measures net capital generated after taking into account capital invested in new business (before the impact of non-operating items) is a core regulatory capital-based management performance metric used across the Group. This is embedded in the Group business planning process and other primary internal performance and management information processes.

Capital is measured and managed on a number of different bases. These are discussed further in the following sections.

### Accounting basis:

#### Capital employed by segment and financing of capital

The table below shows how our capital, on an MCEV basis, is deployed by segment and how that capital is funded.

	2011 £m	Restated 2010 £m
Long-term savings	15,211	18,533
General insurance and health	5,875	4,747
Fund management	218	215
Other business	(1,102)	(119)
Corporate <sup>1</sup>	(228)	(997)
Delta Lloyd	776	3,892
<b>Total capital employed</b>	<b>20,750</b>	<b>26,271</b>
Financed by:		
Equity shareholders' funds	12,829	15,038
Non-controlling interests	1,476	3,977
Direct capital instruments	990	990
Preference shares	200	200
Subordinated debt	4,550	4,572
External debt	705	1,494
<b>Total capital employed</b>	<b>20,750</b>	<b>26,271</b>

<sup>1</sup> "Corporate" includes centrally held tangible net assets, the staff pension scheme surplus and also reflects internal lending arrangements. These internal lending arrangements, which net out on consolidation, arise in relation to the following:

- Aviva Insurance Limited (AI) acts as both a UK general insurer and as the primary holding company for our foreign subsidiaries. Internal capital management mechanisms in place allocate a portion of the total capital of the company to the UK general insurance operations, giving rise to notional lending between the general insurance and holding company activities. These mechanisms also allow for some of the assets of the general insurance business to be made available for use across the Group.
- Certain subsidiaries, subject to continuing to satisfy standalone capital and liquidity requirements, loan funds to corporate and holding entities. These loans satisfy arm's-length criteria and all interest payments are made when due.

Total capital employed is financed by a combination of equity shareholders' funds, preference capital, subordinated debt and borrowings.

At 31 December 2011 we had £20.8 billion (2010: £26.3 billion) of total capital employed in our trading operations, measured on an MCEV basis. The reduction is primarily driven by the deconsolidation of Delta Lloyd and the impact of financial markets.

In May 2011 we issued £450 million of Lower Tier 2 hybrid capital securities maturing in 2041 which may be called from 2021. In November 2011 we issued a further \$400 million of Lower Tier 2 hybrid capital securities maturing in 2041 which may be called from 2016. These instruments are expected to comply for Tier 2 treatment under Solvency 2. The transactions had a positive impact on Group IGD solvency and Economic Capital measures. Also in November 2011 €800 million of Lower Tier 2 hybrid capital securities were redeemed at first call.

Financial leverage, the ratio of external senior and subordinated debt to MCEV capital and reserves, was 36.7% (2010: 31.9%). Fixed charge cover, which measures the extent to which external interest costs, including subordinated debt interest and preference dividends, are covered by MCEV operating profit, and was 8.9 times (2010: 9.4 times).

### Regulatory capital – overview

Individual regulated subsidiaries measure and report solvency based on applicable local regulations, including in the UK the regulations established by the Financial Services Authority (FSA). These measures are also consolidated under the European Insurance Groups Directive (IGD) to calculate regulatory capital adequacy at an aggregate group level, where we have a regulatory obligation to have a positive position at all times. This measure represents the excess of the aggregate value of regulatory capital employed in our business over the aggregate minimum solvency requirements imposed by local regulators, excluding the surplus held in the UK and Ireland with-profit life funds. The minimum solvency requirement for our European

\* The Group's accounting policy for operating profit (also referred to as Group adjusted operating profit) remains consistent with prior periods and is set out on page 168.

businesses is based on the Solvency 1 Directive. In broad terms, for EU operations, this is set at 4% and 1% of non-linked and unit-linked life reserves respectively and for our general insurance portfolio of business is the higher of 18% of gross premiums or 26% of gross claims, in both cases adjusted to reflect the level of reinsurance recoveries. For our major non-European businesses (the US and Canada) a risk charge on assets and liabilities approach is used.

### Regulatory capital – group European Insurance Groups Directive

	UK Life funds £bn	Other business £bn	2011 £bn	2010 £bn
IGD capital resources	5.6	8.5	14.1	16.3
Less: capital resource requirement (CRR)	(5.6)	(6.3)	(11.9)	(12.5)
<b>IGD excess solvency</b>	—	2.2	2.2	3.8
<b>Cover of EU minimum (calculated excluding UK Life funds)</b>			<b>1.3 times</b>	1.6 times

The EU IGD regulatory capital solvency surplus has decreased by £1.6 billion since 31 December 2010 to £2.2 billion. The key movements over the period are set out in the following table:

	£bn
IGD solvency surplus at 31 December 2010	3.8
Operating profits net of other income and expenses	1.0
Dividends net of scrip	(0.5)
Market movements including foreign exchange	(1.9)
Pension scheme funding	(0.3)
Impact of Delta Lloyd sell down	0.1
Impact of RAC sale	0.2
Restructuring of UK regulated general insurance entities	0.2
Increase in CRR	(0.3)
Other regulatory adjustments	(0.1)
<b>Estimated IGD solvency surplus at 31 December 2011</b>	<b>2.2</b>

### Regulatory capital – UK Life with-profit funds

The available capital of the with-profit funds is represented by the realistic inherited estate. The estate represents the assets of the long-term with-profit funds less the realistic liabilities for non-profit policies within the funds, less asset shares aggregated across the with-profit policies and any additional amounts expected at the valuation date to be paid to in-force policyholders in the future in respect of smoothing costs, guarantees and promises. Realistic balance sheet information is shown below for the three main UK with-profit funds: Old With-Profit Sub-Fund (OWPSF), New With-Profit Sub-Fund (NWPSF) and With-Profit Sub-Fund (WPSF). These realistic liabilities have been included within the long-term business provision and the liability for insurance and investment contracts on the consolidated IFRS statement of financial position at 31 December 2011 and 31 December 2010.

	Estimated realistic assets £bn	Estimate realistic liabilities <sup>1</sup> £bn	Estimated realistic inherited estate <sup>2</sup> £bn	Support arrangement <sup>3</sup> £bn	Estimated risk capital Margin <sup>5</sup> £bn	Estimated excess £bn	2010 Estimated excess £bn
NWPSF	18.6	(18.6)	—	1.1	(0.4)	0.7	0.8
OWPSF	3.0	(2.7)	0.3	—	(0.1)	0.2	0.2
WPSF <sup>4</sup>	19.4	(17.8)	1.6	—	(0.6)	1.0	1.4
<b>Aggregate</b>	<b>41.0</b>	<b>(39.1)</b>	<b>1.9</b>	<b>1.1</b>	<b>(1.1)</b>	<b>1.9</b>	2.4

- These realistic liabilities include the shareholders' share of future bonuses of £0.3 billion (31 December 2010: £0.7 billion). Realistic liabilities adjusted to eliminate the shareholders' share of future bonuses are £38.8 billion (31 December 2010: £41.5 billion). These realistic liabilities make provision for guarantees, options and promises on a market consistent stochastic basis. The value of the provision included within realistic liabilities is £1.9 billion, £0.3 billion and £3.1 billion for NWPSF, OWPSF and WPSF respectively (31 December 2010: £1.9 billion, £0.3 billion and £3.1 billion).
- Estimated realistic inherited estate at 31 December 2010 was £nil billion, £0.3 billion and £1.8 billion for NWPSF, OWPSF and WPSF respectively.
- The support arrangement represents the reattributed estate (RIEESA) of £1.1 billion at 31 December 2011 (31 December 2010: £1.2 billion).
- The WPSF fund includes the Provident Mutual (PM) fund which has realistic assets and liabilities of £1.7 billion, and therefore does not impact the realistic inherited estate.
- The risk capital margin (RCM) is 2.7 times covered by the inherited estate and support arrangement (31 December 2010: 3.7 times).

### Investment mix

The aggregate investment mix of the assets in the three main with-profit funds at 31 December 2011 was:

	2011 %	2010 %
Equity	22%	26%
Property	17%	16%
Fixed interest	54%	57%
Other	7%	1%

The equity backing ratios, including property, supporting with-profit asset shares are 71% in NWPSF and OWPSF, and 74% in WPSF.

### Economic capital

We use a risk-based capital model to assess economic capital requirements and to aid in risk and capital management across the Group. The model is based on a framework for identifying the risks to which business units, and the Group as a whole, are exposed. Where appropriate, businesses also supplement these with additional risk models and stressed scenarios specific to their own risk profile. When aggregating capital requirements at business unit and group level, we allow for diversification benefits between risks and between businesses, with restrictions to allow for non-fungibility of capital where appropriate. This means that the aggregate capital requirement is less than the sum of capital required to cover all of the individual risks. The capital requirement reflects the cost of mitigating the risk of insolvency to a 99.5% confidence level over a one year time horizon (equivalent to events occurring in 1 out of 200 years) against financial and non-financial tests.

The financial modelling techniques employed in economic capital enhance our practice of risk and capital management. They enable understanding of the impact of the interaction of different risks, allowing us to direct risk management activities appropriately. These same techniques are employed to enhance product pricing and capital allocation processes. Unlike more traditional regulatory capital measures, economic capital also recognises the value of longer-term profits emerging from in-force and new business, allowing for consideration of longer-term value emergence as well as shorter-term net worth volatility in our risk and capital management processes. We continue to develop our economic capital modelling capability for all our businesses as part of our development programme to increase the focus on economic capital management and meeting the emerging requirements of the Solvency II framework and external agencies.

### Solvency II

The development of Solvency II continues in 2012 with a view to complete discussions about legislation. The key priority is concluding the discussions on the Omnibus II directive to provide clarity about the implementation date as well as the role of transitionals in the level 2. Once this is concluded we expect the European Commission to complete the development of the Level 2 implementing measures that will establish the technical requirements governing the practical application of Solvency II. Aviva continues to actively participate in these developments through the key European industry working groups and by engaging with the FSA and HM Treasury to inform the ongoing negotiations in Brussels.

### Rating agency

Credit ratings are an important indicator of financial strength and support access to debt markets as well as providing assurance to business partners and policyholders over our ability to service contractual obligations. In recognition of this we have solicited relationships with a number of rating agencies. The agencies generally assign ratings based on an assessment of a range of financial factors (e.g. capital strength, gearing, liquidity and fixed charge cover ratios) and non-financial factors (e.g. strategy, competitive position and quality of management).

Certain rating agencies have proprietary capital models which they use to assess available capital resources against capital requirements as a component in their overall criteria for assigning ratings. Managing our capital and liquidity position in accordance with our target rating levels is a core consideration in all material capital management and capital allocation decisions.

The Group's overall financial strength is reflected in our credit ratings. The Group's rating from Standard & Poor's is AA- ('very strong') with a Negative outlook; Aa3 ('excellent') with a Negative outlook from Moody's; and A ('excellent') from A M Best. The outlook on the group's rating from AM Best is 'Under review with Negative Implications'. These ratings continue to reflect our strong competitive position, positive strategic management, strong and diversified underlying earnings profile and strong liquidity position.

### Financial flexibility

The Group's borrowings are comprised primarily of long dated hybrid instruments with maturities spread over many years, minimising refinancing risk. In addition to central liquid asset holdings of £1.5 billion, the Group also has access to unutilised committed credit facilities of £2.1 billion provided by a range of leading international banks.

### Capital generation and utilisation

The active management of the generation and utilisation of capital is a primary Group focus, with the balancing of new business investment and shareholder distribution with operating capital generation a key financial priority.

The full-year 2011 result of £2.1 billion reinforces our confidence in the capital generation of the Group. Profits from existing life business remain strong, generating £2.3 billion of capital (2010: £2.1 billion), with a further £0.6 billion (2010: £0.6 billion) generated by the general insurance, fund management and non-insurance businesses. Capital invested in new business has reduced to £0.8 billion (2010: £1.0 billion). Investment in life new business was £0.9 billion, a reduction of £0.3 billion compared with full-year 2010. This is mainly a result of actions taken to manage the consumption of capital on writing new life products, in particular managing volumes, product mix and pricing. This reduction is partly offset by a smaller release of capital from non-life business investment of £0.1 billion (2010: £0.2 billion release).

	2011 £bn	2010 £bn
<b>Operating capital generation:</b>		
Life in-force profits <sup>1</sup>	2.3	2.1
General insurance, fund management and non-insurance profits	0.6	0.6
<b>Operating capital generation before investment in new business</b>	<b>2.9</b>	<b>2.7</b>
Capital invested in new business	(0.8)	(1.0)
<b>Operating capital generation after investment in new business</b>	<b>2.1</b>	<b>1.7</b>

<sup>1</sup> The life in-force profits in full year 2010 excludes the negative impact of the Delta Lloyd longevity assumption change of £0.2 billion which is included in the MCEV analysis of free surplus generated.

Operating capital generation comprises the following components:

- Operating free surplus emergence, including release of required capital, for the life in-force business (net of tax and non-controlling interests);
- Operating profits for the general insurance and non-life businesses (net of tax and non-controlling interests);
- Capital invested in new business. For life business this is the impact of initial and required capital on free surplus. For general insurance business this reflects the movement in required capital, which has been assumed to equal the regulatory minimum multiplied by the local management target level. Where appropriate movements in capital requirements exclude the impact of foreign exchange and other movements deemed to be non-operating in nature.
- Post disposal, all Delta Lloyd capital generation, including life business, has been included within general insurance, fund management and non-insurance profits on an IFRS basis.

As well as financing new business investment, the operating capital generated is used to finance corporate costs, service the Group's debt capital and to finance shareholder dividend distributions. After taking these items into account the net operating capital generated after financing is £1.0 billion.

	2011 £bn	2010 £bn
<b>Operating capital generation after investment in new business</b>	<b>2.1</b>	<b>1.7</b>
Interest, corporate and other costs	(0.6)	(0.6)

# Basis of preparation

## Basis of preparation

This review complies with the recommendations of the European Union (EU) Modernisation Directive, the Companies Act 2006 (Contents of Directors' Report: Business Review) and is in line with current best practice. It is addressed to, and written for, the members of Aviva plc with the aim of providing a fair review of our business development, performance and position at the current time. In producing this review, we aim to present a view that is balanced and comprehensive and that is consistent with the size and complexity of our business. The review is written in the context of the risks and uncertainties facing our business. We anticipate that the format and content of the review will evolve over time, along with developments in our business and the external environment.

## Key performance indicators

The Companies Act requires that a fair review of the business contains financial and, where applicable, non-financial key performance indicators (KPIs). We consider that our financial KPIs are those that communicate to the members the financial performance and strength of the Group as a whole.

These KPIs comprise:

- earnings per share (International Financial Reporting Standards basis);
- proposed ordinary dividend per share and dividend cover;
- adjusted operating profit before tax;
- worldwide sales;
- operating capital generation; and
- return on equity shareholders' funds.

Management also use a variety of other performance indicators (OPIs) in both running and assessing the performance of individual business segments and units, rather than the Group as a whole. OPIs include measures such as new business margin, combined operating ratio and underwriting profit.

In addition to reporting on our financial performance, it is important that as a forward-thinking company we are aware of our wider responsibilities and report on the non-financial aspects of our performance. We consider that our employees and customers are fundamental to the success of our business; as such, they form the basis for our non-financial measures, and include:

- employee engagement and leadership; and
- customer advocacy.

## Accounting basis of preparation

In addition to presenting our results and financial position on an International Financial Reporting Standards basis, we also use Market Consistent Embedded Value (MCEV) as an alternative performance measure. Details of the accounting basis of preparation are set out on the following page.

## Forward-looking statements

This business review contains 'forward-looking statements' about:

- our future plans;
- our current goals; and
- our expectations of our future financial condition, performance and results.

By their nature, all forward-looking statements involve risk and uncertainty because they relate to future events that are beyond our control. For example, certain insurance risk disclosures are dependent on our choices about assumptions and models, which by their nature are estimates. As such, actual future gains and losses could differ materially from those that we have estimated. Other factors that could cause actual results to differ materially from those estimated by the forward-looking statements include, but are not limited to:

- global economic business conditions;
- monetary and interest rate policies;
- foreign currency exchange rates;
- equity and property prices;
- the impact of competition, inflation and deflation;
- changes to regulations, taxes and legislation;
- the timing and impact of acquisitions and business combinations in relevant industries;
- natural and other disasters;
- changes to consumer saving and spending habits; and
- our success in managing the above factors.

Consequently, our actual future financial condition, performance and results of operation could differ materially from the plans, goals and expectations set out in our forward-looking statements. We undertake no obligation to update the forward-looking statements contained in this review or any other forward-looking statements we make.

# Accounting basis of preparation

## Accounting basis of preparation

### International Financial Reporting Standards (IFRS)

Our consolidated financial statements are prepared under IFRS, using standards issued by the International Accounting Standards Board (IASB) and endorsed by the EU. In addition to fulfilling this legal obligation, the Group has also complied with IFRS as issued by the IASB and applicable at 31 December 2011.

The financial data contained in the report and accounts has been prepared using the Group's accounting policies set out on pages 168 to 182. Where applicable, the financial statements have also been prepared in accordance with the Statement of Recommended Practice (SORP) on accounting for insurance business issued by the Association of British Insurers (ABI), the most recent version of which was issued in December 2005 and amended in December 2006.

### Market Consistent Embedded Value (MCEV) basis of reporting

We present the results and financial position of our life and related businesses on an MCEV basis, in addition to the IFRS basis. MCEV methodology represents an alternative basis of reporting the value of the Group's life and related businesses and the drivers of performance. This basis values cash flow from assets consistently with market prices and is consistent with the way pricing is assessed and the business is managed.

The MCEV methodology adopted is in accordance with the MCEV Principles published by the CFO Forum in October 2009. Under this methodology, the total profit recognised over the full lifetime of an insurance policy is the same as under the IFRS basis of reporting. However, the MCEV basis gives a market-consistent indication of the profitability of business on inception.

Additionally, shareholders' funds on an MCEV basis incorporate internally-generated additional value of in-force business (AVIF), which is excluded for IFRS reporting. These financial statements include supplementary information on MCEV reporting in the 'MCEV financial statements' section.

### Longer-term investment return

The long-term nature of most of our operations means that short-term realised and unrealised gains and losses are shown as an adjustment to operating profit. We focus instead on operating profit incorporating a longer-term investment return (LTIR). The rates of return that we use for equity and property in our LTIR methodology are aligned with the rates that we use under MCEV principles. For fixed interest securities, we include the amortisation of premiums or discounts arising on purchase, thereby producing an LTIR that is equivalent to the gross redemption yield.

### Critical accounting policies and estimates

The preparation of financial statements requires the Group to select accounting policies and make estimates and assumptions that affect items reported in the consolidated income statement, consolidated statement of financial position, other primary statements and notes to the financial statements. These are set out on pages 168 to 182.

### Critical accounting policies

The major areas of judgement on policy application are considered to be whether Group entities should be consolidated (set out in policy D), product classification (set out in policy F) and the classification of financial investments (set out in policy S). The loss of control of Delta Lloyd in May 2011, and its classification as a discontinued operation in the current and preceding years, is discussed in notes 2 and 3(b) to the financial statements.

### Use of estimates

All estimates are based on management's knowledge of current facts and circumstances, assumptions based on that knowledge and their predictions of future events and actions. Actual results can always differ from those estimates, possibly significantly. The table below sets out those items that we consider particularly susceptible to changes in estimates and assumptions, and the relevant accounting policy.

Item	Accounting policy
Insurance and participating investment contract liabilities	F & K
Goodwill, AVIF and other intangible assets	N
Fair values of financial investments	S
Impairment of financial investments	S
Fair value of derivative financial instruments	T
Deferred acquisition costs and other assets	W
Provisions and contingent liabilities	Z
Pension obligations	AA
Deferred income taxes	AB

### Future accounting developments

We continue to take an active role in the development of new accounting standards, via industry forums and working parties, and reviewing and providing comment on proposals from the IASB. Phase II of the IASB's project on insurance contracts continues to be the most significant area of development for us, and we continue actively to engage in the debate. We fully support the timely development of a global standard for insurance accounting that reflects the economics of our business, and are working directly and through the CFO Forum of leading European insurers to achieve this. While this standard is still under development, we will continue to focus on embedded value as the best measure of value for our long-term business. We continue to monitor other major IASB projects, including financial instruments, revenue recognition and leasing.

# Corporate responsibility

Our corporate responsibility (CR) strategy directs our worldwide business to focus on success in the long term. It is central to our overall business strategy, it helps our people to feel proud of the organisation they work for and our customers place trust in us to bring them prosperity and peace of mind. In this report we highlight how we are addressing the issues that are material for our business. These issues include responding to the need to improve trust and transparency in the financial services sector; attracting and retaining talent; developing communities; influencing the climate change agenda and promoting sustainable products and services.

The report that follows contains a summary of the progress and performance of our CR programme in 2011 aligned to these material issues. A more detailed review is available online at [www.aviva.com/corporate-responsibility/reports](http://www.aviva.com/corporate-responsibility/reports).

### Highlights from 2011 include:

- Increasing community investment by 9% to £12.4 million and helped 400,000 children to date through our Street to School campaign.
- Delivering our new Business Ethics Code to 89% of employees up from 32% in 2010.
- Expanded our carbon footprint boundaries to include waste and water emissions.
- Participated in the Lord Davies' review to highlight the importance of improving gender balance of Women on Boards.
- Increased employee engagement, 5.5% increase in volunteering hours and a 5% increase to 79% in employees who think our commitment to CR is genuine.

### Our strategy

Our CR strategy is an integral part of the way Aviva does business internally and externally. Our CR strategy has evolved this year to align everything we do to the issues that are most material to our business. We have set ourselves the challenge to develop a sustainability plan that actively leads our environmental, social and ethical agenda to secure the long-term success of Aviva.

We have worked together as a group to review our CR strategy, to create a framework and tools that embed sustainability principles and ways of working across the business. We are now implementing the revised strategy to embed sustainability throughout Aviva. We have worked to simplify our language and to clearly state how our approach to corporate responsibility aids the long-term success of Aviva. For example, one of our strategic areas is to support the business in the development of sustainable products and services. The risk if we fail to do this is that we lose a competitive edge in supplying products to the low-carbon economy.

Our mitigating actions support a sustainable business and in their nature they are interdependent. The climate change strategy calls for us to develop sustainable products which requires talented people to join; to encourage talented people to stay we need them to be engaged and our community programmes help this. These actions underpin the trust that our employees place in us, investors trust our governance and risk procedures and customers place their trust in us to deliver on our promises. By acting responsibly we ensure that Aviva is here for the long term to provide prosperity and peace of mind.

### Opportunities during 2012

In the development of our strategy, it is important that we recognise the issues that affect our sustainability and manage the associated risks. By working to turn these issues into opportunities for our business we help to shape the wider debate and action in our societies.

We have developed a robust CR programme over the past 11 years. Although we acknowledge that we have differing levels of CR maturity within our markets we are working to develop our capability globally. Our KPI section lists some areas where we are outperforming our targets and leading the CR agenda. In other areas we have a way to go to meet our ambitions. In all areas we are committed to continuous improvement.

Whilst still within the upper quartile for financial services, the number of women in senior management has fallen by 2% over the past two years. Having implemented a 'balanced leadership' programme in 2010, we recognise that we need to continue progressing our talent pipeline to reverse this trend. After long-term year on year reductions of carbon dioxide we are now facing tougher challenges to reduce carbon. We are looking to innovative solutions to address this. We will continue to build trust and pride in our organisation by our employees with a strong community programme, valued development opportunities and transparent communications. We believe a key part of a long-term, successful business is to have sustainable products. We have committed to develop more sustainable products and services going forward.

### Governance

Aviva is proud to have a well-established governance structure providing strong leadership and direction. Our Corporate Responsibility Committee was chaired by non-executive director Carole Piwnica in 2011, and comprises our chairman, group CEO and two other non-executive directors, Scott Wheway and Eileen Goh. Carole Piwnica retired at the end of 2011, Gay Huey Evans takes over the chairmanship of the Committee going forward.

The Committee reviews strategy and policy and receives regional and functional reports four times a year. In 2011, it received a report from all regional offices and paid close attention to the restructuring of the work that the Internal Audit team cover to support embedding corporate responsibility throughout the organisation. The Committee also received reports from the IT, procurement, sustainable and responsible investment (SRI) and customer teams. As standing items it had business ethics and the Street to School programme to discuss. The Corporate Responsibility Committee's report can be found on page 113.

Our CR leadership team supports and advises on the management and implementation of the global CR programme. The members comprise group CR specialists, regional CR leads and HR directors who work together to adopt and refine CR strategies, assess progress, identify actions that need to be taken and embed our programmes in different parts of the business. In addition, the Aviva Board receives both annual and ad hoc updates on CR strategy, activities and progress. Our CR programme is regularly on the agenda at executive management committees. The group and regional CEOs have CR key performance indicators included in their role profiles. 10% of all senior managers' bonuses are targeted on leadership and engagement Employee Promise Survey scores.

### Stakeholder communications

By being open and transparent about what we do and how we run our business we believe we have a high degree of integrity and therefore continue to build trust in Aviva for all of our stakeholders.

Key to this is the way that we report our CR commitments and performance. We prepare standalone detailed annual reports for the Carbon Disclosure Project, UN Global Compact, ClimateWise and Principles for Responsible Investment. As well as providing a narrative CR report we prepare an Accounting for Sustainability statement using the Connected Reporting Framework to demonstrate the costs associated with our energy, natural resource use and waste management. We also use this

statement to demonstrate the financial impacts of our community investment and customer advocacy commitments. The Accounting for Sustainability statement is provided on page 82.

We are also committed to providing full disclosure to investors on our CR programme and as such respond to EIRIS, SAM, Sustainalytics and Vigeo for inclusion in the FTSE4Good, Dow Jones Sustainability Indices, Ethibel and ECPI indices. This year we have been ranked as one of the top companies in the FTSE4Good ESG ratings. We hold a similarly high position in the STOXX ESG Global Leaders. A full list of our Index rankings can be found on page 79.

In terms of leadership participation, Robin Spencer, Aviva's chief risk officer, became the chair of the Chief Risk Officers' Forum at the beginning of 2012. Their main focus is Solvency II, however, there is also work being done on raising awareness of environmental, ethical and reputational risks around our industry's response to controversial areas such as oil sands and banned weapons. Marie Sigsworth, Group CR director, has been on the management committee of Accounting for Sustainability since 2009 and John Ainley, Group HR Director is a member of the CBI Climate Change Board.

We believe in the promotion of transparent and integrated reporting, as we think that companies who report on environmental, social and governance issues alongside their financial statement have a greater understanding of those risks affecting the business. Aviva Investors, through its Sustainable Stock Exchange initiative, has called for companies to present a forward-looking sustainability report integrated throughout the Annual Report and Accounts. Steve Waygood, chief responsible investment officer at Aviva Investors, is a member of the International Integrated Reporting Committee working group progressing the development of integrated reports. At the upcoming Earth Summit in Rio 2012, Aviva is calling for an international policy framework on sustainability reporting to progress this issue further.

Open dialogue with our stakeholders helps us to define priorities and shape our approach. We have continued to engage closely with governments this year, sharing our insight as both the owner and investor of capital, giving a useful double perspective to aid their public policy development. Specifically we have responded to:

- UK Department for Environment, Food and Rural Affairs 'Mandatory carbon reporting'.
- UK Department for Business Innovation and Skills – 'A long-term focus for corporate Britain'
- UK Department for Business Innovation and Skills – Executive remuneration paper.
- Financial Reporting Council – Effective Company Stewardship – Enhancing Corporate Reporting and Audit.
- Response to Lord Davies' review on 'Women on Boards'.

In addition to these consultations we have engaged with MPs on the Street to School programme with our UK partner Railway Children to raise awareness of children at risk on our streets in the UK.

The IPSOS Mori MPs study carried out independently each year suggests Aviva scores favourably against its peers when MPs are asked whether they considered that the company acts with integrity and takes its social responsibilities seriously.

## Trust and transparency

Building and maintaining trust in Aviva by our customers, our business partners, suppliers, shareholders and employees is of prime importance within a sector that sees some of the lowest levels of trust in society.

We are committed to building trust with our customers, providing excellent levels of service and communication. We have developed a set of internal principles to inspire employees to bring recognition to life when interacting with customers. Our customers can choose to buy our products through intermediaries, our corporate partners or from Aviva direct. All employees are required to sign our business ethics code annually. Each instance of financial crime is recorded and investigated independently and controls are put in place to protect our customers' data.

By regularly researching the opinions and behaviours of our customers, through our Consumer Attitudes to Savings research for example, we are able to deliver products and services that are designed to provide prosperity and peace of mind to our customers.

### Business ethics

We aspire to the highest standards of conduct and set out our principles in our business ethics code. This stipulates fairness, honesty and transparency in all we do. Employees in all countries in which we operate are required to uphold the laws of the host country and to conduct themselves according to the business ethics code. Everyone at Aviva has a part to play in upholding our standards and we raise awareness of these responsibilities through our induction programmes. Sign-off of acceptance of the code is required by all staff. Our code has been revised during 2011 to incorporate the requirements of the UK Bribery Act 2010 and the US Foreign Corrupt Practices Act. This code has been rolled out to employees who are required to read and sign the code each year. Through a revision of the sign-up process we have achieved a 89% acceptance of the code this year (2010: 32%). We aim for a sign-off of 100% of employees even though we recognise this might not be feasible each year due to sickness and maternity leave for example.

In addition to our business ethics code, Aviva has a code of ethics for senior management as required by section 406 of the Sarbanes-Oxley Act 2002 and the rules issued by the Securities and Exchange Commission. This code can be found on Aviva's website: [www.aviva.com/investor-relations/corporate-governance/code-of-ethics](http://www.aviva.com/investor-relations/corporate-governance/code-of-ethics).

### Financial crime

Our financial crime standard reinforces our zero-tolerance approach and ensures that risks relating to fraud, money laundering, market abuse and bribery and corruption are adequately managed. This year we have updated our anti-bribery procedures to incorporate the requirements of the UK Bribery Act. An enhanced training module accompanied the roll-out of the new procedures to all staff. Going forward, this training requirement has been devolved to regional management, to provide at a local level. We are continuing to improve our identification and recording of financial crime on a consistent basis, across the group.

We encourage our employees to raise any concerns they might have through 'Right Call' – an Aviva-wide malpractice reporting service. This enables all employees to report any suspicions or concerns in a confidential manner for independent investigation. During 2011, 69 incidents were recorded across the group. All cases were referred for independent investigation with 54 reaching conclusion and 15 cases currently remaining under investigation.

### Understanding our customers

We continued to work to understand perceptions and needs in our markets and once again conducted our wide-ranging survey on Consumer Attitudes to Saving, using the results to inform ongoing product and service developments across the group.

The Net Promoter Score<sup>®1</sup> (NPS) is our leading, group-wide measure of customer advocacy, comprising a globally consistent relationship and benchmarking survey which is conducted annually. The focus for the business is to ensure we are acting on the feedback from our customers as well as including NPS performance targets as part of our executive directors' annual remuneration.

We listen carefully to what our customers tell us, and we respond quickly and effectively to meet their needs. We provide clear communication on every one of our products and services, including the risks and benefits to customers. Over the last eight years in our annual consumer survey, we have asked more than 200,000 people across 25 countries what they think about risk, savings, retirement, financial advice and other important issues. The latest results show that consumers remain cautious about the general economic situation and are nervous about taking high levels of risk. We found that:

- 68% of people globally are worried about risk;
- 30% of people in the UK and 27% in Ireland have already dipped into their savings to make ends meet;
- 45% of people think that the general economic situation in the country will get worse in the next 12 months; and
- people are becoming more interested in protecting what they already have.

### Pensions gap

Growing pressure on Europe's pensions systems caused by ageing populations is a widely acknowledged problem, with the ratio of retirees to workers only set to increase.

In September 2010 Aviva calculated Europe's pension gap – the difference between the amount that people retiring from 2011 to 2051 will need to maintain an adequate standard of living and what they will receive from public and private pensions – at €1.9 trillion. As this gap cannot be reduced with a single solution, the report makes a series of recommendations designed to change attitudes to saving and encourage more people to better understand the financial choices they need to make to prepare for retirement.

In 2011 new research in Aviva's 'Mind the Gap' series showed that although it is possible to make a significant positive impact to retirement income by saving more and saving earlier, consumers across the region are ignoring the warning signs about the gap between retirement expectations and levels of saving, leaving them financially under-prepared for retirement. For example, only 23% of Europe's 18–34 year olds take an interest in information on personal finance.

This group should be encouraged more to increase their interest in saving and their understanding of the choices they need to make to plan for their retirement. Access to information such as annual pension statements designed in a clear, simple and engaging way – is clearly one of the actions required. As such, a new report published in November, *Towards annual pension statements across the EU* called on the European Commission to support action to raise people's awareness of how much they stand to receive in retirement.

The European Commission has subsequently signalled its intent to build a more secure platform for individuals to plan for their retirement through its White Paper *An Agenda for Adequate, Safe and Sustainable Pensions* which champions recommendations made by Aviva, such as annual pension statements and measures to increase consumer confidence in retirement savings products.

Our chief executive, Andrew Moss, gave the Henley Lecture in 2011 and spoke about the need to create greater understanding of the insurance industry, including saving for retirement. Andrew also chaired our Future Prosperity Panel, a team of nine leading thinkers who gathered to consider the challenges and solutions for savings in people's future prosperity. The outcomes are published in our Future Prosperity report in collaboration with the Economist Intelligence Unit. Please see [www.aviva.com/research-and-discussion/future-prosperity-panel](http://www.aviva.com/research-and-discussion/future-prosperity-panel).

### Referral fees and reform of the personal injury system

We have been calling for a complete ban on referral fees and a reform of the personal injury system for the last six years in the UK. Our own policy is that we do not sell customer data and we are very pleased that referral fees will be banned. We are now focusing on helping to get a fairer deal for our customers by calling for a deduction in personal accident legal fees and costs.

### Aviva Europe restructure

In October 2011 we announced a proposal to combine Aviva Ireland with Aviva UK to form a new UK and Ireland Region. We also announced that the European regional operations would be restructured to strengthen the business and create a leaner cost base.

It is expected to take up to two years for the full implementation of these changes which started in March 2012. We are engaging with our employees on the impact of the proposals and we remain committed to a full and open consultation process with them and their representatives. We hope to achieve any proposed job reductions through voluntary means where possible and will support employees through this transformation.

### Fair pay

Since 2005 Aviva has been a London Living Wage employer. During the year we have communicated with Fairpensions, the Living Wage organisation, to discuss our involvement in the wider UK national living wage. Consultation with our employee forum and UK executive committee has led to a change to our minimum pay grades which align with the UK living wage for our direct employees. This change will be effective from April 2012.

### Attracting and retaining talent

As a global financial services organisation we recognise our role in finding and building new skills for the workforce, developing a workplace that employees want to join and where they want to develop their career.

Delivering on our strategic plans and commitments requires strong leadership and the energy, dedication and belief of all our employees. Over the past three years we have built a strong global HR function to lead our cultural transformation. We have a clear purpose – to bring to life our employee promise to deliver exceptional business performance:

- We believe everyone in Aviva has talent and that performance matters.
- We work as a team, we are One Aviva, and we aim to do things once, globally.
- Our CR agenda drives sustainability that delivers prosperity and peace of mind.
- We take personal responsibility.

In 2011, we have advanced our people agenda by maintaining one global approach to talent management, performance management, leadership, and the deployment of Workday, our first common global online HR system is on track. We achieved a strong and improved global participation rate of 85% in our

annual employee engagement survey (2010: 80%). Employee engagement globally has improved by 5% to 68%. Improvements are particularly strong on satisfaction at 69% (2010: 62%) and commitment at 58% (2010: 51%).

Moving forward, our strategy is to help Aviva achieve its strategic priorities and vision by:

- Building the capability of our regions and functions to achieve their chosen strategies.
- Developing a culture of performance, where we play to win, take personal responsibility and recognise our people as individuals.
- Helping Aviva develop and be a sustainable business.
- Making it easier to work at Aviva by simplifying and focusing on key global HR tools and processes.

### Simplifying HR

In line with our One Aviva strategy, we have taken significant steps forward in the last year toward alignment, consistency and simplicity of our people processes and tools.

We have continued to roll-out a global HR information system that, for the first time, will put all our people and organisational data into one place. This will make it easier to operate as One Aviva and will allow us to manage the consistency and security of our employees' personal information. It will also put more control into the hands of managers and employees to manage their own personal information. It enables a new level of self-service access for basic people-related requests and processes.

Since our talent process was launched in 2007, we have fully globalised the approach. Every employee is covered by the annual talent process. In 2011, we applied our experience and expertise to further simplify the tools and definitions. It remains one of our greatest success stories in this area. It was one of the first people processes (along with the Employee Promise Survey) for which we truly achieved global consistency. It remains the cornerstone of Aviva's belief in honest conversations and development planning for staff.

In 2011, we announced a new global approach to job levels. Once fully implemented, this will align all roles across Aviva into a common system. We expect this to aid and facilitate global mobility – as well as to create opportunities in future to simplify other, related elements of reward.

### Developing leadership capability

In 2010 we introduced a globally consistent definition of leadership called 'Living Leadership'. During 2011 we have focused on moving this from concept to reality by listening to our employees in 'fishbowl' settings at our summits, embedding it in how we deliver our business strategy and how we lead practically in our work every day.

We want everyone in Aviva to be a leader, regardless of their position. This year, we have aligned leadership development to a globally consistent definition of 'Living Leadership, the act of making a difference' and developed a new leadership capability framework. We have continued to build alignment to a global organisation through our improved on-boarding experience for senior leaders.

In support of our goal of embedding risk management more strongly in Aviva's culture, our top 350 leaders attended the 'Better Business Decisions' programme in 2011. It was designed to create a common understanding of the vital role that every employee – regardless of role or function – must play in understanding and managing risk.

In Asia Pacific we wrapped leadership development around the strategy work we are doing, an approach that will become global during 2012. Our Frontline Manager Programme has been revised to meet the needs of our global audience and ensures a

consistent experience for those transitioning roles to lead people for the first time.

Leadership development needs to be continually refreshed to ensure leaders are equipped to deal with the emerging trends and business needs. We have done this for 2012 by including assessment and development at points of leadership transition and coaching to meet emerging business challenges.

### Our employee promise

Our employee promise is central to our HR strategy. 'I am recognised for who I am and my contribution matters'. We deliver on our promise by listening, respecting people, recognising and rewarding good work, and by providing continuous development for our employees.

We want to employ great people and encourage them to stay with us. We match the right people to the right roles and encourage their best performance. We are developing a strong, gender-balanced leadership and talent management programmes. Our efforts are reflected in continuous improvement in employee feedback since 2008, despite the climate of uncertainty and economic challenge.

For the second year, we continued our global brand campaign under the banner of: 'You Are the Big Picture'. A key aspect of this effort was to engage and recognise the great work of our employees, which is why we put employee engagement and recognition at its heart. We included more stories recognising our employees and celebrating the small human touches that can make a real difference to our customers. Please see our website [www.aviva.com/about-us/our-brand/you-are-the-big-picture](http://www.aviva.com/about-us/our-brand/you-are-the-big-picture).

### Our employee survey

Each year we ask our employees how we are delivering against our employee promise. Headlines from our 2011 survey include:

- strong improvements across the board and particularly on our success in communicating a vision of the future that motivates staff, up 12% from 2010;
- up 10% on employee recognition to 71%;
- employee engagement in all aspects of our CR agenda has shown increases for the two last years, a 14% uplift since 2009; and
- out of 58 questions of the core survey only two declined from the past year 2010 – by 1% point each.

Our employee survey drives local and global change. The results are used by directors and managers to identify areas for improvement across Aviva. Managers of five or more people receive local survey results to use with their teams.

### Employee wellbeing

Providing a safe and healthy environment for employees, contractors, customers and visitors remains a priority across the group. We have well-established policies and systems in place to ensure wellbeing and minimise risks.

Our new group Health and Safety Standard, introduced at the beginning of 2012, sets out our global approach to health and safety. Each business has an occupational health and safety management system that is designed to suit local operating conditions. These requirements apply to every business and cover a wide range of topics, from risk assessments and emergency and incident management, to driving on company business and stress management.

In addition, many of our businesses have implemented their own initiatives to promote safety, health and wellbeing among their staff, including employee assistance programmes on finance and health issues, fitness centres, subsidised travel and free 'bike checks' for commuters. Flexible benefits packages also give

employees an array of options to suit individual needs, including discounted dental and healthcare.

### Diversity, equality and human rights

Being respectful of each other's differing backgrounds, cultures, needs and views is key to our delivery of the employee promise. Our Diversity and Inclusion practices remain aligned with the United Nations Universal Declaration of Human Rights and the International Labour Organisation's core labour standards. In addition, our new global risk standard for corporate responsibility includes a set of minimum requirements for all Aviva businesses with regard to diversity, equality and human rights. This reinforces our commitment to fairness and consistency across all our businesses and ensures we are measuring our effectiveness on an annual basis.

In 2010, our Employee Promise survey results showed that our commitment to valuing diversity in our organisation could be improved. We made some notable improvements in 2011:

- 76% of employees believe we have a climate in which diverse perspectives are valued (2010: 66%).
- 83% of employees believe that Aviva provides an environment free from bullying and hostilities (2010: 77%).
- 78% indicated that Aviva has an environment where people from diverse backgrounds can succeed (2010: 73%).

We are taking special interest in the gender balance of the organisation in order to create a more gender-balanced leadership. Our total female population is 50.4%, whereas the number of senior women in the workplace is 20%. We currently have three female non executive directors, making up 21% of our board with a target of maintaining a minimum of 25% by 2015 as a commitment to the Lord Davies review.

We have followed through with many of the commitments we made last year, including:

- Developing a more diverse talent pipeline and measuring our gender mix.
- Establishing a mentoring programme to help develop executive directors' awareness of diversity issues.
- Raising awareness of gender diversity through articles on our intranet and external sponsorships.

Our employee network groups continue to make an impact to the organisation and in the community. In 2011 we held a Women's Network event for International Women's Day to discuss equality in the workplace, the Aviva UK Pride network had a visible presence at local pride celebrations and the US business ran a Diversity & Inclusion Week.

We are recognised in the Stonewall 100, a ranking of gay-friendly employers in the UK.

### Developing communities

We believe a sustainable business is one which plays an active role in society. As well as providing employment to 36,600 people, we provide prosperity and peace of mind to our 43 million customers. To deepen our impact on society we invest the talent of our people as well as financial resources in a range of community programmes. Our approach is based on building partnerships across three main areas strategic to our business: education, life trauma and financial literacy. We are actively contributing to the Millennium Development Goals and we demonstrate our commitment to being at the leading edge of addressing environmental, social and governance issues through our UN Global Compact LEAD membership.

Globally, we contributed over £12.4 million to develop communities in 2011, a 9% increase on 2010 (2010: £11.4million) and we have improved our measurement approach to record our inputs and outputs more accurately in order to demonstrate the benefit of this investment for our employees, our communities and our brand.

Engaging our employees is vital. Employees are allocated three days volunteering leave and over the past year we have seen an increase in volunteering to 60,392 hours. Some 91% of the volunteers surveyed reported positive development and morale benefits. Overall we have seen a 10% uplift in employees who think we do a good job of contributing to our communities and a 5% increase in employees who believe Aviva's commitment to CR is genuine. Employee giving to charity has also increased with 30% of workforce involved (2010: 29%).

Aviva has a clear track record of working with field experts in community development across the third and public sector. We recognise the importance of our partnerships with organisations such as UK Athletics, Save the Children, Consortium for Street Children and Oxfam to enable us to develop and share best practice programmes and to work effectively in areas of community advocacy. This partnership work helped us to develop our Child Safeguarding guidelines as an aid to employees working or volunteering with children on Aviva's behalf.

We recognise the mutual benefit of our community development activity; our employees feel engaged and proud, our communities benefit and our brand reputation is enhanced.

### Street to School

Our flagship global community development programme Street to School, a five-year commitment to help 500,000 children fulfil their potential, shows our approach in action.

2011 saw a significant increase in the volume and profile of our partnership work to help children off the streets and into education. In collaboration with leading charities and experts, and supported by our employees, partners and customers we have helped 274,245 children this year through preventative education, outreach, healthcare, safe housing and education projects. To date we have helped a total of 400,000 children, 23 Street to School partnerships and programmes are up and running in our markets and we use Street to School to improve advocacy of street children. Here are just a few examples of what we have achieved:

- We have helped more than 180,000 children in India through partnerships including CRY (Child Rights and You) and Save the Children in 2011. Aviva also partnered with The Times of India and Vodafone to highlight the issues street children face and how a simple book can make a difference. Now in its third year, the call to action went nationwide through the use of television and social media attracting over one million books and 104,000 followers on Facebook.
- We are working with SHÇEK, Turkey's Social Services and Child Protection agency, to help children in Istanbul. In 2011, SHÇEK awarded Aviva a silver medal in its annual awards for our support to street children. Aviva Turkey colleagues continue to support the charity donating cash, clothes, books and homemade goods.
- In 2011, more than 14% of our UK employees were actively involved in Street to School through volunteering, fundraising or donating. We reached over 4.6 million customers with Street to School messaging and donated over £69,000 to Railway Children through '£ per policy' customer incentives.

- We sponsored pioneering research into 'The State of the World's Street Children' and the first International Day of the Street Child; raising awareness of the plight of street children across the world.

### Community projects

We commit at least 50% of our community development budget to Street to School. Our approach to benefiting our people, community and brand is also found in the following examples:

- Our ongoing partnership with Oxfam 365 helps to equip Oxfam with the resources and materials to respond to emergencies as soon as they happen, such as those in East Africa and the Philippines.
- 'Paying for It', launched by Aviva in 2007, continued to take economic citizenship teaching into schools throughout the UK using trained Aviva volunteers and now with 3,500 teachers using our resources.
- Our grassroots athletics and rugby programmes reach out to tens of thousands of children every year to help them develop a healthy and active lifestyle.
- In Canada, the Aviva Community Fund gives members of the public the opportunity to turn great ideas into action to benefit their local communities. This innovative use of social media encouraged two million members of the community to vote on their preferred project.

We are clear that our major programmes should align to our strategy but we also understand that our employees have issues close to their own heart that they would like to see their company support. We encourage employees to take up their volunteering allowance and offer matched funding to support this. One employee found that being involved in a school volunteering programme was a key highlight of the year. Not only did it feel personally satisfying to be involved, it benefited the school children enormously. Typically a one-day taster of volunteering has led to an appetite for further volunteering throughout 2012.

### Climate change and environment

Protecting the environment to mitigate against man-made climate change are key priorities for Aviva that we believe requires action today, not tomorrow. Our strategy to deliver action focuses firstly on control of our own environmental impacts to reduce greenhouse gas emissions from energy, waste and travel. We continue to compensate for our operational emissions worldwide by purchasing carbon credits from the voluntary carbon market. We apply our understanding to work within our sphere of influence externally to encourage sustainable practices with our customers, suppliers, governments and the companies in which we invest.

Our focused attention in driving down energy use while at the same time increasing our carbon boundaries has resulted in a relative carbon reduction of 3% (2010: 4%). In 2009 we announced our long-term target of a reduction of 30% carbon dioxide (CO<sub>2</sub>) emissions by 2020 from our baseline of 2006. By 2010 we had achieved a 10% reduction from 2006. Due to the sale of the RAC, a significant contributor to our carbon footprint, it has been necessary to restate our baseline year to 2010. Our long-term carbon reduction ambition has not changed but due to the baseline year change the target is now an absolute reduction of 20% from 2010 to 2020. Our relative annual target reduction is set at 5% to help us achieve the longer-term target.

We also set global annual targets in other key areas, summarised below:

2011 targets	Performance
Reduce relative CO <sub>2</sub> emissions by 5%*	(3)%
Reduce water use by 4%	(26)%
Reduce waste by 4%	(25)%
Increase percentage of recycled waste by 2% (until 80% recycled rate is achieved)	73%

\* We also offset 105% of our remaining emissions by investing in sustainable projects such as renewable energy generation and small-scale run-of-river hydro electricity systems.  
CO<sub>2</sub> performance data is calculated on a like-for-like basis taking into account new acquisitions and divestments in 2011.

As a major international real estate manager, we are working with our partners and advisers to show leadership in sustainability across the real estate industry. Our Sustainability Charter guides our efforts to improve the sustainability performance of our managed portfolio and new construction projects. Through the Sustainability Forum convened to implement the charter, we have increased our focus on energy, water and waste management, transport, occupier engagement and staff training.

In February 2011 we launched the first commercial insurance product endorsements to support the drive to a low-carbon economy. These products will cover wind turbines and solar power manufacturers, biomass and waste to energy production.

### The role of insurers in climate change

The insurance industry has a fundamental part to play in society's responses to climate change. As a major insurer Aviva has first-hand understanding of the impact of extreme weather events on our customers. On their behalf, we are committed to help mitigate the threat of climate change and support everyone in society to adapt to changes caused by man-made emissions already in the atmosphere. Our industry can also draw on its knowledge of historical weather data to identify patterns of change, applying our understanding of risk to map future temperature scenarios and determine likely impacts. Our Accounting for Sustainability statement on page 82 explains our progress against these areas.

We believe that climate change must be tackled now. As extreme weather events become more frequent and more severe, they become more challenging to insure. It is in everyone's interest that insurance remains affordable and available so that people affected by severe weather events can recover quickly from unavoidable impacts. Aviva is currently working with the ABI and the Government to address the issues around the ending of the flooding Statement of Principles in 2013. However, this has to be part of a bigger conversation in which everyone understands their responsibility in flood risk management. This includes insurers ensuring that premiums accurately and fairly reflect the risk, local authorities and Government continuing to invest in defences and indeed the homeowner – who can consider what measures they can take to reduce the damage if the worst does happen.

### Leadership and participation

We have joined forces with other leading organisations to provide a collective industry voice and specialist sector-specific influence to support the climate change agenda:

- The 2<sup>o</sup> Challenge Communiqué – a call from businesses around the world for governments to speed up international climate change negotiations and take action at a national level.
- Open letters from UKSIF on the green investment bank.
- 2011 Global Investor Statement on Climate Change – a joint statement by 285 leading investors on the need for policy to stimulate private sector investment in climate change solutions, job creation and long-term sustainability of the global economy.

- Business in the Community (BITC) International Campaign – we are a member of the environment workstream that aims to support businesses to take action on climate change and other environmental issues on a global scale.

Since 2006, when we were a founder member of the ClimateWise Principles, we have been a part of the management committee and continue to report each year against these industry-wide principles. We are also very active in the ClimateWise collaborations on research into health and climate change, sustainable claims management and integrating climate change considerations into fixed income investments.

We have also played our part in the creation of the UN Principles for Sustainable Insurance which are due to be launched at the Rio+20 Summit in June 2012. The principles require insurers to understand, address, integrate, further develop and disclose material environmental, social and governance issues that impact the company and our customers.

Following our call at the London launch of the Carbon Disclosure Project in 2010 to do more than simply disclose carbon data we have jointly developed and invested in Carbon Action. This will encourage companies to demonstrate their mitigation activities with an initial focus on carbon intensive sectors.

We firmly believe that engaging our employees to raise awareness and address environmental impacts is an essential part of delivering our environmental strategy. 76% (2010: 71%) of our employees agree that we make business choices that support the environment which include measures such as our recycling initiatives, providing alternatives to business travel and energy reduction techniques. We ran a number of initiatives around the Group in 2011 to further engage employees, including ClimateWeek, WWF Earth hour and the 10:10 campaign in Europe.

### Sustainable supply chain

We consider our supply chain to be part of our sphere of influence not only to address the carbon intensity of our supply chain but to encourage our suppliers to be more responsible and sustainable. Aviva is a large procurer, with a £4.4 billion spend and 32,000 suppliers. We have also begun to introduce legally binding clauses covering corporate responsibility within procurement contracts. During 2011 we have developed a 'Code of behaviour' for suppliers outlining a mutual moral commitment on which to conduct the supplier relationship.

We have also moved from the supplier CR maturity assessment into a Supplier Profile Questionnaire which enables deeper and more meaningful information related to CR for both sourcing activity and ongoing post-contract supply management activities.

A good example of our approach to sustainable supply chain management can be seen through a project we have with Rentokil Initial to improve waste management. Our joint effort has won Aviva the prestigious Chairman's Cup in the City of London Clean City Awards for the second time.

### Sustainable products and services

Well-designed, well-delivered and socially inclusive products and services underpin our promise to provide prosperity and peace of mind to our 43 million customers, many of whom have long-term relationships with us.

More than just a 'product', insurance has a tangible value for society and individuals. It's a sharing of risk at a local and global level that helps people to live their lives, businesses to do business and modern society to function.

Just as important, our products can encourage behaviour change and contribute to more sustainable economies as well as providing access to financial stability and protection. For many families in emerging economies, Aviva products will be the first time they have accessed insurance.

Over recent years, the political drive to reduce carbon emissions, along with high oil and gas prices and fears about energy security, have combined to boost the global renewable energy sector. Climate change poses serious risks, but it has also opened up massive opportunities for new technology. The renewable energy sector is forecast to increase in value by up to £45 billion by 2015.

We want to be part of the solution, providing the financial service products that are needed to support a more sustainable, stable world economy. In March 2011, the Carbon Connect report '*Energy Efficiency: The Untapped Business Opportunity*' called on insurers to develop solutions for renewable energy projects. We are developing new products and investments that support the low-carbon economy and the renewable energy sector.

We are providing insurance for home renewable technologies in Canada as well as offering customers the chance to replace household items with more environmentally friendly goods when needed. In terms of commercial insurance, we offer a range of covers to suit policyholders ranging from small companies using a single solar panel to national onshore wind farms. Our public liability cover now also includes failure to supply power and professional indemnity cover for environmental consultants.

We also want to encourage our customers to adopt more sustainable behaviours. To this extent we:

- give customers the ability to manage their policies online;
- provide insurance products and loans that benefit low-carbon vehicles, people who drive less and people who use sustainable transport; and
- provide life assurance products which encourage healthier lifestyles.

### Sustainable stock markets

Aviva Investors is a leader in the field of responsible investment and from 2012 onwards will start to include environmental, social and governance considerations (ESG) in all mainstream investment decisions. Aviva is a founding member of the Principles for Responsible Investment (PRI) and is also represented on the PRI Advisory Council. These principles inform our approach to all our investments. Part of our approach is to encourage good governance and responsible practice is to engage with companies on ESG issues and vote on their strategies at annual general meetings.

The most significant project on voting and engagement issues is our involvement in the Sustainable Stock Exchanges initiative. This is focused on enabling all investors to vote directly on the sustainability disclosure of listed companies, rather than using a surrogate such as the annual report and accounts. In 2008 Aviva Investors CEO Alain Dromer called on all the listing authorities of the global stock markets to consider whether their corporate governance codes should be updated to include a provision promoting CR reporting. Specifically, we proposed that all stock market listing authorities establish a listing requirement that companies:

- consider how responsible and sustainable their business model is; and
- present a forward-looking sustainability strategy at their annual general meeting (AGM) for shareholder approval.

Overall, the main purpose of our proposed corporate responsibility reporting requirement, and the associated AGM vote, is to try to create the right kind of discussions within the boardrooms of listed companies around the world, and then between the company and its shareholders.

Since 2008, the Sustainable Stock Exchange initiative has continued to gather momentum. In 2011 we led a group of 24 institutional investors representing US\$1.6 trillion to call for sustainability disclosure from listed companies. We wrote to 30 of the world's largest stock exchanges to ask them to address inadequate sustainability reporting by companies. Developed using Bloomberg data, the letter also ranked individual listing authorities on a sustainability league table that assessed the current level of environmental, social and governance disclosure among listed companies. We believe this initiative has significant potential to make capital markets work better and be more sustainable. We held events at each of the UK political party conferences this year to discuss sustainable stock markets.

### External benchmarking and recognition

Our achievements in 2011 were recognised by our inclusion in some of the world's leading external benchmarks:

- Dow Jones Europe and World Sustainability Indexes;
- SAM Sustainability Yearbook;
- FTSE4GOOD Index Series;
- FTSE KLD Europe, Asia Pacific and Global Sustainability indexes (excluding the US Index);
- ECPI Ethical Index Euro and Ethical Index Global;
- Ethibel Excellence and Pioneer Indexes;
- Carbon Clear – ranked 3rd in FTSE100;
- Newsweek Green Companies – ranked 28th out of 100 companies;
- Gold status in Business in the Community's (BITC) Corporate Responsibility Index (2011); and
- Stonewall Workplace Equality Index – ranked 98 in the top 100 employers in the UK.

### Affiliations and engagements

We work closely with leading organisations to share good practice, identify emerging issues and improve our performance. Here are just a few of the organisations we collaborated with in 2011:

- CBI Climate Change Board;
- Carbon Disclosure Project;
- HRH Prince of Wales Accounting for Sustainability;
- ClimateWise;
- UNEP Finance Initiative;
- UN Global Compact LEAD and represented on UN Principles for Responsible Investment, UN Principles for Sustainable Insurance and Caring for Climate working groups;
- CRO Forum;
- Consortium for Street Children;
- UN Women Empowerment Principles;
- ORC Global Diversity Forum; and
- Institute of Business Ethics.

## Key indicators

CR indicator	2008	2009	2010	2011	2011 target
<b>Trust and transparency</b>					
<b>Business ethics</b>					
% of employees signing of receipt, understanding and acceptance of our Business Ethics Code on an annual basis	New KPI	90%	32%	<b>89%</b>	100% of employees
% of employees completing the Bribery and Corruption training	New KPI	79%	n/a	<b>89%</b>	100% of employees
<b>Customers</b>					
% of businesses that are in or above the upper quartile relative to the local market average (NPS score)	17%	50%	50%	<b>52%</b>	Maintain or improve past performance
% of employees who rate us favourably on customer index	New KPI	67%	69%	<b>73%</b>	Meet/exceed GFS benchmark (2011: 75%)
<b>Climate change and environment</b>					
% of remaining CO <sub>2</sub> emissions offset annually	100%	100%	100%	<b>100%</b>	Offset remaining CO <sub>2</sub> emissions at group level
CO <sub>2</sub> emissions (tonnes) – absolute	177,077	154,726	148,251	<b>165,115</b>	
CO <sub>2</sub> emissions (tonnes) – relative	n/a	n/a	153,013	<b>148,404</b>	Reduce relative CO <sub>2</sub> emissions by 5%
Water consumption (m <sup>3</sup> ) – absolute	843,750	751,750	690,369	<b>509,657</b>	Reduce water use by 4%
Waste generated (tonnes) – absolute	19,311	11,812*	12,042	<b>8,995</b>	Reduce waste generated by 4%
Proportion of recycled waste	84%	79%	75%	<b>73%</b>	80% or above
% of employees who feel that Aviva makes business choices that support the environment	New KPI	62%	71%	<b>76%</b>	Meet/exceed GFS benchmark (2011: 60%)
<b>Attracting and retaining talent</b>					
% of women in senior management	22%	22%	21%	<b>20%</b>	Increase percentage of women in senior management group
% of employees who feel that Aviva is committed to attracting, developing and keeping a diverse workforce	New KPI	52%	62%	<b>70%</b>	Meet/exceed GFS benchmark (2011: 70%)
% of employees who feel that they are treated with respect, regardless of their position	New KPI	67%	69%	<b>75%</b>	Improve past performance (no GFS benchmark)
% of employees who feel we have created an environment where people with diverse backgrounds can succeed	New KPI	New KPI	73%	<b>78%</b>	Meet/exceed GFS benchmark (2011: 77%)
% of employees who rate us favourably on leadership index*	New KPI	66%	64%	<b>70%</b>	Meet/exceed GFS benchmark (2011: 70%)
% of employees who rate us favourably on engagement index	New KPI	64%	63%	<b>68%</b>	Meet/exceed GFS benchmark (2011: 73%)
<b>Suppliers</b>					
% of 'managed supply' spend where supplier signed code of behaviour	New KPI	New KPI	New KPI	<b>31%</b>	
% of 'managed supply' spend where supplier has successfully completed the CR element of the supplier process	New KPI	New KPI	New KPI	<b>New KPI</b>	To be reported on from 2012
Number of business units that use the 'supplier hospitality register' and 'register of interests'	5	11	15	<b>19</b>	18
<b>Developing communities</b>					
Amount of community investment	£9.6m	£8.0m	£11.4m	<b>£12.4m</b>	Total community investment at/above previous year
% of employees participating in volunteering	New KPI	16%	17%	<b>20%</b>	Increase the % of employee participation in volunteering
Number of employee hours spent volunteering	67,700	79,900	57,250	<b>60,390</b>	Increase the % of employee participation in volunteering
% of investment in Aviva 'Street to School'	New KPI	New KPI	52%	<b>54%</b>	50% of cash donations
% of employees who feel that Aviva does a good job of contributing to the communities in which we live and work	New KPI	62%	66%	<b>76%</b>	Meet/exceed GFS benchmark (2011: 62%)

Met/exceeded 2011 target ✓ Missed 2011 target ✗

Change Met target over year	2012 target	Notes
57% ✗	100% of employees	Business ethics: While our target remains at 100% it is inevitable that not all employees will be able to sign the code each year due to maternity leave, sick leave etc. This year our percentage is below the requirement in Europe due to a delay in roll out of the revised code.
		The Bribery and Corruption training was halted in 2010 while the training package was revised to take into account the requirements of the UK Bribery Act 2010.
2% ✓	Maintain or improve past performance	Customers: Using NPS methodology we calculate the performance of businesses relative to their local market. Our 'Customer advocacy' section on page 85 outlines this further.
4% ✗	Meet/exceed GFS* benchmark	* GFS stands for the Global Financial Services benchmark. This is a tough external benchmark that we use as a stretch target. In the equivalent regional benchmarks we are consistently performing above the benchmark.
	Offset 100% remaining CO <sub>2</sub> emissions at group level	In a change from 2010 reporting we have removed Delta Lloyd data from our environmental footprint as it is now out of operational control.
11% ✗		Absolute CO <sub>2</sub> data – The increase in the absolute CO <sub>2</sub> emissions figure for 2011 is due to the following factors: updating the electricity conversion factors to the most recent ones available, increasing the scope of our data collection in India to all the office locations. We have also reported on the electricity consumption from the UK outsourced data centre for the first time since its sale in 2009, the CO <sub>2</sub> emission equivalent from waste to landfill and water, our businesses in Indonesia, and Aviva Investor businesses in Luxembourg and Singapore. RAC was sold at the end of Q3 2011 and therefore our data reflects its consumption for the first three quarters only.
(3)% ✗	Reduce relative CO <sub>2</sub> emissions by 5%	
(26)% ✓	Reduce water use by 4%	
(25)% ✓	Reduce waste generated by 4%	
(2)% ✗	80% or above	Relative CO <sub>2</sub> data – The relative comparison uses the 2011 basis for reporting (as above), adjusted for structural changes and businesses that did not report in 2010
		Baseline change – Our long-term carbon reduction target used a baseline year of 2006, the first year of reporting on the RAC, our target was an absolute 30% reduction to 2020. By the end of 2010 we had achieved a 10% reduction to the target. As RAC emissions accounted for 17% of our overall emissions, we have revised our baseline to 2010. As a result our new baseline is 151,531 tonnes of CO <sub>2</sub> .
5% ✓	Meet/exceed GFS benchmark	
(1)% ✗	Increase percentage of women in senior management group	People: While we have improved in most of these KPIs against our own performance, our targets are external benchmarks which we are working towards.
8% ✓	Meet/exceed GFS benchmark	*The data for this index has been restated to allow accurate comparisons across the following four questions: 1 Aviva group's leadership has communicated a vision of the future that motivates me. 2 I understand the goals of our Aviva vision. 3 The senior leadership team of my business unit provides a clear sense of direction. 4 I trust the senior leadership team in my part of the business.
6% ✓	Improve past performance (no GFS benchmark)	
5% ✓	Meet/exceed GFS benchmark	
6% ✓	Meet/exceed GFS benchmark	
5% ✗	Meet/exceed GFS benchmark	
n/a		Suppliers: We have increased the amount of suppliers signing the code of conduct, however, we have found that some suppliers are reluctant to sign a code as it is not a legal document. Therefore, we are implementing a code of behaviour alongside minimum contractual clauses for new contracts from Q2 2011, to address some of this issue.
n/a		This data does not include European claims data.
1 ✓		These KPIs have been revised in 2011 in light of our changing processes.
9% ✓	Total community investment at/above previous year	
3% ✓	Increase the % of employee participation in volunteering	
5% ✓	Increase the % of employee participation in volunteering	
2% ✓	50%	
10% ✓	Meet/exceed GFS benchmark	

## Accounting for Sustainability

We also report our performance using Accounting for Sustainability's connected reporting framework, which integrates financial and non-financial data to provide a comprehensive picture of our impacts. We were one of the first companies to help develop the framework and have used this approach for environmental reporting in our Annual Report and Accounts since 2007. We continue to explore ways to extend this framework and have included customer and community indicators since 2009.

### We have reported the following indicators for 2011:

- greenhouse gas emissions;
- waste;
- resource usage;
- customer advocacy; and
- developing communities.

## Greenhouse gas emissions

### Direct company impacts

#### Cash flow performance

The most material direct environmental impact that Aviva creates are greenhouse gas emissions. We emit greenhouse gases through our company operations generated from energy used in our buildings, fugitive emissions, air travel, car business miles and rail travel. For the first time this year associated emissions from our use of water and disposal of waste to landfill, and where collected, emissions from car rental for business journeys are included in our footprint. However, our operational emissions are smaller than those of our supply chain, the insurance claims fulfilment process and the emissions of the investment funds we manage. The scope of Aviva's emissions includes all operations where we have day-to-day control; including joint ventures and associates. In 2011, we have included new markets in our reporting boundary: Indonesia, AI Singapore and AI Luxembourg. Some 165,115 tonnes of carbon dioxide (tCO<sub>2</sub>) or equivalent were emitted by Aviva into the atmosphere in 2011.

Carbon offsets for the voluntary carbon market will be purchased in 2012 to cover our footprint plus an additional 5% extra to allow for any inconsistencies in reporting. The cost of offsetting will be funded by the areas of the business that have created the emissions on a 'polluter pays' basis.

Aviva's CO<sub>2</sub> emissions 000 tonnes

### Aviva plc – operational carbon footprint covering 100% of employees

GHG Emissions data from 1 Jan 2011 to 31 Dec 2011

Tonnes CO <sub>2</sub> e	2011	2010
Scope 1	44,471	63,784
Scope 2*	97,988	68,628
Scope 3	22,656	15,839
Gross CO <sub>2</sub> emissions*	165,115	148,251
Absolute CO <sub>2</sub> footprint*	165,115	127,685
Carbon offsetting	(173,371)	(133,049)
Total net emissions	(8,256)	(6,336)

\* Data according to the Defra guidelines i.e. UK electricity rated as grid average but renewable recognised in other countries. Gross and absolute emission in 2011 were the same. Going forward we will report on absolute emissions only

Scope 1 – operational emissions from owned sources e.g. gas, vehicle fleet as part of product/service.

Scope 2 – operational emission from non-owned sources e.g. electricity.

Scope 3 – business activity emissions from non-owned sources – e.g. business travel.

### Performance, strategy and targets

Aviva's relative emissions have reduced this year. This is a combination of improvements in energy efficiency and increased use of technology. Our renewable electricity on a worldwide basis is 7% of our total electricity consumption.

In September 2011 we sold the RAC business and the responsibility for the associated environmental impact moved away from Aviva. In respect of carbon emissions RAC accounted for 52,979 tonnes when we began reporting on it in 2006 and 25,491 tonnes in 2010, the last full year of reporting, a reduction of 52%.

Our long-term carbon reduction target used a baseline year of 2006, the first year of reporting on the RAC, our target was an absolute 30% reduction to 2020. By the end of 2010 we had achieved a 10% reduction to the target. As RAC emissions accounted for 17% of our overall emissions, we have revised our baseline to 2010. As a result our new baseline is 148,625 tonnes of carbon dioxide.

Communication technologies mentioned in last year's report have impacted travel, particularly in Europe where air kilometres have reduced by 7.6% in 2011. Correspondingly, the use of telepresence, webex and MS Office Communicator has increased; 2,579 meetings were held by telepresence in 2011 (2010: 1,151). We have estimated the cost of travel avoidance from the use of telepresence in 2011 as £1.9 million and 1,417 tonnes in carbon savings.

Concentrating on our core business, our strategy to outsource data centres is continuing. We outsourced our UK data centre in 2009 and our Canadian data centre at the end of 2010. 2012 will see the outsourcing of data centres in the US and in Europe. As this outsourcing occurs we will seek to continue to report on the energy consumption related to the processing and storage of Aviva's data. HP is our business partner in this process for the UK, Canada and the US.

With the maturity, and increasing validity of our environmental data collection, we face the challenge of making year-on-year reductions in carbon emissions. We have

extensively employed the use of no-cost and low-cost behaviour changes and technologies which have a return on investment (ROI) comparable to other core business investment decisions. In order to assist our business further in carbon reduction activities we have created a Sustainability Fund which will be seeded at a group level. Aviva businesses can apply for the funding to install energy saving technologies. These may have a longer ROI to support our long-term carbon reduction target, and combat the impact of rising energy costs and potentially bolster our energy security over the next decade. The financial savings made will pay off the 'loan' with the businesses keeping further savings. Energy saving will help to reduce the cost of purchasing carbon offsets. We will report on development in this area next year.

Our group annual carbon reduction target still stands at 5%. Our long-term target to 2020 has been rebaselined following the sale of the RAC business. This is now set at 20% reduction using a baseline year of 2010.

The UK businesses are financially impacted in 2012 by the cost of the Carbon Reduction Commitment Energy Efficiency Scheme (CRCEES). Aviva's operational carbon boundaries differ from those reported for the CRCEES as that also includes energy emissions from our portfolio of properties included in funds which we manage and have responsibility for. Aviva's position in the CRCEES Performance League table was 899 out of a total of 2103 participating organisations. The total CO<sub>2</sub> emissions in respect of CRCEES for the 2010/2011 financial year were 100,344 tCO<sub>2</sub>. We estimate the cost of our 2011/2012 emissions to be £1.29 million. Both the operational and CRCEES carbon footprints have reduced and will be reduced further due to the sale of the RAC business at the end of September 2011.

The graph below shows the cost breakdown of one kilowatt hour of UK energy for Aviva. The cost of the actual energy and supply equates to 73%, government levies and taxes which are paid account for 25% of the overall cost. These are revenue raising and are not ringfenced by the Government for environmental improvements. The only aspect of the costs which benefit the environment is the carbon offsetting element (2%).

The cost of carbon varies depending on the source of the emissions and the geography of where the emissions are created. These also change over time.

We are conscious of the potential impacts that climate change has on our business. Climate change is a major trend that drives changes in our risk profile. We build the financial risk that climate change poses into our levels of capital reserves and risk management processes. The risk section provides further information on this on page 61.

There are many ways our work in this area is informed. One of these is our continuing involvement in ClimateWise, the insurance sector collaboration forum on climate change. Our involvement in the workstream looking at sustainable claims management continues, along with work on calls for the consideration of low-carbon solutions inclusion in fixed income investment vehicles.

**Products/suppliers/investors**

Increasingly we are considering environmental impacts associated with our products and services and the processes involved in their use and fulfilment. We have completed a carbon footprint exercise for the energy consumption of the UK properties we own through our Aviva Investors Real Estate portfolio. According to our CRCEES submission this amounted to 53,705 tCO<sub>2</sub> in 2010/11. Through the Real Estate Sustainability Charter and Sustainability Forum we are working with site managers and tenants to reduce the properties' environmental impacts. The Aviva Investors European Renewable Energy Fund achieved its first close in mid-2011 and expects to acquire and manage approximately €1bn of assets. The fund is currently open for further investment.

In order to meet the needs of the rapidly expanding environmental goods and services sector, Aviva UK launched an expansion of policy endorsements covering low-carbon technologies and services in March 2011. In 2010 Aviva Canada created a set of endorsement bundles introduced to satisfy the insurance needs of domestic customers. Customers who utilise solar panels and wind turbines to generate electricity for their own consumption and/or supplying energy to the Grid as part of Provincial Incentive Programs can now be covered as part of their insurance policy. Building on that, a further product has been developed which means that in the event of a total or major loss at the insured's home, the customer will be able to replace damaged or destroyed property with more environmentally friendly and sustainable products.

Aviva France has developed a number of products which encourage and reward our customers for their environmentally conscious behaviour. One of these products is our limited mileage motor policy which offers reduced premiums for driving less. Take up of the low mileage product makes up 25% of Aviva France's portfolio and accounted for 28% of new sales in 2010.

**Industry benchmark information**

- Carbon Disclosure Project Score 80 out of 100 in FTSE Global 500 and FTSE350 (2010: 70); and
- BREEAM<sup>1</sup> minimum ranking 'Good' for new build and refurbishment.

<sup>1</sup> Building research establishment environmental assessment methodology.

## Waste

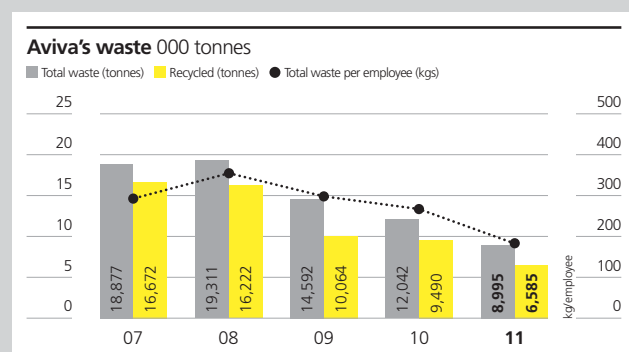

### Direct company impacts

#### Hazardous and non-hazardous waste

Total disposal cost for hazardous and non-hazardous waste in the UK was £681,000 (2010: £596,000), which includes UK landfill tax. On a worldwide basis the cost of offsetting the associated carbon emissions will be approximately £2,047.

#### Conservation investment

In the UK, total capital expenditure for storage and recycling was £100,000 (2010: zero). This investment means that the percentage of waste diverted from landfill now stands at 91% and will be zero to landfill by the end of 2012.

### Performance, strategy and targets

Despite the quality of reporting in respect of waste improving in 2011, the overall volume of waste disposed of reduced by 2,393 tonnes for the UK. There are several reasons for this including structural changes such as less office closures, but also more efficient paper use (see Resource usage). The US head office employ the use of a solar compactor for general waste and a food waste desiccator, the product of which is used as a soil improver. These two machines have reduced the number of waste collections.

Having already reached a recycling rate of 89% in 2010 Aviva UK sought to further improve the recycling rate in 2011. The focus of attention was food waste which was previously included in general waste. It is anticipated that the UK business will reach its zero to landfill target by the end of 2012, three years ahead of the target year.

### Indirect impacts

#### Products/suppliers/investors

In an effort to reduce the amount of waste generated through our claims fulfilment processes, we have sought to apply the 'repair over replace' principle to domestic property claims following water damage. Previously this consisted of 'stripping out' render and plaster on walls and ceilings. We target minimisation of strip out of the property affected by water damage through the introduction of a Repair Order to Aid Drying (ROTAD) whereby the suppliers are required to complete a documented request on a property prior to drying. This monitoring process has significantly reduced the instance of strip outs.

#### Industry benchmark information

- 200kg of waste per employee per year; and
- recycling rate of 60–70% (BRE Office toolkit).

#### Targets

- annual 4% reduction in total waste;
- annual recycling rate greater than 80%; and

- long-term target – zero to landfill for UK operations by 2015 and worldwide by 2020.

## Resource usage

### Direct Company impacts

#### Water

The operating cost of water is £1.1 million (2010: £1.6 million) with a CO<sub>2</sub> equivalent of 503 tCO<sub>2</sub>. Of the total water consumed, 5% comes from grey water sources and is used for irrigation of the grounds around the buildings.

#### Energy intensity

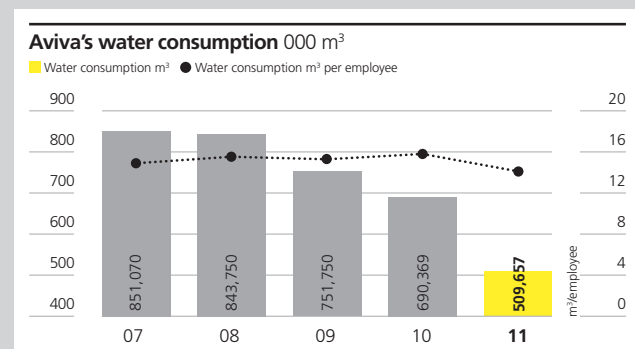

The total cost of buildings related energy in 2011 was £18.3 million (2010: £17.7 million). The equivalent cost per square metre is £22. The cost of UK CRCEES regulation of £1.29 million is an additional cost.

#### Paper usage

We currently do not track the cost of paper on a global basis.

#### Environmental incidents

During 2011 there were no environmental incidents as a result of our operations (2010: none).

### Performance, strategy and targets

Water consumption reduced by 26% in 2011; this was partially due to the outsourcing of Aviva Canada's data centre which was water cooled.

### Indirect impacts

#### Products/suppliers/investors

2011 was the first full year of Aviva UK's adherence to the Royal Mail's Responsible Mailing programme for direct marketing mail. Nearly 8 million items of direct mail were delivered through this programme which ensures that the paper used is FSC accredited. Aviva US only uses FSC accredited paper in its operations.

By the end of 2011 all UK General Insurance home, motor and broker commercial transactional policy packs, yearly statements and renewals were e-enabled, generating saving of nearly £2 million per annum on print and postage costs. Another 41% of Aviva UK policy documentation will be e-enabled in 2012 with total estimated savings of £8.6 million.

#### Industry benchmark information

- Water: 4 cubic metres per employee per year (Water Key Performance Indicators and benchmarks for offices and hotels. C657 CIRIA [www.ciria.org](http://www.ciria.org)).
- Office paper: 4,000–5,000 sheets per employee per annum (Gartner research).

## Customer advocacy

### Direct Company impacts

At Aviva, the Net Promoter Score® is our key customer metric. This KPI is derived from the annual Relationship NPS survey conducted across all markets and comparing the local Aviva results with the local competition. This measure is widely regarded as a predictor of future growth, with strong correlations to persistency and retention, repeat purchase and referrals, suggesting that acting on the drivers of this metric will help us to build advocacy and will have a positive impact on business performance. Some preliminary analysis in different markets has shown that customers who score more highly on the NPS scale are indeed more likely to stay with Aviva for longer and more likely to have multiple products, suggesting that improving customer advocacy is beneficial to our company performance.

### Non-financial indicator

Businesses' performance v local benchmark

### Our performance, strategy and targets

The 2011 Relationship Net Promoter Score (RNPS) survey again showed an improvement on the previous year. We maintained the proportion of businesses operating in the upper quartile (relative to local competition benchmarks) and reduced the proportion of businesses operating below the market average as they moved into a market average position. We are pleased with the progress made however and we are committed to improving the performance of our markets which are below the market average.

Across our regions:

- In North America, we have maintained similar positions relative to the competition when compared with 2010.
- In Asia, China, Korea and Singapore we have out-performed, when compared to the local market benchmark. There were also further strong improvements in the Indian business.
- In Europe, the majority of markets continue to out-perform, when compared to the local market benchmark.
- The UK results have also shown marked improvements against the competitor benchmarks.

Building customer advocacy is one of the primary objectives for the business as a whole with our long-term target for all markets to be in the upper quartile relative to their local competition. Using a consistent methodology, each market is also set an annual target of either maintenance or improvement depending on their current performance.

In order to achieve these targets, we use Net Promoter as a discipline rather than just a number, which means continuously listening to and understanding what our customers want from us so that we can improve the experience we deliver to them. Following the RNPS survey, we undertake robust analysis to highlight key drivers which each market uses to develop annual action plans. The 2012 action plans show that markets are focusing on key areas of the customer experience, including how we engage with customers through ongoing communications after the initial sale, how we build products that are in the best interests of customers and ensuring that we are available to customers through the service channels they choose (such as digital and mobile).

### Indirect impacts

Customers place their trust in us to deliver on our promises. By acting responsibly we ensure that Aviva is here for the long term to provide prosperity and peace of mind. Our progress in this area has been recognised by being ranked as the most reputable financial services provider in the UK by the Reputation Institute in 2011.

### Recovering from poor experiences

One aspect to maintaining this reputation is how we respond when things go wrong. Especially in a world where a customer can publicly broadcast what we have done and how we have responded, it is more important than ever to actively welcome customer feedback and to treat customers fairly. Of course, delivering products and services in line with our customers' expectations will ensure that we minimise complaints in the first place, however, accepting that we are human and therefore won't get it right every single time, we believe that customer complaints are an opportunity for us to win back goodwill that we may have lost. And by listening and learning from this feedback, over the past year we have seen the level of complaints fall and we have also seen improvements in how our customers feel about the interactions they have with us.

### Looking to the future

It is also important to our business to understand how consumers' lives are changing and therefore how we can adapt to these changes. In 2011 we explored some of the major trends currently manifesting in our key markets, such as the growing consideration consumers give to the impact of their purchasing decisions on the environment, increasing desire for emotional experiences rather than tangible goods, and recognition of the importance of the home in an increasingly unstable world. We are well positioned to help consumers through this uncertainty, enabling them to make better financial choices and protect what's important to them. With this understanding of future consumer needs we can position our business to respond and therefore build our reputation as a company that listens to and understands what customers want.

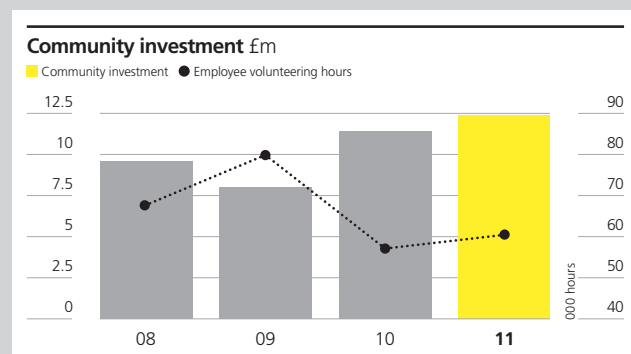

### Engaging our people

In the last year, the proportion of our people who say they would recommend our products and services has increased but remains slightly below the Global Financial Services benchmark. Since we know that the way our people feel about our products and services is directly correlated with how our customers perceive us, maintaining this high performance and the support of our people is critical to building our reputation with our customers.

## Developing communities

### Direct company impacts

Our global investment in charitable and community development projects in 2011 was £12.4 million (2010: £11.4 million). This includes cash, time and in-kind donations as well as management costs calculated using the London Benchmarking Group (LBG) model. We also helped leverage an additional £2.8 million of investment where our activity attracted further contributions from our wide network of stakeholders (2010: £1.5 million) including employees.

### Our performance, strategy and targets

Our global community development (CD) strategy, focusing on financial literacy, education and life trauma, aligns to our corporate vision and channels financial support and the expertise of our employees into projects where we can see positive societal impacts. Our total investment was £1 million higher than in 2010. Three key factors contributed to this: significant investment in our ongoing global CD and cause-related marketing initiative Street to School which donated funds and used our marketing reach to raise awareness of the issue; improvement in the scope and accuracy of the way we record CD data according to LBG guidelines; and the increasing engagement of our people in CD activity.

We delivered over 60,392 hours of volunteering in 2011 (2010: 57,250) and we had a significant 5% uplift in those believing our commitment to CR is genuine and 10% uplift in employees believing we act responsibly in our communities. This places us 14% above the Global Financial Services benchmark in this regard.

Our flagship Street to School initiative to get young people off the streets and into education and training is delivering tangible benefits in engaging our people, impacting the lives of vulnerable young people and in creating the right brand associations for Aviva. Our clear focus on this programme, with at least 50% of CD activity happening in this sphere gives us the opportunity to make a deep and lasting difference. 23 Street to School programmes are in operation and we have developed a rigorous measurement framework together with our partners to allow us to govern and demonstrate the activity, its inputs and outputs. From this we know that we helped over 274,000 children through our programmes in 2011. We continue to use Street to School in our cause-related marketing, showing its potential to engage our stakeholders and also its power to engage social media communities. We will continue to extend the impact of Street to School in 2012 and will also be conducting a review to ensure we plan for the sustainability of these impacts.

### Indirect impacts

We have taken the opportunity to partner with the Consortium for Street Children (CSC) to aid our ability to play our part in national and international advocacy activity as we know that legislative, policy and service delivery improvements will make the biggest difference to the most children. In light of this we are also sponsoring pioneering research activity such as 'The State of the World's Street Children' and a study regarding Street Children to be delivered by the High Commissioner for Human rights to the UN Human Rights Council in March 2012. We believe this type of collaboration is essential to achieve the recognition and realisation of street child rights, help deliver the Millennium Development Goals and increase the wellbeing of all in our global communities.

## Independent assurance statement

The Aviva corporate responsibility content on pages 72–86 (the CR Report) has been prepared by the management of Aviva, who are responsible for the collection and presentation of information reported. Our responsibility, in accordance with management's instructions, is to provide a limited assurance engagement on the CR Report content and on selected environmental and community investment data presented in the CR Report. We do not accept or assume any responsibility for any other purpose or to any other person or organisation. Any reliance any such third party may place on the CR Report is entirely at its own risk.

### What we did to form our conclusions

Our assurance engagement has been planned and performed in accordance with ISAE3000<sup>1</sup> and to meet the requirements of a Type 2 assurance engagement as defined by AA1000AS (2008). The AA1000AS (2008)<sup>2</sup> assurance principles of Inclusivity, Materiality and Responsiveness have been used as criteria against which to evaluate the CR Report.

To form our conclusions on the CR Report we undertook the steps outlined below:

1. **Interviewed a selection of executives** and senior managers at Aviva's Group headquarters in London and selected Aviva businesses to understand the current status of corporate responsibility activities, and progress made during the reporting period.
2. **Reviewed Aviva's approach to stakeholder engagement** through interviews with a selection of employees at Aviva businesses in the UK, France, Sri Lanka and Group headquarters and reviewing selected associated documentation.
3. **Reviewed a selection of external media reports and selected corporate level documents** relating to corporate responsibility aspects of Aviva's performance to test the coverage of topics within the CR Report.
4. **Reviewed Aviva's processes for determining material issues to be included in the CR Report.**
5. **Reviewed the collation and aggregation of selected environmental and community investment performance data at Aviva businesses in the UK, France, Sri Lanka and Group.**
6. **Reviewed information or explanations about selected data, statements and assertions** regarding Aviva's corporate responsibility performance.

### Level of assurance

Our evidence-gathering procedures were designed to obtain a limited level of assurance (as set out in ISAE3000) on which to base our conclusions. The extent of evidence gathering procedures performed is less than that of a reasonable assurance engagement (such as a financial audit) and therefore a lower level of assurance is provided.

### Limitations of our review

Our review of data processes included the following data sets: environmental and community investment.

We did not review environmental or community investment performance data for years prior to 2010.

### Our conclusions

On the basis of our review we provide the following conclusions on the CR Report in relation to each of the AA1000AS (2008) assurance principles, overall plausibility and the completeness and accuracy of environmental and community investment performance data. Our conclusions should be read in conjunction with the above section on 'What we did to form our conclusions'.

#### Inclusivity

Has Aviva been engaging with stakeholders across the business to further develop its approach to corporate responsibility?

- We are not aware of any key stakeholder groups that have been excluded from dialogue.
- We are not aware of any matters that would lead us to conclude that Aviva has not applied the inclusivity principle in developing its approach to corporate responsibility.

#### Materiality

Has Aviva provided a balanced representation of material issues concerning its corporate responsibility performance?

- We are not aware of any material aspects of Aviva's corporate responsibility performance which have been excluded from the CR Report.
- Nothing has come to our attention that causes us to believe that Aviva management has not applied its processes for determining material issues to be included in the CR Report.

#### Responsiveness

Has Aviva responded to stakeholder concerns?

- We are not aware of any matters that would lead us to conclude that Aviva has not applied the responsiveness principle in considering the matters to be reported.

#### Performance information

How plausible are the statements and claims within the CR Report?

- We are not aware of any inconsistencies in the assertions made with regards to performance and achievement.

How complete and accurate is the environmental and community investments data in the CR Report?

- With the exception of the limitations identified in the CR Report, we are not aware of any material reporting units that have been excluded from Group data.
- Nothing has come to our attention that causes us to believe that the data relating to the above topics has not been collated properly from Group-wide systems.
- We are not aware of any errors that would materially affect the data as presented in the CR Report.

#### Observations on particular aspects of our engagement

Our observations and areas for improvement will be raised in a report to Aviva management. Selected observations are provided below. These observations do not affect our conclusions on the CR Report set out above.

- Aviva continues to use the Credit 360 data collection tool as a means of standardising the environmental and community data collation process. There have been improvements in data collection, particularly in relation to the community data. Aviva should consider improving the guidance and training for the reporting of environmental performance data.
- Aviva has expanded its reporting boundaries, both geographically and in scope. This work is encouraging and Aviva should ensure progress is ongoing in this area.

<sup>1</sup> International Federation of the Accountants' International Standard for Assurance Engagements Other Than Audits or Reviews of Historical Financial Information (ISAE3000).

<sup>2</sup> AA1000AS (2008) – A second edition of the AA1000 assurance standard from the Institute of Social and Ethical Accountability.

**Our independence**

As auditors to Aviva plc, Ernst & Young are required to comply with the independence requirements set out in the Auditing Practices Board's (APB) Ethical Standards for Auditors. Ernst & Young's independence policies apply to the firm, partners and professional staff. These policies prohibit any financial interests in our clients that would or might be seen to impair independence. Each year, partners and staff are required to confirm their compliance with the firm's policies.

**Our assurance team**

Our assurance team has been drawn from our global Climate Change and Sustainability Services Practice, which undertakes engagements similar to this with a number of significant UK and international businesses. The work has been led and reviewed by a Lead Sustainability Assurance Practitioner.

# Board of directors

## 1. Lord Sharman of Redlynch OBE Chairman (Age 69)

Appointed to the Board in January 2005 and became chairman in January 2006. Currently president of GamCare (charity). Former chairman of Aegis Group plc (media services) and KPMG International (auditors), deputy chairman of Group 4 Securicor plc (security services), member of the supervisory board of ABN AMRO Holding N.V. (banking) and an independent non-executive director of Young & Co's Brewery plc (drinks), AEA Technology plc (commercial/technology), BG Group plc (oil and gas) and Reed Elsevier Group plc (publishing). Chairman of the Board and the Nomination Committee and a member of the Corporate Responsibility Committee.

## 2. John McFarlane OBE Independent non-executive director and deputy chairman (chairman designate) (Age 64)

Appointed to the Board in September 2011. Currently a non-executive director of The Royal Bank of Scotland Group plc (banking) until 30 March 2012, Westfield Holdings Limited (retail mall developer and operator) and Old Oak Holdings Limited (financial holding company). Former chief executive officer of Australia and New Zealand Banking Group Limited, executive director of Standard Chartered plc, head of Citicorp and Citibank UK and Ireland, and managing director of Citicorp Investment Bank. Former director and council member of The London Stock Exchange (financial services) and former non-executive director of Capital

Radio plc (media), The Securities Association (UK securities regulator), the Auditing Practices Board (auditing regulator) and the Business Council of Australia. Former chairman of the Australian Bankers Association. Member of the Nomination Committee.

## 3. Andrew Moss Group chief executive (Age 53)

Appointed to the Board in May 2004. Joined as group finance director and became group chief executive in July 2007. Currently treasurer and a member of the board of The Geneva Association and a member of the board of the Association of British Insurers. Previously director of finance, risk management and operations at Lloyd's of London (insurance) and formerly held a number of senior management positions at HSBC plc (banking). Member of the Corporate Responsibility and Nomination Committees and a member of the supervisory board of Delta Lloyd N.V.

## 4. Patrick Regan Chief financial officer (Age 45)

Appointed to the Board in February 2010 as chief financial officer. Previously group chief financial officer and group chief operating officer at Willis Group Holdings Limited (insurance broking), group financial controller for RSA Insurance Group plc (insurance) and finance and claims director, UK general insurance for AXA Insurance (insurance). He also held a number of senior management positions at GE Capital (financial services) and specialised in corporate finance and

investigations at Grant Thornton (professional services). Member of the supervisory board of Delta Lloyd N.V.

## 5. Trevor Matthews Executive director (Age 59)

Appointed to the Board in December 2011 as chief executive, Aviva UK. Previously chief executive officer and vice-chairman of Friends Life (insurance) and chief executive officer of Friends Provident plc (insurance). Former chief executive of Standard Life Assurance Company Limited, president and chief executive officer of Manulife Japan and executive vice-president, Canadian operations and chairman, Manulife Bank, Toronto. He has also held senior management positions at National Australia Bank and Legal & General Assurance Holdings Australia Limited.

## 6. Igal Mayer Executive director (Age 50)

Appointed to the Board in January 2011 as chief executive, Aviva Europe. Joined the Group in 1989 and held various senior management positions before becoming chief financial officer and executive vice-president of Aviva Canada, managing director, London markets for CGU Insurance and finance director for Norwich Union Insurance. He was also previously president and chief executive officer of Aviva Canada, chief executive of Aviva UK General Insurance and chief executive of Aviva North America.

**7. Glyn Barker****Independent non-executive director (Age 58)**

Appointed to the Board in February 2012. Currently a non-executive director of The Berkeley Group Holdings plc (construction) and a trustee of the English National Opera. Formerly vice-chairman UK of PricewaterhouseCoopers LLP and responsible for leading the executive team for the Europe, Middle East, Africa and India region. Formerly also UK head of assurance and a member of the UK management board of PricewaterhouseCoopers LLP.

**8. Mary Francis CBE****Independent non-executive director (Age 63)**

Appointed to the Board in October 2005. Currently senior independent director of Centrica plc (utilities) and a non-executive director of Cable & Wireless Communications plc (telecoms). A senior adviser to Chatham House and chair of governors, James Allen's Girls' School. Formerly a senior civil servant, director general of the Association of British Insurers, and a non-executive director of the Bank of England, Alliance & Leicester plc (banking), St Modwen Properties plc (property development) and the Almeida Theatre Company Limited. Member of the Audit, Nomination and Risk Committees.

**9. Richard Karl Goeltz****Senior independent non-executive director (Age 69)**

Appointed to the Board in May 2004. Currently a non-executive director of the Warnaco Group Inc. (clothing), the New Germany Fund (investment trust), the Central Europe and Russia Fund (investment trust) and the European Equity Fund (investment trust), a member of the Council and Court of Governors of The London School of Economics and Political Science and a trustee of the American Academy in Berlin. Former vice-chairman and chief financial officer of American Express Company (financial services) and director and chief financial officer of NatWest Group plc (banking). Former non-executive director of Delta Air Lines, Inc. (transport) and Federal Home Loan Mortgage Corporation (Freddie Mac) (financial services) and a former member of the Accounting Standards Board (UK). Member of the Audit and Nomination Committees.

**10. Euleen Goh****Independent non-executive director (Age 56)**

Appointed to the Board in January 2009. Currently a non-executive director of Singapore Airlines Limited (aviation), DBS Bank Limited (banking), DBS Group Holdings Limited (banking), Singapore Exchange Limited (financial services), CapitaLand Limited (real estate) and the Singapore Chinese Girls' School. Chairman of the Singapore International Foundation. Former chairman of the Accounting Standards Council of Singapore and former chief executive officer of Standard Chartered Bank in Singapore (banking). Member of the Audit and Corporate Responsibility Committees.

**11. Michael Hawker AM****Independent non-executive director (Age 52)**

Appointed to the Board in January 2010. Currently a non-executive director of Macquarie Bank Limited (banking), Macquarie Group Limited (banking) and Australian Rugby Union. Chairman of The George Institute for Global Health and director/trustee of the George Institute for Global Health (UK). Also a member of the advisory council at General Enterprise Management Services International Limited (private equity). Formerly chief executive and managing director of Insurance Australia Group (insurance) and chairman of the Insurance Council of Australia. Chairman of the Risk Committee and a member of the Audit and Remuneration Committees.

**12. Gay Huey Evans****Independent non-executive director (Age 57)**

Appointed to the Board in October 2011. Currently a non-executive director of The London Stock Exchange Group plc (financial services) and Clariden Leu (Europe) Limited (financial services). Member of the management board and of the panel of finance experts of the Panel of Recognised International Market Experts in Finance (PRIME Finance), a trustee of Wellbeing of Women (UK) (charity) and The Wigmore Hall Trust (charity). Formerly vice-chairman of the board and non-executive chairman, Europe of the International Swaps and Derivatives Association, Inc. (ISDA) (financial trade association), vice-chairman, Investment Banking & Investment Management at Barclays Capital (banking) and held senior management positions at Citi Alternative Investments (EMEA) (banking), the Financial Services Authority (UK regulator) and Bankers Trust Company (banking). Chairman of the Corporate Responsibility Committee.

**13. Leslie Van de Walle****Independent non-executive director (Age 55)**

Appointed to the Board in May 2009. Currently chairman of SIG plc (construction) and non-executive director of La Seda de Barcelona, SA (plastic packaging) and DCC plc (business support). Formerly chief executive officer of Rexam plc (packaging), executive vice-president of retail for oil products and head of oil products, Shell Europe, for Royal Dutch Shell plc and previously held a number of senior management positions with Cadbury Schweppes plc (consumer goods) and United Biscuits Ltd (consumer goods). Former non-executive director of Aegis Group plc (media services). Member of the Remuneration and Risk Committees.

**14. Russell Walls****Independent non-executive director (Age 68)**

Appointed to the Board in May 2004. Currently non-executive director of Biocon Limited (healthcare), Signet Jewelers Limited (retail) and Mytrah Energy Limited (wind power producer). Former group finance director of BAA plc (transport), Wellcome plc (pharmaceuticals) and Coats Viyella plc (textiles), treasurer and trustee of the British Red Cross and a member of the Finance Commission of the International Federation of the Red Cross. Formerly senior independent non-executive director of Stagecoach Group plc (transport) and Hilton Group plc (leisure) and a non-executive director of Delphic Diagnostics Limited (medical) and Mersey Docks and Harbour Company (transport). Chairman of the Audit Committee and a member of the Nomination and Risk Committees.

**15. Scott Wheway****Independent non-executive director (Age 45)**

Appointed to the Board in December 2007. Currently a strategic adviser to Best Buy Co., Inc. (retail services). Former chief executive officer of Best Buy Europe (retail services), director of The Boots Company plc (pharmacy) (now known as The Boots Company Limited) and managing director and retail director of Boots the Chemist at Alliance Boots plc. Formerly held a number of senior executive positions at Tesco plc (retail services), including chief executive of Tesco in Japan. Chairman of the Remuneration Committee and a member of the Corporate Responsibility Committee.

## Executive management

Joined the Group in 1995. Formerly chief executive officer of Aviva Canada, chief financial officer and executive vice-president of Aviva Canada and held various senior management positions in the finance function, including finance director for London & Edinburgh Insurance Company Limited. Previously spent five years with Procter & Gamble Limited. Holds a Master of Arts in Economics from Aberdeen University and is a chartered management accountant. Currently chairman of the European Chief Risk Officer Forum. Former chairman of Canada's Property and Casualty Insurance Compensation Corporation.

The directors submit their annual report and accounts for Aviva plc, together with the consolidated financial statements of the Aviva Group of companies, for the year ended 31 December 2011.

The Companies Act 2006 requires the directors to present a business review in this Directors' Report. The requirement is for the Company to set out in this Directors' Report a fair review of the business of the Group during the financial year ended 31 December 2011, including an analysis of the position of the Group at the end of the financial year and the trends and factors likely to affect the future development, performance and position of the business.

The contents of this Directors' Report, together with the Performance review on pages 20 to 70, the Corporate Responsibility Report on pages 72 to 88, Shareholder Information on pages 138 to 164 (which includes the risks relating to our business), the Corporate Governance Report on pages 97 to 105, and the Directors' Remuneration Report on pages 114 to 136, constitute the business review and are therefore incorporated into this Directors' Report by reference. Details of material acquisitions and disposals made by the Group during the year are contained in note 3 to the consolidated financial statements IFRS.

## Results

The Group results for the year are shown in the consolidated income statement on page 183.

## Dividends

The directors are recommending a final dividend of 16.00 pence per ordinary share (2010: 16.00 pence), which, together with the interim dividend of 10.00 pence per ordinary share paid on 17 November 2011 (2010: 9.50 pence), produces a total dividend for the year of 26.00 pence per ordinary share (2010: 25.50 pence). The total cost of ordinary dividends paid in 2011, was £738 million (2010: £681 million). Subject to shareholder approval at the 2012 Annual General Meeting (AGM), the final dividend for 2011 will be paid on 17 May 2012 to all holders of ordinary shares on the Register of Members at the close of business on 23 March 2012 (and approximately five business days later for holders of the Company's American Depositary Receipts).

## Share capital and control

The issued ordinary share capital of the Company was increased by 85,564,296 ordinary shares during the year. 1,574,706 shares were allotted under the Group's employee share and incentive plans and 83,989,590 shares were allotted under the Aviva Scrip Dividend Scheme for the May 2011 and November 2011 dividends. At 31 December 2011 the issued ordinary share capital totalled 2,905,712,938 shares of 25 pence each and the issued preference share capital totalled 200 million shares of £1 each. Accordingly, the issued and paid-up ordinary share capital constituted 78% of the Company's total issued share capital and the issued preference share capital constituted 22% of the Company's total issued share capital at 31 December 2011. All the Company's shares in issue are fully paid up and the ordinary and preference shares have a Premium and Standard listing respectively on the London Stock Exchange. The Company is listed on the New York Stock Exchange (NYSE) in the form of American Depositary Shares, referenced to ordinary shares, under a depositary agreement with Citibank. Details of the Company's share capital and shares under option at 31 December 2011 and shares issued during the year are given in notes 29 to 32 of the consolidated financial statements.

The rights and obligations attaching to the Company's ordinary shares and preference shares, together with the powers of the Company's directors, are set out in the Company's articles of association, copies of which can be obtained from Companies House and the Company's website, [www.aviva.com/investor-relations/corporate-governance/articles-of-association](http://www.aviva.com/investor-relations/corporate-governance/articles-of-association), or by writing to the group company secretary.

With the exception of restrictions on transfer of the ordinary shares under the Company's employee share incentive plans while the shares are subject to the rules of the plans, there are no restrictions on the voting rights attaching to the Company's ordinary shares or the transfer of securities in the Company.

Where, under an employee share incentive plan operated by the Company, participants are the beneficial owners of shares but not the registered owners, the voting rights are normally exercised at the discretion of the participants. No person holds securities in the Company carrying special rights with regard to control of the Company. The Company is not aware of any agreements between holders of securities that may result in restrictions in the transfer of securities or voting rights. Unless expressly specified to the contrary in the articles of association of the Company, the Company's articles of association may only be amended by special resolution of the Company's shareholders in general meeting. There are a number of agreements that take effect, alter or terminate upon a change of control of the Company, such as commercial contracts and joint venture agreements. None is considered to be significant in terms of their potential impact on the business of the Group as a whole. All of the Company's employee share incentive plans contain provisions relating to a change of control. Outstanding awards and options would normally vest and become exercisable on a change of control, subject to the satisfaction of any performance conditions and pro rata reduction as may be applicable under the rules of the employee share incentive plans.

At the 2012 AGM, shareholders will be asked to renew the directors' authority to allot shares. Details are contained in the Notice of Annual General Meeting (Notice of AGM).

## Authority to purchase own shares

At the Company's AGM held on 4 May 2011, shareholders renewed the Company's authorities to make market purchases of up to 282 million ordinary shares, up to 100 million 8¾% preference shares and up to 100 million 8⅜% preference shares. These authorities were not used during the year or up to the date of this report. At the 2012 AGM, shareholders will be asked to renew these authorities for another year and the resolution will once again propose a maximum aggregate number of ordinary shares which the Company can purchase of less than 10% of the issued ordinary share capital. Details are contained in the Notice of AGM. The Company held no treasury shares during the year or up to the date of this report.

## Major shareholdings

In accordance with the provisions of the Disclosure and Transparency Rules of the Financial Services Authority, as at 31 December 2011, the Company had received the following notifications relating to their holdings percentage of the total voting rights attaching to the issued ordinary share capital of the Company: BlackRock, Inc. held 4.99%; Legal & General Group plc held 3.98% and AXA SA held 3.86%. As at 7 March 2012, the Company had been notified of the following holdings of voting rights in the ordinary share capital of the Company: BlackRock, Inc. 5.15%; Legal & General Group plc 3.98%; and AXA SA 3.86%.

## Directors

The following persons served as directors of the Company during the year and up to the date of this report:

Glyn Barker (appointed 27 February 2012)  
 Mary Francis  
 Richard Karl Goeltz  
 Euleen Goh  
 Michael Hawker  
 Gay Huey Evans (appointed 20 October 2011)  
 Mark Hodges (resigned 2 June 2011)  
 Trevor Matthews (appointed 2 December 2011)  
 John McFarlane (appointed 1 September 2011)  
 Igal Mayer (appointed 19 January 2011)  
 Andrea Moneta (resigned 19 January 2011)  
 Andrew Moss  
 Carole Piwnica (resigned 1 December 2011)  
 Patrick Regan  
 Lord Sharman of Redlynch  
 Leslie Van de Walle  
 Russell Walls  
 Scott Wheway

The biographical details of the persons currently serving as directors appear on pages 90 to 91.

The UK Corporate Governance Code (the Code) provides that all directors of FTSE 350 companies should be subject to annual re-election by shareholders and that directors should be subject to election by shareholders at the first annual general meeting after their appointment. The Company complied with this provision in 2011 and at the 2012 AGM, all directors of the Company will again offer themselves for election/re-election in compliance with this provision of the Code.

## Directors' interests and indemnity arrangements

At no time during the year did any director hold a material interest in any contract of significance with the Company or any of its subsidiary undertakings other than an indemnity provision between each director and the Company and employment contracts between each executive director and a Group company. There is no arrangement or understanding with any shareholder, customer, supplier, or any other external party, to appoint a director or a member of the Group Executive Committee. The Company has purchased and maintained throughout the year directors' and officers' liability insurance in respect of itself and its directors. The directors also have the benefit of the indemnity provision contained in the Company's articles of association. The Company has executed deeds of indemnity for the benefit of each director of the Company, and each person who was a director of the Company during the year, in respect of liabilities that may attach to them in their capacity as directors of the Company or of associated companies. These indemnities were granted at different times according to the law in place at the time and where relevant are qualifying third-party indemnity provisions as defined by section 234 of the Companies Act 2006. These indemnities were in force throughout the year and are currently in force. Details of directors' remuneration, service contracts, employment contracts and interests in the shares of the Company are set out in the Directors' Remuneration Report.

## Financial instruments

Aviva Group companies use financial instruments to manage certain types of risks, including those relating to credit, foreign currency exchange, cash flow, liquidity, interest rates, and equity and property prices. Details of the objectives and management of these instruments are contained in the Shareholder Information section on pages 155 to 164 and an indication of the exposure of the Group companies to such risks is contained in note 56 to the consolidated financial statements.

## Health and safety

Aviva is committed to providing a safe and healthy working environment for all staff, contractors and anyone who is or may be affected by the business' undertakings. The Group's health and safety standard sets out the range of policies, procedures and systems required to manage risks and promote wellbeing. This includes appropriate staff consultation through nominated health and safety representatives. The group chief executive has overall accountability for health and safety across the organisation and regularly reviews health and safety performance.

## Developing communities

Aviva takes its corporate citizenship seriously and recognises the role it plays in the communities in which it operates and the role they play in its business.

The Company pays attention to global issues such as the Millennium Development Goals set by the United Nations to focus governments, businesses and civil society on major global concerns, including the local needs of people in the places where the Group operates. The Company works in partnership with field experts across the public and third sector and aims to use the Group's core capability as it focuses its activity on education, life trauma and financial literacy. A total contribution of over £12.4 million was made in 2011. This includes cash donations, marketing expenditure, the value of volunteering hours by the Group's employees, non-cash resources committed to community activities, management and project costs. The Group's employees are entitled to up to three paid days' leave per year to volunteer and in 2011 the Group delivered over 60,300 hours of volunteering in our communities.

There is mutual benefit in the Group's community development activity as employees feel engaged, communities where the Group operates feel the impact and the Group's brand reputation is enhanced. The Group's flagship global community development programme, that embodies the approach above, is 'Street to School', which is now in year two of a five-year commitment to help 500,000 children fulfil their potential. At the end of 2011, the Group had already helped 274,000 children through prevention work, community outreach, healthcare, safe housing programmes and a significant focus on education and training projects, delivered in 17 countries. The Group has also partnered with the Office of the High Commissioner for Human Rights to deliver a study to support the implementation of best practice with street children globally.

The Group's community development activity also included grassroots athletics and rugby activity, financial literacy work in schools and adult education. The Group recently renewed its long term partnership with Oxfam 365, helping it respond promptly to emergencies in areas such as Philippines and the Horn of Africa.

## Political donations

At the 2011 AGM, shareholders passed a resolution, on a precautionary basis, to authorise the Company to make political donations and/or incur political expenditure (as such terms are defined in sections 362 to 379 of the Companies Act 2006), in each case in amounts not exceeding £100,000 in aggregate. As the authority granted will expire on 3 May 2012, renewal of this authority will be sought at this year's AGM. Further details are available in the Notice of AGM. The definitions of political donations and political expenditure used in the Companies Act 2006 are broad in nature and this authority is sought to ensure that any activities undertaken throughout the Group's businesses, which could otherwise be construed to fall within these provisions, can be undertaken without inadvertently infringing them. It is not the policy of the Company to make donations to EU political organisations or to incur other political expenditure.

During the year, the Aviva USA Political Action Committee, which is funded solely by voluntary contributions from employees of Aviva USA Corporation (a subsidiary of the Company), made contributions to six candidate campaigns and industry political action committees. The total sum of the donations made was \$11,250 and the donations were used to support candidates for nomination and/or election to public office.

## Group employees

The Group's statement on its employees is set out in the Corporate Responsibility Report. In summary, the Group's commitment to communication and dialogue with employees continues. The existence of a Group-wide intranet enables engagement and communication with employees throughout the Group on a single platform. It also helps management to share information, ideas and opportunities quickly across the entire business and to achieve a common awareness on the part of all employees of the financial and economic factors affecting the performance of the Company. A strong emphasis is placed on the provision of news and information through a range of media. Employees have opportunities to voice their opinions and ask questions through intranet sites, question-and-answer sessions with the group chief executive, via telephone conferencing, opinion surveys and the Group's Employee Promise Survey which is open to all employees. Face-to-face briefings and team meetings are actively encouraged and are held in all business units across the Group. The Group's businesses in the UK have established employee consultative forums and a European Consultative Forum convenes annually to discuss matters impacting the business across Europe. The Group ensures that involvement of employees in its performance is encouraged by allowing eligible employees to participate in the Group's all employee share ownership plans.

## Employee practice

The Group respects all fundamental human rights and is guided in the conduct of its business by the provisions of the United Nations Universal Declaration of Human Rights and the International Labour Organization core labour standards. The Group also supports the United Nations Global Compact Principles. The Group companies are committed to providing equal opportunities to all employees, irrespective of their gender, sexual orientation, marital status, race, nationality, ethnic origin, disability, age, religion or union membership status. Aviva is an inclusive employer and values diversity among its employees. These commitments extend to recruitment and selection, training, career development, flexible working arrangements, promotion and performance appraisal.

## Corporate responsibility

The Group has a well-embedded corporate responsibility programme helping to deliver sustainable business practices. The Company continues to use its position as a large procurer, business partner and investor to influence other companies to engage in sustainable behaviour and report on their progress and forward looking strategy. The Company puts its Corporate Responsibility Report, which is included in the Annual Report and Accounts, to an annual advisory vote of shareholders at the Company's AGM as a means of obtaining feedback on the Report and the Company's performance in this area. The Report is set out on pages 72 to 88 and details of the resolution for the 2012 AGM are set out in the Notice of AGM.

## Creditor payment policy and practice

It is the Group's policy to pay creditors when they fall due for payment. Terms of payment are agreed with suppliers when negotiating each transaction and the policy is to abide by those terms, provided that the suppliers also comply with all relevant terms and conditions. In respect of Group activities in the UK, the amounts due to trade creditors at 31 December 2011 represented 22.2 days of average daily purchases through the year (2010: 20.8 days).

## Corporate Governance Statement

In compliance with the Disclosure and Transparency Rules (the DTRs), the disclosures required by DTR 7.2.2 to 7.2.7 can be found in the Corporate Governance Report on pages 97 to 105, which is incorporated into this Directors' Report by reference.

## Disclosure of information to the auditor

The directors in office at the date of approval of this Directors' Report confirm that, so far as they are each aware, there is no relevant audit information of which the Company's auditor, Ernst & Young LLP, is unaware and each director has taken all steps that ought to have been taken as a director to be aware of any relevant audit information and to establish that Ernst & Young LLP are aware of that information.

The above statement is made in accordance with Section 418 of the Companies Act 2006.

The Audit Committee reviews the appointment and the terms of engagement of the auditor, the auditor's effectiveness, independence and relationship with the Group, including the level of audit and non-audit fees paid. Further details on the work of the auditor and the Audit Committee are set out in the Audit Committee Report on pages 108 to 110.

## Appointment of new auditor

In order to ensure good corporate governance and that the services of the external auditor remained of the highest quality, the Audit Committee recommended that the provision of external audit services be put to tender in 2011. Following a transparent and competitive tender, including presentations from all candidate firms and discussions with management, the Audit Committee recommended to the Board of Directors that PricewaterhouseCoopers LLP be appointed to replace Ernst & Young LLP as the external auditor of the Aviva Group commencing with the 2012 financial year. This appointment is subject to shareholder approval and a resolution to that effect will be proposed at the Company's 2012 AGM.

A resolution will also be proposed authorising the directors to determine the auditor's remuneration. Details of these resolutions will be set out in the Notice of AGM. As resigning auditor, Ernst & Young LLP has confirmed an intention to resign on completion of the 2011 audit. A 'statement of circumstances' will be included as an appendix to the Notice of AGM.

### **Annual General Meeting**

The 2012 AGM of the Company will be held on Thursday, 3 May 2012 at the Barbican Centre, Silk Street, London EC2Y 8DS at 11am. The Notice of AGM convening the meeting will describe the business to be conducted thereat and will include details of proposed amendments to the Company's articles of association.

By order of the Board

## The UK Corporate Governance Code

The UK Corporate Governance Code (the Code) issued by the Financial Reporting Council dated June 2010 is applicable to companies with a UK Premium Listing with financial years beginning on or after 29 June 2010. The Company opted for early adoption of some of the provisions of the Code in 2011. However, this is the first time the Company will report in full on compliance with the Code, in respect of the 2011 financial year.

The Code sets out standards of good practice in the form of principles and provisions on how companies should be directed and controlled to follow good governance. The Financial Services Authority (FSA) requires companies with a UK Premium Listing to disclose how they have applied the main principles of the Code and whether they have complied with its provisions throughout the accounting period. Where the provisions have not been complied with, companies must provide an explanation for this.

The Directors' Report is therefore based on compliance with the Code. Details of how the Company has applied the Code principles and complied with its provisions are set out on pages 97 to 136.

It is the Board's view that the Company has been fully compliant throughout the accounting period with the relevant provisions of the Code. Further information on the Code can be found on the Financial Reporting Council's website, [www.frc.org.uk](http://www.frc.org.uk).

## The Board

The directors are responsible to shareholders for ensuring that the Company is appropriately managed and that it achieves its objectives. The Board meets regularly to determine the Company's strategic direction, to review the Company's operating and financial performance, to set the Company's risk appetite and to provide oversight that the Company is adequately resourced and effectively controlled. The specific duties of the Board are clearly set out in its terms of reference which address a wide range of corporate governance issues and list those items that are specifically reserved for decision by the Board. Matters requiring Board approval include:

- Group strategy and business plans;
- Financial reporting and controls, capital structure and dividend policy;
- Group risk appetite and framework;
- Corporate governance;
- Remuneration policy;
- Significant transactions and expenditure; and
- Other matters (e.g. appointment and removal of group company secretary and chief risk officer, Board and Committee succession planning and constitution of Board Committees).

## Allocation of Board agenda time %

Succession planning, Board composition and effectiveness	11
Group strategy, business plans and performance monitoring	33
Financial reporting and controls, capital structure and dividend policy	24
Corporate governance	7
Group risk management policies, risk appetite and framework	14
Others	11

The full terms of reference for the Board are available from the group company secretary. Matters that are not specifically reserved for the Board and its committees under its terms of reference, or for shareholders in general meeting, are delegated to the group chief executive. The Board's terms of reference also set out those matters that must be reported to the Board, such as senior leadership changes, significant litigation or material regulatory breaches, and cover how matters requiring consideration by the Board that arise between scheduled meetings should be dealt with.

The Board and its Committees operate in line with annually agreed work plans. At Board and Committee meetings, directors receive regular reports on the Group's financial position, risk appetite, risk management, regulatory compliance, key business operations, customer satisfaction, human resources and other material issues. Directors are fully briefed in advance of Board and Committee meetings on all matters to be discussed and the chairs of the Board Committees provide oral updates on Committee discussions to the Board meetings. The group company secretary is responsible for following Board procedures and advising the Board, through the chairman, on governance matters. All directors have access to the group company secretary's advice and services.

The Board has adopted a procedure whereby directors may, in the performance of their duties, seek independent professional advice at the Company's expense if considered appropriate. During the year, the members of the Remuneration Committee sought independent advice from AON Hewitt New Bridge Street and FIT Remuneration Consultants LLP on issues concerning senior executive remuneration. FIT Remuneration Consultants LLP is an independent consultancy and did not have any other connection with the Company. AON Hewitt New Bridge Street is part of AON, which provided insurance broking services to the Company in 2011. During the year, the Audit Committee and the Risk Committee sought independent advice from Keith Nicholson, a former partner at KPMG LLP.

## The directors

The Board currently comprises the chairman, ten independent non-executive directors and four executive directors. Each director is required to be elected by shareholders at the AGM following his/her appointment by the Board and thereafter all directors are subject to annual re-election as recommended by the Code.

**Balance of executive and non-executive directors**

● Chairman	1
● Executive directors	4
● Non-executive directors	10

**Gender split of directors**

● Male	12
● Female	3

**Length of tenure of non-executive directors**

● 0-3 years	5
● 3-6 years	2
● 6-9 years	4
● +9 years	0

**Geographical mix**

● UK	8
● Continental Europe	1
● US	2
● Other	4

The Board's policy is to appoint and retain non-executive directors, who can apply their wider business knowledge and experiences to their understanding of the Aviva Group, and to review and refresh regularly the skills of the Board. In line with the Code, several non-executive directors, including the Company chairman, are due to retire in 2012 and 2013, after serving on the Board for up to nine years. During the year, the Nomination Committee continued to undertake succession planning for the Board to ensure that an appropriate balance of skills and experience is maintained. As part of the process for the appointment of new directors, the Nomination Committee, on behalf of the Board, considers the diversity of the Board, including gender. The diverse nationalities which currently make up the

Board ensure an international perspective, which is invaluable for the Group as a global business. In addition to the strengths of experience and diversity, the Board also complies with the requirements of the Code on the independence of directors. The aim is that the Board as a whole should have an appropriate balance of skills, experience, independence and knowledge to enable each director and the Board as a whole to discharge their duties and responsibilities effectively.

During the year, following a thorough search by external recruitment consultants, The Zygos Partnership and JCA Group, the Nomination Committee recommended a number of appointments to the Board as part of its succession planning process. John McFarlane was appointed to the Board as an independent non-executive director and will take over the chairmanship of the Board following Lord Sharman's retirement planned for the end of June 2012. Gay Huey Evans was appointed as an independent non-executive director and subsequently as chairman of the Corporate Responsibility Committee following the retirement of Carole Pivnica. In February 2012, Glyn Barker was appointed as an independent non-executive director.

Each director must be able to devote sufficient time to the role in order to discharge his or her responsibilities effectively. On average, directors spend at least 44 days a year on Company business, with the chairmen of the Audit, Risk and Remuneration Committees spending substantially more.

The Code requires that at least half the Board, excluding the chairman, should comprise independent non-executive directors as determined by the Board. The Nomination Committee performs an annual review of directors' interests in which all potential or perceived conflicts, including time commitments, length of service and other issues relevant to their independence, are considered. Where a non-executive director has served on the Board for up to nine years, the Board, through the Nomination Committee, assesses whether such a director remains independent in character and judgement.

The Nomination Committee report, including a description of its duties and its activities during the year in relation to succession planning, is set out on pages 106 to 107.

It is the Board's view that independent non-executive directors need to be able to present an objective, rigorous and constructive challenge to management, drawing on their wider experiences to question assumptions and viewpoints and where necessary defend a given position. The independent non-executive directors should also assist management in the development of the Company's strategy. To be effective, an independent director needs to acquire a sound understanding of the industry and the Company so as to be able to evaluate properly the information provided. Having considered the matter carefully, the Board is of the opinion that all of the current non-executive directors are independent and free from any relationship or circumstances that could affect, or appear to affect, their independent judgement. Accordingly, over half of the Board members, excluding the chairman, are independent non-executive directors. All of the current directors that served during 2011 have been subject to a formal performance evaluation during 2011 and 2012. Non-executive directors who have served on the Board for more than six years were subject to a particularly rigorous review of their independence. As at the date of this report, there are four non-executive directors who have served on the Board for more than six years. More details about all the directors are set out in the Notice of AGM and their biographical details are set out on pages 90 to 91. Below is a summary of some of the skills and experience they possess and which they bring to the Board.

## Summary of directors' skills and experience

### Glyn Barker

Mr Barker has extensive experience as a business leader and a senior adviser to the boards of FTSE 100 companies on a wide variety of corporate and finance issues. He brings to the Board a deep understanding of audit and regulatory issues as well as in-depth transactional experience.

### Mary Francis CBE

Mrs Francis has a long and distinguished career and broad experience as a non-executive director. With her background in government affairs and the financial services industry, coupled with long-standing senior and governance positions across a range of industries, she has the financial knowledge and business acumen to provide rigorous challenge in the discussions of the Board.

### Richard Karl Goeltz

Mr Goeltz has over 40 years' experience in corporate finance, including 20 years in the financial services industry. He has a broad range of both executive and non-executive business experience in major global corporations. His experience of audit and governance committees has been invaluable in providing effective oversight as a member of the Company's Audit Committee. As the senior independent director he has provided strong support to the Board and Nomination Committee, particularly in relation to the chairman's succession.

### Euleen Goh

Ms Goh has over 20 years of global executive experience in the financial services industry. In addition, she also has substantial non-executive and board committee experience, including membership of a number of board committees at DBS and Singapore Airlines. She has a strong understanding of risk and product issues in financial services and continues to provide valuable insight to the Company's operations, particularly in the Asia Pacific region.

### Michael Hawker AM

Mr Hawker has a wealth of financial services knowledge gained over 28 years in the banking and insurance industry in both executive and non-executive roles in Europe, Asia and Australia. He also has significant experience of risk committees which has been invaluable in the review and implementation of the Group's risk management framework.

### Gay Huey Evans

Ms Huey Evans has over 30 years of experience within the financial services industry, having held key positions in government and in a number of global financial and banking institutions. In addition to the financial expertise she brings to the Board, her experience at the FSA provides insight on the priorities and focus of the Group's lead regulator.

### Trevor Matthews

Mr Matthews has over 30 years of executive experience in the financial services industry. He has an outstanding track record of achievement in the insurance sector globally and brings to the Board in-depth operational and strategic knowledge of life assurance and financial services operations.

### Igal Mayer

Mr Mayer has had a long and diverse career at Aviva with an excellent track record of improving business performance. Most recently, he has led the restructuring of Aviva's European regional operations to strengthen the businesses and create a leaner cost base. He brings to the Board a truly international perspective and a detailed knowledge of the insurance industry.

### John McFarlane OBE

Mr McFarlane has substantial global listed company experience and an excellent track record spanning 37 years in the UK and international financial services industry, culminating in ten years as the highly successful CEO of ANZ (Australia and New Zealand Banking Group) and as a director of The Royal Bank of Scotland Group. He has extensive experience in banking, including investment, corporate and retail banking as well as, general management, insurance, strategy, risk and cultural change. His wide-ranging board and executive experience provides him with the requisite skills for his succession to the chairmanship of the Company and the Board upon Lord Sharman's retirement.

### Andrew Moss

Mr Moss has extensive experience in the financial services industry and a track record of successfully leading businesses through challenging economic conditions. He has successfully led the Group since 2007, and through his clear strategic vision and strong leadership skills he has strengthened the Company's position as one of the world's leading insurers.

### Patrick Regan

Mr Regan has extensive global experience in various executive functions within the insurance industry. He also has an excellent track record of driving change programmes and corporate actions to deliver improved profitability. With his significant financial experience and global perspective, he has helped to develop and execute the Group's strategy in a challenging macro-economic environment.

### Lord Sharman of Redlynch OBE

Lord Sharman has wide-ranging international experience in the financial services industry and a wealth of non-executive experience which includes numerous non-executive directorships and the chairmanship of various listed companies. He has an excellent track record of working with and leading diverse international businesses and has applied these skills to his chairmanship of the Company's Board.

### Leslie Van de Walle

Mr Van de Walle has had a career spanning over 20 years in senior management in addition to his experience as a non-executive director. He brings to the Board extensive marketing and brand knowledge together with a wealth of experience in growing and developing businesses. With his multi-sector background and strong analytical ability, he has contributed significantly to the deliberations of the Board.

### Russell Walls

Mr Walls has a strong financial background and significant international business experience. With his financial acumen, thorough, common sense approach and experience on the audit committees of a number of listed companies, he has provided an invaluable contribution to the discussions of the Board and of the Audit Committee, most recently in relation to the external audit tender.

### Scott Wheway

Mr Wheway has a wealth of business experience in the retail sector and has been a champion of excellent customer service. He has provided key insights into the Company's strategy of putting the customer at the heart of business. As the chairman of the Company's Remuneration Committee, he led the strategic review of executive remuneration within the Group and consulted closely with major investors to ensure that the Group's executive remuneration is aligned with stakeholder needs.

## The chairman and group chief executive

The respective roles of the chairman and group chief executive are set out in the Board's terms of reference. The chairman's priority is leadership of the Board and ensuring its effectiveness; the group chief executive's priority is the management of the Company. The chairman's commitment to the Company is two to three days per week and his main interests outside the Company are set out in his biographical details on page 90. During the year, the chairman of the Company, Lord Sharman of Redlynch, stepped down as a non-executive director of Reed Elsevier plc with effect from 20 April 2011 and as a non-executive director of BG Group plc with effect from 12 May 2011.

## Senior independent director

Under the Code the Board appoints one of the non-executive directors to act as senior independent director. Richard Goeltz has served as the senior independent director since January 2009. The role of the senior independent director is to provide a sounding board for the chairman and to serve as an intermediary for the other directors where necessary. His main responsibility is to be available to shareholders should they have concerns that they have been unable to resolve through normal channels, or when such channels would be inappropriate. The senior independent director is also responsible for leading the Board's discussion on the chairman's performance and on the appointment of a new chairman, when appropriate. During the year, the non-executive directors led by the senior independent director have twice met without the chairman present. Mr Goeltz led the process for the selection, assessment and appointment of the chairman designate, John McFarlane.

## Board effectiveness

The effectiveness of the Board is vital to the success of the Group and the Company undertakes a rigorous evaluation each year in order to assess how well the Board, its Committees, the directors and the chairman are performing. The aim is to improve the effectiveness of the Board and its Committees and the Group's performance. The process for 2011 was led by the chairman designate and supported by the group company secretary. The review was carried out by Boardroom Review, an independent consultancy with no other connection with the Company and focused on the Board's role and its approach to its work, the way in which the Board works together and the way in which the Board uses its time. Boardroom Review prepared a report based on interviews with the directors and the overall results of the evaluation will be incorporated into the Board's processes and activities for 2012.

The performance of the chairman was reviewed by the executive and non-executive directors. The chairman's evaluation was managed by the senior independent director who provided feedback to the chairman. As part of the chairman's evaluation, the non-executive directors met separately under the chairmanship of the senior independent director.

The Board evaluation process assessed the executive directors in their capacities as directors of the Company. They were evaluated in respect of their executive duties through a separate process whereby the chairman and the non-executive directors assessed the group chief executive and the group chief executive assessed the other executive directors.

The directors have concluded that the Board and its Committees operate effectively and agreed that the actions identified for improvement in previous reviews had been implemented. Additionally, the chairman has concluded that each director contributes effectively and demonstrates full commitment to his/her duties.

## Training and development

The Board believes strongly in the development of all of its employees and directors and it is a requirement of each director's appointment that they commit to continue their development. The form that this development takes is subject to individual director's requirements and the relevance of the training available.

During the year, directors attended a number of internal and external courses including training on Solvency II for the Board and the Audit Committee and on IFRS Phase II for members of the Audit Committee. There was a joint training session for members of the Risk and Audit Committees on the global corporate structure and the Risk Committee members also attended training on economic capital methodology and stress testing. Training sessions have also been built into the Board's and Committees' work plans for 2012. The Board made visits to the Group's businesses located in the UK during the year to gain a closer understanding of their operations.

The Board has a comprehensive induction programme for new non-executive directors which is tailored to their particular needs and which consists of several separate sessions over a number of months. These include presentations from key members of senior management, visits to the Group's main operating businesses, and meetings with the external auditor and one of the Company's corporate brokers. Further or follow-up meetings are arranged where a director requires a deeper understanding on a particular issue.

## Directors' attendance

The Company requires directors to attend all meetings of the Board and the Committees on which they serve and to devote sufficient time to the Company in order to perform their duties. The attendance of the directors at the Board meetings held in 2011 is shown in the table below and the attendance at Committee meetings is shown in the Committee reports.

### Board attendance 2011

Director	Number of meetings attended	Percentage attendance <sup>1</sup>
Mary Francis	15	100%
Richard Karl Goeltz	15	100%
Euleen Goh	13	87% <sup>2</sup>
Gay Huey Evans <sup>#</sup>	3	75% <sup>2</sup>
Michael Hawker	15	100%
Mark Hodges <sup>*</sup>	3	60% <sup>2</sup>
John McFarlane <sup>##</sup>	4	80% <sup>2</sup>
Trevor Matthews <sup>∞</sup>	1	100%
Igal Mayer <sup>**</sup>	14	100%
Andrea Moneta <sup>†</sup>	0	n/a
Andrew Moss	15	100%
Carole Pivnicka <sup>Ω</sup>	12	86% <sup>2</sup>
Patrick Regan	14	93% <sup>2</sup>
Lord Sharman	15	100%
Leslie Van de Walle	14	93% <sup>2</sup>
Russell Walls	15	100%
Scott Wheway	15	100%

<sup>\*</sup> Resigned on 2 June 2011

<sup>\*\*</sup> Appointed on 19 January 2011

<sup>†</sup> Resigned on 19 January 2011

<sup>#</sup> Appointed on 20 October 2011

<sup>##</sup> Appointed on 1 September 2011

<sup>∞</sup> Appointed on 2 December 2011

<sup>Ω</sup> Resigned on 1 December 2011

<sup>1</sup> This shows the percentage of meetings which the director attended during the year while a member of the Board

<sup>2</sup> The director was unable to attend Board meeting(s) due to prior commitments and the meetings being called at short notice

During 2011, there were 15 Board meetings held, of which, nine were scheduled Board meetings and six were additional Board meetings called at short notice. In addition the Board delegated responsibility for certain items to a Committee of the Board and six meetings by such a Committee were held at short notice during 2011.

The chairman and the non-executive directors met several times in the absence of the executive directors and the non-executive directors met in the absence of the chairman, including one meeting chaired by the senior independent director to appraise the chairman's performance.

### Board committees

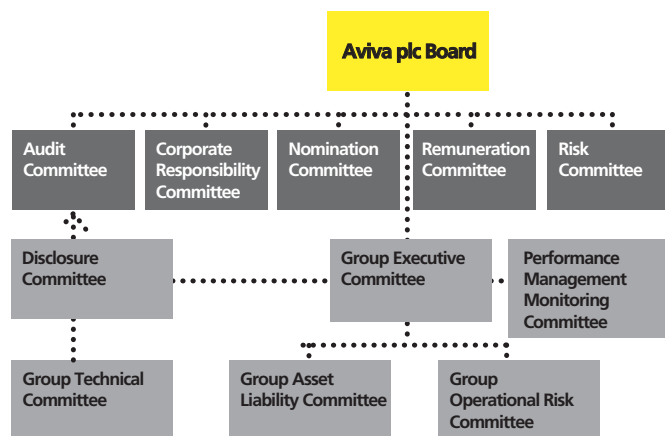

The Board has established the following standing Committees to oversee and debate important issues of policy and oversight outside the main Board meetings:

- Audit Committee;
- Corporate Responsibility Committee;
- Nomination Committee;
- Remuneration Committee; and
- Risk Committee.

Throughout the year the chairman of each Committee provided the Board with a summary of the key issues considered at the meetings of the Committees and the agendas and minutes of the meetings were circulated to the Board. The Committees operate within defined terms of reference which are available on the Company's website, [www.aviva.com/investor-relations/corporate-governance/terms-of-reference/](http://www.aviva.com/investor-relations/corporate-governance/terms-of-reference/), or from the group company secretary upon request. Board Committees are authorised to engage the services of external advisers as they deem necessary in the furtherance of their duties at the Company's expense.

Reports of the Committee chairmen are set out on pages 106 to 136.

### Aviva plc governance structure

### Conflicts of interest

In line with the Companies Act 2006, the Company's articles of association allow the Board to authorise potential conflicts of interest that may arise and to impose such limits or conditions as it thinks fit. The decision to authorise a conflict of interest can only be made by non-conflicted directors (those who have no interest in the matter being considered) and in making such a decision the directors must act in a way they consider in good faith will be most likely to promote the Company's success. The Board has established a procedure whereby actual and potential conflicts of interest are regularly reviewed and for the appropriate authorisation to be sought prior to the appointment of any new director or if a new conflict arises. During 2011 this procedure operated effectively.

### Risk management and internal control statement

The Board has overall responsibility for:

- determining the nature and extent of the significant risks it is willing to take in achieving its strategic objectives; and
- maintaining the Group's risk management and internal control systems and for reviewing their effectiveness.

To discharge this responsibility, the Board has established frameworks for risk management and internal control. The Group's systems of risk management and internal control play a key role in the management of risks that may impact the fulfilment of its objectives. Internal control facilitates effective and efficient operations, the development of robust and reliable internal reporting and compliance with laws and regulations. These systems are designed to manage, rather than eliminate, the risk of failure to achieve business objectives and can only provide reasonable and not absolute assurance against material misstatement or losses.

These systems are regularly reviewed and comply with the Turnbull Guidance (Internal Control: Revised Guidance for Directors) published by the Financial Reporting Council.

The Audit Committee, working closely with the Risk Committee, on behalf of the Board, last reviewed the effectiveness of the systems of risk management and internal control in March 2012, covering all material controls, including financial, operational and compliance controls and the risk management framework and processes. The necessary actions have been or are being taken to remedy any significant failings and weaknesses identified from these reviews. The Board confirms that there is an ongoing process for identifying, measuring, managing, monitoring and reporting the significant risks faced by the Group, which has been in place for the year under review and up to the date of approval of the Annual Report and Accounts.

The principal features of the systems of risk management and internal control and the methods by which the Board satisfies itself that these systems operate effectively are set out below.

### Control environment

The Group operates a 'three lines of defence' model. Primary responsibility for the application of the risk management framework – risk identification, measurement, management, monitoring and reporting – lies with business management (the first line of defence). Management is therefore responsible for implementing and monitoring the operation of the system of internal control and for providing assurance to the Group Executive Committee (GEC), the Audit Committee, the Risk Committee and the Board.

Support for and challenge of the completeness and accuracy of risk assessment, risk reporting and adequacy of mitigation plans are performed by the specialist risk function (the second line of defence). The design of the risk management framework is also primarily the responsibility of the second line of defence. The risk function operates globally with teams in all major regions and business units. Independent and objective assessment on the robustness of the risk management framework and the appropriateness and effectiveness of internal control is provided by the Internal Audit (the third line of defence) to the Audit and Risk Committees, regional and business unit audit committees, the Board and the GEC.

### Risk governance and oversight

The Board is responsible for setting the Group's risk appetite and monitoring the establishment and operation of prudent and

effective controls in order to assess and manage risks associated with the Group's operations.

The Risk Committee assists the Board in its oversight of risk and risk management across the Group. The Risk Committee reviews the Group's risk appetite and future risk strategy and makes recommendations on risk appetite to the Board. It also reviews the risk profile against the risk appetite, reviews the principal risk policies, approves any material changes to these policies, and reviews the Group's internal models and stress and scenario testing. The oversight of the design, completeness and effectiveness of the risk management framework relative to the Group's activities is performed on behalf of the Board by the Risk Committee. This includes the oversight of the quality of the risk function and the effectiveness of risk reporting. The Risk Committee's oversight covers all aspects of risk including market, credit, liquidity, general insurance, life insurance, operational, reputational and regulatory risks.

The Audit Committee, working closely with the Risk Committee, is responsible for assisting the Board in discharging its responsibilities for the integrity of the Company's financial statements, the effectiveness of the system of internal control and for monitoring the effectiveness, performance and objectivity of the internal and external auditors.

These Committees receive reports on risk management and internal controls and consider where relevant whether appropriate actions have been undertaken as well as monitoring the completion of any Group-level actions.

These Committees have clearly defined terms of reference and full reports for these Committees are set out on pages 108 to 112.

The parts of the governance framework relating to the operational management of the Group's businesses include limits on the authority delegated by the Board in respect of matters which are necessary for the effective day-to-day running and management of the business. The Board delegates day-to-day management, including risk management, to the group chief executive, who has delegated operational aspects of day-to-day management to executives within the Group through a delegated authority framework. The GEC assists the group chief executive with regard to strategic, monitoring and control aspects of day-to-day management including the development and implementation of group strategies, plans and policies, the monitoring of operational and financial performance, the assessment and control of finance, business and operational risks and the maintenance and ongoing development of a robust control framework and environment.

In turn, the GEC has established the Asset Liability Committee (ALCO) and the Operational Risk Committee (ORC) to assist with the execution of its duties. The ALCO provides a key focus on business and financial risks and the ORC on operational risks. Together, the ORC and ALCO provide the GEC with a mechanism to oversee the implementation of Aviva's risk strategy and risk policies, providing assurance that key risks significant to the achievement of the Group's business objectives are adequately identified, measured, managed, monitored and reported. The Board Committees also monitor the Group's risk profile relative to its risk appetite and provide a focal point for the escalation of significant risk exposures and ensure mitigating actions are being taken when risks are, or expected to move, out of appetite.

The Board Committees are in turn supported by similar governance structures in the regions and markets. The group chief risk officer is a member of the GEC and has a reporting line to the group chief executive and to the Risk Committee with access to the Risk Committee chairman, assuring independence of the function. Similarly, the regional chief risk officers are members of the regional executive committees.

The Performance Management Monitoring Committee, led by the group chief executive, oversees regional performance and provides a forum for review and challenge on strategic, operational and financial performance, including capital and risk management.

## Control activities

The Group has a set of formal risk management and internal control policies that facilitate a consistent approach to the management of all the risks across all the businesses and locations in which the Group operates. These risk policies define the Group's appetite for different risk types and set out risk management and control requirements for the Group's worldwide operations. The risk policies also set out the roles and responsibilities of businesses, regions, risk policy owners and the risk oversight committees.

As the business responds to changing market conditions and customer needs, we regularly monitor the appropriateness of our risk policies to ensure they remain up to date. This helps to provide assurance to the various risk oversight committees that there are appropriate controls in place for all our core business activities, and that the processes for managing risk are understood and followed consistently across our global businesses. In preparation for Solvency II, the Company reviewed the existing risk management policies and enhanced the risk management and internal control framework through the introduction of updated risk policies and business standards which took effect at the beginning of 2012.

Businesses regularly review the risks identified against the tolerances specified in the risk policies, and where risks are outside of tolerance, action plans are required. Similarly, controls are regularly reviewed for effectiveness and remediation actions are implemented where necessary.

The Audit Committee receives regular reports from management to assist with its review and assessment of the effectiveness of the system of internal control including financial reporting. A governance certification process is conducted throughout the Group in support of this review. The necessary actions have been or are being taken to remedy significant failings and weaknesses identified from these reviews.

The chief executive and chief financial officer of each region have certified compliance with the Group's governance, internal control and risk management requirements, supported by consideration of evidence from all three lines of defence. They have certified that all the key inherent risks within the business have been identified and assessed and that the business operates in a manner which conforms to the minimum standards outlined in Group risk policies as well as the business ethics code. The chief executives and chief financial officers in the regions have also confirmed that there is a governance structure that is appropriate to oversee risk management activities and that the business has complied with the terms of its delegated authority (cascaded by the Group) and has operated a delegated authority structure that is appropriate to oversee its activities.

Any key risks not previously identified, control weaknesses or non-compliance with the Group policy framework or local delegation of authority, must be highlighted as part of this process.

The chief risk officers of each region have also certified their responsibility for providing effective challenge and independent oversight of the business management of all risks and of the system of internal control. The chief risk officers have certified in each region that they have reviewed, and where appropriate, challenged the completeness, appropriateness and adequacy of risk assessments (irrespective of risk appetite), risk reporting and the adequacy of risk mitigation plans, including proactively advising senior management of emerging risk issues. They have

also certified that they have monitored the implementation of, and compliance with, the risk policies and standards, providing challenge and escalating all material breaches of limits, appetite or policy to the appropriate forum as necessary.

The chief risk officer reports regularly to the GEC and Risk Committee on the key risks and the Group's position relative to its risk appetite.

The Group risk function has reviewed any matters identified by regions in their certification and also assessed the risk and control issues that arose and were reported during the year by the three lines of defence.

### Internal controls over financial reporting

A Group Reporting Manual including International Financial Reporting Standards (IFRS) and Market Consistent Embedded Value (MCEV) requirements has been defined and rolled out across the Group. A Financial Reporting Control Framework (FRCF) is in place across the Group. FRCF relates to the preparation of reliable financial reporting and preparation of local and consolidated financial statements in accordance with IFRS and MCEV. FRCF also ensures compliance with the requirements of the Sarbanes-Oxley Act 2002.

The FRCF process follows a risk-based approach, with management identification, assessment (documentation and testing), remediation as required, reporting and certification over key financial reporting-related controls. Management regularly undertakes quality assurance procedures over the application of the FRCF process and FRCF controls. The results of the FRCF process are signed off by business unit and regional chief executives and chief financial officers and at a Group level by the group chief executive and group chief financial officer.

The Disclosure Committee, which has the role of overseeing the design and effectiveness of the Group's disclosure controls, for both financial and non-financial information, evaluates the Group's disclosure controls and reviews and endorses the Group's key periodic external reports, including the consolidated financial statements. This Committee is chaired by the chief financial officer and reports to the Audit Committee. A Group Technical Committee, reporting to the Disclosure Committee is in place, which presides over significant technical matters and reviews technical decisions including key judgements, issues and application of assumptions.

### Risk management

A Risk Management Framework (RMF), designed to identify, measure, manage, monitor and report significant risks to the achievement of business objectives is in place and embedded throughout the Group. The RMF is codified through the risk policies and standards described above (under control activities) and includes a cascade of the Board-approved risk appetite by risk type and to business units. The RMF also sets risk limits for individual risks.

The risk management process has been in place for the year under review and up to the date of approval of the Company's Annual Report and Accounts.

Further details on procedures for the management of risk operated by the Group are given in the section on risk management set out on pages 61 to 68.

### Internal Audit

Internal Audit reports to the Board (primarily via the Audit and Risk Committees) and management on the effectiveness of the Company's system of internal control and the adequacy of this system to manage business risk and to safeguard the Group's assets and resources. Internal Audit is fully centralised and each

country/region head of Internal Audit has a direct reporting line to the chief audit officer (with the exception of Delta Lloyd and some of the Group's joint ventures). The chief audit officer reports to the group chief executive and to the chairman of the Audit Committee.

The effectiveness of Internal Audit is reviewed annually by the Audit Committee, against guidance criteria provided by the Institute of Chartered Accountants in England and Wales and by the Institute of Internal Auditors (IIA). An independent review is conducted every five years as required by the IIA standards. The last independent review was conducted in 2008.

Throughout 2011, Internal Audit, through the chief audit officer, provided quarterly reporting on issues arising and the status of action items to the Audit Committee and Risk Committee. Similar reporting is undertaken on a regional and business unit basis to local executive management and local audit committees.

### Share capital and control

The information required to be provided by the directors pursuant to section 992 of the Companies Act 2006 can be found on page 93 of the Directors' Report.

### Communication with shareholders

The Company places considerable importance on communication with shareholders and engages with them on a wide range of issues.

The Group has an ongoing programme of dialogue and meetings between the executive directors and institutional investors, fund managers and analysts. At these meetings a wide range of relevant issues including strategy, performance, management and governance are discussed within the constraints of information already made public.

The Company's investor relations department is dedicated to facilitating communication with institutional investors. The directors consider it important to understand the views of shareholders and, in particular, any issues which concern them. The Board receives reports on matters that have been raised with management at the regular meetings held with the Company's major investors. During the year, the chairman and the senior independent director met with some of the Company's major institutional investors. In addition, the senior independent director is available to meet with major investors to discuss any areas of concern that cannot be resolved through normal channels of investor communication, and arrangements can be made to meet with the senior independent director through the group company secretary. Similarly, arrangements can be made for major investors to meet with newly appointed directors. The Board also consults with shareholders in connection with specific issues where it considers appropriate. In 2011 the Board, through the Remuneration Committee chairman, consulted with institutional investors on executive remuneration and the introduction of new share plans which were put to shareholders at the 2011 AGM.

The Board is equally interested in the concerns of private shareholders and, on its behalf, the group company secretary oversees communication with this group of investors. The Company has a dedicated email address to which questions can be sent, in addition to the facility on the Company's website, which are both highlighted in the shareholder information section of the 2012 Notice of AGM. These can be used by shareholders to put relevant questions, related to the business of the meeting, to the directors. These are considered to be particularly helpful for those shareholders who are unable to attend the AGM. All material information reported to the regulatory news service

is simultaneously published on the Company's website, allowing all shareholders full access to material Company announcements.

The Company has taken full advantage of the provisions within the Companies Act 2006 allowing communications to be made electronically to shareholders where they have not requested hard copy documentation. As a result, the Company's website has become the primary method of communication for the majority of its shareholders. Details of the information available for shareholders on the website can be found in the Shareholder Services section on page 367 and the Shareholder Services section of the website at [www.aviva.com/shareholderservices](http://www.aviva.com/shareholderservices).

The Company's AGM provides a valuable opportunity for the Board to communicate with private shareholders. At the meeting, the Company complies with the Code as it relates to voting, the separation of resolutions and the attendance of Board Committee chairmen. Whenever possible, all directors attend the AGM and shareholders are invited to ask questions related to the business of the meeting during the meeting and have an opportunity to meet with the directors following the conclusion of the meeting. In line with the Code, details of proxy voting by shareholders, including votes withheld, are made available on request and are placed on the Company's website following the meeting.

The Company's Annual Report and Accounts, together with the Company's half-year report, interim management statements, reports on Form 20F (for filing with the United States Securities and Exchange Commission) (SEC) and other public announcements, are designed to present a balanced and understandable view of the Group's activities and prospects and are available on the Company's website, [www.aviva.com/investor-relations/results-and-reports](http://www.aviva.com/investor-relations/results-and-reports). The chairman's statement, the group chief executive's review and the Performance Review provide an assessment of the Group's affairs and they will be supported by a presentation to be made at the AGM, which can also be viewed by webcast on the Company's website at [www.aviva.com/agm](http://www.aviva.com/agm) after the meeting.

## Aviva Investors

Aviva Investors, the Group's core asset management company, considers good governance to play an important role in protecting and enhancing shareholder value. In keeping with the Group's values, Aviva Investors looks to act as a responsible investor, monitors the governance of the companies in which it invests and seeks to maintain an effective dialogue and engagement with companies on matters which may affect shareholder interests and the future performance of those companies.

Aviva Investors applies and complies with the UK Stewardship Code maintained by the Financial Reporting Council and has published detailed Stewardship and Corporate Governance and Voting Policies as part of its investment strategy, which underpin its approach to engaging and voting at Company general meetings. These policies encompass social, environmental and ethical issues and are applied pragmatically after careful consideration of all relevant information. In addition, Aviva Investors makes detailed voting reports available to clients, and provides some summary reporting on its website, [www.avivainvestors.com](http://www.avivainvestors.com).

## New York Stock Exchange listing requirements

The Company was admitted to the New York Stock Exchange (NYSE) on 20 October 2009 and its ordinary shares are traded as American Depositary Shares. As a foreign company listed on the NYSE, the Company is required to comply with the NYSE corporate governance rules to the extent that these rules apply to foreign private issuers. As a foreign private issuer, the Company is therefore required to comply with NYSE Rule 303A.11 by making a disclosure of the differences between the Company's corporate governance practices and the NYSE corporate governance rules applicable to US companies listed on the NYSE. These differences are summarised below:

### Independence criteria for directors

Under the NYSE listing rules applicable to US companies, independent directors must form the majority of the board of directors. The Code requires that at least half the Board, excluding the chairman, should comprise independent non-executive directors, as determined by the Board. The NYSE listing rules for US companies also state that a director cannot qualify as independent unless the Board affirmatively determines that the director has no material relationship with the company, and the NYSE rules prescribe a list of specific factors and tests that US companies must use for determining independence. The Code sets out its own criteria that may be relevant to the independence determination, but permits the Board to conclude affirmative independence notwithstanding the existence of relationships or circumstances which may appear relevant to its determination, so long as it states its reasons.

### Non-executive director meetings

Pursuant to the NYSE listing standards, the non-management directors of each listed company must meet at regularly scheduled executive sessions without management and, if that group includes directors who are not independent, listed companies should at least once a year schedule an executive session including only independent directors. Under the Code, the chairman should hold meetings with the non-executive directors without the executive directors present.

### Committees

Under the NYSE standards, US companies are required to have a nominating/corporate governance committee. In addition to identifying individuals qualified to become Board members, this committee must develop and recommend to the Board a set of corporate governance principles. The Company's Nomination Committee's terms of reference do not require the committee to develop and recommend corporate governance principles for the Company.

### Code of business conduct and ethics

The NYSE listing standards require US companies to adopt and disclose a code of business conduct and ethics for directors, officers and employees, and promptly disclose any waivers of the code for directors or executive officers. While the Company does not strictly follow this NYSE standard applicable to US companies, it is committed to ensuring that its business is conducted in all respects according to rigorous ethical, professional and legal standards. The Company has adopted a Business Ethics Code to which all employees are bound and a Code of Ethics for senior management, to comply with the Sarbanes-Oxley Act 2002.

### Shareholder approval of equity-compensation plans

Under the NYSE listing standards, shareholders must be given the opportunity to vote on all equity-compensation plans and 'material revisions' to those plans, with limited exceptions.

Under the Code, shareholder approval is also necessary for certain equity-compensation plans and 'significant changes' thereto, subject to certain exceptions. The Code does not provide a detailed definition or explanation of what are considered to be 'significant changes', in contrast to the detailed definition of 'material revisions' provided by the NYSE.

### Directors' responsibilities

The directors are required to prepare financial statements for each accounting period that comply with the relevant provisions of the Companies Act 2006 and the IFRS as adopted by the European Union (EU), and which present fairly the financial position, financial performance and cash flows of the Company and the Group at the end of the accounting period. A fair presentation of the financial statements in accordance with IFRS requires the directors to:

- select suitable accounting policies and verify that they are applied consistently in preparing the accounts, on a going concern basis unless it is inappropriate to presume that the Company and the Group will continue in business;
- present information, including accounting policies, in a manner that is relevant, reliable, comparable and understandable;
- provide additional disclosures when compliance with the specific requirements in IFRS is insufficient to enable users to understand the impact of particular transactions, other events and conditions on the Company and the Group's financial position and financial performance; and
- state that the Company and the Group have complied with applicable IFRS, subject to any material departures disclosed and explained in the financial statements.

The directors are responsible for maintaining proper accounting records, which are intended to disclose with reasonable accuracy, at any time, the financial position of the Company and the Group. They are ultimately responsible for the system of internal control maintained by the Group for safeguarding the assets of the Company and the Group and for the prevention and detection of fraud and other irregularities. Further details of the system of internal controls maintained by the Group are more fully described on pages 101 to 103. The Directors are also responsible for the preparation of the Company's Annual Report.

### Directors' responsibility statement pursuant to Disclosure and Transparency Rule 4.1.12

Each of the directors listed on pages 90 to 91 confirms that, to the best of their knowledge:

- (a) the Group and Company financial statements in this report, which have been prepared in accordance with IFRS as adopted by the EU, International Financial Reporting Interpretations Committee's interpretation and those parts of the Companies Act 2006 applicable to companies reporting under IFRS, give a true and fair view of the assets, liabilities, financial position and results of the Company and of the Group taken as a whole; and
- (b) the Directors' Report includes a fair review of the development and performance of the business and the position of the Company and the Group taken as a whole, together with a description of the principal risks and uncertainties that they face.

By order of the Board

**Andrew Moss**  
Group chief executive  
7 March 2012

**Pat Regan**  
Chief financial officer

### Going concern

The Group's business activities, together with the factors likely to affect its future development, performance and position are set out in the Essential Read on pages 2 to 18, which includes the section on Aviva worldwide on pages 16 to 17. The Performance review is set out on pages 20 to 70 and includes the Risk and capital management on pages 61 to 68. In addition, the financial statements sections include notes on the Group's borrowings (note 48), its contingent liabilities and other risk factors (note 51); its capital structure and position (note 54); management of its risks including market, credit and liquidity risk (note 56), and derivative financial instruments (note 57).

The Group has considerable financial resources together with a diversified business model, with a spread of businesses and geographical reach. As a consequence, the directors believe that the Group is well placed to manage its business risks successfully.

After making enquiries, the directors have a reasonable expectation that the Company and the Group as a whole have adequate resources to continue in operational existence for the foreseeable future. For this reason, they continue to adopt the going concern basis in preparing the financial statements.

# Nomination Committee report

This report provides details of the role of the Nomination Committee and the work it has undertaken during the year.

## Committee role and responsibilities

The Board strongly believes that good governance and strong, responsible, balanced leadership by the Board are critical to creating long-term shareholder value and business success. The Committee assists the Board by reviewing the composition of the Board regularly and conducting a rigorous and transparent process when recommending or renewing the appointment of directors to the Board. The key responsibilities of the Committee are:

- evaluating and reviewing the balance of skills, knowledge, and experience of the Board, taking into account the Company's risk appetite and strategy;
- monitoring succession plans for the appointment of non-executive directors, the group chief executive and other executive directors to the Board;
- identifying and nominating suitable candidates for appointment to the Board, including chairmanship of the Board and its Committees, against a specification of the role and capabilities required for the appointment;
- assessing the independence of each of the non-executive directors including any conflicts of interest;
- reviewing the external interests and time commitments of the directors to ensure that each has sufficient time to undertake his/her duties to the Company; and
- approving a report on the Committee's activities for inclusion in the Company's Annual Report and Accounts.

The full terms of reference for the Committee can be found on the Company's website, [www.aviva.com/terms-of-reference](http://www.aviva.com/terms-of-reference) and are also available from the group company secretary.

## Committee membership and attendance

The following directors served on the Committee during the year:

Member	Period	
	From	To
Lord Sharman (Chairman)	25 January 2006	To date
Mary Francis	2 December 2009	To date
Richard Karl Goeltz	29 July 2008	To date
John McFarlane	1 September 2011	To date
Andrew Moss*	12 July 2007	To date
Russell Walls	23 January 2007	To date

\* The Nomination Committee notes that the UK Corporate Governance Code does not preclude the group chief executive from membership of the Committee. The Committee believes that the input of the group chief executive is essential and invaluable to the discussions of the Committee and that this is best obtained through his membership of the Committee. Any concerns about his membership are allayed by the predominance of independent non-executive directors on the Committee.

### Attendance

Committee member	Number of meetings attended	Percentage attendance <sup>a</sup>
Lord Sharman (Chairman)	6	100%
Mary Francis	6	100%
Richard Karl Goeltz	6	100%
John McFarlane <sup>#</sup>	1	100%
Andrew Moss	6	100%
Russell Walls	6	100%

<sup>#</sup> John McFarlane attended all Committee meetings following his appointment in September 2011.

<sup>a</sup> This shows the percentage of meetings which the Committee member attended during the year while a member of the Committee.

The Committee met on six occasions in 2011, of which three were scheduled Committee meetings and three were additional Committee meetings called at short notice. The members' attendance record is set out above. The group company secretary acts as the secretary to the Committee. Members of the Committee take no part in any discussions concerning their own circumstances. The chairman of the Committee reports to

meetings of the Board on the Committee's work and the Board receives a copy of the agenda and the minutes of each meeting of the Committee.

## Committee activities during 2011

The chart below shows how the Committee allocated its time during 2011.

Nomination Committee – allocation of agenda time %

The Committee continued its review of the Company succession plans for appointments to the Board, to ensure that an appropriate balance of skills and experience was maintained and that there was progressive refreshing of the Board. The Company chairman is due to retire in 2012 and two non-executive directors are due to retire in 2013 in line with the Code on the basis of their completion of nine years of service. The Committee recommended the appointment of two new independent non-executive directors to strengthen the Board in advance of their retirement and to aid future succession planning.

John McFarlane was appointed to succeed Lord Sharman as the Company's chairman following his retirement. The Committee prepared a comprehensive candidate search brief including an assessment of the time commitment expected. The search for a suitable candidate began within the Group before an external search agency, The Zygos Partnership, was retained. Several interviews were conducted with the chairman, senior independent non-executive director, Committee members and the group chief executive and, additionally, executive and non-executive directors met with the preferred candidate, before the Committee recommended Mr McFarlane's appointment to the Board. The senior independent director chaired the Committee and the Board when it was dealing with the appointment of the successor to the chairmanship of the Company.

Gay Huey Evans was appointed to succeed Carole Piwnica, following her retirement from the Board and as the chairman of the Corporate Responsibility Committee. A candidate search was conducted internally prior to the appointment of an external agency, JCA Group, and the Committee undertook a thorough review before recommending Ms Huey Evans' appointment to the Board.

In February 2012, following a thorough candidate search by an external agency, JCA Group, Glyn Barker was appointed as an independent non-executive director.

The Committee strongly believes that diversity throughout the Group and at Board and senior management level is a key driver of success and brings a broader, more rounded perspective to decision-making and risk management, making the Board more effective. During the year, candidate searches were conducted and Board appointments were made on merit, against the criteria identified by the Committee having regard to the benefits of diversity on the Board, including gender.

The Board wholly supported Lord Davies' report, "*Women on Boards*", and its recommendations and the Group has embedded gender KPIs throughout the talent management process. Currently three female directors make up 20% of the Board and it is intended that the Company will maintain a minimum of 25% female representation on the Board by 2013. At the date of this report, 20% of senior executives in the Company are female. It is the Company's intention to increase this number as it is recognised that a higher number of women in senior management will create a stronger talent pipeline and is better for business.

### Committee performance and effectiveness

The Board undertook an annual review of the Committee's performance and effectiveness and the results of the review will be incorporated into the Committee's processes and activities for 2012.

### Nomination Committee Report

This Nomination Committee Report was reviewed and approved by the Board on 7 March 2012.

**Lord Sharman of Redlynch OBE**  
Chairman, Nomination Committee

# Audit Committee report

This report provides details of the role of the Audit Committee and the work it has undertaken during the year.

## Committee role and responsibilities

The purpose of the Committee is to assist the Board in discharging its responsibilities for the integrity of the Group and Company's financial statements, the assessment of the effectiveness of the system of internal control and monitoring the effectiveness and objectivity of the internal and external auditors. The key responsibilities of the Committee are:

- reviewing the significant issues and judgements of management, and the methodology and assumptions used, in relation to the Group's financial statements and formal announcements on the Company's financial performance;
- reviewing the Group's going concern assumptions and the reserving position relating to the Group's life assurance and general insurance operations;
- assessing the effectiveness of the Group's system of internal control, including financial reporting and the Internal Audit function;
- considering and making recommendations to the Board on the appointment, reappointment, dismissal or resignation and remuneration of the external auditor; and
- assessing the independence and objectivity of the external auditor and approving and monitoring the application of the external auditor policy/business standard.

The full terms of reference for the Committee can be found on the Company's website, [www.aviva.com/terms-of-reference](http://www.aviva.com/terms-of-reference), and are also available from the group company secretary.

## Committee membership and attendance

The following independent non-executive directors served on the Committee during the year:

Member	Period	
	From	To
Russell Walls (Chairman)	1 July 2004	To date
Mary Francis	1 January 2007	To date
Richard Karl Goeltz	1 July 2004	To date
Euleen Goh	1 January 2009	To date
Michael Hawker	1 September 2011	To date

## Attendance

Committee member	Number of meetings attended	Percentage attendance <sup>¶</sup>
Russell Walls (Chairman)	11	100%
Mary Francis	11	100%
Richard Karl Goeltz	11	100%
Euleen Goh	11	100%
Michael Hawker <sup>¶</sup>	4	100%

¶ Michael Hawker attended all Committee meetings following his appointment.

¶ This shows the percentage of meetings which the Committee member attended during the year while a member of the Committee.

The Committee met on 11 occasions in 2011, of which eight were scheduled Committee meetings and three were additional Committee meetings called at short notice. The members' attendance record is set out above. In addition, the Committee held separate meetings with members of senior management and the external auditors to discuss issues relevant to the Committee and for the purpose of training. The group company secretary acts as the secretary to the Committee.

The group chief executive, chief financial officer, chief audit officer, chief risk officer and the external auditor normally attend, by invitation, all meetings of the Committee. Other members of senior management are also invited to attend as appropriate to present reports. At the beginning of each scheduled Committee

meeting, a private session is held by Committee members to discuss issues to be raised with management in the meeting. For part of that session, the Committee meets privately with senior management and separately with the chief audit officer to raise relevant issues. The Committee members also meet privately with the chief audit officer and the external auditor after the majority of meetings to follow up on particular issues. The chairman of the Committee reports to the subsequent meeting of the Board on the Committee's work and the Board receives a copy of the agenda and the minutes of each meeting of the Committee.

In performing its duties, the Committee has access to the services of the chief audit officer, the group company secretary and external professional advisers. Keith Nicholson, a former partner at KPMG LLP, acted as an external adviser to the Committee during the year.

## Committee expertise

The Committee members have significant financial experience and expertise.

Russell Walls, a Fellow Chartered Certified Accountant, is a former group finance director of BAA plc, Wellcome plc and Coats Viyella plc. Richard Goeltz is a former chief financial officer of American Express Company and NatWest Group plc and a former member of the Accounting Standards Board. Euleen Goh, a Chartered Accountant and member of the Chartered Institute of Taxation, is a former financial controller of Pontiac Land and chief executive of Standard Chartered Bank, Singapore. Michael Hawker, a Senior Fellow of the Financial Services Institute of Australasia, is a former chief executive and managing director of Insurance Australia Group.

The Board is satisfied that these directors have 'recent and relevant financial experience' as recommended by the Code and the Board has also determined that they are audit committee financial experts for the purposes of section 407 of the Sarbanes-Oxley Act 2002.

## Committee activities during 2011

The work of the Committee follows an agreed annual work plan and principally falls under three main areas: financial statements and accounting policies; internal control; and the oversight of internal and external audit. The chart below shows how the Committee allocated its time during 2011.

## Audit Committee – allocation of agenda time %

Financial reporting	22
External audit, auditor engagement and policy	23
Internal audit and controls	18
Financial reporting control framework and financial reporting developments	22
Others (including governance, tax, treasury and dividends)	15

## Financial statements and accounting policies

In conjunction with members of management and the internal and external auditors, the Committee reviewed the Company's financial announcements, including the Annual Report and Accounts to shareholders and associated documentation, the half-year results and the interim management statements. The Committee placed particular emphasis on their fair presentation and the reasonableness of the judgemental factors and

appropriateness of significant accounting policies used in their preparation.

During the year, the Committee considered the treatment of the sale of RAC, and the deconsolidation of Delta Lloyd following the partial disposal of the Group's holding in Delta Lloyd, in the Company's accounts and the accounting assumptions applied to the results. It also considered the fair value of holdings of Group investments. In November, the Committee considered in detail the revised financial statements which were filed in the US in connection with the Company's issue of \$400m hybrid debt in the US retail market and the disclosures made by the directors in the prospectus and prospectus supplement. The Committee was satisfied with the due diligence, control processes and verification exercise which had been undertaken by management, and with accounting policies and judgements used in preparing the revised accounts.

### Internal control

Each quarter, the Committee received a report from the chief audit officer concerning the Company's system of internal control, including any significant new issues and actions taken on previously reported issues. During 2011, Internal Audit carried out assurance reviews over inherent risks throughout the Group. Reviews were focused on, but not limited to, areas such as financial risk management, governance and oversight of the Group, the Group compliance framework and major projects including Solvency II and the Aviva Ireland Transformation Programme.

Twice during the year, the Committee received reports on the adequacy of the Group's life assurance and general insurance reserves. The Committee also considered in detail the adequacy of controls over a number of Group programmes and projects, including the implementation of the Solvency II programme and associated internal legal entity restructurings and the rationalisation of the 12 UK general insurance underwriting entities into one main UK underwriter (One GI project).

The Committee reported to the Board regarding the effectiveness of the Group's overall risk management and internal control systems including the risk management system in relation to the financial reporting process. The Committee worked closely with the Risk Committee in its overall review of the Company's systems of risk management and internal control.

The system of internal control also extends to the Group's major business units, each of which has an audit committee that provides an oversight role for its business. Membership of these local audit committees is mostly comprised of non-executive directors. The chief audit officer attended regional and business unit audit committee meetings throughout the year and reported back on their effectiveness to the Committee. During 2011 the members of the Committee attended several regional and business unit audit committee meetings, including those in Aviva Investors, France, Italy, the UK, the US, Hong Kong and Singapore.

In addition, the chairs of the Aviva US and Aviva UK audit committees, and senior management from Aviva Investors, presented to the Committee during the year, giving the Committee a deeper understanding of relevant local issues and the ability to assess the effectiveness of the system of internal control and the effectiveness and objectivity of the internal audit functions in those businesses. The programme of attendance at regional and business unit audit committee meetings and presentations by regional and business unit audit committee chairmen will continue during 2012. The chairs of the regional and business unit audit and risk committees met in early December in a forum which was initiated to align the committees on

Solvency II and the regulatory framework. Revised terms of reference for local audit committees were also discussed and implemented.

### Internal audit

The Committee reviewed, approved and monitored the annual Internal Audit plan and the effectiveness of the Internal Audit function. The level of resources, budget and functional plan for Internal Audit and the remuneration of the chief audit officer were also reviewed and approved by the Committee.

### External auditor

Ernst & Young has been the external auditor of the Company since 2001, having previously been the auditor of Norwich Union plc. Ernst & Young also currently audits all significant subsidiaries of the Group.

### Effectiveness

During the year, the Committee performed its annual review of the independence, effectiveness and objectivity of the external auditor, assessing the audit firm, the audit partner and audit teams. The process was conducted by means of a questionnaire, completed Group-wide by members of senior management and members of the Group's finance community and the Committee. The questionnaire sought opinions on the importance of certain criteria and the performance of the external auditor against those criteria. Based on this review, the Committee concluded that the audit service of Ernst & Young was fit for purpose and provided a robust overall examination of the Group's business and the risks involved.

### Audit tender

In order to ensure good corporate governance and that the services of the external auditor remained of the highest quality, the Audit Committee recommended that the provision of external audit services be put to tender in 2011. Following a transparent and competitive tender, including presentations from all candidate firms and discussions with management, the Audit Committee recommended to the Board of directors that PricewaterhouseCoopers LLP be appointed to replace Ernst & Young as the external auditor of the Aviva Group commencing with the 2012 financial year.

### Independence

The Committee reviewed a formal letter provided by the external auditor confirming its independence and objectivity within the context of applicable regulatory requirements and professional standards. In line with the APB Ethical Standards for Auditors, the Committee considered and agreed the rotation of the external audit partner within Ernst & Young LLP in 2012. However, given the subsequent decision to appoint PricewaterhouseCoopers LLP as the Group's external auditor commencing with the 2012 financial year, the rotation of the Ernst & Young LLP audit partner will not occur.

In line with the Company's adoption of the revised risk management framework, the existing external auditor policy was superseded by the external auditor business standard, which became effective on 1 January 2012. The principles of the standard are the same as those of the external auditor policy and are aimed at safeguarding and supporting the independence and objectivity of the external auditor. The standard is in full compliance with all UK, US and International Federation of Accountants (IFAC) rules.

The external auditor business standard also regulates the appointment of former audit employees to senior finance positions in the Group and sets out the approach to be taken

by the Group when using the non-audit services of the principal external auditor. It distinguishes between those services where an independent view is required and that should be performed by the external auditor (such as statutory and non-statutory audit and assurance work), prohibited services where the independence of the external auditor could be threatened and it must not be used, and other non-audit services where the external auditor may be used. Non-audit services where the external auditor may be used include: non-recurring internal controls and risk management reviews (i.e. excluding outsourcing of internal audit work), advice on financial reporting and regulatory matters, due diligence on acquisitions and disposals, project assurance and advice, tax compliance services and employee tax services.

The Committee received a quarterly report of compliance against the external auditor policy which applied during 2011 and will receive a quarterly report against the external auditor business standard in the future.

#### **Audit fees**

The Group paid £20.0 million to Ernst & Young LLP for audit services in 2011, relating to the statutory audit of the Group and Company financial statements and the audit of Group subsidiaries and associates pursuant to legislation (2010: £18.6 million). The fees for other services, which included MCEV supplementary reporting, advice on accounting and regulatory matters, reporting on internal controls, reporting on the Group's Individual Capital Assessment, and work on capital transactions, were £8.5 million (2010: £7.0 million), giving a total fee to Ernst & Young LLP of £28.5 million (2010: £25.6 million).

The Group paid £2.4 million to Ernst & Young LLP in relation to other non-audit services. This included £0.9 million in relation to two risk management effectiveness reviews. In line with the External Auditor Policy, the Audit Committee satisfied itself that for these engagements, robust controls (including appropriate levels of review) were in place to ensure that Ernst & Young LLP's objectivity and independence was safeguarded, and concluded that it was in the interests of the Company to purchase these services from Ernst & Young LLP due to its specific expertise. Further details are provided in note 12 to the consolidated IFRS financial statements.

In addition, the Group engaged Ernst & Young LLP to provide assurance on the Group's Corporate Responsibility Report.

#### **Committee performance and effectiveness**

The Committee undertook an annual review of its performance and effectiveness. The review concluded that overall the Committee was effective in carrying out its duties.

#### **Audit Committee Report**

This Audit Committee Report was reviewed and approved by the Board on 7 March 2012.

**Russell Walls**  
Chairman, Audit Committee

This report provides details of the role of the Risk Committee and the work it has undertaken during the year.

## Committee role and responsibilities

The Committee assists the Board in providing leadership, direction and oversight of the Group's management of risk. The key responsibilities of the Committee are:

- reviewing the Group's risk appetite and future risk strategy and making recommendations on risk appetite to the Board;
- reviewing the Group's risk profile against its risk appetite and strategy and reviewing the drivers of changes, if any, in the Group's risk profile;
- reviewing the design, completeness and effectiveness of the risk management framework relative to the Group's activities;
- assessing the adequacy and quality of the risk management function and the effectiveness of risk reporting within the Group; and
- working with the Remuneration Committee to ensure that risk is considered in setting the overall remuneration policy for the Group.

The full terms of reference for the Committee can be found on the Company's website, [www.aviva.com/terms-of-reference](http://www.aviva.com/terms-of-reference) and are also available from the group company secretary.

## Committee membership and attendance

The following independent non-executive directors served on the Committee during the year:

Member	Period	
	From	To
Michael Hawker (Chairman from 1 September 2011)	1 January 2010	To date
Mary Francis (Chairman from 1 January 2007 to 31 August 2011 and Committee member thereafter)	14 January 2006	To date
Leslie Van de Walle	24 September 2009	To date
Russell Walls	14 January 2006	To date

## Attendance

Committee member	Number of meetings attended	Percentage attendance <sup>¥</sup>
Michael Hawker (Chairman) <sup>1</sup>	10	91%
Mary Francis <sup>2</sup>	10	91%
Leslie Van de Walle	11	100%
Russell Walls	11	100%

¥ This shows the percentage of meetings which the Committee member attended during the year while a member of the Committee.

1 Michael Hawker was unable to attend the Committee meeting held on 23 March 2011 due to prior commitments.

2 Mary Francis was unable to attend the Committee meeting held on 12 October 2011 due to prior commitments and this meeting being called at short notice.

The Committee met on 11 occasions in 2011, of which nine were scheduled Committee meetings and two were additional Committee meetings called at short notice. The members' attendance record is set out above. In addition the Committee held separate meetings with members of senior management and the external auditor to discuss issues relevant to the Committee and for the purposes of induction and training. The group company secretary acts as the secretary to the Committee.

The group chief executive, chief risk officer, chief financial officer and the chief audit officer normally attended, by invitation, all meetings of the Committee. Other members of senior management were also invited to attend as appropriate to present reports. It was the Committee's practice at each meeting to meet separately with the chief executive officer, without any members of management being present. Committee members

also met privately with the chief risk officer after the majority of meetings to follow up on particular issues raised at the meetings.

The chairman of the Committee reported to subsequent meetings of the Board on the Committee's work and the Board received a copy of the agenda and the minutes of each meeting of the Committee. The chairman of the Committee sits on the Audit and Remuneration Committees to ensure that risk considerations are fully reflected in the decisions of those Committees.

In performing its duties, the Committee had access to the services of the chief risk officer, chief audit officer, the group company secretary and external professional advisers. Keith Nicholson, a former partner at KPMG LLP, acted as an external adviser to the Committee during the year.

## External background

2011 was a year of two halves. The first six months of 2011 saw economic indicators improving internationally, with asset values generally increasing. The second half was characterised by a rapid deterioration of investor confidence in the Eurozone economic fundamentals, leading to significant falls in European asset prices, and in particular, European government bonds. These external market forces, coupled with significantly increased regulation as the Financial Services Authority sought to introduce and transition towards new operating principles for the Prudential Regulatory Authority, and the continued development of the Solvency II Directive resulted in challenging conditions for the financial services industry as a whole. Against this backdrop, the Committee particularly focused on the management actions necessary to strengthen the Company's capital base, its capital generation, its liquidity management and its risk management culture.

## Committee activities during 2011

The Committee's principal functions are: to assist the Board in making decisions on the Group's risk appetite; to oversee the monitoring and control of risks so that they remain aligned with appetite; to ensure that management is reviewing emerging risks and testing the Group's resilience through scenario planning and stress testing; to give clear direction to the way the Group assesses its capital requirements and the quality of its assets and to assist the Board in ensuring a balance between risk and reward in relation to executive remuneration. The Committee oversees all aspects of risk management in the Group, including market, credit, liquidity, insurance and operational risk including franchise risk, and their impact on both financial and non-financial goals.

The chart below shows how the Committee allocated its time during 2011.

### Risk Committee – allocation of agenda time %

During the year the Committee focused on the following areas:

#### **Strengthening risk management across the Group**

At the beginning of 2011, the Committee considered in detail and approved an enhanced comprehensive Risk Plan (the Plan) to provide a step change in the pace of implementation of the Group's risk management framework. The Plan built on the existing risk operating model to ensure that leading standards of risk management were embedded at all levels of the business and the Committee received regular updates on the implementation of the Plan and the enhancement of the risk awareness culture throughout the business. The Plan placed strong emphasis on the risk function to ensure the embedding of risk-based decision making on economic capital, the setting of clear statements of risk appetite, especially for economic capital and liquidity, and the rigorous management of risk exposures within limits.

#### **Risk appetite monitoring**

As the macro-economic climate deteriorated in the latter half of the year, the Committee received regular detailed reports on key risk exposures, the drivers of risk in the Group and emerging and potential risks, including the risk of a sustained low interest rate environment. The Committee gave particular focus to the monitoring of the Group's capital and liquidity positions against risk appetite, the results of stress and scenario testing and the drivers of financial and insurance risks. The Committee critically assessed and challenged the appropriateness of the Group's risk appetite, rigorously monitored the Group's exposure against appetite particularly in relation to European sovereign debt holdings, counterparty and credit exposure, and assessed the actions taken to mitigate any risks that had become out of appetite. Working with the Audit Committee, the Committee also monitored the adequacy of the Group control framework.

#### **Capital and liquidity management**

Throughout the year, the Committee closely monitored the Group's economic capital and liquidity positions, particularly in light of the evolving Eurozone uncertainty, and considered in detail the management actions being taken to address the impact of the economic environment.

#### **Preparing for Solvency II**

Against a changing and evolving regulatory landscape and with an increasing emphasis on economic capital, the Committee continued to have oversight of all aspects of the programme to implement the Solvency II Directive. Throughout the year, the Committee received regular progress reports on the development of the models that are used to calculate economic capital requirements and the stress and scenario testing techniques used to validate the results. The Committee also had oversight of the detailed contingency planning in relation to the Group's internal model.

#### **Group risk management**

During the year, the Committee approved the new suite of policies and underlying standards which underpin the revised risk management framework and which would be effective from January 2012. The Committee continued to receive regular reports on compliance with the existing Group policies. The Committee also received regular reports on the development and roll-out of the Better Business Decisions programme, which was designed to equip senior management with the skills needed to embed enhanced risk-based decision making in the core business functions across the Group.

#### **Fraud and financial crime**

The Committee maintained regular oversight of compliance with controls against financial malpractice including fraud, and of the arrangements for employees to report in confidence any concerns about lack of probity (whistleblowing). The Committee also discussed the implications of the Bribery Act which came into force during the year. It paid particular attention to the update of the Group Anti-Bribery and Corruption Standard and the roll-out of an anti-bribery global communications programme and training for the Group's businesses and employees.

#### **Internal controls**

The Group's internal audit function continued to provide the Committee with independent and objective reports on the appropriateness, effectiveness and sustainability of the Company's system of internal controls. Key control issues reported by Internal Audit to management and to the Committee members were monitored on a quarterly basis until the related risk exposures had been properly mitigated.

More detail on the management of risk is contained in the Risk and capital management section of the Performance Review on pages 61 to 68.

#### **Committee performance and effectiveness**

The Committee undertook an annual review of its performance and effectiveness. The review concluded that overall the Committee was effective in carrying out its duties.

#### **Risk Committee Report**

This Risk Committee Report was reviewed and approved by the Board on 7 March 2012.

**Michael Hawker**  
Chairman, Risk Committee

# Corporate Responsibility Committee report

This report provides details of the role of the Corporate Responsibility Committee and the work it has undertaken during the year.

## Committee role and responsibilities

The purpose of the Committee is to set guidance and direction and to oversee the policies and progress of the Group's corporate responsibility (CR) activities. The key responsibilities of the Committee are:

- assisting the Board in the development of the Group's strategy on CR related issues including social, environmental and ethical matters;
- reviewing the Group's CR and environment policies to ensure they continue to meet the Group's CR strategy and objectives;
- reviewing and monitoring the Group's CR risks and working with the Risk Committee to ensure that the Group's CR risks are properly considered; and
- reviewing and approving the CR Report in the Company's Annual Report and Accounts and providing for an appropriate form of assurance.

The full terms of reference for the Committee can be found on the Company's website, [www.aviva.com/terms-of-reference](http://www.aviva.com/terms-of-reference), and are also available from the group company secretary.

## Committee membership and attendance

The following directors served on the Committee during the year:

Member	Period	
	From	To
Gay Huey Evans (Chairman from 1 December 2011)	20 October 2011	To date
Euleen Goh	1 January 2009	To date
Andrew Moss	12 July 2007	To date
Carole Piwnica (Chairman from 25 March 2009 until 1 December 2011)	14 January 2006	1 December 2011
Lord Sharman	14 January 2006	To date
Scott Wheway	5 December 2007	To date

### Attendance

Committee member	Number of meetings attended	Percentage attendance <sup>a</sup>
Gay Huey Evans (Chairman)*	1	100%
Euleen Goh	4	100%
Andrew Moss <sup>1</sup>	3	75%
Carole Piwnica**	4	100%
Lord Sharman <sup>1</sup>	3	75%
Scott Wheway	4	100%

\* Appointed chairman of the Committee on 1 December 2011.

\*\* Retired as chairman of the Committee on 1 December 2011.

<sup>a</sup> This shows the percentage of meetings which the Committee member attended during the year while a member of the Committee.

<sup>1</sup> Colin Sharman and Andrew Moss were unable to attend the Committee meeting held on 16 February 2011 due to prior commitments and this meeting being called at short notice.

The Committee met on four occasions in 2011 and the members' attendance record is set out above. The group company secretary or her nominee acts as the secretary to the Committee.

The group HR director and group CR director attended, by invitation, all meetings of the Committee. Other members of senior management were also invited to attend as appropriate to present reports. The chairman of the Committee reports to meetings of the Board on the Committee's work and the Board receives a copy of the agenda and the minutes of each meeting of the Committee.

## Committee activities during 2011

The following chart shows how the Committee allocated its time during 2011, with key activities set out in more detail below:

### Corporate Responsibility Committee – allocation of agenda time %

CR strategy, reporting and governance	35
Region review	14
Stakeholder recognition and business ethics	20
Street to School programme	14
Customers and employees	10
Climate change and environment	7

### CR strategy and performance

The Committee reviewed the Group CR strategy and functional plan for 2011–2013. It also monitored the progress made during the year by the Group's businesses against each of the CR key performance indicators and continued to receive updates on key CR programme activities such as the Street to School programme, business ethics and stakeholder recognition. There was continued emphasis on strengthening CR performance through employee engagement, by influencing key stakeholders and by embedding balanced leadership throughout the organisation.

### Risk management

The Committee continued to monitor the risks relating to the Group's CR activities together with associated risk mitigation initiatives.

### Assurance

During 2011, independent assurance on the Group's CR and related activities and reporting was provided to the Committee by Ernst & Young. Members of the Committee were interviewed as part of the external assurance process and the subsequent management report, including Aviva's action plan, was reviewed by the Committee to assist in the strengthening and future direction of the programme. Internal Audit reported to the Committee on any matters from the reviews in the Internal Audit Plan which were of relevance to the Committee and will provide support for the Committee going forward, with the sustainable objectives incorporated into the 2012 Internal Audit Plan.

### Corporate Responsibility Report

During the year, the Committee reviewed and approved the scope and content of the Company's 2011 CR Report included in this Annual Report and Accounts. As was the case in 2010 and 2011, the Company will again put its CR Report included in the Annual Report and Accounts to an annual advisory vote of shareholders at the 2012 AGM as a means of obtaining feedback on the report and the Company's performance in this area. This year's CR Report is set out on pages 72 to 88 and further details of the relevant resolution are set out in the Notice of AGM.

### Committee performance and effectiveness

The Committee undertook an annual review of its performance and effectiveness. The review concluded that overall the Committee was effective in carrying out its duties.

### Corporate Responsibility Committee Report

This Corporate Responsibility Committee Report was reviewed and approved by the Board on 7 March 2012.

**Gay Huey Evans**  
Chairman, Corporate Responsibility Committee

# Directors' remuneration report

## Highlights

- At the Company's 2011 Annual General Meeting (AGM), our shareholders endorsed the 2010 Directors' Remuneration Report, which proposed changes to the Group's executive remuneration structures and plans. These were outlined in detail in the 2010 Directors' Remuneration Report and are summarised below in Section 2.
- As outlined in the Chairman's Statement, while the outlook for the wider economy has been pessimistic, particularly in the Eurozone, Aviva has performed strongly, and management and employees have remained focused on executing our strategy, and on delivering our goals, despite market volatility.
- Aviva has performed well against the Group's Key Performance Indicators (KPIs) and the financial and non-financial targets set in respect of the 2011 Annual Bonus Plan were mostly exceeded during the year. The combination of financial outcomes, along with performance against targets relating to employees, customers and personal objectives mean the group chief executive received a bonus of 80.27% of his maximum opportunity for 2011 (2010: 74.3%).
- In line with emerging practice, we are disclosing 2012 salary increases and LTIP awards for the first time. These are presented alongside the historical information for the previous year, in table 7.
- Andrea Moneta resigned from the Board of Aviva plc (the Board) on 19 January 2011 and left the Company on 28 February 2011. Details of his leaving arrangements are disclosed in this report.
- Mark Hodges resigned from the Board on 2 June 2011 and left the Company on 9 September 2011.
- Igal Mayer was appointed as chief executive, Aviva Europe and joined the Board on 19 January 2011. Details of his annual remuneration are shown in section 11 of this report.
- Trevor Matthews joined Aviva and the Board on 2 December 2011, as chief executive, Aviva UK. His annual remuneration is shown in section 11 of this report. He received a share award to compensate him for certain awards which he forfeited on leaving his previous employer. This award will vest in tranches over three years subject to Mr Matthews remaining in the employment of the Group. See further details in section 10 of this report. The Remuneration Committee (the Committee) is satisfied that the Company paid no more than necessary in approving that buy-out.

## 1. Introduction

This report sets out the details of the remuneration policy for the Company's directors, describes its implementation and discloses the amounts paid in 2011. In addition to meeting statutory requirements, particularly the regulations on directors' remuneration reports pursuant to the Companies Act 2006, the Committee has complied with best practice guidelines, including guidance issued by the Association of British Insurers and the National Association of Pension Funds, in producing this report. Relevant sections of this report have been audited in accordance with the Companies Act 2006.

During 2011, executive remuneration has been under intense scrutiny. The Committee has been conscious of the external environment and has given due consideration to market sentiment and potential future regulation. At the time of writing this report, proposed additional regulation by the Department for Business, Innovation and Skills (BIS) has not been issued, but the Committee believes that the approach taken over the last few years by Aviva will leave it well positioned against the likely final outcome of such regulation.

This report covers the following:

- The Committee's objectives, membership and main activities in 2011;
- A review of Aviva's remuneration policy and practice;
- Commentary on the alignment between remuneration, risk and Aviva's business strategy and objectives;
- Details of the terms of executive directors' (EDs) employment contracts;
- Aviva's share ownership policy with respect to EDs;
- Aviva's policy on external board appointments;
- Aviva's UK all employee share plans and executive share plans;
- Aviva's position against dilution limits;
- Remuneration of the non-executive directors (NEDs); and
- Tables summarising the 2011 position on:
  - Directors' remuneration
  - EDs' pension arrangements
  - Share award and option plans
  - Directors' interests in shares.

## 2. Strategic Reward Review implementation

Throughout 2010, the Company conducted a comprehensive review of senior executive remuneration, the objectives of which were:

- to ensure remuneration is optimally designed to attract and retain senior executives, while avoiding paying more than is necessary;
- to ensure remuneration is aligned with, and incentivises the achievement of, our strategic business aims while ensuring appropriate risk management;
- to benchmark total compensation against suitable comparator groups to ensure remuneration is appropriately positioned against the market; and
- to ensure our reward plans appropriately reflect regulatory requirements and best practice guidelines.

Details of this Strategic Reward Review and the proposed changes in respect of executive remuneration resulting from the Review were outlined in the 2010 Directors' Remuneration Report, which was endorsed by shareholders at the Company's 2011 AGM. A summary of how these changes impacted the group chief executive and the other EDs in 2011 is shown below:

- **Revised benchmarking group:** The role of the Committee is to apply appropriate judgement in setting pay levels having considered a range of data, including primarily the 25 FTSE companies either side of Aviva's market capitalisation. The absolute peer group will be reviewed annually based on the most up-to-date market data available.
- **Simplified structure:**
  - **Annual bonus:** In order to help drive a reward and performance culture, the number of KPIs that comprise the financial bonus element will be ideally kept to a maximum of four. These will be disclosed in the Annual Report and Accounts following the relevant year end and will endeavour to reflect all relevant outcomes, behaviours and risk management actions sought by the Board.
  - **Competitive long-term incentive plans:** New revised standard long-term incentive awards have been granted to ensure our packages remain competitive within the relevant market place, and represent value for the shareholder. As disclosed in last year's report, One Aviva, twice the value bonus plan (OATTV Plan) awards were not made and EDs received awards under the standard Long Term Incentive Plan (LTIP) only.
- **Share ownership requirements:** The share ownership requirement of the group chief executive increased from 175% to 200% of basic salary. In addition, members of the Executive Committee (EC) who are not EDs saw the introduction of a new share ownership requirement of 50% of basic salary; 50% of the EDs', including the group chief executive, executive share plan releases and 25% of the EC members' executive share plan releases will be required to be held, net of withholding taxes, until such time as their share ownership requirement is met.

**Table 1: Strategic Reward Review's key changes to each element of remuneration for the EDs, as implemented in 2011**

Remuneration element	2010	From 2011 (as advised in the 2010 Directors' Remuneration Report)
Basic salary/total remuneration benchmarking group	Lower quartile to median of the FTSE 30 and the median to upper quartile of the FTSE 50	By reference to the median of 25 FTSE companies either side of Aviva's market capitalisation
Annual Bonus	Target 75% of basic salary Maximum 150% of basic salary Multiple financial measures Two-thirds deferred into shares for three years	Unchanged target and maximum opportunity Financial measures limited to four, where possible No change to deferral arrangements
OATTV Plan	Group chief executive: Matches 100% of the deferred annual bonus ED: Matches 75% of the deferred annual bonus	Plan expired in 2010
LTIP	Group chief executive: 175% standard award EDs: 150% standard award Performance measures: 50% total return MCEV Return on Capital Employed (ROCE), 50% relative Total Shareholder Return (TSR) 30% vests for threshold performance	Group chief executive: 275% standard award EDs: 225% standard award Performance measures: 50% Operating IFRS ROCE, 50% Relative TSR (IFRS ROCE is considered a more stable balance sheet measure) 20% vests for threshold performance
Share ownership requirement	Group chief executive: 175% of basic salary EDs: 150% of basic salary To be fulfilled five years from date of appointment	Group chief executive: 200% of basic salary EDs: 150% of basic salary EC members: 50% of basic salary EDs, including group chief executive, must retain 50% of net executive share plan releases (EC members 25%) until requirement is met

No significant changes to the policies agreed and communicated to shareholders last year are proposed for 2012.

### 3. Committee's role and responsibilities

The purpose of the Committee is to:

- establish a competitive remuneration package to attract, retain and motivate high-quality leaders while avoiding paying more than is necessary;
- promote the achievement of both the Company's annual plans and its strategic objectives by providing a remuneration package that contains appropriately motivating targets that are within the Group's risk appetite; and
- align senior executives' remuneration with the interests of shareholders and other stakeholders, including customers and employees.

The Committee's key responsibilities are to:

- recommend to the Board the Group's remuneration policy for EDs and members of senior management, covering basic salary, bonus, long-term incentives, retirement provisions, long-term wealth creation and other benefits;
- work with the Risk Committee to ensure that risk is properly considered in setting the overall remuneration policy for the Group and the remuneration of EDs and members of senior management;
- strike an appropriate balance between (i) the fixed and variable components and (ii) the cash, equity and equity related components of the total remuneration package;
- ensure the remuneration package is congruent with, and provides the incentives to realise, short- and long-term goals and have regard to pay and conditions elsewhere within the Group;

- review and determine the terms of employment and remuneration of the individual EDs, including any specific recruitment or severance terms;
- assess and, within the broad policy from time to time approved by the Board, determine the remuneration terms of the Chairman of the Company;
- recommend to the Board the establishment of any employee share plans and exercise all the Board's powers in relation to the operation of all share incentive plans, including the granting of awards, the setting and testing of performance conditions (where appropriate), and any discretion on behalf of the Board regarding any material amendments to the plans' rules not requiring the approval of shareholders; and
- select, appoint and determine terms of reference for independent remuneration consultants to advise the Committee on remuneration policy and levels of remuneration.

The full terms of reference for the Committee can be found on the Company's website, [www.aviva.com/terms-of-reference](http://www.aviva.com/terms-of-reference), and are also available from the group company secretary.

#### 4. Committee membership

Table 2 below shows the directors who served as members of the Committee during the year, all of whom are independent NEDs, and individuals who attended Committee meetings:

**Table 2: Members and attendees of the Committee during 2011**

Member	Position	Comments
Scott Wheway	Chairman of the Committee	Member since 5 December 2007, chairman since 1 January 2009
Mary Francis	Member	Member from 25 January 2006 until 1 June 2011
Michael Hawker	Member	Member since 1 June 2011
Carole Piwnica	Member	Member from 25 January 2006 until 1 December 2011
Leslie Van de Walle	Member	Member since 24 September 2009
Lord Sharman	Chairman of the Company	Attended by invitation
Andrew Moss	Group chief executive	Attended by invitation
John McFarlane	Non-executive director	Attended by invitation
John Ainley	Group HR director	Attended as an executive responsible for advising on the remuneration policy
Kirstine Cooper	Group company secretary	Attended as secretary to the Committee
Tracey O'Rourke	Group reward and HR policy director	Attended as an executive responsible for advising on the remuneration policy
Martyn Fisher	Group reward director	Attended as an executive responsible for advising on the remuneration policy
David Rogers	Chief accounting officer	Attended to advise on matters relating to the performance measures and targets for the Group's share incentive plans
Amanda Mackenzie	Chief marketing and communications officer	Attended to advise on matters relating to customer target setting
Alain Dromer	Chief executive, Aviva Investors	Attended to advise on matters relating to Aviva Investors' remuneration policy in relation to the FSA's Remuneration Code
Nigel Clemson	Executive HR director, Aviva Investors	Attended to advise on matters relating to Aviva Investors' remuneration policy in relation to the FSA's Remuneration Code
Representatives of AON Hewitt New Bridge Street (AHNBS)*		Attended by invitation as the Committee's independent adviser until August 2011. AHNBS is part of AON, which provided insurance broking services to the Company in 2011
Representatives of FIT Remuneration Consultants*		Attended by invitation as the Committee's independent adviser from August 2011. FIT Remuneration Consultants provided no other services to the Group in 2011

\*Both AHNBS and FIT Remuneration Consultants are members of the Remuneration Consultants Group (the professional body established under the Walker review) and adhere to its code of conduct.

No person was present during any discussion relating to their own remuneration.

In addition to the members and attendees listed in Table 2 above, the chief risk officer provided advice on the management of risk within the remuneration framework and Deloitte LLP advised the Committee on the calculation of TSR in respect of the LTIP vesting. Deloitte LLP were not appointed by the Committee and they provided consultancy services to the Group in 2011.

The chairman of the Committee reports to meetings of the Board on the Committee's work and the Board receives a copy of the agenda and the minutes of each meeting of the Committee. The Committee undertook an annual review of its performance and effectiveness. The review concluded that overall the Committee was effective in carrying out its duties.

## 5. Committee attendance and activities during 2011

The Committee is required by its terms of reference to meet at least three times per year. In 2011, the Committee met ten times and the number of meetings attended by each Committee member is shown in Table 3:

**Table 3: Committee attendance**

Committee member	Number of meetings attended	Percentage attendance <sup>1</sup>
Scott Whewey (Chairman)	10	100%
Mary Francis <sup>2</sup>	5	71%
Michael Hawker <sup>3</sup>	3	100%
Carole Pivnica <sup>4</sup>	8	89%
Leslie Van de Walle <sup>5</sup>	9	90%

<sup>1</sup> This shows the percentage of meetings which the Committee member attended during the year while a member of the Committee.

<sup>2</sup> Mary Francis was unable to attend meetings held on 19 January 2011 and 24 May 2011 due to prior commitments and these meetings being called at short notice. Mrs Francis stepped down as a member of the Committee on 1 June 2011 and therefore was no longer a member of the Committee when the last three meetings of 2011 were held.

<sup>3</sup> Michael Hawker attended all of the meetings held following his appointment to the Committee on 1 June 2011.

<sup>4</sup> Carole Pivnica was unable to attend the meeting held on 30 November 2011 due to a prior commitment. Mrs Pivnica stepped down as a member of the Committee on 1 December 2011 and therefore was no longer a member of the Committee when the last meeting of 2011 was held.

<sup>5</sup> Leslie Van de Walle was unable to attend the meeting held on 26 April 2011 due to a prior commitment and the meeting being called at short notice.

The Committee has a standing calendar of agenda items within its remit. In addition to these items, the Committee discusses matters relating to the operation of the Group's remuneration policy and emerging market practices. The chart opposite summarises the time allocated to various agenda items during 2011 and Table 4 below sets out the matters discussed by the Committee.

**Remuneration Committee  
– allocation of agenda time %**

Strategic reward review	6
Remuneration terms for new EDs and EC members	10
FSA's remuneration code	4
EDs', EC members' and senior management's salaries and bonuses	20
EDs' and EC members' objectives and Group targets including risk objectives	30
Pensions and long-term savings	5
Share plan awards and performance conditions	5
Discussions regarding Group Risk input into compensation arrangements	5
Other matters	15

**Table 4: Matters discussed by the Committee during its 2011 meetings**

Meeting	Standing agenda items	Other agenda items
17 January	■ None	■ Approval of the departure terms for Andrea Moneta
18 January	■ None	■ Discussion of Igal Mayer's appointment terms as an ED
19 January	■ None	■ Approval of Igal Mayer's appointment terms as an ED
2 February	■ None	■ Discussion of communications to institutional investors regarding the Strategic Reward Review ■ Agreement that bonus awards for senior management would take account of risk objectives ■ Discussions of the FSA's Remuneration Code
28 February	<ul style="list-style-type: none"> <li>■ A review and approval of basic salaries and benefits in kind for EDs and EC members</li> <li>■ Consideration and approval of bonus awards for the 2010 financial year and approval of share awards under the Annual Bonus Plan (ABP) for EDs and EC members</li> <li>■ A review and approval of LTIP grants to the EDs and EC members and approval of the performance conditions for the 2011 LTIP grants</li> <li>■ A performance test of subsisting LTIP and OATTV Plan grants</li> <li>■ A review of dilution limits</li> <li>■ A review and approval of recommendations on contributions into the Aviva Capital Accumulation Plan (ACAP)</li> <li>■ Approval of the 2010 Directors' Remuneration Report</li> <li>■ Approval of the award of Free Shares to UK employees under the Aviva All Employee Share Ownership Plan (AESOP) and awards to Irish employees under the Aviva Group Employee Share Ownership Scheme</li> <li>■ A review of EDs' and EC members' shareholding requirements</li> <li>■ A review and approval of the chairman of the Company's fees</li> </ul>	<ul style="list-style-type: none"> <li>■ Approval of the 2011 personal objectives for EDs and EC members</li> <li>■ Approval of amendments to the rules of the Aviva AESOP</li> <li>■ Approval of amendments to the Committee's Terms of Reference</li> </ul>
April	■ None	■ Discussion and approval of the proposed remuneration package for a newly appointed EC member

**Table 4: Matters discussed by the Committee during its 2011 meetings continued**

<b>May</b>	<ul style="list-style-type: none"> <li>■ None</li> </ul>	<ul style="list-style-type: none"> <li>■ Discussion and approval of the proposed remuneration package and joining arrangements for Trevor Matthews</li> </ul>

<b>November</b>	<ul style="list-style-type: none"> <li>■ Approval of the group chief executive's personal objectives for 2012</li> <li>■ Approval of the proposed 2012 financial, employee and customer targets for the operation of the ABP</li> <li>■ A review of the proposed approach to the 2011 Directors' Remuneration Report</li> <li>■ A review of the Committee's 2012 work plan</li> </ul>	<ul style="list-style-type: none"> <li>■ Approval of the finalised remuneration package and joining arrangements for Trevor Matthews</li> <li>■ Discussions of the FSA's and Solvency II remuneration requirements</li> </ul>
<b>December</b>	<ul style="list-style-type: none"> <li>■ None</li> </ul>	<ul style="list-style-type: none"> <li>■ Discussion of EDs' and EC members' personal and risk objectives for 2012</li> <li>■ Approval of a revised list of Code Staff for two Aviva UK subsidiaries with regard to the FSA's Remuneration Code</li> </ul>

## 6. FSA's Remuneration Code: Aviva Investors

The FSA's Remuneration Code does not apply to Aviva's businesses with the exception of Aviva Investors and two small subsidiaries within the UK business. These businesses are in full compliance with the FSA's Remuneration Code's requirements and the Company expects the Solvency II Directive and other European-based legislation to further define requirements in this area in the near future.

Specifically, Aviva Investors' policy on remuneration takes into account its status as a Tier 4 organisation as defined in the FSA's Remuneration Code 2010, and as such is fully compliant with this code.

Aviva Investors' reward principles and arrangements are designed to accurately and appropriately incentivise and reward employees for achieving stated business goals in a manner that is consistent with the Company's approach to sound and effective risk management.

Effective risk management is central to how the Company and Aviva Investors perform and the risk profile of each business is also taken into account in compensation decisions. The approach to performance and reward is designed to drive sustainable performance, ensuring that remuneration policies support the business strategy and long-term interests of the Company.

## 7. Changes to UK pension taxation

Following announcements by the UK government during late 2010 and 2011, the Company reviewed its approach to pension provisions for those employees whose pension contributions exceed either the newly reduced annual allowance or, from April 2012, the newly reduced Lifetime Allowance. The Company fully supports, where possible, the continued tax-efficient provision of retirement benefits.

In reviewing the ongoing retirement benefit plan changes, no arrangements were entered into which materially increased Company costs. For those employees who are members of the UK Defined Contribution Plan, an option is provided to pay the excess over £50,000 per annum as either a lump sum or a contribution into an Employee Benefit Trust which generates a tax point in five years' time and has a 12-month risk of forfeiture for those who either resign or are terminated for cause.

## 8. Alignment of Group strategy with executive remuneration

The Committee considers alignment between Group strategy and the remuneration of its senior executives, including EDs, to be critical. It believes that senior executives should be appropriately rewarded (on a market competitive basis) for the delivery of stretching goals but should receive reduced rewards when the business performs poorly. The pay and employment conditions of employees of the Company and the Group were also taken into account when determining directors' remuneration for the financial year, in addition to the Group Reward policies and framework.

To achieve this alignment Aviva's remuneration package is leveraged, with a suitable percentage of pay 'at risk' against the achievement of stretching goals, which is aligned with the Company's risk profile and employee behaviour. Furthermore, two-thirds of any bonus for EDs and EC members and any LTIP grants are delivered in the form of Aviva shares. The requirements to defer bonus and participation in the LTIP closely tie the long-term value of executive remuneration to the Company's share price performance. Senior executives thus have high exposure to the same benefits and drawbacks of share price movement as all shareholders. The belief that senior executives should be shareholders is reinforced through formal guidelines requiring EDs to build up and maintain a significant holding of shares in the Company.

Section 2 outlines the key changes in respect of executive remuneration that were implemented in 2011, following the Strategic Reward Review. The Committee's considerations shown below relate to reward decisions made in 2011.

- The Group's strategic priorities and targets are set out elsewhere in the 2011 Annual Report and Accounts. Those priorities are reflected closely in the remuneration package of executives.
- The Committee also considers how, given changing economic circumstances, the Group's priorities, and consequently the targets underpinning its bonus structures, need to change from year to year. Financial targets sit alongside targets on customer advocacy and employee engagement that the Committee believes are critical to long-term organisational health. The personal objectives of the EDs and EC members are reviewed annually by the Committee to ensure they adequately reflect the strategic aims of the Group, good governance and best practice.
- **Basic salary:** Internal and external equity in basic salary positioning is an important contributor to a motivational remuneration package. A range of market data is used to inform decision making, taking into account the Company's benchmarking policy including regard to the 25 FTSE companies either side of Aviva's market capitalisation.
- **Annual bonus plan:** Bonus structures are effective only if they drive, through the targets, the maintenance of the Company on a sound financial footing and sustained profitable growth. In addition, the targets must not provide an incentive to promote behaviours which could be detrimental to the Company's long-term interests. Management must justify the targets it recommends. The Committee is satisfied that the targets provide appropriate incentives, are sufficiently challenging, are aligned to shareholders' interests and are within the Group's risk appetite.
- **LTIP:** The LTIP encourages a longer-term management focus on ROCE and relative TSR. These metrics measure how the Company is performing in both absolute and relative terms.

The Committee considers all these elements, plus retirement and other benefits, as a whole. It looks to ensure that an appropriate balance is maintained between the elements to ensure that the need for both short-term success and long-term sustainable growth is recognised. The Committee also ensures that the non-financial business measures and individual objectives reflect adequately the Company's environmental, social and governance responsibilities.

### 9. Constituent elements of reward as a percentage of total remuneration

Table 5 below shows how the Group's remuneration policy translates in practice into the group chief executive's remuneration package. The table outlines the contribution each element makes to overall compensation at both 'Target' and 'Stretch' levels of performance for the group chief executive. For the remainder of EDs, 43% (42% for Igal Mayer) of total remuneration is paid in cash for on 'Target' performance and 32% (30% for Igal Mayer) for 'Stretch' performance (excluding ACAP which EDs participate in to varied degrees; see Table 7). For all the EDs, more than half of total remuneration is performance-related.

**Table 5: Breakdown of remuneration for group chief executive in 2011**

For the purposes of the charts above, 'Cash' includes basic salary and the discretionary ACAP payment. "Variable Cash" is the one-third of bonus paid in cash annually. The share element includes the two-thirds of the annual bonus deferred into shares and the LTIP.

- 2011 'Target' performance means a target ABP outcome (75% of basic salary) and a 50% vesting of the LTIP (137.5% of basic salary).
- 2011 'Stretch' performance means a stretch ABP outcome (150% of basic salary) and 100% vesting of the LTIP (275% of basic salary).

The breakdown does not include any share price growth, the dividend equivalents payable on the ABP deferred shares and 2011 LTIP award, or other benefits (e.g. cash car allowance, value of private medical insurance (PMI) and all employee share ownership plans).

## 10. Remuneration policy in practice for EDs

Table 6, below, summarises Aviva's remuneration policy as it is applied in practice to EDs.

**Table 6: Remuneration policy in practice**

Policy	How delivered
<p><b>Total remuneration</b></p> <p>Total remuneration package levels are informed by relevant pay data, in particular for 2011, the median range of the 25 FTSE companies either side of Aviva's market capitalisation.</p> <p>These reference points are chosen to reflect Aviva's market capitalisation and comparability to other large, sophisticated multi-national companies and the positioning that is appropriate to Aviva in those different comparator groups.</p>	<ul style="list-style-type: none"> <li>■ Basic salary</li> <li>■ ABP</li> <li>■ LTIP</li> <li>■ Long-term savings</li> <li>■ Aviva Staff Pension Scheme (ASPS)</li> <li>■ Benefits</li> <li>■ All employee schemes</li> </ul>
<p><b>Basic salary</b></p> <p>Benchmarked as for total remuneration but with positioning and progression taking account of individual and business performance and the levels of increase provided for the broader UK employee population (basic salaries of the UK employees increased by 2% on average in 2011).</p> <p>The Committee takes seriously institutional investors' concerns on the upward ratchet of basic salaries and is rigorous in its review of salaries against market position.</p>	<ul style="list-style-type: none"> <li>■ Monthly in cash</li> <li>■ Reviewed annually in February, with changes taking effect from 1 April.</li> </ul>
<p><b>ABP</b></p> <p>The ABP is intended to incentivise executives to achieve the annual business plan, based on a series of key financial, employee and customer performance indicators (KPIs), which make up 70% of the bonus opportunity, and personal objectives which make up 30%.</p> <p>75% of basic salary is payable for 'on target' performance and up to 150% for 'stretch' performance.</p> <p>Two-thirds of bonus is deferred into shares and the deferred shares vest on the third anniversary of the date of grant. The vesting of deferred shares is reduced on resignation or in certain other leaver circumstances for deferrals made prior to March 2011. Vesting of deferred shares is forfeited on resignation or in certain other leaver circumstances for deferrals made from March 2011. Additional shares are awarded at vesting in lieu of the dividends paid on the deferred shares during the deferral period. The plan rules give the Committee the authority to cancel unvested awards in the event of misconduct by the participant or a member of their team, or in the event of a materially adverse misstatement of the Company's financial statements.</p>	<ul style="list-style-type: none"> <li>■ Annually, one-third is paid in cash and two-thirds in deferred shares.</li> </ul>
<p><b>LTIP</b></p> <p>The LTIP is intended to motivate the achievement of the Company's longer-term objectives, to aid the retention of key personnel and to align executive interests to those of shareholders. In 2011 the group chief executive was eligible to receive an annual award of shares equal to 275% of basic salary. Other EDs were eligible to receive an annual award of shares equal to 225% and, in the case of Igal Mayer, 250% of basic salary (this reflects the fact that Mr Mayer was previously on US conditions of employment, under which he would have been eligible for a higher standard award, reflective of market practice).</p> <p>The Company operates a phantom scheme in the US for its US-based employees. The levels of award reflect US market practice.</p> <p>For awards made prior to 2011, no additional shares are awarded for the dividends paid during the three-year performance period on those shares that vest. From 2011 onwards, dividend equivalent awards will be paid in line with current market practice. The plan rules give the Committee the authority to cancel unvested awards in the event of misconduct by the participant or a member of their team, or in the event of a materially adverse misstatement of the Company's financial statements.</p>	<ul style="list-style-type: none"> <li>■ Annual awards in shares that vest, subject to ROCE and relative TSR performance conditions being met, at the end of a three-year performance period.</li> <li>■ Awards that do not vest lapse.</li> </ul>
<p><b>Long-term savings</b></p> <p>The Aviva Capital Accumulation Plan (ACAP) is a long-term savings vehicle which aids retention while recognising the need for flexibility in long-term wealth planning.</p> <p>Company contributions are discretionary and vary year on year, but would not normally exceed 50% of basic salary. Contributions for the EDs are shown in the Table 7.</p> <p>No ED who participates in the ACAP is currently accruing benefits in the ASPS. A resignation or departure for breach of contract results in forfeiture of contribution for the relevant year.</p>	<ul style="list-style-type: none"> <li>■ Discretionary payments into a trust where they are held for a minimum of five years.</li> </ul>
<p><b>ASPS</b></p> <p>The UK ASPS provides a competitive post-retirement package.</p> <p>Lump sum death in service benefit of four times basic salary is provided, as is a spouse's or partner's pension equal to two-thirds of actual or, on death in service and in certain other circumstances, prospective pension. Post-retirement increases are equivalent to the Retail Price Index up to a maximum of 7.5%. Retirement benefits can be accessed from age 60.</p>	<ul style="list-style-type: none"> <li>■ Deferred cash payable on retirement in the form of a lump sum/monthly payment.</li> </ul>
<p><b>Other benefits</b></p> <p>Other benefits are provided on a market competitive basis.</p>	<ul style="list-style-type: none"> <li>■ Cash car allowance</li> <li>■ PMI</li> <li>■ Accompanied Travel</li> </ul>

**Table 6: Remuneration Policy in practice continued**

Policy	How delivered
<p><b>Conditional Share Award to Trevor Matthews</b></p> <p>The Committee approved the granting of a one-off conditional share award to Trevor Matthews with a grant value of £2.02 million as part of the recruitment offer made to him. Mr Matthews became entitled to the grant of the award on the date of the commencement of his employment, 2 December 2011. The conditional share award was made on an exceptional basis, pursuant to rule 9.4.2(2) of the Listing Rules, to compensate for the loss of long-term incentives at his previous employer having taken due account of the conditions attached to those forfeited awards. The award was necessary to secure Mr Matthews' recruitment and is subject to clawback provisions. Additional shares will be awarded at vesting in lieu of the dividends paid on the vested shares between the award date and vesting date.</p>	<ul style="list-style-type: none"> <li>■ The conditional share award will vest in three equal tranches on the first dealing day of March 2012, March 2013 and March 2014 subject to Mr Matthews remaining in the employment of the Group and no dealing restrictions being in place on the vesting date.</li> <li>■ If Mr Matthews' employment is terminated due to resignation or dismissal for gross misconduct or gross incompetence, any unvested shares subject to the award will lapse and the Company will reclaim any part of the award which vested during the 12 months prior to the termination date.</li> <li>■ If Mr Matthews' employment is terminated for any other reason than those outlined above, any unvested shares subject to the award will vest immediately following the termination date.</li> <li>■ Similarly, in the event of a change of control of the Company (by way of general offer or court order) or similar corporate event, any unvested shares subject to the award will vest in full. However, in certain circumstances, the Company may require Mr Matthews to exchange the award for an equivalent award over shares in the acquiring Company.</li> <li>■ The conditional share award is not pensionable. Any amendments to the terms of the award which are to the advantage of the participant (other than certain minor amendments) are subject to shareholder approval.</li> </ul>

## 11. Overview of the effect of the remuneration policy on EDs' remuneration during 2011 and 2012

The effect of the remuneration policy in 2011 on EDs is set out in Table 7 below. It should be emphasised that the figures shown for the LTIP grant represent the face value of those awards on the date of grant. The LTIP grant would only be fully realised if very stretching performance conditions were to be met. Details on pension benefits are set out later in this report. Alongside the historical information, for the first time, the table also shows the forward looking salary increases and LTIP awards for 2012, where applicable.

**Table 7: Overview of EDs' remuneration during 2011 and 2012****Andrew Moss, group chief executive**

Element	Amount	Commentary**
Basic salary	£951,250 during the year	Mr Moss received a 3.8% increase from £925,000 to £960,000, effective 1 April 2011 He will receive a further 4.8% increase from £960,000 to £1,006,000 effective 1 April 2012. These increases reflect his performance, experience and contribution since his appointment. Mr Moss's average annual salary increase since April 2008 is 2.1%
ABP	£1,155,888 (120.4% of basic salary) (£385,296 delivered in cash and £770,592 deferred into shares for three years)	Bonus is a function of the degree of achievement of 2011 targets as follows: Financial 39.22% (maximum 50%) Employee 9.38% (maximum 10%) Customer 5.67% (maximum 10%) Personal 26.00% (maximum 30%)
LTIP – face value of grant	£2,543,750	The face value of the 2011 grant represented 275% of basic salary on 28 February 2011 Mr Moss will receive an LTIP grant for 2012 with a face value of £2,640,000, representing the standard award of 275% of his basic salary as at 29 February 2012
ACAP	£480,000	The Trustee of the Plan accepted Aviva's recommendation and made an award into the Plan equivalent to 50% of Mr Moss' basic salary as at 1 April 2011 A similar contribution is anticipated for 2012
Other benefits	2% basic salary cash supplement £19,000 cash car allowance PMI	Mr Moss continues to receive 2% of basic salary as a non-pensionable cash supplement provided in consideration of his surrendering his Unapproved Unfunded Retirement Benefit (UURB) promise at the point when accrual in the ASPs ceased

\*\*Percentages do not necessarily add up due to rounding.

**Table 7: Overview of EDs' remuneration during 2011 and 2012 continued****Patrick Regan, chief financial officer**

Element	Amount	Commentary**
Basic salary	£626,250 during the year	Mr Regan received a 5.8% increase from £600,000 to £635,000, effective 1 April 2011 He will receive a further 13.4% increase from £635,000 to £720,000 effective 1 April 2012. Mr Regan has demonstrated outstanding performance in 2010 and 2011 to warrant these increases
ABP	£764,572 (120.4% of basic salary). (£254,857 delivered in cash and £509,715 deferred into shares for three years)	Bonus is a function of the degree of achievement of 2011 targets as follows: Financial 39.22% (maximum 50%) Employee 9.38% (maximum 10%) Customer 5.67% (maximum 10%) Personal 26.00% (maximum 30%)
LTIP – face value of grant	£1,350,000	The face value of the 2011 grant represented 225% of Mr Regan's basic salary on 28 February 2011 Mr Regan will receive an LTIP grant for 2012 with a face value of £1,428,750, representing the standard award of 225% of his basic salary as at 29 February 2012
Defined contribution pension		See section 23 for details
Other benefits	£16,200 cash car allowance during the year PMI	

\*\* Percentages do not necessarily add up due to rounding.

**Igal Mayer, chief executive, Aviva Europe\***

Element	Amount	Commentary**
Basic salary	£605,625 during the period from joining the Board (CAD 959,129)	Based on an annual salary of CAD 1,001,500 Mr Mayer will receive a salary increase of 2% from CAD 1,001,500 to CAD 1,021,530 effective April 2012
ABP	£631,829 (99.9% of basic salary) (£210,610 delivered in cash and £421,219 deferred into shares for three years)	Bonus is a function of the degree of achievement of 2011 targets as follows: Financial 37.14% (maximum 50%) Employee 8.70% (maximum 10%) Customer 3.10% (maximum 10%) Personal 17.67% (maximum 30%)
LTIP – face value of grant	£1,580,950	The face value of the 2011 grant represented 250% of Mr Mayer's basic salary on 28 February 2011. Mr Mayer will receive an LTIP grant for 2012 with a face value of CAD 2,503,750, representing the standard award of 250% of his basic salary as at 29 February 2012
Pension		See section 23 for details
Other benefits	£21,044 cash car allowance during the period from joining the Board £201,879 accommodation***  £57,069 family travel***  £111,040 flights*** £35,699 relocation***  £23,740 tax preparation*** PMI	Annual car allowance of CAD 34,800  Based on a £5,000 per month accommodation allowance, grossed up for tax purposes. 2012 rental costs were largely paid in advance in 2011 Aviva also met rental costs for his apartment in the US for the short period from his appointment as an ED until he moved out Based on a maximum £40,000 per annum family travel allowance, grossed up for tax purposes Flights between Toronto and London Paid against an allowance of up to £100,000 for costs incurred in connection with relocation

\* Igal Mayer joined the Board on 19 January 2011 and the information shown is for the period served as an ED in 2011 (with the exception of ABP, where the full year award is shown). Figures shown above have been converted from Canadian dollars to pounds sterling at the average exchange rate for 2011 of CAD 1.5837 : £1.00.

\*\* Percentages do not necessarily add up due to rounding.

\*\*\*Under the terms of his letter of appointment, Igal Mayer is entitled to first class return flights between Toronto and London, and a travel allowance of up to £40,000 per annum for his spouse and dependent children for travel to and from Toronto and London. Aviva meets the cost of rental accommodation in London of up to £5,000 per month, plus utility costs in line with standard policy. Mr Mayer also receives assistance in preparing his tax returns. Aviva meets the cost of any taxes due on these benefits. He is also entitled to be reimbursed up to a maximum of £100,000 for costs incurred in connection with relocation from the US. A sum of £35,699 has been paid against this allowance.

**Table 7: Overview of EDs' remuneration during 2011 and 2012 continued****Trevor Matthews, chief executive, Aviva UK\***

Element	Amount	Commentary**
Basic salary	£58,154 during the year	Mr Matthews commenced employment on 2 December 2011 with an annual basic salary of £720,000 He will be eligible for a salary review in April 2013
ABP	£45,000 (75% of one month's basic salary) (£15,000 delivered in cash and £30,000 deferred into shares for three years)	2011 bonus based on an on target payment applied to one month's basic salary
LTIP – face value of grant	£1,620,000	The face value of the 2011 grant represented 225% of Mr Matthews' basic salary on 2 December 2011 (using the share price upon which other 2011 LTIP awards were based) and was granted in the form of Phantom Units which will be cash settled on vesting Mr Matthews will receive an LTIP grant for 2012 with a face value of £1,620,000, representing the standard award of 225% of his basic salary as at 29 February 2012
Defined contribution pension	£nil	See section 23 for details
Other benefits	£1,309 cash car allowance during the year £470,000 cash payment in first month of employment and a conditional share award, face value of £2,020,000  £35,280 professional fees	As compensation for forfeiture of unvested shares and 2011 bonus from previous employer. The conditional share award will vest in three equal tranches on the first dealing day of March 2012, March 2013 and March 2014 subject to Mr Matthews remaining in employment and no dealing restrictions being in place on the vesting date. See section 10 for more details Mr Matthews received legal advice in connection with the terms of his employment

\* Trevor Matthews joined the Board on 2 December 2011 and the information shown is for the period served as an ED in 2011.

\*\* Percentages do not necessarily add up due to rounding.

**Andrea Moneta, chief executive officer, Aviva Europe, Middle East and Africa\***

Element	Amount	Commentary**
Basic salary	£33,807 during the period until leaving the Board (€39,000)	Based on an annual salary of €780,000. Mr Moneta did not receive an increase to his basic salary in 2011
ABP	£nil	Mr Moneta received no bonus in connection with 2011 performance
ACAP	£nil	
Other benefits	£932 cash car allowance during the period until leaving the Board £346,741 compensation for loss of earnings, options and performance shares from previous employer paid in March 2011 £4,854 housing allowance £867 schooling allowance £43,342 for loss of employment £35,000 legal fees  PMI	Mr Moneta received this payment in accordance with a contractual entitlement  Based on €112,000 annual housing allowance, grossed up for tax purposes*** Based on €30,000 annual schooling allowance payable up to the end of secondary schooling, grossed up for tax purposes*** Mr Moneta received a payment of €50,000 as compensation for loss of employment Legal fees were paid directly to Mr Moneta's solicitor for advising Mr Moneta on his departure terms

\* Andrea Moneta resigned from the Board on 19 January 2011 and the information shown is for the period served as an ED in 2011. Figures shown above have been converted from euros to pounds sterling at the average exchange rate for 2011 of €1.1536 : £1.00.

\*\* Percentages do not necessarily add up due to rounding.

\*\*\* These exceptional other benefits were provided to replicate pre-existing obligations. These benefits were time-limited and ceased in 2011.

**Table 7: Overview of EDs' remuneration during 2011 and 2012 continued****Mark Hodges, chief executive, Aviva UK\***

Element	Amount	Commentary**
Basic salary	£260,718 during the period until leaving the Board	Mr Hodges received a 5.8% increase from £600,000 to £635,000, effective 1 April 2011
ABP	£nil	Mr Hodges received no bonus in connection with 2011 performance
LTIP – face value of grant	£1,350,000 (subsequently lapsed)	The face value of the 2011 grant represented 225% of Mr Hodges' basic salary on 28 February 2011. This award lapsed in full upon Mr Hodges' resignation
ACAP	£317,500 (subsequently forfeited)	The Trustee of the Plan accepted Aviva's recommendation and made an award into the Plan equivalent to 50% of Mr Hodges' basic salary as at 1 April 2011. This award was forfeited upon Mr Hodges' resignation
Other benefits	£6,872 cash car allowance during the period until leaving the Board PMI	

\* Mark Hodges resigned from the Board on 2 June 2011 and the information shown is for the period served as an ED in 2011.

\*\*Percentages do not necessarily add up due to rounding.

## 12. Target setting

### ABP – target setting

The financial targets which underpinned the ABP (accounting for up to 50% of annual bonus) in 2011 were derived from Aviva's return, growth and capital efficiency/capital generation goals.

Employee and customer targets (each accounting for up to 10% of annual bonus) are set taking into account performance to date and aspirations for the future. The employee targets on leadership and engagement are derived from the Group's Employee Promise Survey in which all business units participate and which over 34,000 staff completed in 2011. This survey is delivered through an independent third party who is able to provide extensive external benchmark data. The Company's aspiration is to reach upper quartile positions compared to the relevant global and national norms on leadership and employee engagement over time.

In 2011, all businesses measured customer advocacy using a consistent robust methodology undertaken by an independent global research agency. The Company's aspiration is to reach the upper quartile in the relevant local market benchmark.

Internal assurance that the outcomes on employee and customer targets were accurately calculated and reported was provided to the Committee by the Group's Internal Audit function. Personal targets are based on delivery of key strategic priorities, personal leadership and operating performance of the relevant portion of the business and account for up to 30% of annual bonus; 50% of the personal objectives of the EDs for 2011 was derived from a joint Executive Committee Risk objective.

The Group's performance against its financial, employee and customer KPIs in 2011, as they affected the bonus of the group chief executive, is shown in Table 8.

**Table 8: Group performance in 2011 against its KPIs**

	Key performance indicators	Weighting (% of total bonus opportunity)		
		On target* (%)	Stretch (%)	Actual payment (%)
Business measures (70%)	Volume – total long-term savings	3.1	3.1	0.0
	Volume – net written premium	3.1	3.1	3.1
	Operating profit	6.3	14.6	8.4
	Operating capital generation	6.3	14.6	14.6
	Internal rate of return (IRR)	6.3	14.6	13.1
	Customer	5.0	10.0	5.7
	Employee	5.0	10.0	9.4
Personal measures (30%)	Personal – individual strategic	7.5	15.0	15.0
	Personal – common risk objective	7.5	15.0	11.0
	Total	50.0	100.0	80.3

\* Percentages do not necessarily add up due to rounding.

The Committee remains sensitive to the external environment in relation to executive pay, and particularly relating to the payment of bonuses in circumstances where financial targets have not been met and share prices have fallen. However, the combination of financial and non-financial measures is central to the structure of the ABP. The Committee aims to ensure a balanced focus on both short-term financial performance and on the objective non-financial measures that are leading indicators of future financial success. This balance is, in the Committee's view, reflective of good practice in incentive design and is consistent with the FSA's guidance on creating incentive schemes that have a focus on long-term sustainable performance and are considerate of the risk environment. Aviva appropriately incentivises and rewards employees for achieving stated business goals in a manner that is consistent with our approach to sound and effective risk management.

As described above, the Committee took the view that it was important to maintain the integrity of the financial targets for the EDs, and therefore these were not adjusted during the year. In the same way, the Committee believes that it is appropriate to pay bonuses based on pre-agreed rigorous targets when these have been met.

To align with the business priorities for 2012, the financial measures at Group level for 2012 are total capital generation, operating profit, internal rate of return, economic gain and total sales (the latter two of which are not set a stretch target in line with relevant risk considerations).

#### LTIP – target setting

The LTIP vests subject to the degree of achievement of two equally weighted performance measures, absolute ROCE and relative TSR performance, which have been chosen to reflect shareholders' long-term interests.

#### ROCE targets

ROCE targets determine the vesting of 50% of any LTIP award and are set annually within the context of the Company's three-year business plan. Vesting depends upon performance over the three-year period against a target return. The Company's external auditor provides a formal opinion on the IFRS ROCE vesting calculation. The 2011 LTIP award ROCE targets are set out in Table 9 below.

**Table 9: 2011 LTIP ROCE targets**

ROCE targets over the three-year performance period	Percentage of shares in award that vest based on achievement of ROCE targets
Less than 33%	0%
33%	10%
Between 33% and 40.5%	Pro rata between 10% and 50% on a straight line basis
40.5% and above	50%

The Committee has determined the performance targets for the 2012 LTIP awards. The ROCE targets, originally calibrated at the end of 2010, have been recalibrated to reflect the impact of a significant improvement in the Aviva Staff Pension Scheme deficit, and the disposal and partial sell-down of RAC and Delta Lloyd respectively. These events, which occurred after the ROCE metric for the 2011 LTIP awards was calibrated, have significantly impacted on Aviva's ability to deliver on the original ROCE targets. The impact of these events is that an additional £360 million post tax adjusted operating profit would be required from the underlying businesses to deliver the same level of ROCE as applied to previous LTIP awards. The Committee therefore agreed to apply a minimum vesting threshold of 30% and a maximum vesting threshold of 37.5% to the 2012 LTIP awards (over three years). The Committee considers that the revised metric would be just as stretching as would have been the case had the events and the recalibration not occurred. No adjustment has been made to the the ROCE target which applies to the 2011 LTIP awards.

#### TSR targets

Relative TSR determines the vesting of the other 50% of any LTIP award. The comparator group for the assessment of relative TSR performance at the time of the 2011 grant comprised Aegon, Ageas, Allianz, Axa, Generali, ING, Legal and General, Lloyds Banking Group, Prudential, Resolution Limited, Royal Bank of Scotland, Royal and Sun Alliance, Standard Life and Zurich. These companies were chosen on the basis of product and geographic match to Aviva.

TSR vesting operates as set out in Table 10 below.

**Table 10: TSR vesting schedule for the 2011 LTIP award**

TSR position over the three-year performance period	Percentage of shares in award that vests based on achievement of TSR targets
Below median	0%
Median	10%
Between median and upper quintile	Pro rata between 10% and 50% on a straight line basis
Upper quintile and above	50%

Details of subsisting LTIP awards are provided in Table 15 of this report. Table 11 below shows the vesting projections (non-audited) of those awards as at 31 December 2011.

**Table 11: Projections of vesting of subsisting LTIP awards**

LTIP award	31 December 2011 vesting projection (% of award)
Aviva LTIP 2011	50.00%
Aviva LTIP 2010	73.33%
Aviva LTIP 2009	81.67%

Details of the assumptions used in valuing the LTIP for accounting purposes can be found in note 30(e) to the Annual Report and Accounts. The vesting assumption made in respect of the 2011 award for accounting purposes is 50%.

Since the LTIP has performance conditions attached to it, one potential outcome is that neither performance condition is met and the whole of the LTIP lapses. Table 12 below has been produced to illustrate the potential value of the LTIP awards made to EDs in 2011 should the performance conditions be met in part or in whole.

**Table 12: Potential value of 2011 LTIP awards (rounded to nearest £50)**

LTIP	Andrew Moss	Patrick Regan	Trevor Matthews	Igal Mayer*
	£	£	£	£
Face value of grant	2,543,750	1,350,000	1,620,000	1,580,950
Threshold vesting	508,750	270,000	324,000	316,200
Expected value	1,472,350	781,400	937,700	915,050
Maximum vesting	3,385,750	1,796,850	2,156,200	2,104,250

\*Figures shown for Igal Mayer have been converted from Canadian dollars to pounds sterling at the average exchange rate for 2011 of CAD 1.5837 : £1.00.

Assumptions are as follows:

- Threshold vesting assumes TSR and ROCE elements vest at the minimum level, producing a 20% vesting of the total award. No share price growth is assumed.
- Expected value, based on the vesting assumption made for accounting purposes, assumes TSR and ROCE elements vest at a combined rate of 50% of the total award. Share price growth of 5% per annum is assumed over the three-year performance period.
- Maximum vesting assumes both TSR and ROCE elements vest in full, producing a 100% vesting. Share price growth of 10% per annum is assumed over the three-year performance period.

#### LTIP awards vesting in 2011

At the end of the performance period for the 2008 LTIP grant, which vested in 2011; the Company was ranked seventh out of the 16 companies in the TSR comparator group (22.3% vesting of the whole award) and ROCE was 44.3% (50% vesting of the whole award). The total vesting was therefore 72.3%. The 27.7% of the award which did not vest, lapsed.

The LTIP vesting history is set out in Table 13 below. Prior to the 2005 award, vesting history is based on an earlier LTIP plan, and the last award made under this plan was in 2004.

**Table 13: Vesting history of LTIP awards**

Year of grant	Performance period	Percentage of award vesting		
		ROCE	TSR	Total
2002	January 2002 to December 2004	23.3	23.0	46.3
2003	January 2003 to December 2005	30.0	34.9	64.9
2004	January 2004 to December 2006	30.0	34.9	64.9
2005	January 2005 to December 2007	50.0	0.0	50.0
2006	January 2006 to December 2008	41.3	15.0	56.3
2007	January 2007 to December 2009	50.0	0.0	50.0
2008	January 2008 to December 2010	50.0	22.3	72.3

Aviva has not historically awarded additional cash or shares for the dividends that were paid during the three-year performance period on those shares that vest. As outlined earlier in this report, the awards that will vest from the 2011 LTIP grants onwards will attract dividend equivalents, which is aligned to current market practice.

OATTV Plan awards were granted in 2008, 2009 and 2010 see Table 1 for more details. Based on the performance conditions attached to these awards, as described in the Directors' Remuneration Report for the year of grant, the 2008 awards resulted in none of the shares vesting, hence 100% of these awards lapsed, and none of the shares from 2009 awards will vest. The same outcome is currently forecast for the 2010 awards.

#### 2009–2011 LTIP and OATTV Plan: Performance outcome for group chief executive

The 2009 Directors' Remuneration Report disclosed the face value of the LTIP and OATTV Plan awards granted to all EDs at that time.

The face value of the LTIP and OATTV Plan awards granted to the group chief executive were £1,618,750 and £501,443 respectively. The total actual value of the awards that will vest is £1,553,388, based on the performance condition outcome and assuming a share price of 300.8p (which was the closing middle market price of an ordinary share of the Company on 30 December 2011).

### Performance graph

Table 14 below compares the TSR performance of the Company over the past five years with the TSR of the FTSE 100 Return Index. This index has been chosen because it is a recognised equity market index, of which Aviva is a member.

The companies which comprise the current LTIP comparator group for TSR purposes are listed in the 'TSR Targets' section above. The TSR graph for the comparator group has been plotted using the 20 companies (including Aviva) in the comparator group for pre-2005 grants, the 15 companies (including Aviva) in the comparator group for 2005–2007 grants, the 16 companies (including Aviva) in the comparator group for the 2008 grant, the 15 companies (including Aviva) in the comparator group for the 2009 and 2010 grants, and the 14 companies (excluding Aviva) in the comparator group for the 2011 grant.

**Table 14: Aviva plc five-year TSR performance against the FTSE 100 Return Index and the median of the comparator group**

### 13. Share awards

Table 15 below sets out the current position of those share-based awards made to the EDs who served during 2011 under current remuneration arrangements. This section (Share awards) and those sections headed 'Share options', 'Directors' remuneration in 2011' and 'EDs' pension arrangements' along with their associated footnotes have been subject to audit.

## Notes

- The actual price used to calculate the ABP and LTIP awards is based on a three-day average closing middle market price of an ordinary share of the Company. These were in 2008: 608p; 2009: 256p; 2010: 386p and 2011: 434p. The three-day average closing middle market price of an ordinary share of the Company used to grant the 2008 OATTV Plan awards was 617p; in 2009 was 256p; and in 2010 was 386p. The five day average closing middle market price of an ordinary share of the Company used to grant the Replacement Restricted Share Award (RRSA) in 2010 was 380.22p. The three-day average closing middle market price of an ordinary share of the Company used to grant the Bonus Replacement Deferred Share Award (BRDSA) in 2010 was 386p. The three-day average closing middle market price of an ordinary share of the Company used to grant the Conditional Share Award in 2011 was 309p.
- The performance periods for these awards begin at the commencement of the financial year in which the award is granted.
- The performance conditions for awards which were granted or which vested during 2011 are explained elsewhere in this report. The performance periods for these awards begin at the commencement of the financial year in which the award is granted.
- The award date for the awards granted in 2008 which vested in 2011 was 31 March 2008, the award date for the award granted in 2009 which vested in 2011 was 26 March 2009, and the award date for the award granted in 2010 which vested in 2011 was 11 March 2010. The awards which vested in 2011 were released with the net amount being settled in shares and the balance settled in cash and used to pay the resulting tax liability. The monetary value of awards will be calculated by multiplying the relevant number of shares by the closing middle market price of an ordinary share of the Company at the date of vesting.
- Igal Mayer's 2009 Aviva Annual Bonus Plan award vested in December 2011 due to Mr Mayer being subject to Canadian taxes. This is in accordance with the rules of this plan.
- The shares comprising these awards are restricted shares which are beneficially owned by the ED and held in trust on their behalf under the terms of a restricted share award agreement. As outlined in the 2010 Directors' Remuneration Report, income tax and National Insurance Contributions liabilities were paid on these awards on 30 March 2010.
- These figures relate to shares issued in lieu of dividends accrued during the deferral period.
- The awards under the CFO Recruitment Share Awards Plan were granted to Patrick Regan following his recruitment in 2010. As disclosed in the 2010 Directors' Remuneration Report, the RRSA will vest in tranches subject to Mr Regan meeting his personal performance targets, the OATTV is subject to the same performance conditions as the OATTV Plan awards granted to other EDs in 2010 and the BRDSA is not subject to performance conditions.
- The performance target attached to the first tranche of the RRSA was met and this tranche vested on 14 March 2011 being the first dealing day following the normal vesting date where no dealing restrictions were in place.
- The information shown in this column for Igal Mayer is on joining the Board on 19 January 2011.
- Trevor Matthews joined the Board on 2 December 2011 and held no share awards on appointment.
- These shares were awarded as phantom units which will be cash settled on vesting and no shares will be transferred or allotted.
- The information shown in this column for Mark Hodges is as at his resignation from the Board on 2 June 2011 and for Andrea Moneta is as at his resignation from the Board on 19 January 2011.
- 25% of Mark Hodges' 2009 ABP award, 50% of Mr Hodges' 2010 ABP award and 100% of Mr Hodges' LTIP awards, OATTV awards and 2011 ABP award subsequently lapsed on his leaving the Company on 9 September 2011. The remaining shares will vest on the normal vesting date.
- Andrea Moneta's ABP awards vested on 3 March 2011, the first business day after leaving the Company on 28 February 2011. Mr Moneta's LTIP and OATTV awards were time prorated on his leaving and the remaining shares will vest on the normal vesting date to the extent that the performance conditions have been achieved.
- The aggregate net value of share awards granted to the directors in the period was £12.1 million (2010: £9.5 million). The net value has been calculated by reference to the closing middle market price of an ordinary share of the Company at the date of grant. This excludes shares issued in lieu of dividends.

## 14. Share options

Details of the EDs who were in office for any part of the financial year, and hold or held options over ordinary shares of the Company, pursuant to the Company's share-based incentive plans, are set out in Table 16 below.

Savings-related share options in Table 16 refer to options granted under the HMRC-approved Aviva Savings Related Share Option Scheme or Aviva Savings Related Share Option Scheme 2007. Options are normally exercisable during the six-month period following the end of the relevant (three, five or seven-year) savings contract.

Executive share options (approved) in Table 16 refer to options granted under the HMRC-approved schedule to the Aviva Executive Share Option Plan 2005. Options will be exercisable on 30 March 2013 to the extent that the LTIP awards granted in 2010 have vested. Any gain made on exercise of these options will be used to reduce the number of shares vesting under the LTIP. Therefore, the vesting of the options will not increase the overall number of shares received by the EDs from their LTIP awards.

**Table 16: EDs' options over Aviva shares**

	At 1 January 2011 Number	Options granted during year Number	Options exercised during year Number	Options lapsing during year Number	At 31 December 2011 <sup>2</sup> Number	Exercise price Pence	Exercise period
<b>Andrew Moss</b>

Executive share options (approved) 2010	7,772	—	—	—	7,772	386.0	March 2013
<b>Patrick Regan</b>							
Savings-related options 2010	2,903	—	—	—	2,903	310.0	December 2013 – May 2014
Executive share options (approved) 2010	7,772	—	—	—	7,772	386.0	March 2013
<b>Igal Mayer<sup>1</sup></b>							
Savings-related options 2011	—	5,923	—	—	5,923	268.0	December 2018 – May 2019
<b>Mark Hodges</b>							
Savings-related options 2007	1,705	—	—	1,705	—	563.0	December 2010 – May 2011
Executive share options (approved) 2010	7,772	—	—	—	7,772	386.0	March 2013

### Notes

1 Igal Mayer joined the Board on 19 January 2011 and held no share options on appointment.

2 The information shown for Mark Hodges is as at his resignation from the Board on 2 June 2011. Mr Hodges' executive share options lapsed on leaving the Company on 9 September 2011.

The closing middle market price of an ordinary share of the Company on 30 December 2011, being the last business day of the year, was 300.8 pence, and the closing middle market price of an ordinary share of the Company during the year ranged from 275.3 pence to 477.9 pence. During the year, no share options were exercised by directors (2010: nil options exercised).

EDs did not pay for the award of any share options and options are not subject to performance conditions (the savings related options being granted under an all-employee share scheme and the executive share options being linked to awards under the LTIP which are subject to performance conditions).

## 15. EDs' employment contracts

The key terms and conditions of the EDs' employment, as stipulated in their employment contracts, are set out in Table 17 below.

**Table 17: EDs' key terms and conditions of employment**

Provision	Policy
Notice period	
By the director	6 months
By the Company	12 months, rolling. No notice or payment in lieu to be paid where the Company terminates for cause.
Termination payment	Pay in lieu of notice up to a maximum of 12 months' basic salary. This may be increased by a discretionary redundancy payment (where appropriate) but any such further termination payment is capped at 12 months' basic salary. Any amount is subject to phased payment and mitigation requirements.
Remuneration and benefits	As described in this report the operation of the ABP and LTIP is at the Company's discretion and, in the case of the long-term savings plans, at the trustees' discretion.
Expenses	Reimbursement of expenses reasonably incurred in accordance with their duties.
Holiday entitlement	30 working days plus public holidays.
Sickness	In line with senior management terms, i.e. 100% basic salary for 52 weeks, and 75% thereafter.
Non-compete	During employment and for six months after leaving.
Contract dates	Director: Date current contract commenced:
	Andrew Moss 1 January 2007
	Patrick Regan 22 February 2010
	Igal Mayer 19 January 2011
	Trevor Matthews 2 December 2011
	Mark Hodges 26 June 2008*
	Andrea Moneta 28 September 2009**

\* Mark Hodges resigned from the Board on 2 June 2011 and left the Company on 9 September 2011.

\*\*Andrea Moneta resigned from the Board on 19 January 2011 and left the Company on 28 February 2011.

## 16. Share ownership requirements

An internal shareholding requirement was introduced in 2005 that the group chief executive and any ED should build, over a five-year period, a shareholding in the Company equivalent to 175% of basic salary and 150% of basic salary respectively and no specific value per share was designated for the calculation.

As outlined in section 2, following the 2011 AGM, the shareholding requirement was increased to 200% for the group chief executive. In addition, the EDs including the group chief executive are required to retain 50% of the net share releases from the deferred annual bonuses and LTIPs until the shareholding requirements have been reached, which will not have a target date.

Unvested share awards including shares held in connection to compulsory bonus deferrals are not taken into account in applying this test. Table 18 shows the position at 30 December 2011, based on that day's closing middle market price of an ordinary share of the Company of 300.8 pence.

**Table 18: EDs' share ownership requirements**

	Basic salary	Shareholding excluding restricted shares	Value of shareholding based on a share price of 300.8 pence*	Percentage of basic salary	Shareholding requirement
Andrew Moss**	£960,000	352,149	£1,059,264	110%	200%
Patrick Regan	£635,000	98,711	£296,923	47%	150%
Igal Mayer	£632,380***	226,150	£680,259	108%	150%
Trevor Matthews	£720,000	—	—	0%	150%

\* 300.8 pence was the closing middle market price of an ordinary share of the Company on 30 December 2011.

\*\* Due to exceptional personal circumstances, the Committee has exercised discretion to waive the share ownership requirement for Andrew Moss for 2011.

\*\*\*Igal Mayer's basic salary has been converted from Canadian dollars to pounds sterling at the average exchange rate for 2011 of CAD 1.5837 : £1.00.

## 17. External board appointments

Aviva recognises its EDs can benefit from serving in a personal capacity as a non-executive director (NED) of non-Aviva Group companies. It is, at the same time, conscious of the corporate governance recommendations that EDs should take account of the time commitment required by a non-executive director position and ensure any such role does not impact their ability to carry out fully their executive duties. The Company therefore has a policy of normally allowing senior executives to serve as a NED of one external company, subject to approval by the Board, and to retain any Board fees. None of the EDs held external NED appointments during 2011.

## 18. All employee share plans

EDs are eligible to participate in a number of HMRC-approved all employee share plans on the same basis as other eligible employees.

These plans include a free share element of the Aviva All Employee Share Ownership Plan (AESOP). Under this element of the plan, eligible employees can receive up to a maximum of £3,000 per annum in shares based upon the profits of the Company's UK businesses. The shares are free of tax subject to a retention period. Free shares were awarded in 2011. In addition, the partnership element of the AESOP, which the Company also operates, allows participants to invest up to £125 per month out of their gross salary in the Company's shares. There is currently no matching element to this investment by the Company. Shares awarded to, or investments made by, EDs through the AESOP are included in Table 24 of this report.

The Aviva Savings Related Share Option Scheme and Aviva Savings Related Share Option Scheme 2007 allow eligible employees to acquire options over the Company's shares at a discount of up to 20% of their market value at the date of grant. In order to exercise these options, participants must have saved through a three, five or seven-year HMRC-approved savings contract, subject to a maximum savings limit of £250 per month. Details of options granted to EDs under these schemes can be found in Table 16 above.

## 19. Dilution

Awards granted under the Aviva employee share plans are met by the funding of an employee trust administered by an external trustee that acquires shares in the market. The current practice is that new issue shares will generally only be issued where it is not practicable to use the trust and the funding policy is kept under review by the Committee and the Board. Details of the shares currently held in the employee trust are set out in note 31 to the Annual Report and Accounts.

During 2011, loans totalling £27.7 million were made to RBC Trustees (CI) Limited to ensure sufficient shares were available to meet its ongoing liabilities.

The Company monitors the number of shares issued under the Aviva employee share plans and their impact on dilution limits. The Company's usage of shares compared to the relevant dilution limits set by the Association of British Insurers (ABI) in respect of all share plans (10% in any rolling ten-year period) and executive share plans (5% in any rolling ten-year period) was 4.22% and 2.23% respectively on 31 December 2011.

## 20. Non-executive directors

The NEDs, including the chairman of the Company, have letters of appointment which set out their duties and responsibilities. The key terms of the appointments are set out in Table 19 below.

**Table 19: NED key terms of appointment**

Provision	Policy		
Period	Following the introduction of the UK Corporate Governance Code, all NEDs are subject to annual re-election by shareholders at each AGM.		
Termination	By the director or the Company at their discretion without compensation upon giving one month's written notice for NEDs and three months' written notice for the chairman designate.		
Fees	As described below.		
Expenses	Reimbursement of travel and other expenses reasonably incurred in the performance of their duties.		
Time commitment	Each director must be able to devote sufficient time to the role in order to discharge his or her responsibilities effectively and spend a minimum of 25 days a year on Company business, with the chairmen of the Audit, Remuneration and Risk Committees spending substantially more.		
Non-compete	During term of directorship and for six months after leaving		
Appointment dates	Director	Date of last appointment on letter of appointment	Appointment end date on letter of appointment
	Mary Francis	4 May 2011	AGM 2012
	Richard Karl Goeltz	4 May 2011	AGM 2012
	Euleen Goh	4 May 2011	AGM 2012
	Michael Hawker	4 May 2011	AGM 2012
	Gay Huey Evans	20 October 2011	AGM 2012
	John McFarlane	1 September 2011	AGM 2012
	Carole Pivnica	4 May 2011	AGM 2012*
	Lord Sharman	4 May 2011	AGM 2012
	Leslie Van de Walle	4 May 2011	AGM 2012
	Russell Walls	4 May 2011	AGM 2012
	Scott Wheway	4 May 2011	AGM 2012

\*Carole Pivnica retired from the Board on 1 December 2011.

It is the Company's policy to set the fees paid to its chairman and NEDs taking account of the median market payments in international companies of similar size and complexity. NEDs receive a basic annual fee in respect of their Board duties. A further fee is paid to NEDs (other than the chairman of the Company) in respect of membership and, where appropriate, chairmanship of Board committees.

Fees are reviewed annually and are set by the Board to attract individuals with the required range of skills and experience. In determining the level of fees paid to the NEDs the Board receives recommendations from the EDs, who consider the NEDs' duties and responsibilities, together with the time commitment required in preparing for and attending meetings, and the amounts paid by competitors and similar-sized companies.

Following a review in February 2011 of the chairman of the Company's fee against market benchmarks for the 25 FTSE companies either side of Aviva's market capitalisation and in light of the freeze in his fee level since 2008, it was agreed to increase the chairman of the Company's fee from £495,000 per annum to £550,000 per annum. This increase was effective from 1 April 2011. There were no other fee increases for NEDs during 2011.

The chairman of the Company and NEDs do not participate in any incentive or performance plans or pension arrangements and they also do not receive an expense allowance.

The Company's articles of association provide that the total aggregate remuneration paid to the chairman of the Company and NEDs will be determined by the Board within the limits set by shareholders. The current aggregate limit of £1.5 million was approved by shareholders at the Company's 2005 AGM. The Company proposes to increase this limit to £2 million as part of the amendments to the Company's articles of association, which are subject to approval by shareholders at the Company's 2012 AGM. The amount paid in 2011 was £1.4 million. EDs are remunerated under their employment contracts and receive no additional fee for serving as directors.

NEDs' fees which were payable from 1 April 2011 are set out in Table 20 below.

**Table 20: NEDs' fees from 1 April 2011**

Chairman of the Company	£550,000
Board membership fee	£65,000
Additional fees are paid as follows:	
Senior independent director	£25,000
Committee chairman	
– Audit	£35,000 (inclusive of committee membership fee)
– Corporate Responsibility	£10,000 (inclusive of committee membership fee)
– Remuneration	£30,000 (inclusive of committee membership fee)
– Risk	£35,000 (inclusive of committee membership fee)
Committee membership	
– Audit	£10,000
– Corporate Responsibility	£7,500
– Nomination	£7,500
– Remuneration	£10,000
– Risk	£10,000

EDs' employment contracts and NEDs' letters of appointment are available for inspection at the Company's registered office during normal hours of business, and at the place of the Company's 2012 AGM from 10.45am on Thursday 3 May 2012 until the close of the meeting.

## 21. Directors' remuneration in 2011

Table 21 below sets out the remuneration paid or payable to the directors in respect of the year to 31 December 2011.

**Table 21: Directors' remuneration in 2011**

	Basic salary/fees		Bonuses <sup>1</sup>		ACAP		Benefits <sup>2</sup>		Total	
	2011 <sup>9</sup> £000	2010 £000	2011 <sup>9</sup> £000	2010 £000	2011 <sup>9</sup> £000	2010 £000	2011 <sup>9</sup> £000	2010 £000	2011 <sup>9</sup> £000	2010 £000

### Notes

- Bonuses show the value at the date of award inclusive of the two-thirds of bonus which Aviva requires its EDs to defer into Aviva shares for three years.
- All the EDs received life assurance benefits during the year that relate to the cost incurred by the Company of insuring the directors' life benefits which, had the director died during the year, could not have been wholly paid by the pension scheme and would therefore have been met by the Company had the insurance not been in place. The disclosure also includes the cost of private medical insurance and, where appropriate, accompanied travel, accommodation, relocation, security and car benefits. All the numbers disclosed include the tax charged on the benefits, where applicable. No directors received an expense allowance during the year.
- Figures shown for Igal Mayer have been converted from Canadian dollars to pounds sterling at the average exchange rate for 2011 of CAD 1.5837 : £1.00. As previously stated, Mr Mayer is entitled to first class return flights between Toronto and London and a travel allowance of up to £40,000 per annum for his spouse and dependent children for travel to and from Toronto and London. Aviva meets the cost of rental accommodation in London of up to £5,000 per month plus utility costs in line with standard policy, and met the rental costs for his apartment in the US for the short period from his appointment as an ED until he moved out. Mr Mayer also receives assistance in preparing his tax returns. Aviva meets the cost of any taxes due on these benefits. These figures are included in the table above.
- Under the terms of his letter of appointment, Igal Mayer is entitled to be reimbursed up to a maximum of £100,000, for costs incurred in connection with relocation from the US. A sum of £35,699 has been paid against this allowance, and is included in the figures above.
- Figures shown for Andrea Moneta have been converted from euros to pounds sterling at the average exchange rate for 2011 of €1.1536 : £1.00. As previously stated, legal fees of £35,000 were paid directly to Mr Moneta's solicitor and are included in the table above.
- The Chairman received travel-related benefits.
- Although no costs were incurred in 2011, under the terms of his letter of appointment, John McFarlane is entitled to be reimbursed for any such costs reasonably incurred in connection with his relocation to the UK during the 12-month period from the date of his appointment, up to a maximum of £125,000 together with any VAT or equivalent tax payable thereon. He is also entitled to the reimbursement of the costs incurred in respect of advice sought on the legal and tax implications of his appointment.
- NEDs are reimbursed for expenses, and any tax arising on those expenses is settled directly by Aviva.
- The amount shown for Andrea Moneta is the amount paid in 2011 up to Mr Moneta leaving the Board on 19 January 2011 and for Mark Hodges, it is the amount paid in 2011 up to Mr Hodges leaving the Board on 2 June 2011.
- For the purposes of the disclosure required by Schedule 5 to the Large & Medium-sized Companies and Groups (Accounts & Reports) Regulations 2008, the total aggregate emoluments of the directors in respect of 2011 was £6.3 million (2010: £6.8 million).

Fees earned in 2011 by the NEDs are set out in Table 22 below.

**Table 22: NEDs' fees earned in 2011**

	Board membership fees	Senior independent director	Committee Chairman/Membership					Total fees
			Remuneration	Audit	Nomination	Corporate Responsibility	Risk	
Lord Sharman, Chairman <sup>1</sup>	£536,250							£536,250
Mary Francis <sup>2</sup>	£65,000		£4,167	£10,000	£7,500		£26,666	£113,333
Richard Karl Goeltz	£65,000	£25,000		£10,000	£7,500			£107,500
Euleen Goh	£65,000			£10,000		£7,500		£82,500
Michael Hawker <sup>3</sup>	£65,000		£5,833	£3,333			£18,334	£92,500
Gay Huey Evans <sup>4</sup>	£12,970					£1,705		£14,675
John McFarlane <sup>5</sup>	£21,667				£2,500			£24,167
Carole Pivnicka <sup>6</sup>	£65,000		£10,000			£10,000		£85,000
Leslie Van de Walle	£65,000		£10,000				£10,000	£85,000
Russell Walls	£65,000			£35,000	£7,500		£10,000	£117,500
Scott Wheway	£65,000		£30,000			£7,500		£102,500

**Notes**

- The Chairman's fee increased from £495,000 to £550,000 on 1 April 2011.
- Mary Francis stepped down as Chairman of the Risk Committee on 1 September 2011 and as a member of the Remuneration Committee on 1 June 2011.
- Michael Hawker was appointed Chairman of the Risk Committee on 1 September 2011 and became a member of the Remuneration Committee on 1 June 2011, and the Audit Committee on 1 September 2011.
- Gay Huey Evans joined the Board and became a member of the Corporate Responsibility Committee on 20 October 2011, and Chairman of the Corporate Responsibility Committee on 1 December 2011.
- John McFarlane joined the Board and became a member of the Nomination Committee on 1 September 2011.
- Carole Pivnicka stepped down from the Board and as Chairman of the Corporate Responsibility Committee and as a member of the Remuneration Committee on 1 December 2011.

## 22. Senior executives' remuneration

The total compensation paid during the year to key management personnel, being those having authority and responsibility for planning, directing and controlling the activities of the Company, including the Company's EDs and NEDs (as required to be disclosed by International Accounting Standard 24) was £65 million (2010: £66 million) and is set out in note 59 to the Annual Report and Accounts.

## 23. EDs' pension arrangements

The positions of the EDs with respect to accumulated pension benefits under the defined benefits section of the ASPS is set out in Table 23 below.

**Table 23: EDs' pension benefits**

Benefit type	Andrew Moss	Mark Hodges	Igal Mayer <sup>8</sup>	Patrick Regan <sup>9</sup>
	£000	£000	£000	£000
	Defined benefit	Defined benefit	Defined benefit	Defined contribution
Accrued annual pension at 31 December 2010 <sup>1</sup>	21.8	83.6	388.5	—
Accrued annual pension at 31 December 2011 <sup>1</sup>	22.5	86.2	430.9	—
Gross increase in accrued pension over the year	0.7	2.6	42.4	—
Increase (decrease) in accrued pension net of inflation over the year	—	—	33.5	—
Employee contributions during the year <sup>2</sup>	—	—	—	—
Defined contribution employer contributions during the year	—	—	—	71.9
Transfer value of accrued pension at 31 December 2010 <sup>4</sup>	365.1	1,091.7	6,518.5	—
Transfer value of accrued pension at 31 December 2011 <sup>4</sup>	529.5	1,802.9	8,652.2	—
Change in transfer value during the period less employee contributions <sup>3, 7</sup>	164.4	711.2	2,133.7	—
Transfer value of net increase (decrease) in accrued pension less employee contributions <sup>6</sup>	—	0	1,686.0	—
Age at 31 December 2011 (years)	53	46	50	45

**Notes**

- Accrued pensions shown are the amounts that would be paid annually on retirement based on service to the end of the year.
- Benefits deriving from Additional Voluntary Contributions (AVCs) and employee contributions into the defined contribution scheme paid by directors are excluded from the amounts above.
- The change in transfer value allows for fluctuations in the transfer value due to factors beyond the control of the Company and directors, such as changes in stock market conditions.
- The transfer values have been calculated in line with the relevant legislation and using actuarial assumptions agreed by the trustee.
- No former directors received any increase in retirement benefits in excess of the amount to which they were entitled, on the later of the date when the benefits first became payable, or 31 March 1997.
- The transfer value of net increase (decrease) in accrued pension shows the value of the increase (decrease) in accrued pension net of inflation, over the year net of contributions.
- The basis used to calculate transfer values for UK scheme members of the defined benefit section changed during 2011 and this contributes to the increase in transfer values over the year.
- Igal Mayer is a member of the Aviva Canada Pension Plan, and the figures shown for him have been converted from Canadian dollars to pounds sterling at the average exchange rate for 2011 of CAD 1.5837 : £1.00.
- In addition to his contributions quoted in the table above, Patrick Regan has a sum of £100,612 in lieu of pension contributions that exceed the £50,000 annual allowance held on account. This balance, together with any further amounts accrued for the first quarter of 2012, will be applied for Mr Regan's benefit in March/April 2012.
- Trevor Matthews did not receive any pension contributions for 2011. Contributions will begin to accrue from 1 January 2012.

## 24. Directors' interests in Aviva shares

The interests held by each person who was a director at the end of the financial year and their connected persons in the ordinary shares of the Company are shown in Table 24 below. All the disclosed interests are beneficial. The table also summarises the interests in shares held through the Company's various share incentive plans. Details of the options and long-term incentive awards are shown below.

**Table 24: Directors' interests in Aviva Shares<sup>15</sup>**

	Shares <sup>1</sup>		ABP <sup>2</sup>		LTIP <sup>3</sup>		OATTV Plan <sup>4</sup>		Options <sup>5</sup>	
	1 January 2011	31 December 2011	1 January 2011	31 December 2011	1 January 2011	31 December 2011	1 January 2011	31 December 2011	1 January 2011	31 December 2011
Mary Francis	4,700	4,700	—	—	—	—	—	—	—	—
Richard Karl Goeltz	7,500	17,500	—	—	—	—	—	—	—	—

Scott Whewey	13,579	13,579	—	—	—	—	—	—	—	—

### Notes

- <sup>1</sup> 'Shares' are the directors' beneficial holdings in the ordinary shares of the Company and in respect of the EDs include shares held in trust under the Company's AESOP being shares purchased by them under the partnership element and shares granted under the free share element. In respect of Andrew Moss, it also includes the remaining restricted shares held in trust from his ABP awards, and for Patrick Regan it includes the remaining restricted shares held in trust from his RRSA and BRDSA awarded under the rules of the CFO Recruitment Share Awards Plan.
- <sup>2</sup> ABP relates to entitlements to shares arising through the Aviva Annual Bonus Plan 2005 and the Aviva Annual Bonus Plan 2011. Under these plans some of the earned bonuses are paid in the form of restricted shares or conditional shares and deferred for three years. The transfer of the shares to the director at the end of the period is not subject to the attainment of performance conditions but a proportion of the shares can be forfeited if the executive leaves service before the end of the period. In respect of Andrew Moss, 220,067 of the shares held as at 31 December 2011 are restricted shares. In respect of Patrick Regan, 213,624 of the shares held as at 31 December 2011 represent the RRSA and BRDSA awarded under the rules of the CFO Recruitment Share Awards Plan and are restricted shares. In respect of Trevor Matthews, these shares represent the Conditional Share Award.
- <sup>3</sup> Awards granted under the LTIP which vest only if the performance conditions are achieved.
- <sup>4</sup> OATTV Plan awards were granted as a match to the bonus plan awards under the ABP and vest only if the performance conditions are achieved.
- <sup>5</sup> 'Options' are options over shares granted under the SAYE and the Aviva Executive Share Option Plan 2005 as detailed in section 14.
- <sup>6</sup> Gay Huey Evans was appointed as a director on 20 October 2011. On appointment, she held no shares, awards or options.
- <sup>7</sup> Trevor Matthews was appointed as a director on 2 December 2011. On appointment, he held no shares, awards or options.
- <sup>8</sup> Igal Mayer was appointed as a director on 19 January 2011 and the information shown in the columns labelled 1 January 2011 is as at his appointment as a director.
- <sup>9</sup> John McFarlane was appointed as a director on 1 September 2011. On appointment, he held no shares, awards or options.
- <sup>10</sup> These shares represent the Conditional Share Award.
- <sup>11</sup> These shares were awarded as phantom units which will be cash settled on vesting and no shares will be transferred or allotted.
- <sup>12</sup> 433,296 of these shares were awarded as phantom units which will be cash settled on vesting and no shares will be transferred or allotted.
- <sup>13</sup> These shares include the restricted shares from RRSA and BRDSA awarded under the rules of the CFO Recruitment Share Awards Plan.
- <sup>14</sup> These shares represent the OATTV awarded under the rules of the CFO Recruitment Share Awards Plan.
- <sup>15</sup> The interests of connected persons to the directors are included in the directors' interests above.

There were no changes to the directors' interests in Aviva shares during the period 1 January 2012 to 1 March 2012.

## 25. Former directors

### Andrea Moneta

Andrea Moneta resigned from the Board on 19 January 2011 and left the Company by mutual consent on 28 February 2011. His earnings as an ED during 2011 are set out in table 7. As disclosed in the 2010 Directors' Remuneration Report, Mr Moneta received a payment of €400,000 in March 2011, which was a contractual entitlement as payment for loss of earnings, options and performance shares from a previous employer. He also received a payment of €50,000 as compensation for loss of employment. In accordance with his minimum contractual entitlement, he also received basic salary in lieu of his notice period for 12 months from his termination date, but no additional pay or benefits. He received no bonus in connection with 2011 performance. As outlined in table 7, a payment of £35,000 was made to Mr Moneta's solicitor in respect of advising on Mr Moneta's departure.

Deferred shares earned during his period of employment were released to him on the first dealing day following his departure date. LTIP and OATTV Plan awards will vest on a pro rata basis on their normal vesting date and in accordance with the performance condition outcomes.

### Mark Hodges

Mark Hodges resigned from the Board on 2 June 2011 and left the Company on 9 September 2011. His salary payments ceased on 9 September 2011. In accordance with the ABP rules, 75% of the unvested deferred shares awarded in March 2009, and 50% of unvested deferred shares awarded in March 2010 will vest and be released at the end of the relevant three-year deferral period. The remainder of these shares, plus 100% of the deferred shares awarded in March 2011, lapsed on the date Mr Hodges tendered his resignation. Mr Hodges received no bonus in connection with 2011 performance. All unvested LTIP and OATTV Plan awards lapsed, with no shares being released from these awards.

## 26. Developments in 2012

Glyn Barker was appointed to the Board as a NED on 27 February 2012 and will receive the standard Board membership fee.

## 27. Directors' Remuneration Report

This Directors' Remuneration Report was reviewed and approved by the Board on 7 March 2012.

### Scott Wheway

Chairman, Remuneration Committee

# Shareholder information

## Company address

The Company's registered office is St Helens, 1 Undershaft, London EC3P 3DQ.  
The Company's telephone number is +44 (0)20 7283 2000.

## Share capital

The Company has four share classes:

- Ordinary shares of 25 pence each which constitute our equity security and hold voting rights;
- Cumulative irredeemable preference shares of £1 each, which entitle holders to attend and vote at general meetings only when dividends on such shares are in arrears. Cumulative irredeemable preference shareholders may also attend general meetings and vote on particular proposals when such proposals relate to an alteration of the rights attaching to such shares, a reduction of capital (other than through a redemption or repurchase of shares) or a winding up of business;
- Sterling new preference shares of £1 each, which have such rights and terms (including terms related to the redemption of shares, ranking and entitlement to dividend and capital) as the Board determines; and
- Euro new preference shares of €1 each, which have such rights and terms (including terms related to the redemption of such shares, ranking and entitlement to dividend and capital) as the Board determines.

## Issued share capital

The Company had aggregate issued and outstanding ordinary share capital of £726 million as of 31 December 2011. The following table sets forth information about the issued and outstanding classes of equity as of 31 December 2011.

Share class	Shares issued and outstanding			Shares covered by outstanding option		
	2011 million	2010 million	2009 million	2011 million	2010 million	2009 million
Ordinary shares, nominal value 25p	<b>2,905</b>	2,820	2,766	<b>30</b>	27	26
8.375% Cumulative irredeemable preference shares, nominal value £1	<b>100</b>	100	100	—	—	—
8.75% Cumulative irredeemable preference shares, nominal value £1	<b>100</b>	100	100	—	—	—
New preference shares, nominal value £1	—	—	—	—	—	—
New preference shares, nominal value €1	—	—	—	—	—	—

The Companies Act 2006 abolished the requirement for a company to have an authorised share capital and the articles of association adopted by the Company on 28 April 2010 reflect this. Directors are still limited as to the number of shares they can at any time allot, as the allotment authority continues to be required under the Act, save in respect of employee share schemes. Ordinary shares in issue in the Company rank pari passu. All the ordinary shares in issue carry the same right to receive all dividends and other distributions declared, made or paid by the Company.

The Company is not permitted under English law to hold its own ordinary shares. While the Company is presently authorised to repurchase up to 282 million ordinary shares, any shares that are repurchased must be cancelled. Details of the Company's dividends, including the paying agents, are set out below under 'Articles of Association'.

## Share options and awards

The Company maintains a number of active stock option and share award schemes. Details of these schemes are set out in 'Financial statements IFRS – Note 30 – Equity compensation plans'.

## Share Investment Plan

The Company's UK resident employees of participating companies can buy ordinary shares in the Company by making monthly contributions from their gross salary. Contributions can be a minimum of £5 and up to a maximum of £125 per month (or, if less, 10% of gross salary). Contributions are held in a trust by an independent trustee and shares are allocated within 30 days of the employee's monthly contribution date. Employees can withdraw their shares from the trust at any time on payment of income tax and National Insurance Contributions (NIC). However, after five years shares can be withdrawn from the trust free of income tax and NIC.

## Shares to satisfy options and awards

Prior to March 2003, it was the practice to satisfy options and awards granted under the Group's share plans through shares purchased in the market and held by employee share trusts which were established for the purpose of satisfying awards under the various Group share plans and funded by the Company.

From March 2003 to July 2008, it was generally the Company's practice to satisfy the awards granted after March 2003 by the issue of new shares at the time of vesting. However, since July 2008, it has been the Company's practice to satisfy all awards and options using shares purchased in the market and held by employee trusts except where local regulations make it necessary to issue new shares.

At 31 December 2011, 13,284,476 shares were held by the employee share trusts as compared to 8,415,487 at 31 December 2010, in both instances following the share purchases and distributions to individual employees throughout the year. These shares have an aggregate nominal value of £3,321,119 and market value £39,959,704 as of 31 December 2011, compared to £2,103,871 and £33,072,864 at 31 December 2010, respectively. Shares held by separate employee share trusts on behalf of specific individuals have not been included in these amounts. Further details are given in 'Financial statements IFRS – Note 31 – Shares held by employee trusts.'

**History of share capital**

The following table sets out information about the history of the Company's ordinary shares over the last three full calendar years.

	Number of shares outstanding
<b>At 1 January 2009</b>	<b>2,657,701,624</b>
Shares issued under the Group's Employee and Executive Share Option Schemes <sup>1</sup>	951,455
Shares issued in lieu of dividends <sup>2</sup>	107,958,295
<b>At 31 December 2009</b>	<b>2,766,611,374</b>
Shares issued under the Group's Employee and Executive Share Option Schemes <sup>1</sup>	722,968
Shares issued in lieu of dividends <sup>2</sup>	52,814,300
<b>At 31 December 2010</b>	<b>2,820,148,642</b>
Shares issued under the Group's Employee and Executive Share Option Schemes <sup>1</sup>	1,574,706
Shares issued in lieu of dividends <sup>2</sup>	83,989,590
<b>At 31 December 2011</b>	<b>2,905,712,938</b>

<sup>1</sup> For more information on our various option schemes, see note 30 in the financial statements.

<sup>2</sup> The issue of shares in lieu of cash dividends is considered a bonus issue under the terms of the Companies Act 2006 and the nominal value of the shares is charged to the share premium account.

The Company issued shares pursuant to special resolutions passed on 10 May 2006, increasing the authorised share capital from £1.45 billion and €700 million to £1.95 billion and €700 million by the creation of 500 million new preference shares of £1 each, and allowing the directors, subject to certain conditions, to issue equity securities up to the aggregate nominal value of £150 million. This authority expired at the conclusion of the AGM in 2007.

A further ordinary resolution was passed on 26 April 2007 allowing the directors, subject to certain conditions, to allot equity securities up to the aggregate nominal value of £108 million. This authority expired at the conclusion of the AGM in 2008. An ordinary resolution was passed on 1 May 2008 allowing the directors, subject to certain conditions, to issue equity securities up to the aggregate nominal value of £94 million. This authority expired at the conclusion of the AGM in 2009. Ordinary resolutions were passed on 29 April 2009, increasing the authorised share capital from £1.95 billion and €700 million to £2.5 billion and €700 million by the creation of 2.2 billion ordinary shares of 25 pence each, and allowing the directors, subject to certain conditions, to issue equity securities up to the aggregate nominal value of £221 million and up to £443 million in connection with an offer by way of a rights issue. This authority expired at the conclusion of the AGM on 28 April 2010.

The Companies Act 2006 abolished the requirement for a company to have an authorised share capital and the articles of association adopted by the Company on 28 April 2010 reflect this. Directors are still limited as to the number of shares they can at any time allot, as the allotment authority continues to be required in the Act save in respect of employee share schemes.

There were no changes to the voting rights of any class of shares during 2009, 2010 or 2011, other than issuances in connection with our various employee option schemes and under the Company's scrip dividend scheme. The Company did not issue shares for consideration other than cash during 2009, 2010 or 2011. In addition, at the Company's general meetings in 2009, 2010 and 2011, shareholders authorised the limited dis-application of Section 561 of the Companies Act 2006 to permit the Company to issue new equity securities for cash without applying shareholders' statutory pre-emptive rights.

## Related party disclosures

### Related party transactions

For more information relating to related party transactions, including more information about the transactions described below, please see 'Financial statements IFRS – Note 59 – Related party transactions'.

### Subsidiaries

Transactions between the Company and its subsidiaries are eliminated on consolidation.

However, the Company has transactions and outstanding balances with certain unit trusts, Open Ended Investment Companies, collateralised debt obligations and similar entities which are not consolidated and where a Group company acts as manager. These entities are regarded as related parties for the purposes of International Accounting Standard (IAS) 24. The balances are included in the Group's statement of financial position at fair value or amortised cost in accordance with their IAS 39 classifications. The transactions are included in the income statement and include amounts paid on issue of shares or units, amounts received on cancellation of shares or units and paid in respect of the periodic charge and administration fee.

### Directors and key management

The total compensation to those employees classified as key management, being those having authority and responsibility for planning, directing and controlling the activities of the Group, including the executive and non-executive directors is as follows:

	2011 £m	2010 £m	2009 £m
Salary and other short-term benefits	36	36	39
Post-employment benefits	9	7	5
Equity compensation plans	18	21	16
Termination benefits	2	2	1
<b>Total</b>	<b>65</b>	<b>66</b>	<b>61</b>

Various directors and key management of Aviva may from time to time purchase insurance, asset management or annuity products, or be granted mortgages marketed by Aviva Group companies in the ordinary course of business on substantially the same terms, including interest rates and security requirements, as those prevailing at the time for comparable transactions with other persons.

Apart from the disclosed transactions discussed above and in the 'Governance' section of this report, no director had an interest in shares, transactions or arrangements that requires disclosure under applicable rules and regulations.

### Other related parties

The Group received income from and paid expenses to other related parties from transactions made in the normal course of business. Loans to other related parties are made on normal arm's length commercial terms.

### Services provided to other related parties

	2011		2010		2009	
	Income earned in year £m	Receivable at year end £m	Income earned in year £m	Receivable at year end £m	Income earned in year £m	Receivable at year end £m
Associates	—	—	47	—	49	3
Joint ventures	23	125	18	375	17	327
Employee pension schemes	13	9	10	2	9	2
<b>Total</b>	<b>36</b>	<b>134</b>	<b>75</b>	<b>377</b>	<b>75</b>	<b>332</b>

In addition to the amounts disclosed for associates in the table above, at 31 December 2011 amounts payable at year-end were £49 million, and expenses incurred during the period were £3 million.

Transactions with joint ventures relate to the property management undertakings, the most material of which are listed in note 18(b). Our interest in these joint ventures comprises a mix of equity and loans, together with the provision of administration services and financial management to many of them. Our UK life insurance companies earn interest on loans advanced to these entities and our fund management companies also charge fees to these joint ventures for administration services and for arranging external finance.

Our UK fund management companies manage most of the assets held by the Group's main UK staff pension scheme, for which they charge fees based on the level of funds under management. The main UK scheme holds investments in Group-managed funds and insurance policies with other Group companies, as explained in note 47(e)(iii).

The related parties' receivables are not secured and no guarantees were received in respect thereof. The receivables will be settled in accordance with normal credit terms. Details of guarantees, indemnities and warranties provided on behalf of related parties are given in 'Financial statements IFRS – Note 51 – contingent liabilities and other risk factors'.

### Loans to joint ventures

We make loans to our property management joint ventures to fund property developments which we undertake with our joint venture partners. Movements in these loans may be found in 'Financial statements IFRS – Note 18 – Interests in, and loans to, joint ventures'. Total loans at 31 December 2011 and at the end of each of the last three financial years are shown in the table below:

	2011 £m	2010 £m	2009 £m
Loans to joint ventures	100	375	327

## Dividend data

The Company's dividend policy is to sustain a target dividend cover of between one and a half and two times our adjusted operating profit after tax before amortisation of goodwill and adjusting items. Under UK company law, we may only pay dividends if the company has 'distributable profits' available. 'Distributable profits' are accumulated, realised profits not previously distributed or capitalised, less accumulated, unrealised losses not previously written off based on IFRS. Even if distributable profits are available, we pay dividends only if the amount of our net assets is not less than the aggregate of our called-up share capital and undistributable reserves and the payment of the dividend does not reduce the amount of our net assets to less than that aggregate.

As a holding company, the Company is dependent upon dividends and interest from our subsidiaries to pay cash dividends. Many of the Company's subsidiaries are subject to insurance regulations that restrict the amount of dividends that they can pay to us.

Historically, the Company has declared an interim and a final dividend for each year (with the final dividend being paid in the year following the year to which it relates). Subject to the restrictions set out above, the payment of interim dividends on ordinary shares is made at the discretion of our Board, while payment of any final dividend requires the approval of the Company's shareholders at a general meeting. Preference shares are irredeemable and dividends on preference shares are made at the discretion of our Board.

The Company pays cash dividends in pounds sterling, although the articles of association permit payment of dividends on ordinary shares in other currencies and in forms other than cash, such as ordinary shares. If dividends on ordinary shares held by the American Depositary Shares (ADS) depositary are paid in pounds sterling, the ADS depositary will convert the pounds sterling that it receives on behalf of the ADS holders into US dollars according to the prevailing market rate on the date that the ADS depositary actually receives the dividends.

For the 2007 final dividend and previous final and interim dividends, shareholders on record were provided with the opportunity to elect to receive dividends in the form of newly issued ordinary shares through the Aviva Scrip Dividend Scheme. For the 2008 interim dividend, the Aviva Scrip Dividend Scheme was replaced by a dividend reinvestment plan (DRIP). For those shareholders participating in the DRIP, the Company paid a cash dividend, which was then used to buy existing shares on the open market. For the 2008 final dividend, Aviva withdrew the DRIP and reintroduced the Aviva Scrip Dividend Scheme.

An interim dividend is generally paid in November of each year. A final dividend is proposed by the Company's Board after the end of the relevant year and generally paid in May. The following table shows certain information regarding the dividends that we paid on ordinary shares for the periods indicated in pounds sterling and converted into US dollars at the noon buying rate in effect on each payment date.

Year	Interim dividend per share (pence)	Interim dividend per share (cents)	Final dividend per share (pence)	Final dividend per share (cents)
2006	10.82	20.49	19.18	37.88
2007	11.90	24.37	21.10	41.31
2008	13.09	19.69	19.91	30.31
2009	9.00	14.75	15.00	23.55
2010	9.50	15.20	16.00	25.80
<b>2011</b>	<b>10.00</b>	<b>15.70</b>	<b>16.00</b>	<b>na</b>

## Guarantees, securitised assets and off-balance sheet arrangements

As a normal part of our operating activities, various Group companies have given financial guarantees and options, including interest rate guarantees, in respect of certain long-term assurance and fund management products, as set out in 'Financial statements IFRS – Note 41 – Financial guarantees and options'. These are accounted for on-balance sheet as either part of the host insurance contract or as financial instruments under IFRS.

Information on operating lease commitments can be found in 'Financial statements IFRS – Note 52 – Commitments'.

It is standard business practice for our Group companies to give guarantees, indemnities and warranties in connection with disposals of subsidiaries and associates to third parties. As of 31 December 2011, we believe no material loss will arise in respect of these guarantees, indemnities and warranties. Standard financial warranties include the accuracy and completeness of the statement of financial position at the completion date, details of outstanding litigation, the position on tax filings and any outstanding clearance items. In addition, specific clauses cover such matters as regulatory approvals and licences, the adequacy of actuarial insurance liabilities, reinsurance contracts and the status of employee pension plans. Their exact terms are tailored to each disposal and are set out in the respective sale and purchase agreement. Similarly, the open warranty periods, within which the purchaser could claim, and limits on the maximum amount potentially recoverable will vary for each item covered in each disposal.

There are a number of outstanding claims on recent disposals, none of which are material. There are also open claim periods on other recent disposals on which we have neither received, nor expect to receive, any such claims. We believe that there is no material exposure in this respect.

We have loans receivable, secured by mortgages, which have then been securitised through non-recourse borrowings by special purpose entities in our UK Life business and, prior to its deconsolidation, our Dutch business, as set out in 'Financial statements IFRS – Note 24 – Securitised mortgages and related assets'. These special purpose entities have been consolidated and included in the statement of financial position, as we retain the residual interest in them.

## Limited liability partnerships classified as joint ventures

As part of their investment strategy, the UK and certain European long-term business policyholder funds have invested in a number of property limited partnerships (PLPs), either directly or via property unit trusts (PUTs), through a mix of capital and loans. The PLPs are managed by general partners (GPs), in which the long-term business shareholder companies hold equity stakes and which themselves hold nominal stakes in the PLPs. The PUTs are managed by a Group subsidiary.

Accounting for the PUTs and PLPs as subsidiaries, joint ventures or other financial investments depends on the shareholdings in the GPs and the terms of each partnership agreement. If a partnership is managed by a contractual arrangement agreement such that no party exerts control, notwithstanding that the Group's partnership share or economic interest in the PLP (including its indirect stake via the relevant PUT and GP) may be greater than 50%, such PUTs and PLPs have been classified as joint ventures. Of the PLPs accounted for as joint ventures at 31 December 2011, the Group's economic interest exceeded 50% in respect of one partnership, The Mall Limited Partnership, in which the Group had a 50.5% economic interest.

'Financial statements IFRS – Note 18 – Interests in, and loans to, joint ventures' provides a list of the principal PLPs accounted for as joint ventures, as well as summarised information on the revenue, expenses, assets and liabilities of the Group's interests in its joint ventures in aggregate. In respect of these PLPs, there are no significant contingent liabilities to which we are exposed, nor do we have any significant contingent liabilities in relation to our interests in them. External debt raised by the PLPs is secured on their respective property portfolios, and the lenders are only entitled to obtain payment of both interest and principal to the extent there are sufficient resources in the respective PLPs. The lenders have no recourse whatsoever to the policyholder and shareholders' funds of any companies in the Aviva Group. At 31 December 2011, we had £258 million capital commitments to these PLP joint ventures.

## Liquidity and capital resources

### Treasury function

The treasury function of our business is managed by our centralised treasury team, headed by the group treasurer. The group treasurer acts as owner of Group business standards for liquidity and foreign exchange risk management within the Group risk governance and oversight framework. Changes in policy require the agreement of the chief risk officer. Significant changes in policy require, in addition, the approval of the Assets and Liabilities Committee, the Executive Committee and then the Risk and Regulatory Committee of the Board. These policies are independently implemented and monitored by each of our businesses. Our central treasury team is split into distinct functions: a Group team, which develops our overall treasury strategy and our treasury team at Aviva Investors, which manages and monitors our treasury and cash flow positions for our holding companies. Each business unit is responsible for monitoring its own cash and liquidity positions, as well as its ongoing funding requirements. It is our policy to make the majority of our financing arrangements at the parent company level for our business units, primarily through external borrowings and equity offerings. This enables us to achieve the efficiencies afforded by our collective size. A number of our business units also raise debt on their own behalf.

Our principal objective in managing our liquidity and capital resources is to maximise the return on capital to shareholders, while enabling us to pay dividends, service our debt and our holding companies' cash flows. In the context of a financial services company where our working capital is largely representative of our liquidity, we believe our working capital is sufficient for our present operational requirements. For additional information, see 'Financial statements IFRS – Note 56 – Risk management – liquidity risk'.

### Extraordinary market conditions

Starting in mid-September 2008, the global financial markets experienced unprecedented disruption, adversely affecting the business environment in general, as well as financial services companies in particular. Markets have improved but continue to be fragile, particularly given the eurozone sovereign debt crisis. A return to adverse financial market conditions could significantly affect our ability to meet liquidity needs and obtain capital, although management believes that we have liquidity and capital resources to meet business requirements under current market conditions.

At 31 December 2011, total consolidated net cash and cash equivalents net of bank overdrafts amounted to £22,401 million, a decrease of £2,294 million over £24,695 million in 2010.

Processes for monitoring and managing liquidity risk, including liquidity stress models, have been enhanced to take into account the extraordinary market conditions, including the impact on policyholder and counterparty behaviour, the ability to sell various investment assets and the ability to raise incremental funding from various sources. Management has taken steps to strengthen liquidity in light of its assessment of the impact of market conditions, such as issuing £450 million long-term subordinated debt in May 2011 and \$400 million long-term subordinated debt in November 2011, and intends to continue to monitor liquidity closely.

### Management of capital resources

We seek to maintain an efficient capital structure using a combination of equity shareholders' funds, preference capital, subordinated debt and borrowings. This structure is consistent with our risk profile and the regulatory and market requirements of our business.

In managing our capital, we seek to:

- match the profile of our assets and liabilities, taking into account the risks inherent in each business;
- maintain financial strength to support new business growth while still satisfying the requirements of policyholders, regulators and rating agencies;
- retain financial flexibility by maintaining strong liquidity, access to a range of capital markets and significant unutilised committed credit lines;
- allocate capital efficiently to support growth and repatriate excess capital where appropriate; and
- manage exposures to movements in exchange rates by aligning the deployment of capital by currency with our capital requirements by currency.

We are subject to a number of regulatory capital tests and employ realistic scenario tests to allocate capital and manage risk. The impact of these regulatory capital tests on our ability to transfer capital around the Group through dividends and capital injections is discussed later in this section under the headings 'Sources of liquidity' and 'Capital injections'.

At 31 December 2011, the Group had £20.8 billion (31 December 2010: £26.3 billion) of total capital employed in our trading operations which is financed by a combination of equity shareholders' funds, preference capital, direct capital instruments, subordinated debt and internal and external borrowings.

In 2011, the total capital employed decreased by £5.5 billion. The reduction is primarily driven by the deconsolidation of Delta Lloyd and the impact of financial markets. Over the period the Group has generated post tax profits and benefited from actuarial gains on staff pension schemes. See 'Financial statements IFRS – Note 54 – Group capital structure'.

In addition to external funding sources, we have a number of internal debt arrangements in place. These have allowed the assets supporting technical liabilities to be invested into the pool of central assets for use across the Group. They have also enabled us to deploy cash from some parts of the business to others in order to fund growth. Although intra-Group loans in nature, they are counted as part of the capital base for the purpose of capital management. All internal loans satisfy arm's length criteria and all interest payments have been made when due.

### Management of debt

Aviva plc is the principal financing vehicle in our centralised funding strategy. Our senior debt obligations are supported by guarantees from our principal UK non-life trading subsidiaries. We also manage our external debt in line with rating agency limits applicable for entities with a rating in the AA range. We aim to maintain a balance of fixed and floating rate debt, and manage the maturity of our borrowings and our undrawn committed facilities to avoid bunching of maturities. We aim to maintain access to a range of funding sources, including the banking market, the commercial paper market and the long-term debt capital markets. We issue debt in a variety of currencies, predominantly sterling, euros and US dollars, based on investor demand at the time of issuance and management of the Group's foreign exchange translation exposures in the statement of financial position.

In May 2011, we issued £450 million of subordinated debt callable in 2021. In November 2011, we issued a further \$400 million of subordinated debt callable in 2016. We used €800 million euro equivalent to repay a €800 million subordinated debt instrument callable in November 2011.

At 31 December 2011, our total external borrowings, including subordinated debt and securitised mortgage loans, amounted to £8.5 billion (31 December 2010: £14.9 billion). Of the total borrowings, £5.3 billion (31 December 2010: £6.1 billion) are considered to be core borrowings and are included within the Group's capital employed. The balance of £3.2 billion (31 December 2010: £8.8 billion) represents operational debt issued by operating subsidiaries. We also have substantial committed credit facilities available for our use. At 31 December 2011, we had undrawn committed credit facilities expiring within one year of £1.0 billion (31 December 2010: £1.0 billion) and £1.1 billion in credit facilities expiring after more than one year (31 December 2010: £1.1 billion). Of these facilities, £750 million was allocated in 2011 (31 December 2010: £750 million) to support our commercial paper programme.

Further information on the maturity profile, currency and interest rate structure of our borrowings is presented in 'Financial statements IFRS – Note 48 – Borrowings'. Commercial paper is issued for terms up to six months and is generally reissued at maturity. The earliest repayment date for other debt instruments is a \$300 million subordinated debt instrument with a first call date of 19 June 2012 at the option of the company. At this time Aviva will have the option of repaying the debt or accepting a step-up in the coupon and deferring repayment until 2017.

The table below presents our debt position for the periods indicated:

	2011 £m	2010 £m
<b>Core structural borrowings</b>		
Subordinated debt	4,550	4,572
Debenture loans	199	851
Commercial paper	506	643
	<b>5,255</b>	6,066
<b>Operating borrowings</b>		
Amounts owed to financial institutions	1,889	2,550
Securitised mortgage loans	1,306	6,333
	<b>3,195</b>	8,883
<b>Total</b>	<b>8,450</b>	14,949

In the UK, we have raised non-recourse funding secured against books of mortgages. This funding has been raised through the use of special-purpose entities. The beneficial interest in the books of mortgages has been passed to these special-purpose entities. These entities, which are owned by independent trustees, have funded this transfer through the issue of loan notes.

The value of the secured assets and the corresponding non-recourse funding was £1,306 million (31 December 2010: £1,288 million). We continue to receive fees from these special purpose entities in respect of loan administration services.

These special purpose entities have been consolidated as we retain the residual interest in them. The transactions and reasons for consolidation are discussed further within 'Financial statements IFRS – Note 24 – Securitised mortgages and related assets'.

### Undrawn borrowings

At 31 December 2011, we had £2.1 billion (31 December 2010: £2.1 billion) undrawn committed central borrowing facilities available to us, provided by a range of leading international banks, all of which have investment grade credit ratings. We have allocated £750 million to support the credit rating of Aviva's commercial paper programme. Undrawn borrowings are analysed below:

	2011 £m	2010 £m
Expiring within one year	955	975
Expiring beyond one year	1,160	1,135
<b>Total</b>	<b>2,115</b>	<b>2,110</b>

Our committed central borrowing facilities have two financial covenants:

- Borrowings (excluding non-recourse indebtedness) may not exceed total shareholders' funds. At 31 December 2011, borrowings were 53% of total shareholders funds.
- Total shareholders' funds to exceed 32% of non-life net written premiums for the previous 12 months. At 31 December 2011, total shareholders funds were 140% of non-life net written premiums.

Total shareholders' funds are defined as the aggregate of nominal share capital of Aviva and the IFRS retained profits and reserves, plus the value of in-force long-term business, on a consolidated basis.

### Sources of liquidity

In managing our cash flow position, we have a number of sources of liquidity, including:

- dividends from operating subsidiaries;
- external debt issuance;
- internal debt and central assets; and
- funds generated by the sale of businesses.

One of our principal sources of liquidity is dividends from our subsidiaries. The level of dividends is based on two primary factors: the financial performance and the local solvency and capital requirements of our individual business units.

The table below shows the dividends received from our principal operating subsidiaries in 2011:

	2011 Amounts received £m
UK life insurance	200
UK general insurance	—
Aviva Investors	13
France	—
Netherlands	51
Poland	102
Ireland	—
Other Europe	—
Other operations	228
<b>Total</b>	<b>594</b>

Under UK company law, dividends can only be paid if a company has distributable reserves sufficient to cover the dividend. At 31 December 2011, Aviva plc itself had distributable reserves of £3,116 million, which would have covered three years of historic dividend payments to our shareholders. In UK Life, our largest operating subsidiary, distributable reserves, which could be paid to Aviva plc via its intermediate holding company, are created mainly by the statutory long-term business profit transfer to shareholders that occurs upon the declaration of bonuses to policyholders of with-profit products. While the UK insurance regulatory laws applicable to UK Life and our other UK subsidiaries impose no statutory restrictions on an insurer's ability to declare a dividend, the FSA's rules require maintenance of each insurance company's solvency margin, which might impact their ability to pay dividends to the parent company. Our other life and general insurance, and fund management subsidiaries' ability to pay dividends and make loans to the parent company is similarly restricted by local corporate or insurance laws and regulations. For example, the ability of our US insurance subsidiaries to provide inter-company loans is subject to state regulations which restrict the making of loans or require explicit regulatory approval. In all jurisdictions, when paying dividends, the relevant subsidiary must take into account its capital position and must set the level of dividend to maintain sufficient capital to meet minimum solvency requirements and any additional target capital expected by local regulators. These minimum solvency requirements, which are consolidated under the European Insurance Group Directive, are discussed later in this section under the heading 'Regulatory capital position'. Our US subsidiaries are also subject to state laws that limit the dividends payable to the parent company and dividends in excess of these limitations generally require the approval of the state insurance commissioner. We do not believe that the legal and regulatory restrictions constitute a material limitation on the ability of our businesses to meet their obligations or to pay dividends to the parent company, Aviva plc.

We have also received funds from the sale of parts of our businesses. For the year ended 31 December 2011, cash proceeds from the disposal of subsidiaries, joint ventures and associates net of cash transferred from continuing operations amounted to £877 million compared to £222 million for the year ended 31 December 2010. Principal disposals in 2011 and cash consideration received are disclosed in 'Financial statements IFRS – Note 3 – Subsidiaries'.

We have established two main programmes for the issuance of external debt by Aviva plc. For short-term senior debt issuance we have a £2 billion commercial paper programme which allows debt to be issued in a range of currencies. At 31 December 2011, the outstanding debt issued under this programme was £506 million (31 December 2010: £504 million (excludes commercial paper issued by Delta Lloyd)).

For longer term debt we have established a Euro Medium Term Note (EMTN) programme. This programme has documentation readily available to allow quick issuance of long-term debt with a variety of terms of conditions. Debt issued under this programme may be senior guaranteed debt or regulatory qualifying debt and may have a fixed or floating interest rate. At 31 December 2011, the outstanding debt issued under this programme was £1,894 million (31 December 2010: £1,458 million).

**Application of funds**

We use funds to pay dividends to our shareholders, to service our debt and to pay our central Group cash flows.

In 2011, total cash paid by the Company as ordinary and preference dividends and coupon payments on direct capital instruments amounted to £507 million, compared to £548 million in 2010.

In 2011, our total interest costs on central borrowings were £325 million. This compared to £324 million of interest paid on central borrowings in 2010. Total corporate centre expenses in 2011 were £138 million compared to £144 million in 2010.

An additional application of our funds is the acquisition of businesses. In 2011, cash paid for the acquisition of subsidiaries, joint ventures and associates net of cash acquired amounted to £114 million, compared to cash received of £542 million in 2010. Principal acquisitions in 2011 and cash consideration paid are disclosed in 'Financial statements IFRS – Note 3 – Subsidiaries'.

**Capital injections**

We make capital injections into our businesses where necessary to ensure that they meet their local solvency requirements and also to support development of their operations. Capital is provided either by equity or, where a local holding company is in place, may be via loans with the holding company subsequently injecting equity capital in the regulated operating company. Each capital injection is subject to central review and approval by the Board of the relevant holding company and needs to meet our required internal rates of return. To the extent capital injections are provided or funded by regulated entities, then we have to consider the impact on regulatory capital of the capital injection.

Otherwise our ability to make capital injections into our businesses is not materially limited by applicable legal and regulatory restrictions. Total capital injections into the business units were £296 million and £333 million in 2011 and 2010 respectively.

**Consolidated cash flows**

The cash and cash equivalents consist of cash at banks and in hand, deposits held at call with banks, treasury bills and other short-term highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value.

For the purposes of the cash flow statement, cash and cash equivalents also include bank overdrafts, which are included in payables and other financial liabilities on the balance sheet.

**Year ended 31 December 2011****Net cash from operating activities**

Total net cash from operating activities decreased by £2,149 million to a £342 million outflow in 2011 (2010: £1,807 million inflow). The decrease is primarily due to higher claims in the long-term business segment.

**Net cash from investing activities**

Net cash from investing activities decreased by £271 million to £78 million (2010: £349 million). The decrease is a result of cash used in discontinued operations. Inflows from continuing operations of £590 million show a slight increase on 2010 (2010: £431 million).

**Net cash out flow on financing activities**

Net cash used in financing activities increased by £420 million to an outflow of £1,773 million (2010: £1,353 million outflow). The increase is due to a higher repayment of borrowings during the year.

**Net cash and cash equivalents**

At 31 December 2011, total consolidated net cash and cash equivalents, net of bank overdrafts, amounted to £22,401 million, a decrease of £2,294 million over £24,695 million in 2010.

**Currency**

Our exposures to movements in exchange rates and the management of these exposures is detailed in 'Performance review – Financial and operating performance – Exchange rate fluctuations'.

**Year ended 31 December 2010****Net cash from operating activities**

Total net cash from operating activities decreased by £878 million to £1,807 million in 2010 (2009: £2,685 million). The decrease is due to lower investment income and higher claims in the long-term business segment.

**Net cash used in investing activities**

Net cash from investing activities decreased by £781 million to £349 million utilised (2009: £432 million utilised). The increase is a result of a £930 million reclassification within the statement of cash flows described further in note 2(b). The underlying increase is a result of cash and cash equivalents acquired as part of the RBS Life acquisition described further in note 3(a).

**Net cash out flow on financing activities**

Net cash used in financing activities was £782 million higher at £1,353 million (2009: £571 million). The increase is a result of a £930 million reclassification within the statement of cash flows described further in note 2(b). The underlying decrease of £133 million reflects higher interest payments partially offset by a lower net drawdown of borrowings.

**Net cash and cash equivalents**

At 31 December 2010, total consolidated net cash and cash equivalents amounted to £24,695 million, an increase of £444 million over £24,251 million in 2009.

**Currency**

Our exposures to movements in exchange rates and the management of these exposures is detailed in 'Performance review – Financial and operating performance – Exchange rate fluctuations'.

**Regulatory capital position**

Individual regulated subsidiaries measure and report solvency based on applicable local regulations, including in the UK the regulations established by the FSA. These measures are also consolidated under the European Insurance Groups Directive (IGD) to calculate regulatory capital adequacy at an aggregate Group level, where we have a regulatory obligation to have a positive position at all times. This measure represents the excess of the aggregate value of regulatory capital employed in our business over the aggregate minimum solvency requirements imposed by local regulators, excluding the surplus held in the UK and Ireland with-profit life funds. The minimum solvency requirement for our European businesses is based on the Solvency 1 Directive. In broad terms, for EU operations, this is set at 4% and 1% of non-linked and unit-linked life reserves respectively and for our general insurance portfolio of business is the higher of 18% of gross premiums or 26% of gross claims, in both cases adjusted to reflect the level of reinsurance recoveries. For our major non-European businesses (the US, and Canada) a risk charge on assets and liabilities approach is used.

**European Insurance Groups Directive**

	UK Life funds £bn	Other business £bn	2011 £bn	2010 £bn
Insurance Groups Directive (IGD) capital resources	5.6	8.5	14.1	16.3
Less: capital resource requirement (CRR)	(5.6)	(6.3)	(11.9)	(12.5)
<b>Insurance Groups Directive (IGD) excess solvency</b>	—	2.2	2.2	3.8
<b>Cover of EU minimum (calculated excluding UK Life funds)</b>			1.3 times	1.6 times

The EU Insurance Groups Directive (IGD) regulatory capital solvency surplus has decreased by £1.6 billion since 31 December 2011 to £2.2 billion. The key movements over the period are set out in the following table:

	£bn
IGD solvency surplus at 31 December 2010	3.8
Operating profits net of other income and expenses	1.0
Dividends net of scrip	(0.5)
Market movements including foreign exchange	(1.9)
Pension scheme funding	(0.3)
Impact of Delta Lloyd sell down	0.1
Impact of RAC sale	0.2
Restructuring of UK regulated general insurance entities	0.2
Increase in Capital Resource Requirement	(0.3)
Other regulatory adjustments	(0.1)
<b>Estimated IGD solvency surplus at 31 December 2011</b>	<b>2.2</b>

**Capital commitments**

Contractual commitments for acquisitions or capital expenditures of investment property, property and equipment and intangible assets, which have not been recognised in our consolidated financial statements, are as follows:

	2011 £m	2010 £m	2009 £m
Investment property	23	63	66
Property and equipment	36	160	255
Intangible assets	—	—	4
<b>Total</b>	<b>59</b>	<b>223</b>	<b>325</b>

Contractual obligations for future repairs and maintenance on investment properties are £nil (2010: £1 million, 2009: £1 million). We have capital commitments to our joint ventures of £258 million (2010: £45 million, 2009: £nil) and to other investment vehicles of £nil (2010: £nil, 2009: £33 million). These commitments are expected to be funded through operational cash flow without recourse to core structural borrowings.

## Audit Committee financial experts

The Board has determined that Russell Walls, Richard Goeltz, Michael Hawker and Euleen Goh all qualify as Audit Committee financial experts within the meaning of Item 16A of Form 20-F, and that Russell Walls, Richard Goeltz, Michael Hawker and Euleen Goh are all independent as defined by the Securities and Exchange Commission rules and the New York Stock Exchange Corporate Governance Standards.

## Code of ethics

The Company has adopted a code of ethics for its senior management, including the Board, the Group Executive Committee and the group chief accounting officer as required by the provisions of Section 406 of the Sarbanes-Oxley Act of 2002 and the rules issued by the SEC. There have been no amendments to, or waivers from, the code of ethics relating to any of those officers. The code of ethics was filed on 7 October 2009 as an exhibit to our Form 20-F registration document.

## Regulation

### Compliance

In both our insurance and fund management businesses, matters may arise as a result of industry-wide issues, inspection visits or other regulatory activity, requiring discussion and resolution with industry regulators. The Group needs to ensure that procedures are in place to address any regulatory concerns, and that such procedures are properly planned, managed and resourced. Corrective action is undertaken, when necessary, with progress reported to relevant regulatory bodies in a timely manner.

### Overview of regulation as it affects our business

Our principal insurance and fund management operations are in the UK, Europe, North America and the Asia Pacific region. We are therefore subject to financial services regulation and local regulatory supervision in all these areas, as individually covered below.

As the Group's parent company is based in the UK, both EU legislation and the rules of the FSA can impact Aviva's business practices worldwide. Regulators supervising the Group co-ordinate on a cross-border basis through a 'college'.

### The European Union

In addition to its UK businesses, Aviva is active in other EU member states through wholly owned subsidiary and joint venture companies. These companies are subject to the laws and regulations of the EU member state in which they are based, but are also affected by higher level EU legislation, which will continue to have a significant influence on the legislative environment in the UK and other EU markets.

The EU operates by promulgating directives that must be implemented into local national legislation within each EU member country. These directives set minimum standards for national legislatures to meet, with each legislature able to decide how they should be implemented. National governments may not pass laws which fail to meet the minimum standards set out in a directive, but are generally free to impose legal requirements which go beyond those required. Directives are written at a fairly high level, with more detail being provided at national level through legislation developed in accordance with the local legal system. Even greater detail may be imposed through the rules and regulations of national regulators, and for financial services businesses these rules can be extensive.

The EU may also impose requirements directly on countries through regulation. EU financial services regulation is based on the principle of 'home country control', which makes the home country regulator responsible for monitoring compliance with all applicable regulation.

Key directives of particular relevance to the financial services industry, and so to Aviva's businesses in the EU, include:

### Third Life and Non-Life Directives

These directives implemented the home country control principle for life and non-life insurance business in the mid-1990s and placed the responsibility for such issues as solvency, actuarial reserves, investment of assets, and certain governance issues on the home country regulator. Most companies licensed to conduct insurance business in one member state may rely on its home country regulation to 'passport' into all other member states to conduct business without having to be separately licensed in each. The general exception is selling activity which continues to be regulated by the state in which the sale takes place.

### Insurance Groups Directive (IGD)

The IGD requires member states to introduce the following measures to strengthen supervision of insurance companies which are part of a group:

- An adjustment margin to the solvency calculation in relation to participating interests in other insurance undertakings in order to eliminate 'double-gearing' (the use of the same regulatory capital in more than one entity of a group).
- An additional parent undertaking solvency margin calculation analogous to the adjusted margin test referred to above, to be applied at the level of the parent undertaking.
- The introduction of new solo supervision requirements, including rules as to internal control within the insurance undertaking regarding the production of information relevant to supplementary supervision, the exchange of information within the group and the supervision of intra-group transactions.
- Further provisions aimed at ensuring co-operation between competent regulatory authorities of member states.

Since 31 December 2006, the group capital resources requirement (the parent undertaking solvency calculation mentioned above) has been a 'hard' test (i.e. it constitutes a requirement to maintain the group capital resources, rather than simply to make the calculation) for UK-based companies operating under FSA rules.

### Reinsurance Directive

Adopted on 16 November 2005, this directive requires that all reinsurance undertakings be authorised in their home member state. To obtain that authorisation, they need to meet strict requirements, but are then free to operate anywhere in the EU through the single market passport process.

### Distance Marketing Directive

Under the Distance Marketing Directive, EU member states are required to implement a framework of rules and guidance in order to protect consumers by:

- setting minimum standards for information that must be provided to consumers before entering into a financial services contract by 'distance means'; and
- for certain products and services, giving a cooling-off period in which a consumer may cancel a contract without penalty.

**Insurance Mediation Directive**

This requires EU member states to establish a framework to:

- ensure that insurance and reinsurance intermediaries have been registered on the basis of a minimum set of professional and financial requirements;
- ensure that registered intermediaries will be able to operate in other member states by availing themselves of the freedom to provide services or by establishing a branch; and
- impose requirements on insurance intermediaries to provide specified minimum information to potential customers.

**Markets in Financial Instruments Directive (MiFID)**

MiFID, which superseded the earlier Investment Services Directive, builds on the home country control principle, extending the range of 'core' investment services and activities that may be passported from one member state to another, clarifying the allocation of responsibilities between home and host country jurisdictions, and introducing greater harmonisation governing the organisation and conduct of business of investment firms.

**Solvency II**

The agreed Solvency II Level 1 Directive was published in November 2009. Solvency II represents a fundamental change in European regulation and will result in a more sophisticated economic risk-based capital approach. Its objectives are to establish a solvency system that is better aligned to the true risks of insurers, and aims to enable supervisors to protect policyholder interests as effectively as possible in accordance with common principles across the EU.

Since approval, the focus has been on developing the technical standards and requirements necessary to determine how the directive will be applied in practice, and expected amendments to the Solvency II Directive (Omnibus II Directive) following the creation of the new European Supervisory Authorities (ESAs) in September 2010. It is still not clear when these developments, including the implementation requirements, will become legislation.

One of the new ESAs, the European Insurance and Occupational Pensions Authority (EIOPA), replaced CEIOPS on 1 January 2011. Proposed amendments to the Solvency II Directive were published in January 2011, giving power to EIOPA to issue binding guidance/standards, and delay implementation of Solvency II. Solvency II is currently expected to apply to insurers from 1 January 2014.

This highlights the need for continued and engaged industry participation. Aviva continues to actively participate, through the key European industry working groups, who provide the voice of the industry, in ongoing discussions in Brussels.

**Future EU developments**

The ESAs came into force in January 2011 and have powers to make binding rules and drive supervisory consistency and convergence through a single rule book. Their involvement in the colleges of supervisors for cross-border financial institutions, together with broader changes being progressed within Europe relating to financial conglomerates, signals a move towards more focused and intrusive group supervision.

The Alternative Investment Fund Managers Directive (AIFMD) is due to come into force in July 2013 and will impact the Aviva Investors group in its capacity as an AIF manager and distributor. The implementing measures, which will provide a fuller understanding of the impact, are currently being drafted by the EC.

There are a number of European dossiers that are expected to progress during 2012, including the European Commission's Consumer Agenda, completion of its work on Packaged Retail Investment Products (PRIIPs) to introduce common product disclosure standards and sales conduct rules, completion of its review of the Insurance Mediation Directive (IMD) and Markets in Financial Instruments Directive (MiFID), implementation of the European Market Infrastructure Regulation (EMIR) that will introduce central clearing for standard Over the Counter (OTC) derivatives, a review of the Directive for Institutions of Occupational Retirement Provisions (IORP) that sets rules for occupational pension schemes, and completion of the technical standards by the European Securities and Markets Authority (ESMA) for the Alternative Investment Fund Managers Directive (AIFMD) that will introduce a regime governing the marketing of alternative investments to EU investors.

## United Kingdom

### The Financial Services Authority

In the UK, the FSA is currently the single regulator for those individuals and firms conducting defined regulated activities in the financial services sector. The FSA has the authority to make rules and issue guidance, taking into account relevant EU directives, in relation to a wide sphere of activity encompassing the governance of the conduct of business by, and the prudential supervision of, individuals and firms authorised by the FSA to conduct such business ('Authorised Persons' or 'Authorised Firms').

Under the Financial Services and Markets Act 2000 (FSMA) no person may carry on, or purport to carry on, a regulated activity by way of business in the UK unless he is an Authorised Person or an exempt person. A firm granted permission by the FSA to carry on regulated activities becomes an Authorised Person for the purposes of FSMA. 'Regulated activities' are prescribed in the FSMA (Regulated Activities) Order 2001 and include banking, insurance and investment business, stakeholder pension schemes, insurance mediation and certain mortgage mediation and lending activities.

Authorised Firms must at all times meet specified threshold conditions, including possession of adequate resources for the carrying on of their business, and being fit and proper to conduct that business, having regard to all the circumstances. Authorised Firms must also operate in accordance with the FSA's Principles for Business. These are 11 high-level principles for conducting financial services business in the UK, including maintenance of adequate systems and controls, treating customers fairly, and communicating with customers in a manner that is clear, fair and not misleading.

The FSA regime is based on the principle that firms should have effective systems and controls, including robust risk management, which are appropriate to the size, complexity and diversity of their business.

### The FSA's regulation of the Group

A number of the Group's UK subsidiaries are directly authorised and regulated by the FSA, including our insurance companies (e.g. the UK Life and UK General Insurance companies), asset managers (Aviva Investors) and intermediaries (UK Healthcare). Aviva plc, although not directly authorised by the FSA, does itself come within the scope of some regulation as the ultimate insurance holding company in the Group.

As Aviva is a UK-based group, the FSA has the responsibility of acting as lead regulatory (i.e. the cross-sector supervisory co-ordinator) for the Group within the EU.

### Approved persons and controllers

The FSA places great emphasis on the principle of senior management responsibility. The directors of, and senior managers carrying out FSA-defined controlled function roles in, any of the Group's regulated entities are individually registered with the FSA under the 'Approved Person' regime, and can be held directly accountable to the FSA for control failings in those entities. A number of senior managers at Group level have also been registered as Approved Persons for the regulated subsidiaries, even though they are neither directors nor senior managers of these firms. This recognises that these managers exert significant influence over the regulated subsidiaries, because they are responsible for key parts of the Group's control framework on which the regulated subsidiaries place reliance.

The FSA regulates from a legal entity perspective, even though Aviva tends to operate within Regions by Business Unit. However, the FSA also expects that Aviva's regulated subsidiaries operate within an overall framework of Group governance and controls. Its rules expressly provide that any systems and controls

which operate on a Group basis will be taken into account in determining the adequacy of a regulated subsidiary's systems and controls. The robustness of these Group controls is therefore subject to scrutiny and challenge by the FSA.

The FSA regulates the acquisition and increase of control over Authorised Firms. Under FSMA, any person proposing to acquire control of, or increase control over certain thresholds of, an Authorised Firm must first obtain the consent of the FSA. The Authorised Firm must also inform the FSA of any such proposed acquisition or increase. In considering whether to grant or withhold its approval of the acquisition or increase of control, the FSA must be satisfied both that the acquirer is a fit and proper person and that the interests of consumers would not be threatened by this acquisition or increase of control.

Control over a UK Authorised Firm is acquired if the acquirer:

- holds 10% (or 20% if the Authorised Firm is an insurance intermediary) or more of the shares, or voting power, in that firm, or a parent undertaking of the firm; or
- is able to exercise significant influence over the management of the firm by virtue of the acquirer's shares or voting power in that company or a parent undertaking of the firm.

Increases in control require the consent of the FSA when they reach thresholds of 20%, 30% and 50% of the shares or voting power of the firm (or its parent).

In order to determine whether a person or a group of persons is a 'controller' for the purposes of FSMA, the holdings (shares or voting rights) of the person and any other person 'acting in concert', if any, are aggregated.

### FSA conduct of business rules

The FSA's Conduct of Business (COB) and Insurance: Conduct of Business (ICOB) Rules apply to every Authorised Firm carrying on relevant regulated activities, and regulate the day-to-day conduct of business standards to be observed by all Authorised Persons in carrying out regulated activities.

The COB and ICOB Rules are principle based, and the scope and range of obligations imposed on an Authorised Firm will vary according to the scope of its business and range of the Authorised Firm's clients. Generally speaking, however, the obligations imposed on an Authorised Firm by the COB and ICOB Rules will include the need to classify its clients according to their level of sophistication, provide them with information about the Authorised Firm, meet certain standards of product disclosures (including fee and remuneration arrangements), ensure that promotional material which it produces is clear, fair and not misleading, assess suitability when advising on certain products, control the range and scope of advice given, manage conflicts of interest, report appropriately to its clients and provide certain protections in relation to client assets.

### Capital and solvency rules for insurers

The FSA rules require that a UK insurer (including those within the Group) must hold capital resources equal to at least the Minimum Capital Requirement (MCR). Insurers with with-profits liabilities of more than £500 million (which is the case with Aviva's with-profits fund) must hold capital equal to the higher of MCR and the Enhanced Capital Requirement (ECR). The ECR is intended to provide a more risk responsive and 'realistic' measure of a with-profits insurer's capital requirements, whereas the MCR is broadly equivalent to the previous required minimum margin, and satisfies the minimum EU standards.

Determination of the ECR involves the comparison of two separate measurements of the Authorised Firm's financial resources requirements, which the FSA refers to as the 'twin peaks' approach. The two separate peaks are:

- the requirement comprised by the mathematical reserves plus the 'long-term insurance capital requirement' (the LTICR), together known as the 'regulatory peak'; and
- a calculation of the 'realistic' present value of the insurer's expected future contractual liabilities together with projected 'fair' discretionary bonuses to policyholders, plus a risk capital margin, together known as the 'realistic peak'.

All insurers must also carry out an Individual Capital Assessment (ICA) to calculate the amount of capital needed to back their business. If the FSA decides that the final ICA amount is insufficient, it may draw up its own Individual Capital Guidance (ICG) for the firm, which can be imposed as a requirement on the scope of the Authorised Firm's permission.

#### **Day-to-day supervision**

The FSA takes a risk-based approach to its regulatory activity, concentrating its resources on those firms and activities which it assesses pose the greatest potential threats to its four statutory objectives of:

- maintaining confidence in the UK financial system;
- contributing to the protection and enhancement of stability of the UK financial system;
- securing the appropriate degree of protection for consumers; and
- reducing the extent to which it is possible for a regulated business to be used for a purpose connected with financial crime.

Given our size and our share of the UK retail market, a major issue within our business which causes concern for the FSA may have a significant impact on these objectives.

The FSA therefore maintains a 'close and continuous' relationship with us, with day-to-day supervision of Aviva conducted by a dedicated team within its Insurance Division. In practice, this means that a wide range of Group, Regional and UK Business Unit senior managers have regular scheduled meetings with the FSA, and other meetings and discussions on specific issues take place as the need occurs. This adds up to weekly or even daily FSA interaction at UK Region, Business Unit and Group level, and the sharing of detailed information about the Group.

The FSA also periodically conducts a formal Advanced Risk-Responsive Operating framework (ARROW) review of Aviva to assess the level of risk that the Group poses to each of the FSA objectives. The last full risk assessment was conducted in 2009 and an up-to-date risk assessment, which commenced in the third quarter of 2011, is currently in progress.

Areas of potential risk or weakness where the FSA particularly requires Aviva to focus attention are formally set out in a Risk Mitigation Plan (RMP), with both risk assessment and RMP issues up-dated on an ongoing basis between each ARROW review.

The FSA has highlighted in its 2011 Business Plan that its key focus area for 2011/2012 would be:

- preparing for transition to the new supervisory authorities structure, to become effective in 2013;
- continuing to ensure firms are soundly run, with effective risk management in place, through close scrutiny of corporate governance, financial reporting, remuneration arrangements, recovery and resolution plans, and firms' ability to identify and mitigate risk;
- maintaining its proactive and intensive approach to supervision, including development of its understanding

of the business models, consumer strategy and products of the highest impact retail firms;

- maintaining pressure on firms to treat customers fairly;
- playing a full role as an international leader in financial regulation; and
- Solvency II, which remains central to our engagement with the FSA as the industry and the regulator prepare for the application of this new regulatory regime.

Outside of the UK, each Aviva business is regulated by its own national regulator(s). However, overseas operations are also within the remit of the FSA to the extent they have an interest in the systems and controls by which the Group manages its overseas businesses to mitigate the risk of financial shocks arising overseas flowing through to the UK.

The FSA monitors the strategy and performance of the Group's international businesses through its programme of regular meetings and thematic reviews.

The FSA aims to play a leading role in the development of both EU and international regulation. It is, in particular, at the vanguard of the movement towards risk-based insurance regulation.

The FSA continues to place weight on the 'Treating Customers Fairly' principle.

#### **Intervention and enforcement**

The FSA has extensive powers to investigate and intervene in the affairs of Authorised Firms and is obliged to monitor compliance with the requirements imposed by, and to enforce the provisions of, FSMA related to secondary legislation and the rules made thereunder.

The FSA's enforcement powers, which may be exercised against both Authorised Firms and Approved Persons, include public censure, imposition of unlimited fines and, in serious cases, the variation or revocation of permission to carry on regulated activities or of an Approved Person's status. The FSA may also vary or revoke an Authorised Firm's permissions to protect the interests of consumers or potential consumers if the Authorised Firm has not engaged in regulated activity for 12 months, or if it is failing to meet the threshold conditions for authorisation. The FSA has further powers to obtain injunctions against Authorised Persons and to impose or seek restitution orders where consumers have suffered loss.

In addition to applying sanctions for market abuse, the FSA has the power to prosecute criminal offences arising under FSMA and insider dealing under Part V of the Criminal Justice Act 1993, and breaches of money laundering regulations. The FSA's stated policy is to pursue criminal prosecution in all appropriate cases.

#### **The Financial Services Compensation Scheme (FSCS)**

The FSCS is intended to compensate individuals and small businesses for claims against an Authorised Firm where the Authorised Firm is unable or unlikely to be able to meet those claims (generally, when it is insolvent or has gone out of business). Under a new funding system that started on 1 April 2008, for the purposes of funding FSCS compensation costs, the FSCS levy is split into five broad classes:

- Deposits;
- Long-term insurance and pensions;
- General insurance;
- Investments; and
- Home finance.

With the exception of the deposits class, each broad class is divided into two sub-classes based on provider/intermediation activities. Each of the 'sub-classes' is made up of firms which are

providers or intermediaries and engage in similar styles of business with similar types of customer.

The sub-classes are based on the activities a firm undertakes (and are aligned to their FSA permissions). A firm could be allocated to one or more sub-classes according to the activities that it undertakes. In the event of a failure of a market participant, the Authorised Firms in the Group could be required to make contributions to compensate investors. It should be noted that such contributions are not restricted to failures in the sub-classes to which a particular firm belongs, as there is the potential for cross-subsidy between sub-classes to be required.

#### **Restrictions on business**

FSA rules restrict an insurance company from carrying on any commercial business other than insurance business and activities directly arising from that business. Therefore, the FSA authorised insurance companies in the Group are bound by this restriction.

#### **Long-term assets and liabilities**

Where a UK insurer carries on life insurance business, its long-term business assets and liabilities – i.e. those assets and liabilities relating to life and health insurance policies – must be segregated from the assets and liabilities attributable to non-life insurance business or to shareholders. Separate accounting and other records must be maintained and a separate fund established to hold all receipts of long-term business.

The extent to which long-term fund assets may be used for purposes other than long-term business is restricted by the FSA rules. Only the 'established surplus', which is the excess of assets over liabilities in the long-term fund as determined by actuarial investigation, may be transferred so as to be available for other purposes. Restrictions also apply to the payment of dividends by the insurance company, as described below. FSA rules also require insurers to maintain sufficient assets in the separate long-term insurance fund to cover the actuarially determined value of the insurance liabilities.

#### **Distribution of profits and with-profits business**

For UK authorised life insurers carrying on with-profits business, such as Aviva Life and Pensions UK Ltd ('AVLAP'), the FSA's rules require that where a firm decides to make a distribution of surplus from the with-profits fund it must distribute at least the required percentage (as defined in the FSA Handbook) of the total amount distributed to policyholders, with the balance of the total amount to be distributed being payable to the shareholders.

In addition, at least once a year the AVLAP Board must consider whether a distribution is required to be made from the Old WPSF inherited estate. Such a distribution will ordinarily be required if the level of the inherited estate of the OWPSF exceeds the Required Distribution Threshold as described in the Reattribution Scheme of Transfer effective from 1 October 2009 ('The Scheme') on any such annual investigation from the third such investigation after 1 October 2009. Annual investigation may also be carried out to determine if a Release to shareholders can be made from the RIEESA. Releases can only be made:

- if the Reattributed Inherited Estate exceeds the Permitted Release Threshold as defined in the Scheme;
- the AVLAP Board (based on appropriate actuarial advice including that of the With-Profits Actuary) are of the opinion that the Release will not give rise to a significant risk that the New WPSF (including the RIEESA) would be unable to meet its obligations to policyholders and its capital requirements or the Old WPSF would be unable to meet its obligations to policyholders;
- any contingent loan from the Old WPSF to the RIEESA has been repaid in full; and

- following the sixth annual investigation after 1 October 2009 or later investigation and provided that investigation and investigations made in the previous two years determined that the Reattributed Inherited Estate exceeded the Permitted Release Threshold.

#### **Reporting requirements**

FSA rules require insurance companies to file their audited annual accounts, statements of financial position and life insurers' annual reports from the actuary performing the actuarial function with the regulator. There is also a requirement to report the annual solvency position of the insurance company's ultimate parent.

The FSA uses the annual return to monitor the solvency (i.e. the ability to meet current and future obligations such as claims payments to policyholders) of the insurance company. For general insurance business, the return is also used to assess retrospectively the adequacy of the company's claims provisions. The directors of an insurance company are required to sign a certificate, which includes a statement as to whether the company has maintained the required minimum margin of solvency throughout the year. The directors must also certify that the company has completed its return to the FSA properly in accordance with the FSA's instructions, and that the directors are satisfied that the company has complied in all material respects with the requirements set out in the FSA rules.

#### **UK winding up rules**

The general insolvency laws and regulations applicable to UK companies are modified in certain respects in relation to UK insurance companies where direct insurance claims will have priority over the claims of other unsecured creditors (with the exception of preferred creditors), including reinsurance creditors, on a winding up by the court or a creditors' voluntary winding up of the insurance company. Furthermore, instead of making a winding-up order when an insurance company has been proved unable to pay its debts, a UK court may reduce the amount of one or more of the insurance company's contracts on terms and subject to conditions (if any) which the court considers fit. Where an insurance company is in financial difficulties but not in liquidation, the FSCS may take measures to secure the transfer of all or part of the business to another insurance company.

FSMA provides further protection to policyholders of insurance companies effecting or carrying out contracts of long-term insurance. Unless the court orders otherwise, a liquidator and/or administrator must carry on the insurer's business so far as it consists of carrying out the insurer's contracts of long-term insurance with a view to it being transferred as a going concern to a person who may lawfully carry out those contracts. In carrying on the business, the liquidator/administrator may agree to the variation of any contracts of insurance in existence when the winding-up order is made, but must not effect any new contracts of insurance.

#### **United States**

We write life and annuity business in the United States through Aviva USA, a wholly owned subsidiary formed by the merger of Aviva Life Insurance Company of America with AmerUS which it acquired in July 2006. Aviva USA is domiciled in Iowa and licensed to conduct business in all 50 states. In New York it operates a wholly owned subsidiary, Aviva Life Insurance Company of New York.

The US insurance industry is regulated primarily on a state-by-state basis. Individual states have authority to pass statutes, adopt regulation or issue directives to regulate insurance activities within their jurisdiction.

Consequently, life insurance companies are subject to regulation both in the state in which they are domiciled as well as in each of the individual states in which they operate. State regulation can vary from state to state. All have laws and regulations covering the financial aspects of the insurance business, including standards of solvency, reserves reinsurance and capital adequacy. In addition, most states have specific regulation governing licensing and the conduct of selling agents as well as the approval of products and associated product forms and literature.

### Federal initiatives

While the National Association of Insurance Commissioners (NAIC) has no statutory powers, its members are the insurance commissioners in each state and it acts as a forum to develop and propose model laws and regulations. Each state then decides whether to adopt the NAIC model laws or regulations and each state may make changes to the adoption process. However, the models are generally widely adopted. An example is the 'Suitability in Annuity Transactions Model Act' which has been widely adopted by states for a broad range of transactions.

NAIC has a commitment to modernising the state-based system of insurance regulation and is pushing forward an action plan aimed at achieving consistency of approach between states on a number of issues including risk management and the solvency regulatory framework. The American Council of Life Insurers (ACLI) has, in the past, proposed an optional federal charter (OFC) under which life insurers could choose to be federally regulated instead of state regulated. However, the OFC has not been adopted.

In 2010, Congress passed a law adopting significant federal regulatory reforms for the financial services industry in the US. The new law will impose stricter prudential standards on systemically significant financial companies, higher-risk financial activities and introduce new mechanisms for resolving failures of significant financial companies. The law requires additional stress testing and reporting on a regular basis. In addition, a Federal Insurance Office (FIO) has been established within the Treasury Department to monitor the insurance industry, co-ordinate federal policy and, along with the US Trade Representative, enter into international agreements on prudential insurance matters. While the FIO will have no direct regulatory authority over the business of insurance, such international agreements could pre-empt inconsistent state insurance laws. The FIO is also required, among other things, to conduct a study of how to improve and modernise insurance regulation and to report to Congress. The new law does not currently have any immediate and significant impact on the Company and the FIO is still in the process of being organised. However, we continue to monitor the FIO and related rulemaking developments.

Additionally, there is active discussion within the NAIC of moving to a principles-based valuation system for the setting of reserves and capital for life insurance companies. This could change our statutory reserve and capital requirements significantly and it is not possible to estimate the impact on our financial condition and results of operation at this time.

### Risk-based capital

The NAIC has developed risk-based capital standards for life insurance companies as well as a model act for state legislatures to enact. The model act requires that life insurance companies report on a formula-based, risk-based capital standard that they calculate by applying factors to various asset, premium and reserve items. The formula takes into account the risk characteristics of a company, including asset risk, insurance risk, interest rate risk and business risk. The NAIC designed the formula as an early-warning tool to identify potentially inadequately capitalised companies for the purposes of initiating regulatory action. The model act imposes broad confidentiality requirements on those engaged in the insurance business (including insurers, agents, brokers and others) and on state insurance departments as to the use and publication of risk-based capital data.

Any state adopting the model act gives the state insurance commissioner explicit regulatory authority to require various actions by, or take various actions against, insurance companies whose adjusted capital does not meet minimum risk-based capital standards. The Iowa Insurance Commissioner takes into account the NAIC's risk-based capital standards to determine adequate compliance with Iowa insurance law.

Effective 31 December 2005, the NAIC implemented new requirements, referred to as C-3 Phase II, for calculating risk-based capital in connection with variable annuity products with death and living benefit guarantees. These changes did not have a material effect on our US operations, and at 31 December 2011, the Company's total adjusted capital under the NAIC's definition substantially exceeded Iowa standards.

### Canada

We write property and casualty business in Canada via a number of wholly owned companies.

Insurance business in Canada is regulated federally by the Office of the Superintendent of Financial Institutions (OSFI) with the focus on prudential supervision (i.e. capital adequacy, solvency, etc). OSFI derives its powers from the federal Insurance Companies Act (Canada) which governs the structure and operation of federally incorporated insurance companies.

The capital adequacy of insurance companies is monitored under the Minimum Capital Test (MCT), a risk-based framework allowing for capital to be assessed on the basis of an individual company's risk profile taking account of the investments held and insurance business being written. Companies have their own internal MCT target as well as being expected to maintain capital in excess of 150% of the OSFI minimum requirement.

There are also ten individual provincial regulators each regulating predominantly conduct of business issues such as policy terms and conditions, and pricing and underwriting of companies they have licensed to write business in the province.

### Asia Pacific

We operate within the Asia Pacific region through a network of subsidiary companies either wholly owned or established as a joint venture with a local partner. Our business in the region is predominately long-term and savings business, with small general insurance and health operations.

There are wholly owned businesses in Singapore and Hong Kong. Aviva operates businesses in China, India, Malaysia, Sri Lanka, Taiwan, Korea, Indonesia and Vietnam which, depending on the nature and extent of the control we are able to exert, are either accounted for as subsidiaries, joint ventures or associates.

The Asia Pacific region is made up of a number of widely differing and independent markets. The markets tend to be at different stages in their development but each has its own regulatory structures and Aviva complies with the local regulation in each of the countries in which it operates.

Industry regulation across the region typically focuses on financial stability, i.e. minimum capital and the basis for calculating solvency, reserves and policyholder liability. In many of the markets across the region regulators have the power to revoke operating licences, regulate shareholder structures and the participation in and the payment of dividends. Markets within the region are moving quickly to modernise insurance regulation with an increasing focus on governance and conduct of business.

### Intellectual property

Our primary brands (the Aviva name and logo) are registered trade marks in the UK and are registered or pending in all other countries where Aviva has operations.

Aviva has an active programme of review of marks and watching for infringements. There are no material infringements in the UK known to us as at the date of this report, either by the Group or third parties.

## Risks relating to our business

You should carefully review the following risk factors together with other information contained in this Annual Report before making an investment decision relating to our ordinary shares or ADSs. Our business, financial position, results of our operations and cash flow could be materially affected by any of these risks, the trading price of our ordinary shares or ADSs could decline due to any of these risks and investors may lose part or all of their investment.

### **Ongoing difficult conditions in the global financial markets and the economy generally may adversely affect our business and results of operations, and these conditions may continue.**

Our results of operations are materially affected by uncertainty in the worldwide financial markets and macro-economic conditions generally. A wide variety of factors, including concerns over slowing growth, high sovereign debt within, and to a lesser degree outside, the eurozone, the stability and solvency of financial institutions, longer-term low interest rates in developed markets, inflationary threats as well as geopolitical issues in the Middle East and North Africa, have contributed to increased volatility in the financial markets and diminished expectations for the global economy going forward. Global fixed income markets continue to experience both volatility and limited market liquidity, which have affected a broad range of asset classes and sectors.

Factors relating to general economic conditions, such as consumer spending, business investment, government spending, the volatility and strength of both debt and equity markets, and inflation, all affect the profitability of our business. In a sustained economic phase of low growth and high public debt, characterised by higher unemployment, lower household income, lower corporate earnings, lower business investment and lower consumer spending, the demand for our financial and insurance products could be adversely affected. In addition, we may experience an elevated incidence of claims or surrenders of policies. Any potential material adverse affect will also be dependent upon customer behaviour and confidence.

### **As a global business, we are exposed to various local political, regulatory and economic conditions, business risks and challenges which may affect the demand for our products and services, the value of our investment portfolios and the credit quality of local counterparties.**

We offer our products and services in Europe (including the UK), North America and the Asia Pacific region through wholly owned and majority-owned subsidiaries, joint ventures, companies in which we hold non-controlling equity stakes, agents and independent contractors. Our international operations expose us to different local political, regulatory, business and financial risks and challenges which may affect the demand for our products and services, the value of our investment portfolio, the required levels of capital and surplus, and the credit quality of local counterparties. These risks include, for example, political, social or economic instability in countries in which we operate, discriminatory regulation, credit risks of our counterparties, lack of local business experience in certain markets, risks associated with exposure to insurance industry insolvencies through policyholder guarantee funds or similar mechanisms set up in markets in which we are present and, in certain cases, risks associated with the potential incompatibility with foreign partners, especially in countries in which we are conducting business through entities we do not control. Some of our international insurance

operations are, and are likely to continue to be, in emerging markets where these risks are heightened. Our overall success as a global business depends, in part, upon our ability to succeed in different economic, social and political conditions.

### **Credit risks relating to Aviva's business**

#### **Market developments and government actions regarding the sovereign debt crisis in Europe, particularly in Greece, Ireland, Italy, Portugal and Spain, could have a material adverse effect on our results of operations, financial condition and liquidity.**

Global markets and economic conditions recently have been negatively impacted by the ability of certain European Union (EU) member states to service their sovereign debt obligations. The continued uncertainty over the outcome of various EU and international financial support programs and the possibility that other EU member states may experience similar financial pressures could further disrupt global markets. In particular, this crisis has disrupted and could further disrupt equity and fixed income markets and result in volatile bond yields on the sovereign debt of EU members.

The issues arising out of the current sovereign debt crisis may transcend Europe, cause investors to lose confidence in the safety and soundness of European financial institutions and the stability of European member economies, and likewise affect UK and US based financial institutions, the stability of the global financial markets and any economic recovery. The Group holds investments in UK and non-UK securities. See 'Performance Review – Analysis of Investments' for more information.

If an EU member state were to default on its obligations or seek to leave the eurozone, or the eurozone were broken up entirely, the impact on the financial and currency markets would be significant and could impact materially all financial institutions, including the Group. Such events could adversely affect our business and results of operations, financial condition and liquidity.

#### **Credit spread volatility may adversely affect the net unrealised value of the investment portfolio and our results of operations.**

Our exposure to credit spreads primarily relates to market price variability associated with changes in credit spreads in our investment portfolio, which is largely held to maturity. Credit spread moves may be caused by changes in the perception of the credit worthiness of the issuer, or from market factors such as the markets risk appetite and liquidity. A widening of credit spreads will generally reduce the value of fixed income securities we hold. Conversely, credit spread tightening will generally increase the value of fixed income securities we hold. It can be difficult to value certain of our securities if trading becomes less liquid. Accordingly, valuations of investments may include assumptions or estimates that may have significant period to period changes that could have a material adverse effect on our consolidated results of operations or financial condition. Downturns in the net unrealised value of our investment portfolio may also have a material adverse effect on our regulatory capital surplus based on the EU Insurance Groups Directive. Although our financial statements reflect the market value of assets, our priority remains the management of assets and liabilities over the longer term.

#### **Losses due to defaults by counterparties, including potential sovereign debt defaults or restructurings, could adversely affect the value of our investments and reduce our profitability and shareholders' equity.**

We choose to take and manage credit risk through our investment assets partly to increase returns to policy holders whose policies the assets back, and partly to optimise the return for shareholders.

We have a significant exposure to third parties that owe us money, securities or other assets who may not perform under their payment obligations. These parties include private sector and government (or government-backed) issuers whose debt securities we hold in our investment portfolios (including mortgage-backed, asset-backed, government bonds and other types of securities), borrowers under residential and commercial mortgages and other loans, re-insurers to which we have ceded insurance risks, customers, trading counterparties, and counterparties under swap and other derivative contracts. We also execute transactions with other counterparties in the financial services industry, including brokers and dealers, commercial and investment banks, hedge funds and other investment funds, insurance groups and institutions. Many of these transactions expose us to credit risk in the event of default of our counterparty.

In addition, with respect to secured transactions, our credit risk may be increased when the collateral held by us cannot be realised or is liquidated at prices insufficient to recover the full amount of the loan or other value due. We also have exposure to these financial institutions in the form of unsecured debt instruments and derivative transactions. Such losses or impairments to the carrying value of these assets could materially and adversely affect our financial condition and results of operations.

We use reinsurance and hedging programs to hedge various risks, including certain guaranteed minimum benefits contained in many of our long-term insurance and fund management products. These programs cannot eliminate all of the risks and no assurance can be given as to the extent to which such programs will be effective in reducing such risks. We enter into a variety of derivative instruments, including options, forwards, interest rate and currency swaps, with a number of counterparties. Our obligations under our fund management and life products are not changed by our hedging activities and we are liable for our obligations even if our derivative counterparties do not pay us. Defaults by such counterparties could have a material adverse effect on our financial condition and results of operations.

We are also susceptible to an adverse financial outcome from a change in third-party credit standing. As well as having a potential impact on spreads, rating movements can trigger solvency and accounting impacts and can drive management actions and the realisation of losses, particularly where investment mandates set counterparty and portfolio limits based on ratings. For additional information about our investments, see 'Performance review – Analysis of investments'.

#### Market risks relating to Aviva's business

##### **Changes in interest rates may cause policyholders to surrender their contracts, reduce the value of our investment portfolio and impact our asset and liability matching, which could adversely affect our results of operation and financial condition.**

Our exposure to interest rate risk relates primarily to the market price and cash flow variability of assets and liabilities associated with changes in interest rates.

Some of our products, principally traditional participating products, universal life insurance and annuities, including fixed and equity indexed annuities, expose us to the risk that changes in interest rates will reduce our 'spread', or the difference between the amounts that we are required to pay under the contracts and the rate of return we are able to earn on investments intended to support obligations under the contracts. Our spread is a key component of our net income.

As interest rates decrease or remain at low levels, we may be forced to reinvest proceeds from investments that have matured or have been prepaid or sold at lower yields, reducing our

investment return. Moreover, borrowers may prepay or redeem the fixed-income securities, commercial mortgages and mortgage-backed securities in our investment portfolio with greater frequency in order to borrow at lower market rates, which increases this risk. Lowering interest crediting rates can help offset decreases in investment margins on some products. However, our ability to lower these rates could be limited by competition or contractually guaranteed minimum rates and may not match the timing or magnitude of changes in asset yields. As a result, our spread could decrease or potentially become negative. Our expectation for future spreads is an important component in the amortisation of policy acquisition costs and significantly lower spreads may cause us to accelerate amortisation, thereby reducing net income in the affected reporting period. In addition, during periods of declining interest rates, the guarantees within existing life insurance and annuity products may be more attractive to consumers, resulting in increased premium payments on products with flexible premium features, and a higher percentage of insurance policies remaining in force from year to year, during a period when our new investments carry lower returns. Accordingly, during periods of declining interest rates, our profitability may suffer as the result of a decrease in the spread between interest rates credited to policyholders and returns on our investment portfolio.

Increases in market interest rates could also negatively affect our profitability. Surrenders of life insurance policies and fixed annuity contracts may increase as policyholders seek higher returns and higher guaranteed minimum returns. Obtaining cash to satisfy these surrenders may require us to liquidate fixed maturity investments at a time when market prices for those assets are depressed which may result in realised investment losses. Regardless of whether we realise an investment loss, these cash payments would result in a decrease in total invested assets, and may decrease our net income. Premature withdrawals may also cause us to accelerate amortisation of policy acquisition costs, which would also reduce our net income.

Our mitigation efforts with respect to interest rate risk are primarily focused on maintaining an investment portfolio with diversified maturities that has a weighted average duration approximately equal to the duration of our estimated liability cash flow profile. However, it may not be possible to hold assets that will provide cash flows to exactly match those relating to policyholder liabilities, in particular in jurisdictions with less developed bond markets and in certain markets where regulated surrender value or maturity values are set with reference to the interest rate environment prevailing at the time of policy issue. This is due to the duration and uncertainty of the liability cash flows and the lack of sufficient assets of suitable duration. This results in a residual asset/liability mismatch risk that can be managed but not eliminated. In addition, our estimate of the liability cash flow profile may be inaccurate for other reasons, such as varying mortality or general insurance claims, and we may be forced to liquidate investments prior to maturity at a loss in order to cover the liability. Such a loss could have a material adverse affect on our results of operations and financial condition. See 'Financial statements IFRS – Note 56 – Risk management'.

##### **Falls in equity or property prices could have an adverse impact on our investment portfolio and impact our results of operations and shareholders' equity.**

We are subject to equity and property price risk due to holdings of equities and investment properties in a variety of locations worldwide. Downturns in equity markets will depress equity prices and have a negative impact on our capital position in that unrealised losses in our net investment portfolio will increase, and our defined benefit pension scheme surplus/deficit will

reduce/increase as the market value of scheme assets invested in equities decreases.

Downturns and volatility in equity markets can have a material adverse effect on the revenues and returns from our unit-linked, participating and fund management business. The unit-linked and fund management business depends on fees related primarily to the value of assets under management and would therefore be reduced by declines in equity and property markets. Profits could also be reduced as a result of current investors withdrawing funds or reducing their rates of ongoing investment with our fund management companies or as a result of our fund management companies failing to attract funds from new investors. Similarly, bonuses credited to participating policyholders will reduce, following declines in equity and property markets and this will generally also lead to reductions in transfers to shareholders.

Downturns in equity markets may also have a material adverse effect on our regulatory capital surplus as measured under the EU Insurance Groups Directive. We provide certain guarantees within some of our products that protect policyholders against significant downturns in the equity markets. In volatile or declining equity market conditions, we may need to increase liabilities for future policy benefits and policyholder account balances, negatively affecting net income. For a discussion of guarantees we have given for our insurance and investment products, see 'Financial statements IFRS – Note 41 – Financial guarantees and options'.

In our US business in particular, market downturns and volatility may discourage purchases of accumulation products, such as equity-indexed annuities and equity-indexed life insurance, that have returns linked to the performance of the equity markets and may cause some of our existing customers to withdraw cash values or reduce investments in those products. A sustained weakness in the markets will decrease revenues and earnings in these types of products.

For property investment, we are subject to counterparty, valuation and liquidity risks. These investments may be adversely affected by weakness in property markets and increased mortgage delinquencies. We are also subject to property risk indirectly in our investments in residential mortgage-backed securities (RMBS) and commercial mortgage-backed securities (CMBS). There is the risk that the underlying collateral may fall in value causing the investment in securities to fall in value. The markets for these property investments and instruments can become illiquid, and issues relating to counterparty credit ratings and other factors may increase pricing and valuation uncertainties.

**Fluctuations in currency exchange rates may adversely affect our results of operations and financial condition.**

We operate internationally and are exposed to foreign currency exchange risk arising from fluctuations in exchange rates of various currencies. For the year ended 31 December 2011, over half of our premium income arises in currencies other than sterling, and our net assets are denominated in a variety of currencies, of which the largest are the euro, sterling and US dollar. In managing our foreign currency exposures, we do not hedge revenues as these are substantially retained locally to support the growth of the business and meet local regulatory and market requirements. Nevertheless, the effect of exchange rate fluctuations on local operating results could lead to significant fluctuations in our consolidated financial statements upon translation of the results into sterling. Although we take certain actions to address this risk, foreign currency exchange rate fluctuation could materially adversely affect our reported results due to unhedged positions or the failure of hedges to effectively offset the impact of the foreign currency exchange rate fluctuation. Any adverse foreign currency exchange fluctuation

may also have a material adverse effect on our regulatory capital surplus based on the EU Insurance Groups Directive.

For a discussion of the impact of changes in foreign exchange rates on our results of operations, see 'Financial statements IFRS – Note 56 – Risk management'.

**Market fluctuations may cause the value of options and guarantees embedded in some of our life insurance products to exceed the value of the assets backing their reserves, which could adversely affect our results of operations or financial condition.**

As a normal part of their operating activities, various Group companies have given guarantees and options, including interest rate and investment return guarantees, in respect of certain long-term insurance and fund management products. In providing these guarantees and options, our capital position is sensitive to fluctuations in financial variables, including foreign currency exchange rates, interest rates, property values and equity prices.

Interest rate guaranteed returns, such as those available on guaranteed annuity options (GAOs), are sensitive to interest rates falling below the guaranteed level. Other guarantees, such as maturity value guarantees and guarantees in relation to minimum rates of return, are sensitive to fluctuations in the investment return below the level assumed when the guarantee was made.

Periods of significant and sustained downturns in equity markets, increased equity volatility or reduced interest rates could result in an increase in the valuation of the future policy benefit or policyholder account balance liabilities associated with such products, resulting in a reduction to net income. We use reinsurance in combination with derivative instruments to mitigate some of the liability exposure and the volatility of net income associated with these liabilities, and while we believe that these and other actions mitigate the risks related to these benefits, we remain liable for the guaranteed benefits in the event that reinsurers or derivative counterparties are unable or unwilling to pay.

We are also subject to the risk that the cost of hedging these guaranteed minimum benefits increases, resulting in a reduction to net income. In addition, we are subject to the risk that unanticipated policyholder behaviour or mortality, combined with adverse market events, produces economic losses beyond the scope of the risk management techniques employed. These, individually or collectively, may have a material adverse effect on our results of operations, financial condition or liquidity.

**The determination of the amount of allowances and impairments taken on our investments is highly subjective. If our business does not perform well, we may be required to recognise an impairment of our goodwill or intangibles with indefinite and finite useful lives, which could adversely affect our results of operations or financial condition.**

The determination of the amount of allowances and impairments vary by investment type and is based upon our periodic evaluation and assessment of known risks associated with the respective asset class. Such evaluations and assessments are revised as conditions change and new information becomes available and additional impairments may need to be taken or allowances provided for in the future. If the carrying value of an investment is greater than the recoverable amount, the carrying value is reduced through a charge to the income statement in the period of impairment. There can be no assurance that management has accurately assessed the level of impairments taken and allowances reflected in our financial statements.

Goodwill represents the excess of the amounts we paid to acquire subsidiaries and other businesses over the fair value of their net assets at the date of acquisition. We test goodwill and

intangible assets with indefinite useful lives at least annually for impairment or when circumstances or events indicate there may be uncertainty over this value. We test intangibles with finite lives when circumstances or events indicate there may be uncertainty over this value. For impairment testing, goodwill and intangibles have been allocated to cash-generating units by geographical reporting unit and business segment.

The fair value of the reporting unit is impacted by the performance of the business. Goodwill, negative unallocated divisible surplus and indefinite life intangibles are written down for impairment where the recoverable amount is insufficient to support its carrying value. Such write downs could have a material adverse effect on our results of operations or financial condition.

#### Liquidity risks relating to Aviva's business

**Adverse capital and credit market conditions may affect our ability to meet liquidity needs and to access capital which could adversely affect our results of operations or financial condition.**

At a Group level, we need some of our invested assets to be liquid to pay our operating expenses, taxes, interest on our debt, dividends on our capital stock and repay maturing debt. At an operational level we also need liquidity to meet insurance claims. Without sufficient liquidity, we could be forced to curtail our operations and our business would suffer. The principal sources of our liquidity are insurance premiums, annuity considerations, deposit funds and cash flow from our investment portfolio and assets, consisting mainly of cash or assets that are readily convertible into cash. Sources of liquidity in normal markets also include a variety of short and long-term instruments, including repurchase agreements, commercial paper, medium and long-term debt, junior subordinated debt, securities, capital securities and stockholders' equity.

We hold certain investments that may lack liquidity such as privately placed fixed-maturity securities, and unlisted equities, as the inputs used for their valuation are not directly observable in the market. These asset classes represented approximately 4.3% of the total assets held at fair value as of 31 December 2011. As has been the case across the industry, even some of our higher-quality assets have been more illiquid as a result of the recent challenging market conditions.

The reported value of our relatively illiquid types of investments, our investments in the asset classes described in the paragraph above and, at times, our higher-quality, generally liquid asset classes, do not necessarily reflect the lowest current market price for the asset. If we were forced to sell certain of our assets in the current market, there can be no assurance that we will be able to sell them for the prices at which we have recorded them and we may be forced to sell them at significantly lower prices.

We may need to seek additional financing in the event internal resources are not sufficient to meet our needs. The availability of additional financing will depend on a variety of factors such as market conditions, the general availability of credit and the overall availability of credit to the financial services industry. Disruptions and uncertainty or volatility in the capital and credit markets may exert downward pressure on availability of liquidity and credit capacity for certain issuers and may limit our access to capital required to operate and grow our business. Such market conditions may limit our ability to replace, in a timely manner, maturing debt, satisfy statutory capital requirements and generate fee income and market-related revenue to meet liquidity needs.

As such, we may be forced to delay raising capital, issue shorter-term securities than we prefer, or bear an unattractive cost of capital which could decrease our profitability and reduce

our financial flexibility. Our results of operations, financial condition and cash flows could be materially adversely affected.

#### Insurance risks relating to Aviva's business

**The cyclical nature of the insurance industry may cause fluctuations in our results.**

Historically, the insurance industry has been cyclical and operating results of insurers have fluctuated because of volatile and sometimes unpredictable developments, many of which are beyond the direct control of any insurer. Although we have a geographically diverse group of businesses providing a wide range of products, we expect to experience the effects of this cyclical nature, including changes in sales and premium levels. The unpredictability and competitive nature of the general insurance business has contributed historically to significant quarter-to-quarter and year-to-year fluctuations in underwriting results and net earnings.

**The use of inaccurate assumptions in pricing and reserving for insurance business may have an adverse effect on our business profitability.**

The Group's life insurance companies are required to make a number of assumptions in relation to the business written, including the mortality and morbidity rates of our customers, the development of interest rates, persistency rates (the rates at which customers terminate existing policies prior to their maturity dates) and future levels of expenses. These assumptions may turn out to be incorrect.

When establishing their liabilities, our life insurance companies allow for changes in the assumptions made, monitor their experience against the actuarial assumptions used and assess the information gathered to refine their long-term assumptions, together with taking actual claims experience into account. However, it is not possible to determine precisely the total amounts that will ultimately be paid under the policies written by the business as amounts may vary from estimates. Changes in assumptions may also lead to changes in the level of capital required to be maintained, meaning that we may need to increase the amount of our reserves. This could have a material adverse impact on the Group's value, the results of our operations and financial condition.

Additionally, our management of the general insurance business requires the general insurance companies to make a number of assumptions in relation to the business written. These assumptions include the costs of writing the business and settling claims, and the frequency and severity of claims. The assumptions may turn out to be incorrect, thereby adversely impacting our profit. Additionally, man-made disasters, including accidents and intentional events, are difficult to predict with a high degree of accuracy. These would also have an adverse impact on our profit due to higher than expected claims.

Furthermore, outstanding claims provisions for the general insurance business are based on the best-estimate ultimate cost of all claims incurred but not settled at a given date, whether reported or not, together with related claims handling costs.

Any provisions for re-opened claims are also included. A range of methods, including stochastic projections, may be used to determine these provisions. Underlying these methods are a number of explicit or implicit assumptions relating to the expected settlement amount and settlement pattern of claims.

If the assumptions underlying the reserving basis were to prove incorrect, we might have to increase the amount of the general insurance provisions, which would adversely impact our financial condition or results of operations.

**We have a significant exposure to annuity business and a significant life insurance risk is associated with longevity.**

Longevity statistics are monitored in detail, compared with emerging industry trends, and the results are used to inform both the reserving and pricing of annuities. It is likely that uncertainty will remain in the development of future longevity that cannot be mitigated.

A strengthening in the longevity assumption, either to reflect changes in the underlying life expectancy of the population or of our particular portfolio used to calculate our long-term business liabilities, would result in an increase in these reserves and reduce our shareholders' equity. See 'Financial statements IFRS – Note 56 – Risk management'.

**If our business does not perform well or if actual experience versus estimates used in valuing and amortising deferred acquisition costs (DAC) and acquired value of in-force business (AVIF) vary significantly, we may be required to accelerate the amortisation and/or impair the DAC and AVIF which could adversely affect our results of operations or financial condition.**

We incur significant costs in connection with acquiring new and renewal business. Those costs that vary with and are driven by the production of new and renewal business are deferred and referred to as DAC. The recovery of DAC is dependent upon the future profitability of the related business. The amount of future profit or margin is dependent principally on investment returns in excess of the amounts credited to policyholders, mortality, morbidity, persistency and expenses to administer the business. Of these factors, investment margins and general insurance underwriting profit are most likely to impact the rate of amortisation of such costs. The aforementioned factors enter into management's estimates of gross profits or margins, which generally are used to amortise such costs. If the estimates of gross profits or margins were overstated, then the amortisation of such costs would be accelerated in the period the actual amount is known and would result in a charge to income. Significant or sustained equity market declines could result in an acceleration of amortisation of the DAC related to UK unit-linked business, resulting in a charge to income. Such adjustments could have a material adverse effect on our results of operations or financial condition.

AVIF reflects the estimated present value of future profits that will emerge over the remaining life of certain in-force contracts in a life insurance company, acquired either directly or through the purchase of a subsidiary, and represents the portion of the purchase price that is allocated to the value of the right to receive future cash flows from the insurance and investment contracts in-force at the acquisition date. AVIF is based on actuarially determined projections. Actual experience may vary from the projections. Revisions to estimates result in changes to the amounts expensed in the reporting period in which the revisions are made and could result in impairment and a charge to income. Where AVIF is amortised, an acceleration of the amortisation of AVIF would occur if the estimates of gross profits or margins were overstated in the period in which the actual experience is known and would result in a charge to net income. Such adjustments could have an adverse effect on our results of operations or financial condition.

**Catastrophic events, which are often unpredictable by nature, could result in material losses and abruptly and significantly interrupt our business activities.**

Our business is exposed to volatile natural and man-made disasters such as pandemics, hurricanes, windstorms, earthquakes, terrorism, riots, fires and explosions. Over the past several years, changing weather patterns and climatic conditions

have added to the unpredictability and frequency of natural disasters in certain parts of the world and created additional uncertainty as to future trends and exposure.

Our life insurance operations are exposed to the risk of catastrophic mortality, such as a pandemic or other event that causes a large number of deaths. The effectiveness of external parties, including governmental and non-governmental organisations, in combating the spread and severity of such a pandemic could have a material impact on the losses experienced by us.

The extent of losses from a catastrophe is a function of both the total amount of insured exposure in the area affected by the event and the severity of the event. Most catastrophes are restricted to small geographic areas; however, pandemics, hurricanes, earthquakes and man-made catastrophes may produce significant damage in larger areas, especially those that are heavily populated. Catastrophic events could also harm the financial condition of our reinsurers and thereby increase the probability of default on reinsurance recoveries and could also reduce our ability to write new business. Furthermore, pandemics, natural disasters, terrorism and fires could disrupt our operations and result in significant loss of property, key personnel and information about our clients and our business if our business continuity plans fail to cope with the scale or nature of the catastrophe. Such events could adversely affect our business, results or operations, corporate reputation and financial condition for a substantial period of time.

Furthermore, market conditions beyond our control determine the availability and cost of the reinsurance protection we purchase. Accordingly, we may be forced to incur additional expenses for reinsurance or may not be able to obtain sufficient reinsurance on acceptable terms, which could adversely affect our ability to write future business.

**Operational risks relating to Aviva's business**

**All of our businesses are subject to operational risks, including the risk of direct or indirect loss resulting from inadequate or failed internal and external processes, systems and human error or from external events.**

Our business is dependent on processing a large number of complex transactions across numerous and diverse products. Furthermore, the long-term nature of the majority of our business means that accurate records have to be maintained for significant periods.

We also outsource several operations, including certain servicing and IT functions and are therefore partially reliant upon the operational processing performance of our outsourcing partners.

Our systems and processes on which we are dependent to serve our customers are designed to appropriately identify and address the operational risks associated with our activities. However, they may nonetheless fail due to IT malfunctions, human error, intentional disruption or hacking of IT systems by third parties, business interruptions, non-performance by third parties or other external events. This could disrupt business operations resulting in material reputational damage and the loss of customers, and have a consequent material adverse effect on our results of operations and financial condition. Although we have taken steps to upgrade systems and processes to reduce these operational risks, we cannot anticipate the details or timing of all possible operational and systems failures which may adversely impact our business.

**We operate in several markets through arrangements with third parties. These arrangements involve certain risks that we do not face with our subsidiaries.**

Our ability to exercise management control over our partnership operations, our joint ventures and our investment in them depends on the terms of the legal agreements. In particular, the relationships depend on the allocation of control among, and continued co-operation between, the participants.

We may also face financial or other exposure in the event that any of our partners fail to meet their obligations under the agreement or encounter financial difficulty. For example, a significant proportion of our product distribution, such as bancassurance, is carried out through arrangements with third parties not controlled by us and is dependent upon the continuation of these relationships. A temporary or permanent disruption to these distribution arrangements could affect our financial condition. Some of these arrangements require our third-party partners to participate in and provide capital to our joint venture, associate and subsidiary undertakings. Our partners may change their strategic priorities or encounter financial difficulties preventing them from providing the necessary capital to promote future growth.

In addition, we outsource certain customer service, technology and legacy policy administration functions to third parties and may do so increasingly in the future. If we do not effectively develop and implement our outsourcing strategy, third-party providers do not perform as anticipated or we experience technological or other problems with a transition to or between such providers, we may not realise the full extent of productivity improvements or cost efficiencies and may experience operational difficulties, increased costs and a loss of business.

**The failure to attract or retain the necessary personnel could have a material adverse effect on our results and/or financial condition.**

As a global financial services organisation with a decentralised management structure, we rely to a considerable extent on the quality of local management in the regions and countries in which we operate. The success of our operations is dependent, among other things, on our ability to attract and retain highly qualified professional employees. Competition for such key employees is intense. Our ability to attract and retain key employees is dependent on a number of factors, including prevailing market conditions and compensation packages offered by companies competing for the same talent.

**There are inherent funding risks associated with our participation in defined benefit staff pension schemes.**

We operate both defined benefit and defined contribution staff pension schemes. The defined benefit section of the UK staff pension scheme was closed to new members from 1 April 2011, with entry into the defined contribution sections being offered to the staff members affected. Closure of the defined benefit scheme will remove the volatility associated with adding future accrual for active members.

There are inherent funding risks associated with the defined benefit schemes. Events could result in a material reduction in the funding position of such schemes and, in some cases, may result in a deficit between the pension scheme's assets and liabilities. The factors that affect the scheme's position include: poor investment performance of pension fund investments; greater life expectancy than assumed; adverse changes in interest rates or inflation; and other events occurring that increase the costs of past service benefits over the amounts predicted in the actuarial assumptions. In the short term, the funding position is inherently volatile due to movements in the market value of assets. Where a

funding deficit or surplus arises, the position will be discussed with the scheme trustees to agree appropriate actions. This may include a plan to fund the deficit over a period of years. Any surplus or deficit in the defined benefit pension scheme will affect our shareholders' equity, although the IFRS position may diverge from the scheme funding position.

**Our process for valuing investments may include methodologies, estimations and assumptions which require judgement and could result in changes to investment valuations.**

We value our AFS and FV securities using designated methodologies, estimation and assumptions. These securities, which are reported at fair value on the consolidated statement of financial position, represent the majority of our total cash and invested assets. We have categorised the measurement basis for assets carried at fair value into a 'fair value hierarchy' in accordance with the valuation inputs and consistent with IFRS 7 Financial Instruments: Disclosures. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1); the middle priority to fair values other than quoted prices based on observable market information (Level 2); and the lowest priority to unobservable inputs that reflect the assumptions that we consider market participants would normally use (Level 3). The majority of our financial assets are valued based on quoted market information (Level 1) or observable market data (Level 2). At 31 December 2011, 4.3% of total financial investments, loans and investment properties at fair value were classified as Level 3, amounting to £11,369 million. Where estimates were used for inputs to Level 3 fair values, these were based on a combination of independent third-party evidence and internally developed models, intended to be calibrated to market observable data where possible.

An asset or liability's classification within the fair value hierarchy is based on the lowest level of significant input to its valuation. See 'IFRS critical accounting policies – Investments'. Any change to investment valuations may affect our results of operations and reported financial condition.

**Systems errors or regulatory changes may affect the calculation of unit prices or deduction of charges for our unit-linked products which may require us to compensate customers retrospectively.**

A significant proportion of our product sales are unit-linked contracts, where product benefits are linked to the prices of underlying unit funds. While comprehensive controls are in place, there is a risk of error in the calculation of the prices of these funds due to human error in data entry, IT-related issues or other causes. Additionally, it is possible that policy charges which are deducted from these contracts are taken incorrectly, or the methodology is subsequently challenged by policyholders or regulators and changed retrospectively. Any of these can give rise to compensation payments to customers. Controls are in place to mitigate these risks, but errors could give rise to future liabilities. Payments due to errors or compensation may negatively impact our profits.

**Brand and reputation risks relating to Aviva's business**

**We are rated by several rating agencies, and a decline in any of these ratings could affect our standing among customers, broker-dealers, agents, wholesalers and other distributors of our products and services and cause our sales and earnings to decrease.**

A rating downgrade, or the perceived potential for such a downgrade, of Aviva plc or any of our rated insurance subsidiaries may, among other things, materially increase the number of policy surrenders and withdrawals by policyholders of cash values

from their policies. The outcome of such activities may be cash payments requiring the sale of invested assets, including illiquid assets, at a price that may result in realised investment losses. These cash payments to policyholders would result in a decrease in total invested assets and a decrease in net income. Among other things, early withdrawals may also cause us to accelerate amortisation of policy acquisition costs, which would reduce net income. A rating downgrade may also impact sales volumes, particularly in the US where there is more focus on ratings when evaluating similar products. The ratings provided by AM Best are widely considered to be the most important for distribution in the US, and a downgrade could lead to a significant loss of sales. Similarly, a rating downgrade may increase our cost of borrowing or limit our access to some forms of financing.

**We are dependent on the strength of our brand, the brands of our partners and our reputation with customers and agents in the sale of our products and services.**

Our results are, to a certain extent, dependent on the strength of our brand and reputation. While we as a Group are well recognised, we are vulnerable to adverse market and customer perception. We operate in an industry where integrity, customer trust and confidence are paramount. We are exposed to the risk that litigation, employee misconduct, operational failures, the outcome of regulatory investigations, press speculation and negative publicity, disclosure of confidential client information, inadequate services, among others, whether true or not, could impact our brand or reputation. Our brand and reputation could also be affected if products or services recommended by us (or any of our intermediaries) do not perform as expected (whether or not the expectations are founded) or in line with the customers' expectations for the product range. Such a change to our brand strength could adversely affect our results of operations and financial condition.

**We may not be able to protect our intellectual property and may be subject to infringement claims by a third party.**

Our primary brand in the UK (Aviva) is a registered trade mark in the UK and elsewhere. We own other registered or pending trade marks in the UK, including Community trade marks having effect in the entire EU. We rely on a combination of contractual rights, copyright and trademark laws to establish and protect our intellectual property. Although we use a broad range of measures to protect our intellectual property rights, third parties may infringe or misappropriate our intellectual property. The loss of intellectual property protection or the inability to secure or enforce the protection of our intellectual property assets could have a material adverse effect on our business and our ability to compete.

Third parties may have, or may eventually be issued, patents or other protections that could be infringed by our products, methods, processes or services or could limit our ability to offer certain product features. In recent years, there has been increasing intellectual property litigation in the financial services industry challenging, among other things, product designs and business processes. If a third party were to successfully assert an intellectual property infringement claim against us, or if we were otherwise precluded from offering certain features or designs, or utilising certain processes, it could have a material effect on our business, results of operation and financial condition.

**Our businesses are conducted in highly competitive environments.**

There are many factors which affect our ability to sell our products, including fiscal incentives, price and yields offered, financial strength and ratings, range of product lines and product quality, brand strength and name recognition, investment

management performance and historical bonus levels. In some of our markets, the Group faces competitors that are larger, have greater financial resources or greater market share, offer a broader range of products, benefit from more advantageous tax treatments, or have higher bonus rates or claims-paying ratios. Further, heightened competition for talented and skilled employees with local experience, particularly in the emerging, high-growth markets, may limit our potential to grow our business as quickly as planned.

Our principal competitors in the life market include many of the major financial services businesses including, in particular, Axa, Allianz, Generali, Prudential and Standard Life. Our principal competitors in the general insurance market include Royal Bank of Scotland Insurance, RSA, Zurich, Axa and Allianz.

We also face competitors who specialise in many of the niche markets in which we operate. We believe that competition will intensify across all regions in response to consumer demand, technological advances, the impact of consolidation, regulatory actions and other factors.

Our ability to generate an appropriate return depends significantly upon our capacity to anticipate and respond appropriately to these competitive pressures.

**Our regulated business is subject to extensive regulatory supervision both in the UK and internationally.**

We are subject to extensive laws and regulations that are administered and enforced by a number of different governmental authorities and non-governmental self-regulatory agencies, including the FSA and other regulators. In light of wider financial and economic conditions, some of these authorities are considering, or may in the future consider, enhanced or new regulatory requirements intended to prevent future crises or otherwise assure the stability of institutions under their supervision. These authorities may also seek to exercise their supervisory or enforcement authority in new or more robust ways. All of these possibilities, if they occurred, could affect the way we conduct our business and manage our capital, and may require us to satisfy increased capital requirements.

Insurance regulation in the UK is largely based on the requirements of EU directives. Inconsistent application of directives by regulators in different EU member states may place our business at a competitive disadvantage to other European financial services groups. In addition, changes in the local regulatory regimes of designated territories could affect the calculation of our solvency position.

Our insurance subsidiaries worldwide are subject to detailed and comprehensive government regulation in each of the jurisdictions in which they conduct business. Regulatory agencies have broad administrative power over many aspects of the insurance business, which may include premium rates, marketing and selling practices, advertising, licensing agents, policy forms, capital adequacy and permitted investments. Government regulators are concerned primarily with the protection of policyholders rather than our shareholders or creditors. In the UK, our business is subject to regulation by the FSA, which has broad powers under the FSMA, including the authority to grant, vary the terms of, or cancel a regulated firm's authorisation, to investigate marketing and sales practices and to require the maintenance of adequate financial resources. The FSA has the power to take a range of investigative, disciplinary or enforcement actions, including public censure, restitution, fines or sanctions and to award compensation.

The FSA may make enquiries of the companies which it regulates regarding compliance with regulations governing the operation of business and, similar to the other UK regulated financial services companies, we face the risk that the FSA could

find that we have failed to comply with applicable regulations or have not undertaken corrective action as required.

Issues and disputes may arise from time to time from the way in which the insurance industry or fund management industry has sold or administered an insurance policy or other product or in the way in which they have treated policyholders or customers, either individually or collectively.

Where larger groups or matters of public policy are concerned, the FSA may intervene directly. There have been several industry-wide issues in recent years in which the FSA has intervened directly, including the sale of personal pensions, the sale of mortgage-related endowments and investments in split capital investment trusts.

Outside of the UK, our business is regulated by local regulators that often have similar powers to the FSA and could therefore have a similar negative impact on perceptions of our business or have a material adverse effect on our business.

Furthermore, various jurisdictions in which we operate, including the UK, have created investor compensation schemes that require mandatory contributions from market participants in some instances in the event of a failure of another market participant. As a major participant in the majority of our chosen markets, circumstances could arise where we, along with other companies, may be required to make such contributions.

A determination that we have failed to comply with applicable regulation could have a negative impact on our results of operations or on our relations with current and potential customers. Regulatory action against a member of the Group could result in adverse publicity for, or negative perceptions regarding, the Group, or could have a material adverse effect on our business, our results of operations and financial condition and divert management's attention from the day-to-day management of the business.

We will not always be able to predict the impact of future legislation or regulation or changes in the interpretation or operation of existing legislation or regulation on our business, results of operations and financial condition. Changes in government policy, legislation or regulatory interpretation applying to companies in the financial services and insurance industries in any of the markets in which we operate, which may be applied retrospectively, may adversely affect our product range, distribution channels, capital requirements, dividends payable by subsidiaries and, consequently, results and financing requirements.

We may face increased compliance costs due to the need to set up additional compliance controls or the direct cost of such compliance because of changes to financial services legislation or regulation.

The Solvency II Directive ('Solvency II'), an insurance industry regulation agreed by the European Parliament in 2009, will require European domiciled insurers to move to more risk-based capital requirements. The implementation date for Solvency II has been extended to January 2014. There continue to be material uncertainties around the impact of the more detailed technical requirements of Solvency II and there is a risk that this could lead to a significant increase in the capital required to support our business.

**We are involved in various legal proceedings, regulatory investigations and examinations and may be involved in more in the future.**

We have been named as defendants in lawsuits, including class actions and individual lawsuits. We have been subject to regulatory investigations or examinations in the various jurisdictions where we operate. These actions arise in various contexts, including in connection with our activities as an insurer,

securities issuer, employer, investment adviser, investor and taxpayer. Certain of these lawsuits and investigations seek significant or unspecified amounts of damages, including punitive damages, and certain of the regulatory authorities involved in these proceedings have substantial powers over the conduct and operations of our business.

Due to the nature of certain of these lawsuits and investigations, we cannot make an estimate of loss or predict with any certainty the potential impact of these lawsuits or investigations.

In the course of conducting insurance business, we receive general insurance liability claims, and become involved in actual or threatened related litigation arising therefrom, including claims in respect of pollution and other environmental hazards. Given the significant delays that are experienced in the notification of these claims, the potential number of incidents that they cover and the uncertainties associated with establishing liability and the availability of reinsurance, the ultimate cost cannot be determined with certainty.

Additionally, it is possible that a regulator in one of our major markets may conduct a review of products previously sold, either as part of an industry-wide review or specific to us. The result of this review may be to compensate customers for losses they have incurred as a result of the products they were sold.

All of the above could adversely impact our results of operations or financial condition.

**From time to time, changes in the interpretation of existing tax laws, amendments to existing tax rates or the introduction of new tax legislation may adversely impact our business.**

We operate in numerous tax jurisdictions around the world and face risks associated with changes in tax law, interpretation of tax law, changes in tax rates and the risk of failure to comply with procedures required by tax authorities. Failure to manage tax risks could lead to an additional tax charge or a financial penalty.

If, as a result of a particular tax risk materialising, the tax costs associated with certain transactions are greater than anticipated, it could affect the profitability of those transactions.

There are also specific rules governing the taxation of policyholders. We are unable to predict accurately the impact of future changes in tax law on the taxation of life insurance and pension policies in the hands of policyholders. Amendments to existing legislation, particularly if there is the withdrawal of any tax relief, or an increase in tax rates, or the introduction of new rules, may affect the future long-term business and the decisions of policyholders. The impact of such changes upon us might depend on the mix of business in-force at the time of such change.

The design of life insurance products by our life insurance companies takes into account a number of factors, including risks and taxation. The design of long-term insurance products is based on the tax legislation in force at that time. Changes in tax legislation or in the interpretation of tax legislation may therefore, when applied to such products, have a material adverse effect on the financial condition of the relevant long-term business fund of the company in which the business was written.

**Risks related to ownership of the ADSs and ordinary shares**

**As a holding company, we are dependent on our operating subsidiaries to cover operating expenses and dividend payments.**

Our insurance and fund management operations are generally conducted through direct and indirect subsidiaries. As a holding company, Aviva plc's principal sources of funding are dividends from subsidiaries, shareholder-backed funds and any amounts

that may be raised through the issuance of debt and commercial paper. Certain subsidiaries have regulatory restrictions that may limit the payment of dividends, which in some circumstances could limit our ability to pay dividends to shareholders. In the current economic environment, such restrictions could become more stringent.

**The trading price of our ADSs and dividends paid on our ADSs may be materially adversely affected by fluctuations in the exchange rate for converting sterling into US dollars.**

An ADS is a negotiable US security representing ownership in one share. An ADR is denominated in US dollars and represents ownership of any number of ADSs. ADRs are publicly traded shares in a non-US corporation, quoted and traded in US dollars in the US securities market. Any dividends are paid to investors in US dollars. ADRs were specifically designed to facilitate the purchase, holding and sale of non-US securities by US investors. The term ADR is often used to mean both the certificates and the securities themselves.

Fluctuations in the exchange rate for converting pound sterling into US dollars may affect the value of our ADSs. Specifically, as the relative value of the pound sterling against the US dollar declines, each of the following values will also decline:

- the US dollar equivalent of the pound sterling trading price of our ordinary shares on the London Stock Exchange which may consequently cause the trading price of our ADSs in the US to also decline;
- the US dollar equivalent of the proceeds that a holder of our ADSs would receive upon the sale in the UK of any our ordinary shares withdrawn from the depository; and
- the US dollar equivalent of cash dividends paid in pound sterling on our ordinary shares represented by our ADSs.

**The holders of our ADSs may not be able to exercise their voting rights due to delays in notification to, and by, the depository.**

The depository for our ADSs may not receive voting materials for our ordinary shares represented by our ADSs in time to ensure that holders of our ADSs can instruct the depository to vote their shares. In addition, the depository's liability to holders of our ADSs for failing to carry out voting instructions or for the manner of carrying out voting instructions is limited by the Deposit Agreement governing our ADR facility. As a result, holders of our ADSs may not be able to exercise their right to vote and may have limited recourse against the depository or us, if their shares are not voted according to their request.

**Holders of our ADSs will have limited recourse if we or the depository fail to meet our respective obligations under the Deposit Agreement.**

The Deposit Agreement expressly limits our obligations and liability and those of the depository. Neither we nor the depository will be liable if either of us:

- are prevented from or delayed in performing any obligation by circumstances beyond our/their control;
- exercise or fail to exercise discretion under the Deposit Agreement; or
- take any action based upon the advice of, or information from, legal counsel, accountants, any person presenting ordinary shares for deposit, any holder or owner of an Aviva plc ADR or any other person believed by us or the depository in good faith to be competent to give such advice or information.

In addition, the depository has the obligation to participate in any action, suit or other proceeding with respect to our ADSs which may involve it in expense or liability only if it is indemnified.

These provisions of the Deposit Agreement will limit the ability of holders of our ADSs to obtain recourse if we or the depository fail to meet our obligations under the Deposit Agreement or if they wish to involve us or the depository in a legal proceeding.

**The holders of our ADSs in the US may not be able to participate in offerings of rights, warrants or similar securities to holders of our ordinary shares on the same terms and conditions as holders of our ordinary shares.**

In the event that we offer rights, warrants or similar securities to the holders of our ordinary shares or distribute dividends payable, in whole or in part, in securities, the Deposit Agreement provides that the depository (after consultation with us) shall have discretion as to the procedure to be followed in making such rights or other securities available to ADR holders including disposing of such rights or other securities and distributing the net proceeds in US dollars to ADR holders. Given the significant number of our ADR holders in the US, we generally would be required to register with the SEC any public offering of rights, warrants or other securities made to our ADR holders unless an exemption from the registration requirements of the US securities laws is available. Registering such an offering with the SEC can be a lengthy process which may be inconsistent with the timetable for a global capital raising operation. Consequently, we have in the past elected and may in the future elect not to make such an offer in the US, including to our ADR holders in the US, and rather only conduct such an offering in an 'offshore' transaction in accordance with 'Regulation S' under the US Securities Act of 1933, as amended. Therefore, there can be no assurance that our ADR holders will be able to participate in such an offering in the same manner as our ordinary shareholders.

**The ADS and ordinary share price of Aviva has been, and may continue to be, volatile.**

The share price of our ADS and ordinary shares has been volatile in the past and the share price and trading volume of our ADSs may continue to be subject to significant fluctuations due, in part, to changes in our actual or forecast operating results and the inability to fulfil the profit expectations of securities analysts, as well as to the high volatility in the securities markets generally and more particularly in shares of financial institutions. Other factors, besides our financial results, that may impact our share price include, but are not limited to:

- market expectations of the performance and capital adequacy of financial institutions in general;
- investor perceptions of the success and impact of our strategies;
- a downgrade or review of our credit ratings;
- potential litigation or regulatory action involving Aviva or sectors we have exposure to through our insurance and fund management activities;
- announcements concerning financial problems or any investigations into the accounting practices of other financial institutions; and
- general market circumstances.

**As a 'foreign private issuer' in the US we are exempt from certain rules under the US securities laws and are permitted to file less information with the SEC than US companies.**

As a 'foreign private issuer' we are exempt from certain rules under the US Securities Exchange Act of 1934, as amended (the 'Exchange Act'), that impose certain disclosure obligations and procedural requirements for proxy solicitations under Section 14 of the Exchange Act. In addition, our officers, directors and principal shareholders are exempt from the reporting and 'short-swing' profit recovery provisions of Section 16 of the Exchange Act and the rules under the Exchange Act with respect to their

purchases and sales of our ordinary shares and ADRs. Moreover, we are not required to file periodic reports and financial statements with the SEC as frequently or as promptly as US companies whose securities are registered under the Exchange Act. In addition, we are not required to comply with Regulation FD, which restricts the selective disclosure of material information. Although we must comply with UK listing rules on insider reporting of share ownership and on protection of inside information, there may be less publicly available information concerning us than there is for US public companies.

**Judgments of US courts may not be enforceable against us.**

Judgments of US courts, including those predicated on the civil liability provisions of the Federal securities laws of the US, may not be enforceable in courts in the United Kingdom. As a result, our shareholders who obtain a judgment against us in the US may not be able to require us to pay the amount of the judgment.

**Limitations on Enforceability of Civil Liabilities under US Federal Securities Laws.**

We are an English company. Any experts working on our behalf are likely to be residents of the United Kingdom and not the United States. In addition, most of our officers and directors are residents of the United Kingdom and not the United States. It may be difficult or impossible to serve legal process on persons located outside the United States and to force them to appear in a US court. It may also be difficult or impossible to enforce a judgment of a US court against persons outside the United States, or to enforce a judgment of a foreign court against such persons in the United States. We believe that there may be doubt as to the enforceability against persons in the United Kingdom, whether in original actions or in actions for the enforcement of judgments of US courts, of civil liabilities predicated solely upon the laws of the United States, including its federal securities laws.

Individual shareholders of an English company (including US persons) have the right under English law to bring lawsuits on behalf of the company in which they are a shareholder, and on their own behalf against the company, in certain limited circumstances. English law does not permit class action lawsuits by shareholders, except in limited circumstances.

# Independent auditor's report to the shareholders of Aviva plc

We have audited the Group and Parent Company financial statements (the 'financial statements') of Aviva plc for the year ended 31 December 2011 which comprise the Accounting Policies, the Consolidated and Parent Company Income Statements, the Pro Forma Reconciliation of Group Operating Profit to Profit before Tax, the Consolidated and Parent Company Statements of Comprehensive Income, the Consolidated and Parent Company Statements of Changes in Equity, the Consolidated and Parent Company Statements of Financial Position, the Consolidated and Parent Company Cash Flow Statements, and the related notes 1 to 59 and A to I. The financial reporting framework that has been applied in their preparation is applicable law and International Financial Reporting Standards (IFRSs) as adopted by the European Union.

This report is made solely to the Company's members, as a body, in accordance with Chapter 3 of Part 16 to the Companies Act 2006. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members as a body, for our audit work, for this report, or for the opinions we have formed.

## Respective responsibilities of directors and auditors

As explained more fully in the Directors' Responsibilities Statement set out on page 105, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view. Our responsibility is to audit and express an opinion on the financial statements in accordance with applicable law and International Standards on Auditing (UK and Ireland). Those standards require us to comply with the Auditing Practices Board's (APB's) Ethical Standards for Auditors.

## Scope of the audit of the financial statements

An audit involves obtaining evidence about the amounts and disclosures in the financial statements sufficient to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or error. This includes an assessment of: whether the accounting policies are appropriate to the Group's and the Parent Company's circumstances and have been consistently applied and adequately disclosed; the reasonableness of significant accounting estimates made by the directors; and the overall presentation of the financial statements. In addition, we read all the financial and non-financial information in the Aviva plc Annual Report on pages 1 to 164 to identify material inconsistencies with the audited financial statements. If we become aware of any apparent material misstatements or inconsistencies we consider the implications for our report.

## Opinion on financial statements

In our opinion:

- the financial statements give a true and fair view of the state of the Group's and of the Parent Company's affairs as at 31 December 2011 and of the Group's and the Parent Company's profit for the year then ended;
- the financial statements have been properly prepared in accordance with IFRSs as adopted by the European Union; and
- the financial statements have been prepared in accordance with the requirements of the Companies Act 2006 and, as regards the Group financial statements, Article 4 of the IAS Regulation.

## Separate opinion in relation to IFRSs as issued by the IASB

As explained in the Accounting Policies to the Group financial statements, the Group, in addition to complying with its legal obligation to apply IFRSs as adopted by the European Union, has also applied IFRSs as issued by the International Accounting Standards Board (IASB).

In our opinion, the Group financial statements comply with IFRSs as issued by the IASB.

## Opinion on other matters prescribed by the Companies Act 2006

In our opinion:

- the part of the Directors' Remuneration Report to be audited has been properly prepared in accordance with the Companies Act 2006;
- the information given in the Directors' Report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the information given in the Corporate Governance Statement, set out on pages 101 to 103, with respect to internal control and risk management systems in relation to financial reporting processes and about share capital structures is consistent with the financial statements.

## Matters on which we are required to report by exception

We have nothing to report in respect of the following:

Under the Companies Act 2006 we are required to report to you if, in our opinion:

- adequate accounting records have not been kept by the Parent Company, or returns adequate for our audit have not been received from branches not visited by us; or
- the Parent Company financial statements and the part of the Directors' Remuneration Report to be audited are not in agreement with the accounting records and returns; or
- certain disclosures of Directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit; or
- a Corporate Governance Statement has not been prepared by the Company.

Under the Listing Rules we are required to review:

- the Directors' statement, set out on page 105, in relation to going concern;
- the part of the Corporate Governance Statement relating to the Company's compliance with the nine provisions of the UK Corporate Governance Code specified for our review; and
- certain elements of the report to shareholders by the Board on Directors' remuneration.

### James W Dean (Senior statutory auditor)

for and on behalf of Ernst & Young LLP, Statutory Auditor

London  
7 March 2012

<sup>1</sup> The maintenance and integrity of Aviva plc's website is the responsibility of the directors; the work carried out by the auditors does not involve consideration of these matters and, accordingly, the auditors accept no responsibility for any changes that may have occurred to the financial statements since they were initially presented on the website.

<sup>2</sup> Legislation in the United Kingdom governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

## Accounting policies

Aviva plc (the 'Company'), a public limited company incorporated and domiciled in the United Kingdom (UK), together with its subsidiaries (collectively, the 'Group' or 'Aviva') transacts life assurance and long-term savings business, fund management and most classes of general insurance and health business through its subsidiaries, associates and branches in the UK, Ireland, continental Europe, United States (US), Canada, Asia and other countries throughout the world.

The Group is managed on a regional basis, reflecting the management structure whereby a member of the executive management team is accountable to the group chief executive for the operating segment for which he or she is responsible. Further details of the reportable segments are given in note 4.

The principal accounting policies adopted in the preparation of these financial statements are set out below.

### (A) Basis of presentation

Since 2005, all European Union (EU) listed companies have been required to prepare consolidated financial statements using International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) and endorsed by the EU. The date of transition to IFRS was 1 January 2004. In addition to fulfilling their legal obligation to comply with IFRS as adopted by the EU, the Group and Company have also complied with IFRS as issued by the IASB and applicable at 31 December 2011.

During 2009 and 2010, the IASB issued amendments to IFRS 1, *First Time Adoption of IFRS*, IAS 24, *Related Party Disclosures*, and IAS 32, *Financial Instruments – Presentation*, and the results of its annual improvements project, all of which have been endorsed by the EU. In addition, IFRIC interpretation 19, *Extinguishing Financial Liabilities with Equity Instruments*, and an amendment to interpretation 14, *IAS 19 – The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction*, issued in 2008 and 2009 respectively, have now been endorsed by the EU. These are all applicable for the first time in the current accounting period and are now reflected in the Group's financial reporting, with no material impact.

Further amendments to IFRS 1, IFRS 7, *Financial Instruments – Disclosures*, IAS 12, *Income Taxes*, and IAS 32 have been issued but have not yet been endorsed. These are applicable prospectively for accounting periods commencing 1 July 2011 or later, and are therefore not applicable for the current accounting period. On adoption, they will not have any material impact on the Group's financial reporting.

In 2009, the IASB issued IFRS 9, *Financial Instruments – Classification and Measurement*, followed by additional requirements on accounting for financial liabilities in 2010. These are the first two parts of a replacement standard for IAS 39. They are applicable prospectively for accounting periods commencing 1 January 2015 or later, and are therefore not applicable for the current accounting period. IFRS 9 has not yet been endorsed by the EU but, on adoption, will require us to review the classification of certain financial instruments while allowing us to retain fair value measurement as we deem necessary. We have not yet completed our assessment of its impact which is, to a large extent, dependent on the finalisation of the IASB's insurance contracts accounting project.

During 2011, the IASB issued IFRS 10, *Consolidated Financial Statements*, IFRS 11, *Joint Arrangements*, IFRS 12, *Disclosure of Interests in Other Entities*, IFRS 13, *Fair Value Measurement*, and reissued IAS 27, *Separate Financial Statements*, and IAS 28, *Investments in Associates and Joint Ventures*. It also issued amendments to IAS 1, *Presentation of Financial Statements*, and IAS 19, *Employee Benefits*. They are applicable for accounting periods commencing 1 July 2012 or later, and are therefore not applicable for the current accounting period. None of these has yet been endorsed by the EU but, on adoption, IFRS 10 will require us to review the entities we classify as subsidiaries, and we are currently assessing its impact. The other new and amended standards deal mainly with disclosures and we are currently assessing the changes required to our current financial statement disclosures.

IFRIC interpretation 20, *Stripping Costs in the Production Phase of a Surface Mine*, was issued in 2011 but has not yet been endorsed by the EU. It is applicable prospectively for accounting periods commencing 1 January 2013 or later, and is therefore not applicable for the current accounting period. On adoption, it will not have any impact on our financial reporting.

In accordance with IFRS 4, *Insurance Contracts*, the Group has applied existing accounting practices for insurance and participating investment contracts, modified as appropriate to comply with the IFRS framework and applicable standards. Further details are given in policy F below.

Items included in the financial statements of each of the Group's entities are measured in the currency of the primary economic environment in which that entity operates (the functional currency). The consolidated financial statements are stated in sterling, which is the Company's functional and presentation currency. Unless otherwise noted, the amounts shown in these financial statements are in millions of pounds sterling (£m). The separate financial statements of the Company are on pages 312 to 320.

### (B) Operating profit

The long-term nature of much of the Group's operations means that, for management's decision-making and internal performance management, short-term realised and unrealised investment gains and losses are treated as non-operating items. The Group focuses instead on an operating profit measure (also referred to as adjusted operating profit) that incorporates an expected return on investments supporting its long-term and non-long-term businesses. Operating profit for long-term business is based on expected investment returns on financial investments backing shareholder and policyholder funds over the reporting period, with allowance for the corresponding expected movements in liabilities. Variances between actual and expected investment returns, and the impact of changes in economic assumptions on liabilities, are disclosed separately outside operating profit. For non-long-term business, the total investment income, including realised and unrealised gains, is analysed between that calculated using a longer-term return and short-term fluctuations from that level. Further details of this analysis and the assumptions used are given in notes 8 and 9. Operating profit also excludes: amortisation and impairment of goodwill and intangibles; the profit or loss on disposal of subsidiaries, joint ventures and associates; integration and restructuring costs; and exceptional items. Details of all of these are provided in the relevant notes.

## (C) Critical accounting policies and the use of estimates

The preparation of financial statements requires the Group to select accounting policies and make estimates and assumptions that affect items reported in the consolidated income statement, consolidated statement of financial position, other primary statements and notes to the consolidated financial statements.

### Critical accounting policies

The major areas of judgement on policy application are considered to be whether Group entities should be consolidated (set out in policy D), product classification (set out in policy F) and the classification of financial investments (set out in policy S). The loss of control of Delta Lloyd in May 2011, and its classification as a discontinued operation in the current and preceding years, is discussed in notes 2 and 3(b).

### Use of estimates

All estimates are based on management's knowledge of current facts and circumstances, assumptions based on that knowledge and their predictions of future events and actions. Actual results may differ from those estimates, possibly significantly.

The table below sets out those items we consider particularly susceptible to changes in estimates and assumptions, and the relevant accounting policy.

Item	Accounting policy
Insurance and participating investment contract liabilities	F&K
Goodwill, AVIF and intangible assets	N
Fair values of financial investments	S
Impairment of financial investments	S
Fair value of derivative financial instruments	T
Deferred acquisition costs and other assets	W
Provisions and contingent liabilities	Z
Pension obligations	AA
Deferred income taxes	AB

## (D) Consolidation principles

### Subsidiaries

Subsidiaries are those entities (including special purpose entities) in which the Group, directly or indirectly, has power to exercise control over financial and operating policies in order to gain economic benefits. Subsidiaries are consolidated from the date on which effective control is transferred to the Group and are excluded from consolidation from the date the Group no longer has effective control. All inter-company transactions, balances and unrealised surpluses and deficits on transactions between Group companies have been eliminated.

From 1 January 2004, the date of first time adoption of IFRS, the Group was required to use the purchase method of accounting to account for the acquisition of subsidiaries. Under this method, the cost of an acquisition was measured as the fair value of assets given up, shares issued or liabilities undertaken at the date of acquisition, plus costs directly attributable to the acquisition. The excess of the cost of acquisition over the fair value of the net assets of the subsidiary acquired was recorded as goodwill (see policy N below). Any surplus of the acquirer's interest in the subsidiary's net assets over the cost of acquisition was credited to the income statement.

For business combinations for which the acquisition date is on or after 1 January 2010, the Group is required to use the acquisition method of accounting. Under this method, the cost of an acquisition is measured as the aggregate of the consideration transferred, measured at acquisition date fair value, and the amount of any non-controlling interest in the acquiree. For each business combination, the Group has the option to measure the non-controlling interest in the acquiree either at fair value or at the proportionate share of the acquiree's identifiable net assets. The excess of the consideration transferred over the fair value of the net assets of the subsidiary acquired is recorded as goodwill. Acquisition-related costs incurred are expensed as incurred. Transactions that do not result in a loss of control are treated as equity transactions with non-controlling interests.

### Merger accounting and the merger reserve

Prior to 1 January 2004, certain significant business combinations were accounted for using the 'pooling of interests method' (or merger accounting), which treats the merged groups as if they had been combined throughout the current and comparative accounting periods. Merger accounting principles for these combinations gave rise to a merger reserve in the consolidated statement of financial position, being the difference between the nominal value of new shares issued by the Parent Company for the acquisition of the shares of the subsidiary and the subsidiary's own share capital and share premium account. These transactions have not been restated, as permitted by the IFRS 1 transitional arrangements.

The merger reserve is also used where more than 90% of the shares in a subsidiary are acquired and the consideration includes the issue of new shares by the Company, thereby attracting merger relief under the Companies Act 1985 and, from 1 October 2009, the Companies Act 2006.

### Investment vehicles

In several countries, the Group has invested in a number of specialised investment vehicles such as Open-ended Investment Companies (OEICs) and unit trusts. These invest mainly in equities, bonds, cash and cash equivalents, and properties, and distribute most of their income. The Group's percentage ownership in these vehicles can fluctuate from day to day according to the Group's and third-party participation in them. Where Group companies are deemed to control such vehicles, with control determined based on an analysis of the guidance in IAS 27 and SIC 12, they are consolidated, with the interests of parties other than Aviva being classified as liabilities. These appear as 'Net asset value attributable to unitholders' in the consolidated statement of financial position. Where the Group does not control such vehicles, and these investments are held by its insurance or investment funds, they do not meet the definition of associates (see below) and are, instead, carried at fair value through profit and loss within financial investments in the consolidated statement of financial position, in accordance with IAS 39, *Financial Instruments: Recognition and Measurement*.

As part of their investment strategy, the UK and certain European long-term business policyholder funds have invested in a number of property limited partnerships (PLPs), either directly or via property unit trusts (PUTs), through a mix of capital and loans. The PLPs are managed by general partners (GPs), in which the long-term business shareholder companies hold equity stakes and which themselves hold nominal stakes in the PLPs. The PUTs are managed by a Group subsidiary.

Accounting for the PUTs and PLPs as subsidiaries, joint ventures or other financial investments depends on the shareholdings in the GPs and the terms of each partnership agreement. Where the Group exerts control over a PLP, it has been treated as a subsidiary and its results, assets and liabilities have been consolidated. Where the partnership is managed by a contractual agreement such that there is joint control between the parties, notwithstanding that the Group's partnership share in the PLP (including its indirect stake via the relevant PUT and GP) may be greater than 50%, such PUTs and PLPs have been classified as joint ventures. Where the Group holds minority stakes in PLPs, with no significant influence or control over their associated GPs, the relevant investments are carried at fair value through profit and loss within financial investments.

### Associates and joint ventures

Associates are entities over which the Group has significant influence, but which it does not control. Generally, it is presumed that the Group has significant influence if it has between 20% and 50% of voting rights. Joint ventures are entities whereby the Group and other parties undertake an economic activity which is subject to joint control arising from a contractual agreement. In a number of these, the Group's share of the underlying assets and liabilities may be greater than 50% but the terms of the relevant agreements make it clear that control is not exercised. Such jointly controlled entities are referred to as joint ventures in these financial statements.

Gains on transactions between the Group and its associates and joint ventures are eliminated to the extent of the Group's interest in the associates and joint ventures. Losses are also eliminated, unless the transaction provides evidence of an impairment of the asset transferred between entities.

Investments in associates and joint ventures are accounted for using the equity method of accounting. Under this method, the cost of the investment in a given associate or joint venture, together with the Group's share of that entity's post-acquisition changes to shareholders' funds, is included as an asset in the consolidated statement of financial position. As explained in policy N, the cost includes goodwill identified on acquisition. The Group's share of their post-acquisition profits or losses is recognised in the income statement and its share of post-acquisition movements in reserves is recognised in reserves. Equity accounting is discontinued when the Group no longer has significant influence or joint control over the investment.

If the Group's share of losses in an associate or joint venture equals or exceeds its interest in the undertaking, the Group does not recognise further losses unless it has incurred obligations or made payments on behalf of the entity.

### The Company's investments

In the Company statement of financial position, subsidiaries and joint ventures are stated at their fair values, estimated using applicable valuation models underpinned by the Company's market capitalisation. These investments are classified as available for sale (AFS) financial assets, with changes in their fair value being recognised in other comprehensive income and recorded in a separate investment valuation reserve within equity.

### (E) Foreign currency translation

Income statements and cash flows of foreign entities are translated into the Group's presentation currency at average exchange rates for the year while their statements of financial position are translated at the year-end exchange rates. Exchange differences arising from the translation of the net investment in foreign subsidiaries, associates and joint ventures, and of borrowings and other currency instruments designated as hedges of such investments, are recognised in other comprehensive income and taken to the currency translation reserve within equity. On disposal of a foreign entity, such exchange differences are transferred out of this reserve and are recognised in the income statement as part of the gain or loss on sale. The cumulative translation differences were deemed to be zero at the transition date to IFRS.

Foreign currency transactions are accounted for at the exchange rates prevailing at the date of the transactions. Gains and losses resulting from the settlement of such transactions, and from the translation of monetary assets and liabilities denominated in foreign currencies, are recognised in the income statement.

Translation differences on debt securities and other monetary financial assets measured at fair value and designated as held at fair value through profit or loss (FV) (see policy S) are included in foreign exchange gains and losses in the income statement. For monetary financial assets designated as AFS, translation differences are calculated as if they were carried at amortised cost and so are recognised in the income statement, while foreign exchange differences arising from fair value gains and losses are recognised in other comprehensive income and included in the investment valuation reserve within equity. Translation differences on non-monetary items, such as equities which are designated as FV, are reported as part of the fair value gain or loss, whereas such differences on AFS equities are included in the investment valuation reserve.

### (F) Product classification

Insurance contracts are defined as those containing significant insurance risk if, and only if, an insured event could cause an insurer to make significant additional payments in any scenario, excluding scenarios that lack commercial substance, at the inception of the contract. Such contracts remain insurance contracts until all rights and obligations are extinguished or expire. Contracts can be reclassified as insurance contracts after inception if insurance risk becomes significant. Any contracts not considered to be insurance contracts under IFRS are classified as investment contracts. Some insurance and investment contracts contain a discretionary participating feature, which is a contractual right to receive additional benefits as a supplement to guaranteed benefits. These are referred to as participating contracts.

As noted in policy A above, insurance contracts and participating investment contracts in general continue to be measured and accounted for under existing accounting practices at the later of the date of transition to IFRS or the date of the acquisition of the entity, in accordance with IFRS 4. Accounting for insurance contracts in UK companies is determined in accordance with the Statement of Recommended Practice issued by the Association of British Insurers, the most recent version of which was issued in December 2005 and amended in December 2006. In certain businesses, the accounting policies or accounting estimates have been changed, as permitted by IFRS 4 and IAS 8 respectively, to remeasure designated insurance liabilities to reflect current market interest rates and changes to regulatory capital requirements. When accounting policies or accounting estimates have been changed, and adjustments to the measurement basis have occurred, the financial statements of that year will have disclosed the impacts accordingly. One such example is our adoption of Financial Reporting Standard 27, *Life Assurance*, (FRS 27) which was issued by the UK's Accounting Standards Board (ASB) in December 2004. Aviva, along with other major insurance companies and the ABI, signed a Memorandum of Understanding with the ASB, under which we voluntarily agreed to adopt in full the standard from 2005 in the Group's IFRS financial statements. FRS 27 adds to the requirements of IFRS but does not vary them in any way. The additional requirements of FRS 27 are detailed in policy K below and in note 55.

### (G) Premiums earned

Premiums on long-term insurance contracts and participating investment contracts are recognised as income when receivable, except for investment-linked premiums which are accounted for when the corresponding liabilities are recognised. For single premium business, this is the date from which the policy is effective. For regular premium contracts, receivables are recognised at the date when payments are due. Premiums are shown before deduction of commission and before any sales-based taxes or duties. Where policies lapse due to non-receipt of premiums, then all the related premium income accrued but not received from the date they are deemed to have lapsed is offset against premiums.

General insurance and health premiums written reflect business incepted during the year, and exclude any sales-based taxes or duties. Unearned premiums are those proportions of the premiums written in a year that relate to periods of risk after the statement of financial position date. Unearned premiums are calculated on either a daily or monthly pro rata basis. Premiums collected by intermediaries, but not yet received, are assessed based on estimates from underwriting or past experience, and are included in premiums written.

Deposits collected under investment contracts without a discretionary participating feature (non-participating contracts) are not accounted for through the income statement, except for the fee income (covered in policy H) and the investment income attributable to those contracts, but are accounted for directly through the statement of financial position as an adjustment to the investment contract liability.

### (H) Other investment contract fee revenue

Investment contract policyholders are charged fees for policy administration, investment management, surrenders or other contract services. The fees may be for fixed amounts or vary with the amounts being managed, and will generally be charged as an adjustment to the policyholder's balance. The fees are recognised as revenue in the period in which they are collected unless they relate to services to be provided in future periods, in which case they are deferred and recognised as the service is provided.

Initiation and other 'front-end' fees (fees that are assessed against the policyholder balance as consideration for origination of the contract) are charged on some non-participating investment and investment fund management contracts. Where the investment contract is recorded at amortised cost, these fees are deferred and recognised over the expected term of the policy by an adjustment to the effective yield. Where the investment contract is measured at fair value, the front-end fees that relate to the provision of investment management services are deferred and recognised as the services are provided.

### (I) Other fee and commission income

Other fee and commission income consists primarily of fund management fees, income from the RAC's non-insurance activities, distribution fees from mutual funds, commissions on reinsurance ceded, commission revenue from the sale of mutual fund shares and transfer agent fees for shareholder record keeping. Reinsurance commissions receivable are deferred in the same way as acquisition costs, as described in policy W. All other fee and commission income is recognised as the services are provided.

### (J) Net investment income

Investment income consists of dividends, interest and rents receivable for the year, movements in amortised cost on debt securities, realised gains and losses, and unrealised gains and losses on FV investments (as defined in policy S). Dividends on equity securities are recorded as revenue on the ex-dividend date. Interest income is recognised as it accrues, taking into account the effective yield on the investment. It includes the interest rate differential on forward foreign exchange contracts. Rental income is recognised on an accruals basis.

A gain or loss on a financial investment is only realised on disposal or transfer, and is the difference between the proceeds received, net of transaction costs, and its original cost or amortised cost, as appropriate.

Unrealised gains and losses, arising on investments which have not been derecognised as a result of disposal or transfer, represent the difference between the carrying value at the year end and the carrying value at the previous year end or purchase value during the year, less the reversal of previously recognised unrealised gains and losses in respect of disposals made during the year. Realised gains or losses on investment property represent the difference between the net disposal proceeds and the carrying amount of the property.

### (K) Insurance and participating investment contract liabilities

#### Claims

Long-term business claims reflect the cost of all claims arising during the year, including claims handling costs, as well as policyholder bonuses accrued in anticipation of bonus declarations.

General insurance and health claims incurred include all losses occurring during the year, whether reported or not, related handling costs, a reduction for the value of salvage and other recoveries, and any adjustments to claims outstanding from previous years.

Claims handling costs include internal and external costs incurred in connection with the negotiation and settlement of claims. Internal costs include all direct expenses of the claims department and any part of the general administrative costs directly attributable to the claims function.

#### Long-term business provisions

Under current IFRS requirements, insurance and participating investment contract liabilities are measured using accounting policies consistent with those adopted previously under existing accounting practices, with the exception of liabilities remeasured to reflect current market interest rates and those relating to UK with-profit and non-profit contracts, to be consistent with the value of the backing assets. For liabilities relating to UK with-profit contracts, the Group has adopted FRS 27, *Life Assurance*, as described in policy F above, in addition to the requirements of IFRS.

In the United States, shadow adjustments are made to the liabilities or related deferred acquisition costs and are recognised directly in other comprehensive income. This means that the measurement of these items is adjusted for unrealised gains or losses on the backing assets such as AFS financial investments (see policy S), that are recognised directly in other comprehensive income, in the same way as if those gains or losses had been realised.

The long-term business provisions are calculated separately for each life operation, based either on local regulatory requirements or existing local GAAP at the later of the date of transition to IFRS or the date of the acquisition of the entity, and actuarial principles consistent with those applied in the UK. Each calculation represents a determination within a range of possible outcomes, where the assumptions used in the calculations depend on the circumstances prevailing in each life operation. The principal assumptions are disclosed in note 39(b). For liabilities of the UK with-profit funds, FRS 27 requires liabilities to be calculated as the realistic basis liabilities as set out by the UK's Financial Services Authority (FSA), adjusted to remove the shareholders' share of future bonuses. For UK non-profit insurance contracts, the Group applies the realistic regulatory basis as set out in the FSA Policy Statement 06/14, *Prudential Changes for Insurers*, where applicable.

#### Present value of future profits on non-participating business written in a with-profit fund

For UK with-profit life funds falling within the scope of the FSA realistic capital regime, and hence FRS 27, an amount may be recognised for the present value of future profits (PVFP) on non-participating business written in a with-profit fund where the determination of the realistic value of liabilities in that with-profit fund takes account, directly or indirectly, of this value. This amount is recognised as a reduction in the liability rather than as an asset in the statement of financial position, and is then apportioned between the amounts that have been taken into account in the measurement of liabilities and other amounts which are shown as an adjustment to the unallocated divisible surplus.

**Unallocated divisible surplus**

In certain participating long-term insurance and investment business, the nature of the policy benefits is such that the division between shareholder reserves and policyholder liabilities is uncertain. Amounts whose allocation to either policyholders or shareholders has not been determined by the end of the financial year are held within liabilities as an unallocated divisible surplus.

If the aggregate carrying value of liabilities for a particular participating business fund is in excess of the aggregate carrying value of its assets, then the difference is held as a negative unallocated divisible surplus balance, subject to recoverability from margins in that fund's participating business. Any excess of this difference over the recoverable amount is charged to net income in the reporting period.

**Embedded derivatives**

Embedded derivatives that meet the definition of an insurance contract or correspond to options to surrender insurance contracts for a set amount (or based on a fixed amount and an interest rate) are not separately measured. All other embedded derivatives are separated and measured at fair value if they are not considered as closely related to the host insurance contract or do not meet the definition of an insurance contract. Fair value reflects own credit risk to the extent the embedded derivative is not fully collateralised.

**Liability adequacy**

At each reporting date, an assessment is made of whether the recognised long-term business provisions are adequate, using current estimates of future cash flows. If that assessment shows that the carrying amount of the liabilities (less related assets) is insufficient in light of the estimated future cash flows, the deficiency is recognised in the income statement by setting up an additional provision in the statement of financial position.

**General insurance and health provisions****(i) Outstanding claims provisions**

General insurance and health outstanding claims provisions are based on the estimated ultimate cost of all claims incurred but not settled at the statement of financial position date, whether reported or not, together with related claims handling costs. Significant delays are experienced in the notification and settlement of certain types of general insurance claims, particularly in respect of liability business, including environmental and pollution exposures, the ultimate cost of which cannot be known with certainty at the statement of financial position date. Any estimate represents a determination within a range of possible outcomes. Further details of estimation techniques are given in note 39(c).

Provisions for latent claims are discounted, using rates based on the relevant swap curve, in the relevant currency at the reporting date, having regard to the expected settlement dates of the claims. The discount rate is set at the start of the accounting period with any change in rates between the start and end of the accounting period being reflected below operating profit as an economic assumption change. The range of discount rates used is described in note 39(c). Outstanding claims provisions are valued net of an allowance for expected future recoveries. Recoveries include non-insurance assets that have been acquired by exercising rights to salvage and subrogation under the terms of insurance contracts.

**(ii) Provision for unearned premiums**

The proportion of written premiums, gross of commission payable to intermediaries, attributable to subsequent periods is deferred as a provision for unearned premiums. The change in this provision is taken to the income statement as recognition of revenue over the period of risk.

**(iii) Liability adequacy**

At each reporting date, the Group reviews its unexpired risks and carries out a liability adequacy test for any overall excess of expected claims and deferred acquisition costs over unearned premiums, using the current estimates of future cash flows under its contracts after taking account of the investment return expected to arise on assets relating to the relevant general business provisions. If these estimates show that the carrying amount of its insurance liabilities (less related deferred acquisition costs) is insufficient in light of the estimated future cash flows, the deficiency is recognised in the income statement by setting up a provision in the statement of financial position.

**Other assessments and levies**

The Group is subject to various periodic insurance-related assessments or guarantee fund levies. Related provisions are established where there is a present obligation (legal or constructive) as a result of a past event. Such amounts are not included in insurance liabilities but are included under 'Provisions' in the statement of financial position.

## (L) Non-participating investment contract liabilities

### Claims

For non-participating investment contracts with an account balance, claims reflect the excess of amounts paid over the account balance released.

### Contract liabilities

Deposits collected under non-participating investment contracts are not accounted for through the income statement, except for the investment income attributable to those contracts, but are accounted for directly through the statement of financial position as an adjustment to the investment contract liability.

The majority of the Group's contracts classified as non-participating investment contracts are unit-linked contracts and are measured at fair value. Certain liabilities for non-linked non-participating contracts are measured at amortised cost.

The fair value liability is determined in accordance with IAS 39, using a valuation technique to provide a reliable estimate of the amount for which the liability could be settled between knowledgeable willing parties in an arm's length transaction. For unit-linked contracts, the fair value liability is equal to the current unit fund value, plus additional non-unit reserves if required based on a discounted cash flow analysis. For non-linked contracts, the fair value liability is based on a discounted cash flow analysis, with allowance for risk calibrated to match the market price for risk.

Amortised cost is calculated as the fair value of consideration received at the date of initial recognition, less the net effect of payments such as transaction costs and front-end fees, plus or minus the cumulative amortisation (using the effective interest rate method) of any difference between that initial amount and the maturity value, and less any write-down for surrender payments. The effective interest rate is the one that equates the discounted cash payments to the initial amount. At each reporting date, the amortised cost liability is determined as the value of future best estimate cash flows discounted at the effective interest rate.

## (M) Reinsurance

The Group assumes and cedes reinsurance in the normal course of business, with retention limits varying by line of business. Premiums on reinsurance assumed are recognised as revenue in the same manner as they would be if the reinsurance were considered direct business, taking into account the product classification of the reinsured business. The cost of reinsurance related to long-duration contracts is accounted for over the life of the underlying reinsured policies, using assumptions consistent with those used to account for these policies.

Where general insurance liabilities are discounted, any corresponding reinsurance assets are also discounted using consistent assumptions.

Gains or losses on buying retroactive reinsurance are recognised in the income statement immediately at the date of purchase and are not amortised. Premiums ceded and claims reimbursed are presented on a gross basis in the consolidated income statement and statement of financial position as appropriate.

Reinsurance assets primarily include balances due from both insurance and reinsurance companies for ceded insurance liabilities. Amounts recoverable from reinsurers are estimated in a manner consistent with the outstanding claims provisions or settled claims associated with the reinsured policies and in accordance with the relevant reinsurance contract.

Reinsurance contracts that principally transfer financial risk are accounted for directly through the statement of financial position and are not included in reinsurance assets or liabilities. A deposit asset or liability is recognised, based on the consideration paid or received less any explicitly identified premiums or fees to be retained by the reinsured.

If a reinsurance asset is impaired, the Group reduces the carrying amount accordingly and recognises that impairment loss in the income statement. A reinsurance asset is impaired if there is objective evidence, as a result of an event that occurred after initial recognition of the reinsurance asset, that the Group may not receive all amounts due to it under the terms of the contract, and the event has a reliably measurable impact on the amounts that the Group will receive from the reinsurer.

## (N) Goodwill, AVIF and intangible assets

### Goodwill

Goodwill represents the excess of the cost of an acquisition over the fair value of the Group's share of the net assets of the acquired subsidiary, associate or joint venture at the date of acquisition. Goodwill on acquisitions prior to 1 January 2004 (the date of transition to IFRS) is carried at its book value (original cost less cumulative amortisation) on that date, less any impairment subsequently incurred. Goodwill arising before 1 January 1998 was eliminated against reserves and has not been reinstated. Goodwill arising on the Group's investments in subsidiaries since that date is shown as a separate asset, while that on associates and joint ventures is included within the carrying value of those investments.

### Acquired value of in-force business (AVIF)

The present value of future profits on a portfolio of long-term insurance and investment contracts, acquired either directly or through the purchase of a subsidiary, is recognised as an asset. If the AVIF results from the acquisition of an investment in a joint venture or an associate, it is held within the carrying amount of that investment. In all cases, the AVIF is amortised over the useful lifetime of the related contracts in the portfolio on a systematic basis. The rate of amortisation is chosen by considering the profile of the additional value of in-force business acquired and the expected depletion in its value. The value of the acquired in-force long-term business is reviewed annually for any impairment in value and any reductions are charged as expenses in the income statement.

**Intangible assets**

Intangibles consist primarily of brands, certain of which have been assessed as having indefinite useful lives, and contractual relationships such as access to distribution networks and customer lists. The economic lives of the latter are determined by considering relevant factors such as usage of the asset, typical product life cycles, potential obsolescence, maintenance costs, the stability of the industry, competitive position and the period of control over the assets. These intangibles are amortised over their useful lives, which range from five to 30 years, using the straight-line method.

The amortisation charge for the year is included in the income statement under 'Other operating expenses'. For intangibles with finite lives, a provision for impairment will be charged where evidence of such impairment is observed. Intangibles with indefinite lives are subject to regular impairment testing, as described below.

**Impairment testing**

For impairment testing, goodwill and intangibles with indefinite useful lives have been allocated to cash-generating units. The carrying amount of goodwill and intangible assets with indefinite useful lives is reviewed at least annually or when circumstances or events indicate there may be uncertainty over this value. Goodwill and indefinite life intangibles are written down for impairment where the recoverable amount is insufficient to support its carrying value. Further details on goodwill allocation and impairment testing are given in note 16.

**(O) Property and equipment**

Owner-occupied properties are carried at their revalued amounts, which are supported by market evidence, and movements are recognised in other comprehensive income and taken to a separate reserve within equity. When such properties are sold, the accumulated revaluation surpluses are transferred from this reserve to retained earnings. These properties are depreciated down to their estimated residual values over their useful lives. All other items classed as property and equipment within the statement of financial position are carried at historical cost less accumulated depreciation.

Investment properties under construction are included within property and equipment until completion, and are stated at cost less any provision for impairment in their values until construction is completed or fair value becomes reliably measurable.

Depreciation is calculated on the straight-line method to write-down the cost of other assets to their residual values over their estimated useful lives as follows:

■ Land	No depreciation
■ Properties under construction	No depreciation
■ Owner-occupied properties, and related mechanical and electrical equipment	25 years
■ Motor vehicles	Three years, or lease term if longer
■ Computer equipment	Three to five years
■ Other assets	Three to five years

The assets' residual values, useful lives and method of depreciation are reviewed regularly, and at least at each financial year end, and adjusted if appropriate. Where the carrying amount of an asset is greater than its estimated recoverable amount, it is written down immediately to its recoverable amount. Gains and losses on disposal of property and equipment are determined by reference to their carrying amount.

Borrowing costs directly attributable to the acquisition and construction of property and equipment are capitalised. All repairs and maintenance costs are charged to the income statement during the financial period in which they are incurred. The cost of major renovations is included in the carrying amount of the asset when it is probable that future economic benefits in excess of the most recently assessed standard of performance of the existing asset will flow to the Group and the renovation replaces an identifiable part of the asset. Major renovations are depreciated over the remaining useful life of the related asset.

**(P) Investment property**

Investment property is held for long-term rental yields and is not occupied by the Group. Completed investment property is stated at its fair value, which is supported by market evidence, as assessed by qualified external valuers or by local qualified staff of the Group in overseas operations. Changes in fair values are recorded in the income statement in net investment income.

As described in policy O above, investment properties under construction are included within property and equipment, and are stated at cost less any provision for impairment in their values until construction is completed or fair value becomes reliably measurable.

**(Q) Impairment of non-financial assets**

Property and equipment and other non-financial assets are reviewed for impairment losses whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the carrying amount of the asset exceeds its recoverable amount, which is the higher of an asset's net selling price and value in use. For the purposes of assessing impairment, assets are grouped at the lowest level for which there are separately identifiable cash flows.

## (R) Derecognition and offset of financial assets and financial liabilities

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised where:

- The rights to receive cash flows from the asset have expired.
- The Group retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a 'pass-through' arrangement.
- The Group has transferred its rights to receive cash flows from the asset and has either transferred substantially all the risks and rewards of the asset, or has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires.

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

## (S) Financial investments

The Group classifies its investments as either financial assets at fair value through profit or loss (FV) or financial assets available for sale (AFS). The classification depends on the purpose for which the investments were acquired, and is determined by local management at initial recognition. The FV category has two subcategories – those that meet the definition as being held for trading and those the Group chooses to designate as FV (referred to in this accounting policy as 'other than trading').

In general, the FV category is used as, in most cases, the Group's investment or risk management strategy is to manage its financial investments on a fair value basis. Debt securities and equity securities, which the Group buys with the intention to resell in the short term, are classified as trading, as are non-hedge derivatives (see policy T below). All other securities in the FV category are classified as other than trading. The AFS category is used where the relevant long-term business liability (including shareholders' funds) is passively managed, as well as in certain fund management and non-insurance operations.

Purchases and sales of investments are recognised on the trade date, which is the date that the Group commits to purchase or sell the assets, at their fair values. Debt securities are initially recorded at their fair value, which is taken to be amortised cost, with amortisation credited or charged to the income statement. Investments classified as trading, other than trading and AFS, are subsequently carried at fair value. Changes in the fair value of trading and other than trading investments are included in the income statement in the period in which they arise. Changes in the fair value of securities classified as AFS are recognised in other comprehensive income and recorded in a separate investment valuation reserve within equity.

Investments carried at fair value are measured using a fair value hierarchy, described in note 22, with values based on quoted bid prices or amounts derived from cash flow models. Fair values for unlisted equity securities are estimated using applicable price/earnings or price/cash flow ratios refined to reflect the specific circumstances of the issuer.

When securities classified as AFS are sold or impaired, the accumulated fair value adjustments are transferred out of the investment valuation reserve to the income statement with a corresponding movement through other comprehensive income.

Financial guarantees are recognised initially at their fair value and are subsequently amortised over the duration of the contract. A liability is recognised for amounts payable under the guarantee if it is more likely than not that the guarantee will be called upon.

### Impairment

The Group reviews the carrying value of its loans and receivables and AFS investments on a regular basis. If the carrying value of a loan, receivable or AFS investment is greater than the recoverable amount, the carrying value is reduced through a charge to the income statement in the period of impairment. The following policies are used to determine the level of any impairment, some of which involve considerable judgement:

**AFS debt securities:** An AFS debt security is impaired if there is objective evidence that a loss event has occurred which has impaired the expected cash flows, i.e. where all amounts due according to the contractual terms of the security are not considered collectible. An impairment charge, measured as the difference between the security's fair value and amortised cost, is recognised when the issuer is known to be either in default or in financial difficulty. Determining when an issuer is in financial difficulty requires the use of judgement, and we consider a number of factors including industry risk factors, financial condition, liquidity position and near-term prospects of the issuer, credit rating declines and a breach of contract. A decline in fair value below amortised cost due to changes in risk-free interest rates does not necessarily represent objective evidence of a loss event.

For securities identified as being impaired, the cumulative unrealised net loss previously recognised within the investment valuation reserve is transferred to realised losses for the year, with a corresponding movement through other comprehensive income. Any subsequent increase in fair value of these impaired securities is recognised in other comprehensive income and recorded in the investment valuation reserve unless this increase can be objectively related to an event occurring after the impairment loss was recognised in the income statement. In such an event, the reversal of the impairment loss is recognised as a gain in the income statement.

**AFS equity securities:** An AFS equity security is considered impaired if there is objective evidence that the cost may not be recovered. In addition to qualitative impairment criteria, such evidence includes a significant or prolonged decline in fair value below cost. Unless there is evidence to the contrary, an equity security is considered impaired if the decline in fair value relative to cost has been either at least 20% for a continuous six-month period or more than 40% at the end of the reporting period, or being in an unrealised loss position for a continuous period of more than 12 months at the end of the reporting period. We also review our largest equity holdings for evidence of impairment, as well as individual equity holdings in industry sectors known to be in difficulty. Where there is objective evidence that impairment exists, the security is written down regardless of the size of the unrealised loss.

For securities identified as being impaired, the cumulative unrealised net loss previously recognised within the investment valuation reserve is transferred to realised losses for the year with a corresponding movement through other comprehensive income. Any subsequent increase in fair value of these impaired securities is recognised in other comprehensive income and recorded in the investment valuation reserve.

**Mortgages and securitised loans:** Impairment is measured based on the present value of expected future cash flows discounted at the effective rate of interest of the loan, subject to the fair value of the underlying collateral. When a loan is considered to be impaired, the income statement is charged with the difference between the carrying value and the estimated recoverable amount. Interest income on impaired loans is recognised based on the estimated recoverable amount.

Reversals of impairments on any of these assets are only recognised where the decrease in the impairment can be objectively related to an event occurring after the write-down (such as an improvement in the debtor's credit rating), and are not recognised in respect of equity instruments.

## (T) Derivative financial instruments and hedging

Derivative financial instruments include foreign exchange contracts, interest rate futures, currency and interest rate swaps, currency and interest rate options (both written and purchased) and other financial instruments that derive their value mainly from underlying interest rates, foreign exchange rates, credit indices, commodity values or equity instruments.

All derivatives are initially recognised in the statement of financial position at their fair value, which usually represents their cost. They are subsequently remeasured at their fair value, with the method of recognising movements in this value depending on whether they are designated as hedging instruments and, if so, the nature of the item being hedged. Fair values are obtained from quoted market prices or, if these are not available, by using valuation techniques such as discounted cash flow models or option pricing models. All derivatives are carried as assets when the fair values are positive and as liabilities when the fair values are negative. Premiums paid for derivatives are recorded as an asset on the statement of financial position at the date of purchase, representing their fair value at that date.

Derivative contracts may be traded on an exchange or over-the-counter (OTC). Exchange-traded derivatives are standardised and include certain futures and option contracts. OTC derivative contracts are individually negotiated between contracting parties and include forwards, swaps, caps and floors. Derivatives are subject to various risks including market, liquidity and credit risk, similar to those related to the underlying financial instruments. Many OTC transactions are contracted and documented under International Swaps and Derivatives Association (ISDA) master agreements or their equivalent, which are designed to provide legally enforceable set-off in the event of default, reducing the Group's exposure to credit risk.

The notional or contractual amounts associated with derivative financial instruments are not recorded as assets or liabilities on the statement of financial position as they do not represent the fair value of these transactions. These amounts are disclosed in note 57.

The Group has collateral agreements in place between the individual Group entities and relevant counterparties. Accounting policy V below covers collateral, both received and pledged, in respect of these derivatives.

### Interest rate and currency swaps

Interest rate swaps are contractual agreements between two parties to exchange periodic payments in the same currency, each of which is computed on a different interest rate basis, on a specified notional amount. Most interest rate swaps involve the net exchange of payments calculated as the difference between the fixed and floating rate interest payments. Currency swaps, in their simplest form, are contractual agreements that involve the exchange of both periodic and final amounts in two different currencies. Both types of swap contracts may include the net exchange of principal. Exposure to gain or loss on these contracts will increase or decrease over their respective lives as a function of maturity dates, interest and foreign exchange rates, and the timing of payments.

### Interest rate futures, forwards and options contracts

Interest rate futures are exchange-traded instruments and represent commitments to purchase or sell a designated security or money market instrument at a specified future date and price. Interest rate forward agreements are OTC contracts in which two parties agree on an interest rate and other terms that will become a reference point in determining, in concert with an agreed notional principal amount, a net payment to be made by one party to the other, depending what rate in fact prevails at a future point in time. Interest rate options, which consist primarily of caps and floors, are interest rate protection instruments that involve the potential obligation of the seller to pay the buyer an interest rate differential in exchange for a premium paid by the buyer. This differential represents the difference between current rate and an agreed rate applied to a notional amount. Exposure to gain or loss on all interest rate contracts will increase or decrease over their respective lives as interest rates fluctuate.

### Foreign exchange contracts

Foreign exchange contracts, which include spot, forward and futures contracts, represent agreements to exchange the currency of one country for the currency of another country at an agreed price and settlement date. Foreign exchange option contracts are similar to interest rate option contracts, except that they are based on currencies, rather than interest rates.

Exposure to gain or loss on these contracts will increase or decrease over their respective lives as currency exchange and interest rates fluctuate.

### Derivative instruments for hedging

On the date a derivative contract is entered into, the Group designates certain derivatives as either:

- (i) a hedge of the fair value of a recognised asset or liability (fair value hedge);
- (ii) a hedge of a future cash flow attributable to a recognised asset or liability, a highly probable forecast transaction or a firm commitment (cash flow hedge); or
- (iii) a hedge of a net investment in a foreign operation (net investment hedge).

Hedge accounting is used for derivatives designated in this way, provided certain criteria are met. At the inception of the transaction, the Group documents the relationship between the hedging instrument and the hedged item, as well as the risk management objective and the strategy for undertaking the hedge transaction. The Group also documents its assessment of whether the hedge is expected to be, and has been, highly effective in offsetting the risk in the hedged item, both at inception and on an ongoing basis.

Changes in the fair value of derivatives that are designated and qualify as net investment or cash flow hedges, and that prove to be highly effective in relation to the hedged risk, are recognised in other comprehensive income and a separate reserve within equity.

Gains and losses accumulated in this reserve are included in the income statement on disposal of the relevant investment or occurrence of the cash flow as appropriate. Changes in the fair value of derivatives that are designated and qualify as fair value hedges against assets carried at amortised cost are adjusted against the carrying value of the hedged asset to the extent those changes relate to the hedged risk. This adjustment is then amortised to the income statement over the anticipated remaining life of the hedged instrument. Where the hedge is against the value of AFS securities, changes in its value are recognised in the income statement, partially or wholly offset by a transfer from the investment valuation reserve for the change in value of the hedged item.

The Group discontinues hedge accounting if the hedging instrument expires, is sold, terminated or exercised, the hedge no longer meets the criteria for hedge accounting or the Group revokes the designation.

For a variety of reasons, certain derivative transactions, while providing effective economic hedges under the Group's risk management positions, do not qualify for hedge accounting under the specific IFRS rules and are therefore treated as derivatives held for trading. Their fair value gains and losses are recognised immediately in other trading income.

### (U) Loans

Loans with fixed maturities, including policyholder loans, mortgage loans on investment property, securitised mortgages and collateral loans, are recognised when cash is advanced to borrowers. The majority of these loans are carried at their unpaid principal balances and adjusted for amortisation of premium or discount, non-refundable loan fees and related direct costs. These amounts are deferred and amortised over the life of the loan as an adjustment to loan yield using the effective interest rate method. Loans with indefinite future lives are carried at unpaid principal balances or cost.

For certain mortgage loans, the Group has taken advantage of the revised fair value option under IAS 39 to present the mortgages, associated borrowings and derivative financial instruments at fair value, since they are managed as a portfolio on a fair value basis. This presentation provides more relevant information and eliminates any accounting mismatch that would otherwise arise from using different measurement bases for these three items. The fair values of mortgages classified as FV are estimated using discounted cash flow forecasts, based on a risk-adjusted discount rate which reflects the risks associated with these products, calibrated using the margins available on new lending or with reference to the rates offered by competitors. They are revalued at each period end, with movements in their fair values being taken to the income statement.

At each reporting date, we review loans carried at amortised cost for objective evidence that they are impaired and uncollectable, either at the level of an individual security or collectively within a group of loans with similar credit risk characteristics. To the extent that a loan is uncollectable, it is written down as impaired to its recoverable amount, measured as the present value of expected future cash flows discounted at the original effective interest rate of the loan, including any collateral receivable. Subsequent recoveries in excess of the loan's written-down carrying value are credited to the income statement.

### (V) Collateral

The Group receives and pledges collateral in the form of cash or non-cash assets in respect of stock lending transactions, certain derivative contracts and loans, in order to reduce the credit risk of these transactions. Collateral is also pledged as security for bank letters of credit. The amount and type of collateral required depends on an assessment of the credit risk of the counterparty.

Collateral received in the form of cash, which is not legally segregated from the Group, is recognised as an asset in the statement of financial position with a corresponding liability for the repayment in financial liabilities (note 49). However, where the Group has a currently enforceable legal right of set-off, the collateral liability and associated derivative balances are shown net, in line with market practice. Non-cash collateral received is not recognised in the statement of financial position unless the Group either (a) sells or repledges these assets in the absence of default, at which point the obligation to return this collateral is recognised as a liability; or (b) the counterparty to the arrangement defaults, at which point the collateral is seized and recognised as an asset.

Collateral pledged in the form of cash, which is legally segregated from the Group, is derecognised from the statement of financial position with a corresponding receivable recognised for its return. Non-cash collateral pledged is not derecognised from the statement of financial position unless the Group defaults on its obligations under the relevant agreement, and therefore continues to be recognised in the statement of financial position within the appropriate asset classification.

## (W) Deferred acquisition costs and other assets

The costs directly attributable to the acquisition of new business for insurance and participating investment contracts (excluding those written in the UK) are deferred to the extent that they are expected to be recoverable out of future margins in revenues on these contracts. For participating contracts written in the UK, acquisition costs are generally not deferred as the liability for these contracts is calculated in accordance with the FSA's realistic capital regime and FRS 27. For non-participating investment and investment fund management contracts, incremental acquisition costs and sales enhancements that are directly attributable to securing an investment management service are also deferred.

Where such business is reinsured, an appropriate proportion of the deferred acquisition costs is attributed to the reinsurer, and is treated as a separate liability.

Long-term business deferred acquisition costs are amortised systematically over a period no longer than that in which they are expected to be recoverable out of these future margins. Deferrable acquisition costs for non-participating investment and investment fund management contracts are amortised over the period in which the service is provided. General insurance and health deferred acquisition costs are amortised over the period in which the related revenues are earned. The reinsurers' share of deferred acquisition costs is amortised in the same manner as the underlying asset.

Deferred acquisition costs are reviewed by category of business at the end of each reporting period and are written-off where they are no longer considered to be recoverable.

Other assets include vehicles which are subject to repurchase agreements and inventories of vehicle parts. The former are carried at the lower of their agreed repurchase price or net realisable value, while the latter are carried at the lower of cost and net realisable value, where cost is arrived at on the weighted average cost formula or 'first in first out' (FIFO) basis. Provision is made against inventories which are obsolete or surplus to requirements.

## (X) Statement of cash flows

### Cash and cash equivalents

Cash and cash equivalents consist of cash at banks and in hand, deposits held at call with banks, treasury bills and other short-term highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value. Such investments are those with less than three months' maturity from the date of acquisition, or which are redeemable on demand with only an insignificant change in their fair values.

For the purposes of the statement of cash flows, cash and cash equivalents also include bank overdrafts, which are included in payables and other financial liabilities on the statement of financial position.

### Operating cash flows

Purchases and sales of investment property, loans and financial investments are included within operating cash flows as the purchases are funded from cash flows associated with the origination of insurance and investment contracts, net of payments of related benefits and claims.

## (Y) Leases

Leases, where a significant portion of the risks and rewards of ownership is retained by the lessor, are classified as operating leases. Assets held for use in such leases are included in property and equipment, and are depreciated to their residual values over their estimated useful lives. Rentals from such leases are credited to the income statement on a straight-line basis over the term of the relevant leases. Payments made as lessee under operating leases (net of any incentives received from the lessor) are charged to the income statement on a straight-line basis over the term of the relevant leases.

## (Z) Provisions and contingent liabilities

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, it is more probable than not that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made. Where the Group expects a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain.

The Group recognises a provision for onerous contracts when the expected benefits to be derived from a contract are less than the unavoidable costs of meeting the obligations under the contract. Contingent liabilities are disclosed if there is a possible future obligation as a result of a past event, or if there is a present obligation as a result of a past event but either a payment is not probable or the amount cannot be reasonably estimated.

## (AA) Employee benefits

### Annual leave and long service leave

Employee entitlements to annual leave and long service leave are recognised when they accrue to employees. A provision is made for the estimated liability for annual leave and long service leave as a result of services rendered by employees up to the statement of financial position date.

### Pension obligations

The Group operates a large number of pension schemes around the world, whose members receive benefits on either a defined benefit basis (generally related to a member's final salary and length of service) or a defined contribution basis (generally related to the amount invested, investment return and annuity rates), the assets of which are generally held in separate trustee-administered funds. The pension plans are generally funded by payments from employees and the relevant Group companies.

For defined benefit plans, the pension costs are assessed using the projected unit credit method. Under this method, the cost of providing pensions is charged to the income statement so as to spread the regular cost over the service lives of employees. The pension obligation is measured as the present value of the estimated future cash outflows, using a discount rate based on market yields for high-quality corporate bonds that are denominated in the currency in which the benefits will be paid and that have terms to maturity approximating to the terms of the related pension liability. The resulting pension scheme surplus or deficit appears as an asset or liability in the consolidated statement of financial position.

Costs charged to the income statement comprise the current service cost (the increase in pension obligation resulting from employees' service in the current period, together with the schemes' administration expenses), past service cost (resulting from changes to benefits with respect to previous years' service), and gains or losses on curtailment (when the employer materially reduces the number of employees covered by the scheme) or on settlements (when a scheme's obligations are transferred outside the Group). In addition, the difference between the expected return on scheme assets, less investment expenses, and the interest cost of unwinding the discount on the scheme liabilities (to reflect the benefits being one period closer to being paid out) is credited to investment income. All actuarial gains and losses, being the difference between the actual and expected returns on scheme assets, changes in assumptions underlying the liability calculations and experience gains or losses on the assumptions made at the beginning of the period, are recognised immediately in other comprehensive income.

For defined contribution plans, the Group pays contributions to publicly or privately administered pension plans. Once the contributions have been paid, the Group, as employer, has no further payment obligations. The Group's contributions are charged to the income statement in the year to which they relate and are included in staff costs.

### Other post-employment obligations

Some Group companies provide post-employment healthcare or other benefits to their retirees. The entitlement to these benefits is usually based on the employee remaining in service up to retirement age and the completion of a minimum service period. Unlike the pension schemes, no assets are set aside in separate funds to provide for the future liability but none of these schemes is material to the Group. The costs of the Canadian scheme are included within those for the defined benefit pension schemes in that country. For such schemes in other countries, provisions are calculated in line with local regulations, with movements being charged to the income statement within staff costs.

### Equity compensation plans

The Group offers share award and option plans over the Company's ordinary shares for certain employees, including a Save As You Earn plan (SAYE plan), details of which are given in the Directors' Remuneration Report and in note 30.

The Group accounts for options and awards under equity compensation plans, which were granted after 7 November 2002, until such time as they are fully vested, using the fair value based method of accounting (the 'fair value method'). Under this method, the cost of providing equity compensation plans is based on the fair value of the share awards or option plans at date of grant, which is recognised in the income statement over the expected vesting period of the related employees and credited to the equity compensation reserve, part of shareholders' funds. In certain jurisdictions, awards must be settled in cash instead of shares, and the credit is taken to liabilities rather than reserves. The fair value of these cash-settled awards is recalculated each year, with the income statement charge and liability being adjusted accordingly.

As described in policy AD below, shares purchased by employee share trusts to fund these awards are shown as a deduction from shareholders' funds at their original cost.

When the options are exercised and new shares are issued, the proceeds received, net of any transaction costs, are credited to share capital (par value) and the balance to share premium. Where the shares are already held by employee trusts, the net proceeds are credited against the cost of these shares, with the difference between cost and proceeds being taken to retained earnings. In both cases, the relevant amount in the equity compensation reserve is then credited to retained earnings.

### (AB) Income taxes

The current tax expense is based on the taxable profits for the year, after any adjustments in respect of prior years. Tax, including tax relief for losses if applicable, is allocated over profits before taxation and amounts charged or credited to components of other comprehensive income and equity, as appropriate.

Provision is made for deferred tax liabilities, or credit taken for deferred tax assets, using the liability method, on all material temporary differences between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements.

The principal temporary differences arise from depreciation of property and equipment, revaluation of certain financial assets and liabilities including derivative contracts, provisions for pensions and other post-retirement benefits and tax losses carried forward; and, in relation to acquisitions, on the difference between the fair values of the net assets acquired and their tax base. The rates enacted or substantively enacted at the statement of financial position date are used to determine the deferred tax.

Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised. In countries where there is a history of tax losses, deferred tax assets are only recognised in excess of deferred tax liabilities if there is convincing evidence that future profits will be available.

Deferred tax is provided on temporary differences arising from investments in subsidiaries, associates and joint ventures, except where the timing of the reversal of the temporary difference can be controlled and it is probable that the difference will not reverse in the foreseeable future.

Deferred taxes are not provided in respect of temporary differences arising from the initial recognition of goodwill, or from goodwill for which amortisation is not deductible for tax purposes, or from the initial recognition of an asset or liability in a transaction which is not a business combination and affects neither accounting profit nor taxable profit or loss at the time of the transaction.

Current and deferred tax relating to items recognised in other comprehensive income and directly in equity are similarly recognised in other comprehensive income and directly in equity respectively. Deferred tax related to fair value re-measurement of available for sale investments, owner-occupied properties and other amounts charged or credited directly to other comprehensive income is recognised in the statement of financial position as a deferred tax asset or liability. Current tax on interest paid on Direct Capital instruments is credited directly in equity.

In addition to paying tax on shareholders' profits, the Group's life businesses in the UK, Ireland and Singapore pay tax on policyholders' investment returns ('policyholder tax') on certain products at policyholder tax rates. Policyholder tax is accounted for as an income tax and is included in the total tax expense. The Group has decided to show separately the amounts of policyholder tax to provide a more meaningful measure of the tax the Group pays on its profits. In the pro forma reconciliations, operating profit has been calculated after charging policyholder tax.

### (AC) Borrowings

Borrowings are classified as being for either core structural or operational purposes. They are recognised initially at their issue proceeds less transaction costs incurred. Subsequently, most borrowings are stated at amortised cost, and any difference between net proceeds and the redemption value is recognised in the income statement over the period of the borrowings using the effective interest rate method. All borrowing costs are expensed as they are incurred except where they are directly attributable to the acquisition or construction of property and equipment as described in policy O above.

Where loan notes have been issued in connection with certain securitised mortgage loans, the Group has taken advantage of the revised fair value option under IAS 39 to present the mortgages, associated liabilities and derivative financial instruments at fair value, since they are managed as a portfolio on a fair value basis. This presentation provides more relevant information and eliminates any accounting mismatch which would otherwise arise from using different measurement bases for these three items.

### (AD) Share capital and treasury shares

#### Equity instruments

An equity instrument is a contract that evidences a residual interest in the assets of an entity after deducting all its liabilities. Accordingly, a financial instrument is treated as equity if:

- (i) there is no contractual obligation to deliver cash or other financial assets or to exchange financial assets or liabilities on terms that may be unfavourable; and
- (ii) the instrument is a non-derivative that contains no contractual obligation to deliver a variable number of shares or is a derivative that will be settled only by the Group exchanging a fixed amount of cash or other assets for a fixed number of the Group's own equity instruments.

#### Share issue costs

Incremental external costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds of the issue and disclosed where material.

#### Dividends

Interim dividends on ordinary shares are recognised in equity in the period in which they are paid. Final dividends on these shares are recognised when they have been approved by shareholders. Dividends on preference shares are recognised in the period in which they are declared and appropriately approved.

#### Treasury shares

Where the Company or its subsidiaries purchase the Company's share capital or obtain rights to purchase its share capital, the consideration paid (including any attributable transaction costs net of income taxes) is shown as a deduction from total shareholders' equity. The Group's only such holding comprises shares purchased by employee trusts to fund certain awards under the equity compensation plans described in policy AA above. Gains and losses on sales of own shares are charged or credited to the treasury share account in equity.

**(AE) Fiduciary activities**

Assets and income arising from fiduciary activities, together with related undertakings to return such assets to customers, are excluded from these financial statements where the Group has no contractual rights in the assets and acts in a fiduciary capacity such as nominee, trustee or agent.

**(AF) Earnings per share**

Basic earnings per share is calculated by dividing net income available to ordinary shareholders by the weighted average number of ordinary shares in issue during the year, excluding the weighted average number of ordinary shares purchased by the Group and held as Treasury shares.

Earnings per share has also been calculated on the operating profit before impairment of goodwill and other adjusting items, after tax, attributable to ordinary shareholders, as the directors believe this figure provides a better indication of operating performance. Details are given in note 14.

For the diluted earnings per share, the weighted average number of ordinary shares in issue is adjusted to assume conversion of all dilutive potential ordinary shares, such as convertible debt and share options granted to employees.

Potential or contingent share issuances are treated as dilutive when their conversion to shares would decrease net earnings per share.

**(AG) Operations held for sale**

Assets and liabilities held for disposal as part of operations which are held for sale are shown separately in the consolidated statement of financial position. The relevant assets are recorded at the lower of their carrying amount and their fair value, less the estimated selling costs.

## Consolidated financial statements

## Consolidated income statement

For the year ended 31 December 2011

	Note	2011 £m		2010 £m	
		Continuing operations	Discontinued operations	Continuing operations	Discontinued operations
<b>Income</b>					
Gross written premiums	5	30,000	2,118	31,805	4,469
Premiums ceded to reinsurers		(1,673)	(75)	(1,734)	(129)
Premiums written net of reinsurance		28,327	2,043	30,071	4,340
Net change in provision for unearned premiums		(236)	(56)	(73)	(2)

<b>Total net (decrease)/increase in cash and cash equivalents</b>		<b>(2,037)</b>	<b>803</b>
Cash and cash equivalents at 1 January		24,695	24,251
Effect of exchange rate changes on cash and cash equivalents		(257)	(359)
<b>Cash and cash equivalents at 31 December</b>	53d	<b>22,401</b>	<b>24,695</b>

# Notes to the consolidated financial statements

## 1 – Exchange rates

The Group's principal overseas operations during the year were located within the Eurozone and the United States. The results and cash flows of these operations have been translated into sterling at the average rates for the year and the assets and liabilities have been translated at the year-end rates as follows:

	2011	2010
Eurozone		
– Average rate (€1 equals)	<b>£0.87</b>	£0.85
– Period end rate (€1 equals)	<b>£0.84</b>	£0.86
United States		
– Average rate (US\$1 equals)	<b>£0.63</b>	£0.65
– Period end rate (US\$1 equals)	<b>£0.65</b>	£0.64

Total foreign currency movements during 2011 resulted in a loss recognised in the income statement of £35 million (2010: £34 million gain).

## 2 – Presentation changes

As described in note 3(b), the Group's shareholding in Delta Lloyd N.V. ('Delta Lloyd') was reduced to 42.7%, representing 40% of shareholder voting rights, following the sale of shares on 6 May 2011. Our holding has since been diluted to 41.9% at 31 December 2011, representing 39.3% of shareholder voting rights, through Delta Lloyd's issue of scrip dividends which we did not take up. As the Group no longer commands a majority of shareholder voting rights, it no longer controls Delta Lloyd. Accordingly, from 6 May 2011 the Group has ceased to consolidate the results and net assets of Delta Lloyd. The effect of this in the various movements reconciliation tables in these notes is described as 'Deconsolidation of Delta Lloyd'.

The transaction resulted in the loss of control of a major geographical area of operations, previously presented as 'Delta Lloyd' in the segmental reporting note. The results of Delta Lloyd up to the transaction date, as well as those for preceding years, have therefore been classified as discontinued operations. The Group's share of the profits of its retained interest in Delta Lloyd as an associate after the transaction date is reported in a separate segment as part of continuing operations.

### 3 – Subsidiaries

This note provides details of the acquisitions and disposals of subsidiaries that the Group has made during the year, together with details of businesses held for sale at the year end. The principal Group subsidiaries are listed on pages 50 to 51.

#### (a) Acquisitions

##### (i) Material acquisitions

There were no material acquisitions in the year ended 31 December 2011.

##### (ii) Other goodwill arising

Goodwill on acquisitions and additions, as shown in note 16(a) was £13 million, of which £8 million arose on the acquisition of an insurance broker in Canada and £5 million from additional capital in our Indonesian life and health subsidiary.

#### (b) Disposal and remeasurement of subsidiaries, joint ventures and associates

The profit on the disposal and remeasurement of subsidiaries, joint ventures and associates comprises:

	2011 £m	2010 £m
<b>Continuing operations</b>		
United Kingdom		
RAC Limited (see (i) below)	532	—
RBS Life and RBS Collective	—	128
Non-core operations	—	4
France	—	26
Australia (see (ii) below)	23	—
Other small operations	10	5
<b>Profit on disposal and remeasurement from continuing operations</b>	<b>565</b>	<b>163</b>
Loss on disposal from discontinued operations (see (iii) below)	(32)	(4)
<b>Total profit on disposal and remeasurement</b>	<b>533</b>	<b>159</b>

No tax arises on the profits and losses on these disposals.

##### (i) RAC Limited

On 30 September 2011, the Group sold RAC Limited ('RAC') to The Carlyle Group for £977 million, realising a profit of £532 million. Aviva is continuing its commercial relationship with RAC, both as a key underwriter of motor insurance on RAC's panel and as a partner, selling RAC breakdown cover to our customers. The Group has retained the RAC (2003) Pension Scheme which, at 31 December 2011, had an IAS 19 deficit of £51 million.

The profit on disposal is calculated as follows:

	2011 £m
<b>Assets</b>	
Goodwill	284
Intangible assets	229
Property and equipment	30
Receivables	85
Other assets	43
<b>Total assets</b>	<b>671</b>
<b>Liabilities</b>	
Insurance liabilities	161
Tax liabilities	57
Other liabilities	73
<b>Total liabilities</b>	<b>291</b>
<b>Net assets disposed of</b>	<b>380</b>
Cash consideration	977
Less: transaction costs and provisions	(65)
<b>Net consideration</b>	<b>912</b>
<b>Profit on disposal</b>	<b>532</b>

##### (ii) Aviva Investors Australia

On 1 October 2011, the Group sold its Australian fund management business, Aviva Investors Australia Ltd, to nabInvest, National Australia Bank's direct asset management business, for £35 million, which includes contingent consideration with a fair value of £3 million. Net assets disposed of were £11 million, comprising assets of £15 million and liabilities of £4 million, giving a profit of £20 million after transaction costs. Recycling currency translation reserves of £3 million to the income statement resulted in an overall profit on disposal of £23 million.

### 3 – Subsidiaries continued

#### (iii) Delta Lloyd

On 6 May 2011, the Group sold 25 million shares in Delta Lloyd N.V. ('Delta Lloyd') (the Group's Dutch long-term insurance, general insurance and fund management operation), reducing our holding to 42.7% of Delta Lloyd's ordinary share capital, representing 40% of shareholder voting rights. As the Group no longer commands a majority of shareholder voting rights, it no longer controls Delta Lloyd. Accordingly, from 6 May 2011 the Group has ceased to consolidate the results and net assets of Delta Lloyd.

Cash consideration of £380 million was received for the sale of shares, and £8 million of costs were attributable to the disposal transaction.

The Group retained significant influence over Delta Lloyd through its initial 42.7% shareholding (diluted since then to 41.9% at 31 December 2011 through Delta Lloyd's issue of scrip dividends which we did not take up) and contractual right to appoint two members of Delta Lloyd's supervisory board. Our continuing interest in Delta Lloyd has been classified as an associate and initially re-measured at fair value as at 6 May 2011, using the closing market value of the Delta Lloyd shares listed on Euronext on that day. As Delta Lloyd is no longer consolidated, equity reserves for accumulated currency translation differences and accumulated fair value differences on available for sale financial investments relating to that company have been recycled to the income statement. Equity reserves relating to Delta Lloyd's owner-occupied property have been transferred directly to retained earnings.

The transaction resulted in the loss of control of a major geographical area of operations, previously presented as 'Delta Lloyd' in the segmental reporting note. The results of Delta Lloyd, up to the transaction date as well as those for the previous year have therefore been classified as discontinued operations. The Group's share of the profits of its retained interest in Delta Lloyd as an associate after the transaction date is reported in a separate segment as part of continuing operations.

The loss on the disposal of Delta Lloyd is calculated as follows:

	2011 £m
Net cash proceeds from disposal	372
Fair value of continuing interest in associate at 6 May 2011	1,116
Currency translation and investment valuation equity reserves recycled to the income statement	600
Consolidated net assets of Delta Lloyd as at 6 May 2011, net of non-controlling interests	(2,120)
<b>Loss on disposal recognised through the income statement</b>	<b>(32)</b>

Aviva's interest in the carrying value of Delta Lloyd's IFRS net assets prior to disposal and fair value adjustments at the date of initial recognition of the associate were as follows:

	2011 £m
<b>Assets</b>	
Goodwill	316
Acquired value of in-force business and intangible assets	59
Interests in, and loans to, joint ventures and associates	359
Property and equipment	242
Investment property	2,131
Loans	20,196
Financial investments	34,081
Deferred acquisition costs	195
Other assets	3,528
<b>Total assets</b>	<b>61,107</b>
<b>Liabilities</b>	
Insurance liabilities	32,481
Liabilities for investment contracts	3,355
Unallocated divisible surplus	144
Net asset value attributable to unitholders	631
External borrowings	6,499
Other liabilities	14,107
<b>Total liabilities</b>	<b>57,217</b>
<b>Net assets</b>	<b>3,890</b>
Non-controlling interests before disposal	(1,770)
<b>Group's share of net assets before disposal</b>	<b>2,120</b>
Net assets sold (14.9%)	(577)
Fair value adjustments on initial recognition of associate	(427)
<b>Residual interest in associate</b>	<b>1,116</b>

The fair value adjustments represent the difference between the net asset value of the Group's residual interest in Delta Lloyd and its fair value at the transaction date, based on the market price of its listed shares on that date. This adjustment principally comprises the de-recognition of all previously recognised goodwill and an increase in insurance liabilities, partially offset by an increase in the value of loan investments, and adjustments to other assets and liabilities of the associate.

### 3 – Subsidiaries continued

#### (c) Assets and liabilities of operations classified as held for sale

The assets and liabilities of operations classified as held for sale as at 31 December 2011 relate to our subsidiaries in the Czech Republic, Hungary and Romania and a joint venture in Taiwan, and are as follows:

	2011 £m	2010 £m
<b>Assets</b>		
Intangible assets	1	—
Interests in, and loans to, joint ventures and associates	12	14
Property and equipment	1	—
Financial investments	347	—
Receivables and other financial assets	62	—
Prepayments and accrued income	3	—
<b>Total assets</b>	<b>426</b>	<b>14</b>
<b>Liabilities</b>		
Insurance liabilities	(344)	—
Other liabilities	(19)	—
<b>Total liabilities</b>	<b>(363)</b>	<b>—</b>
<b>Net assets</b>	<b>63</b>	<b>14</b>

During 2011, the Group decided to sell, and was actively marketing, its operations in the Czech Republic, Hungary and Romania. On 30 January 2012, we announced the sale of these businesses to MetLife, Inc. The transaction, which is subject to regulatory approvals in each jurisdiction, is expected to be completed in 2012. The assets and liabilities of these businesses have therefore been classified as held for sale at their expected disposal proceeds in the consolidated statement of financial position at 31 December 2011. The operations held for sale at 31 December 2010 related to our interest in the Taiwan joint venture, details of which are given in note 18(a).

#### (d) Irish long-term business

Our Irish long-term business is carried out through a subsidiary, Aviva Life Holdings Ireland Limited ('ALHI'), which is 75% owned by Aviva and 25% owned by Allied Irish Bank ('AIB'). ALHI holds two subsidiaries, one of which is Ark Life Assurance Company Limited ('Ark') which carries out bancassurance business via a distribution agreement with AIB. The original distribution agreement was renewable in 2011 but, on 15 December 2011, AIB notified us that they did not wish to renew it and the existing shareholders' agreement governing ALHI was terminated. The termination of this agreement triggered the ability for both parties to exercise put and call options that will result in the unwind of the original structure such that the Ark business returns 100% to AIB and the Group will purchase the 25% minority stake in ALHI. The formal exercise of these options was approved on 17 January 2012 and, as a result, the Ark business became held for sale on that date. Any change in that company's ownership is subject to regulatory approval in Ireland, so completion is not expected until later in 2012.

As a result of these events, we have tested the goodwill relating to ALHI's life businesses, as well as the distribution agreement intangible asset, for impairment. This has resulted in charges of £120 million and £44 million respectively being made in the income statement.

The shareholders' agreement with AIB specifies that calculation of the Ark exit value should be based on the embedded value of the business at 31 December 2011. This is estimated as £360 million, which is lower than its carrying value following the above impairments. As a result, a further charge to profit of £40 million has been recognised in 2011. The Irish business is currently reported within Europe in our segmental disclosures in note 4(a).

The obligation created by the put options over AIB's minority share in ALHI has led to our recognition of a financial liability of £205 million and an equal reduction in non-controlling interests within equity, as explained in note 37(b).

## 4 – Segmental information

The Group's results can be segmented, either by activity or by geography. Our primary reporting format is on regional reporting lines, with supplementary information given by business activity. This note provides segmental information on the consolidated income statement and statement of financial position.

### (a) Operating segments

The Group has determined its operating segments along regional lines. These reflect the management structure whereby a member of the executive management team is accountable to the group chief executive for the operating segment for which he or she is responsible. The activities of each operating segment are described below:

#### United Kingdom

The United Kingdom comprises two operating segments – UK Life and UK General Insurance (UK GI). The principal activities of UK Life are life insurance, long-term health and accident insurance, savings, pensions and annuity business, while UK GI provides insurance cover to individuals and businesses, for risks associated mainly with motor vehicles, property and liability, such as employers' liability and professional indemnity liability, and medical expenses. UK GI also includes the Group reinsurance result and the results of run-off agency business, and, for the period to its disposal on 30 September 2011, the RAC motor recovery business.

#### Aviva Europe

Activities reported in the Aviva Europe operating segment exclude operations in the UK and Delta Lloyd but include those in Russia and Turkey. Principal activities are long-term business in France, Ireland, Italy, Poland and Spain, and general insurance in France, Ireland and Italy.

#### North America

Our activities in North America principally comprise our long-term business operation in the US and general insurance business operation in Canada.

#### Asia Pacific

Our activities in Asia Pacific principally comprise our long-term business operations in China, India, Singapore, Hong Kong, Sri Lanka, Taiwan, Malaysia, South Korea, Vietnam and Indonesia.

#### Aviva Investors

Aviva Investors operates in most of the regions in which the Group operates, in particular the UK, France, the US and Canada and other international businesses, managing policyholders' and shareholders' invested funds, providing investment management services for institutional pension fund mandates and managing a range of retail investment products, including investment funds, unit trusts, OEICs and ISAs.

#### Other Group activities

Investment return on centrally held assets and head office expenses, such as Group treasury and finance functions, together with certain taxes and financing costs arising on central borrowings are included in 'Other Group activities'. Similarly, central core structural borrowings and certain tax balances are included in 'Other Group activities' in the segmental statement of financial position. Also included in 'Other Group activities' are consolidation and elimination adjustments.

#### Delta Lloyd and discontinued operations

The activities of Delta Lloyd comprise long-term business operations in the Netherlands and Belgium, and general insurance, fund management and banking operations in the Netherlands.

As described in note 3(b), on 6 May 2011 the Group ceased to hold a majority of the shareholder voting rights in Delta Lloyd and therefore the results of that company up to 6 May 2011 are presented as discontinued operations. After this date, the Group ceased to consolidate Delta Lloyd. The Group's share of the profits of its retained interest in Delta Lloyd as an associate are shown in the Delta Lloyd segment within continuing operations.

#### Measurement basis

The accounting policies of the segments are the same as those for the Group as a whole. Any transactions between the business segments are on normal commercial terms. The Group evaluates performance of operating segments on the basis of:

- (i) profit or loss from operations before tax attributable to shareholders; and
- (ii) profit or loss from operations before tax attributable to shareholders, adjusted for non-operating items outside the segment management's control, including investment market performance and economic assumption changes.

\* Total reported income from continuing operations, excluding inter-segment revenue, is split United Kingdom £17,508 million, France £4,504 million, USA £5,290 million and Rest of the World £8,701 million. Income is attributed on the basis of geographical origin which does not materially differ from revenue by geographical destination, as most risks are located in the countries where the contracts were written.

\*\* Impairment losses, and reversal of such losses, recognised directly in other comprehensive income were £21 million and £nil respectively.

# United Kingdom General Insurance includes the Group Reinsurance business, agency run-off business and the non-insurance business for the RAC prior to its disposal.

\* Total reported income, excluding inter-segment revenue, is split United Kingdom £22,160 million, France £8,748 million, Netherlands £7,782 million, USA £6,497 million and Rest of the World £13,214 million. Income is attributed on the basis of geographical origin which does not materially differ from revenue by geographical destination, as most risks are located in the countries where the contracts were written.

\*\* Impairment losses, and reversal of such losses, recognised directly in other comprehensive income were £78 million and £nil million respectively.

# United Kingdom General Insurance includes the Group Reinsurance business, agency run-off business and the non-insurance business for the RAC.

## 4 – Segmental information continued

### (b) Further analysis by products and services

The Group's results can be further analysed by products and services which comprise long-term business, general insurance and health, fund management and other activities.

#### Long-term business

Our long-term business comprises life insurance, long-term health and accident insurance, savings, pensions and annuity business written by our life insurance subsidiaries, including managed pension fund business and our share of the other life and related business written in our associates and joint ventures, as well as lifetime mortgage business written in the UK.

#### General insurance and health

Our general insurance and health business provides insurance cover to individuals and to small and medium-sized businesses for risks associated mainly with motor vehicles, property and liability, such as employers' liability and professional indemnity liability and medical expenses.

#### Fund management

Our fund management business invests policyholders' and shareholders' funds, provides investment management services for institutional pension fund mandates and manages a range of retail investment products, including investment funds, unit trusts, OEICs and ISAs. Clients include Aviva Group businesses and third-party financial institutions, pension funds, public sector organisations, investment professionals and private investors.

#### Other

Includes the RAC non-insurance operations (up to the disposal date of 30 September 2011), service companies, head office expenses, such as Group treasury and finance functions, and certain financing costs and taxes not allocated to business segments.

#### Delta Lloyd

In the products and services analysis, the results of Delta Lloyd up to 6 May 2011 are presented as discontinued operations. After this date, the Group's share of the profits of its retained interest in Delta Lloyd as an associate are shown only within other activities within continuing operations.

<b>Total expenses</b>	<b>38,610</b>	55,567

## 6 – Details of expenses continued

### Integration and restructuring costs

Integration and restructuring costs were £268 million (2010: £225 million). This includes costs associated with preparing the businesses for Solvency II implementation of £96 million, a £30 million charge in the UK relating to the reattribution of the inherited estate and expenditure relating to the Quantum Leap project in Europe of £51 million. Expenditure relating to other restructuring exercises across the Group amounted to £91 million.

### Exceptional items

Exceptional items relating to continuing operations totalled £57 million net expense (2010: £276 million net credit) in the year.

For the year ended 31 December 2011, this comprised:

- £22 million provision for compensation scheme costs for the leveraged property fund in Ireland; and
- £35 million expense for the discounted cost of strengthening latent claims provisions in the UK.

For the year ended 31 December 2010, this comprised:

- £286 million benefit from the closure of the final salary section of the UK staff pension scheme to future accruals; and
- £10 million expense for the strengthening of reserves in respect of several specific discontinued commercial liability risks written in Canada a significant number of years ago.

The table below sets out the lines of the income statement in which the exceptional items have been included:

	2011 £m	2010 £m
Change in insurance liabilities, net of reinsurance (note 39)	(57)	(10)
Other expenses (as above)	—	286
<b>Total continuing operations</b>	<b>(57)</b>	276
<b>Total discontinued operations</b>	<b>—</b>	(549)
	<b>(57)</b>	<b>(273)</b>

## 7 – Finance costs

This note analyses the interest costs on our borrowings (which are described in note 48) and similar charges.

Finance costs comprise:

Continuing operations	2011 £m	2010 £m
Interest expense on core structural borrowings		
Subordinated debt	302	290
Long term senior debt	19	20
Commercial paper	3	1
	<b>324</b>	311
Interest expense on operational borrowings		
Amounts owed to financial institutions	128	57
Securitised mortgage loan notes at fair value	88	88
	<b>216</b>	145
Interest on reinsurance deposits	4	8
Interest on collateral received	33	20
Net finance charge on pension schemes (note 47e(iv))	87	127
Unwind of discount on GI reserves	24	22
Other similar charges	110	66
<b>Total finance costs from continuing operations</b>	<b>798</b>	699
<b>Total finance costs from discontinued operations</b>	<b>262</b>	723
<b>Total finance costs</b>	<b>1,060</b>	1,422

## 8 – Long-term business economic volatility

The long-term nature of much of the Group's operations means that, for management's decision-making and internal performance management, the effects of short-term economic volatility are treated as non-operating items. The Group focuses instead on an operating profit measure that incorporates an expected return on investments supporting its long-term business, as described below.

### (a) Definitions

Operating profit for long-term business is based on expected investment returns on financial investments backing shareholder and policyholder funds over the reporting period, with consistent allowance for the corresponding expected movements in liabilities. Operating profit includes the effect of variance in experience for non-economic items, such as mortality, persistency and expenses, and the effect of changes in non-economic assumptions, where not treated as exceptional. Changes due to economic items, such as market value movements and interest rate changes, which give rise to variances between actual and expected investment returns, and the impact of changes in economic assumptions on liabilities, are disclosed separately outside operating profit.

### (b) Economic volatility

The investment variances and economic assumption changes excluded from the long-term business operating profit are as follows:

	Long-term business	
	2011 £m	2010 £m
Investment variances and economic assumptions – continuing operations	<b>(796)</b>	(219)
Investment variances and economic assumptions – discontinued operations	<b>(820)</b>	1,010
Investment variances and economic assumptions	<b>(1,616)</b>	791

In 2010, investment variances of £791 million included £1,010 million relating to Delta Lloyd. Of this, around £800 million was due to differing movements in asset and liability yield curves with the remainder primarily related to gains on interest rate derivatives. Liabilities in Delta Lloyd are discounted using a yield curve based on a fully collateralised AAA bond portfolio. The discount rate increased in 2010 as an increase of around 80bps in credit spreads on collateralised bonds was only partly offset by lower risk-free yields. As a result, while lower interest rates increased the market value of assets, this was not offset by a corresponding movement in liabilities. The AAA collateralised bond spread movement in 2010 reflected the perceived risk regarding the curve's components which include bonds issued by Spanish savings banks and a range of other European organisations.

Over the period from the start of 2011 to the partial disposal of Delta Lloyd on 6 May 2011, the AAA collateralised bond spread narrowed by about 80bps as a result of changes in the underlying bond index. This movement was the main driver of the negative variance of £820 million for discontinued operations in 2011, largely reversing the positive variance reported in the prior year.

For continuing operations, the negative investment variance of £796 million relates largely to the impact of lower risk-free interest rates, wider credit spreads and increased market volatility in the UK and Europe. In the UK these factors have increased the cost of guarantees in the New With-Profits sub-fund. In Europe the variance is driven by wider credit spreads on bonds in Ireland, Italy and Spain. Any future increases in credit spreads on corporate and government bonds would cause further negative investment variances.

The overall allowances for credit defaults on UK corporate bonds and commercial mortgages remain at broadly consistent levels.

### (c) Methodology

The expected investment returns and corresponding expected movements in long-term business liabilities are calculated separately for each principal long-term business unit.

The expected return on investments for both policyholders' and shareholders' funds is based on opening economic assumptions applied to the expected funds under management over the reporting period. Expected investment return assumptions are derived actively, based on market yields on risk-free fixed interest assets at the end of each financial year. The same margins are applied on a consistent basis across the Group to gross risk-free yields, to obtain investment return assumptions for equities and properties. Expected funds under management are equal to the opening value of funds under management, adjusted for sales and purchases during the period arising from expected operating experience.

The actual investment return is affected by differences between the actual and expected funds under management and changes in asset mix, as well as movements in interest rates. To the extent that these differences arise from the operating experience of the long-term business, or management decisions to change asset mix, the effect is included in the operating profit. The residual difference between actual and expected investment return is included in investment variances, outside operating profit but included in profit before tax.

The movement in liabilities included in operating profit reflects both the change in liabilities due to the expected return on investments and the impact of experience variances and assumption changes for non-economic items.

The effect of differences between actual and expected economic experience on liabilities, and changes to economic assumptions used to value liabilities, are taken outside operating profit. For many types of long-term business, including unit-linked and with-profits funds, movements in asset values are offset by corresponding changes in liabilities, limiting the net impact on profit. For other long-term business the profit impact of economic volatility depends on the degree of matching of assets and liabilities, and exposure to financial options and guarantees.

## 8 – Long-term business economic volatility continued

### (d) Assumptions

The expected rate of investment return is determined using consistent assumptions between operations, having regard to local economic and market forecasts of investment return and asset classification under IFRS.

The principal assumptions underlying the calculation of the expected investment return for equities and properties are:

	Equities		Properties	
	2011 %	2010 %	2011 %	2010 %
United Kingdom	<b>7.2</b>	7.8	<b>5.7</b>	6.3
Eurozone	<b>6.9</b>	7.2	<b>5.4</b>	5.7

The expected return on equities and properties is calculated by reference to the ten-year swap rate in the relevant currency plus an appropriate risk margin. These are the same assumptions as are used under MCEV principles to calculate the longer-term investment return for the Group's long-term business.

For fixed interest securities classified as FV, the expected investment returns are based on average prospective yields for the actual assets held. Where such securities are classified as AFS, such as in the US, the expected investment return comprises the expected interest or dividend payments and amortisation of the premium or discount at purchase.

## 9 – Longer-term investment return and economic assumption changes for non-long-term business

For non-long-term business, the total investment income, including realised and unrealised gains, is split between a calculated longer-term return, which is included in operating profit, and short-term fluctuations from this, which are disclosed outside operating profit but are included in profit before tax. This note gives details of the longer-term return calculation and the relevant assumptions, as well as the economic assumption changes on our general insurance and health business.

(a) The short-term fluctuations in investment return and economic assumption changes attributable to the non-long-term business result and reported outside operating profit were as follows:

	Non-long-term business	
	2011 £m	2010 £m
Short-term fluctuations in investment return (see (b) below) – continuing operations	<b>(266)</b>	(199)
Economic assumption changes – continuing operations (see (g) below)	<b>(90)</b>	(61)
	<b>(356)</b>	(260)
Short-term fluctuation in investment return – discontinued operations	<b>(60)</b>	(44)
	<b>(416)</b>	(304)

(b) The longer-term investment return and short-term fluctuation for continuing operations are as follows:

Continuing operations	Non-long-term business	
	2011 £m	2010 £m
Net investment income	<b>602</b>	497
Foreign exchange on unrealised gains/losses and other charges	<b>(99)</b>	53
	<b>503</b>	550
Analysed between:		
Longer-term investment return, reported within operating profit	<b>769</b>	749
Short-term fluctuation in investment return, reported outside operating profit		
General insurance and health	<b>(124)</b>	(199)
Other operations*	<b>(142)</b>	—
	<b>(266)</b>	(199)
	<b>503</b>	550

\*Mainly represents assets backing non-long-term business held by the France holding company.

(c) The longer-term investment return is calculated separately for each principal non-long-term business unit. In respect of equities and properties, the return is calculated by multiplying the opening market value of the investments, adjusted for sales and purchases during the year, by the longer-term rate of investment return.

The longer-term rate of investment return is determined using consistent assumptions between operations, having regard to local economic and market forecasts of investment return. The allocated longer-term return for other investments is the actual income receivable for the year. Actual income and longer-term investment return both contain the amortisation of the discounts/premium arising on the acquisition of fixed income securities. For other operations, the longer-term return mainly reflects assets backing non-long-term business held in the France holding company.

## 9 – Longer-term investment return and economic assumption changes for non-long-term business continued

(d) The total assets supporting the general insurance and health business, which contribute towards the longer-term return, are:

	2011 £m	2010 £m
Debt securities	9,371	11,404
Equity securities	551	918
Properties	152	146
Cash and cash equivalents	2,315	1,787
Other	5,871	4,021
Assets supporting general insurance and health business	18,260	18,276
Assets supporting other non-long-term business*	268	1,689
Total assets supporting non-long-term business	18,528	19,965

\*For 2011 represents assets in France holding company backing non-long-term business. For 2010 represents Delta Lloyd banking and mortgage activities which are no longer consolidated following the partial disposal of Delta Lloyd on 6 May 2011.

The principal assumptions underlying the calculation of the longer-term investment return are:

	Longer-term rates of return equities		Longer-term rates of return properties	
	2011 %	2010 %	2011 %	2010 %
United Kingdom	7.2	7.8	5.7	6.3
France	6.9	7.2	5.4	5.7
Ireland	6.9	7.2	5.4	5.7
Canada	7.0	7.5	5.5	6.0
Netherlands – Discontinued	6.9	7.2	5.4	5.7

The Group has applied the same economic assumptions for equities and properties as are used under MCEV principles to calculate the longer-term investment return for its non-long-term business in 2010 and 2011.

(e) The table below compares the actual return on investments attributable to the non-long-term business, after deducting investment management expenses and charges, with the aggregate longer-term return over a five-year period.

	2007– 2011 £m	2006– 2010 £m
<b>Continuing operations</b>		
Actual return attributable to shareholders	3,175	3,831
Longer-term return credited to operating results	(4,114)	(4,329)
Excess of longer-term returns over actual returns	(939)	(498)

(f) The table below shows the sensitivity of the Group's non-long-term business operating profit for continuing operations before tax to changes in the longer-term rates of return:

Continuing operations			2011 £m	2010 £m
Movement in investment return for	By	Change in		
Equities	1% higher/lower	Group operating profit before tax	4	6
Properties	1% higher/lower	Group operating profit before tax	1	2

(g) The economic assumption changes mainly arise from movements in the rate used to discount latent claims.

As explained in accounting policy K, provisions for latent claims are discounted, using rates based on the relevant swap curve, in the relevant currency at the reporting date, having regard to the duration of the expected settlement of the claims. The discount rate is set at the start of the accounting period, with any change in rates between the start and end of the accounting period being reflected below operating profit as an economic assumption change. The range of discount rates used is disclosed in note 39(c).

## 10 – Employee information

This note shows where our staff are employed throughout the world, excluding staff employed by our joint ventures and associates, and analyses the total staff costs.

### (a) Employee numbers

The number of persons employed by the Group was:

	At 31 December		Average for the year	
	2011 Number	2010 Number	2011 Number	2010 Number
<b>Continuing operations</b>				
United Kingdom operations	17,620	20,762	20,126	21,166
Aviva Europe	9,644	9,797	9,721	9,506
North America	5,449	5,212	5,333	5,296
Asia Pacific	1,935	1,738	1,837	1,593
Aviva Investors	1,308	1,386	1,340	1,267
Corporate centre	606	525	567	504
<b>Employees in continuing operations</b>	<b>36,562</b>	<b>39,420</b>	<b>38,924</b>	<b>39,332</b>
<b>Employees in discontinued operations</b>	<b>—</b>	<b>5,722</b>	<b>1,916</b>	<b>6,009</b>
<b>Total employee numbers</b>	<b>36,562</b>	<b>45,142</b>	<b>40,840</b>	<b>45,341</b>

### (b) Staff costs

Total staff costs were:

	2011 £m	2010 £m
<b>Continuing operations</b>		
Wages and salaries	1,541	1,531
Social security costs	225	212
Post-retirement obligations		
Defined benefit schemes (note 47d)*	58	(219)
Defined contribution schemes (note 47d)	95	70
Profit sharing and incentive plans	156	140
Equity compensation plans (note 30d)	58	50
Termination benefits	22	14
<b>Staff costs from continuing operations</b>	<b>2,155</b>	<b>1,798</b>
<b>Staff costs from discontinued operations</b>	<b>177</b>	<b>441</b>
<b>Total staff costs</b>	<b>2,332</b>	<b>2,239</b>

Staff costs from continuing operations are charged within:

	2011 £m	2010 £m
Acquisition costs	644	620
Claims handling expenses	221	234
Central costs and sharesave schemes	10	(6)
Other operating expenses	1,280	1,236
Exceptional items*	—	(286)
<b>Staff costs from continuing operations</b>	<b>2,155</b>	<b>1,798</b>
<b>Staff costs from discontinued operations</b>	<b>177</b>	<b>441</b>
<b>Total staff costs</b>	<b>2,332</b>	<b>2,239</b>

\*The credit disclosed in exceptional items in 2010 arose from the £286 million gain on the closure of the UK schemes to future accrual, described in note 47(c).

## 11 – Directors

Information concerning individual directors' emoluments, interests and transactions is given in the Directors' Remuneration Report on pages 114 to 136 in the 'Corporate governance' section of this report. For the purposes of the disclosure required by Schedule 5 to the Companies Act 2006, the total aggregate emoluments of the directors in respect of 2011 was £6.3 million (2010: £6.8 million). Employer contributions to pensions for executive directors for qualifying periods were £71,900 (2010: £136,400). The aggregate net value of share awards granted to the directors in the period was £12.1 million (2010: £9.5 million). The net value has been calculated by reference to the closing middle market price of an ordinary share at the date of grant. During the year, no share options were exercised by directors (2010: nil).

## 12 – Auditors' remuneration

This note shows the total remuneration payable by the Group to our auditors.

The total remuneration payable by the Group, excluding VAT and any overseas equivalent thereof, to its principal auditors, Ernst & Young LLP, and its associates is shown below.

	2011				
	Audit fees £m	Audit-related fees £m	Tax services £m	Other services £m	Total fees £m
Fees payable to Ernst & Young LLP (E&Y LLP) for the statutory audit of the Aviva Group and Company financial statements	2.5	—	—	—	2.5
Fees payable to E&Y LLP and its associates for other services to Group companies:					
Audit of Group subsidiaries pursuant to legislation	12.8	—	—	—	12.8
Additional fees related to the prior year audit of Group subsidiaries pursuant to legislation	0.9	—	—	—	0.9
Other services pursuant to legislation	2.7	—	—	—	2.7
Supplementary reporting	—	1.8	—	—	1.8
Tax services	—	—	0.2	—	0.2
All other fees:					
Services relating to corporate finance transactions	—	0.9	—	—	0.9
Services relating to information technology	—	—	—	0.3	0.3
Other supplementary services	—	3.1	—	1.9	5.0
<b>Fees payable to E&amp;Y LLP and its associates for services to Group companies classified as continuing operations</b>	<b>18.9</b>	<b>5.8</b>	<b>0.2</b>	<b>2.2</b>	<b>27.1</b>
Fees payable to E&Y LLP and its associates for services to Group companies classified as discontinued operations	—	0.3	—	—	0.3
Additional fees related to prior year audit of Group companies classified as discontinued operations	1.1	—	—	—	1.1
	<b>20.0</b>	<b>6.1</b>	<b>0.2</b>	<b>2.2</b>	<b>28.5</b>
	2010				
	Audit fees £m	Audit-related fees £m	Tax services £m	Other services £m	Total fees £m
Fees payable to E&Y LLP for the statutory audit of the Aviva Group and Company financial statements	1.8	—	—	—	1.8
Fees payable to E&Y LLP and its associates for other services to Group companies:					
Audit of Group subsidiaries pursuant to legislation	11.2	—	—	—	11.2
Additional fees related to the prior year audit of Group subsidiaries pursuant to legislation	0.6	—	—	—	0.6
Other services pursuant to legislation	2.5	—	—	—	2.5
Audit of Group pension scheme	—	0.1	—	—	0.1
Supplementary reporting	—	1.8	—	—	1.8
Tax services	—	—	0.1	—	0.1
All other fees:					
Services relating to corporate finance transactions	—	—	—	0.5	0.5
Other supplementary services	—	2.5	—	0.2	2.7
<b>Fees payable to E&amp;Y LLP and its associates for services to Group companies classified as continuing operations</b>	<b>16.1</b>	<b>4.4</b>	<b>0.1</b>	<b>0.7</b>	<b>21.3</b>
Fees payable to E&Y LLP and its associates for services to Group companies classified as discontinued operations	2.5	0.9	—	0.9	4.3
	<b>18.6</b>	<b>5.3</b>	<b>0.1</b>	<b>1.6</b>	<b>25.6</b>

Fees payable for the audit of the Group's subsidiaries pursuant to legislation include fees for the statutory audit of the subsidiaries, both inside and outside the UK, and for the work performed by Ernst & Young LLP in respect of the subsidiaries for the purpose of the consolidated financial statements of the Group.

Other services pursuant to legislation comprise services in relation to statutory and regulatory filings. These include audit services for the audit of FSA returns in the UK and review of interim financial information under the Listing Rules of the UK Listing Authority.

Fees for Supplementary reporting are in respect of the audit of the Group's MCEV reporting. Although embedded value is a primary management reporting basis and our disclosures require a full audit, the relevant fees are not classified as being for statutory audit.

Fees for corporate finance transactions in 2011 relates to work performed on the partial disposal of Delta Lloyd and the US subordinated debt issue.

The 2011 fees for Other supplementary services for continuing operations includes £0.5 million (2010: £0.4 million) for assurance services in connection with the Group's Financial Reporting Control Framework; £1.6 million (2010: £1.1 million) for examination of the Group's Individual Capital Assessment (ICA) and Economic Capital and £2.9 million (2010: £1.2 million) for other services, which includes £0.9 million relating to two risk management effectiveness reviews.

### 13 – Tax

This note analyses the tax (credit)/charge for the year and explains the factors that affect it.

#### (a) Tax (credited)/charged to the income statement

(i) The total tax (credit)/charge comprises:

	2011 £m	2010 £m
<b>Continuing operations</b>		
<b>Current tax</b>		
For this year	539	583
Prior year adjustments	(16)	(44)
Total current tax from continuing operations	523	539
<b>Deferred tax</b>		
Origination and reversal of temporary differences	(514)	280
Changes in tax rates or tax laws	(28)	(35)
Write-down/(back) of deferred tax assets	70	(67)
Total deferred tax from continuing operations	(472)	178
Total tax charged to income statement from continuing operations	51	717
Total tax (credited)/charged to income statement from discontinued operations	(202)	225
Total tax (credited)/charged to income statement	(151)	942

(ii) The Group, as a proxy for policyholders in the UK, Ireland and Singapore, is required to record taxes on investment income and gains each year. Accordingly, the tax benefit or expense attributable to UK, Irish and Singapore life insurance policyholder returns is included in the tax (credit)/charge. The tax credit attributable to policyholders' returns included in the credit above is £178 million (2010: £394 million charge).

(iii) The tax (credit)/charge can be analysed as follows:

	2011 £m	2010 £m
UK tax	(304)	447
Overseas tax	153	495
	(151)	942

(iv) Unrecognised tax losses and temporary differences of previous years were used to reduce the current tax expense and deferred tax expense by £25 million and £108 million (2010: £34 million and £88 million), respectively.

(v) Deferred tax (credited)/charged to the income statement represents movements on the following items:

	2011 £m	2010 £m
<b>Continuing operations</b>		
Long-term business technical provisions and other insurance items	939	42
Deferred acquisition costs	96	223
Unrealised (losses)/gains on investments	(1,265)	175
Pensions and other post-retirement obligations	2	23
Unused losses and tax credits	105	24
Subsidiaries, associates and joint ventures	1	2
Intangibles and additional value of in-force long-term business	(99)	(111)
Provisions and other temporary differences	(251)	(200)
Deferred tax (credited)/charged to income statement from continuing operations	(472)	178
Deferred tax (credited)/charged to income statement from discontinued operations	(41)	220
Total deferred tax (credited)/charged to income statement	(513)	398

**13 – Tax continued****(b) Tax charged/(credited) to other comprehensive income**

(i) The total tax charge comprises:

	2011 £m	2010 £m
Current tax from continuing operations		
In respect of pensions and other post-retirement obligations	(88)	(29)
In respect of foreign exchange movements	(8)	(5)
	(96)	(34)
Deferred tax from continuing operations		
In respect of pensions and other post-retirement obligations	260	(3)
In respect of fair value gains on owner-occupied properties	(1)	2
In respect of unrealised gains on investments	98	151
	357	150
Tax charged to other comprehensive income arising from continuing operations	261	116
Tax credited to other comprehensive income arising from discontinued operations	(3)	(4)
<b>Total tax charged to other comprehensive income</b>	<b>258</b>	<b>112</b>

(ii) The tax charge attributable to policyholders' returns included above is £nil (2010: £nil).

**(c) Tax credited to equity**

Tax credited directly to equity in the year amounted to £16 million (2010: £17 million), and is wholly in respect of coupon payments on direct capital instruments.

**(d) Tax reconciliation**

The tax on the Group's (loss)/profit before tax differs from the theoretical amount that would arise using the tax rate of the home country of the Company as follows:

	2011		
	Shareholder £m	Policy- holder £m	Total £m
<b>Total profit/(loss) before tax</b>	<b>87</b>	<b>(178)</b>	<b>(91)</b>
Tax calculated at standard UK corporation tax rate of 26.5%	23	(47)	(24)
Reconciling items			
Different basis of tax – policyholders	—	(129)	(129)
Adjustment to tax charge in respect of prior years	(25)	—	(25)
Non-assessable income	(60)	—	(60)
Non-taxable profit on sale of subsidiaries and associates	(135)	—	(135)
Disallowable expenses	215	—	215
Different local basis of tax on overseas profits	84	(2)	82
Change in future local statutory tax rates	(32)	—	(32)
Movement in deferred tax not recognised	(5)	—	(5)
Tax effect of profit from associates and joint ventures	(41)	—	(41)
Other	3	—	3
<b>Total tax charged/(credited) to income statement</b>	<b>27</b>	<b>(178)</b>	<b>(151)</b>

	2010		
	Shareholder £m	Policy- holder £m	Total £m
Total profit before tax	2,440	394	2,834
Tax calculated at standard UK corporation tax rate of 28%	684	110	794
Reconciling items			
Different basis of tax – policyholders	—	272	272
Adjustment to tax charge in respect of prior years	(28)	—	(28)
Non-assessable income	(93)	—	(93)
Non-taxable profit on sale of subsidiaries and associates	(44)	—	(44)
Disallowable expenses	142	—	142
Different local basis of tax on overseas profits	95	—	95
Change in future local statutory tax rates	(26)	—	(26)
Movement in deferred tax not recognised	(156)	—	(156)
Tax effect of profit from associates and joint ventures	(4)	—	(4)
Other	(22)	12	(10)
<b>Total tax charged to income statement</b>	<b>548</b>	<b>394</b>	<b>942</b>

### 13 – Tax continued

The tax (credit)/charge attributable to policyholders' returns is removed from the Group's total (loss)/profit before tax in arriving at the Group's profits before tax attributable to shareholders' profits. As the net of tax profits attributable to with-profit and unit-linked policyholders is zero, the Group's pre-tax (loss)/profit attributable to policyholders is an amount equal and opposite to the tax (credit)/charge attributable to policyholders included in the total tax (credit)/charge. The difference between the policyholder tax (credit)/charge and the impact of this item in the tax reconciliation can be explained as follows:

	2011 £m	2010 £m
Tax attributable to policyholder returns	(178)	394
UK corporation tax at a rate of 26.5% (2010: 28%) in respect of the policyholder tax deduction	47	(110)
Other life insurance regime impacts	—	(12)
Different local basis of tax on overseas profits	2	—
Different basis of tax – policyholders per tax reconciliation	(129)	272

A reduction in the UK corporation tax rate from 28% to 26% was substantively enacted in March 2011 and was effective from 1 April 2011. A further reduction from 26% to 25% was substantively enacted in July 2011 and will be effective from 1 April 2012. Accordingly, these rates have been applied in the measurement of the Group's deferred tax assets and liabilities as at 31 December 2011.

In addition, the Government announced its intention to further reduce the UK corporation tax rate to 24% from 1 April 2013 and to 23% from 1 April 2014. The aggregate impact of the proposed reductions from 25% to 23% would reduce the deferred tax assets and deferred tax liabilities by approximately £60 million.

Considerable changes to the regime for taxing UK life insurance companies will be made with effect from 1 January 2013. Draft legislation on this was included in the draft 2012 Finance Bill published on 6 December 2011, and consultation on the changes and the draft legislation has continued since then. Based on the draft legislation published in December 2011 and the continued consultation, it is not expected that these changes will have a material impact on the deferred tax assets and liabilities shown in the consolidated statement of financial position.

### 14 – Earnings per share

This note shows how we calculate earnings per share, based both on the present shares in issue (the basic earnings per share) and the potential future shares in issue, including conversion of share options granted to employees (the diluted earnings per share). We have also shown the same calculations based on our operating profit as we believe this gives a better indication of operating performance.

#### (a) Basic earnings per share

(i) The profit attributable to ordinary shareholders is:

	2011		
	Operating profit £m	Non- operating items £m	Total £m
<b>Continuing operations</b>			
Profit before tax attributable to shareholders' profits	2,312	(1,465)	847
Share of Delta Lloyd's tax expense as an associate	(39)	5	(34)
Profit before tax	2,273	(1,460)	813
Tax attributable to shareholders' profits	(625)	396	(229)
Profit for the year	1,648	(1,064)	584
Amount attributable to non-controlling interests	(150)	109	(41)
Cumulative preference dividends for the year	(17)	—	(17)
Coupon payments in respect of direct capital instruments (DCI) (net of tax)	(43)	—	(43)
Profit attributable to ordinary shareholders from continuing operations	1,438	(955)	483
Loss attributable to ordinary shareholders from discontinued operations	93	(411)	(318)
<b>Profit attributable to ordinary shareholders</b>	<b>1,531</b>	<b>(1,366)</b>	<b>165</b>

## 14 – Earnings per share continued

	2010		
	Operating profit £m	Non-operating items £m	Total £m
<b>Continuing operations</b>			
Profit before tax attributable to shareholders' profits	2,026	(481)	1,545
Tax attributable to shareholders' profits	(529)	206	(323)
Profit for the year	1,497	(275)	1,222
Amount attributable to non-controlling interests	(123)	6	(117)
Cumulative preference dividends for the year	(17)	—	(17)
Coupon payments in respect of direct capital instruments (DCI) (net of tax)	(42)	—	(42)
Profit attributable to ordinary shareholders from continuing operations	1,315	(269)	1,046
Profit attributable to ordinary shareholders from discontinued operations	219	139	358
<b>Profit attributable to ordinary shareholders</b>	<b>1,534</b>	<b>(130)</b>	<b>1,404</b>

(ii) Basic earnings per share is calculated as follows:

	2011		
	Before tax £m	Net of tax, non-controlling interests, preference dividends and DCI £m	Per share pence
<b>Continuing operations</b>			
Operating profit attributable to ordinary shareholders	2,312	1,438	50.5
Non-operating items:			
Investment return variances and economic assumption changes on long-term business (note 8)	(796)	(476)	(16.7)
Short-term fluctuation in return on investments backing non-long-term business (note 9a)	(266)	(198)	(7.0)
Economic assumption changes on general insurance and health business (note 9a)	(90)	(67)	(2.4)
Impairment of goodwill, associates and joint ventures (note 16a, 19dii)	(392)	(359)	(12.6)
Amortisation and net impairment of intangibles (note 17)	(171)	(178)	(6.3)
Profit on the disposal of subsidiaries and associates (note 3b)	565	552	19.5
Integration and restructuring costs and exceptional items (note 6)	(325)	(244)	(8.5)
Share of Delta Lloyd's non-operating items (before tax) as an associate	10	15	0.5
Share of Delta Lloyd's tax expense as an associate	(34)	—	—
Profit attributable to ordinary shareholders from continuing operations	813	483	17.0
Loss attributable to ordinary shareholders from discontinued operations	(726)	(318)	(11.2)
<b>Profit attributable to ordinary shareholders</b>	<b>87</b>	<b>165</b>	<b>5.8</b>

## 14 – Earnings per share continued

	2010		
	Before tax £m	Net of tax, non- controlling interests, preference dividends and DCI £m	Per share pence
Continuing operations			
Operating profit attributable to ordinary shareholders	2,026	1,315	47.2
Non-operating items:			
Investment return variances and economic assumption changes on long-term business (note 8)	(219)	(90)	(3.2)
Short-term fluctuation in return on investments backing non-long-term business (note 9a)	(199)	(157)	(5.6)
Economic assumption changes on general insurance and health business (note 9a)	(61)	(44)	(1.6)
Impairment of goodwill, associates and joint ventures (note 16a, 19dii)	(23)	(23)	(0.9)
Amortisation and net impairment of intangibles (note 17)	(193)	(115)	(4.1)
Profit on the disposal of subsidiaries and associates (note 3b)	163	163	5.9
Integration and restructuring costs and exceptional items (note 6)	51	(3)	(0.1)
Profit attributable to ordinary shareholders from continuing operations	1,545	1,046	37.6
Profit attributable to ordinary shareholders from discontinued operations	895	358	12.8
Profit attributable to ordinary shareholders	2,440	1,404	50.4

(iii) The calculation of basic earnings per share uses a weighted average of 2,845 million (2010: 2,784 million) ordinary shares in issue, after deducting shares owned by the employee share trusts. The actual number of shares in issue at 31 December 2011 was 2,906 million (2010: 2,820 million) and 2,892 million (2010: 2,812 million) excluding shares owned by the employee share trusts.

**(b) Diluted earnings per share**

(i) Diluted earnings per share are calculated as follows:

	2011		
	Total £m	Weighted average number of shares million	Per share pence
Profit attributable to ordinary shareholders	483	2,845	17.0
Dilutive effect of share awards and options	—	50	(0.3)
<b>Diluted earnings per share from continuing operations</b>	<b>483</b>	<b>2,895</b>	<b>16.7</b>
Loss attributable to ordinary shareholders	(318)	2,845	(11.2)
Dilutive effect of share awards and options	—	50	—
<b>Diluted loss per share from discontinued operations*</b>	<b>(318)</b>	<b>2,895</b>	<b>(11.2)</b>
<b>Diluted earnings per share</b>	<b>165</b>	<b>2,895</b>	<b>5.7</b>

\*The effect of future share awards and options in the loss from discontinued operations is anti-dilutive, therefore the diluted earnings per share has been maintained at (11.2) pence.

## 14 – Earnings per share continued

	2010		
	Total £m	Weighted average number of shares million	Per share pence
Profit attributable to ordinary shareholders	1,046	2,784	37.6
Dilutive effect of share awards and options	—	47	(0.6)
<b>Diluted earnings per share from continuing operations</b>	<b>1,046</b>	<b>2,831</b>	<b>37.0</b>
Profit attributable to ordinary shareholders	358	2,784	12.8
Dilutive effect of share awards and options	—	47	(0.2)
<b>Diluted earnings per share from discontinued operations</b>	<b>358</b>	<b>2,831</b>	<b>12.6</b>
<b>Diluted earnings per share</b>	<b>1,404</b>	<b>2,831</b>	<b>49.6</b>

(ii) Diluted earnings per share on operating profit attributable to ordinary shareholders is calculated as follows:

	2011		
	Total £m	Weighted average number of shares million	Per share pence
Operating profit attributable to ordinary shareholders	1,438	2,845	50.5
Dilutive effect of share awards and options	—	50	(0.8)
<b>Diluted operating profit per share from continuing operations</b>	<b>1,438</b>	<b>2,895</b>	<b>49.7</b>
Operating profit attributable to ordinary shareholders	93	2,845	3.3
Dilutive effect of share awards and options	—	50	(0.1)
<b>Diluted operating profit per share from discontinued operations</b>	<b>93</b>	<b>2,895</b>	<b>3.2</b>
<b>Diluted operating profit per share</b>	<b>1,531</b>	<b>2,895</b>	<b>52.9</b>

	2010		
	Total £m	Weighted average number of shares million	Per share pence
Operating profit attributable to ordinary shareholders	1,315	2,784	47.2
Dilutive effect of share awards and options	—	47	(0.7)
<b>Diluted operating profit per share from continuing operations</b>	<b>1,315</b>	<b>2,831</b>	<b>46.5</b>
Operating profit attributable to ordinary shareholders	219	2,784	7.9
Dilutive effect of share awards and options	—	47	(0.2)
<b>Diluted operating profit per share from discontinued operations</b>	<b>219</b>	<b>2,831</b>	<b>7.7</b>
<b>Diluted operating profit per share</b>	<b>1,534</b>	<b>2,831</b>	<b>54.2</b>

## 15 – Dividends and appropriations

This note analyses the total dividends and other appropriations we paid during the year. The table below does not include the final dividend proposed after the year end because it is not accrued in these financial statements. The impact of shares issued in lieu of dividends is shown separately in note 36.

	2011 £m	2010 £m
Ordinary dividends declared and charged to equity in the period		
Final 2010 – 16.00 pence per share, paid on 17 May 2011	451	—
Final 2009 – 15.00 pence per share, paid on 17 May 2010	—	415
Interim 2011 – 10.00 pence per share, paid on 17 November 2011	287	—
Interim 2010 – 9.50 pence per share, paid on 17 November 2010	—	266
	<b>738</b>	681
Preference dividends declared and charged to equity in the year	17	17
Coupon payments on direct capital instruments	58	59
	<b>813</b>	757

Subsequent to 31 December 2011, the directors proposed a final dividend for 2011 of 16.0 pence per ordinary share (2010: 16.0 pence), amounting to £465 million (2010: £451 million) in total. Subject to approval by shareholders at the AGM, the dividend will be paid on 17 May 2012 and will be accounted for as an appropriation of retained earnings in the year ending 31 December 2012.

Interest on the direct capital instruments issued in November 2004 is treated as an appropriation of retained profits and, accordingly, it is accounted for when paid. Tax relief is obtained at a rate of 26.5% (2010: 28.0%).

## 16 – Goodwill

This note analyses the changes to the carrying amount of goodwill during the year, and details the results of our impairment testing on both goodwill and intangible assets with indefinite lives.

### (a) Carrying amount

	2011 £m	2010 £m
<b>Gross amount</b>		
At 1 January	3,671	3,667
Acquisitions and additions (note 3a)	13	29
Fair value adjustments and movements in contingent consideration	—	(4)
Disposals	(284)	(4)
Deconsolidation of Delta Lloyd	(542)	—
Foreign exchange rate movements	(8)	(17)
At 31 December	<b>2,850</b>	3,671
<b>Accumulated impairment</b>		
At 1 January	(280)	(286)
Impairment losses charged to expenses	(160)	(3)
Deconsolidation of Delta Lloyd	226	—
Foreign exchange rate movements	4	9
At 31 December	<b>(210)</b>	(280)
<b>Carrying amount at 1 January</b>	<b>3,391</b>	3,381
<b>Carrying amount at 31 December</b>	<b>2,640</b>	3,391

Goodwill impairment charges of £160 million have been recognised as expenses. Together with impairment charges of £15 million recognised in respect of goodwill within interests in joint ventures (note 18), the goodwill write down for the year was £175 million.

Goodwill disposed of during the year relates to the sale of the RAC business (see note 3(b)).

As described in note 3(b), the Group's interest in Delta Lloyd was deconsolidated during the year, resulting in the derecognition of goodwill balances associated with this entity.

## 16 – Goodwill continued

### (b) Goodwill allocation and impairment testing

A summary of the goodwill and intangibles with indefinite useful lives allocated to cash-generating units is presented below.

	Carrying amount of goodwill		Carrying amount of intangibles with indefinite useful lives (detailed in note 17)		Total	
	2011 £m	2010 £m	2011 £m	2010 £m	2011 £m	2010 £m
United Kingdom						
Long-term business (see (i) below)	—	29	—	—	—	29
General insurance and health (see (ii) below)	<b>924</b>	1,208	—	201	<b>924</b>	1,409
Europe						
France (long-term business) (see (iii) below)	—	—	<b>52</b>	53	<b>52</b>	53
Ireland						
Long-term business (see (iv) below)	—	118	—	—	—	118

Italy						
Long-term business (see (vi) below)	<b>64</b>	65	—	—	<b>64</b>	65
General insurance and health (see (vii) below)	<b>44</b>	56	—	—	<b>44</b>	56
Delta Lloyd	—	307	—	—	—	307
Spain (long-term business) (see (viii) below)	<b>542</b>	556	—	—	<b>542</b>	556
Other	<b>11</b>	12	—	—	<b>11</b>	12
North America						
United States (long-term business) (see (ix) below)	<b>800</b>	795	—	—	<b>800</b>	795
United States (fund management)	<b>29</b>	28	—	—	<b>29</b>	28
Canada	<b>50</b>	44	—	—	<b>50</b>	44
Asia Pacific						
Various	<b>60</b>	54	—	—	<b>60</b>	54
	<b>2,640</b>	3,391	<b>52</b>	254	<b>2,692</b>	3,645

As explained in accounting policy N, the carrying amount of goodwill and intangible assets with indefinite useful lives is reviewed at least annually or when circumstances or events indicate there may be uncertainty over this value. The tests led to impairment of goodwill of £160 million in 2011 (2010: £3 million).

Goodwill and intangibles with indefinite useful lives have been tested for impairment in these businesses as follows:

#### United Kingdom

##### (i) Long-term business

As part of the annual review of goodwill, management have considered the recoverability of the goodwill balance associated with the two cash generating units representing the UK Creditor Life business and the UK Occupational Health business. As a result of deteriorating prospects for these businesses, management have concluded that the goodwill in these businesses is no longer recoverable and an impairment of £29 million has been recognised as an expense in the consolidated income statement during the year.

##### (ii) General insurance and health

The recoverable amount of the UK General Insurance and health business exceeds the carrying value of the cash-generating unit including goodwill.

The recoverable amount of the UK general insurance and health unit has been determined based on a value in use calculation. The calculation uses cash flow projections based on business plans approved by management covering a three-year period. Cash flows beyond that three-year period have been extrapolated using a steady 1.25% (2010: 2.5%) growth rate and a risk-adjusted discount rate of 8.2% (2010: 9.3%). This growth rate is set with regards to past experience and historical statistics of UK premium growth published by the Association of British Insurers.

Key assumptions used for the calculation were:

- Budgeted operating profit represents the operating profit in the business plans, approved by management, and as such reflects the best estimate of future profits based on both historical experience and expected growth rates for the relevant UK industry sectors;
- Some of the assumptions that underline the budgeted operating profit include market share, customer numbers, premium rate and fee income changes, claims inflation and commission rates; and
- Growth rates represent the rates used to extrapolate future cash flows beyond the business plan period and have been based upon latest information available regarding future and past growth rates, including external sources of data such as ABI Annual Market Statistics.

Following its disposal, the RAC business no longer forms part of this cash-generating unit.

## 16 – Goodwill continued

### Europe

#### (i) Long-term business

The recoverable amount of long-term business cash-generating units in the Europe region, with the exception of France, was determined based on a value in use calculation. The first step of the test was to compare the carrying value of each cash-generating unit, including goodwill, to the MCEV of that cash-generating unit. If the MCEV is less than the carrying value of a cash generating unit, the present value of profits from expected new business for that cash-generating unit is considered. If the value of profits from expected new business for a cash-generating unit is expected to grow beyond the period of the initial plan, this growth rate is set with regard to past experience in each market and market expectations of future growth in each country.

For European long-term business cash-generating units, with the exception of France, a key assumption used for the calculation was the embedded value which represents the shareholder interest in the life business and is calculated in accordance with the MCEV principles. The embedded value is the total of the net worth and the value of the in-force life business.

#### (ii) General insurance, health and other

The recoverable amount of general insurance, health and other non-life cash-generating units in Europe was determined based on a value in use calculation. Value in use is calculated for each cash-generating unit using a discounted cash flow projection based on business plans and growth assumptions approved by management for each cash-generating unit and discounted at a risk discount rate appropriate for each cash-generating unit. If the cash flows are expected to grow beyond the period of the initial plan, this growth rate is set with regard to past experience in each market and market expectations of future growth in each country.

#### (iii) France (long-term business)

The recoverable amount of the indefinite life intangible asset has been assessed based on the fair value less costs to sell of the cash-generating unit to which it relates. The fair value less costs to sell was determined based on the quoted market value of the share of interest in the subsidiary to which it relates. The fair value less costs to sell of the cash-generating unit was greater than its carrying value, including indefinite life intangible assets.

#### (iv) Ireland (long-term business)

Following the announcement of the termination of Aviva Ireland's bancassurance distribution contract (see note 3(d)), management have concluded that the goodwill associated with the Irish long-term business is not recoverable as a result of the reduction in expected volumes of future new business. A goodwill impairment loss of £120 million has therefore been recognised, reducing the carrying value of goodwill relating to this business to £nil.

#### (v) Ireland (general insurance and health)

The recoverable amount of the Irish general insurance and health business exceeds the carrying value of the cash-generating unit, including goodwill.

Key assumptions used for the calculation were:

- Budgeted operating profit for an initial three-year period which represents the operating profit in the business plans, approved by management and reflecting the best estimate of future profits based on both historical experience and expected growth rates for the Irish economy. The assumptions that underlie the budgeted operating profit include market share, premium rate changes, claims inflation and commission rates;
- Future cash flows are extrapolated beyond the three-year business plan period assuming 2% (2010: nil) growth for general insurance business and a nil growth rate for the health business; and
- A risk-adjusted discount rate of 13.7% (2010: 10.8%).

The recoverable amount for the cash-generating unit exceeds its carrying value by £6 million. An increase in the risk adjusted discount rate by 27 basis points would result in the recoverable amount being equal to the carrying value.

#### (vi) Italy (long-term business)

The recoverable amount calculation is an actuarially determined appraisal value and is based on the embedded value of the business together with the present value of expected profits from future new business.

Key assumptions (in addition to MCEV principles) used for the calculation were:

- New business contribution represents the present value of projected future profits generated from business written in a period. This is initially based on the most recent three-year business plans approved by management;
- Growth rate represents the rate used to extrapolate new business contributions beyond the business plan period, and is based on management's estimate of future growth of 3% (2010: 3%); and
- Risk-adjusted discount rate of 4.85% (2010: 6.5%) represents the rate used to discount expected profits from future new business. The discount rate is a combination of a risk-free rate and a risk margin to make prudent allowance for the risk that experience in future years for new business may differ from that assumed. The MCEV principles applied to project future cash flows include allowance for many of the risks associated with these cash flows, and therefore these risks are not also reflected in the discount rate applied to calculate a present value of future cash flows.

The recovery of goodwill in the Italy long-term business is dependent on future performance being in line with current plans. The future performance assumptions are inherently uncertain and dependant on local economic conditions.

## 16 – Goodwill continued

### (vii) Italy (non-life)

The recoverable amount exceeds the carrying value of the cash-generating units including goodwill.

Key assumptions used for the calculation were:

- Budgeted operating profit for an initial three-year period represents the operating profit in the most recent business plans, approved by management and as such reflects the best estimate of future profits based on both historical experience and expected growth rates for the Italian economy; and
- Growth rate of 3% (2010: 3%) represents the rate used to extrapolate future cash flows beyond the business plan period; and
- a risk-adjusted discount rate of 10.3% (2010: 10.8%).

As a result of this test, an impairment of £11 million has been recognised in respect of Aviva Assicurazioni Vita Spa. The impairment arose as a result of a reduction in management's estimates for the future profitability of the business due to current economic circumstances.

The recoverable amount of the Avipop Assicurazioni cash-generating unit exceeds its carrying value by £1.3million. An adjustment to the discount rate used to calculate the present value of expected future profits of 100 basis points would result in the recoverable amount being equal to the carrying value.

### (viii) Spain (long-term business)

The recoverable amount of the Spanish long-term business exceeds the carrying value of the cash-generating unit including goodwill. This calculation is an actuarially determined appraisal value and is based on the embedded value of the business together with the present value of expected profits from future new business.

Key assumptions (in addition to MCEV principles) used for the calculation were:

- New business contribution represents the present value of projected future profits generated from business written in a period. This is initially based on the most recent three-year business plans approved by management;
- Growth rate represents the rate used to extrapolate new business contributions beyond the business plan period, and is based on management's estimate of future growth of 3% (2010: 3%); and
- Risk-adjusted discount rate of 5.3% (2010: 5.6%) represents the rate used to discount expected profits from future new business. The discount rate is a combination of a risk-free rate and a risk margin to make prudent allowance for the risk that experience in future years for new business may differ from that assumed. The MCEV principles applied to project future cash flows include allowance for many of the risks associated with these cash flows, and therefore these risks are not also reflected in the discount rate applied to reach a present value.

In addition to estimating the recoverable value of the Spain cash-generating unit, management considered the terms of the contractual arrangements with bancassurance partners. Management further considered the range of outcomes from the ongoing re-organisation of the Caja market and insurance distribution arrangements mandated by the Spanish government, including ongoing arbitration with one of our bancassurance partners. Management concluded that, under a range of reasonably possible scenarios, the contractual terms support the recoverability of the carrying value of the cash-generating unit.

### (ix) United States (long-term business)

The recoverable amount of the US long-term business exceeds the carrying value of the cash-generating unit including goodwill.

The recoverable amount of the US long-term cash-generating unit has been determined based on a value in use calculation.

This calculation is an actuarially determined appraisal value and is based on an embedded value of the business (the total of the net worth of the life business and the value of the in-force business) together with the present value of expected profits from future new business.

Key assumptions used for the calculation were:

- Embedded value represents the shareholder interest in the life business and is based on projected cash flows of the business including expected investment returns;
- Risk-adjusted discount rate of 8% (2010: 8%) is used to calculate the embedded value;
- New business contribution represents the present value of projected future profits generated from business written in a period. This is initially based on the most recent three-year business plans approved by management;
- Growth rate represents the rate used to extrapolate new business contributions beyond the business plan period, and is based on management's estimate of future growth of 5% (2010: 3%) for life business and 3% (2010: 3%) for annuity business, which is set with regard to past experience in these markets; and
- Risk-adjusted discount rate of 10% (2010: 10%) represents the rate used to discount expected profits from future new business. The discount rate includes an additional margin to make prudent allowance for the risk that experience in future years for new business may differ from that assumed.

### Cash flow projections

To comply with paragraph 33(c) of IAS 36, cash flow projections for the period beyond the three-year plan period are extrapolated from the position in the final year of the three-year plan period. In all cases, we have assumed a positive or nil steady growth rate for subsequent years, not an increasing growth rate. The steady growth rate selected for each cash-generating unit reflects long-term expectations for the markets in which each cash-generating unit participates.

Impairment tests for all cash-generating units have been performed using assumptions which management believe are reasonable. Except where specifically noted in the discussion of impairment testing above, given the magnitude of the excess of recoverable value over carrying amount in each case, management believe that it is not reasonably possible that there would be a change in the key assumptions such that the carrying amount would exceed the recoverable value.

## 17 – Acquired value of in-force business (AVIF) and intangible assets

This note shows the movements in cost and amortisation of the in-force business and intangible assets acquired when we have purchased subsidiaries.

\* On insurance and participating investment contracts.

\*\*On non-participating investment contracts.

- (a) Intangible assets with indefinite useful lives comprise the RAC brand (until disposal on 30 September 2011), and the value of the Union Financière de France Banque distribution channel, where the existing lives of the assets and their competitive position in, and the stability of, their respective markets support this classification. Impairment testing of these intangibles is covered in note 16(b).
- (b) Acquisitions of intangible assets with finite lives relate to Canadian broker businesses.
- (c) Other intangible assets with finite useful lives consist primarily of the value of bancassurance and other distribution agreements.
- (d) Impairment losses on intangible assets with finite lives arise from the assessment of the recoverable amount of the Ireland long-term insurance business. The methods and assumptions used in this assessment are as discussed in Note 16(b)(iv). This assessment resulted in an impairment of £44 million. Other impairments have arisen in the French long-term insurance business. Impairment losses in respect of AVIF on insurance contracts have arisen in the US long-term business.

## 18 – Interests in, and loans to, joint ventures

In several business units, Group companies and other parties jointly control certain entities. This note analyses these interests and describes the principal joint ventures in which we are involved.

### (a) Carrying amount

(i) The movements in the carrying amount comprised:

	Goodwill and intangibles £m	Equity interests £m	Loans £m	Total £m
<b>At 1 January 2010</b>	202	1,172	327	1,701
Share of results before tax	—	180	—	180

Additions	—	59	18	77
Reclassification to subsidiary	—	—	(282)	(282)
Reduction in Group interest	—	(1)	—	(1)
Disposals	—	(37)	—	(37)
Share of gains taken to other comprehensive income	—	7	—	7
Loans repaid	—	—	(17)	(17)
Foreign exchange rate movements	(19)	(4)	6	(17)
<b>At 31 December 2011</b>	147	1,465	100	1,712
Less: Amounts classified as held for sale	—	(12)	—	(12)
	147	1,453	100	1,700

\*Comprises amortisation of AVIF on insurance contracts of £3 million (2010: £2 million) and other intangibles of £3 million (2010: £5 million).

During 2010, the Group's Taiwan joint venture, First-Aviva Life Insurance Co., Ltd., was classified as held for sale following the decision of management to seek to dispose of the business. A sale of this business was not completed in 2011 and management have reviewed its classification as held for sale and determined that the classification remains appropriate. The disposal is expected to be completed within 12 months of the balance sheet date.

On 11 November 2010, the Group entered into a joint venture agreement with Vietnam Joint-stock Commercial Bank for Industry and Trade ('Vietinbank') to set up a green-field life insurance company, Vietinbank Aviva Life Insurance Limited. Regulatory approval was received in September 2011 and the company was capitalised on 4 October 2011. Aviva has a 49.99% shareholding in this joint venture, with an initial cost of £12 million. Other additions relate to Aviva-COFCO Life Insurance Co. Limited and property management undertakings. Disposals and reductions in Group interests relate to property management undertakings.

## 18 – Interests in, and loans to, joint ventures continued

The Group's principal interests in property management joint ventures are listed below.

(ii) The balances at 31 December comprised:

	Goodwill and intangibles £m	Equity interests £m	Loans £m	Total £m
<b>2011</b>				
Property management undertakings	—	1,145	100	1,245
Long-term business undertakings	147	315	—	462
General insurance undertakings	—	5	—	5
<b>Total</b>	<b>147</b>	<b>1,465</b>	<b>100</b>	<b>1,712</b>
<b>2010</b>				
Property management undertakings	—	1,195	375	1,570
Long-term business undertakings	187	246	—	433
General insurance undertakings	—	5	—	5
<b>Total</b>	<b>187</b>	<b>1,446</b>	<b>375</b>	<b>2,008</b>

The loans are not secured and no guarantees were received in respect thereof. They are interest-bearing and are repayable on termination of the relevant partnership.

### (b) Property management undertakings

The principal joint ventures are as follows:

Company	GP proportion held	PLP proportion held
Airport Property Partnership	50.00%	50.00%
Ashtenne Industrial Fund Limited Partnership	67.70%	37.43%
The Mall Limited Partnership	50.00%	50.52%
Queensgate Limited Partnership	50.00%	50.00%
Quercus Healthcare Property Partnership Limited	50.00%	28.34%
The Southgate Limited Partnership	50.00%	50.00%
20 Gracechurch Street Limited Partnership	50.00%	50.00%

All the above entities perform property ownership and management activities, and are incorporated and operate in the UK. All these investments are held by subsidiary entities.

### (c) Long-term business undertakings

The principal joint ventures are as follows:

Company	Proportion held	Country of incorporation and operation
Aviva-COFCO Life Insurance Co. Limited	50.00%	China
AvivaSA Emeklilik ve Hayat A.S.	49.83%	Turkey
CIMB Aviva Assurance Berhad	49.00%	Malaysia
CIMB Aviva Takaful Berhad	49.00%	Malaysia
First-Aviva Life Insurance Co., Ltd.	49.00%	Taiwan
Vietinbank Aviva Life Insurance Limited	49.99%	Vietnam
Woori Aviva Life insurance Co. Ltd	47.31%	Korea

All investments in the above companies are unlisted and are held by subsidiaries, except for the shares in Aviva-COFCO Life Insurance Co. Limited which are held by the Company. The Group's share of net assets of that company is £150 million (2010: £115 million) which have a fair value of £150 million (2010: £115 million).

## 18 – Interests in, and loans to, joint ventures continued

### (d) Impairment testing

All interests in joint ventures have been tested for impairment but only the material items are detailed below.

#### (i) Aviva-COFCO Life Insurance Co. Limited

The Group's investment in Aviva-COFCO Life Insurance Co. Limited has been tested for impairment by comparing its carrying value with its recoverable amount. The recoverable amount has been determined based on value in use calculations. This calculation is an actuarially determined appraisal value and is based on the MCEV embedded value of the business.

The key assumptions used in the test were the MCEV principles. The MCEV of Aviva-COFCO Life Insurance Co. Limited exceeds its carrying value.

Aviva-COFCO Life Insurance Co. Limited is a developing business and the recoverability of value is reliant on future projected growth being achieved. These projections are inherently uncertain and dependent on local economic conditions.

#### (ii) CIMB Aviva Assurance Berhad and CIMB Aviva Takaful Berhad

The Group's investments in CIMB Aviva Assurance Berhad and CIMB Aviva Takaful Berhad have been tested for impairment by comparing their carrying values (which include goodwill which arose on their acquisition) with their recoverable amounts. The recoverable amounts for both the investments have been determined based on value in use calculations. This calculation is an actuarially determined appraisal value and is based on the embedded value of the business together with the present value of expected profits from future new business. The recoverable amounts exceed the carrying values of both the investments.

Key assumptions used for the calculation were:

- Cash flow projections based on:
  - (i) the policy portfolio expected at the valuation date; and
  - (ii) the future sales based on plans approved by management covering the subsequent three-year period. The cash flows from the existing policy portfolio are calculated using best estimate assumptions, which have been supported by experience investigations where available and prudent estimates typical for the market where experience investigations are not available;
- The embedded value for existing business was derived using risk free rates;
- The value in use was derived as the sum of embedded value of existing business and the new business contribution in each future year discounted using a risk adjusted discount rate of 13.9% (2010: 13.8%); and
- New sales beyond the three-year period have been extrapolated using a growth rate of 10% (2010: 10%).

CIMB Aviva Assurance Berhad and CIMB Aviva Takaful Berhad are developing businesses and the recoverability of value is reliant on the achievement of future projected growth. These projections are inherently uncertain and dependent on local economic conditions.

#### (iii) AvivaSA Emeklilik ve Hayat A.S.

The Group's investment in AvivaSA Emeklilik ve Hayat A.S. has been tested for impairment by comparing its carrying value (which includes goodwill which arose on its acquisition) with its recoverable amount.

The recoverable amount has been determined based on a value in use calculation. This calculation is an actuarially determined appraisal value and is based on the embedded value of the business together with the present value of expected profits from future new business. The recoverable amount exceeds the carrying value of the cash-generating unit including goodwill.

Key assumptions used for the calculation were:

- Embedded value represents the shareholder interest in the life business and is calculated in accordance with the MCEV principles. The embedded value is the total of the net worth of the life business and the value of the in-force business.
- New business contribution represents the present value of projected future distributable profits generated from business written in a period. This is initially based on the most recent three-year business plans approved by management.
- Growth rate represents the rate used to extrapolate new business contributions beyond the business plan period, and is based on management's estimate of future growth of 4% (2010: 3%).
- Risk adjusted discount rate of 12.8% (2010: 14.6%) represents the rate used to discount expected profits from future new business. The discount rate reflects a risk margin to make prudent allowance for the risk that experience in future years for new business may differ from that assumed.

## 18 – Interests in, and loans to, joint ventures continued

### (iv) Woori Aviva Life Insurance Co. Ltd

The Group's investment in Woori Aviva Life Insurance Co. Ltd has been tested for impairment by comparing its carrying value (which includes goodwill which arose on its acquisition) with its recoverable amount. The recoverable amount has been determined based on a value in use calculation. This calculation is an actuarially determined appraisal value and is based on the embedded value of the business together with the present value of expected profits from future new business.

Key assumptions used for the calculation were:

- Cash flow projections based on:
  - (i) the policy portfolio reported at the valuation date; and
  - (ii) the future sales based on plans approved by management covering the subsequent three-year period. The cash flows from the existing policy portfolio are calculated using best estimate assumptions, which have been supported by experience investigations where available and prudent estimates typical for the market where experience investigations are not available;
- The embedded value for existing business was derived using risk free rates;
- The value in use was derived as the sum of embedded value of existing business and the new business contribution in each future year discounted using a risk adjusted discount rate of 13.6% (2010: 14.6%); and
- New sales beyond the three-year period have been extrapolated using a growth rate of 4% (2010: 8%).

As a result of this test, an impairment of £15 million has been recognised in the income statement. Increases in the carrying value of the associate were not matched by increases in the recoverable amount calculated.

Woori Aviva Life Insurance Co. Ltd is a developing business and the recoverability of value is reliant on the achievement of future projected growth. These projections are inherently uncertain and dependent on local economic conditions.

### (e) Additional information

Summarised aggregate financial information on the Group's interests in its joint ventures is as follows:

	2011 £m	2010 £m
Income, including unrealised gains/(losses) on investments	<b>763</b>	910
Expenses	<b>(777)</b>	(730)
Share of results before tax	<b>(14)</b>	180
Long-term assets	<b>1,831</b>	1,914
Current assets	<b>2,534</b>	2,359
Share of total assets	<b>4,365</b>	4,273
Long-term liabilities	<b>(1,634)</b>	(1,466)
Current liabilities	<b>(1,266)</b>	(1,361)
Share of total liabilities	<b>(2,900)</b>	(2,827)
Share of net assets	<b>1,465</b>	1,446

The joint ventures have no significant contingent liabilities to which the Group is exposed. The Group has capital commitments to property management joint ventures of £258 million (2010: £45 million).

## 19 – Interests in, and loans to, associates

This note analyses our interests in entities which we do not control but where we have significant influence.

### (a) Carrying amount

	Goodwill and intangibles £m	Equity interests £m	Loans £m	Total £m

<b>At 31 December 2011</b>	<b>115</b>	<b>1,003</b>	<b>—</b>	<b>1,118</b>

\*2010 includes impairment of £10 million.

#### (i) Change in status of Delta Lloyd

As described in note 3(b), the Group's shareholding in Delta Lloyd N.V. ('Delta Lloyd') was reduced to 42.7%, representing 40% of shareholder voting rights, following the sale of shares on 6 May 2011. This transaction was recognised as the deconsolidation of a subsidiary and the acquisition of an associate. The Group's interest in Delta Lloyd has since been diluted to 41.91% through its offering of scrip dividends which we did not take up (shows as 'reduction in Group interests' above). Associates held by Delta Lloyd itself, previously recognised through its consolidation, were included in the deconsolidation and incorporated into the acquisition value of Delta Lloyd as an associate.

#### (ii) Additions

Additions in 2011 relate to the Group's Indian associate.

### (b) Principal associates

The principal associates included above are:

Company	Type of business	Proportion held	Country of incorporation and operation
Aviva Life Insurance Company India Limited	Insurance	26.00%	India
Delta Lloyd N.V.	Financial Services	41.91%	Netherlands

The Group controls 39.3% of the shareholder voting rights in Delta Lloyd.

All investments in principal associates are held by subsidiaries. With the exception of Delta Lloyd, all are unlisted. Delta Lloyd is listed on NYSE Euronext Amsterdam and the quoted value of the Group's investment in this company at 31 December 2011 was £776 million.

## 19 – Interests in, and loans to, associates continued

### (c) Additional information

Summarised aggregate financial information on the Group's interests in its associates is as follows:

	Delta Lloyd £m	Other £m	2011 total £m	2010 total* £m
Share of revenues	2,139	105	2,244	163
Share of results before tax	167	29	196	16
Share of assets	25,491	466	25,957	803
Share of liabilities	(24,715)	(239)	(24,954)	(240)
Share of net assets	776	227	1,003	563

\*As Delta Lloyd only became an associate in May 2011, the 2010 comparatives relate to other companies.

The Group's share of associated companies' contingent liabilities amounted to £173 million at 31 December 2011. There were no significant contingent liabilities to which the Group was exposed in 2010.

### (d) Impairment testing

All interests in associates have been tested for impairment but only the material items are detailed below.

#### (i) Aviva Life Insurance Company India Limited

The Group's investment in Aviva Life Insurance Company India Limited has been tested for impairment by comparing its carrying value (which includes goodwill which arose on their acquisition) with its recoverable amount. The recoverable amount has been determined based on a value in use calculation. This calculation is an actuarially determined appraisal value and is based on the embedded value of the business together with the present value of expected profits from future new business. The recoverable amount exceeds the carrying value of the investment.

Key assumptions used for the calculation were:

- Cash flow projections based on:
  - (i) the policy portfolio existing at the valuation date; and
  - (ii) the future sales based on plans approved by management covering the subsequent three-year period. The cash flows from the existing policy portfolio are calculated using best estimate assumptions, which have been supported by experience investigations where available and prudent estimates typical for the market where experience investigations are not available;
  - (iii) New sales beyond the three-year period have been extrapolated using an implied growth rate of 3.2% (2010: 14% for seven years and 10% thereafter).
- The embedded value for existing business was derived using risk free rates;
- The value in use was derived as the sum of the embedded value of existing business and the new business contribution in each future year discounted using a risk adjusted discount rate of 18.4% (2010: 17.3%); and

Aviva Life Insurance Company India Limited is a developing business and the recoverability of value is reliant on the achievement of future projected growth. In addition, local regulatory changes have resulted in changes to the types of product that can be sold. The growth projections are inherently uncertain and dependent on local economic and regulatory conditions.

#### (ii) Delta Lloyd N.V.

The recoverable amount of Delta Lloyd N.V. has been determined based on fair value less costs to sell. The fair value has been calculated based on the market price of ordinary shares of Delta Lloyd N.V. quoted on NYSE Euronext Amsterdam as at 31 December 2011. As a result of this test an impairment of £217 million has been recognised in respect of the associate, reducing its carrying amount to fair value.

## 20 – Property and equipment

This note analyses our tangible fixed assets, which are primarily properties occupied by Group companies and computer equipment.

	Properties under construction £m	Owner- occupied properties £m	Motor vehicles £m	Computer equipment £m	Other assets £m	Total £m

Fair value gains of £2 million (2010: £46 million loss) have been charged to other comprehensive income, with the net reversal of losses previously charged to the income statement now being credited there.

Owner-occupied properties are stated at their revalued amounts, as assessed by qualified external valuers. These values are assessed in accordance with the relevant parts of the current RICS Appraisal and Valuation Standards in the UK, and with current local valuation practices in other countries. This assessment, on the basis of existing use value and in accordance with UK Practice Statement 1.3, is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction, after proper marketing wherein the parties had acted knowledgeably, prudently and without compulsion, assuming that the buyer is granted vacant possession of all parts of the property required by the business and disregarding potential alternative uses. The valuation assessment adopts market-based evidence and is in line with guidance from the International Valuation Standards Committee and the requirements of IAS 16, *Property, Plant and Equipment*.

Similar considerations apply to properties under construction, where an estimate is made of valuation when complete, adjusted for anticipated costs to completion, profit and risk, reflecting market conditions at the valuation date.

Our West Des Moines office in the United States was only completed and occupied in 2010, so it is held at its construction cost of £87 million until the next valuation in 2013.

If owner-occupied properties were stated on a historical cost basis, the carrying amount would be £189 million (2010: £347 million).

The Group has no material finance leases for property and equipment.

## 21 – Investment property

This note gives details of the properties we hold for long-term rental yields or capital appreciation.

<b>At 31 December 2011</b>	<b>9,848</b>	<b>1,790</b>	<b>11,638</b>

Investment properties are stated at their market values as assessed by qualified external valuers. Values are calculated using a discounted cash flow approach and are based on current rental income plus anticipated uplifts at the next rent review, assuming no future growth in rental income. This uplift and the discount rate are derived from rates implied by recent market transactions on similar properties.

The fair value of investment properties leased to third parties under operating leases at 31 December 2011 was £11,552 million (2010: £12,924 million). Future contractual aggregate minimum lease rentals receivable under the non-cancellable portion of these leases are given in note 52(b)(i).

## 22 – Fair value methodology

This note explains the methodology for valuing our financial assets and liabilities carried at fair value, and provides an analysis of these according to a 'fair value hierarchy', determined by the market observability of valuation inputs.

### (a) Basis for determining fair value hierarchy of financial instruments

For financial assets and liabilities carried at fair value, we have categorised the measurement basis into a 'fair value hierarchy' as follows:

#### Quoted market prices in active markets – ('Level 1')

Inputs to Level 1 fair values are quoted prices (unadjusted) in active markets for identical assets and liabilities. An active market is one in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis. Examples are listed equities in active markets, listed debt securities in active markets and quoted unit trusts in active markets.

#### Modelled with significant observable market inputs – ('Level 2')

Inputs to Level 2 fair values are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. If the asset or liability has a specified (contractual) term, a Level 2 input must be observable for substantially the full term of the instrument. Level 2 inputs include the following:

- Quoted prices for similar (i.e. not identical) assets and liabilities in active markets.
- Quoted prices for identical or similar assets and liabilities in markets that are not active, the prices are not current, or price quotations vary substantially either over time or among market makers, or in which little information is released publicly.
- Inputs other than quoted prices that are observable for the asset or liability (for example, interest rates and yield curves observable at commonly quoted intervals, volatilities, prepayment spreads, loss severities, credit risks and default rates).
- Inputs that are derived principally from, or corroborated by, observable market data by correlation or other means (market-corroborated inputs).

Examples of these are securities measured using discounted cash flow models based on market observable swap yields, and listed debt or equity securities in a market that is inactive. Valuations, whether sourced from internal models or third parties, incorporate credit risk by adjusting the spread above the yield curve for government treasury securities for the appropriate amount of credit risk for each issuer, based on observed market transactions. To the extent observed market spreads are either not used in valuing a security, or do not fully reflect liquidity risk, our valuation methodology, whether sourced from internal models or third parties, reflects a liquidity premium.

## 22 – Fair value methodology continued

Where we use broker quotes and no information as to the observability of inputs is provided by the broker, we generally validate the price quoted by the broker by using internal models with observable inputs. When the price obtained from the broker and internal model are similar, we look to the inputs used in our internal model to understand the observability of the inputs used by the broker. In circumstances where internal models are not used to validate broker prices, and the observability of inputs used by brokers is unavailable, the investment is classified as Level 3. Broker quotes are usually non-binding.

### Modelled with significant unobservable market inputs – ('Level 3')

Inputs to Level 3 fair values are unobservable inputs for the asset or liability. Unobservable inputs may have been used to measure fair value to the extent that observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date (or market information for the inputs to any valuation models). As such, unobservable inputs reflect the assumptions the business unit considers that market participants would use in pricing the asset or liability. Examples are certain private equity investments and private placements.

The majority of the Group's financial assets and certain financial liabilities are valued based on quoted market information or observable market data. A small percentage (4.8%) of total financial assets recorded at fair value are based on estimates and recorded as Level 3 investments. Where estimates are used, these are based on a combination of independent third-party evidence and internally developed models, calibrated to market observable data where possible.

Third-party valuations using significant unobservable inputs validated against Level 2 internally modelled valuations are classified as Level 3, where there is a significant difference between the third-party price and the internally modelled value. Where the difference is insignificant, the instrument would be classified as Level 2.

### (b) Fair value hierarchy analysis

An analysis of financial assets and liabilities according to fair value hierarchy is given below:

	Fair value hierarchy						2011
	Level 1 £m	Level 2 £m	Level 3 £m	Sub-total fair value £m	Amortised cost £m	Less: Assets of operations classified as held for sale £m	Statement of financial position Total £m
Financial investments and loans (notes 25 and 23)							
Loans	—	18,486	—	18,486	9,630	—	28,116
Fixed maturity securities	103,183	42,222	7,940	153,345	—	(93)	153,252
Equity securities	31,556	644	483	32,683	—	(37)	32,646
Other investments (including derivatives)	21,902	5,530	2,945	30,377	—	(217)	30,160
<b>Total</b>	<b>156,641</b>	<b>66,882</b>	<b>11,368</b>	<b>234,891</b>	<b>9,630</b>	<b>(347)</b>	<b>244,174</b>
Financial liabilities							
Non-participating investments contracts (note 40)	42,523	1,219	248	43,990	1,669	—	45,659
Borrowings (note 48)	—	1,306	—	1,306	7,144	—	8,450
Derivative liabilities (note 49)	446	1,360	44	1,850	—	—	1,850
<b>Total</b>	<b>42,969</b>	<b>3,885</b>	<b>292</b>	<b>47,146</b>	<b>8,813</b>	<b>—</b>	<b>55,959</b>

Discussion on the valuation techniques applied to value financial liabilities carried at fair value is included in the relevant footnote disclosure for the financial liability.

For the year to 31 December 2011, transfers of financial assets from fair value hierarchy Level 1 to Level 2 amounted to £2.2 billion (2010: £517 million), and £9 million (2010: £289 million) from Level 2 to Level 1. The transfers from Level 1 to Level 2 arose primarily in France (£1.9 billion) and the UK (£0.3 billion) as a result of changes in the level of activity and environment in the markets from which prices are sourced.

For the year to 31 December 2011, there were no transfers of financial liabilities between fair value hierarchy levels (2010: £2,305 million of borrowings moved from Level 2 to Level 1).

## 22 – Fair value methodology continued

<b>Balance at 31 December</b>	<b>8,709</b>	<b>972</b>	<b>2,668</b>	<b>12,349</b>	<b>208</b>

The Group assesses the fair value hierarchy of its financial investments biannually at 30 June and 31 December. Transfers between fair value hierarchy levels are deemed to have occurred at the assessment date.

Transfers into and out of Level 3 for the year arose for the following reasons:

- Changes in the market observability of valuation inputs.
- Changes in the market observability of inputs used to validate valuations.
- Significant differences between third-party prices used for valuations and validation prices either sourced from third parties or internal models.

## 22 – Fair value methodology continued

The transfers into and out of Level 3 in 2011 are spread across our businesses in the UK, Italy, the US and France and across a number of asset classes, with no single business or asset class predominating. There are a variety of reasons for these transfers, including change in market activity in valuation inputs, transparency of valuation inputs from third-party pricing sources and matching between internal model valuations and broker quotes.

Of the £387 million net losses (2010: £247 million net gains) recognised in the income statement during the year, a £390 million loss (2010: £252 million gain) is recognised in net investment income and a £3 million gain (2010: £5 million loss) relates to impairments and is included in other expenses.

- (ii) The principal investments classified as Level 3, and the valuation techniques applied to them, are:
- Structured bond-type products held by our business in France amounting to £6.1 billion, for which there is no active market. These bonds are valued either using third-party counterparty or broker quotes. These bonds are validated against internal or third-party models. These bonds have been classified as Level 3 because either (i) the third-party models included a significant unobservable liquidity adjustment or (ii) differences between the valuation provided by the counterparty and broker quotes and the validation model were sufficiently significant to result in a Level 3 classification. At 31 December 2011, the values reported in respect of these products were the lower of counterparty and broker quotes and modelled valuations.
  - Notes issued by loan partnerships held by our UK Life business amounting to £1.2 billion, for which there is no active market. These are valued using counterparty quotes, corroborated against the prices of selected similar securities. In 2011, there were insufficient market observable transactions in the selected securities to provide a reliable proxy price to corroborate the counterparty price. In addition, our UK Life business owns part of the residual equity interest in these loan partnerships valued at £0.2 billion according to net asset values, which are not considered market observable, resulting in a Level 3 classification.
  - Private equity investment funds amounting to £1.5 billion, of which £0.9 billion is held by our UK business. In valuing our interest in these funds, we rely on investment valuation reports received from the fund manager, making adjustments for items such as subsequent draw-downs and distributions between the date of the report and the balance sheet date and the fund manager's carried interest. In addition, an indexation adjustment is made to reflect changes in appropriate equity market indices between the valuation report date and balance sheet date.
  - External hedge funds held principally by businesses in the UK, the US and France amounting to £1.3 billion. Valuations received from fund managers are based on net asset values. However, insufficient information is provided on the underlying fund assets to support a classification other than Level 3.
  - Certain strategic interests in banking partners held by our Italian business amounting to £0.3 billion. Valuations are based on third-party independent appraisals, or where internally modelled, transactions in similar entities, discounted cash flow techniques and valuation multiples, using public and internal management information.
  - Other Level 3 investments amount to £0.8 billion and relate to a diverse range of different types of securities held by a number of businesses throughout the Group.
- (iii) Where possible, the Group tests the sensitivity of the fair values of Level 3 investments to changes in unobservable inputs to reasonable alternatives. 99% (2010: 95%) of valuations for Level 3 investments are sourced from independent third parties and, where appropriate, validated against internally modelled valuations, third-party models or broker quotes. Where third-party pricing sources are unwilling to provide a sensitivity analysis for their valuations, the Group undertakes, where feasible, sensitivity analysis on the following basis:
- For third-party valuations validated against internally modelled valuations using significant unobservable inputs, the sensitivity of the internally modelled valuation to changes in unobservable inputs to a reasonable alternative is determined.
  - For third-party valuations either not validated or validated against a third-party model or broker quote, the third-party valuation in its entirety is considered an unobservable input. Sensitivities are determined by flexing to a reasonable alternative the yield, NAV multiple, IRR or other suitable valuation multiples of the financial instrument implied by the third-party valuation. For example, for a fixed income security the implied yield would be the rate of return which discounts the security's contractual cash flows to equal the third-party valuation.

On the basis of the methodology outlined above, the Group is able to perform sensitivity analysis for £3.8 billion of the Group's Level 3 investments. For these Level 3 investments, changing unobservable valuation inputs to a reasonable alternative would result in a change in fair value in the range of £114 million positive impact and £114 million adverse impact.

Of the £7.6 billion Level 3 investments for which sensitivity analysis is not provided, £0.3 billion and £6.4 billion relate to investments held in unit-linked and participating funds respectively in Italy and France. For these products, investment risk is predominantly borne by policyholders and therefore shareholder profit before tax is insensitive to reasonable changes in fair value of these investments. Level 3 investments backing non-linked shareholder-backed business, for which no sensitivity analysis is provided, amount to only £0.7 billion. A 10% change in valuation of these investments would reduce shareholder profit before tax by £74 million.

## 23 – Loans

This note analyses the loans our Group companies have made, the majority of which are mortgage loans.

### (a) Carrying amounts

The carrying amounts of loans at 31 December 2011 and 2010 were as follows:

	2011			2010		
	At fair value through profit or loss other than trading £m	At amortised cost £m	Total £m	At fair value through profit or loss other than trading £m	At amortised cost £m	Total £m
Policy loans	3	1,465	1,468	180	1,574	1,754
Loans to banks	—	4,988	4,988	—	5,683	5,683
Securitised mortgage loans (see note 24)						
UK	2,154	—	2,154	1,912	—	1,912
Netherlands	—	—	—	5,249	1,155	6,404
	2,154	—	2,154	7,161	1,155	8,316
Non-securitised mortgage loans	16,329	2,905	19,234	13,687	9,750	23,437
Loans and advances to bank customers	—	—	—	—	2,023	2,023
Loans to brokers and other intermediaries	—	96	96	—	100	100
Other loans	—	176	176	—	1,761	1,761
<b>Total</b>	<b>18,486</b>	<b>9,630</b>	<b>28,116</b>	21,028	22,046	43,074

Loans to banks include cash collateral received under stock lending arrangements (see note 25(d)). The obligation to repay this collateral is included in payables and other financial liabilities (note 49).

Of the above loans, £21,626 million (2010: £35,581 million) is expected to be recovered more than one year after the statement of financial position date.

### Loans at fair value

Fair values have been calculated by discounting the future cash flows using appropriate current interest rates for each portfolio of mortgages. Further details of the fair value methodology are given in note 22.

The change in fair value of these loans during the year, attributable to a change in credit risk, was a loss of £239 million (2010: £85 million loss). The cumulative change attributable to changes in credit risk to 31 December 2011 was a loss of £689 million (2010: £400 million loss).

Non-securitised mortgage loans include £501 million (2010: £215 million) relating to UK primary healthcare and PFI businesses which are secured against General Practitioner premises, other primary health-related premises or schools leased to government bodies. For all such loans, government support is provided through reimbursement of rental payments to the tenants to meet income service and provide for the debt to be reduced substantially over the term of the loan. Although the loan principal is not Government-guaranteed, the nature of these businesses and premises provides considerable comfort of an ongoing business model and low risk of default.

### Loans at amortised cost

The fair value of these loans at 31 December 2011 was £9,532 million (2010: £21,784 million).

## 23 – Loans continued

### (b) Analysis of loans carried at amortised cost

	2011			2010		
	Amortised cost £m	Impairment £m	Carrying value £m	Amortised cost £m	Impairment £m	Carrying value £m
Policy loans	1,465	—	1,465	1,574	—	1,574
Loans to banks	4,988	—	4,988	5,683	—	5,683
Securitised mortgage loans	—	—	—	1,156	(1)	1,155
Non-securitised mortgage loans	2,995	(90)	2,905	9,846	(96)	9,750
Loans and advances to bank customers	—	—	—	2,064	(41)	2,023
Loans to brokers and other intermediaries	96	—	96	100	—	100
Other loans	180	(4)	176	1,764	(3)	1,761
<b>Total</b>	<b>9,724</b>	<b>(94)</b>	<b>9,630</b>	<b>22,187</b>	<b>(141)</b>	<b>22,046</b>

The movements in the impairment provisions on these loans for the years ended 31 December 2010 and 2011 were as follows:

	2011 £m	2010 £m
At 1 January	(141)	(148)
Increase during the year	(66)	(28)
Write back following sale or reimbursement	2	17
Write back following recovery in value	39	6
Deconsolidation of Delta Lloyd	72	—
Foreign exchange movements	—	1
Other movements	—	11
<b>At 31 December</b>	<b>(94)</b>	<b>(141)</b>

### (c) Collateral

The Group holds collateral in respect of loans where it is considered appropriate in order to reduce the risk of non-recovery. This collateral generally takes the form of liens or charges over properties and, in the case of policy loans, the underlying policy for the majority of the loan balances above. In all other situations, the collateral must be in a readily realisable form, such as listed securities, and is held in segregated accounts. Transfer of title for the collateral received always occurs in such cases, although no market risk or benefit is taken. In the event of a default, the Group is able to sell or repledge the collateral.

The amount of collateral received with respect to loans which the Group is permitted to sell or repledge in the absence of default was £4,601 million (2010: £4,542 million). No collateral was actually sold or repledged in the absence of default during the year (2010: £nil).

## 24 – Securitised mortgages and related assets

The Group, in our UK Life and (prior to its deconsolidation) Dutch businesses, has loans receivable, secured by mortgages, which have then been securitised through non-recourse borrowings. This note gives details of the relevant transactions.

### (a) Description of current arrangements

In a UK long-term business subsidiary, Aviva Equity Release UK Limited (AER), the beneficial interest in certain portfolios of lifetime mortgages has been transferred to five special purpose securitisation companies (the ERF companies), in return for initial consideration and, at later dates, deferred consideration. The deferred consideration represents receipts accrued within the ERF companies after meeting all their obligations to the note holders, loan providers and other third parties in the priority of payments. The purchases of the mortgages were funded by the issue of fixed and floating rate notes by the ERF companies.

All the shares in the ERF companies are held by independent companies, whose shares are held on trust. Although AER does not own, directly or indirectly, any of the share capital of the ERF companies or their parent companies, it retains control of the majority of the residual or ownership risks and rewards related to the assets of the securitisation companies, and they have therefore been treated as subsidiaries in the consolidated financial statements. AER has no right to repurchase the benefit of any of the securitised mortgage loans, other than in certain circumstances where AER is in breach of warranty or loans are substituted in order to effect a further advance.

AER has purchased subordinated notes and granted subordinated loans to some of the ERF companies. These have been eliminated on consolidation through offset against the borrowings of the ERF companies in the consolidated statement of financial position.

In all of the above transactions, the Company and its subsidiaries are not obliged to support any losses that may be suffered by the note holders and do not intend to provide such support. Additionally, the notes were issued on the basis that note holders are only entitled to obtain payment, of both principal and interest, to the extent that the available resources of the respective special purpose securitisation companies, including funds due from customers in respect of the securitised loans, are sufficient and that note holders have no recourse whatsoever to other companies in the Aviva Group.

### (b) Carrying values

The following table summarises the securitisation arrangements:

	2011		2010	
	Securitised assets £m	Securitised borrowings £m	Securitised assets £m	Securitised borrowings £m
<b>UK</b>				
Securitised mortgage loans				
At fair value (note 23)	2,154	(1,486)	1,912	(1,464)
Other securitisation assets/(liabilities)	191	(859)	130	(578)
	<b>2,345</b>	<b>(2,345)</b>	2,042	(2,042)
<b>Delta Lloyd</b>				
Securitised mortgage loans				
At fair value (note 23)	—	—	5,249	(4,216)
At amortised cost (note 23)	—	—	1,155	(1,924)
	—	—	6,404	(6,140)
Other securitisation assets/(liabilities)	—	—	—	(264)
	<b>2,345</b>	<b>(2,345)</b>	6,404	(6,404)

Loan notes held by third parties are as follows:

	2011		2010	
	UK £m	Delta Lloyd £m	UK £m	Delta Lloyd £m
Total loan notes issued, as above	1,486	—	1,464	6,140
Less: Loan notes held by Group companies	(180)	—	(176)	(1,095)
Loan notes held by third parties (note 48c)	<b>1,306</b>	—	1,288	5,045

## 25 – Financial investments

This note analyses our financial investments by type and shows their cost and fair value. These will change from one period to the next as a result of new business written, claims paid and market movements.

	<b>243,101</b>	<b>18,084</b>	<b>(7,897)</b>	<b>253,288</b>
These are further analysed as follows:				
At fair value through profit or loss	212,714	15,626	(6,533)	221,807
Available for sale	30,387	2,458	(1,364)	31,481
	<b>243,101</b>	<b>18,084</b>	<b>(7,897)</b>	<b>253,288</b>

All unrealised gains and losses and impairments on financial investments classified as fair value through profit or loss have been recognised in the income statement.

Unrealised gains and losses on financial investments classified as at fair value through profit or loss recognised in the income statement in the year were a net loss of £5,527 million (2010: £7,024 million net gain). Of this, £68 million net gain (2010: £67 million net gain) related to financial investments designated as trading and £5,595 million net loss (2010: £6,957 million net gain) related to investments designated as other than trading.

The movement in the unrealised gain/loss position reported in the statement of financial position during the year, shown in the table above, includes foreign exchange movements on the translation of unrealised gains and losses on financial investments held by foreign subsidiaries, which are recognised in other comprehensive income, as well as transfers due to the realisation of gains and losses on disposal and the recognition of impairment losses.

Total impairments of financial investments classified as AFS in the income statement in the year, disclosed in note 6, were £21 million (2010: £76 million). The total accumulated impairment provision for financial investments classified as available-for-sale included in the table above within unrealised losses and impairments was £138 million (2010: £983 million). Movements in this AFS provision are shown in section (c) below.

Deconsolidation of Delta Lloyd	<b>16</b>	<b>822</b>	—	<b>838</b>
Foreign exchange rate movements	—	—	—	—
<b>At 31 December 2011</b>	<b>(126)</b>	<b>(5)</b>	<b>(7)</b>	<b>(138)</b>

### (d) Financial investment arrangements

#### (i) Stock lending arrangements

The Group has entered into stock lending arrangements in the UK and overseas in accordance with established market conventions. The majority of the Group's stock lending transactions occur in the UK, where investments are lent to EEA-regulated, locally domiciled counterparties and governed by agreements written under English law.

#### **Non-cash collateral received**

The Group receives collateral in order to reduce the credit risk of these arrangements. Collateral must be in a readily realisable form, such as listed securities, and is held in segregated accounts. Transfer of title always occurs for collateral received, although no market risk or economic benefit is taken. The level of collateral held is monitored regularly, with further collateral obtained where this is considered necessary to manage the Group's risk exposure.

In certain markets, the Group or the Group's appointed stock lending managers obtain legal ownership of the collateral received and can re-pledge it as collateral elsewhere or sell outright in the absence of default. The carrying amount of financial assets received in this manner at 31 December 2011 was £15,778 million (2010: £15,858 million). The value of collateral that was actually sold in the absence of default was £150 million (2010: *£nil*).

#### **Cash collateral received**

In addition to the above, the Group has received cash collateral under stock lending arrangements that has been recognised in the statement of financial position with a corresponding obligation for its return. The latter balance is included in note 49.

#### (ii) Stock repurchase arrangements

Included within financial investments are *£nil* (2010: £853 million) of debt securities and other fixed income securities which have been sold under stock repurchase arrangements. The obligations arising under these arrangements are shown in note 49.

#### (iii) Other arrangements

In carrying on its bulk purchase annuity business, the Group's UK Life operation is required to place certain investments in trust on behalf of the policyholders. Amounts become payable from the trust funds to the trustees if the Group were to be in breach of its payment obligations in respect of policyholder benefits. At 31 December 2011 £1,044 million (2010: £909 million) of financial investments were restricted in this way.

Certain financial investments are also required to be deposited under local laws in various overseas countries as security for the holders of policies issued in those countries. Other investments are pledged as security collateral for bank letters of credit.

## 25 – Financial investments continued

### (e) Non-UK government debt securities (gross of non-controlling interests)

The following is a summary of non-UK government debt by issuer as at 31 December 2011 analysed by policyholder, participating and shareholder funds.

<b>Total</b>	<b>2,242</b>	<b>28,789</b>	<b>10,543</b>	<b>41,574</b>

\* As a result of the partial disposal of Aviva's stake in Delta Lloyd, from 6 May 2011 the Group has ceased to consolidate the results and net assets of the Delta Lloyd Group. Throughout the disclosure, therefore, Delta Lloyd has been excluded for the purposes of the 31 December 2010 to allow for a proper comparison, unless otherwise noted.

At 31 December 2011, the Group's total government (non-UK) debt securities stood at £41.6 billion (FY10: £38.7 billion, excluding *Delta Lloyd*), an increase of £2.9 billion. The significant majority of these holdings are within our participating funds where our risk to our shareholders is governed by the nature and extent of our participation within those funds.

Our direct shareholder asset exposure to government (non-UK) debt securities amounts to £10.5 billion (FY10: £10.2 billion). The primary exposures, relative to total shareholder (non-UK) government debt exposure, are to French (15.5%) and Italian (10.0%) (non-UK) government debt securities. Our combined exposure to Greek, Portuguese and Irish debt is £0.2 billion (FY10: £0.5 billion), a decrease of £0.3 billion.

The participating funds exposure to (non-UK) government debt amounts to £28.8 billion (FY10: £26.2 billion), an increase of £2.6 billion. The primary exposures, relative to total (non-UK) government debt exposures included within our participating funds, are to the (non-UK) government debt securities of France (26.2%), Italy (33.6%), Belgium (3.6%), Spain (3.6%), Germany (6.1%) and Netherlands (4.5%).

<sup>1</sup> The 2010 comparative figures are not provided as it was not practical to be obtained.

Gross of non-controlling interests, our direct shareholder assets exposure to worldwide banks debts securities and equities is £7.4 billion. The majority of our holding (58%) is in senior debt (covered, secured and senior unsecured). The primary exposures are to United States (28%), Spain (16%) and United Kingdom (15%) banks. Our holdings include strategic holdings in Unicredit and other Italian banks of £439 million.

<sup>1</sup> The 2010 comparative figures are not provided as it was not practical to be obtained.

Gross of non-controlling interests, the participating fund exposures to worldwide banks debts securities and equities is £16.9 billion. The majority of the exposure (71%) is in senior debt (covered, secured and senior unsecured). Participating funds are the most exposed to France (27%) and United Kingdom (15%) banks. The significant majority of these holdings are within our participating funds where the risk to our shareholders is governed by the nature and extent of our participation within those funds.

## 26 – Receivables

This note analyses our total receivables.

	2011 £m	2010 £m
Amounts owed by contract holders	1,838	1,965
Amounts owed by intermediaries	1,139	1,414
Deposits with ceding undertakings	1,426	1,459
Amounts due from reinsurers	339	500
Amounts due from brokers for investment sales	270	269
Amounts receivable for cash collateral pledged (note 57c)	26	15
Amounts due from government, social security and taxes	467	388
Corporate owned life insurance	156	153
Dividends receivable	109	86
Finance lease receivables	200	175
Other banking assets	—	248
Other receivables	1,978	1,623
<b>Total</b>	<b>7,948</b>	<b>8,295</b>
Less: Amounts classified as held for sale	(11)	—
	<b>7,937</b>	<b>8,295</b>
Expected to be recovered in less than one year	7,713	7,095
Expected to be recovered in more than one year	224	1,200
	<b>7,937</b>	<b>8,295</b>

Concentrations of credit risk with respect to receivables are limited due to the size and spread of the Group's trading base. No further credit risk provision is therefore required in excess of the normal provision for doubtful receivables.

## 27 – Deferred acquisition costs and other assets

This note shows the products on which we are deferring some of our acquisition costs and details the movements in the balance during the year.

### (a) Carrying amount

The carrying amount comprises:

	2011 £m	2010 £m
Deferred acquisition costs in respect of:		
Insurance contracts – Long-term business	2,733	3,148
Insurance contracts – General insurance and health business	986	1,141
Participating investment contracts – Long-term business	21	35
Non-participating investment contracts – Long-term business	1,024	1,078
Retail fund management business	14	14
Total deferred acquisition costs	4,778	5,416
Surpluses in the staff pension schemes (note 47(e)(vii))	1,670	524
Other assets	19	132
<b>Total</b>	<b>6,467</b>	<b>6,072</b>
Less: Amounts classified as held for sale	(23)	—
	<b>6,444</b>	<b>6,072</b>

Deferred acquisition costs on long-term business are generally recoverable in more than one year whereas such costs on general insurance and health business are generally recoverable within one year after the statement of financial position date.

Surpluses in the staff pension schemes are recoverable more than one year after the statement of financial position date.

### (b) Movements in the year

The movements in deferred acquisition costs (DAC) during the year were:

	2011			
	Long-term business £m	General insurance and health business £m	Retail fund manage- ment business £m	Total £m
Carrying amount at 1 January	4,261	1,141	14	5,416
Acquisition costs deferred during the year	1,012	2,414	5	3,431
Amortisation	(735)	(2,467)	(5)	(3,207)
Impact of assumption changes	(48)	—	—	(48)
Effect of portfolio transfers, acquisitions and disposals	—	(18)	—	(18)
Foreign exchange rate movements	(3)	(5)	—	(8)
Shadow adjustment	(593)	—	—	(593)
Deconsolidation of Delta Lloyd	(116)	(79)	—	(195)
<b>Carrying amount at 31 December</b>	<b>3,778</b>	<b>986</b>	<b>14</b>	<b>4,778</b>
	2010			
	Long-term business £m	General insurance and health business £m	Retail fund manage- ment business £m	Total £m
Carrying amount at 1 January	4,069	1,227	20	5,316
Acquisition costs deferred during the year	1,167	2,283	6	3,456
Amortisation	(582)	(2,369)	(12)	(2,963)
Impact of assumption changes	58	—	—	58
Effect of portfolio transfers, acquisitions and disposals	80	—	—	80
Foreign exchange rate movements	39	13	—	52
Shadow adjustment	(570)	—	—	(570)
Other	—	(13)	—	(13)
<b>Carrying amount at 31 December</b>	<b>4,261</b>	<b>1,141</b>	<b>14</b>	<b>5,416</b>

The balance of deferred acquisition costs for long-term business decreased by £483 million in 2011, reflecting the impact of the shadow adjustment in the US. Amortisation increased by £153 million in 2011, mainly in the UK and the US, where DAC balances, and the amortisation thereof, are increasing, driven by the growing volumes of business and emergence of profits from the business.

Where amortisation of the DAC balance depends on projected profits, changes to economic conditions may lead to a movement in the DAC balance and a corresponding impact on profit. It is estimated that the movement in the DAC balance would reduce profit by £145 million if market yields on fixed income investments were to increase by 1% and increase profit by £170 million if yields were to reduce by 1%.

## 27 – Deferred acquisition costs and other assets continued

The shadow adjustments relate to deferred acquisition costs on business in the US backed by investments classified as AFS. As explained in accounting policy K, unrealised gains and losses on the AFS investments and the shadow adjustments above are both recognised directly in other comprehensive income.

### (c) Other assets

Other assets include £6 million (2010: £1 million) that is expected to be recovered more than one year after the statement of financial position date.

### (d) Prepayments and accrued income

Prepayments and accrued income of £3,235 million (2010: £3,691 million), includes £90 million (2010: £172 million) that is expected to be recovered more than one year after the statement of financial position date.

## 28 – Assets held to cover linked liabilities

Certain unit-linked products have been classified as investment contracts, while some are included within the definition of an insurance contract. The assets backing these unit-linked liabilities are included within the relevant balances in the consolidated statement of financial position, while the liabilities are included within insurance and investment contract provisions. This note analyses the carrying values of assets backing these liabilities.

The carrying values of assets backing unit-linked liabilities are as follows:

	2011 £m	2010 £m
Loans*	917	35
Debt securities	15,295	16,150
Equity securities	20,602	31,441
Other investments	28,119	31,846
Reinsurance assets	1,454	1,215
Cash and cash equivalents	3,980	4,772
	<b>70,367</b>	<b>85,459</b>

\*Amount in 2011 relates to cash collateral received as part of stock lending, see note 25d (i) for details.

## 29 – Ordinary share capital

This note gives details of Aviva plc's ordinary share capital and shows the movements during the year.

(a) Details of the Company's ordinary share capital are as follows:

	2011 £m	2010 £m
The allotted, called up and fully paid share capital of the Company at 31 December 2011 was: 2,905,712,938 (2010: 2,820,148,642) ordinary shares of 25 pence each	<b>726</b>	<b>705</b>

(b) During 2011, a total of 85,564,296 ordinary shares of 25 pence each were allotted and issued by the Company as follows:

	Number of shares	Share capital £m	Share premium £m
At 1 January 2010	2,766,611,374	692	1,207
Shares issued under the Group's employee and executive share option schemes	722,968	—	—
Shares issued in lieu of dividends	52,814,300	13	(13)
At 31 December 2010	2,820,148,642	705	1,194
Shares issued under the Group's employee and executive share option schemes	1,574,706	—	—
Shares issued in lieu of dividends	83,989,590	21	(21)
<b>At 31 December 2011</b>	<b>2,905,712,938</b>	<b>726</b>	<b>1,173</b>

Ordinary shares in issue in the Company rank pari passu with any new ordinary shares issued in the Company. All the ordinary shares in issue carry the same right to receive all dividends and other distributions declared, made or paid by the Company.

The issue of shares in lieu of cash dividends is considered a bonus issue under the terms of the Companies Act 2006 and the nominal value of the shares is charged to the share premium account.

## 30 – Group's share plans

This note describes the Group's various equity compensation plans, and shows how the Group values the options and awards of shares in the Company.

### (a) Description of the plans

The Group maintains a number of active share option and award plans and schemes (the Group's share plans). These are as follows:

#### (i) Savings-related options

These are options granted under the HMRC-approved Save As You Earn (SAYE) share option schemes in the UK and Irish Revenue-approved SAYE share option scheme in Ireland. Options are normally exercisable during the six-month period following either the third, fifth or seventh anniversary of the start of the relevant savings contract.

#### (ii) Executive share options

These are options granted on various dates until 2004 under the Aviva Executive Share Option Plan and in 2010, under the Aviva Executive Share Option Plan 2005. Options granted between 2001 and 2004 were subject to the satisfaction of conditions relating to both the Company's Return on Capital Employed (ROCE) and its relative Total Shareholder Return (TSR). The performance was measured over a three-year performance period and the options are normally exercisable between the third and tenth anniversary of their grant. The options granted in 2010 are described in the Directors' Remuneration Report.

#### (iii) Long-term incentive plan awards

These awards have been made under the Aviva Long Term Incentive Plan 2005 and Aviva Long Term Incentive Plan 2011, and are described in section (b) below and in the Directors' Remuneration Report.

#### (iv) Annual bonus plan awards

These awards have been made under the Aviva Annual Bonus Plan 2005 and Aviva Annual Bonus Plan 2011, and are described in section (b) below and in the Directors' Remuneration Report.

#### (v) One Aviva, twice the value bonus plan awards

These are conditional awards granted under the Aviva Annual Bonus Plan 2005 between 2008 and 2010, and are described in section (b) below and in the Directors' Remuneration Report.

#### (vi) Recruitment and retention share award plan awards

These are conditional awards granted under the Aviva Recruitment and Retention Share Award Plan in relation to the recruitment or retention of senior managers excluding executive directors. The awards vest in tranches on various dates and vesting is conditional upon the participant being employed by the Group on the vesting date and not having served notice of resignation. If a participant's employment is terminated due to resignation or dismissal, any tranche of the award which has vested within the 12 months prior to the termination date will be subject to clawback and any unvested tranches of the award will lapse in full. No new Aviva plc ordinary shares will be issued or transferred from treasury to satisfy vested awards under this plan.

#### (vii) CFO recruitment share awards plan awards

The following awards were granted to Patrick Regan under the CFO Recruitment Share Awards Plan following his recruitment in 2010: the Replacement Restricted Share Award (RRSA), the Bonus Replacement Deferred Share Award (BRDSA) and the One Aviva Twice the Value (OATTV) Award. The RRSA was awarded to compensate Mr Regan for the loss of share awards granted by his previous employer and the BRDSA was awarded to compensate Mr Regan for the loss of bonus from his previous employer. The awards are described in section (b) below and in the Directors' Remuneration Report. No further awards will be made under this plan.

#### (viii) Conditional share award granted to Trevor Matthews, chief executive, Aviva UK

A conditional share award was awarded to Trevor Matthews as compensation for the loss of share awards granted by his previous employer. The awards are described in section (b) on page 247 and in the Directors' Remuneration Report.

**30 – Group's share plans continued****(b) Outstanding options and awards****(i) Share options**

At 31 December 2011, options to subscribe for ordinary shares of 25 pence each in the Company were outstanding as follows:

Aviva Savings Related Share Option Scheme	Option price Pence	Number of shares	Normally exercisable	Option price Pence	Number of shares	Normally exercisable
	428	88,939	2011	410	2,133,068	2011, 2013 or 2015
	491	102,847	2012	316	6,174,623	2012, 2014 or 2016
	593	256,409	2011 or 2013	310	3,513,562	2013, 2015 or 2017
	563	335,223	2012 or 2014	268	12,641,277	2014, 2016 or 2018

Aviva Ireland Savings Related Share Option Scheme (in euros)	Option price Cents	Number of shares	Normally exercisable	Option price Cents	Number of shares	Normally exercisable
	879	21,945	2011	360	707,326	2012 or 2014
	830	32,631	2012	374	219,115	2013 or 2015
	509	205,783	2011 or 2013	304	695,321	2014 or 2016

Aviva Executive Share Option Plan	Option price Pence	Number of shares	Normally exercisable
	516	492,001	2005 to 2012
	512	652,898	2006 to 2013
	526	436,937	2007 to 2014
	386	1,364,079	2013

The following table summarises information about options outstanding at 31 December 2011:

Range of exercise prices	Outstanding options Number	Weighted average remaining contractual life Years	Weighted average exercise price Pence
£2.68–£4.29	<b>27,743,093</b>	<b>3</b>	<b>303.84</b>
£4.30–£5.89	<b>2,052,537</b>	<b>2</b>	<b>524.03</b>
£5.90–£10.35	<b>278,354</b>	<b>1</b>	<b>593.00</b>

The comparative figures as at 31 December 2010 were:

Range of exercise prices	Outstanding options Number	Weighted average remaining contractual life Years	Weighted average exercise price Pence
£2.68–£4.29	23,209,551	3	331.54
£4.30–£5.89	3,441,735	2	529.04
£5.90–£10.35	605,354	1	806.01

**(ii) Share awards**

At 31 December 2011, awards issued under the Company's executive incentive plans over ordinary shares of 25 pence each in the Company were outstanding as follows:

Aviva Long Term Incentive Plan 2005	Number of shares	Vesting period	Number of shares	Vesting period
	9,283,108	2009 to 2011	6,320,014	2010 to 2012

Aviva Long Term Incentive Plan 2011	Number of shares	Vesting period
	9,495,052	2011 to 2013

### 30 – Group's share plans continued

One Aviva, twice the value bonus plan	Number of shares	Vesting period	Number of shares	Vesting period
	2,181,411	2009 to 2011	1,799,779	2010 to 2012
Aviva Annual Bonus Plan 2005	Number of shares	Vesting period	Number of shares	Vesting period
	4,068,506	2009 to 2011	4,142,086	2010 to 2012
Aviva Annual Bonus Plan 2011			Number of shares	Vesting period
			3,526,514	2011 to 2013
CFO Recruitment Share Awards Plan	Award type		Number of shares	Vesting period
	RRSA		170,393	2012 and 2013
	BRDSA		43,231	2010 to 2012
	OATTV		55,051	2010 to 2012
Conditional Share Award granted to Trevor Matthews			Number of shares	Vesting period
			653,721	2012, 2013 and 2014
Recruitment and Retention Share Award Plan			Number of shares	Vesting period
			38,961	2012 and 2013
			60,093	2012, 2013 and 2014
			30,507	2012, 2013, 2014 and 2015

The vesting of awards under the Aviva Long Term Incentive Plan 2005, the One Aviva, Twice the Value bonus plan and the OATTV Award under the CFO Recruitment Share Awards Plan is subject to the attainment of performance conditions as described in the Directors' Remuneration Report. Shares which do not vest will lapse.

#### (iii) Shares to satisfy awards and options

Prior to March 2003, it was the practice to satisfy awards and options granted under the Group's share plans through shares purchased in the market and held by employee share trusts which were established for the purpose of satisfying awards under the Group's share plans and funded by the Company.

From March 2003 to July 2008, it was generally the Company's practice to satisfy the awards granted after March 2003 by the issue of new shares at the time of vesting. However, since July 2008, it has been the Company's practice to satisfy all awards and options using shares purchased in the market and held by employee trusts except where local regulations make it necessary to issue new shares. Further details are given in note 31.

#### (c) Movements in the year

A summary of the status of the option plans as at 31 December 2010 and 2011, and changes during the years ended on those dates, is shown below.

	2011		2010	
	Number of options	Weighted average exercise price Pence	Number of options	Weighted average exercise price Pence
Outstanding at 1 January	27,256,640	367.51	26,355,093	395.90
Granted during the year	13,486,990	268.00	8,020,085	326.52
Exercised during the year	(182,907)	353.26	(73,755)	335.12
Forfeited during the year	(1,089,738)	347.58	(1,461,530)	380.82
Cancelled during the year	(7,142,132)	320.36	(2,788,423)	362.05
Expired during the year	(2,254,869)	539.48	(2,794,830)	516.95
Outstanding at 31 December	30,073,984	321.55	27,256,640	367.51
Exercisable at 31 December	3,460,979	471.26	3,319,816	564.95

#### (d) Expense charged to the income statement

The total expense recognised for the year arising from equity compensation plans was as follows:

	2011 £m	2010 £m
Equity-settled expense	48	41
Cash-settled expense	10	9
Total (note 10b)	58	50

## 30 – Group's share plans continued

### (e) Fair value of options and awards granted after 7 November 2002

The weighted average fair values of options and awards granted during the year, estimated by using the Black-Scholes option pricing model, were £0.99 and £4.20 (2010: £1.32 and £2.39) respectively.

#### (i) Share options

The fair value of the options was estimated on the date of grant, based on the following weighted average assumptions:

Weighted average assumption	2011	2010
Share price	<b>312p</b>	402p
Exercise price	<b>268p</b>	310p
Expected volatility	<b>58%</b>	56%
Expected life	<b>3.64 years</b>	5.00 years
Expected dividend yield	<b>6.40%</b>	6.09%
Risk-free interest rate	<b>0.89%</b>	1.57%

The expected volatility used was based on the historical volatility of the share price over a period equivalent to the expected life of the option prior to its date of grant. The risk-free interest rate was based on the yields available on UK government bonds as at the date of grant. The bonds chosen were those with a similar remaining term to the expected life of the options.

182,907 options granted after 7 November 2002 were exercised during the year (2010: 64,903).

#### (ii) Share awards

The fair value of the awards was estimated on the date of grant based on the following weighted average assumptions:

Weighted average assumption	2011	2010
Share price	<b>435.70p</b>	386.00p
Expected volatility*	<b>66%</b>	66%
Expected volatility of comparator companies' share price*	<b>65%</b>	65%
Correlation between Aviva and competitors' share price*	<b>57%</b>	57%
Expected life	<b>3.00 years</b>	2.75 years
Expected dividend yield**	<b>n/a</b>	7.70%
Risk-free interest rate*	<b>1.79%</b>	1.80%

\* For awards with market-based performance conditions.

\*\* The Long-Term Incentive Plan awards granted in 2011 include additional shares being provided to employees equal to dividend rights before vesting. As a result, no dividend yield assumption is required for these awards.

The expected volatility used was based on the historical volatility of the share price over a period equivalent to the expected life of the share award prior to its date of grant. The risk-free interest rate was based on the yields available on UK government bonds as at the date of grant. The bonds chosen were those with a similar remaining term to the expected life of the share awards.

## 31 – Shares held by employee trusts

We satisfy awards and options granted under the Group's share plans primarily through shares purchased in the market and held by employee share trusts. This note gives details of the shares held in these trusts.

Movements in the carrying value of shares held by employee trusts comprise:

	2011		2010	
	Number	£m	Number	£m
Cost debited to shareholders' funds				
At 1 January	<b>8,415,487</b>	<b>32</b>	17,979,232	68
Acquired in the year	<b>9,396,602</b>	<b>29</b>	3,500,000	14
Distributed in the year	<b>(4,527,613)</b>	<b>(18)</b>	(13,063,745)	(50)
Balance at 31 December	<b>13,284,476</b>	<b>43</b>	8,415,487	32

The shares are owned by an employee share trust with an undertaking to satisfy awards of shares in the Company under the Company's share plans and schemes. Details of the features of the plans can be found in the Directors' Remuneration Report and in note 30(a).

These shares were purchased in the market and are carried at cost. At 31 December 2011, they had an aggregate nominal value of £3,321,119 (2010: £2,103,871) and a market value of £39,959,704 (2010: £33,072,864). The trustees have waived their rights to dividends on the shares held in the trusts.

### 32 – Preference share capital

This note gives details of Aviva plc's preference share capital.

The preference share capital of the Company at 31 December 2011 was:

	2011 £m	2010 £m
Issued and paid up		
100,000,000 8 <sup>3</sup> / <sub>8</sub> % cumulative irredeemable preference shares of £1 each	<b>100</b>	100
100,000,000 8 <sup>3</sup> / <sub>4</sub> % cumulative irredeemable preference shares of £1 each	<b>100</b>	100
	<b>200</b>	200

Under its articles of association, the Company may issue and allot Sterling New Preference Shares and Euro New Preference Shares, which, if issued and allotted, would rank, as to payment of a dividend and capital, ahead of the Company's ordinary share capital but behind the cumulative irredeemable preference shares currently in issue. The issued preference shares are non-voting except where their dividends are in arrears, on a winding up or where their rights are altered.

On a winding up, they carry a preferential right of return of capital ahead of the ordinary shares. The Company does not have a contractual obligation to deliver cash or other financial assets to the preference shareholders and therefore the directors may make dividend payments at their discretion.

### 33 – Direct capital instruments

This note gives details of the direct capital instruments issued in November 2004.

Notional amount	2011 £m	2010 £m
5.9021% £500 million direct capital instrument	<b>500</b>	500
4.7291% €700 million direct capital instrument	<b>490</b>	490
	<b>990</b>	990

The euro and sterling direct capital instruments (DCIs) were issued on 25 November 2004 and qualify as Innovative Tier 1 capital, as defined by the Financial Services Authority in GENPRU Annex 1 'Capital Resources'. They have no fixed redemption date but the Company may, at its sole option, redeem all (but not part) of the euro and sterling DCIs at their principal amounts on 28 November 2014 and 27 July 2020 respectively, at which dates the interest rates change to variable rates, or on any respective coupon payment date thereafter.

In addition, under certain circumstances defined in the terms and conditions of the issue, the Company may at its sole option:

- substitute at any time not less than all of the DCIs for, or vary the terms of the DCIs so that they become Qualifying Tier 1 Securities or Qualifying Upper Tier 2 Securities; or
- substitute not less than all of the DCIs for fully paid non-cumulative preference shares in the Company. These preference shares could only be redeemed on 28 November 2014 in the case of the euro DCIs and on 27 July 2020 in the case of the sterling DCIs, or in each case on any dividend payment date thereafter. The Company has the right to choose whether or not to pay any dividend on the new shares, and any such dividend payment will be non-cumulative.

The Company has the option to defer coupon payments on the DCIs on any relevant payment date. Deferred coupons shall be satisfied only in the following circumstances, all of which occur at the sole option of the Company:

- Redemption; or
- Substitution by, or variation so they become, alternative Qualifying Tier 1 Securities or Qualifying Upper Tier 2 Securities; or
- Substitution by preference shares.

No interest will accrue on any deferred coupon. Deferred coupons will be satisfied by the issue and sale of ordinary shares in the Company at their prevailing market value, to a sum as near as practicable to (and at least equal to) the relevant deferred coupons. In the event of any coupon deferral, the Company will not declare or pay any dividend on its ordinary or preference share capital.

### 34 – Merger reserve

This note describes the use of the merger reserve.

Prior to 1 January 2004, certain significant business combinations were accounted for using the 'pooling of interests method' (or merger accounting), which treats the merged groups as if they had been combined throughout the current and comparative accounting periods. Merger accounting principles for these combinations gave rise to a merger reserve in the consolidated statement of financial position, being the difference between the nominal value of new shares issued by the Parent Company for the acquisition of the shares of the subsidiary and the subsidiary's own share capital and share premium account.

The merger reserve is also used where more than 90% of the shares in a subsidiary are acquired and the consideration includes the issue of new shares by the Company, thereby attracting merger relief under the Companies Act 1985 and, from 1 October 2009, the Companies Act 2006.

The balance on the reserve of £3,271 million (2010: £3,271 million) has arisen through the mergers of Commercial Union, General Accident and Norwich Union companies, forming Aviva plc in 2000, together with the acquisition of RAC plc (RAC) in 2005. Because RAC ownership was immediately transferred from Aviva plc to a subsidiary company, this reserve is unaffected by the disposal of RAC in 2011.

### 35 – Other reserves

This note gives details of the various reserves forming part of the Group's consolidated equity and shows the movements during the year.

Movements in the year comprised:

	Currency translation reserve (see accounting policy E) £m	Owner occupied properties reserve (see accounting policy O) £m	Investment valuation reserve (see accounting policy S) £m	Hedging instruments reserve (see accounting policy T) £m	Equity compensation reserve (see accounting policy AA) £m	Total £m
<b>Balance at 1 January 2010</b>	2,224	104	163	(771)	109	1,829
Arising in the year:						
Fair value gains/(losses)	—	(25)	579	—	—	554
Fair value gains transferred to profit on disposals	—	—	(123)	—	—	(123)
Transfer to profit on disposal of subsidiary	(2)	—	—	—	—	(2)
Share of fair value changes in joint ventures and associates taken to other comprehensive income (notes 18a & 19a)	—	—	(15)	—	—	(15)
Impairment losses on assets previously revalued directly through other comprehensive income now taken to income statement	—	—	136	—	—	136
Reserves credit for equity compensation plans	—	—	—	—	41	41
Shares issued under equity compensation plans (note 36)	—	—	—	—	(51)	(51)
Transfer to non-controlling interests following Delta Lloyd IPO	(3)	—	(1)	—	—	(4)
Foreign exchange rate movements	(41)	—	—	78	—	37
Aggregate tax effect – shareholders' tax	5	4	(166)	—	—	(157)
<b>Balance at 31 December 2010</b>	<b>2,183</b>	<b>83</b>	<b>573</b>	<b>(693)</b>	<b>99</b>	<b>2,245</b>
Arising in the year:						
Fair value gains	—	2	424	—	—	426
Fair value gains transferred to profit on disposals	—	—	(189)	—	—	(189)
Transfer to profit on disposal of subsidiary (note 3b)	(3)	—	—	—	—	(3)
Fair value gains transferred to retained earnings on disposals (note 36)	—	(6)	—	—	—	(6)
Share of fair value changes in joint ventures and associates taken to other comprehensive income (notes 18a & 19a)	—	1	(86)	—	—	(85)
Impairment losses on assets previously revalued directly through other comprehensive income now taken to income statement	—	—	21	—	—	21
Reserves credit for equity compensation plans	—	—	—	—	48	48
Shares issued under equity compensation plans (note 36)	—	—	—	—	(61)	(61)
Transfer to profit on deconsolidation of Delta Lloyd	(485)	—	(115)	—	—	(600)
Transfer to retained earnings on deconsolidation of Delta Lloyd	—	(2)	—	—	—	(2)
Foreign exchange rate movements	(174)	—	—	30	—	(144)
Aggregate tax effect – shareholders' tax	9	1	(98)	—	—	(88)
<b>Balance at 31 December 2011</b>	<b>1,530</b>	<b>79</b>	<b>530</b>	<b>(663)</b>	<b>86</b>	<b>1,562</b>

The above reserves are shown net of non-controlling interests.

### 36 – Retained earnings

This note analyses the movements in the consolidated retained earnings during the year.

	2011 £m	2010 £m
<b>Balance at 1 January</b>	<b>5,411</b>	3,425
Profit for the year attributable to equity shareholders	225	1,463
Actuarial gains on pension schemes (note 47e(iv))	1,002	1,033
Actuarial gains on pension schemes transferred to unallocated divisible surplus (note 44)	(22)	(18)
Dividends and appropriations (note 15)	(813)	(757)
Shares issued in lieu of dividends	307	209
Shares issued under equity compensation plans (note 35)	61	51
Shares distributed by employee trusts (note 31)	(18)	(50)
Fair value gains realised from reserves (note 35)	6	—
Effect of deconsolidation of Delta Lloyd	2	—
Transfer to minority interests following Delta Lloyd IPO	—	(4)
Share of other comprehensive income of joint ventures and associates	(51)	—
Aggregate tax effect	(156)	59
<b>Balance at 31 December</b>	<b>5,954</b>	5,411

The shares issued in lieu of dividends are in respect of the transfer to retained earnings from the ordinary dividend account, arising from the treatment of these shares explained in note 29(b).

The Group's regulated subsidiaries are required to hold sufficient capital to meet acceptable solvency levels based on applicable local regulations. Their ability to transfer retained earnings to the UK parent companies is therefore restricted to the extent these earnings form part of local regulatory capital.

### 37 – Non-controlling interests

This note gives details of the Group's non-controlling interests and shows the movements during the year.

#### (a) Non-controlling interests at 31 December comprised:

	2011 £m	2010 £m
Equity shares in subsidiaries	480	2,055
Share of earnings	501	1,057
Share of other reserves	299	377
	<b>1,280</b>	3,489
Preference shares in General Accident plc	250	250
Preference shares in other subsidiaries	—	2
	<b>1,530</b>	3,741

#### (b) Movements in the year comprised:

	2011 £m	2010 £m
<b>Balance at 1 January</b>	<b>3,741</b>	3,540
Profit for the year attributable to non-controlling interests	(165)	429
Minority share of movements in other reserves	(16)	57
Foreign exchange rate movements	14	(113)
Total comprehensive income attributable to non-controlling interests	(167)	373
Capital contributions from non-controlling interests	68	42
Increase in non-controlling interests following Delta Lloyd IPO	—	8
Minority share of dividends declared in the year	(126)	(187)
Non-controlling interest in acquired subsidiaries	—	3
Changes in non-controlling interest in existing subsidiaries	(11)	(38)
Reclassification to financial liabilities (see below)	(205)	—
Effect of deconsolidation of Delta Lloyd	(1,770)	—
<b>Balance at 31 December</b>	<b>1,530</b>	3,741

As explained in note 3(d), the minority shareholder in an Irish subsidiary has an option requiring the Group to purchase its shares. As a result of this obligation, we have reclassified this non-controlling interest to financial liabilities in the consolidated statement of financial position. This option was exercised on 17 January 2012, with completion expected later in 2012.

### 38 – Contract liabilities and associated reinsurance

The following notes explain how we calculate our liabilities to our policyholders for insurance and investment products we have sold to them. Notes 39 and 40 cover these liabilities, and note 41 details the financial guarantees and options given for some of these products. Note 42 details the reinsurance recoverables on these liabilities while note 43 shows the effects of the assumptions we have changed during the year.

The following is a summary of the contract provisions and related reinsurance assets as at 31 December.

	2011			2010		
	Gross provisions £m	Reinsurance assets £m	Net £m	Gross provisions £m	Reinsurance assets £m	Net £m
Long-term business						
Insurance contracts	(133,893)	3,747	(130,146)	(160,946)	3,650	(157,296)
Participating investment contracts	(64,985)	—	(64,985)	(69,482)	2	(69,480)
Non-participating investment contracts	(45,659)	1,626	(44,033)	(48,305)	1,463	(46,842)
	(244,537)	5,373	(239,164)	(278,733)	5,115	(273,618)
Outstanding claims provisions						
Long-term business	(1,311)	125	(1,186)	(1,078)	104	(974)
General insurance and health	(8,099)	974	(7,125)	(9,528)	1,113	(8,415)
	(9,410)	1,099	(8,311)	(10,606)	1,217	(9,389)
Provisions for claims incurred but not reported	(2,646)	395	(2,251)	(2,735)	445	(2,290)
	(256,593)	6,867	(249,726)	(292,074)	6,777	(285,297)
Provision for unearned premiums	(4,483)	245	(4,238)	(4,855)	307	(4,548)
Provision arising from liability adequacy tests	(13)	—	(13)	(2)	—	(2)
Other technical provisions	—	—	—	(1)	—	(1)
<b>Totals</b>	<b>(261,089)</b>	<b>7,112</b>	<b>(253,977)</b>	<b>(296,932)</b>	<b>7,084</b>	<b>(289,848)</b>
Less: Amounts classified as held for sale	344	—	344	—	—	—
	(260,745)	7,112	(253,633)	(296,932)	7,084	(289,848)

### 39 – Insurance liabilities

This note analyses our insurance contract liabilities by type of product and describes how we calculate these liabilities and the assumptions we used.

#### (a) Carrying amount

Insurance liabilities at 31 December comprise:

	2011			2010		
	Long-term business £m	General insurance and health £m	Total £m	Long-term business £m	General insurance and health £m	Total £m
Long-term business provisions						
Participating	55,594	—	55,594	64,043	—	64,043
Unit-linked non-participating	10,168	—	10,168	21,450	—	21,450
Other non-participating	68,131	—	68,131	75,453	—	75,453
	133,893	—	133,893	160,946	—	160,946
Outstanding claims provisions	1,311	8,099	9,410	1,078	9,528	10,606
Provision for claims incurred but not reported	—	2,646	2,646	—	2,735	2,735
	1,311	10,745	12,056	1,078	12,263	13,341
Provision for unearned premiums	—	4,483	4,483	—	4,855	4,855

	134,860	15,241	150,101	160,579	17,121	177,700

## 39 – Insurance liabilities continued

### (b) Long-term business liabilities

#### (i) Business description

The Group underwrites long-term business in a number of countries as follows:

- In the UK mainly in:
  - New With-Profits sub-fund (NWPSF) of Aviva Life & Pensions UK (UKLAP), where the with-profit policyholders are entitled to at least 90% of the distributed profits, the shareholders receiving the balance. Any surplus or deficit emerging in NWPSF that is not distributed as bonus will be transferred from this sub-fund to the Reattributed Inherited Estate External Support Account (RIEESA) (see below).
  - Old With-Profits sub-fund (OWPSF), With-Profits sub-fund (WPSF) and Provident Mutual sub-fund (PMSF) of UKLAP, where the with-profit policyholders are entitled to at least 90% of the distributed profits, the shareholders receiving the balance.
  - ‘Non-profit’ funds of Aviva Annuity UK and UKLAP, where shareholders are entitled to 100% of the distributed profits. Shareholder profits on unithised with-profit business written by WPSF and on stakeholder unithised with-profit business are derived from management fees and policy charges, and emerge in the non-profit funds.
  - The RIEESA of UKLAP, which is a non-profit fund where shareholders are entitled to 100% of the distributed profits, but these cannot be distributed until the ‘lock-in’ criteria set by the Reattribution Scheme have been met. RIEESA will be used to write non-profit business and also to provide capital support to NWPSF.
- In France, where the majority of policyholders’ benefits are determined by investment performance, subject to certain guarantees, and shareholders’ profits are derived largely from management fees. In addition, a substantial number of policies participate in investment returns, with the balance being attributable to shareholders.
- In the US, there are two main types of business – protection products and accumulation products. Protection products include interest-sensitive whole life, term life, universal life and indexed life insurance policies. The accumulation product segment includes traditional fixed and indexed deferred annuities for individuals and funding agreements for business customers. In addition, there are two closed blocks of participating contracts arising from demutualisations of subsidiary companies. All products are classified as insurance contracts except for the funding agreements and term certain immediate annuities, which are classified as non-participating investment contracts.
- In other operations in Europe and Asia.

#### (ii) Group practice

The long-term business provision is calculated separately for each of the Group’s life operations. The provisions for overseas subsidiaries have generally been included on the basis of local regulatory requirements, modified where necessary to reflect the requirements of the Companies Act 2006.

Material judgement is required in calculating the provisions and is exercised particularly through the choice of assumptions where discretion is permitted. In turn, the assumptions used depend on the circumstances prevailing in each of the life operations. Provisions are most sensitive to assumptions regarding discount rates and mortality/morbidity rates. Where discount rate assumptions are based on current market yields on fixed interest securities, allowance is made for default risk implicit in the yields on the underlying assets. In Ireland, the allowance for Irish government bonds was made in proportion to the spread over the yields for equivalent AAA-rated government bonds.

In 2010, a test case was taken to the European Court of Justice to rule on the current law and practice whereby insurers may take into account a person’s gender in the assessment of risk and consequently the pricing of insurance products. The ruling was issued on 1 March 2011 and requires gender equality for pricing from 21 December 2012. At 31 December 2011, the impact of the ruling on existing long-term business provisions in our UK and European businesses was not considered to be material (*2010: not applicable*).

Bonuses paid during the year are reflected in claims paid, whereas those allocated as part of the bonus declaration are included in the movements in the long-term business provision.

#### (iii) Methodology and assumptions

There are two main methods of actuarial valuation of liabilities arising under long-term insurance contracts – the net premium method and the gross premium method – both of which involve the discounting of projected premiums and claims.

Under the net premium method, the premium taken into account in calculating the provision is determined actuarially, based on the valuation assumptions regarding discount rates, mortality and disability. The difference between this premium and the actual premium payable provides a margin for expenses. This method does not allow for voluntary early termination of the contract by the policyholder, and so no assumption is required for persistency. Explicit provision is made for vested bonuses (including those vesting following the most recent fund valuation), but no such provision is made for future regular or terminal bonuses. However, this method makes implicit allowance for future regular or terminal bonuses already earned, by margins in the valuation discount rate used.

The gross premium method uses the amount of contractual premiums payable and includes explicit assumptions for interest and discount rates, mortality and morbidity, persistency and future expenses. These assumptions can vary by contract type and reflect current and expected future experience. Explicit provision is made for vested bonuses and explicit allowance is also made for future regular bonuses, but not terminal bonuses.

## 39 – Insurance liabilities continued

### (a) UK

#### With-profit business

The valuation of with-profit business uses the methodology developed for the Realistic Balance Sheet, adjusted to remove the shareholders' share of future bonuses. The key elements of the Realistic Balance Sheet methodology are the with-profit benefit reserve (WPBR) and the present value of the expected cost of any payments in excess of the WPBR (referred to as the cost of future policy-related liabilities). The realistic liability for any contract is equal to the sum of the WPBR and the cost of future policy-related liabilities. The WPBR for an individual contract is generally calculated on a retrospective basis, and represents the accumulation of the premiums paid on the contract, allowing for investment return, taxation, expenses and any other charges levied on the contract.

For a small proportion of business, a prospective valuation approach is used, including allowance for anticipated future regular and final bonuses.

The items included in the cost of future policy-related liabilities include:

- Maturity Guarantees;
- Guaranteed Annuity Options;
- GMP underpin on Section 32 transfers; and
- expected payments under Mortgage Endowment Promise.

In the Provident Mutual and With-Profits sub-funds in UKLAP, this is offset by the expected cost of charges to WPBR to be made in respect of guarantees.

The cost of future policy-related liabilities is determined using a market-consistent approach and, in the main, this is based on a stochastic model calibrated to market conditions at the end of the reporting period. Non-market-related assumptions (for example, persistency, mortality and expenses) are based on experience, adjusted to take into account future trends.

The principal assumptions underlying the cost of future policy-related liabilities are as follows:

#### Future investment return

A 'risk-free' rate equal to the spot yield on UK government securities, plus a margin of 0.1% is used. The rates vary according to the outstanding term of the policy, with a typical rate as at 31 December 2011 of 2.20% (2010: 3.78%) for a policy with ten years outstanding.

#### Volatility of investment return

Volatility assumptions are set with reference to implied volatility data on traded market instruments, where available, or on a best estimate basis where not.

	Volatility	
	2011	2010
Equity returns	<b>26.4%</b>	26.1%
Property returns	<b>15.0%</b>	15.0%
Fixed interest yields	<b>18.0%</b>	13.2%

The equity volatility used depends on term, money-ness and region. The figure shown is for a sample UK equity, at the money, with a ten-year term. Fixed interest yield volatility is also dependent on term and money-ness. The figure shown is for a ten-year swap option, currently at the money.

#### Future regular bonuses

Annual bonus assumptions for 2012 have been set consistently with the year-end 2011 declaration. Future annual bonus rates reflect the principles and practices of the fund. In particular, the level is set with regard to the projected margin for final bonus and the change from one year to the next is limited to a level consistent with past practice.

#### Mortality

Mortality assumptions for with-profit business are set with regard to recent Company experience and general industry trends. The mortality tables used in the valuation are summarised below:

	Mortality table used	
	2011	2010
Assurances, pure endowments and deferred annuities before vesting	<b>Nil or Axx00 adjusted</b>	Nil or Axx00 adjusted
Pensions business after vesting and pensions annuities in payment	<b>PCMA00/PCFA00 adjusted plus allowance for future mortality improvement</b>	PCMA00/PCFA00 adjusted plus allowance for future mortality improvement

## 39 – Insurance liabilities continued

### Non-profit business

Conventional non-profit contracts, including those written in the with-profit funds, are valued using gross premium methods which discount projected future cash flows. The cash flows are calculated using the amount of contractual premiums payable, together with explicit assumptions for investment returns, inflation, discount rates, mortality, morbidity, persistency and future expenses. These assumptions vary by contract type and reflect current and expected future experience.

For unit-linked and some unitised with-profit business, the provisions are valued by adding a prospective non-unit reserve to the bid value of units. The prospective non-unit reserve is calculated by projecting the future non-unit cash flows on the assumption that future premiums cease, unless it is more onerous to assume that they continue. Where appropriate, allowance for persistency is based on actual experience.

Valuation discount rate assumptions are set with regard to yields on the supporting assets and the general level of long-term interest rates as measured by gilt yields. An explicit allowance for risk is included by restricting the yields for equities and properties with reference to a margin over long-term interest rates or by making an explicit deduction from the yields on corporate bonds, mortgages and deposits, based on historical default experience of each asset class. A further margin for risk is then deducted for all asset classes.

The provisions held in respect of guaranteed annuity options are a prudent assessment of the additional liability incurred under the option on a basis and method consistent with that used to value basic policy liabilities, and includes a prudent assessment of the proportion of policyholders who will choose to exercise the option.

Valuation discount rates for business in the non-profit funds are as follows:

	Valuation discount rates	
	2011	2010
Assurances		
Life conventional non-profit	<b>1.8% to 1.9%</b>	2.8%
Pensions conventional non-profit	<b>2.6%</b>	3.5% to 3.7%
Annuities		
Conventional immediate and deferred annuities	<b>2.2% to 4.3%</b>	3.7% to 5.3%
Non-unit reserves on Unit Linked business		
Life	<b>1.8% to 2.2%</b>	3.1%
Pensions	<b>2.2% to 2.7%</b>	3.8%
Income Protection		
Active lives	<b>2.4%</b>	3.5%
Claims in payment – level	<b>3.6%</b>	4.5%
Claims in payment – index linked	<b>(1.0)%</b>	(0.7)%

Mortality assumptions for non-profit business are set with regard to recent Company experience and general industry trends. The mortality tables used in the valuation are summarised below:

	Mortality tables used	
	2011	2010
<b>Assurances</b>		
Non-profit	<b>AM00/AF00 or TM00/TF00 adjusted for smoker status and age/sex specific factors</b>	AM00/AF00 or TM00/TF00 adjusted for smoker status and age/sex specific factors
Pure endowments and deferred annuities before vesting	<b>AM00/AF00 adjusted</b>	AM00/AF00 adjusted
<b>Annuities in payment</b>		
Pensions business	<b>PCMA00/PCFA00 adjusted plus allowance for future mortality improvement</b>	PCMA00/PCFA00 adjusted plus allowance for future mortality improvement
General annuity business	<b>IML00/IFL00 adjusted plus allowance for future mortality improvement</b>	IML00/IFL00 adjusted plus allowance for future mortality improvement

## 39 – Insurance liabilities continued

### (b) France

The majority of reserves arise from a single premium savings product and is based on the accumulated fund value, adjusted to maintain consistency with the value of the assets backing the policyholder liabilities. The net premium method is used for prospective valuations, in accordance with local regulation, where the valuation assumptions depend on the date of issue of the contract. The valuation discount rate also depends on the original duration of the contract and mortality rates are based on industry tables.

	Valuation discount rates		Mortality tables used	
	2011 and 2010		2011 and 2010	
Life assurances	0% to 4.5%		TD73-77, TD88-90, TH00-02, TF00-02, H_AVDBS, F_AVDBS, H_SSDBS, F_SSDBS.	
Annuities	0% to 4.5%		TGF05/TGH05	

### (c) United States

For the major part of our US business, insurance liabilities are measured in accordance with US GAAP as at the date of acquisition.

The liability for future policy benefits for traditional life insurance is computed using the net level method, based on guaranteed interest and mortality rates as used in calculating cash surrender values. Reserve interest assumptions ranged from 2.00% to 7.50% in 2011 (2010: 2.00% to 7.50%). The weighted average interest rate for all traditional life policy reserves in 2011 was 4.50% (2010: 4.50%).

Future policy benefit reserves for universal life insurance, deferred annuity products and funding agreements are computed under a retrospective deposit method and represent policy account balances before applicable surrender charges. For the indexed products, the liability held is calculated based on the option budget method and is equal to the host contract and the calculated value of the derivative. The value of the derivative is based on the present value of the difference between the projected fund value and the underlying fund guarantee. The range of interest crediting rates for deferred annuity products, the largest component of the US business, excluding sales inducement payouts, was 1.00% to 5.20% in 2011 (2010: 1.00% to 5.20%). An additional liability is established for universal life contracts with death or other insurance benefit features, which is determined using an equally weighted range of scenarios with respect to investment returns, policyholder lapses, benefit election rates, premium payout patterns and mortality. The additional liability represents the present value of future expected benefits based on current product assumptions.

The indexed life and annuity products guarantee the return of principal to the customer, and credit interest based on certain indices. A portion of the premium from each customer is invested in fixed income securities and is intended to cover the minimum guaranteed value. A further portion of the premium is used to purchase derivatives to hedge the growth in interest credited to the customer as a direct result of increases in the related indices. Both the derivatives and the options embedded in the policy are valued at their fair value.

Deferred income reserves are established for fees charged for insurance benefit features which are assessed in a manner that is expected to result in higher profits in earlier years, followed by lower profits or losses in subsequent years. The excess charges are deferred and amortised using the same assumptions and factors used to amortise deferred acquisition costs. Shadow adjustments may be made to deferred acquisition costs, acquired value of in-force business, deferred income reserves and contract liabilities. The shadow adjustments are recognised directly in other comprehensive income so that unrealised gains or losses on investments that are recognised directly in other comprehensive income affect the measurement of the liability, or related assets, in the same way as realised gains or losses.

### (d) Other countries

In all other countries, local generally accepted interest rates and published standard mortality tables are used for different categories of business as appropriate. The tables are based on relevant experience and show mortality rates, by age, for specific groupings of people.

**39 – Insurance liabilities continued****(iv) Movements**

The following movements have occurred in the long-term business provisions during the year:

	2011 £m	2010 £m
<b>Carrying amount at 1 January</b>	<b>160,946</b>	154,058
Provisions in respect of new business	<b>11,149</b>	12,502
Expected change in existing business provisions	<b>(8,964)</b>	(9,259)
Variance between actual and expected experience	<b>(2,279)</b>	1,858
Impact of other operating assumption changes	<b>(61)</b>	(520)
Impact of economic assumption changes	<b>5,663</b>	1,959
Exceptional strengthening of longevity assumptions (see below)	—	483
Other movements	<b>(623)</b>	(197)
Change in liability recognised as an expense	<b>4,885</b>	6,826
Effect of portfolio transfers, acquisitions and disposals	<b>(6)</b>	1,117
Deconsolidation of Delta Lloyd	<b>(32,159)</b>	—
Foreign exchange rate movements	<b>227</b>	(1,055)
<b>Carrying amount at 31 December</b>	<b>133,893</b>	160,946

The variance between actual and expected experience of £2.3 billion in 2011 was primarily due to the impact of falling equity markets on liabilities for unit-linked insurance contracts. For many types of long-term business, including unit-linked and participating funds, movements in asset values are offset by corresponding changes in liabilities, limiting the net impact on profit. Minor variances arise from differences between actual and expected experience for persistency, mortality and other demographic factors.

The impact of assumption changes in the above analysis shows the resulting movement in the carrying value of insurance liabilities. The £5.7 billion impact of economic assumption changes reflects reductions in valuation interest rates, primarily in respect of immediate annuity and participating insurance contracts in the UK. For participating business, a movement in liabilities is generally offset by a corresponding adjustment to the unallocated divisible surplus and does not impact on profit. Where assumption changes do impact on profit, these are included in the effect of changes in assumptions and estimates during the year shown in note 43, together with the impact of movements in related non-financial assets.

**(c) General insurance and health liabilities****(i) Provisions for outstanding claims**

Delays occur in the notification and settlement of claims and a substantial measure of experience and judgement is involved in assessing outstanding liabilities, the ultimate cost of which cannot be known with certainty at the statement of financial position date. The reserves for general insurance and health business are based on information currently available. However, it is inherent in the nature of the business written that the ultimate liabilities may vary as a result of subsequent developments.

Provisions for outstanding claims are established to cover the outstanding expected ultimate liability for losses and loss adjustment expenses (LAE) in respect of all claims that have already occurred. The provisions established cover reported claims and associated LAE, as well as claims incurred but not yet reported and associated LAE.

We only establish loss reserves for losses that have already occurred. We therefore do not establish catastrophe equalisation reserves that defer a share of income in respect of certain lines of business from years in which a catastrophe does not occur to future periods in which catastrophes may occur. When calculating reserves, we take into account estimated future recoveries from salvage and subrogation, and a separate asset is recorded for expected future recoveries from reinsurers after considering their collectability.

The table below shows the split of total general insurance and health outstanding claim provisions and IBNR provisions, gross of reinsurance, by major line of business.

	As at 31 December 2011			As at 31 December 2010		
	Outstanding claim provisions £m	IBNR provisions £m	Total claim provisions £m	Outstanding claim provisions £m	IBNR provisions £m	Total claim provisions £m
Motor	3,960	995	4,955	4,419	924	5,343
Property	1,392	155	1,547	1,669	188	1,857
Liability	2,206	1,321	3,527	2,388	1,303	3,691
Creditor	59	19	78	77	24	101
Other	482	156	638	975	296	1,271
	<b>8,099</b>	<b>2,646</b>	<b>10,745</b>	9,528	2,735	12,263

## 39 – Insurance liabilities continued

### (ii) Discounting

Outstanding claims provisions are based on undiscounted estimates of future claim payments, except for the following classes of business for which discounted provisions are held:

Class	Rate		Mean term of liabilities	
	2011	2010	2011	2010
Reinsured London Market business	<b>2.20%</b>	3.30%	<b>13 years</b>	12 years
Latent claims	<b>0.75% to 3.25%</b>	0.88% to 4.18%	<b>7 to 16 years</b>	7 to 15 years
Structured settlements	<b>2.70%</b>	3.20%	<b>31 years</b>	35 years
Netherlands Permanent health and injury	<b>n/a*</b>	3.75%	<b>n/a*</b>	7 years

\*Delta Lloyd no longer consolidated following the partial disposal on 6 May 2011.

The gross outstanding claims provision before discounting was £11,420 million (2010: £13,179 million). The period of time which will elapse before the liabilities are settled has been estimated by modelling the settlement patterns of the underlying claims.

The discount rate that has been applied to latent claims reserves is based on the relevant swap curve in the relevant currency having regard to the expected settlement dates of the claims. The range of discount rates used depends on the duration of the claims and is given in the table above. The duration of the claims span over 35 years, with the average duration being between 7 and 16 years depending on the geographical region. Any change in discount rates between the start and the end of the accounting period is reflected below operating profit as an economic assumption change.

During 2011, we have continued to experience a steady increase in the number of bodily injury claims settled by periodic payment orders (PPOs) or structured settlements, especially in the UK, which are reserved for on a discounted basis.

### (iii) Assumptions

Outstanding claims provisions are estimated based on known facts at the date of estimation. Case estimates are set by skilled claims technicians and established case-setting procedures. Claim technicians apply their experience and knowledge to the circumstances of individual claims. They take into account all available information and correspondence regarding the circumstances of the claim, such as medical reports, investigations and inspections. Claims technicians set case estimates according to documented claims department policies and specialise in setting estimates for certain lines of business or types of claim. Claims above certain limits are referred to senior claims handlers for authorisation.

No adjustments are made to the claims technicians' case estimates included in booked claim provisions, except for rare occasions when the estimated ultimate cost of individual large or unusual claim may be adjusted, subject to internal reserve committee approval, to allow for uncertainty regarding, for example, the outcome of a court case. The ultimate cost of outstanding claims is then estimated by using a range of standard actuarial claims projection techniques, such as the Chain Ladder and Bornhuetter-Ferguson methods. The main assumption underlying these techniques is that a company's past claims development experience can be used to project future claims development and hence ultimate claims costs. As such, these methods extrapolate the development of paid and incurred losses, average costs per claim and claim numbers based on the observed development of earlier years and expected loss ratios. Historical claims development is mainly analysed by accident period, although underwriting or notification period is also used where this is considered appropriate.

Claim development is separately analysed for each geographic area, as well as by each line of business. Certain lines of business are also further analysed by claim type or type of coverage. In addition, large claims are usually separately addressed, either by being reserved at the face value of loss adjuster estimates or separately projected in order to reflect their future development.

The assumptions used in most non-life actuarial projection techniques, including future rates of claims inflation or loss ratio assumptions, are implicit in the historical claims development data on which the projections are based. Additional qualitative judgement is used to assess the extent to which past trends may not apply in the future, for example, to reflect one-off occurrences, changes in external or market factors such as public attitudes to claiming, economic conditions, levels of claims inflation, judicial decisions and legislation, as well as internal factors such as portfolio mix, policy conditions and claims handling procedures in order to arrive at a point estimate for the ultimate cost of claims that represents the likely outcome, from a range of possible outcomes, taking account of all the uncertainties involved. The range of possible outcomes does not, however, result in the quantification of a reserve range.

As noted in section in section (b)(ii) above, an area of judgement is the impact of a European Court of Justice ruling in March 2011 on gender equality for the pricing of insurance products. At 31 December 2011, the impact of the ruling on existing general business provisions was not considered to be material (2010: not applicable).

The following explicit assumptions are made which could materially impact the level of booked net reserves:

#### UK mesothelioma claims

The level of uncertainty associated with latent claims is considerable due to the relatively small number of claims and the long-tail nature of the liabilities. UK mesothelioma claims account for a large proportion of the Group's latent claims. The key assumptions underlying the estimation of these claims include claim numbers, the base average cost per claim, future inflation in the average cost of claims, legal fees and the life expectancy of potential sufferers.

The best estimate of the liabilities reflects the latest available market information and studies. Many different scenarios can be derived by flexing these key assumptions and applying different combinations of the different assumptions. An upper and lower scenario can be derived by making reasonably likely changes to these assumptions, resulting in an estimate £250 million greater than the best estimate, or £115 million lower than the best estimate. These scenarios do not, however, constitute an upper or lower bound on these liabilities.

## 39 – Insurance liabilities continued

### Interest rates used to discount latent claim liabilities

The discount rates used in determining our latent claim liabilities are based on the relevant swap curve in the relevant currency at the reporting date, having regard to the duration of the expected settlement of latent claims. The range of discount rates used is shown in section (ii) above and depends on the duration of the claim and the reporting date. At 31 December 2011, it is estimated that a 1% fall in the discount rates used would increase net claim reserves by approximately £85 million, excluding the offsetting effect on asset values as assets are not hypothecated across classes of business. The impact of a 1% fall in interest rates across all assets and liabilities of our general insurance and health businesses is shown in note 56(h).

### Allowance for risk and uncertainty

The uncertainties involved in estimating loss reserves are allowed for in the reserving process and by the estimation of explicit reserve uncertainty distributions. The reserve estimation basis for non-life claims requires all non-life businesses to calculate booked claim provisions as the best estimate of the cost of future claim payments, plus an explicit allowance for risk and uncertainty. The allowance for risk and uncertainty is calculated by each business unit in accordance with the requirements of the Group non-life reserving policy, taking into account the risks and uncertainties specific to each line of business and type of claim in that territory. The requirements of the Group non-life reserving policy also seek to ensure that the allowance for risk and uncertainty is set consistently across both business units and reporting periods.

Changes to claims development patterns can materially impact the results of actuarial projection techniques. However, allowance for the inherent uncertainty in the assumptions underlying reserving projections is automatically allowed for in the explicit allowance for risk and uncertainty included when setting booked reserves.

Lump sum payments in settlement of bodily injury claims decided by the UK courts are calculated in accordance with the Ogden Tables. The Ogden Tables contain a discount rate that is set by the Lord Chancellor and that is applied when calculating the present value of loss of earnings for claims settlement purposes. The Ogden discount rate is currently under review by the Lord Chancellor. The timing of the conclusion of this review is unclear and it is still uncertain whether or by how much the rate will change. However an allowance has been included in provisions for a reduction in the Ogden discount rates. A reduction in the Ogden discount rates will increase lump sum payments to UK bodily injury claimants.

### (iv) Movements

The following changes have occurred in the general insurance and health claims provisions during the year:

	2011 £m	2010 £m
<b>Carrying amount at 1 January</b>	<b>12,263</b>	12,696
Impact of changes in assumptions	<b>149</b>	26
Claim losses and expenses incurred in the current year	<b>6,520</b>	6,908
Decrease in estimated claim losses and expenses incurred in prior years	<b>(140)</b>	(358)
Exceptional strengthening of general insurance latent claims provisions	<b>45</b>	10
Incurring claims losses and expenses	<b>6,574</b>	6,586
Less:		
Payments made on claims incurred in the current year	<b>(3,393)</b>	(3,641)
Payments made on claims incurred in prior years	<b>(3,514)</b>	(3,803)
Recoveries on claim payments	<b>313</b>	271
Claims payments made in the year, net of recoveries	<b>(6,594)</b>	(7,173)
Unwind of discounting	<b>47</b>	64
Other movements in the claims provisions	<b>(12)</b>	(18)
Change in claims reserve recognised as an expense	<b>15</b>	(541)
Effect of portfolio transfers, acquisitions and disposals	<b>—</b>	4
Deconsolidation of Delta Lloyd	<b>(1,445)</b>	—
Foreign exchange rate movements	<b>(87)</b>	102
Other movements	<b>(1)</b>	2
<b>Carrying amount at 31 December</b>	<b>10,745</b>	12,263

The effect of changes in the main assumptions is given in note 43 and the economic assumption changes are explained in note 9.

### (d) Loss development tables

#### (i) Description of tables

The tables that follow present the development of claim payments and the estimated ultimate cost of claims for the accident years 2002 to 2011. The upper half of the tables shows the cumulative amounts paid during successive years related to each accident year. For example, with respect to the accident year 2002, by the end of 2011 £5,871 million had actually been paid in settlement of claims. In addition, as reflected in the lower section of the table, the original estimated ultimate cost of claims of £6,250 million was re-estimated to be £6,016 million at 31 December 2011.

The original estimates will be increased or decreased, as more information becomes known about the individual claims and overall claim frequency and severity.

### 39 – Insurance liabilities continued

The Group aims to maintain strong reserves in respect of its general insurance and health business in order to protect against adverse future claims experience and development. As claims develop and the ultimate cost of claims become more certain, the absence of adverse claims experience will result in a release of reserves from earlier accident years, as shown in the loss development tables and movements table (c)(iv) above. However, in order to maintain overall reserve adequacy, the Group establishes strong reserves in respect of the current accident year (2011) where the development of claims is less mature and there is much greater uncertainty attaching to the ultimate cost of claims. Releases from prior accident year reserves are also due to an improvement in the estimated cost of claims.

Key elements of the movement in prior accident year general insurance and health net provisions during 2011 were:

- £78 million strengthening from the UK, including Group reinsurance business, mainly due to unfavourable development on commercial motor, commercial liability and December 2010 freeze claims.
- £42 million release from Europe mainly due to favourable development of personal and commercial motor claims in Ireland and France.
- £92 million release from Canada mainly due to favourable experience on motor, following the legislative changes in Ontario, and commercial liability.

Key elements of the release from prior accident year general insurance and health net provisions during 2010 were:

- £101 million from the UK, including Group reinsurance business, mainly due to an improved view of Group reinsurance liabilities, and favourable development on personal property claims, and commercial property and commercial liability large claims.
- £167 million from Europe mainly due to favourable development of personal and commercial property.
- £44 million from Canada mainly due to favourable experience on motor and commercial liability.

#### (ii) Gross figures

Before the effect of reinsurance, the loss development table is:

Accident year	All prior years £m	2002 £m	2003 £m	2004 £m	2005 £m	2006 £m	2007 £m	2008 £m	2009 £m	2010 £m	2011 £m	Total £m

Present value recognised in the statement of financial position	<b>1,246</b>	<b>108</b>	<b>115</b>	<b>160</b>	<b>258</b>	<b>437</b>	<b>606</b>	<b>904</b>	<b>1,153</b>	<b>1,487</b>	<b>2,902</b>	<b>9,376</b>

In the loss development tables shown above, the cumulative claim payments and estimates of cumulative claims for each accident year are translated into sterling at the exchange rates that applied at the end of that accident year. The impact of using varying exchange rates is shown at the bottom of each table. Disposals are dealt with by treating all outstanding and IBNR claims of the disposed entity as 'paid' at the date of disposal.

The loss development tables above include information on asbestos and environmental pollution claims provisions from business written before 2002. The undiscounted claim provisions for continuing operations, net of reinsurance, in respect of this business at 31 December 2011 were £929 million (2010: £896 million). The movement in the year reflects exceptional strengthening of provisions by £35 million in the UK (2010: £10 million in respect of several specific discontinued commercial liability risks written in Canada a significant number of years ago), other strengthening of £23 million (2010: £68 million), claim payments, reinsurance recoveries and foreign exchange rate movements.

**(e) Provision for unearned premiums****Movements**

The following changes have occurred in the provision for unearned premiums (UPR) during the year:

	2011 £m	2010 £m
<b>Carrying amount at 1 January</b>	<b>4,855</b>	<b>4,781</b>
Premiums written during the year	<b>10,364</b>	<b>10,469</b>
Less: Premiums earned during the year	<b>(10,099)</b>	<b>(10,424)</b>
Change in UPR recognised as income	<b>265</b>	<b>45</b>
Gross portfolio transfers and acquisitions	<b>(161)</b>	<b>(14)</b>
Deconsolidation of Delta Lloyd	<b>(424)</b>	<b>—</b>
Foreign exchange rate movements	<b>(52)</b>	<b>43</b>
<b>Carrying amount at 31 December</b>	<b>4,483</b>	<b>4,855</b>

## 40 – Liability for investment contracts

This note analyses our investment contract liabilities by type of product and describes how we calculate these liabilities and the assumptions we used.

### (a) Carrying amount

The liability for investment contracts at 31 December comprised:

	2011 £m	2010 £m
<b>Long-term business</b>		
Participating contracts	64,985	69,482
Non-participating contracts at fair value	43,990	46,124
Non-participating contracts at amortised cost	1,669	2,181
	<b>45,659</b>	<b>48,305</b>
<b>Total</b>	<b>110,644</b>	<b>117,787</b>

### (b) Long-term business investment liabilities

Investment contracts are those that do not transfer significant insurance risk from the contract holder to the issuer, and are therefore treated as financial instruments under IFRS.

Many investment contracts contain a discretionary participation feature in which the contract holder has a contractual right to receive additional benefits as a supplement to guaranteed benefits. These are referred to as participating contracts and are measured according to the methodology and Group practice for long-term business liabilities as described in note 39. They are not measured at fair value as there is currently no agreed definition of fair valuation for discretionary participation features under IFRS. In the absence of such a definition, it is not possible to provide a range of estimates within which a fair value is likely to fall. The IASB has deferred consideration of participating contracts to Phase II of its insurance contracts project.

For participating business, the discretionary participation feature is recognised separately from the guaranteed element and is classified as a liability, referred to as unallocated distributable surplus. Guarantees on long-term investment products are discussed in note 41.

Investment contracts that do not contain a discretionary participation feature are referred to as non-participating contracts and the liability is measured at either fair value or amortised cost.

Of the non-participating investment contracts measured at fair value, £42,434 million in 2011 are unit linked in structure and the fair value liability is equal to the unit reserve plus additional non-unit reserves if required on a fair value basis. These contracts are classified as 'Level 1' in the fair value hierarchy, as the unit reserve is calculated as the publicly quoted unit price multiplied by the number units in issue, and any non-unit reserve is insignificant.

For unit-linked business, a deferred acquisition cost asset and deferred income reserve liability are recognised in respect of transaction costs and front-end fees respectively, that relate to the provision of investment management services, and which are amortised on a systematic basis over the contract term. The amount of the related deferred acquisition cost asset is shown in note 27 and the deferred income liability is shown in note 50.

In the US, funding agreements consist of one- to ten-year fixed rate contracts. These contracts may not be cancelled by the holders unless there is a default under the agreement, but may, subject to a call premium, be terminated by Aviva at any time. Aviva issued no new funding agreements in 2011. The weighted average interest rates for fixed-rate and floating-rate funding agreements as at 31 December 2011 were 4.766% and 0.503% respectively. Funding agreements issued before 2008 are measured at fair value equal to the present value of contractual cash flows and, for business issued since 2008, are measured at amortised cost. Most funding agreements are fully collateralised and therefore their fair values are not adjusted for own credit risk. Funding agreements carried at fair value total £0.92 billion and are classified as 'Level 2' in the fair value hierarchy.

There is a small volume of annuity certain business for which the liability is measured at amortised cost using the effective interest method.

The fair value of contract liabilities measured at amortised cost is not materially different from the amortised cost liability.

**40 – Liability for investment contracts continued****(c) Movements in the year**

The following movements have occurred in the year:

**(i) Participating investment contracts**

	2011 £m	2010 £m
<b>Carrying amount at 1 January</b>	<b>69,482</b>	66,559
Provisions in respect of new business	<b>3,433</b>	6,169
Expected change in existing business provisions	<b>(2,195)</b>	(2,400)
Variance between actual and expected experience	<b>(2,708)</b>	845
Impact of operating assumption changes	<b>(72)</b>	36
Impact of economic assumption changes	<b>631</b>	240
Other movements	<b>211</b>	(65)
Change in liability recognised as an expense	<b>(700)</b>	4,825
Foreign exchange rate movements	<b>(1,284)</b>	(1,918)
Deconsolidation of Delta Lloyd	<b>(2,523)</b>	—
Other movements	<b>10</b>	16
<b>Carrying amount at 31 December</b>	<b>64,985</b>	69,482

The variance between actual and expected experience of £2.7 billion was primarily driven by unfavourable movements in investment markets in 2011, which had a direct or indirect impact on liability values. Equity markets fell and credit spreads on corporate bonds widened, reducing the value of assets supporting the participating investment liabilities. For many types of long-term business, including unit-linked and participating funds, movements in asset values are offset by corresponding changes in liabilities, limiting the net impact on profit. Minor variances arise from differences between actual and expected experience for persistency, mortality and other demographic factors.

The impact of assumption changes in the above analysis shows the resulting movement in the carrying value of participating investment contract liabilities. The impact of economic assumption changes of £0.6 billion relates mainly to the impact of lower risk-free interest rates on UK with-profits business. For participating business, a movement in liabilities is generally offset by a corresponding adjustment to the unallocated divisible surplus and does not impact on profit. Where assumption changes do impact on profit, these are included in the effect of changes in assumptions and estimates during the year shown in note 43, together with the impact of movements in related non-financial assets.

**(ii) Non-participating investment contracts**

	2011 £m	2010 £m
<b>Carrying amount at 1 January</b>	<b>48,305</b>	43,456
Provisions in respect of new business	<b>3,863</b>	4,096
Expected change in existing business provisions	<b>(2,558)</b>	(2,145)
Variance between actual and expected experience	<b>(2,796)</b>	1,276
Impact of operating assumption changes	<b>1</b>	20
Impact of economic assumption changes	<b>7</b>	3
Other movements	<b>(123)</b>	53
Change in liability	<b>(1,606)</b>	3,303
Effect of portfolio transfers, acquisitions and disposals	<b>—</b>	1,903
Deconsolidation of Delta Lloyd	<b>(832)</b>	—
Foreign exchange rate movements	<b>(206)</b>	(357)
Other movements	<b>(2)</b>	—
<b>Carrying amount at 31 December</b>	<b>45,659</b>	48,305

The variance between actual and expected experience of £2.8 billion was primarily driven by unfavourable movements in investment markets in 2011, which had a direct or indirect impact on liability values. Falling equity markets reduced the value of unit linked investment contracts, which comprise the vast majority of the non-participating investment contract liabilities. For unit-linked investment contracts, movements in asset values are offset by corresponding changes in liabilities, limiting the net impact on profit. Minor variances arise from differences between actual and expected experience for persistency, mortality and other demographic factors.

The impact of assumption changes in the above analysis shows the resulting movement in the carrying value of non-participating investment contract liabilities. The impact of assumption changes on profit are included in the effect of changes in assumptions and estimates during the year shown in note 43, which combines participating and non-participating investment contracts together with the impact of movements in related non-financial assets.

## 41 – Financial guarantees and options

This note details the financial guarantees and options we have given for some of our insurance and investment products.

As a normal part of their operating activities, various Group companies have given guarantees and options, including investment return guarantees, in respect of certain long-term insurance and fund management products. Further information on assumptions is given in notes 39 and 40.

### (a) UK Life with-profit business

In the UK, life insurers are required to comply with the FSA's realistic reporting regime for their with-profit funds for the calculation of FSA liabilities. Under the FSA's rules, provision for guarantees and options within realistic liabilities must be measured at fair value, using market-consistent stochastic models. A stochastic approach includes measuring the time value of guarantees and options, which represents the additional cost arising from uncertainty surrounding future economic conditions.

The material guarantees and options to which this provision relates are:

#### (i) Maturity value guarantees

Substantially all of the conventional with-profit business and a significant proportion of unitised with-profit business have minimum maturity values reflecting the sums assured plus declared annual bonus. In addition, the guarantee fund has offered maturity value guarantees on certain unit-linked products. For some unitised with-profit life contracts the amount paid after the fifth policy anniversary is guaranteed to be at least as high as the premium paid increased in line with the rise in RPI/CPI.

#### (ii) No market valuation reduction (MVR) guarantees

For unitised business, there are a number of circumstances where a 'no MVR' guarantee is applied, for example on certain policy anniversaries, guaranteeing that no market value reduction will be applied to reflect the difference between the accumulated value of units and the market value of the underlying assets.

#### (iii) Guaranteed annuity options

The Group's UK with-profit funds have written individual and group pension contracts which contain guaranteed annuity rate options (GAOs), where the policyholder has the option to take the benefits from a policy in the form of an annuity based on guaranteed conversion rates. The Group also has exposure to GAOs and similar options on deferred annuities.

Realistic liabilities for GAOs in the UK with-profit funds were £977 million at 31 December 2011 (2010: £823 million). With the exception of the New With-Profits sub fund (NWPSF), movements in the realistic liabilities in the with-profit funds are offset by a corresponding movement in the unallocated divisible surplus, with no net impact on IFRS profit. Realistic liabilities for GAOs in the NWPSF were £193 million at 31 December 2011 (2010: £131 million).

#### (iv) Guaranteed minimum pension

The Group's UK with-profit funds also have certain policies that contain a guaranteed minimum level of pensions as part of the condition of the original transfer from state benefits to the policy.

In addition, the with-profit fund companies have made promises to certain policyholders in relation to their with-profit mortgage endowments. Top-up payments will be made on these policies at maturity to meet the mortgage value up to a maximum of the 31 December 1999 illustrated shortfall. For UKLAP WP policyholders, these payments are subject to certain conditions.

### (b) UK Life non-profit business

The Group's UK non-profit funds are evaluated by reference to statutory reserving rules, including changes introduced in 2006 under FSA Policy Statement 06/14, *Prudential Changes for Insurers*.

#### (i) Guaranteed annuity options

Similar options to those written in the with-profit fund have been written in relation to non-profit products. Provision for these guarantees does not materially differ from a provision based on a market-consistent stochastic model, and amounts to £35 million at 31 December 2011 (2010: £31 million).

#### (ii) Guaranteed unit price on certain products

Certain unit-linked pension products linked to long-term life insurance funds provide policyholders with guaranteed benefits at retirement or death. No additional provision is made for this guarantee as the investment management strategy for these funds is designed to ensure that the guarantee can be met from the fund, mitigating the impact of large falls in investment values and interest rates.

### (c) Overseas life businesses

In addition to guarantees written in the Group's UK life businesses, our overseas businesses have also written contracts containing guarantees and options. Details of the significant guarantees and options provided by overseas life businesses are set out below.

## 41 – Financial guarantees and options continued

### (i) France

#### **Guaranteed surrender value and guaranteed minimum bonuses**

Aviva France has written a number of contracts with such guarantees. The guaranteed surrender value is the accumulated value of the contract including accrued bonuses. Bonuses are based on accounting income from amortised bond portfolios, where the duration of bond portfolios is set in relation to the expected duration of the policies, plus income and releases from realised gains on equity-type investments. Policy reserves are equal to guaranteed surrender values. Local statutory accounting envisages the establishment of a reserve, 'Provision pour Aléas Financiers' (PAF), when accounting income is less than 125% of guaranteed minimum credited returns. No PAF was established at the end of 2011.

The most significant of these contracts is the AFER Eurofund which has total liabilities of £33 billion at 31 December 2011 (2010: £34 billion). Up to 2010, the guaranteed bonus on this contract equalled 75% of the average of the last two years' declared bonus rates. Starting from year end 2010, Aviva France and the AFER association will agree the guaranteed bonus on this contract at every year end for the following year. This bonus was 3.43% for 2011 (2010: 3.55%) compared with an accounting income from the fund of 3.92% (2010: 4.01%).

Non-AFER contracts with guaranteed surrender values had liabilities of £14 billion at 31 December 2011 (2010: £13 billion) and all guaranteed annual bonus rates are between 0% and 4.5%.

#### **Guaranteed death and maturity benefits**

In France, the Group has also sold unit-linked policies where the death and/or maturity benefit is guaranteed to be at least equal to the premiums paid. The reserve held in the Group's consolidated statement of financial position at the end of 2011 for this guarantee is £130 million (2010: £85 million). The reserve is calculated on a prudent basis and is in excess of the economic liability. At the end of 2011, total sums at risk for these contracts were £631 million (2010: £242 million) out of total unit-linked funds of £12 billion (2010: £14 billion). The average age of policyholders was approximately 54. It is estimated that this liability would increase by £96 million (2010: £93 million) if yields were to decrease by 1% per annum and by £26 million (2010: £22 million) if equity markets were to decline by 10% from year end 2011 levels. These figures do not reflect our ability to review the tariff for this option.

### (ii) Ireland

#### **Guaranteed annuity options**

Products with similar GAOs to those offered in the UK have been issued in Ireland. The current net of reinsurance provision for such options is £271 million (2010: £236 million). This has been calculated on a deterministic basis, making conservative assumptions for the factors which influence the cost of the guarantee, principally annuitant mortality option take-up and long-term interest rates.

These GAOs are 'in the money' at current interest rates but the exposure to interest rates under these contracts has been hedged through the use of reinsurance, using derivatives (swaptions). The swaptions effectively guarantee that an interest rate of 5% will be available at the vesting date of these benefits so there is reduced exposure to a further decrease in interest rates.

#### **'No MVR' guarantees**

Certain unitised with-profit policies containing 'no MVR' guarantees, similar to those in the UK, have been sold in Ireland.

These guarantees are currently 'in-the-money' by £6 million (2010: £13 million). This has been calculated on a deterministic basis as the excess of the current policy surrender value over the discounted value (excluding terminal bonus) of the guarantees. The value of these guarantees is usually sensitive to the performance of investments held in the with-profit fund. Amounts payable under these guarantees are determined by the bonuses declared on these policies. There is no sensitivity to either interest rates or equity markets since there is no longer any exposure to equity in these funds and a matching strategy has been implemented for bonds.

#### **Return of premium guarantee**

Until 2005, Aviva Life and Pensions Ireland wrote two tranches of linked bonds with a return of premium guarantee, or a price floor guarantee, after five or six years. The first tranche expired before the end of the previous financial reporting period. The provision for the second tranche over and above unit and sterling reserves, at the end of 2011 is £7 million (2010: £9 million).

It is estimated that the provision would increase by £2 million (2010: £3 million) if equity markets were to decline by 10% from the year end 2011 levels. However, the provision increase would be broadly off-set by an increase in the value of the hedging assets that were set up on sale of these policies. We would not expect any significant impact on this provision as a result of interest rate movements. It is estimated that the provision would increase by £0.8 million (2010: £0.5 million) if property values were to decline by 10% from year end 2011 levels. This would be offset by an increase in the value of the hedging assets by £0.8 million (2010: £0.5 million).

## 41 – Financial guarantees and options continued

### (iii) Spain and Italy

#### **Guaranteed investment returns and guaranteed surrender values**

The Group has also written contracts containing guaranteed investment returns and guaranteed surrender values in both Spain and Italy. Traditional profit-sharing products receive an appropriate share of the investment return, assessed on a book value basis, subject to a guaranteed minimum annual return of up to 6% in Spain and 4% in Italy on existing business, while on new business the maximum guaranteed rate is lower. Liabilities are generally taken as the face value of the contract plus, if required, an explicit provision for guarantees calculated in accordance with local regulations. At 31 December 2011, total liabilities for the Spanish business were £3 billion (2010: £4 billion) with a further reserve of £5 million (2010: £12 million) for guarantees. Total liabilities for the Italian business were £11 billion (2010: £11 billion), with a further provision of £43 million (2010: £46 million) for guarantees. Liabilities are most sensitive to changes in the level of interest rates. It is estimated that provisions for guarantees would need to increase by £18 million (2010: £43 million) in Spain and £5 million (2010: £7 million) in Italy if interest rates fell by 1% from end 2011 values. Under this sensitivity test, the guarantee provision in Spain is calculated conservatively, assuming a long-term market interest rate of 1.6% and no lapses or premium discontinuances.

### (iv) United States

#### **Indexed and total return strategy products**

In the United States, the Group writes indexed life and deferred annuity products. These products guarantee the return of principal to the policyholder and credit interest based on certain indices, primarily the Standard & Poor's 500 Composite Stock Price Index. A portion of each premium is used to purchase derivatives to hedge the growth in interest credited to the policyholder. The derivatives held by the Group and the options embedded in the policy are both carried at fair value.

The US Treasury swap curve plus a risk adjustment of 2.48% (2010: 1.47%) for indexed life and 2.51% (2010: 1.48%) for indexed deferred annuities is used as the discount rate to calculate the fair value of the embedded options.

The risk adjustment calculation is based on market spreads on senior long-term unsecured Aviva plc debt with a reduction to reflect policyholder priority over other creditors in case of default. The amount of change in the fair value of these embedded options resulting from the risk adjustment in 2011 is an increase of £453 million (2010: £216 million), and is principally attributable to market factors rather than instrument specific credit risk. At 31 December 2011, the total liabilities for indexed products were £22 billion (2010: £20 billion), including liabilities for the embedded option of £2.6 billion (2010: £2.5 billion). If interest rates were to increase by 1%, the provision for embedded options would decrease by £152 million (2010: £151 million) and, if interest rates were to decrease by 1%, the provision would increase by £167 million (2010: £167 million).

The Group has certain products that credit interest based on a total return strategy, whereby policyholders are allowed to allocate their premium payments to different asset classes within the general account. The Group guarantees a minimum return of premium plus approximately 3% interest over the term of the contracts. The linked general account assets are fixed maturity securities, and both the securities and the contract liabilities are carried at fair value. At 31 December 2011, the liabilities for total return strategy products were £0.9 billion (2010: £1.0 billion).

The Group offers an optional lifetime guaranteed income benefit focused on the retirement income segment of the deferred annuity marketplace to help customers manage income during both the accumulation stage and the distribution stage of their financial life. At 31 December 2011, a total of £10.1 billion (2010: £8.9 billion) in indexed deferred annuities have elected this benefit, taking steps to guarantee retirement income.

### (d) Sensitivity

In providing these guarantees and options, the Group's capital position is sensitive to fluctuations in financial variables including foreign currency exchange rates, interest rates, real estate prices and equity prices. Interest rate guaranteed returns, such as those available on GAOs, are sensitive to interest rates falling below the guaranteed level. Other guarantees, such as maturity value guarantees and guarantees in relation to minimum rates of return, are sensitive to fluctuations in the investment return below the level assumed when the guarantee was made.

## 42 – Reinsurance assets

This note details the reinsurance recoverables on our insurance and investment contract liabilities.

### (a) Carrying amounts

The reinsurance assets at 31 December comprised:

	2011 £m	2010 £m
<b>Long-term business</b>		
Insurance contracts	3,747	3,650
Participating investment contracts	—	2
Non-participating investment contracts	1,626	1,463
Outstanding claims provisions	125	104
	<b>5,498</b>	<b>5,219</b>
<b>General insurance and health</b>		
Outstanding claims provisions	974	1,113
Provisions for claims incurred but not reported	395	445
	<b>1,369</b>	<b>1,558</b>
Provision for unearned premiums	245	307
	<b>1,614</b>	<b>1,865</b>
<b>Total</b>	<b>7,112</b>	<b>7,084</b>

Of the above total, £5,086 million (2010: £4,675 million) is expected to be recovered more than one year after the statement of financial position date.

### (b) Assumptions

The assumptions, including discount rates, used for reinsurance contracts follow those used for insurance contracts. Reinsurance assets are valued net of an allowance for their recoverability.

### (c) Movements

The following movements have occurred in the reinsurance asset during the year:

#### (i) In respect of long-term business provisions

	2011 £m	2010 £m
<b>Carrying amount at 1 January</b>	<b>5,115</b>	<b>5,557</b>
Asset in respect of new business	187	358
Expected change in existing business asset	7	(208)
Variance between actual and expected experience	290	81
Impact of operating assumption changes	(9)	(443)
Impact of economic assumption changes	433	(25)
Other movements	(260)	(318)
Change in asset	648	(555)
Effect of portfolio transfers, acquisitions and disposals	(2)	174
Deconsolidation of Delta Lloyd	(375)	—
Foreign exchange rate movements	(13)	(61)
<b>Carrying amount at 31 December</b>	<b>5,373</b>	<b>5,115</b>

The impact of assumption changes in the above analysis shows the resulting movement in the carrying value of reinsurance assets. The increase in the reinsurance asset from economic assumption changes mainly relates to the impact of a reduction in valuation interest rate assumptions in the UK and Ireland, with a corresponding increase made to gross insurance contract liabilities. For participating businesses, a movement in reinsurance assets is generally offset by a corresponding adjustment to the unallocated divisible surplus and does not impact on profit. Where assumption changes do impact profit, these are included in the effect of changes in assumptions and estimates during the year shown in note 43, together with the impact of movements in related liabilities and other non-financial assets.

**42 – Reinsurance assets continued****(ii) In respect of general insurance and health outstanding claims provisions and IBNR**

	2011 £m	2010 £m
<b>Carrying amount at 1 January</b>	<b>1,558</b>	1,643
Impact of changes in assumptions	<b>87</b>	17
Reinsurers' share of claim losses and expenses		
Incurred in current year	<b>247</b>	265
Incurred in prior years	<b>(84)</b>	(46)
Exceptional strengthening of general insurance latent claims provisions	<b>10</b>	—
Reinsurers' share of incurred claim losses and expenses	<b>173</b>	219
Less:		
Reinsurance recoveries received on claims		
Incurred in current year	<b>(138)</b>	(125)
Incurred in prior years	<b>(196)</b>	(282)
Reinsurance recoveries received in the year	<b>(334)</b>	(407)
Unwind of discounting	<b>19</b>	23
Other movements	<b>(1)</b>	—
Change in reinsurance asset recognised as income	<b>(56)</b>	(148)
Effect of portfolio transfers, acquisitions and disposals	<b>28</b>	34
Deconsolidation of Delta Lloyd	<b>(153)</b>	—
Foreign exchange rate movements	<b>(2)</b>	28
Other movements	<b>(6)</b>	1
<b>Carrying amount at 31 December</b>	<b>1,369</b>	1,558

**(iii) Reinsurers' share of the provision for UPR**

	2011 £m	2010 £m
<b>Carrying amount at 1 January</b>	<b>307</b>	332
Premiums ceded to reinsurers in the year	<b>650</b>	770
Less: Reinsurers' share of premiums earned during the year	<b>(678)</b>	(800)
Change in reinsurance asset recognised as income	<b>(28)</b>	(30)
Reinsurers' share of portfolio transfers and acquisitions	—	4
Deconsolidation of Delta Lloyd	<b>(30)</b>	—
Foreign exchange rate movements	<b>(4)</b>	(2)
Other movements	—	3
<b>Carrying amount at 31 December</b>	<b>245</b>	307

**43 – Effect of changes in assumptions and estimates during the year**

Certain estimates and assumptions used in determining our liabilities for insurance and investment contract business were changed from 2010 to 2011, affecting the profit recognised for the year with an equivalent effect on liabilities. This note analyses the effect of the changes. This disclosure only allows for the impact on liabilities and related assets, such as reinsurance, deferred acquisition costs and AVIF, and does not allow for offsetting movements in the value of backing financial assets.

	Effect on profit 2011 £m	Effect on profit 2010 £m
<b>Assumptions</b>		
<b>Long-term insurance business</b>		
Interest rates	<b>(2,403)</b>	(796)
Expenses	<b>5</b>	(1)
Persistency rates	<b>(4)</b>	2
Mortality for assurance contracts	<b>35</b>	71
Mortality for annuity contracts	<b>(21)</b>	(637)
Tax and other assumptions	<b>99</b>	167
<b>Investment contracts</b>		
Interest rates	<b>(82)</b>	1
Expenses	—	1
Persistency rates	—	(21)
Tax and other assumptions	<b>28</b>	(3)
<b>General insurance and health business</b>		
Change in loss ratio assumptions	<b>5</b>	(4)
Change in discount rate assumptions	<b>(90)</b>	(61)
Change in expense ratio and other assumptions	<b>22</b>	38
<b>Total</b>	<b>(2,406)</b>	(1,243)

### 43 – Effect of changes in assumptions and estimates during the year continued

The impact of interest rates for long-term business relates primarily to the UK and Netherlands driven by the reduction in valuation interest rates. This had the effect of increasing liabilities and hence a negative impact on profit. The overall impact on profit also depends on movements in the value of assets backing the liabilities, which is not included in this disclosure.

### 44 – Unallocated divisible surplus

An unallocated divisible surplus (UDS) is established where the nature of policy benefits is such that the division between shareholder reserves and policyholder liabilities is uncertain. This note shows the movements in this surplus during the year.

The following movements have occurred in the year:

	2011 £m	2010 £m
<b>Carrying amount at 1 January</b>	<b>3,428</b>	3,866
Change in participating contract assets	<b>(3,016)</b>	(444)
Change in participating contract liabilities	<b>244</b>	169
Effect of special bonus to with-profit policyholders	<b>—</b>	(58)
Other movements	<b>70</b>	4
Change in liability recognised as an expense	<b>(2,702)</b>	(329)
Effect of portfolio transfers, acquisitions and disposals	<b>—</b>	(3)
Deconsolidation of Delta Lloyd	<b>(144)</b>	—
Foreign exchange rate movements	<b>60</b>	(61)
Other movements	<b>8</b>	(45)
<b>Carrying amount at 31 December</b>	<b>650</b>	3,428

In Italy, the UDS balance was £1,449 million negative at 31 December 2011 (2010: £420 million negative). In France and Spain, certain participating funds had negative UDS balances at 31 December 2011, although in aggregate the UDS balances for each of these business units was positive (2010: Spain £15 million negative).

Negative UDS balances result from an accounting mismatch between participating assets carried at market value and participating liabilities measured using local practice. The negative balances were tested for recoverability using embedded value methodology and in line with local accounting practice. The negative balances are considered to be recoverable from margins in the existing participating business liabilities.

Losses of £17 million in Italy and £49 million in Spain were incurred for negative UDS considered irrecoverable (2010: Italy £111 million, Spain £22 million).

In Italy the method for estimation of the recoverable negative UDS balance was changed in 2011, which is an alternative acceptable method under local accounting practice. The estimation basis uses a real-world embedded value method. In 2010 the recoverability test used a market-consistent embedded value method, with the reference rates based on the swap yield curve for a AA-rated bank with no liquidity premium. Using a market-consistent embedded value method in 2011 with reference rates based on swaps with no liquidity premium would reduce the negative UDS balance to £61 million. The IFRS profit before tax would reduce by £1,445 million and total comprehensive income would reduce by £425 million net of tax and non-controlling interests. It is impracticable to determine the effect of the change in estimate for future periods.

Alternatively, using reference rates with allowance for a government spread premium based on the 'ECB AAA and Other' curve would reduce the negative UDS balance to £715 million. The IFRS profit before tax would reduce by £765 million and total comprehensive income would reduce by £225 million net of tax and non-controlling interests.

In Spain no change was made to the estimation basis that uses a market-consistent embedded value method.

## 45 – Tax assets and liabilities

This note analyses the tax assets and liabilities that appear in the statement of financial position and explains the movements in these balances in the year.

### (a) Current tax

Current tax assets recoverable and liabilities payable in more than one year are £29 million and £48 million (2010: £76 million and £246 million), respectively.

### (b) Deferred tax

(i) The balances at 31 December comprise:

	2011 £m	2010 £m
Deferred tax assets	238	288
Deferred tax liabilities	(1,171)	(1,758)
Net deferred tax liability	(933)	(1,470)

(ii) The net deferred tax liability arises on the following items:

	2011 £m	2010 £m
Long-term business technical provisions and other insurance items	455	1,051
Deferred acquisition costs	(598)	(678)
Unrealised gains on investments	(347)	(1,465)
Pensions and other post-retirement obligations	(245)	91
Unused losses and tax credits	462	713
Subsidiaries, associates and joint ventures	(10)	(9)
Intangibles and additional value of in-force long-term business	(445)	(656)
Provisions and other temporary differences	(205)	(517)
Net deferred tax liability	(933)	(1,470)

(iii) The movement in the net deferred tax liability was as follows:

	2011 £m	2010 £m
Net liability at 1 January	(1,470)	(820)
Acquisition and disposal of subsidiaries	53	(44)
Amounts credited/(charged) to income statement (note 13a)	513	(398)
Amounts charged to other comprehensive income (note 13b)	(354)	(146)
Deconsolidation of Delta Lloyd	326	—
Foreign exchange rate movements	(6)	7
Other movements	5	(69)
<b>Net liability at 31 December</b>	<b>(933)</b>	<b>(1,470)</b>

Deferred tax assets are recognised to the extent that it is probable that future taxable profits will be available against which the temporary differences can be utilised. In countries where there is a history of tax losses, deferred tax assets are only recognised in excess of deferred tax liabilities if there is convincing evidence that future profits will be available. Where this is the case, the directors have relied on business plans supporting future profits.

The Group has unrecognised tax losses and other temporary differences of £910 million (2010: £2,150 million) to carry forward against future taxable income of the necessary category in the companies concerned. Of these, trading losses of £370 million will expire within the next 20 years. The remaining losses have no expiry date.

In addition, the Group has unrecognised capital losses of £418 million (2010: £384 million). These have no expiry date.

There are no temporary differences in respect of unremitted overseas retained earnings for which deferred tax liabilities have not been recognised at 31 December 2011 (2010: £nil). Due to the availability of new information in the year, certain comparative amounts have been amended from amounts previously reported.

## 46 – Provisions

This note details the non-insurance provisions that the Group holds, and shows the movements in these during the year.

### (a) Carrying amounts

	2011 £m	2010 £m
Deficits in the main staff pension schemes (note 47e(vii))	406	527
Other obligations to main staff pension schemes – insurance policies issued by Group companies*	—	1,445
Total IAS 19 obligations to main staff pension schemes	406	1,972
Deficits in other staff pension schemes	86	129
Total IAS 19 obligations to staff pension schemes	492	2,101
Restructuring provisions	106	152
Other provisions	398	690
<b>Total</b>	<b>996</b>	<b>2,943</b>
Less: Amounts classified as held for sale	(4)	—
<b>Total</b>	<b>992</b>	<b>2,943</b>

\* The 2010 comparatives include insurance policies in respect of Delta Lloyd which were non-transferable under the requirements of IAS 19 and so were treated as other obligations to staff pension schemes within provisions above. Delta Lloyd ceased to be a subsidiary on 6 May 2011. Further details are given in note 47(e)(vii).

Other provisions comprise many small provisions throughout the Group for obligations such as costs of compensation, litigation, staff entitlements and reorganisation.

Of the total, £605 million (2010: £2,245 million) is expected to be settled more than one year after the statement of financial position date.

### (b) Movements on restructuring and other provisions

	2011		
	Restructuring provisions £m	Other provisions £m	Total £m
<b>At 1 January</b>	<b>152</b>	<b>690</b>	<b>842</b>
Additional provisions	82	69	151
Unused amounts reversed	(5)	(40)	(45)
Change in the discounted amount arising from passage of time	—	3	3
Charge to income statement	77	32	109
Utilised during the year	(50)	(124)	(174)
Disposal of subsidiaries	—	(6)	(6)
Effect of deconsolidation of Delta Lloyd	(55)	(177)	(232)
Foreign exchange rate movements	(18)	(17)	(35)
<b>At 31 December</b>	<b>106</b>	<b>398</b>	<b>504</b>
	2010		
	Restructuring provisions £m	Other provisions £m	Total £m
<b>At 1 January</b>	<b>198</b>	<b>599</b>	<b>797</b>
Additional provisions	129	281	410
Unused amounts reversed	(6)	(74)	(80)
Change in the discounted amount arising from passage of time	—	6	6
Charge to income statement	123	213	336
Utilised during the year	(160)	(119)	(279)
Acquisition of subsidiaries	—	2	2
Foreign exchange rate movements	(9)	(5)	(14)
<b>At 31 December</b>	<b>152</b>	<b>690</b>	<b>842</b>

## 47 – Pension obligations

This note describes the Group's pension arrangements for its employees and explains how our obligations to these schemes are calculated.

### (a) Introduction

The Group operates a large number of defined benefit and defined contribution pension schemes around the world. The only material defined benefit schemes are in the UK, Canada and Ireland and, prior to its deconsolidation, the Netherlands. Of these, the main UK scheme is by far the largest. This note gives full IAS 19 disclosures for these schemes while the smaller ones, while still measured under IAS 19, are included as one total within Provisions (see note 46). Similarly, while the charges to the income statement for the main schemes are shown in section (e)(iv) below, the total charges for all pension schemes are disclosed in section (d) below.

The assets of the UK, Irish and Canadian schemes are held in separate trustee-administered funds to meet long-term pension liabilities to past and present employees. In all schemes, the appointment of trustees of the funds is determined by their trust documentation, and they are required to act in the best interests of the schemes' beneficiaries. The long-term investment objectives of the trustees and the employers are to limit the risk of the assets failing to meet the liabilities of the schemes over the long term, and to maximise returns consistent with an acceptable level of risk so as to control the long-term costs of these schemes.

A full actuarial valuation of each of the defined benefit schemes is carried out at least every three years for the benefit of scheme trustees and members. Actuarial reports have been submitted for each scheme within this period, using appropriate methods for the respective countries on local funding bases.

### (b) Membership

The number of scheme members was as follows:

	United Kingdom		Ireland		Canada	
	2011 Number	2010 Number	2011 Number	2010 Number	2011 Number	2010 Number
Active members	—	7,261	1,063	1,082	636	732
Deferred members	57,328	52,833	998	933	577	578
Pensioners	30,447	29,754	707	683	1,284	1,288
<b>Total members</b>	<b>87,775</b>	<b>89,848</b>	<b>2,768</b>	<b>2,698</b>	<b>2,497</b>	<b>2,598</b>

As noted below, the final salary sections of both UK schemes were closed to future accrual with effect from 1 April 2011.

### (c) UK schemes

In the UK, the Group operates two main pension schemes, the Aviva Staff Pension Scheme (ASPS) and the smaller RAC (2003) Pension Scheme, the obligation to which was retained after the sale of RAC Limited in September 2011. New entrants join the defined contribution section of the ASPS, as the defined benefit section is closed. This scheme is operated by a trustee company, with 11 trustee directors, comprising representatives of the employers, staff, pensioners and an independent trustee (referred to below as the trustees).

On 20 October 2010, following formal consultation, the Group confirmed its decision to close the final salary sections of both UK schemes with effect from 1 April 2011, with entry into the defined contribution sections being offered to the staff members affected. The consequential reduction in the liabilities of both schemes, arising from projecting forward salaries using estimates of inflation rather than salary inflation, together with additional contributions to affected members' defined contribution accounts and implementation costs, resulted in an overall gain on closure of £286 million, which was accounted for in 2010. Closure of the schemes has removed the volatility associated with adding future accrual for active members, and has also led to lower service costs and their cash funding since April 2011.

#### (i) Defined benefit section of the ASPS

The Company works closely with the trustees who are required to consult it on the funding of the scheme and its investment strategy. Following each actuarial valuation, the Company and the trustees agree the level of contributions needed and funding levels are then monitored on an annual basis.

At 31 March 2009, the date of the last actuarial valuation, this section of the scheme had an excess of obligations over available assets, on a funding basis, which uses more prudent assumptions than are required for reporting under IAS 19, of £3.0 billion. As a result of that valuation, the Company and the trustees have agreed a long-term funding plan where contributions, together with anticipated growth in scheme investments, are expected to eliminate the funding deficit over time. Under this agreement, deficit funding payments of £378 million were made in 2010, and £178 million in 2011. Further funding payments of £150 million are expected in 2012. The funding payments, the reduction in scheme liabilities arising from scheme closures described above and the benefits arising from interest rate and inflation hedging activity have been partially offset by the impact of adverse market conditions, in particular significant falls in real gilt yields. At 31 December 2011, the funding deficit is estimated to have fallen to £2.3 billion.

The employing companies' contributions to the defined benefit section of the ASPS for the first three months of 2011 were 48% of employees' pensionable salaries, together with the cost of redundancies during the year and the additional deficit funding described above, together totalling £239 million. Active members of this section of the ASPS contributed between 5% and 7.5% of their pensionable salaries during the same period in 2011.

## 47 – Pension obligations continued

### (ii) Defined contribution (money purchase) section of the ASPS

The trustees have responsibility for selecting a range of suitable funds in which the members can choose to invest and for monitoring the performance of the available investment funds. Members are responsible for reviewing the level of contributions they pay and the choice of investment fund to ensure these are appropriate to their attitude to risk and their retirement plans. Members of this section contribute at least 2% of their pensionable salaries and, depending on the percentage chosen, the Company contributes up to a maximum 14%, together with the cost of the death-in-service benefits. These contribution rates are unchanged for 2012.

### (d) Credit/charges to the income statement

The total pension costs/(credit) of all the Group's defined benefit and defined contribution schemes were:

	2011 £m	2010 £m
<b>Continuing operations</b>		
UK defined benefit schemes	36	(227)
Overseas defined benefit schemes	22	8
Total defined benefit schemes (note 10b)	58	(219)
UK defined contribution schemes	75	53
Overseas defined contribution schemes	20	17
Total defined contribution schemes (note 10b)	95	70
<b>Total charge/(credit) from continuing operations</b>	<b>153</b>	<b>(149)</b>
<b>Total charge from discontinued operations</b>	<b>7</b>	<b>44</b>
<b>Total charge/(credit) for pension schemes</b>	<b>160</b>	<b>(105)</b>

The credit for the defined benefit schemes in 2010 arose from the £286 million gain on the closure of the UK scheme to future accrual, described in section (c) above. There were no significant contributions outstanding or prepaid as at either 31 December 2010 or 2011.

### (e) IAS 19 disclosures

Disclosures under IAS 19 for the material defined benefit schemes in the UK, Ireland and Canada, and the Netherlands prior to the deconsolidation of Delta Lloyd, are given below. Where schemes provide both defined benefit and defined contribution pensions, the assets and liabilities shown exclude those relating to defined contribution pensions. Total employer contributions for these schemes in 2012, including the ASPS deficit funding, are expected to be £250 million.

#### (i) Assumptions on scheme liabilities

##### **The projected unit credit method**

The inherent uncertainties affecting the measurement of scheme liabilities require these to be measured on an actuarial basis. This involves discounting the best estimate of future cash flows to be paid out by the scheme using the projected unit credit method. This is an accrued benefits valuation method which calculates the past service liability to members and makes allowance for their projected future earnings. It is based on a number of actuarial assumptions, which vary according to the economic conditions of the countries in which the relevant businesses are situated, and changes in these assumptions can materially affect the measurement of the pension obligations.

##### **Alternative measurement methods**

There are alternative methods of measuring liabilities, for example by calculating an accumulated benefit obligation (the present value of benefits for service already rendered but with no allowance for future salary increases) or on a solvency basis, using the cost of securing the benefits at a particular date with an insurance company or one of the growing market of alternative buy-out providers. This could take the form of a buy-out, in which the entire liability will be settled in one payment with all obligations transferred to an insurance company or buy-out provider, or a buy-in, in which annuities or other insurance products are purchased to cover a part or all of the liability. A valuation of the liabilities in either of these cases will almost always result in a higher estimate of the pension deficit than under an ongoing approach, as they assume that the sponsor immediately transfers the majority, if not all, of the risk to another provider who would be seeking to make a profit on the transaction. However, there are only a limited number of organisations that would be able to offer these options for schemes of the size of those in our Group. The full buy-out cost would only be known if quotes were obtained from such organisations but, to illustrate the cost of a buy-out valuation, an estimate for the main UK scheme is that the year-end liabilities of £8.4 billion could be valued some £5.4 billion higher, at £13.8 billion.

There is a small buy-out market in Ireland, largely restricted to pensions currently in payment and it is not clear whether current capacity would enable an immediate buy-out of our Irish pension liabilities at present. The Canadian defined benefit plan's liabilities represent the likely limit on what the Canadian group annuity market could absorb at normal competitive group annuity prices if the entire plan were subject to a buy-out valuation. There is in fact a reasonably high chance that only a portion of the plan's liabilities could be absorbed in one tranche.

IAS 19 requires us to use the projected unit credit method to measure our pension scheme liabilities. Neither of the alternative methods is considered appropriate in presenting fairly the Group's obligations to the members of its pension schemes on an ongoing basis, so they are not considered further.

## 47 – Pension obligations continued

### Valuations and assumptions

The valuations used for accounting under IAS 19 have been based on the most recent full actuarial valuations, updated to take account of that standard's requirements in order to assess the liabilities of the material schemes at 31 December 2011. Scheme assets are stated at their fair values at 31 December 2011.

The main actuarial assumptions used to calculate scheme liabilities under IAS 19 are:

	UK		Ireland	
	2011	2010	2011	2010
Inflation rate	3.1%	3.5%	2.0%	2.0%
General salary increases	4.9%	5.3%	3.5%	3.5%
Pension increases	3.1%	3.5%	2.0%	2.0%
Deferred pension increases	3.1%	3.5%	2.0%	2.0%
Discount rate	4.9%	5.5%	5.7%	5.6%
Basis of discount rate	AA-rated corporate bonds		AA-rated corporate bonds	

	Canada		Netherlands	
	2011	2010	2011	2010
Inflation rate	2.5%	2.5%	n/a	1.9%
General salary increases	3.75%	3.75%	n/a	2.9%*
Pension increases	1.25%	1.25%	n/a	1.9%**
Deferred pension increases	—	—	n/a	1.9%**
Discount rate	4.5%	5.0%	n/a	5.1%
Basis of discount rate	AA-rated corporate bonds		AA-rated corporate bonds	

\* Age-related scale increases plus 2.9%.

\*\* 2.1% until 2011 and expected return less 3% thereafter.

The discount rate and pension increase rate are the two assumptions that have the largest impact on the value of the liabilities, with the difference between them being known as the net discount rate. For each country, the discount rate is based on current average yields of high-quality debt instruments taking account of the maturities of the defined benefit obligations. A 1% increase in this rate (and therefore the net discount rate) would reduce the liabilities by £1.7 billion and the service cost for the year by £9 million. It would also reduce the interest cost on those liabilities by £1 million.

### Mortality assumptions

Mortality assumptions are significant in measuring the Group's obligations under its defined benefit schemes, particularly given the maturity of these obligations in the material schemes. The assumptions used are summarised in the table below and have been selected to reflect the characteristics and experience of the membership of these schemes.

The mortality tables, average life expectancy and pension duration used at 31 December 2011 for scheme members are as follows:

Mortality table		Normal retirement age (NRA)	Life expectancy/(pension duration) at NRA of a male		Life expectancy/(pension duration) at NRA of a female	
			Currently aged NRA	20 years younger than NRA	Currently aged NRA	20 years younger than NRA
UK – ASPS	Club Vita pooled experience, including an allowance for future improvements	60	89.9	93.2	89.9	92.1
			(29.9)	(33.2)	(29.9)	(32.1)
– RAC	SAPS series 1, including allowances for future improvement	65	87.7	90.7	89.8	91.8
			(22.7)	(25.7)	(24.8)	(26.8)
Ireland	94% PNA00 with allowance for future improvements	61	86.5	89.5	89.3	92.3
			(25.5)	(28.5)	(28.3)	(31.3)
Canada	UP1994, with Projection Scale AA applied on a generational basis	65	84.6	86.1	87.0	87.9
			(19.6)	(21.1)	(22.0)	(22.9)

The assumptions above are based on commonly used mortality tables and, in the UK, have been changed to those used by both schemes' trustees in the most recent full actuarial valuations. The new tables make allowance for observed variations in such factors as age, gender, pension amount, salary and postcode-based lifestyle group, and have been adjusted to reflect recent research into mortality experience. However, the extent of future improvements in longevity is subject to considerable uncertainty and judgement is required in setting this assumption. In the UK schemes, which are the most material to the Group, the assumptions include an allowance for future mortality improvement, based on the actuarial profession's long and medium cohort projection tables (for the ASPS and RAC schemes respectively) and incorporating underpins to the rate of future improvement equal to 1.5% per annum for males and 1.0% per annum for females. The effect of assuming all members were one year younger would increase the liabilities in all the schemes by £265 million and the service cost for the year by £1 million.

The discounted scheme liabilities have an average duration of 20 years in the main UK scheme, 22 years in the RAC scheme, 19 years in the Irish scheme and 13 years in the Canadian scheme. The undiscounted benefits payable from the main UK defined benefit scheme are expected to be as shown in the chart below:

## 47 – Pension obligations continued

### Undiscounted benefit payments £m

■ Deferred member cash flows ■ Pensioner cash flows

### (ii) Assumptions on scheme assets

The expected rates of return on the schemes' assets are:

	UK		Ireland		Canada		Netherlands	
	2012	2011	2012	2011	2012	2011	2012	2011
Equities	5.8%	<b>7.2%</b>	5.9%	<b>6.9%</b>	5.8%	<b>7.0%</b>	n/a	<b>6.2%</b>
Bonds	3.4%	<b>4.4%</b>	3.2%	<b>2.7%</b>	3.2%	<b>3.2%</b>	n/a	<b>3.6%</b>
Property	4.3%	<b>5.7%</b>	4.4%	<b>5.4%</b>	n/a	<b>n/a</b>	n/a	<b>2.9%</b>
Cash	0.7%	<b>0.6%</b>	0.9%	<b>2.7%</b>	0.8%	<b>1.0%</b>	n/a	<b>n/a</b>

The overall rates of return are based on the expected returns within each asset category and on current asset allocations. The expected returns for equities and properties are aligned with the rates used for the longer-term investment return assumptions, other than in the Netherlands, where the 2011 figures were developed in conjunction with external advisers due to the characteristics of the scheme. The figures for the total expected return on scheme assets in the following section are stated after deducting investment expenses and, in Ireland, the government levy on pension fund assets.

### (iii) Investments in Group-managed funds and insurance policies

Plan assets include investments in Group-managed funds in the consolidated statement of financial position of £112 million (2010: £116 million) and insurance policies with other Group companies of £163 million (2010: £160 million) in the main UK scheme. Prior to the deconsolidation of Delta Lloyd, the assets of the Dutch scheme mainly consisted of insurance policies with that company, totalling £1,445 million at 31 December 2010. The Dutch insurance policies were considered non-transferable under the terms of IAS 19 and so, in the 2010 comparatives, were treated as other obligations to staff pension schemes within provisions (see note 46).

The treatment in the relevant parts of the financial statements is as follows:

- *Plan assets* – the treatment of these funds and policies in the consolidated statement of financial position is described above.
- *Expected rates of return* – where the relevant insurance policies are in segregated funds with specific asset allocations, their expected rates of return are included in the appropriate line in the table in section (ii) above.
- *Pension expense* – to avoid double-counting of investment income on scheme assets and the assets backing the underlying policies, adjustments have been made to the former in the discontinued operations part of the tables in section (iv) below.

## 47 – Pension obligations continued

### (iv) Pension expense

As noted above, plan assets in the UK and Dutch schemes include insurance policies with other Group companies. To avoid double-counting of investment income on scheme assets and the assets backing the underlying policies, adjustments have been made to the former as shown in the tables below.

The total pension expense for these schemes comprises:

#### Recognised in the income statement

	2011 £m	2010 £m
<b>Continuing operations</b>		
Current service cost	(51)	(126)
Past service cost	—	(10)
Gains on curtailments	—	347
Total pension (cost)/credit from continuing operations	(51)	211
Total pension cost from discontinued operations	(7)	(34)
Total pension (cost)/credit charged to net operating expenses	(58)	177
Expected return on scheme assets	452	457
Interest charge on scheme liabilities	(539)	(584)
Charge to finance costs from continuing operations	(87)	(127)
Charge to finance costs from discontinued operations	(26)	(68)
Total charge to finance costs	(113)	(195)
<b>Total (charge)/credit to income arising from continuing operations</b>	<b>(138)</b>	<b>84</b>
<b>Total charge to income arising from discontinued operations</b>	<b>(33)</b>	<b>(102)</b>
<b>Total charge to income</b>	<b>(171)</b>	<b>(18)</b>

The gains on curtailments in 2010 principally arose from closure of the UK schemes to future accrual, described in section (c) above.

#### Recognised in the statement of comprehensive income

	2011 £m	2010 £m
<b>Continuing operations</b>		
Expected return on scheme assets	(452)	(457)
Actual return on these assets	1,815	1,001
Actuarial gains on scheme assets	1,363	544
Experience (losses)/gains arising on scheme liabilities	(46)	382
Changes in assumptions underlying the present value of the scheme liabilities	(321)	152
<b>Actuarial gains from continuing operations</b>	<b>996</b>	<b>1,078</b>
<b>Actuarial gains/(losses) from discontinued operations</b>	<b>11</b>	<b>(79)</b>
<b>Total actuarial gains recognised in other comprehensive income</b>	<b>1,007</b>	<b>999</b>
Attributable to equity shareholders of Aviva plc	1,002	1,033
Attributable to non-controlling interests	5	(34)
	<b>1,007</b>	<b>999</b>

## 47 – Pension obligations continued

The loss arising from changes in assumptions in 2011 primarily reflects the impact of lower discount rates for liabilities across all but the Irish schemes.

The cumulative amount of actuarial gains and losses on the pension schemes recognised in other comprehensive income since 1 January 2004 (the date of transition to IFRS) is a loss of £224 million at 31 December 2011 (2010: cumulative loss of £1,231 million).

### (v) Experience gains and losses

The following disclosures of experience gains and losses give a five-year history. Scheme assets exclude insurance policies with Group companies and income on the assets underlying them.

	2011 £m	2010 £m	2009 £m	2008 £m	2007 £m
Fair value of scheme assets at the end of the year	<b>11,791</b>	9,971	8,754	7,936	8,814
Present value of scheme liabilities at the end of the year	<b>(10,527)</b>	(11,419)	(11,812)	(9,951)	(10,017)
Net surplus/(deficits) in the schemes	<b>1,264</b>	(1,448)	(3,058)	(2,015)	(1,203)
Difference between the expected and actual return on scheme assets					
Amount of gains/(losses)	<b>1,363</b>	547*	561*	(1,893)*	(138)*
Percentage of the scheme assets at the end of the year	<b>11.6%</b>	5.5%	6.4%	23.8%	1.6%
Experience gains/(losses) on scheme liabilities (excluding changes in assumptions)					
Amount of gains/(losses)	<b>(46)</b>	450*	77*	105*	(80)*
Percentage of the present value of scheme liabilities	<b>0.4%</b>	3.9%	0.7%	1.1%	0.8%

\* Including gains and losses from discontinued operations.

### (vi) Risk management and asset allocation strategy

As noted above, the long-term investment objectives of the trustees and the employers are to limit the risk of the assets failing to meet the liabilities of the schemes over the long term, and to maximise returns consistent with an acceptable level of risk so as to control the long-term costs of these schemes. To meet these objectives, each scheme's assets are invested in a diversified portfolio, consisting primarily of equity and debt securities. These reflect the current long-term asset allocation ranges chosen, having regard to the structure of liabilities within the schemes.

#### Main UK scheme

Both the Group and the trustees regularly review the asset/liability management of the main UK scheme. It is fully understood that, while the current asset mix is designed to produce appropriate long-term returns, this introduces a material risk of volatility in the scheme's surplus or deficit of assets compared with its liabilities.

The principal asset risks to which the scheme is exposed are:

- *Equity market risk* – the effect of equity market falls on the value of plan assets.
- *Inflation risk* – the effect of inflation rising faster than expected on the value of the plan liabilities.
- *Interest rate risk* – falling interest rates leading to an increase in liabilities significantly exceeding the increase in the value of assets.

There is also an exposure to currency risk where assets are not denominated in the same currency as the liabilities. The majority of this exposure has been removed by the use of hedging instruments.

In 2011, there has been a further reduction in the proportion of assets invested in equities, thereby mitigating the equity risk above. In addition, the trustees have taken further measures to partially mitigate inflation and interest rate risks.

#### Other schemes

The other schemes are considerably less material but their risks are managed in a similar way to those in the main UK scheme.

**47 – Pension obligations continued****(vii) Recognition in the statement of financial position**

The assets and liabilities of the schemes, attributable to defined benefit members, including investments in Group insurance policies (see footnote below), at 31 December 2011 were:

	UK	Ireland	Canada	Total
	£m	£m	£m	2011 £m
Equities	735	46	76	857
Bonds	8,663	233	129	9,025
Property	657	13	—	670
Other	1,135	90	14	1,239
Total fair value of assets	11,190	382	219	11,791
Present value of scheme liabilities	(9,606)	(539)	(382)	(10,527)
<b>Net surplus/(deficits) in the schemes</b>	<b>1,584</b>	<b>(157)</b>	<b>(163)</b>	<b>1,264</b>
Surplus included in other assets (note 27)	1,670	—	—	1,670
Deficits included in provisions (note 46)	(86)	(157)	(163)	(406)
	<b>1,584</b>	<b>(157)</b>	<b>(163)</b>	<b>1,264</b>

	UK	Ireland	Canada	Netherlands	Total
	£m	£m	£m	£m	2010 £m
Equities	2,435	50	54	244	2,783
Bonds	5,533	202	150	1,061	6,946
Property	558	17	—	81	656
Other	835	118	12	66	1,031
Total fair value of assets	9,361	387	216	1,452	11,416
Present value of scheme liabilities	(9,044)	(551)	(362)	(1,462)	(11,419)
<b>Net surplus/(deficits) in the schemes</b>	<b>317</b>	<b>(164)</b>	<b>(146)</b>	<b>(10)</b>	<b>(3)</b>
Surplus included in other assets (note 27)	524	—	—	—	524
Deficits included in provisions (note 46)	(207)	(164)	(146)	(10)	(527)
	<b>317</b>	<b>(164)</b>	<b>(146)</b>	<b>(10)</b>	<b>(3)</b>

Other assets comprise cash at bank, derivative financial instruments, receivables and payables.

Plan assets in the table above include investments in Group-managed funds and insurance policies, as described in section (iii) above. Where the investment and insurance policies are in segregated funds with specific asset allocations, they are included in the appropriate line in the table above, otherwise they appear in 'Other'.

Prior to the deconsolidation of Delta Lloyd, the Dutch insurance policies (£1,445 million at 31 December 2010) were considered non-transferable under the terms of IAS 19 and so were treated as other obligations to staff pension schemes within the 2010 comparatives for provisions (see note 46).

The total IAS 19 obligations and strict IAS 19 assets (i.e. excluding the non-transferable insurance policies) of the schemes at 31 December 2010 gave a net deficit of £1,448 million, as shown in the following table.

	UK	Ireland	Canada	Netherlands	Total
	£m	£m	£m	£m	2010 £m
Equities	2,435	50	54	—	2,539
Bonds	5,533	202	150	—	5,885
Property	558	17	—	—	575
Other	835	118	12	7	972
Total fair value of assets	9,361	387	216	7	9,971
Present value of scheme liabilities	(9,044)	(551)	(362)	(1,462)	(11,419)
<b>Net surplus/(deficits) in the schemes</b>	<b>317</b>	<b>(164)</b>	<b>(146)</b>	<b>(1,455)</b>	<b>(1,448)</b>
Surplus included in other assets (note 27)	524	—	—	—	524
Deficits included in provisions (note 46)	(207)	(164)	(146)	(1,455)	(1,972)
	<b>317</b>	<b>(164)</b>	<b>(146)</b>	<b>(1,455)</b>	<b>(1,448)</b>

The present value of unfunded post-retirement benefit obligations included in the totals in both sets of tables above is £116 million (2010: £130 million).

**47 – Pension obligations continued****(viii) Movements in the scheme deficits and surpluses**

Movements in the pension schemes' surpluses and deficits comprise:

	2011				
	Scheme assets £m	Scheme liabilities £m	Pension scheme net surplus/ (deficit) £m	Adjust for Group insurance policies £m	IAS 19 pensions net surplus/ (deficit) £m
<b>Net deficits in the schemes at 1 January</b>	<b>11,416</b>	<b>(11,419)</b>	<b>(3)</b>	<b>(1,445)</b>	<b>(1,448)</b>
Employer contributions	452	—	452	(66)	386
Employee contributions	12	(12)	—	(9)	(9)
Benefits paid	(356)	356	—	15	15
Current and past service cost (see (iv) above)	—	(58)	(58)	—	(58)
Credit/(charge) to finance costs (see (iv) above)	465	(565)	(100)	(13)	(113)
Actuarial gains/(losses) (see (iv) above)	1,347	(356)	991	16	1,007
Disposals	(23)	30	7	—	7
Deconsolidation of Delta Lloyd	(1,589)	1,558	(31)	1,582	1,551
Exchange rate movements on foreign plans	67	(61)	6	(80)	(74)
<b>Net surplus in the schemes at 31 December</b>	<b>11,791</b>	<b>(10,527)</b>	<b>1,264</b>	<b>—</b>	<b>1,264</b>

	2010				
	Scheme assets £m	Scheme liabilities £m	Pension scheme net deficit £m	Adjust for Group insurance policies £m	IAS 19 pensions net deficit £m
<b>Deficits in the schemes at 1 January</b>	<b>10,105</b>	<b>(11,812)</b>	<b>(1,707)</b>	<b>(1,351)</b>	<b>(3,058)</b>
Employer contributions	579	—	579	(34)	545
Employee contributions	15	(15)	—	(9)	(9)
Benefits paid	(385)	385	—	47	47
Current and past service cost (see (iv) above)	—	(170)	(170)	—	(170)
Gains/(losses) on curtailments (see (iv) above)	(1)	348	347	—	347
Credit/(charge) to finance costs (see (iv) above)	522	(652)	(130)	(65)	(195)
Actuarial gains/(losses) (see (iv) above)	623	456	1,079	(80)	999
Transfers	1	2	3	(1)	2
Exchange rate movements on foreign plans	(43)	39	(4)	48	44
<b>Deficits in the schemes at 31 December</b>	<b>11,416</b>	<b>(11,419)</b>	<b>(3)</b>	<b>(1,445)</b>	<b>(1,448)</b>

The fall in the pension schemes' net deficits during 2011 is mainly attributable to increases in investment values and additional employer contributions, partly offset by changes in actuarial assumptions.

## 48 – Borrowings

Our borrowings are either core structural borrowings or operational borrowings. This note shows the carrying values and contractual maturity amounts of each type, and explains their main features and movements during the year.

### (a) Analysis of total borrowings

Total borrowings comprise:

	2011 £m	2010 £m
Core structural borrowings, at amortised cost	5,255	6,066
Operational borrowings, at amortised cost	1,889	4,193
Operational borrowings, at fair value	1,306	4,690
<b>Total</b>	<b>8,450</b>	<b>14,949</b>

### (b) Core structural borrowings

(i) The carrying amounts of these borrowings are:

	2011				2010			
	Upper Tier 2 £m	Lower Tier 2 £m	Senior £m	Total £m	Upper Tier 2 £m	Lower Tier 2 £m	Senior £m	Total £m
<b>Subordinated debt</b>								
6.125% £700 million subordinated notes 2036	—	690	—	690	—	690	—	690

6.875% £200 million subordinated notes 2058	—	199	—	199	—	199	—	199
6.875% €500 million subordinated notes 2038	—	416	—	416	—	427	—	427
10.6726% £200 million subordinated notes 2019	—	200	—	200	—	200	—	200
10.464% €50 million subordinated notes 2019	—	42	—	42	—	43	—	43
6.625% £450 million subordinated notes 2041	—	446	—	446	—	—	—	—
8.25% \$400 million subordinated notes 2041	—	248	—	248	—	—	—	—
	<b>1,208</b>	<b>3,342</b>	<b>—</b>	<b>4,550</b>	<b>1,217</b>	<b>3,355</b>	<b>—</b>	<b>4,572</b>
<b>Debenture loans</b>								
9.5% guaranteed bonds 2016	—	—	199	199	—	—	199	199
4.25% senior bonds 2017 issued by Delta Lloyd N.V.	—	—	—	—	—	—	489	489
2.5% subordinated perpetual loan notes	—	—	—	—	—	151	—	151
Other loans	—	—	—	—	—	—	12	12
	—	—	<b>199</b>	<b>199</b>	—	151	700	851
<b>Commercial paper</b>	—	—	<b>506</b>	<b>506</b>	—	—	643	643
<b>Total</b>	<b>1,208</b>	<b>3,342</b>	<b>705</b>	<b>5,255</b>	<b>1,217</b>	<b>3,506</b>	<b>1,343</b>	<b>6,066</b>

The classifications between Upper Tier 2, Lower Tier 2 and Senior debt shown above are as defined by the FSA in GENPRU Annex 1 'Capital Resources'.

Subordinated debt is stated net of notes held by Group companies of £32 million (2010: £34 million). All the above borrowings are stated at amortised cost.

As described in note 57(a), the Group has designated a portion of its euro and US dollar denominated debt as a hedge of the net investment in its European and American subsidiaries. The carrying value of the debt, included in the table above, at 31 December 2011 was £1,815 million (2010: £2,791 million).

(ii) The contractual maturity dates of undiscounted cash flows for these borrowings are:

	2011			2010		
	Principal £m	Interest £m	Total £m	Principal £m	Interest £m	Total £m
Within 1 year	506	312	818	655	512	1,167
1 to 5 years	200	1,237	1,437	—	1,783	1,783
5 to 10 years	435	1,395	1,830	1,128	2,090	3,218
10 to 15 years	510	1,236	1,746	1,243	1,788	3,031
Over 15 years	3,643	2,859	6,502	3,382	6,244	9,626
<b>Total contractual undiscounted cash flows</b>	<b>5,294</b>	<b>7,039</b>	<b>12,333</b>	<b>6,408</b>	<b>12,417</b>	<b>18,825</b>

## 48 – Borrowings continued

Borrowings are considered current if the contractual maturity dates are within a year. Where subordinated debt is undated or loan notes are perpetual, the interest payments have not been included beyond 15 years. Annual interest payments for these borrowings are £73 million (2010: £84 million).

Contractual undiscounted interest payments are calculated based on underlying fixed interest rates or prevailing market floating rates as applicable. Year-end exchange rates have been used for interest projections on loans in foreign currencies.

### (c) Operational borrowings

#### (i) The carrying amounts of these borrowings are:

	2011 £m	2010 £m
<b>Amounts owed to financial institutions</b>		
Loans	1,889	2,550
<b>Securitised mortgage loan notes</b>		
UK lifetime mortgage business	1,306	1,288
Dutch domestic mortgage business	—	5,045
	<b>1,306</b>	<b>6,333</b>
<b>Total</b>	<b>3,195</b>	<b>8,883</b>

All the above borrowings are stated at amortised cost, except for the loan notes issued in connection with the UK lifetime mortgage business of £1,306 million (2010: £1,288 million) and £nil (2010: £3,402 million) of the loan notes issued in connection with the Dutch domestic mortgage business, which were carried at fair value prior to the deconsolidation of Delta Lloyd. For the UK loan notes carried at fair value, their values are modelled on risk-adjusted cash flows for defaults discounted at a risk-free rate plus a market-determined liquidity premium, and are therefore classified as 'Level 2' in the fair value hierarchy. These have been designated at fair value through profit and loss in order to present the relevant mortgages, borrowings and derivative financial instruments at fair value, since they are managed as a portfolio on a fair value basis. This presentation provides more relevant information and eliminates any accounting mismatch.

The securitised mortgage loan notes are at various fixed, floating and index-linked rates. Further details about these notes are given in note 24.

#### (ii) The contractual maturity dates of undiscounted cash flows for these borrowings are:

	2011			2010		
	Principal £m	Interest £m	Total £m	Principal £m	Interest £m	Total £m
Less than 1 year	677	39	716	1,560	220	1,780
1 to 5 years	995	124	1,119	1,157	899	2,056
5 to 10 years	247	82	329	266	1,084	1,350
10 to 15 years	510	64	574	317	956	1,273
Over 15 years	1,008	439	1,447	5,198	4,077	9,275
	<b>3,437</b>	<b>748</b>	<b>4,185</b>	<b>8,498</b>	<b>7,236</b>	<b>15,734</b>

Contractual undiscounted interest payments are calculated based on underlying fixed interest rates or prevailing market floating rates as applicable. Year-end exchange rates have been used for interest projections on loans in foreign currencies.

### (d) Description and features

#### (i) Subordinated debt

A description of each of the subordinated notes is set out in the table below:

Notional amount	Issue date	Redemption date	Callable at par at option of the Company from	In the event the Company does not call the notes, the coupon will reset at each applicable reset date to
£700 million	14 Nov 2001	14 Nov 2036	16 Nov 2026	5 year Benchmark Gilt + 2.85%
€650 million	29 Sep 2003	02 Oct 2023	02 Oct 2013	3 month Euribor + 2.08%
€500 million	29 Sep 2003	Undated	29 Sep 2015	3 month Euribor + 2.35%
£800 million	29 Sep 2003	Undated	29 Sep 2022	5 year Benchmark Gilt + 2.40%
US\$300 million	19 Dec 2006	19 Jun 2017	19 Jun 2012	3 month US LIBOR + 0.84%
£400 million	20 May 2008	20 May 2058	20 May 2038	3 month LIBOR + 3.26%
£200 million	8 Aug 2008	20 May 2058	20 May 2038	3 month LIBOR + 3.26%
€500 million	20 May 2008	22 May 2038	22 May 2018	3 month Euribor + 3.35%
£200 million	1 Apr 2009	1 Apr 2019	1 Apr 2014	3 month LIBOR + 8.10%
€50 million	30 Apr 2009	30 Apr 2019	30 Apr 2014	3 month Euribor + 8.25%
£450 million	26 May 2011	3 June 2041	3 June 2021	6 month LIBOR + 4.136%
US\$400 million	22 Nov 2011	1 Dec 2041	1 Dec 2016	8.25% (fixed)

## 48 – Borrowings continued

Subordinated notes issued by the Company rank below its senior obligations and ahead of its preference shares and ordinary share capital. The dated subordinated notes rank ahead of the undated subordinated notes. The fair value of these notes at 31 December 2011 was £3,814 million (2010: £4,370 million), calculated with reference to quoted prices.

### (ii) Debenture loans

The 9.5% guaranteed bonds were issued by the Company at a discount of £1.1 million. This discount and the issue expenses are being amortised over the full term of the bonds. Although these bonds were issued in sterling, the loans have effectively been converted into euro liabilities through the use of financial instruments in a subsidiary.

Other loans totalling £nil (2010: £12 million) related to borrowings in the US which were fully repaid during the year.

All these borrowings are at fixed rates and their fair value at 31 December 2011 was £246 million (2010: £860 million), calculated with reference to quoted prices.

### (iii) Commercial paper

The commercial paper consists of £506 million issued by the Company (2010: £504 million) and is considered core structural funding.

All commercial paper is repayable within one year and is issued in a number of different currencies, primarily sterling, euros and US dollars. Its fair value is considered to be the same as its carrying value.

### (iv) Loans

Loans comprise:

	2011 £m	2010 £m
Non-recourse		
Loans to property partnerships (see (a) below)	1,128	1,098
Loans to Irish investment funds (see (b) below)	33	34
UK Life reinsurance (see (c) below)	254	217
Other non-recourse loans (d)	224	193
	<b>1,639</b>	1,542
Other loans (see (e) below)	250	1,008
	<b>1,889</b>	2,550

(a) As explained in accounting policy D, the UK long-term business policyholder funds have invested in a number of property limited partnerships (PLPs). The PLPs have raised external debt, secured on their respective property portfolios, and the lenders are only entitled to obtain payment of both interest and principal to the extent there are sufficient resources in the respective PLPs. The lenders have no recourse whatsoever to the policyholder or shareholders' funds of any companies in the Group. Loans of £1,128 million (2010: £1,098 million) included in the table relate to those PLPs which have been consolidated as subsidiaries.

(b) Certain Irish policyholder investment funds and unit trusts, which have been fully consolidated in accordance with accounting policy D, have raised borrowings with external credit institutions. The borrowings are secured on the funds, with the only recourse on default being the underlying investments in these funds and unit trusts. The lenders have no recourse whatsoever to the shareholders' funds of any companies in the Aviva Group. These loans run for a period of five years, with interest rates fixed monthly and based on a fixed margin above the euro inter-bank rate.

(c) The UK long-term business entered into a financial reinsurance agreement with Swiss Re in 2008, under which up-front payments are received from Swiss Re in return for 90% of future surplus arising. The loan will be repaid as profits emerge on the business.

(d) Other non-recourse loans include external debt raised by special purpose vehicles in the UK long-term business. The lenders have no recourse whatsoever to the shareholders' funds of any companies in the Group.

(e) Other loans include external debt raised by overseas long-term businesses to fund operations.

## 48 – Borrowings continued

### (v) Securitised mortgage loan notes

Loan notes have been issued by special purpose securitisation companies in the UK and, prior to the deconsolidation of Delta Lloyd, the Netherlands. Details of these securitisations are given in note 24.

### (e) Movements during the year

Movements in borrowings during the year were:

	2011		
	Core structural £m	Operational £m	Total £m
New borrowings drawn down, including commercial paper, net of expenses	3,853	1,042	4,895
Repayment of borrowings, including commercial paper	(3,848)	(1,283)	(5,131)
Net cash inflow/(outflow)	5	(241)	(236)
Foreign exchange rate movements	9	193	202
Borrowings acquired/(loans repaid) for non-cash consideration	—	34	34
Fair value movements	—	8	8
Amortisation of discounts and other non-cash items	3	—	3
Deconsolidation of Delta Lloyd	(816)	(5,683)	(6,499)
Movements in debt held by Group companies*	(12)	1	(11)
Movements in the year	(811)	(5,688)	(6,499)
Balance at 1 January	6,066	8,883	14,949
<b>Balance at 31 December</b>	<b>5,255</b>	<b>3,195</b>	<b>8,450</b>

Movements in borrowings during the previous year were:

	2010		
	Core structural £m	Operational £m	Total £m
New borrowings drawn down, including commercial paper, net of expenses	2,921	726	3,647
Repayment of borrowings, including commercial paper	(2,274)	(613)	(2,887)
Net cash inflow	647	113	760
Foreign exchange rate movements	(77)	(801)	(878)
Borrowings acquired/(loans repaid) for non-cash consideration	—	(4)	(4)
Fair value movements	—	59	59
Amortisation of discounts and other non-cash items	1	—	1
Movements in debt held by Group companies*	6	5	11
Movements in the year	577	(628)	(51)
Balance at 1 January	5,489	9,511	15,000
<b>Balance at 31 December</b>	<b>6,066</b>	<b>8,883</b>	<b>14,949</b>

\* Certain subsidiary companies have purchased issued subordinated notes and securitised loan notes as part of their investment portfolios. In the consolidated statement of financial position, borrowings are shown net of these holdings but movements in such holdings over the year are reflected in the tables above.

All movements in fair value in 2010 and 2011 on securitised mortgage loan notes designated as fair value through profit or loss were attributable to changes in market conditions.

### (f) Undrawn borrowings

The Group and Company have the following undrawn committed central borrowing facilities available to it, of which £750 million (2010: £750 million) is used to support the commercial paper programme:

	2011 £m	2010 £m
Expiring within one year	955	975
Expiring beyond one year	1,160	1,135
	<b>2,115</b>	<b>2,110</b>

## 49 – Payables and other financial liabilities

This note analyses our payables and other financial liabilities at the end of the year.

	2011 £m	2010 £m
Payables arising out of direct insurance	<b>1,098</b>	1,426
Payables arising out of reinsurance operations	<b>360</b>	571
Deposits and advances received from reinsurers	<b>346</b>	773
Bank overdrafts	<b>668</b>	760
Derivative liabilities (note 57)	<b>1,850</b>	2,382
Bank customer accounts	—	4,780
Bank deposits received from other banks	—	1,772
Amounts due to brokers for investment purchases	<b>60</b>	498
Obligations for repayment of cash collateral received (notes 25d(i) & 57c)	<b>5,229</b>	4,825
Obligations under stock repurchase arrangements (note 25d(ii))	—	853
Other financial liabilities	<b>1,628</b>	1,652
	<b>11,239</b>	20,292
Less: Amounts classified as held for sale	<b>(9)</b>	—
	<b>11,230</b>	20,292
Expected to be settled within one year	<b>10,253</b>	19,155
Expected to be settled in more than one year	<b>977</b>	1,137
	<b>11,230</b>	20,292

Bank overdrafts arise substantially from un-presented cheques and amount to £211 million (2010: £319 million) in long-term business operations and £457 million (2010: £441 million) in general business and other operations.

All payables and other financial liabilities are carried at cost, which approximates to fair value, except for derivative liabilities, which are carried at their fair values.

## 50 – Other liabilities

This note analyses our other liabilities at the end of the year.

	2011 £m	2010 £m
Deferred income	<b>359</b>	789
Reinsurers' share of deferred acquisition costs	<b>12</b>	79
Accruals	<b>1,336</b>	1,896
Other liabilities	<b>1,128</b>	1,415
	<b>2,835</b>	4,179
Less: Amounts classified as held for sale	<b>(7)</b>	—
	<b>2,828</b>	4,179
Expected to be settled within one year	<b>2,195</b>	3,734
Expected to be settled in more than one year	<b>633</b>	445
	<b>2,828</b>	4,179

## 51 – Contingent liabilities and other risk factors

This note sets out the main areas of uncertainty over the calculation of our liabilities.

### (a) Uncertainty over claims provisions

Note 39 gives details of the estimation techniques used by the Group to determine the general business outstanding claims provisions and of the methodology and assumptions used in determining the long-term business provisions. These approaches are designed to allow for the appropriate cost of policy-related liabilities, with a degree of prudence, to give a result within the normal range of outcomes. To the extent that the ultimate cost falls outside this range, for example where experience is worse than that assumed, or future general business claims inflation differs from that expected, there is uncertainty in respect of these liabilities.

### (b) Asbestos, pollution and social environmental hazards

In the course of conducting insurance business, various companies within the Group receive general insurance liability claims, and become involved in actual or threatened related litigation arising there from, including claims in respect of pollution and other environmental hazards. Among these are claims in respect of asbestos production and handling in various jurisdictions, including Europe, Canada and Australia. Given the significant delays that are experienced in the notification of these claims, the potential number of incidents which they cover and the uncertainties associated with establishing liability and the availability of reinsurance, the ultimate cost cannot be determined with certainty. However, on the basis of current information having regard to the level of provisions made for general insurance claims, the directors consider that any additional costs arising are not likely to have a material impact on the financial position of the Group.

### (c) Guarantees on long-term savings products

As a normal part of their operating activities, various Group companies have given guarantees and options, including interest rate guarantees, in respect of certain long-term insurance and fund management products. Note 41 gives details of these guarantees and options. In providing these guarantees and options, the Group's capital position is sensitive to fluctuations in financial variables including foreign currency exchange rates, interest rates, property values and equity prices. Interest rate guaranteed returns, such as those available on GAOs, are sensitive to interest rates falling below the guaranteed level. Other guarantees, such as maturity value guarantees and guarantees in relation to minimum rates of return, are sensitive to fluctuations in the investment return below the level assumed when the guarantee was made. The directors continue to believe that the existing provisions for such guarantees and options are sufficient.

### (d) Regulatory compliance

The Group's insurance and investment business is subject to local regulation in each of the countries in which it operates. The FSA regulates the Group's UK business and monitors the financial resources and organisation of the Group as a whole. The FSA has broad powers including the authority to grant, vary the terms of, or cancel a regulated firm's authorisation; to investigate marketing and sales practices; and to require the maintenance of adequate financial resources. The Group's regulators outside the UK typically have similar powers, but in some cases they operate a system of 'prior product approval' and hence place less emphasis than the FSA on regulating sales and marketing practices.

The Group's regulated businesses have compliance resources to respond to regulatory enquiries in a constructive way, and take corrective action when warranted. However, all regulated financial services companies face the risk that their regulator could find that they have failed to comply with applicable regulations or have not undertaken corrective action as required.

The impact of any such finding (whether in the UK or overseas) could have a negative impact on the Group's reported results or on its relations with current and potential customers. Regulatory action against a member of the Group could result in adverse publicity for, or negative perceptions regarding, the Group, or could have a material adverse effect on the business of the Group, its results of operations and/or financial condition and divert management's attention from the day-to-day management of the business.

### (e) Payment protection insurance (PPI) mis-selling

In September 2009, the FSA launched an investigation into sales practices for payment protection insurance (PPI). On 10 August 2010, the FSA announced that mis-selling of PPI policies had been widespread and that consumers who could prove mis-selling would be entitled to financial redress from distributors of the policies. The directors do not consider that the Group is liable for mis-selling in its role as underwriter and so no provision is currently necessary.

## 51 – Contingent liabilities and other risk factors continued

### (f) Structured settlements

In Canada, annuities have been purchased from licensed Canadian life insurers to provide for fixed and recurring payments to claimants. As a result of these arrangements, the Group is exposed to credit risk to the extent that any of the life insurers fail to fulfil their obligations. The Group's maximum exposure to credit risk for these arrangements is approximately £686 million as at 31 December 2011 (2010: £683 million) based on estimated replacement cost for the underlying annuities. The credit risk is managed by acquiring annuities from a diverse portfolio of life insurers with proven financial stability. The risk is reduced to the extent of coverage provided by Assuris, the Canadian life insurance industry compensation plan. No information has come to the Group's attention that would suggest any weakness or failure in the Canadian life insurers from which it has purchased annuities.

### (g) Other

In the course of conducting insurance and investment business, various Group companies receive liability claims, and become involved in actual or threatened related litigation. In the opinion of the directors, adequate provisions have been established for such claims and no material loss will arise in this respect.

The Company and several of its subsidiaries have guaranteed the overdrafts and borrowings of certain other Group companies. At 31 December 2011, the total exposure of the Group and Company is £nil (2010: £nil) and £334 million (2010: £343 million) respectively and, in the opinion of the directors, no material loss will arise in respect of these guarantees and indemnities.

In addition, in line with standard business practice, various Group companies have given guarantees, indemnities and warranties in connection with disposals in recent years of subsidiaries and associates to parties outside the Aviva Group. In the opinion of the directors, no material loss will arise in respect of these guarantees, indemnities and warranties.

The Group's insurance subsidiaries pay contributions to levy schemes in several countries in which we operate. Given the economic environment, there is a heightened risk that the levy contributions will need to be increased to protect policyholders if an insurance company falls into financial difficulties. The directors continue to monitor the situation but are not aware of any need to increase provisions at the statement of financial position date.

## 52 – Commitments

This note gives details of our commitments to capital expenditure and under operating leases.

### (a) Capital commitments

Contractual commitments for acquisitions or capital expenditures of investment property and property and equipment, which have not been recognised in the financial statements, are as follows:

	2011 £m	2010 £m
Investment property	23	63
Property and equipment	36	160
	<b>59</b>	<b>223</b>

Contractual obligations for future repairs and maintenance on investment properties are £nil (2010: £1 million).

The Group has capital commitments to its joint ventures of £258 million (2010: £45 million) and to other investment vehicles of £nil (2010: £nil).

### (b) Operating lease commitments

(i) Future contractual aggregate minimum lease rentals receivable under non-cancellable operating leases are as follows:

	2011 £m	2010 £m
Within 1 year	313	374
Later than 1 year and not later than 5 years	562	1,206
Later than 5 years	1,738	2,270
	<b>2,613</b>	<b>3,850</b>

(ii) Future contractual aggregate minimum lease payments under non-cancellable operating leases are as follows:

	2011 £m	2010 £m
Within 1 year	120	136
Later than 1 year and not later than 5 years	400	423
Later than 5 years	667	737
	<b>1,187</b>	<b>1,296</b>
Total future minimum sub-lease payments expected to be received under non-cancellable sub-leases	<b>56</b>	<b>63</b>

## 53 – Statement of cash flows

This note gives further detail behind the figures in the statement of cash flows.

### (a) The reconciliation of profit before tax to the net cash inflow from operating activities is:

	2011 £m	2010 £m
<b>Profit before tax from continuing operations</b>	<b>635</b>	1,939
Adjustments for:		
Share of loss/(profits) of joint ventures and associates	123	(141)
Dividends received from associates	71	16
(Profit)/loss on sale of:		
Investment property	(10)	(41)
Property and equipment	(4)	5
Subsidiaries, joint ventures and associates	(565)	(163)
Investments	(1,378)	(1,737)
	<b>(1,957)</b>	(1,936)
Fair value (gains)/losses on:		
Investment property	(148)	(464)
Investments	5,527	(7,027)
Borrowings	1	12
	<b>5,380</b>	(7,479)
Depreciation of property and equipment	57	64
Equity compensation plans, equity settled expense	48	50
Impairment and expensing of:		
Goodwill on subsidiaries	160	3
Financial investments, loans and other assets	118	83
Acquired value of in-force business and intangibles	56	16
Non-financial assets	1	(1)
	<b>335</b>	101
Amortisation of:		
Premium or discount on debt securities	82	84
Premium or discount on borrowings	3	2
Premium or discount on non participating investment contracts	45	17
Financial instruments	3	73
Acquired value of in-force business and intangibles	390	324
	<b>523</b>	500
Change in unallocated divisible surplus	(2,721)	(362)
Interest expense on borrowings	711	576
Net finance charge on pension schemes	87	127
Foreign currency exchange losses/(gains)	35	(36)
<b>Changes in working capital</b>		
(Increase)/decrease in reinsurance assets	(584)	658
(Increase) in deferred acquisition costs	(246)	(604)
Increase in insurance liabilities and investment contracts	2,044	14,017
Increase in other assets and liabilities	908	1,306
	<b>2,122</b>	15,377
<b>Net purchases of operating assets</b>		
Purchases of investment property	(1,211)	(1,070)
Proceeds on sale of investment property	719	798
Net purchases of financial investments	(4,850)	(7,187)
	<b>(5,342)</b>	(7,459)
<b>Cash generated from operating activities – continuing operations</b>	<b>107</b>	1,337
<b>Cash generated from operating activities – discontinued operations</b>	<b>31</b>	876
<b>Total cash generated from operating activities</b>	<b>138</b>	2,213

Operating cash flows reflect the movement in both policyholder and shareholder controlled cash and cash equivalent balances. Around two thirds of the Group's balances relate to unit-linked or participating policyholder funds. As such, the asset mix and the level of cash held by these funds are determined from a policyholder perspective and can move significantly from one year to another. Shareholder cash has remained broadly unchanged at £8.6 billion (2010: £8.5 billion).

Purchases and sales of operating assets, including financial investments, are included within operating cash flows as the purchases are funded from cash flows associated with the origination of insurance and investment contracts, net of payments of related benefits and claims. During the year, the net operating cash inflow reflects a number of factors, including changes in the investment strategy of funds to hold a lower weighting of cash and higher levels of financial investments, the level of premium income and the timing of receipts of premiums and the payment of creditors, claims and surrenders. It also includes changes in the size and value of consolidated cash investment funds and changes in the Group participation in these funds.

## 53 – Statement of cash flows continued

### (b) Cash flows in respect of, and additions to, the acquisition of subsidiaries, joint ventures and associates comprised:

	2011 £m	2010 £m
Cash consideration for subsidiaries, joint ventures and associates acquired and additions	114	239
Less: Cash and cash equivalents acquired with subsidiaries	—	(781)
Cash flows on acquisitions and additions – continuing operations	114	(542)
Cash flows on acquisitions and additions – discontinued operations	—	65
Cash flows on acquisitions and additions	114	(477)

### (c) Cash flows in respect of the disposal of subsidiaries, joint ventures and associates comprised:

	2011 £m	2010 £m
Cash proceeds from disposal of subsidiaries, joint ventures and associates	988	241
Less: Net cash and cash equivalents divested with subsidiaries	(111)	(19)
Cash flows on disposals – continuing operations	877	222
Cash flows on disposals – discontinued operations	(502)	29
Cash flows on disposals	375	251

The above figures form part of cash flows from investing activities.

### (d) Cash and cash equivalents in the statement of cash flows at 31 December comprised:

	2011 £m	2010 £m
Cash at bank and in hand	8,854	9,740
Cash equivalents	14,215	15,715
	23,069	25,455
Bank overdrafts	(668)	(760)
	22,401	24,695

## 54 – Group capital structure

The Group maintains an efficient capital structure from a combination of equity shareholders' funds, preference capital, subordinated debt and borrowings, consistent with our overall risk profile and the regulatory and market requirements of our business. This note shows where this capital is employed.

### Accounting basis and capital employed by segment

The table below shows how our capital, on an MCEV basis, is deployed by segment and how that capital is funded.

	2011 £m	Restated 2010 £m
Long-term savings	15,211	18,533
General insurance and health	5,875	4,747
Fund management	218	215
Other business	(1,102)	(119)
Corporate*	(228)	(997)
Delta Lloyd	776	3,892
<b>Total capital employed</b>	<b>20,750</b>	<b>26,271</b>
<b>Financed by</b>		
Equity shareholders' funds	12,829	15,038
Non-controlling interests	1,476	3,977
Direct capital instrument	990	990
Preference shares	200	200
Subordinated debt	4,550	4,572
External debt	705	1,494
<b>Total capital employed</b>	<b>20,750</b>	<b>26,271</b>

\* 'Corporate' includes centrally held tangible net assets, the staff pension scheme surplus and also reflects internal lending arrangements. These internal lending arrangements, which net out on consolidation, arise in relation to the following:  
– Aviva Insurance Limited (AI) acts as both a UK general insurer and as the primary holding company for our foreign subsidiaries. Internal capital management mechanisms in place allocate a portion of the total capital of the company to the UK general insurance operations, giving rise to notional lending between the general insurance and holding company activities. These mechanisms also allow for some of the assets of the general insurance business to be made available for use across the Group.  
– Certain subsidiaries, subject to continuing to satisfy standalone capital and liquidity requirements, loan funds to corporate and holding entities. These loans satisfy arm's length criteria and all interest payments are made when due.

## 54 – Group capital structure continued

Total capital employed is financed by a combination of equity shareholders' funds, preference capital, subordinated debt and borrowings.

At 31 December 2011, we had £20.8 billion (2010: £26.3 billion) of total capital employed in our trading operations, measured on an MCEV basis. The reduction is primarily driven by the deconsolidation of Delta Lloyd and the impact of financial markets.

In May 2011 we issued £450 million of Lower Tier 2 hybrid capital securities maturing in 2041 which may be called from 2021. In November 2011 we issued a further US\$400 million of Lower Tier 2 hybrid capital securities maturing in 2041 which may be called from 2016. These instruments are expected to comply for Tier 2 treatment under Solvency 2. The transactions had a positive impact on Group IGD solvency and Economic Capital measures. Also in November 2011 €800 million of Lower Tier 2 hybrid capital securities were redeemed at first call.

Financial leverage, the ratio of external senior and subordinated debt to MCEV capital and reserves, was 36.7% (2010: 31.9%). Fixed charge cover, which measures the extent to which external interest costs, including subordinated debt interest and preference dividends, are covered by MCEV operating profit, was 8.9 times (2010: 9.4 times).

At 31 December 2011, the market value of our external debt, subordinated debt, preference shares (including both Aviva plc preference shares of £200 million and General Accident plc preference shares, within non-controlling interests, of £250 million), and direct capital instrument was £5,782 million (2010: £7,279 million), with a weighted average cost, post tax, of 6.6% (2010: 4.5%). The Group Weighted Average Cost of Capital (WACC) is 7.1% (2010: 7.8%) and has been calculated by reference to the cost of equity and the cost of debt at the relevant date. The cost of equity at 31 December 2011 was 7.4% (2010: 9.9%) based on a risk free rate of 2.0% (2010: 3.4%), an equity risk premium of 4.0% (2010: 4.0%) and a market beta of 1.3 (2010: 1.6).

## 55 – Capital statement

This statement sets out the financial strength of our Group entities and provides an analysis of the disposition and constraints over the availability of capital to meet risks and regulatory requirements. The capital statement also provides a reconciliation of shareholders' funds to regulatory capital.

The analysis below sets out the Group's available capital resources.

### Available capital resources

	Old with-profit sub-fund £m	New with-profit sub-fund £m	With-profit sub-fund <sup>5</sup> £m	Total UK life with-profit funds £m	Other UK life operations £m	Total UK life operations £m	Overseas life operations £m	Total life operations £m	Other operations <sup>6</sup> £m	2011 Total £m	2010 Total £m

<b>Total liabilities</b>	<b>3,053</b>	<b>21,175</b>	<b>18,895</b>	<b>43,123</b>	<b>68,109</b>	<b>111,232</b>	<b>134,272</b>	<b>245,504</b>	<b>—</b>	<b>245,504</b>	<b>278,366</b>

1 Other sources of capital include subordinated debt of £4,549 million issued by Aviva and £275 million of other qualifying capital issued by Dutch, Italian and Spanish subsidiary and associate undertakings.

2 Unallocated divisible surplus for overseas life operations is included gross of minority interest. 2011 includes a negative balance of £1,449 million in Italy (2010: £420 million negative).

3 Goodwill and other intangibles includes goodwill of £262 million in joint ventures and associates.

4 Including an adjustment for minorities (except for other sources of capital that are reflected net of minority interest).

5 Includes the Provident Mutual with-profit fund.

6 Other operations include general insurance and fund management business.

## 55 – Capital statement continued

### Analysis of movements in capital of long-term businesses

For the year ended 31 December 2011

	Old with-profit sub-fund £m	New with-profit sub-fund £m	With-profit sub-fund £m	Total UK life with- profit funds £m	Other UK life operations £m	Total UK life operations £m	Overseas life operations £m	Total life operations £m
<b>Available capital resources at 1 January</b>	<b>235</b>	<b>1,296</b>	<b>1,833</b>	<b>3,364</b>	<b>2,765</b>	<b>6,129</b>	<b>8,394</b>	<b>14,523</b>
Effect of new business	(5)	(302)	—	(307)	139	(168)	(628)	(796)
Expected change in available capital resources	23	177	91	291	417	708	824	1,532
Variance between actual and expected experience*	1	130	95	226	—	226	(3,276)	(3,050)
Effect of operating assumption changes	15	56	65	136	19	155	(24)	131
Effect of economic assumption changes	(31)	(230)	(309)	(570)	—	(570)	(135)	(705)
Effect of changes in management policy	—	—	(3)	(3)	—	(3)	8	5
Effect of changes in regulatory requirements	—	—	—	—	—	—	(6)	(6)
Transfers, acquisitions and disposals	—	—	—	—	—	—	(8)	(8)
Deconsolidation of Delta Lloyd	—	—	—	—	—	—	(1,598)	(1,598)
Foreign exchange rate movements	—	—	—	—	—	—	(15)	(15)
Other movements	2	32	(143)	(109)	(561)	(670)	209	(461)
<b>Available capital resources at 31 December</b>	<b>240</b>	<b>1,159</b>	<b>1,629</b>	<b>3,028</b>	<b>2,779</b>	<b>5,807</b>	<b>3,745</b>	<b>9,552</b>

\*The negative variance between actual and expected experience is driven by reductions in the market value of assets backing participating funds in continental Europe, and consequential reductions in unallocated divisible surplus.

Further analysis of the movement in the liabilities of the long-term business can be found in notes 39 and 40.

The analysis of movements in capital provides an explanation of the movement in available capital of the Group's life business for the year. This analysis is intended to give an understanding of the underlying causes of changes in the available capital of the Group's life business, and provides a distinction between some of the key factors affecting the available capital.

The negative shareholders' funds balance within the UK with-profit funds arises in NWPSF as a result of regulatory valuation and admissibility differences in the reattributed estate which is valued on a realistic regulatory basis compared to the disclosure on an IFRS basis.

NWPSF is fully supported by the reattributed estate of £1,113 million (this is known as RIEESA), at 31 December 2011 (31 December 2010: £1,218 million), held within NPSF1 (a non-profit fund within UKLAP included within other UK life operations), in the form of a capital support arrangement. This support arrangement will provide capital to NWPSF to ensure that the value of assets of NWPSF are at least equal to the value of liabilities calculated on a realistic regulatory basis therefore it forms part of the NWPSF available capital resources.

The WPSF/RIEESA uses internal hedging to limit the impacts of equity market performance. These funds are still exposed to equity volatility which has increased significantly during the year, reducing available capital resources.

In aggregate, the Group has at its disposal total available capital of £12.3 billion (2010: £16.6 billion), representing the aggregation of the solvency capital of all of our businesses.

This capital is available to meet risks and regulatory requirements set by reference to local guidance and EU directives.

After effecting the year-end transfers to shareholders, the UK with-profit funds have available capital of £3.0 billion (2010: £3.4 billion) (including amounts held in RIEESA). Subject to certain conditions, the RIEESA capital can be used to write new non-profit business, but the primary purpose of this capital is to provide support for the UK with-profit business. The capital is comfortably in excess of the required capital margin, and therefore the shareholders are not required to provide further support.

For the remaining life and general insurance operations, the total available capital amounting to £9.3 billion (2010: £13.2 billion) is significantly higher than the minimum requirements established by regulators and, in principle, the excess is available to shareholders. In practice, management will hold higher levels of capital within each business operation to provide appropriate cover for risk.

As the total available capital of £12.3 billion is arrived at on the basis of local regulatory guidance, which evaluates assets and liabilities prudently, it understates the economic capital of the business which is considerably higher. This is a limitation of the Group Capital Statement which, to be more meaningful, needs to evaluate available capital on an economic basis and compare it with the risk capital required for each individual operation, after allowing for the considerable diversification benefits that exist in our Group.

Within the Aviva Group there exist intra-group arrangements to provide capital to particular business units. Included in these arrangements is a subordinated loan of £200 million from Aviva Life Holdings UK Limited to Aviva Annuity Limited to provide capital to support the writing of new business.

The available capital of the Group's with-profit funds is determined in accordance with the 'Realistic balance sheet' regime prescribed by the FSA's regulations, under which liabilities to policyholders include both declared bonuses and the constructive obligation for future bonuses not yet declared. The available capital resources include an estimate of the value of their respective estates, included as part of the unallocated divisible surplus. The estate represents the surplus in the fund that is in excess of any constructive obligation to policyholders. It represents capital resources of the individual with-profit fund to which it relates and is available to meet regulatory and other solvency requirements of the fund and, in certain circumstances, additional liabilities may arise.

The liabilities included in the balance sheet for the with-profit funds do not include the amount representing the shareholders' portion of future bonuses. However, the shareholders' portion is treated as a deduction from capital that is available to meet regulatory requirements and is therefore shown as a separate adjustment in the capital statement.

In accordance with the FSA's regulatory rules under its realistic capital regime, the Group is required to hold sufficient capital in its UK life with-profit funds to meet the FSA capital requirements, based on the risk capital margin (RCM). The determination of the RCM depends on various actuarial and other assumptions about potential changes in market prices, and the actions management would take in the event of particular adverse changes in market conditions.

## 55 – Capital statement continued

						31 December 2011	31 December 2010
	Estimated realistic assets £bn	Realistic liabilities* <sup>1</sup> £bn	Estimated realistic inherited estate <sup>2</sup> £bn	Capital support arrangement <sup>3</sup> £bn	Estimated risk capital margin <sup>5</sup> £bn	Estimated excess available capital £bn	Excess £bn
NWPSF	18.6	(18.6)	—	1.1	(0.4)	0.7	0.8
OWPSF	3.0	(2.7)	0.3	—	(0.1)	0.2	0.2
WPSF <sup>4</sup>	19.4	(17.8)	1.6	—	(0.6)	1.0	1.4
Aggregate	41.0	(39.1)	1.9	1.1	(1.1)	1.9	2.4

\* These realistic liabilities include the shareholders' share of future bonuses of £0.3 billion (31 December 2010: £0.7 billion). Realistic liabilities adjusted to eliminate the shareholders' share of future bonuses are £38.8 billion (31 December 2010: £41.5 billion).

<sup>1</sup> These realistic liabilities make provision for guarantees, options and promises on a market consistent stochastic basis. The value of the provision included within realistic liabilities is £1.9 billion, £0.3 billion and £3.1 billion for NWPSF, OWPSF and WPSF respectively (31 December 2010: £1.9 billion, £0.3 billion and £3.1 billion for NWPSF, OWPSF and WPSF respectively).

<sup>2</sup> Estimated realistic inherited estate at 31 December 2010 was £nil, £0.3 billion and £1.8 billion for NWPSF, OWPSF and WPSF respectively.

<sup>3</sup> This represents the reattributed estate of £1.1 billion at 31 December 2011 (31 December 2010: £1.2 billion) held within NPSF1 (a non-profit fund within UKLAP included within other UK life operations).

<sup>4</sup> The WPSF fund includes the Provident Mutual (PM) fund, which has realistic assets and liabilities of £1.7 billion and therefore does not impact the realistic inherited estate.

<sup>5</sup> The risk capital margin (RCM) is 2.7 times covered by the inherited estate and support arrangement (31 December 2010: 3.7 times).

Under the FSA regulatory regime, UK life with-profits business is required to hold capital equivalent to the greater of their regulatory requirement based on EU directives (regulatory peak) and the FSA realistic bases (realistic peak) described above.

For UK non-participating business, the relevant capital requirement is the minimum solvency requirement determined in accordance with FSA regulations. The available capital reflects the excess of regulatory basis assets over liabilities before deduction of capital resources requirement.

For UK general insurance businesses, the relevant capital requirement is the minimum solvency requirement determined in accordance with the FSA requirements.

For overseas businesses in the European Economic Area (EEA), US, Canada, Hong Kong and Singapore, the available capital and the minimum requirement are calculated under the locally applicable regulatory regimes. The businesses outside these territories are subject to the FSA rules for the purposes of calculation of available capital and capital resource requirement.

For fund management and other businesses, the relevant capital requirement is the minimum solvency requirement determined in accordance with the local regulator's requirements for the specific class of business.

The available capital resources in each regulated entity are generally subject to restrictions as to their availability to meet requirements that may arise elsewhere in the Group. The principal restrictions are:

- **UK with-profit funds – (NWPSF, OWPSF and WPSF)** – any available surplus held in each fund can be used to meet the requirements of the fund itself, be distributed to policyholders and shareholders or in the case of NWPSF and OWPSF, transferred via the capital support arrangement explained above (for OWPSF only to the extent support has been provided in the past). In most cases, with-profit policyholders are entitled to at least 90% of the distributed profits while the shareholders receive the balance. The latter distribution would be subject to a tax charge, which is met by the fund.
- **UK non-participating funds** – any available surplus held in these is attributable to shareholders. Capital in the non-profit funds may be made available to meet requirements elsewhere in the Group subject to meeting the regulatory requirements of the fund. Any transfer of the surplus may give rise to a tax charge subject to availability of tax relief elsewhere in the Group.
- **Overseas life operations** – the capital requirements and corresponding regulatory capital held by overseas businesses are calculated using the locally applicable regulatory regime. The available capital resources in all these businesses are subject to local regulatory restrictions which may constrain management's ability to utilise these in other parts of the Group. Any transfer of available capital may give rise to a tax charge subject to availability of tax relief elsewhere in the Group.
- **General insurance operations** – the capital requirements and corresponding regulatory capital held by overseas businesses are calculated using the locally applicable regulatory regime. The available capital resources in all these businesses are subject to local regulatory restrictions which may constrain management's ability to utilise these in other parts of the Group. Any transfer of available capital may give rise to a tax charge, subject to availability of tax relief elsewhere in the Group.

## 56 – Risk management

This note sets out the major risks our businesses face and describes the Group's approach to managing these. It also gives sensitivity analyses around the major economic and non-economic assumptions that can cause volatility in the Group's earnings and capital requirements.

### (a) Risk management framework

The risk management framework (RMF) in Aviva forms an integral part of the management and Board processes and decision-making framework across the Group. The key elements of our risk management framework comprise risk appetite, risk modelling, roles and responsibilities, risk policies and procedures and risk governance and oversight. Additional information on the key elements of the RMF is included in the risk and capital management section of the performance review. The Group's approach to risk management ensures that significant existing or emerging risks are actively identified, measured, managed, monitored and reported on a continuous basis.

For the purposes of risk identification and measurement, risks are usually grouped by risk type: credit, market, liquidity, general insurance, life insurance and operational risk. Risk falling within these types may affect a number of key metrics including those relating to balance sheet strength, liquidity and profit. They may also affect the performance of the products that we deliver to our customers and the service to our customers and distributors, which can be categorised as risks to our brand and reputation. Additional information on the group's risks is included in the risk section of the Performance review.

To promote a consistent and rigorous approach to risk management across all our businesses and locations in which we operate, we have a set of formal risk policies and business standards. These risk policies and business standards set out our appetite for different risk types and provide risk management and control requirements for the Group's worldwide operations.

A regular top-down key risk identification and assessment process is carried out in the risk function at group level based on group and regional chief risk officer and functional risk director input. This includes the consideration of emerging risks and is supported by deeper thematic reviews and is replicated at regional and business unit level. The risk assessment processes are used to generate risk reports which are shared with the relevant risk committees.

Risk models are an important tool in our measurement of risk and are used to support the monitoring and reporting of the risk profile and in the consideration of the risk management actions available. We carry out a range of stress (where one risk factor, such as equity returns, is assumed to vary) and scenario (where combinations of risk factors are assumed to vary) tests to evaluate their impact on the business and the management actions available to respond to the conditions envisaged. Board oversight of risk and risk management across the Group is maintained on a regular basis through its Risk Committee. The Board has overall responsibility for determining risk appetite, which is an expression of the risk it is willing to take. The Group's position against risk appetite is monitored and reported to the Board on a regular basis.

The risk governance framework allocates responsibility for the oversight of risk management to a number of committees at group centre, with the Asset Liability Committee (ALCO) providing a key focus on business and financial risks and the Operational Risk Committee (ORC) providing a key focus on operational risks. The group-level committees are in turn supported by similar governance structures in the regions.

### Risk management in relation to Delta Lloyd

During 2011 Aviva has completed a partial disposal of its equity holding in Delta Lloyd. At 31 December 2010 Aviva held a controlling interest of 58% in Delta Lloyd's issued equity, and as a result and in accordance with IFRS, consolidated 100% of Delta Lloyd assets and liabilities. As a result of the partial disposal of Delta Lloyd on 6 May 2011 Aviva's share of Delta Lloyd's voting rights has fallen below 50% and so Delta Lloyd has been deconsolidated. Aviva has retained a 42% associate interest. Aviva continues to actively monitor the quality of Delta Lloyd's balance sheet and risk profile through:

- membership of the Supervisory Board with access to Board papers and its committees;
- Delta Lloyd's submission of financial data to meet the group external reporting requirements;
- Delta Lloyd's submission of information to meet the group's regulatory commitments; and
- reviewing of the quarterly risk profile (ORSA report) as approved by the Delta Lloyd Executive Board.

To enable Aviva to satisfy its ongoing financial reporting, audit and other legal and regulatory requirements, including Aviva's risk management and control procedures, Delta Lloyd will continue to provide to Aviva the relevant information to satisfy its legal, regulatory requirements in line with the Strategic Investment Agreement. This includes other certifications as required in connection with Aviva's UK listing. Aviva is entitled to nominate, and propose replacements, for two Supervisory Board members.

### (b) Credit risk

Credit risk is the risk of financial loss as a result of the default or failure of third parties to meet their payment obligations to Aviva, or variations in market values as a result of changes in expectations related to these risks. Credit risk arises as a consequence of asset investments made to achieve the returns required to satisfy policyholder liabilities and to provide enhanced long-term risk-adjusted returns to shareholders. Aviva is exposed to third party credit quality changes through a range of other activities including reinsurance. Credit risk is an area where we can provide the returns required to satisfy policyholder liabilities and to generate returns for our shareholders. In general we prefer to take credit risk over equity and property risks, due to the better expected risk adjusted return, our credit risk analysis capability and the structural investment advantages conferred to insurers with long-dated, relatively illiquid liabilities.

## 56 – Risk management continued

Our approach to managing credit risk recognises that there is a risk of adverse financial impact resulting from fluctuations in credit quality of third parties including default, rating transition and credit spread movements. Credit risk categories include spread risk, default risk and rating migration risk:

- Spread risk arises from changes in level or volatility of third party credit spreads over risk-free interest rates, that can be caused by credit concerns (improving or worsening) on the issuer, or from market factors, such as risk appetite and liquidity within the market.
- Default risk is the risk that a counterparty is unable or unwilling to meet its financial obligations when they fall due, and includes delays in repayments, restructuring of repayments/interest schedule and bankruptcy.
- Rating migration risk is the risk that a change in external credit rating of a counterparty adversely impacts Aviva.

Our credit risks arise principally through exposures to debt security investments, structured asset investments, derivative counterparties, mortgage lending and reinsurance counterparties.

The group manages its credit risk at business unit, regional and group levels. All business units and regions are required to implement local credit risk management processes (including limits frameworks), operate specific risk management committees, and ensure detailed reporting and monitoring of their exposures against pre-established risk criteria. At group level, we manage and monitor all exposures across our business units on a consolidated basis, and operate a group limit framework that must be adhered to by all.

Management of credit risk is effected through six core elements:

- The setting up of an overall credit risk appetite by the Board Risk Committee, which controls the total credit risk to which the group is exposed.
- The maintenance of and adherence to an effective governance structure. This includes clear guidance, scope and frameworks for all aspects of the management of the credit to ensure accountability and clarity including clear delegations of authority and a group wide credit risk policy and associated business standards.
- The accurate and timely reporting of detailed exposure information, and their aggregation by counterparty, exposure types, sectors, geography and ratings.
- The implementation of a sophisticated capital charge-based credit limit framework that considers and quantifies the key specific attributes of each exposure (e.g. seniority, maturity, etc) and provides a counterparty level aggregation methodology covering all exposures to a counterparty. This is then managed against centrally set limits. Gross exposure limits are also set to ensure that any unexpected jump to default risks are appropriately restricted. Additional limit and controls are applied for structured assets and reinsurance counterparty exposures.
- Additional committee and risk function oversight is provided on all credit risk related matters. This includes regular consideration and review of our key counterparties, systemic factors such as sector and geographic concentrations, monitoring and addressing key credit themes and news that emerge in the markets. The Credit Approvals Committee provides a forum to ensure that all key recommendations are considered, and decisions implemented throughout the group. The regional and group ALM and risk functions ensure that qualitative aspects of risk management are considered and evaluated to provide further oversight and balance to the quantitative aspects.
- Risk mitigation techniques are used where and when deemed appropriate. These are utilised where possible to remove residual unwanted risks, as well as to bring or keep exposure limits within appetite, and include methods such as collateralisation and the purchase of credit protection such as credit default index swaps. Collateral held either takes the form of cash, disclosed in note 49 as a payable, or other financial assets, disclosed in note 25(d). Where a financial asset is recognised in the statement of financial position at fair value, that value reflects the credit enhancement as a result of the relevant collateral received.

## 56 – Risk management continued

A detailed breakdown of the group's current credit exposure by credit quality is shown below.

### Financial exposures by credit ratings

Financial assets are graded according to current external credit ratings issued. AAA is the highest possible rating. Investment grade financial assets are classified within the range of AAA to BBB ratings. Financial assets which fall outside this range are classified as sub-investment grade. The following table provides information regarding the aggregated credit risk exposure, for financial assets with external credit ratings, of the group. Not rated assets capture assets not rated by external ratings agencies.

At 31 December 2011	Credit rating						Carrying value in the statement of financial position £m
	AAA	AA	A	BBB	Speculative grade	Not rated	
Debt securities	32.4%	13.2%	29.9%	16.3%	2.8%	5.4%	153,252
Reinsurance assets	0.0%	70.1%	23.2%	0.0%	0.4%	6.3%	7,112
Other investments	0.2%	0.8%	1.4%	2.3%	0.4%	94.9%	30,160
Loans	0.9%	1.3%	1.2%	0.2%	0.8%	95.6%	28,116

At 31 December 2010	Credit rating						Carrying value in the statement of financial position £m
	AAA	AA	A	BBB	Speculative grade	Not rated	
Debt securities	36.3%	18.1%	22.7%	15.8%	2.5%	4.6%	167,482
Reinsurance assets	0.2%	58.8%	25.3%	1.5%	0.1%	14.1%	7,084
Other investments	0.2%	1.1%	1.4%	0.4%	0.1%	96.8%	36,730
Loans	3.8%	5.8%	2.2%	0.4%	0.7%	87.1%	43,074

The carrying amount of assets included in the statement of financial position represents the maximum credit exposure. The impact of collateral held on the net credit exposure is shown below.

At 31 December 2011	2011			2010		
	Carrying value in the statement of financial position £m	Collateral held £m	Net credit exposure £m	Carrying value in the statement of financial position £m	Collateral held £m	Net credit exposure £m
Debt securities	153,252	(15,594)	137,658	167,482	(15,383)	152,099
Reinsurance assets	7,112	(443)	6,669	7,084	(434)	6,650
Other investments	30,160	(4,989)	25,171	36,730	(3,704)	33,026
Loans	28,116	(5,825)	22,291	43,074	(4,669)	38,405

### Financial exposures to peripheral European countries

Included in our debt securities and other financial assets are exposures to peripheral European countries. Gross of non-controlling interests, our direct shareholder assets exposure to the governments (and local authorities and agencies) of Greece, Ireland, Portugal, Italy and Spain has reduced since 2010 and is detailed in note 25 (e) on page 240. We continue to monitor closely the situation in the eurozone and have had additional restrictions on further investment in place since late 2009 as well as taking actions to reduce exposure to higher-risk assets.

## 56 – Risk management continued

### Other investments

Other investments (including assets of operations classified as held for sale £217 million) include:

- £27,260 million of unit trusts and other investment vehicles. The underlying credit ratings of these assets are not reflected in this analysis.
- Derivative financial instruments of £1,498 million, representing positions to mitigate the impact of adverse market movements.
- Other assets of £1,619 million, including deposits with credit institutions and minority holdings in property management undertakings.

The group loan portfolio principally comprises:

- Policy loans which are generally collateralised by a lien or charge over the underlying policy.
- Loans and advances to banks which primarily relate to loans of cash collateral received in stock lending transactions. These loans are fully collateralised by other securities.
- Mortgage loans collateralised by property assets.

### Unit trusts and other investment vehicles

The credit quality of the underlying debt securities within these vehicles is managed by the safeguards built into the investment mandates for these funds. We rely on our understanding that the trusts and their asset managers are only approved if they satisfy certain selection criteria (including due diligence in the form of a questionnaire and/or research by dedicated teams). In addition, the asset managers are mandated to make investments in line with the funds' risk profiles as marketed to prospective customers and policyholders. Accordingly, as part of reviewing the asset quality of unit trusts and other investment vehicles, we monitor the assets within the funds and their performance to ensure they remain in line with the respective investment mandates for these funds.

A proportion of the assets underlying these investments are represented by equities and so credit ratings are not generally applicable. Equity exposures are managed against agreed benchmarks that are set with reference to overall market risk appetite.

### Loans

The majority of the group loans portfolio is unrated. However, we use the following metrics to internally monitor our exposure:

- property collateralisation (i.e. loan to value);
- interest and debt service cover; and
- diversity of the tenant base.

Policy loans are loans and advances made to policyholders, and are collateralised by the underlying policies. As such, we believe such collateralisation minimises our risk.

### Credit concentration risk

The long-term businesses and general insurance businesses are generally not individually exposed to significant concentrations of credit risk due to the regulations, applicable in most markets, limiting investments in individual assets and asset classes supplemented by the group credit policy, associated business standards and the credit limits framework. In cases where the business is particularly exposed to credit risk (e.g. in respect of defaults on mortgages matching annuity liabilities) this risk is translated into a more conservative discount rate used to value the liabilities, creating a greater capital requirement. The impact of aggregation of credit risk is monitored as described above. With the exception of government bonds, the largest aggregated counterparty exposure is approximately 1.2% of the Group's total shareholder assets.

## 56 – Risk management continued

### Reinsurance credit exposures

The Group is exposed to concentrations of risk with individual reinsurers, due to the nature of the reinsurance market and the restricted range of reinsurers that have acceptable credit ratings. The Group operates a policy to manage its reinsurance counterparty exposures, by limiting the reinsurers that may be used and applying strict limits to each reinsurer. Reinsurance exposures are aggregated with other exposures to ensure that the overall risk is within appetite. The Credit Approvals Committee has a monitoring role over this risk.

The Group's largest reinsurance counterparty is Swiss Reinsurance Company Ltd (including subsidiaries). At 31 December 2011, the reinsurance asset recoverable, including debtor balances, from Swiss Reinsurance Company Ltd was £1,314 million.

### Securities finance

The Group has significant securities financing operations within the UK and smaller operations overseas. The risks within this business are mitigated by over-collateralisation and minimum counterparty credit quality requirements which are designed to result in minimal residual risk. The Group operates strict standards around collateral management, margin calls and controls.

### Derivative credit exposures

The Group is exposed to counterparty credit risk through derivative trades. This risk is mitigated through collateralising almost all trades (the exception being certain FX trades where it has historically been the market norm not to collateralise). The Group operates strict standards around collateral management and controls, including the requirement that all 'Over the Counter' derivatives are supported by credit support annexes and ISDAs or their local equivalents unless otherwise agreed with the Group ALM team. Counterparties must have a minimum credit rating from rating agencies (S&P, Moody's and Fitch) and the collateral process must meet certain minimum standards as set out by Group guidelines. Residual exposures are captured within the Group's credit management framework. Many of the largest shareholder notional positions are exchange traded, rather than over the counter (OTC), with the added protection that provides (i.e. mitigated significantly through the protection offered by the exchange) and is controlled by the Group's local asset management operations.

### Unit-linked business

As discussed previously, in unit-linked business the policyholder bears the market risk and credit risk, on investment assets in the unit funds, and the shareholders' exposure to credit risk is limited to the extent that their income arises from asset management charges based on the value of assets in the fund.

### Impairment of financial assets

The following table provides information regarding the carrying value of financial assets that have been impaired and the ageing of financial assets that are past due but not impaired.

At 31 December 2011	Financial assets that are past due but not impaired					Financial assets that have been impaired £m	Carrying value in the statement of financial position £m
	Neither past due nor impaired £m	0-3 months £m	3-6 months £m	6 months-1 year £m	Greater than 1 year £m		
Debt securities	152,988	—	—	—	—	264	153,252
Reinsurance assets	7,112	—	—	—	—	—	7,112
Other investments	30,152	—	—	—	—	8	30,160
Loans	27,582	6	—	—	—	528	28,116
Receivables and other financial assets	7,650	134	148	2	3	—	7,937

At 31 December 2010	Financial assets that are past due but not impaired					Financial assets that have been impaired £m	Carrying value in the statement of financial position £m
	Neither past due nor impaired £m	0-3 months £m	3-6 months £m	6 months-1 year £m	Greater than 1 year £m		
Debt securities	167,334	—	3	3	28	114	167,482
Reinsurance assets	7,084	—	—	—	—	—	7,084
Other investments	36,671	19	6	15	8	11	36,730
Loans	42,045	326	26	11	7	659	43,074
Receivables and other financial assets	7,983	209	36	39	10	18	8,295

Credit investment criteria are set locally within overall credit limits prescribed by the Group Credit Approvals Committee and within the framework of the Group credit policy. The credit quality of financial assets is managed at the local business unit level. Where assets have been classed as 'past due and impaired', an analysis is made of the risk of default and a decision is made whether to seek collateral from the counterparty.

There were no material financial assets that would have been past due or impaired had the terms not been renegotiated.

## 56 – Risk management continued

### (c) Market risk

Market risk is the risk of adverse financial impact due to changes in fair values or future cash flows of financial instruments from fluctuations in interest rates, foreign currency exchange rates, property and commodity prices. Market risk arises in business units due to fluctuations in both the value of liabilities and the value of investments held. At Group level, it also arises in relation to the overall portfolio of international businesses and in the value of investment assets owned directly by the shareholders.

The Group has established a policy on market risk which sets out the principles that businesses are expected to adopt in respect of management of the key market risks to which the Group is exposed. The Group monitors adherence to this market risk policy and regularly reviews how business units are managing these risks locally, through the Assets Committee and ultimately the Asset Liability Committee (ALCO). For each of the major components of market risk, described in more detail below, the Group has put in place additional processes and procedures, described in internal business standards, to set out how each risk should be managed and monitored, and the approach to setting an appropriate risk appetite.

The management of market risk is undertaken in businesses, regions and at group level. Businesses manage market risks locally using the Group market risk framework and within local regulatory constraints. The ALM function is responsible for managing market risk at Group level.

The Group market risk policy sets out the minimum principles and framework for matching liabilities with appropriate assets, the approaches to be taken when liabilities cannot be matched and the monitoring processes that are required. The Group has criteria for matching assets and liabilities for all classes of business to minimise the impact of mismatches between the value of assets and the liabilities due to market movements. The local regulatory environment for each business will also set the conditions under which assets and liabilities are to be matched.

In addition, where the Group's long-term savings businesses have written insurance and investment products where the majority of investment risks are borne by its policyholders, these risks are managed in line with local regulations and marketing literature, in order to satisfy the policyholders' risk and reward objectives.

The Group writes unit-linked business in a number of its operations. In unit-linked business, the policyholder bears the investment risk on the assets held in the unit-linked funds, as the policy benefits are directly linked to the value of the assets in the fund.

The shareholders' exposure to market risk on this business is limited to the extent that income arising from asset management charges is based on the value of assets in the fund.

### Equity price risk

The Group is subject to equity price risk due to daily changes in the market values of its equity securities portfolio. The Group's shareholders are exposed to the following sources of equity risk:

- Direct equity shareholdings in shareholder funds and the Group defined benefit pension funds.
- The indirect impact from changes in the value of equities held in policyholders' funds from which management charges or a share of performance are taken.
- Its interest in the free estate of long-term with-profits funds.

We continue to limit our direct equity exposure in line with our risk preferences for equity risk. The reduction of the shareholding in Delta Lloyd has decreased the Group's IFRS balance sheet risks and, in particular, has led to a fall in equity exposures. The sale of the RAC business has also reduced our strategic equity exposure and our extended equity hedging programme during 2011 has further reduced our equity exposures. At a business unit level, equity price risk is actively managed in order to mitigate anticipated unfavourable market movements where this lies outside the risk appetite of either the Company in respect of shareholder assets or the fund in respect of policyholder assets concerned. In addition investment limits and local asset admissibility regulations require that business units hold diversified portfolios of assets thereby reducing exposure to individual equities. The Group does not have material holdings of unquoted equity securities.

Equity risk is also managed using a variety of derivative instruments, including futures and options. Businesses actively model the performance of equities through the use of risk models, in particular to understand the impact of equity performance on guarantees, options and bonus rates. At 31 December 2011 the Group's shareholder funds held £3 billion notional of equity hedges, with up to 12 months to maturity with an average strike of 89% of the prevailing market levels on 31 December 2011.

The Assets Committee actively monitors the Group's equity exposures relative to risk appetite.

Sensitivity to changes in equity prices is given in section (h) below.

## 56 – Risk management continued

### Property price risk

The Group is subject to property price risk due to holdings of investment properties in a variety of locations worldwide and through investments in mortgages and mortgage-backed securities. Investment in property is managed at regional and business level, and will be subject to local regulations on asset admissibility, liquidity requirements and the expectations of policyholders as well as overall risk appetite. The Assets Committee also monitors the Group's property exposure, relative to risk appetite.

As at 31 December 2011, no material derivative contracts had been entered into to mitigate the effects of changes in property prices.

Sensitivity to changes in property prices is given in section (h) below.

### Interest rate risk

Interest rate risk arises primarily from the Group's investments in long-term debt and fixed income securities and their movement relative to the value placed on the insurance liabilities. A number of policyholder participation features have an influence on the group's interest rate risk. The major features include guaranteed surrender values, guaranteed annuity options, and minimum surrender and maturity values. Details of material guarantees and options are given in note 41.

Interest rate risk is managed by the ALM function and monitored and managed at Group level by the Assets Committee, and the Asset Liability Committee. Exposure to interest rate risk is monitored through several measures that include value-at-risk analysis, position limits, risk modelling (stress and scenario tests), asset and liability matching using measures such as duration. The Group has a general preference for minimising interest rate risk where practical and has also set a quantitative group level interest rate risk appetite. The impact of exposure to sustained low interest rates is regularly monitored.

The Group manages this risk by adopting close asset liability matching criteria, to minimise the impact of mismatches between the value of assets and liabilities from interest rate movements. Interest rate risk is also managed using a variety of derivative instruments, including futures, options, swaps, caps and floors, in order to provide a degree of hedging against unfavourable market movements in interest rates inherent in the assets backing technical liabilities.

Sensitivity to changes in interest rates is given in section (h) below. Further information on borrowings is included in note 48.

### Currency risk

The Group has minimal exposure to currency risk from financial instruments held by business units in currencies other than their functional currencies, as nearly all such holdings are backing either unit-linked or with-profit contract liabilities or are hedged. For this reason, no sensitivity analysis is given for these holdings.

The Group operates internationally and as a result is exposed to foreign currency exchange risk arising from fluctuations in exchange rates of various currencies. Approximately half of the group's premium income arises in currencies other than sterling and the Group's net assets are denominated in a variety of currencies, of which the largest are euro, sterling and US dollars. The Group does not hedge foreign currency revenues as these are substantially retained locally to support the growth of the Group's business and meet local regulatory and market requirements.

The Group's foreign exchange standard requires that each of our subsidiaries should aim to maintain sufficient assets in its local currency to meet local currency liabilities and to report any material mismatches. Therefore, capital held by the Group's business units should generally be able to support local business activities regardless of foreign currency movements. However, such movements may impact the value of the Group's consolidated shareholders' equity which is expressed in sterling. This aspect of foreign exchange risk is monitored and managed centrally, against pre-determined limits. The Group's approach is to manage these exposures by aligning the deployment of regulatory capital by currency with the Group's regulatory capital requirements by currency. Limits are set to control the extent to which the deployment of capital is not aligned fully with the Group's regulatory capital requirement for each major currency. Currency borrowings and derivatives are used to manage exposures within the limits that have been set.

## 56 – Risk management continued

At 31 December 2011 and 2010, the Group's total equity deployment by currency was:

	Sterling £m	Euro £m	US\$ £m	Other £m	Total £m
<b>Capital 31 December 2011</b>	<b>3,427</b>	<b>6,442</b>	<b>3,237</b>	<b>2,257</b>	<b>15,363</b>
Capital 31 December 2010	3,301	9,288	2,712	2,424	17,725

A 10% change in sterling to euro/US\$ foreign exchange rates would have had the following impact on total equity:

	10% increase in sterling/ euro rate £m	10% decrease in sterling/ euro rate £m	10% increase in sterling/ US\$ rate £m	10% decrease in sterling/ US\$ rate £m
<b>Net assets at 31 December 2011</b>	<b>(524)</b>	<b>632</b>	<b>(323)</b>	<b>323</b>
Net assets at 31 December 2010	(899)	833	(271)	271

The changes arise from retranslation of business unit statements of financial position from their functional currencies into sterling, with above movements being taken through the currency translation reserve. These movements in exchange rates therefore have no impact on profit. Net assets are stated after taking account of the effect of currency hedging activities.

### Derivatives risk

Derivatives are used by a number of the businesses, within policy guidelines agreed by the Board of directors, as set out in the Group policy on derivatives use. Activity is overseen by the Derivatives Approvals Committee, which monitors implementation of the policy, exposure levels and approves large or complex transactions proposed by businesses. Derivatives are primarily used for efficient investment management, risk hedging purposes or to structure specific retail savings products. Derivative transactions are covered by either cash or corresponding assets and liabilities. Speculative activity is prohibited, unless prior approval has been obtained from the Derivatives Approvals Committee. As noted above, over-the-counter derivative contracts are entered into only with approved counterparties and using ISDA documentation and credit support annexes (or equivalent) unless otherwise agreed by the Group ALM function. Adherence to the collateral requirements as set out in the relevant internal business standards thereby reduces the risk of credit loss.

The Group applies strict requirements to the administration and valuation processes it uses, and has a control framework that is consistent with market and industry practice for the activity that is undertaken.

### Correlation risk

The Group recognises that lapse behaviour and potential increases in consumer expectations are sensitive to and interdependent with market movements and interest rates. These interdependencies are taken into consideration in the internal economic capital model and in scenario analysis.

### (d) Liquidity risk

At Group level, there is a liquidity risk appetite which requires that sufficient liquid resources be maintained to cover net outflows in a stress scenario. The Group and Company have a strong liquidity position (£1.5 billion of financial assets held at group) and through the application of a Group liquidity risk policy and business standard seek to maintain sufficient financial resources to meet their obligations as they fall due. In addition to this strong liquidity position, the Group and Company maintain significant undrawn committed borrowing facilities (£2.1 billion) from a range of leading international banks to further mitigate this risk. The Group has also implemented a liquidity risk policy and framework to ensure that businesses within the Group also maintain sufficient liquidity to withstand adverse scenarios.

### Maturity analyses

The following tables show the maturities of our insurance and investment contract liabilities, and of the financial and reinsurance assets to meet them. A maturity analysis of the contractual amounts payable for borrowings and derivatives is given in notes 48 and 57, respectively. Contractual obligations under operating leases and capital commitments are given in note 52.

#### (i) Analysis of maturity of insurance and investment contract liabilities

For non-linked insurance business, the following table shows the gross liability at 31 December 2011 and 2010 analysed by remaining duration. The total liability is split by remaining duration in proportion to the cash-flows expected to arise during that period, as permitted under IFRS 4, *Insurance Contracts*.

Almost all investment contracts may be surrendered or transferred on demand. For such contracts, the earliest contractual maturity date is therefore the current statement of financial position date, for a surrender amount approximately equal to the current statement of financial position liability. We expect surrenders, transfers and maturities to occur over many years, and the tables reflect the expected cash flows for non-linked investment contracts. However, contractually, the total liability for non-linked investment contracts of £59,690 million (2010: £63,197 million) would be shown in the 'within 1 year' column below. Unit-linked contracts are repayable or transferable on demand and are therefore shown in the 'within 1 year' column.

## 56 – Risk management continued

At 31 December 2011	Total £m	On demand or within 1 year £m	1–5 years £m	5–15 years £m	Over 15 years £m
Long-term business					
Insurance contracts – non-linked	120,164	9,949	36,636	47,037	26,542
Investment contracts – non-linked	59,690	5,984	18,975	25,044	9,687
Linked business	65,994	65,994	—	—	—
General insurance and health	15,241	5,645	5,967	2,913	716
<b>Total contract liabilities</b>	<b>261,089</b>	<b>87,572</b>	<b>61,578</b>	<b>74,994</b>	<b>36,945</b>

At 31 December 2010	Total £m	On demand or within 1 year £m	1–5 years £m	5–15 years £m	Over 15 years £m
Long-term business					
Insurance contracts – non-linked	132,400	12,025	42,609	50,206	27,560
Investment contracts – non-linked	63,197	3,254	13,970	26,901	19,072
Linked business	82,769	82,769	—	—	—
General insurance and health	17,121	7,222	6,453	2,872	574
<b>Total contract liabilities</b>	<b>295,487</b>	<b>105,270</b>	<b>63,032</b>	<b>79,979</b>	<b>47,206</b>

**(ii) Analysis of maturity of financial assets**

The following table provides an analysis, by maturity date of the principal, of the carrying value of financial assets which are available to fund the repayment of liabilities as they crystallise.

At 31 December 2011	Total £m	On demand or within 1 year £m	1–5 years £m	Over 5 years £m	No fixed term (perpetual) £m
Debt securities	153,252	18,698	39,079	95,460	15
Equity securities	32,646	—	—	—	32,646
Other investments	30,160	21,007	1,192	1,016	6,945
Loans	28,116	6,490	2,800	18,825	1
Cash and cash equivalents	23,043	23,043	—	—	—
	<b>267,217</b>	<b>69,238</b>	<b>43,071</b>	<b>115,301</b>	<b>39,607</b>

At 31 December 2010	Total £m	On demand or within 1 year £m	1–5 years £m	Over 5 years £m	No fixed term (perpetual) £m
Debt securities	167,482	20,996	46,182	100,133	171
Equity securities	49,076	—	—	—	49,076
Other investments	36,730	32,625	1,713	956	1,436
Loans	43,074	7,492	5,339	30,240	3
Cash and cash equivalents	25,455	25,455	—	—	—
	<b>321,817</b>	<b>86,568</b>	<b>53,234</b>	<b>131,329</b>	<b>50,686</b>

The assets above are analysed in accordance with the earliest possible redemption date of the instrument at the initiation of the Group. Where an instrument is transferable back to the issuer on demand, such as most unit trusts or similar types of investment vehicle, it is included in the 'On demand or within 1 year' column. Debt securities with no fixed contractual maturity date are generally callable at the option of the issuer at the date the coupon rate is reset under the contractual terms of the instrument. The terms for resetting the coupon are such that we expect the securities to be redeemed at this date, as it would be uneconomic for the issuer not to do so, and for liquidity management purposes we manage these securities on this basis. The first repricing and call date is normally ten years or more after the date of issuance. Most of the Group's investments in equity securities and fixed maturity securities are market traded and therefore, if required, can be liquidated for cash at short notice.

**(e) Insurance risk****(i) Life insurance risk****Types of risk**

Life insurance risk in the Group arises through its exposure to mortality and morbidity insurance and exposure to worse than anticipated operating experience on factors such as persistency levels and management and administration expenses.

**Risk management framework**

The Group has developed a life insurance risk policy and associated business standards covering various aspects of life insurance risk management. Individual life insurance risks are managed at a business unit level but are also monitored at group level.

The Group Insurance Committee monitors the application of the risk policy in each business, and receives management information on life insurance risks including experience data, analysis of change and economic capital consumption.

## 56 – Risk management continued

The committee considers all areas of life insurance risk, but in particular has a remit to monitor mortality, longevity, morbidity, persistency, product development and pricing, unit pricing and expenses.

The committee also considers the reinsurance coverage across the life businesses. It confirms that guidance and procedures are in place for each of the major components of life insurance risk, and that the businesses mitigate against any life insurance risk outside local appetite, within the parameters for the overall Group risk appetite.

The committee has also developed guidance for business units on management of a number of areas of life insurance risk to ensure best practice is shared throughout the Group and common standards are adopted.

### **Management of life insurance risks**

The risk profile of our life insurance risks, primarily persistency, longevity, mortality and expense risk, has remained stable during 2011. Persistency risk remains significant and continues to have a volatile outlook with underlying performance linked to some degree to economic conditions. However, businesses across the Group have continued to make progress with a range of customer retention activities. The Group has continued to write strong volumes of life protection business, and to utilise reinsurance to reduce exposure to potential losses. More generally, life insurance risks are believed to benefit from a significant diversification against other risks in the portfolio. The individual life insurance risks are managed as follows:

- Mortality and morbidity risks are mitigated by use of reinsurance. The Group allows business units to select reinsurers, from those approved by the Group, based on local factors, but assesses the overall programme to manage group-wide risk exposures and monitor that the aggregation of risk ceded to individual reinsurers is within appetite for credit risk.
- Longevity risk and internal experience analysis are carefully monitored against the latest external industry data and emerging trends. While individual businesses are responsible for reserving and pricing for annuity business, the Group monitors the exposure to this risk and the capital implications to manage the impact on the group-wide exposure and the capital funding that businesses may require as a consequence. The Group has used reinsurance solutions to reduce the risks from longevity and continually monitors and evaluates emerging market solutions to mitigate this risk further.
- Persistency risk is managed at a business unit level through frequent monitoring of company experience, benchmarked against local market information. Generally, persistency risk arises from customers lapsing their policies earlier than has been assumed. Where possible the financial impact of lapses is reduced through appropriate product design. Businesses also implement specific initiatives to improve retention of policies which may otherwise lapse. The Group Insurance Committee has developed guidelines on persistency management.
- Product design and pricing risk arises from poorly designed or inadequately priced products and can lead to both financial loss for and reputation damage to the Group. Business standards have been developed to support the businesses through the complete cycle of the product development process, financial analysis and pricing, and through the review of existing products.
- Expense risk is primarily managed by the business units through the assessment of business unit profitability and frequent monitoring of expense levels.

In addition to economic capital modelling, sensitivity testing is used to measure the capital required and volatility in earnings due to exposure to life insurance risks, typically through MCEV reporting (examples of which are contained elsewhere in this report). This assessment is made at both business unit level and at group level where the impact of aggregation of similar risks can be measured and is supplemented by scenario analysis. This enables the group to determine whether action is required to reduce risk, or whether that risk is within the overall risk appetite.

### **Embedded derivatives**

The Group has exposure to a variety of embedded derivatives in its long-term savings business due to product features offering varying degrees of guaranteed benefits at maturity or on early surrender, along with options to convert their benefits into different products on pre-agreed terms. The extent of the impact of these embedded derivatives differs considerably between business units and exposes Aviva to changes in policyholder behaviour in the exercise of options as well as market risk.

Examples of each type of embedded derivative affecting the Group are:

- Options: call, put, surrender and maturity options, guaranteed annuity options, options to cease premium payment, options for withdrawals free of market value adjustment, annuity options, and guaranteed insurability options.
- Guarantees: embedded floor (guaranteed return), maturity guarantee, guaranteed death benefit, and guaranteed minimum rate of annuity payment.
- Other: indexed interest or principal payments, maturity value, loyalty bonus.

The impact of these is reflected in the economic capital model and MCEV reporting and managed as part of the asset liability framework.

### **(ii) General insurance risk**

#### **Types of risk**

General insurance risk in the Group arises from:

- fluctuations in the timing, frequency and severity of claims and claim settlements relative to expectations;
- unexpected claims arising from a single source;
- inaccurate pricing of risks or inappropriate underwriting of risks when underwritten;
- inadequate reinsurance protection or other risk transfer techniques; and
- inadequate reserves.

## 56 – Risk management continued

The majority of the general insurance business underwritten by the Group is of a short tail nature such as motor, household and commercial property insurances. The Group's underwriting strategy and appetite is agreed by the Executive Committee and communicated via specific policy statements and guidelines. Like life insurance risk, general insurance risk is managed primarily at business unit level with oversight at a group level, through the Group Insurance Committee.

The vast majority of the Group's general insurance business is managed and priced in the same country as the domicile of the customer.

### **Management of general insurance risks**

Significant insurance risks will be reported through the risk management framework. Additionally, the economic capital model is used to assess the risks that each general insurance business unit, and the group as a whole, is exposed to, quantifying their impact and calculating appropriate capital requirements. All general insurance business units undertake a quarterly review of their insurance risks, the output from which is a key input into the economic capital assessments.

The Group Insurance Committee monitors and develops the management of insurance risk in the general insurance business units, and assesses the aggregate risk exposure. It is responsible for the development and review of the group policies and business standards for underwriting, claims, reinsurance and reserving that form part of the risk management framework.

Business units have developed mechanisms that identify, quantify and manage accumulated exposures to contain them within the limits of the appetite of the Group. The Group has pioneered various developments, such as the Aviva UK Digital Flood Map to effectively manage exposures arising from specific perils. Where appropriate such projects are employed throughout the business units to promote the adoption of best practice as standard.

### **General insurance claims reserving**

Actuarial claims reserving is conducted by local actuaries in the various general insurance business units according to the General Insurance Reserving policy/ business standard. The Group Insurance Committee monitors and maintains the general insurance reserving policy/ business standard, and conducts quarterly reviews of the Group's general insurance claims provisions, and their adequacy. The reviews include peer reviews of the business unit's own conclusions as well as independent analysis to confirm the reasonableness of the local reviews.

The adequacy of the Group's general insurance claims provisions is ultimately overseen by the Group Insurance Committee. A number of business units also have periodic external reviews by local consultant actuaries (often as part of the local regulatory requirement).

### **Reinsurance strategy**

The purchase of reinsurance is governed by the reinsurance standards for both life and general insurance recently introduced by the Group. The standards set out the Group's minimum requirements required to achieve a consistent approach to the assessment, management, retention and placement of reinsurance across the Group. Significant reinsurance purchases are reviewed annually at both business unit and Group level, to verify that the levels of protection being bought reflect any developments in exposure and the risk appetite of the Group. Reinsurance purchases must be in line with the objectives set out in the Group reinsurance business standards. The basis of these purchases is underpinned by analysis of economic capital, economic gain, earnings volatility, liquidity, retained risk exposure profile and the Group's franchise value.

Detailed actuarial analysis is used to calculate the group's extreme risk profile and then design cost and capital efficient reinsurance programmes to mitigate these risks to within agreed appetites. For businesses writing general insurance we will analyse the natural catastrophe exposure using external probabilistic catastrophe models widely used by the rest of the (re)insurance industry. The catastrophe accumulations and loss probabilities based on the Group's specific portfolios of business are reviewed internally to ensure the losses from individual territories, or from our peak exposure zone Northern Europe, are within acceptable limits.

Processes are in place to manage catastrophe risk in individual business units and at a group level. The Group cedes much of its worldwide catastrophe risk to third-party reinsurers but retains a pooled element for its own account gaining diversification benefit. The total Group potential loss from its most concentrated catastrophe exposure zone (Northern Europe excluding Delta Lloyd) is approximately £280 million, for a one in ten year annual loss scenario, compared to approximately £490 million when measured on a one in a hundred year annual loss scenario.

In our 2009 and 2010 Report and Accounts we reported our participation in a share of a reinsurer's US property catastrophe portfolio. Under this arrangement we assume exposure from Hiscox plc that does not correlate with the Group's other general insurance exposures and therefore provides an opportunity to diversify the general insurance portfolio. For the 2011 underwriting year the modelled loss from a one in ten year annual loss scenario was £40 million compared to approximately £100 million when measured on a one in a hundred year annual loss scenario. The arrangement has been renewed for the 2012 underwriting year based on a similar level of participation.

### **(f) Operational risk**

#### **Types of operational risk**

Operational risk is the risk of loss arising from inadequate or failed internal processes, or from people and systems, or from external events. Operational risks include business protection, information technology, people, legal and regulatory compliance risks.

#### **Operational risk management**

We process a large number of complex transactions across numerous and diverse products, and are highly dependent on the proper functioning of information technology and communications systems. We are partially reliant on the operational processing performance of our outsourced partners including certain servicing and IT functions. The long-term nature of our business means that accurate records have to be maintained for significant periods. Significant resources are devoted to maintaining efficient and effective operations within our framework of corporate responsibility, policies, business standards and business ethics code.

## 56 – Risk management continued

Our businesses are primarily responsible for identifying and managing operational risks in line with minimum standards of control set out in our policies and business standards. Each operational risk is assessed by considering the potential impact and the probability of the event occurring.

Business management teams must be satisfied that all material risks falling outside our risk tolerances are being mitigated, monitored and reported to an appropriate level. Any risks with a high potential impact level are monitored centrally on a regular basis. Businesses use key indicator data to help monitor the status of the risk and control environment. They also identify and capture loss events, taking appropriate action to address actual control breakdowns and promote internal learning from these occurrences.

The Operational Risk Committee (ORC) oversees the Group's aggregate operational risk exposure on behalf of the Group Executive Committee. It makes recommendations on the risk appetite that the Group can work within for operational risk, assesses and monitors overall operational risk exposures, identifying any concentrations of operational risk across the Group, and in particular verifies that mitigating action plans are implemented.

### (g) Brand and reputation risk

Brand and reputation risk is the risk of loss of franchise value due to damage to our brand or our reputation with customers, distributors, investors and regulators. Our success and results are, to a certain extent, dependent on the strength of our global Aviva brand and reputation. While we as a group are well recognised, we are vulnerable to adverse market and customer perception. We operate in an industry where integrity, customer trust and confidence are paramount. We are exposed to the risk that litigation, employee misconduct, operational failures, the outcome of regulatory investigations, media speculation and negative publicity, disclosure of confidential client information, inadequate services, among others, whether or not founded, could impact our brands or reputation. Any of our brands or our reputation could also be affected if products or services recommended by us (or any of our intermediaries) do not perform as expected (whether or not the expectations are founded) or the customer's expectations for the product change.

One of the FSA's strategic objectives is to help customers get a fair deal through its 'treating customers fairly' principle. Examples of 'treating customers fairly' include: products and services targeted to meet customers' needs and which perform in line with what customers have been led to expect; clear information (and advice where relevant); good service; and making sure there are no unfair barriers that prevent customers from getting access to their money, changing products or making a successful insurance claim. The FSA regularly checks that we are meeting the requirement to treat our customers fairly and we make use of various metrics to assess our own performance, including customer advocacy, retention and complaints. Failure to meet these requirements could also impact our brands or reputation.

If we do not manage successfully the perception of our brands and reputation, it could cause existing customers or agents to withdraw from our business and potential customers or agents to be reluctant or elect not to do business with us. This would adversely impact our business and results of operations.

### (h) Risk and capital management

#### Sensitivity test analysis

The Group uses a number of sensitivity test-based risk management tools to understand the volatility of earnings, the volatility of its capital requirements, and to manage its capital more efficiently. Sensitivities to economic and operating experience are regularly produced on the Group's key financial performance metrics to inform the Group's decision making and planning processes, and as part of the framework for identifying and quantifying the risks to which each of its business units, and the Group as a whole, are exposed.

For long-term business in particular, sensitivities of MCEV performance indicators to changes in both economic and non-economic experience are continually used to manage the business and to inform the decision making process. More information on MCEV sensitivities can be found in the presentation of results on an MCEV basis in the supplementary section of this report.

#### Life insurance and investment contracts

The nature of long-term business is such that a number of assumptions are made in compiling these financial statements. Assumptions are made about investment returns, expenses, mortality rates and persistency in connection with the in-force policies for each business unit. Assumptions are best estimates based on historic and expected experience of the business. A number of the key assumptions for the Group's central scenario are disclosed elsewhere in these statements for both IFRS reporting and reporting under MCEV methodology.

For participating funds, a negative unallocated divisible surplus (UDS) may be held, subject to recoverability from margins in the participating business liabilities, with any irrecoverable amount charged to net income. The amount of negative UDS that is recoverable is sensitive to movements in risk-free interest rates and credit spreads on the participating fixed interest assets. The increase in interest rate sensitivities for participating investment contracts between 2010 and 2011 primarily reflects the widening of credit spreads on bonds in Italy. An increase in interest rates would increase the amount of irrecoverable UDS that is charged to net income, while a reduction in interest rates would allow the reversal of losses incurred in previous periods.

#### General insurance and health business

General insurance and health claim liabilities are estimated by using standard actuarial claims projection techniques. These methods extrapolate the claims development for each accident year based on the observed development of earlier years. In most cases, no explicit assumptions are made as projections are based on assumptions implicit in the historic claims.

## 56 – Risk management continued

### Sensitivity test results

Illustrative results of sensitivity testing for long-term business, general insurance and health business and the fund management and non-insurance business are set out below. For each sensitivity test the impact of a reasonably possible change in a single factor is shown, with other assumptions left unchanged.

Sensitivity factor	Description of sensitivity factor applied
Interest rate and investment return	The impact of a change in market interest rates by a 1% increase or decrease. The test allows consistently for similar changes to investment returns and movements in the market value of backing fixed interest securities.
Equity/property market values	The impact of a change in equity/property market values by $\pm 10\%$ .
Expenses	The impact of an increase in maintenance expenses by 10%.
Assurance mortality/morbidity (life insurance only)	The impact of an increase in mortality/morbidity rates for assurance contracts by 5%.
Annuitant mortality (life insurance only)	The impact of a reduction in mortality rates for annuity contracts by 5%.
Gross loss ratios (non-life insurance only)	The impact of an increase in gross loss ratios for general insurance and health business by 5%.

### Long-term business

## 56 – Risk management continued

The different impacts of the economic sensitivities on profit and shareholders' equity arise from classification of certain assets as AFS in some business units, for which movements in unrealised gains or losses would be taken directly to shareholders' equity.

The sensitivities to economic movements relate mainly to business in the UK and the US for continuing operations, and the Netherlands for discontinued operations. In general, a fall in market interest rates has a beneficial impact on non-participating business and shareholders' funds, due to the increase in market value of fixed interest securities and the relative durations of assets and liabilities; similarly a rise in interest rates has a negative impact. In the US, most debt securities are classified as AFS, which limits the overall sensitivity of IFRS profit to interest rate movements. The mortality sensitivities relate primarily to the UK.

Changes in sensitivities between 2010 and 2011 reflect movements in market interest rates, portfolio growth, changes to asset mix and the relative durations of assets and liabilities and asset liability management actions.

The impact on the Group's results from sensitivity to these assumptions can also be found in the MCEV sensitivities included in the alternative method of reporting long-term business profits section.

**56 – Risk management continued****General insurance and health business****Sensitivities as at 31 December 2011****Impact on profit before tax (£m)**

	Interest rates +1%	Interest rates -1%	Equity/ property +10%	Equity/ property -10%	Expenses +10%	Gross loss ratios +5%
Gross of reinsurance excluding Delta Lloyd	(205)	180	50	(55)	(130)	(300)
Net of reinsurance excluding Delta Lloyd	(275)	275	50	(55)	(130)	(290)

## 56 – Risk management continued

### Limitations of sensitivity analysis

The above tables demonstrate the effect of a change in a key assumption while other assumptions remain unchanged. In reality, there is a correlation between the assumptions and other factors. It should also be noted that these sensitivities are non-linear, and larger or smaller impacts should not be interpolated or extrapolated from these results.

The sensitivity analyses do not take into consideration that the Group's assets and liabilities are actively managed. Additionally, the financial position of the Group may vary at the time that any actual market movement occurs. For example, the Group's financial risk management strategy aims to manage the exposure to market fluctuations.

As investment markets move past various trigger levels, management actions could include selling investments, changing investment portfolio allocation, adjusting bonuses credited to policyholders, and taking other protective action.

A number of the business units use passive assumptions to calculate their long-term business liabilities. Consequently, a change in the underlying assumptions may not have any impact on the liabilities, whereas assets held at market value in the statement of financial position will be affected. In these circumstances, the different measurement bases for liabilities and assets may lead to volatility in shareholder equity. Similarly, for general insurance liabilities, the interest rate sensitivities only affect profit and equity where explicit assumptions are made regarding interest (discount) rates or future inflation.

Other limitations in the above sensitivity analyses include the use of hypothetical market movements to demonstrate potential risk that only represent the Group's view of possible near-term market changes that cannot be predicted with any certainty, and the assumption that all interest rates move in an identical fashion.

## 57 – Derivative financial instruments and hedging

This note gives details of the various instruments we use to mitigate risk.

The Group uses a variety of derivative financial instruments, including both exchange traded and over-the-counter instruments, in line with our overall risk management strategy. The objectives include managing exposure to price, foreign currency and/or interest rate risk on existing assets or liabilities, as well as planned or anticipated investment purchases.

In the narrative and tables below, figures are given for both the notional amounts and fair values of these instruments. The notional amounts reflect the aggregate of individual derivative positions on a gross basis and so give an indication of the overall scale of the derivative transaction. They do not reflect current market values of the open positions. The fair values represent the gross carrying values at the year end for each class of derivative contract held (or issued) by the Group.

The fair values do not provide an indication of credit risk, as many over-the-counter transactions are contracted and documented under ISDA (International Swaps and Derivatives Association, Inc.) master agreements or their equivalent. Such agreements are designed to provide a legally enforceable set-off in the event of default, which reduces credit exposure. In addition, the Group has collateral agreements in place between the individual Group entities and relevant counterparties.

### (a) Instruments qualifying for hedge accounting

The Group has formally assessed and documented the effectiveness of its instruments qualifying for hedge accounting in accordance with IAS 39, *Financial Instruments: Recognition and Measurement*. To aid discussion and analysis, these instruments are analysed into cash flow, fair value and net investment hedges, as detailed below.

## 57 – Derivative financial instruments and hedging continued

### (i) Cash flow hedges

During 2010, the cash flow hedges were discontinued. The Group has therefore no cash flow hedges to report.

### (ii) Fair value hedges

The Group entered into a number of interest rate swaps in order to hedge fluctuations in the fair value part of its portfolio of mortgage loans and debt securities in the US. The notional value of these interest rate swaps was £844 million at 31 December 2011 (2010: £2,170 million) and their fair value was £77 million liability (2010: £74 million liability). These hedges were fully effective during the year.

### (iii) Net investment hedges

To reduce its exposure to foreign currency risk, the Group has entered into the following net investment hedges:

The Group has designated a portion of its euro and US dollar denominated debt as a hedge of the net investment in its European and American subsidiaries. The carrying value of the debt at 31 December 2011 was £1,815 million (2010: £2,791 million) and its fair value at that date was £1,694 million (2010: £2,811 million). The decrease in the value of debt designated as a hedge of net investment is due to the repayment of an €800 million hybrid debt instrument in November 2011 combined with a depreciation in the euro versus sterling.

The foreign exchange gain of £30 million (2010: gain of £53 million) on translation of the debt to sterling at the statement of financial position date has been recognised in the hedging instruments reserve in shareholders' equity. This hedge was fully effective throughout the current and prior years.

### (b) Derivatives not qualifying for hedge accounting

Certain derivatives either do not qualify for hedge accounting under IAS 39 or the option to hedge account has not been taken. These are referred to below as non-hedge derivatives.

### (i) The Group's non-hedge derivative activity at 31 December 2011 and 2010 was as follows:

	2011			2010		
	Contract/ notional amount £m	Fair value asset £m	Fair value liability £m	Contract/ notional amount £m	Fair value asset £m	Fair value liability £m
<b>Foreign exchange contracts</b>						
OTC

<b>Totals at 31 December</b>	<b>49,526</b>	<b>1,498</b>	<b>(1,773)</b>	<b>76,945</b>	<b>2,274</b>	<b>(2,308)</b>

Fair value assets are recognised as 'Derivative financial instruments' in note 25(a), while fair value liabilities are recognised as 'Derivative liabilities' in note 49.

The Group's derivative risk management policies are outlined in note 56(b).

## 57 – Derivative financial instruments and hedging continued

(ii) The contractual undiscounted cash flows in relation to non-hedge derivative liabilities have the following maturities:

	2011 £m	2010 £m
Within 1 year	226	1,037
Between 1 and 2 years	144	320
Between 2 and 3 years	135	320
Between 3 and 4 years	123	274
Between 4 and 5 years	355	263
After 5 years	1,911	2,923
<b>Total</b>	<b>2,894</b>	<b>5,137</b>

### (c) Collateral

Certain derivative contracts, primarily interest rate and currency swaps, involve the receipt or pledging of cash and non-cash collateral. The amounts of cash collateral receivable or repayable are included in notes 26 and 49 respectively.

## 58 – Assets under management

In addition to the assets included in the consolidated statement of financial position, the Group manages funds for third parties. This note details the total assets under management.

	2011 £m	2010 £m
<b>Total IFRS assets included in the consolidated statement of financial position</b>	<b>312,376</b>	370,107
Less: Third-party funds included within consolidated IFRS assets	(11,814)	(9,999)
	<b>300,562</b>	360,108
Third-party funds under management	67,557	75,491
	<b>368,119</b>	435,599
Non-managed assets	(31,558)	(33,348)
<b>Funds under management</b>	<b>336,561</b>	402,251
Delta Lloyd	—	(62,362)
<b>Funds under management (excluding Delta Lloyd)</b>	<b>336,561</b>	339,889
Managed by:		
Aviva Investors	262,506	259,787
Other Aviva and external managers	74,055	142,464
<b>Total</b>	<b>336,561</b>	402,251

## 59 – Related party transactions

This note gives details of the transactions between Group companies and related parties which comprise our joint ventures, associates and staff pension schemes.

The Group undertakes transactions with related parties in the normal course of business. Loans to related parties are made on normal arm's-length commercial terms.

### Services provided to, and by related parties

	2011				2010			
	Income earned in period £m	Expenses incurred in period £m	Payable at period end £m	Receivable at period end £m	Income earned in year £m	Expenses incurred in year £m	Payable at year end £m	Receivable at year end £m
Associates	—	(3)	(49)	—	47	—	—	—
Joint ventures	23	—	—	125	18	—	—	375
Employee pension schemes	13	—	—	9	10	—	—	2
<b>Total</b>	<b>36</b>	<b>(3)</b>	<b>(49)</b>	<b>134</b>	<b>75</b>	<b>—</b>	<b>—</b>	<b>377</b>

## 59 – Related party transactions continued

Transactions with joint ventures in the UK relate to the property management undertakings, the most material of which are listed in note 18(b). Our interest in these joint ventures comprises a mix of equity and loans, together with the provision of administration services and financial management to many of them. Our UK life insurance companies earn interest on loans advanced to these entities, movements in which may be found in note 18(a). Our fund management companies also charge fees to these joint ventures for administration services and for arranging external finance.

Our UK fund management companies manage most of the assets held by the Group's main UK staff pension scheme, for which they charge fees based on the level of funds under management. The main UK scheme holds investments in Group-managed funds and insurance policies with other Group companies, as explained in note 47(e)(iii).

The related parties' receivables are not secured and no guarantees were received in respect thereof. The receivables will be settled in accordance with normal credit terms. Details of guarantees, indemnities and warranties provided on behalf of related parties are given in note 51(g).

Transactions with joint ventures in Asia relate to life business in India, Malaysia, Korea, Taiwan, China and Vietnam.

### Key management compensation

The total compensation to those employees classified as key management, being those having authority and responsibility for planning, directing and controlling the activities of the Group, including the executive and non-executive directors, is as follows:

	2011 £m	2010 £m
Salary and other short-term benefits <sup>1</sup>	36	36
Post-employment benefits <sup>1</sup>	9	7
Equity compensation plans	18	21
Termination benefits <sup>1</sup>	2	2
<b>Total</b>	<b>65</b>	<b>66</b>

<sup>1</sup> Following a review of the composition of key management, comparative amounts have been amended from amounts previously reported.

Information concerning individual directors' emoluments, interests and transactions is given in the Directors' Remuneration Report.

# Financial statements of the Company

## Income statement

For the years ended 31 December 2011 and 2010:

Approved by the Board on 7 March 2012.

**Patrick Regan**  
Chief financial officer

Where applicable, the accounting policies of the Company are the same as those of the Group on pages 168 to 182. The notes identified alphabetically on pages 316 to 320 are an integral part of these separate financial statements. Where the same items appear in the Group financial statements, reference is made to the notes (identified numerically) on pages 191 to 311.

## Statement of cash flows

For the years ended 31 December 2011 and 2010:

All the Company's operating and investing cash requirements are met by subsidiary companies and settled through intercompany loan accounts. As the direct method of presentation has been adopted for these activities, no further disclosure is required. In respect of financing activities, the following items pass through the Company's own bank accounts.

	2011 £m	2010 £m
<b>Cash flows from financing activities</b>		
Funding provided by subsidiaries	847	866
New borrowings drawdown, net of expenses	<b>3,319</b>	2,251
Repayment of borrowings	<b>(3,326)</b>	(2,272)
Net repayment of borrowings	(7)	(21)
Preference dividends paid	<b>(17)</b>	(17)
Ordinary dividends paid	<b>(431)</b>	(472)
Interest paid on borrowings	<b>(376)</b>	(359)
Net cash from/(used in) financing activities	<b>16</b>	(3)
<b>Net increase/(decrease) in cash and cash equivalents</b>	<b>16</b>	(3)
Cash and cash equivalents at 1 January	<b>1</b>	4
<b>Cash and cash equivalents at 31 December</b>	<b>17</b>	1

Where applicable, the accounting policies of the Company are the same as those of the Group on pages 168 to 182. The notes identified alphabetically on pages 316 to 320 are an integral part of these separate financial statements. Where the same items appear in the Group financial statements, reference is made to the notes (identified numerically) on pages 191 to 311.

# Notes to the Company's financial statements

## A – Investments in subsidiaries

(i) Movements in the Company's investments in its subsidiaries are as follows:

	2011 £m	2010 £m
Fair value as at 1 January	17,623	17,236
Movement in fair value	(2,393)	387
<b>At 31 December</b>	<b>15,230</b>	<b>17,623</b>

Fair values are estimated using applicable valuation models underpinned by the Company's market capitalisation, and are classified as Level 2 in the fair value hierarchy described in note 22 to the Group consolidated financial statements.

(ii) At 31 December 2011, the Company has two wholly owned subsidiaries, both incorporated in the UK. These are General Accident plc and Aviva Group Holdings Limited. Aviva Group Holdings Limited is an intermediate holding company, while General Accident plc no longer carries out this function. The principal subsidiaries of the Aviva Group at 31 December 2011 are listed on pages 50 and 51.

## B – Operating expenses

### (i) Operating expenses

Operating expenses comprise:

	2011 £m	2010 £m
Staff costs and other employee-related expenditure (see below)	156	159
Other operating costs	6	42
Net foreign exchange losses/(gains)	22	(25)
<b>Total</b>	<b>184</b>	<b>176</b>

### (ii) Staff costs

Total staff costs were:

	2011 £m	2010 £m
Wages and salaries	102	109
Social security costs	11	10
Post-retirement obligations		
Defined benefit schemes (see (iii) below)	3	8
Defined contribution schemes	10	5
Profit sharing and incentive plans	11	10
Equity compensation plans (see (iv) below)	16	15
Termination benefits	3	2
<b>Total</b>	<b>156</b>	<b>159</b>

### (iii) Pension costs

The Company is one of a number of UK companies being charged for its employees participating in the Aviva Staff Pension Scheme, and its contributions are affected by the financial position of the scheme. There is no contractual agreement or policy for charging the net defined benefit cost for this scheme across the participating Group entities but, instead, this cost is recognised in the financial statements of the main UK employing company. The Company therefore recognises a pension expense equal to its contributions payable in the year for its staff, together with the service cost of any unfunded benefits, within staff costs above. Full disclosure on the Group's pension schemes is given in the Group consolidated financial statements, note 47.

### (iv) Equity compensation plans

All transactions in the Group's equity compensation plans involve options and awards for ordinary shares of the Company. Full disclosure of these plans is given in the Group consolidated financial statements, note 30. The cost of such options and awards is borne by all participating businesses and, where relevant, the Company bears an appropriate charge. As the majority of the charge to the Company relates to directors' options and awards, for which full disclosure is made in the Directors' Remuneration Report, no further disclosure is given here on the grounds of immateriality.

## C – Tax

### (i) Tax credited to the income statement

	2011 £m	2010 £m
<b>Current tax:</b>		
For this year	83	229
Prior year adjustments	(58)	(1)
<b>Total tax credited to income statement</b>	<b>25</b>	<b>228</b>

### (ii) Tax charged to other comprehensive income

No tax was charged or credited to other comprehensive income in 2010 or 2011.

### (iii) Tax credited to equity

Tax credited to equity comprises £16 million (2010: £17 million) in respect of coupon payments on the direct capital instruments.

### (iv) Tax reconciliation

The tax on the Company's profit before tax differs from the theoretical amount that would arise using the tax rate of the home country of the Company as follows:

	2011 £m	2010 £m
<b>Profit before tax</b>	<b>206</b>	<b>272</b>
Tax calculated at standard UK corporation tax rate of 26.5% (2010: 28%)	(54)	(76)
Adjustment to tax charge in respect of prior years	(58)	(1)
Non-assessable dividends	283	311
Disallowable expenses	(4)	(5)
Unpaid group relief	(64)	—
Movement in deferred tax not recognised	(78)	—
Other	—	(1)
<b>Total tax credited to income statement</b>	<b>25</b>	<b>228</b>

A reduction in the UK corporation tax rate from 28% to 26% was substantively enacted in March 2011 and is effective from 1 April 2011. A further reduction from 26% to 25% was substantively enacted in July 2011 and will be effective from 1 April 2012. In addition, the Government announced its intention to further reduce the UK corporation tax rate to 24% from 1 April 2013 and to 23% from 1 April 2014. There is no impact on the Company's net assets from the reduction in the rate as the Company has no deferred tax assets or liabilities.

### (v) Deferred tax

There was no deferred tax recognised in the Company at 31 December 2011 (2010: £nil). The Company has unrecognised tax losses of £296 million (2010: £nil) and other temporary differences of £245 million (2010: £45 million). The tax losses have no expiry date.

## D – Reserves

	Merger reserve £m	Investment valuation reserve £m	Equity compensation reserve £m	Retained earnings £m
<b>Balance at 1 January 2010</b>	735	6,653	109	3,360
Arising in the year:				
Profit for the year	—	—	—	500
Fair value gains on investments in subsidiaries and joint ventures	—	408	—	—
Actuarial gains on pension provisions	—	—	—	1
Dividends and appropriations	—	—	—	(757)
Reserves credit for equity compensation plans	—	—	41	—
Shares issued in lieu of dividends	—	—	—	209
Trust shares distributed in the year	—	—	—	(50)
Issue of share capital under equity compensation scheme	—	—	(51)	51
Aggregate tax effect	—	—	—	17
<b>Balance at 31 December 2010</b>	735	7,061	99	3,331
Arising in the year:				
Profit for the year	—	—	—	231
Fair value losses on investments in subsidiaries and joint ventures	—	(2,387)	—	—
Actuarial gains on pension provisions	—	—	—	1
Dividends and appropriations	—	—	—	(813)
Reserves credit for equity compensation plans	—	—	48	—
Shares issued in lieu of dividends	—	—	—	307
Trust shares distributed in the year	—	—	—	(18)
Issue of share capital under equity compensation scheme	—	—	(61)	61
Aggregate tax effect	—	—	—	16
<b>Balance at 31 December 2011</b>	<b>735</b>	<b>4,674</b>	<b>86</b>	<b>3,116</b>

Tax of £16 million (2010: £17 million) is deductible in respect of coupon payments of £58 million (2010: £61 million) on the direct capital instruments.

## E – Borrowings

The Company's borrowings comprise:

	2011 £m	2010 £m
Subordinated debt	4,582	4,606
9.5% guaranteed bonds 2016	199	199
Commercial paper	506	504
<b>Total</b>	<b>5,287</b>	<b>5,309</b>

Maturity analysis of contractual undiscounted cash flows:

	2011			2010		
	Principal £m	Interest £m	Total £m	Principal £m	Interest £m	Total £m
Within 1 year	506	314	820	504	306	810
1 to 5 years	200	1,244	1,444	—	1,214	1,214
5 to 10 years	435	1,404	1,839	634	1,402	2,036
10 to 15 years	543	1,240	1,783	1,243	1,062	2,305
Over 15 years	3,643	2,859	6,502	2,956	2,171	5,127
<b>Total contractual undiscounted cash flows</b>	<b>5,327</b>	<b>7,061</b>	<b>12,388</b>	<b>5,337</b>	<b>6,155</b>	<b>11,492</b>

Where subordinated debt is undated, the interest payments have not been included beyond 15 years. Annual interest payments for these borrowings are £73 million (2010: £73 million).

The fair value of the subordinated debt at 31 December 2011 was £3,814 million (2010: £4,370 million). The fair value of the 9.5% guaranteed bonds 2016 at 31 December 2011 was £246 million (2010: £248 million). The fair value of the commercial paper is considered to be the same as its carrying value.

Further details of these borrowings and undrawn committed facilities can be found in the Group consolidated financial statements, note 48.

## F – Contingent liabilities

Details of the Company's contingent liabilities are given in the Group consolidated financial statements, note 51(g).

## G – Risk management

Risk management in the context of the Group is considered in the Group consolidated financial statements, note 56.

The business of the Company is managing its investments in subsidiary and joint venture operations. Its risks are considered to be the same as those in the operations themselves and full details of the major risks and the Group's approach to managing these are given in the Group consolidated financial statements, note 56. Such investments are held by the Company at fair value in accordance with accounting policy D.

The fair values of the subsidiaries and joint venture are estimated using applicable valuation models, underpinned by the Company's market capitalisation. This uses the Company's closing share price at year end. Given that the key input into the valuation model is based on an observable current share price, and therefore sensitive to movements in that price, the valuation process is not sensitive to non-observable market assumptions. Management believes the resulting estimated fair values recorded in the balance sheet and any changes in fair values recorded in the income statement are reasonable, and are the most appropriate values at the balance sheet date.

Financial assets, other than investments in subsidiaries and the joint venture, largely consist of amounts due from subsidiaries. As at the balance sheet date, these receivable amounts were neither past due nor impaired.

Financial liabilities owed by the Company as at the balance sheet date are largely in respect of borrowings (details of which are provided in note E and the Group consolidated financial statements, note 48) and loans owed to subsidiaries. Loans owed to subsidiaries were within agreed credit terms as at the balance sheet date.

### Interest rate risk

Loans to and from subsidiaries are at either fixed or floating rates of interest, with the latter being exposed to fluctuations in these rates. The choice of rates is designed to match the characteristics of financial investments (which are also exposed to interest rate fluctuations) held in both the Company and the relevant subsidiary, to mitigate as far as possible each company's net exposure.

The majority of the Company's external borrowings are at fixed rates of interest and are therefore not exposed to changes in these rates. However, for those borrowings that are at floating rates, the Company is affected by changes in these rates. Further details of the Company's borrowings are provided in note E and the Group consolidated financial statements, note 48.

### Currency risk

The Company's direct subsidiaries are all incorporated and operating in the UK, and therefore are not exposed to currency risk. However, these subsidiaries are themselves exposed to foreign currency risk arising from fluctuations in exchange rates during the course of providing insurance and asset management services around the world. The exposure of the subsidiaries to currency risk is considered from a Group perspective in the Group consolidated financial statements, note 56.

The Company faces exposure to foreign currency risk through some of its borrowings which are denominated in euros and US dollars. However, most of these borrowings have been on-lent to a subsidiary which holds financial investments in these currencies, generating the net investment hedge described in the Group consolidated financial statements, note 57(a)(iii).

## H – Related party transactions

The Company receives dividend and interest income from subsidiaries and pays interest and fee expense to those subsidiaries in the normal course of business. These activities are reflected in the table below.

Loans to and from subsidiaries are made on normal arm's-length commercial terms. The maturity analysis of the related party loans is as follows:

### Loans owed by subsidiaries

Maturity analysis	2011 £m	2010 £m
Within 1 year	—	691
1 to 5 years	1,749	1,769
Over 5 years	626	642
<b>Total</b>	<b>2,375</b>	<b>3,102</b>

### Loans owed to subsidiaries

Maturity analysis of contractual undiscounted cash flows	2011			2010		
	Principal £m	Interest £m	Total £m	Principal £m	Interest £m	Total £m
Within 1 year	502	365	867	514	424	938
1 to 5 years	364	810	1,174	1,125	362	1,487
Over 5 years	1,742	128	1,870	1,742	180	1,922
<b>Total</b>	<b>2,608</b>	<b>1,303</b>	<b>3,911</b>	<b>3,381</b>	<b>966</b>	<b>4,347</b>

Other related party balances comprise dividends and interest receivable and payable, as well as inter-company balances for fees and other transactions in the normal course of business.

**H – Related party transactions continued****Dividends, loans, interest****Services provided to related parties**

	2011		2010	
	Income earned in year £m	Receivable at year end £m	Income earned in year £m	Receivable at year end £m
Subsidiaries	1,211	4,655	1,260	5,436

The related parties' receivables are not secured and no guarantees were received in respect thereof. The receivables will be settled in accordance with normal credit terms. Details of guarantees, indemnities and warranties given by the Company on behalf of related parties are given in note 51(g).

**Services provided by related parties**

	2011		2010	
	Expense incurred in year £m	Payable at year end £m	Expense incurred in year £m	Payable at year end £m
Subsidiaries	460	3,255	458	3,846

The related parties' payables are not secured and no guarantees were received in respect thereof. The payables will be settled in accordance with normal credit terms.

The directors and key management of the Company are considered to be the same as for the Group. Information on both the Company and Group key management compensation can be found in note 59.

**I – Statement of cash flows**

Following a review of the classification, of the cash flows, comparative amounts have been amended from amounts previously reported.

<b>(Loss)/profit for the year</b>	<b>(2,786)</b>	<b>85</b>	<b>(2,701)</b>	<b>1,461</b>	<b>13</b>	<b>1,474</b>

1 Excludes the proportion of the results of Aviva Investors fund management businesses and other fund management operations within the Group that arises from the provision of fund management services to our life businesses. These results are included within the life MCEV operating earnings consistent with the MCEV methodology.

2 Excludes the proportion of the results of subsidiaries providing services to the Life business. These results are included within the life MCEV operating earnings consistent with the MCEV methodology.

## Earnings per share – MCEV basis

Earnings per share	2011			Restated 2010		
	Continuing operations	Discontinued operations	Total	Continuing operations	Discontinued operations	Total
<b>Operating earnings per share on an MCEV basis after tax, attributable to ordinary shareholders of Aviva plc</b>						
Basic (pence per share)	<b>71.3p</b>	<b>3.8p</b>	<b>75.1p</b>	74.5p	2.8p	77.3p
Diluted (pence per share)	<b>70.0p</b>	<b>3.8p</b>	<b>73.8p</b>	73.2p	2.8p	76.0p
<b>Earnings after tax on an MCEV basis, attributable to ordinary shareholders of Aviva plc</b>						
Basic (pence per share)	<b>(67.3p)</b>	<b>4.0p</b>	<b>(63.3p)</b>	48.4p	1.0p	49.4p
Diluted (pence per share)	<b>(67.3p)</b>	<b>3.9p</b>	<b>(63.3p)</b>	47.6p	1.0p	48.6p

The effect of future share awards and options in the loss from continuing operations and total is anti-dilutive, therefore the diluted earnings per share has been maintained at (67.3) pence and (63.3) pence respectively.

Total MCEV operating profit before shareholder tax was £3,537 million (2010: £3,760 million), a decrease of 6%. Within this total the long-term business operating profit before shareholder tax was £3,399 million (2010: £3,579 million), a decrease of 5%.

**Condensed consolidated statement of comprehensive income – MCEV basis**

For the year ended 31 December 2011:

## Reconciliation of IFRS total equity to MCEV net worth

For the year ended 31 December 2011:

	2011 £m	Restated 2010 £m
<b>Net assets on a statutory IFRS net basis</b>	<b>15,363</b>	17,725
Adjusting for general business and other net assets on a statutory IFRS net basis	301	1,331
<b>Life and related businesses net assets on a statutory IFRS net basis</b>	<b>15,664</b>	19,056
Goodwill and other intangibles	(2,117)	(2,356)
Acquired value of in-force business	(960)	(1,447)
Adjustment for share of joint ventures and associates	(7)	(120)
Adjustment for assets to regulatory value net of tax	(1,880)	(890)
Adjustment for DAC and DIR net of tax	(2,622)	(2,839)
Adjustment for differences in technical provisions	2,904	1,303
Other accounting and tax differences	(507)	(505)
<b>MCEV net worth</b>	<b>10,475</b>	12,202
MCEV value of in-force <sup>1</sup>	2,619	6,805
<b>MCEV<sup>2</sup></b>	<b>13,094</b>	19,007

<sup>1</sup> Comprises PVFP of £5,847 million (31 December 2010: £9,952 million), FC of £642 million (31 December 2010: £884 million), CNHR of £1,046 million (31 December 2010: £1,070 million), and TVOG of £1,540 million (31 December 2010: £1,193 million).

<sup>2</sup> Comprises embedded value of £12,274 million (31 December 2010: £15,874 million) and non-controlling interest in long-term business assets of £820 million (31 December 2010: £3,133 million).

Movements in the reconciling items during the period arise mainly from the deconsolidation of Delta Lloyd on 6 May 2011 and consequent removal of Delta Lloyd life business from covered business.

The adjustment for assets to regulatory value and differences in technical provisions relates mainly to the US, reflecting differences between the IFRS and local solvency reserving basis. The DAC and DIR adjustment relates mainly to the UK and US.

1 Covered business represents the business that the MCEV calculations cover, as detailed in the Basis of preparation note. The embedded value is presented net of non-controlling interests and tax.

2 Non-covered but related to life business represents the adjustments to the MCEV, including goodwill, to calculate the long-term business net assets on an MCEV basis. An analysis of net assets on an MCEV basis gross of non-controlling interests is provided in E6.

3 Net assets for the total life businesses on an MCEV basis presented net of non-controlling interests.

## E1 – Basis of preparation

The condensed consolidated income statement and condensed consolidated statement of financial position on pages 322 to 325 present the Group's results and financial position for the life and related businesses on the Market Consistent Embedded Value (MCEV) basis and for its non-covered businesses on the International Financial Reporting Standards (IFRS) basis. The MCEV methodology adopted is in accordance with the MCEV Principles published by the CFO Forum in October 2009.

The directors consider that the MCEV methodology gives useful insight into the drivers of financial performance of the Group's life and related businesses. This basis values future cash flows from assets consistently with market prices, including more explicit allowance for the impact of uncertainty in future investment returns and other risks. Embedded value is also consistent with the way pricing is assessed and the business is managed.

The results for 2011 and 2010 have been audited by our auditors, Ernst & Young LLP. Their report in respect of 2011 can be found on page 360 in the Report and Accounts.

### Covered business

The MCEV calculations cover the following lines of business: life insurance, long-term health and accident insurance, savings, pensions and annuity business written by our life insurance subsidiaries, including managed pension fund business and our share of certain life and related business written in our associated undertakings and joint ventures, as well as the equity release business written in the UK.

Covered business includes the Group's share of our joint ventures including our associated undertakings in India, China, Turkey, Malaysia, Taiwan and South Korea. In addition, the results of group companies providing significant administration, fund management and other services and of Group holding companies have been included to the extent that they relate to covered business. Together these businesses are referred to as 'Life and related businesses'.

Aviva's associate holding of Delta Lloyd is not included within covered business as MCEV is not used to manage Delta Lloyd. For 'Group' MCEV reporting, which includes general insurance and other non-covered business, Delta Lloyd is included on an IFRS basis.

### New business premiums

New business premiums include:

- premiums arising from the sale of new contracts during the period;
- non-contractual additional premiums; and
- expected renewals on new contracts and expected future contractual alterations to new contracts.

The Group's definition of new business under MCEV includes contracts that meet the definition of 'non-participating investment' contracts under IFRS.

For products sold to individuals, premiums are considered to represent new business where a new contract has been signed, or where underwriting has been performed. Renewal premiums include contractual renewals, non-contractual variations that are reasonably predictable and recurrent single premiums that are pre-defined and reasonably predictable.

For Group products, new business includes new contracts and increases to aggregate premiums under existing contracts. Renewal premiums are based on the level of premium received during the reporting period and allow for premiums expected to be received beyond the expiry of any guaranteed premium rates.

### Life and pensions operating earnings

For life and pensions operating earnings, Aviva uses normalised investment returns. The use of asset risk premia reflects management's long-term expectations of asset returns in excess of the swap yield from investing in different asset classes.

The normalised investment return on equities and property has been calculated by reference to the ten-year swap rate in the relevant currency plus an appropriate risk premium. The expected return on bonds has been calculated by reference to the swap rate consistent with the duration of the backing assets in the relevant currency plus an appropriate risk margin (expected return is equivalent to the gross redemption yield less an allowance for defaults).

The expected existing business contribution (in excess of reference rate) is calculated using the implied discount rate (IDR), which itself is based on the normalised investment returns. The methodology applies the IDR to the value of in force (VIF) and required capital (RC) components of the MCEV and adds to this the total expected return for free surplus (FS) to derive the total expected return, in a manner consistent with that previously used under European embedded value reporting. This total is presented as the expected existing business contribution (reference rate), expected existing business contribution (in excess of reference rate) and expected return on shareholders' net worth (grossed up for tax for pre-tax presentation), with only the excess contribution being impacted by the change. The change to expected returns has no impact on total return or on the closing balance sheet.

## E1 – Basis of preparation continued

### MCEV methodology

#### Overview

Under the MCEV methodology, profit is recognised as it is earned over the life of products defined within covered business. The total profit recognised over the lifetime of a policy is the same as under the IFRS basis of reporting, but the timing of recognition is different.

#### Calculation of the embedded value

The shareholders' interest in the life and related businesses is represented by the embedded value. The embedded value is the total of the net worth of the life and related businesses and the value of in-force covered business. Calculations are performed separately for each business and are based on the cash flows of that business, after allowing for both external and intra-group reinsurance. Where one life business has an interest in another, the net worth of that business excludes the interest in the dependent company.

The embedded value is calculated on an after-tax basis applying current legislation and practice together with future known changes. Where gross results are presented, these have been calculated by grossing up post-tax results at the full rate of corporation tax for each country based on opening period tax rates, apart from the UK, where a 26% tax rate was used for 2011 for grossing up.

#### Net worth

The net worth is the market value of the shareholders' funds and the shareholders' interest in the surplus held in the non-profit component of the long-term business funds, determined on a statutory solvency basis and adjusted to add back any non-admissible assets, and consists of the required capital and free surplus.

Required capital is the market value of assets attributed to the covered business over and above that required to back liabilities for covered business, for which distribution to shareholders is restricted. Required capital is reported net of implicit items permitted on a local regulatory basis to cover minimum solvency margins which are assessed at a local entity level. The level of required capital for each business unit is generally set equal to the higher of:

- the level of capital at which the local regulator is empowered to take action;
- the capital requirement of the business unit under the Group's economic capital requirements; and
- the target capital level of the business unit.

For Aviva US, the required capital is set at 325% of the NAIC Company Action Level in line with management targets and target credit ratings.

This methodology reflects the level of capital considered by the directors to be appropriate to manage the business, and includes any additional shareholder funds not available for distribution, such as the reattributed inherited estate in the UK. The same definition of required capital is used for both existing and new business.

The free surplus is the market value of any assets allocated to, but not required to support, the in-force covered business at the valuation date. The level of required capital across the business units expressed as a percentage of the EU minimum solvency margin (or equivalent) can be found in E18.

#### Value of in-force covered business (VIF)

The value of in-force covered business consists of the following components:

- present value of future profits;
- time value of financial options and guarantees;
- frictional costs of required capital; and
- cost of residual non-hedgeable risks.

#### Present value of future profits (PVFP)

The PVFP is the present value of the distributable profits to shareholders arising from the in-force covered business projected on a best estimate basis.

Distributable profits generally arise when they are released following actuarial valuations. These valuations are carried out in accordance with any local statutory requirements designed to ensure and demonstrate solvency in long-term business funds. Future distributable profits will depend on experience in a number of areas such as investment return, discontinuance rates, mortality, administration costs, as well as management and policyholder actions. Releases to shareholders arising in future years from the in-force covered business and associated required capital can be projected using assumptions of future experience.

Future profits are projected using best estimate non-economic assumptions and market consistent economic assumptions. In principle, each cash flow is discounted at a rate that appropriately reflects the riskiness of that cash flow, so higher-risk cash flows are discounted at higher rates. In practice, the PVFP is calculated using the 'certainty equivalent' approach, under which the reference rate is used for both the investment return and the discount rate. This approach ensures that asset cash flows are valued consistently with the market prices of assets without options and guarantees. Further information on the risk-free rates is given in note E18.

The PVFP includes the capitalised value of profits and losses arising from subsidiary companies providing administration, investment management and other services to the extent that they relate to covered business. This is referred to as the 'look through' into service company expenses. In addition, expenses arising in holding companies that relate directly to acquiring or maintaining covered business have been allowed for. Where external companies provide services to the life and related businesses, their charges have been allowed for in the underlying projected cost base.

## E1 – Basis of preparation continued

### Time value of financial options and guarantees (TVOG)

The PVFP calculation is based on a single (base) economic scenario; however, a single scenario cannot appropriately allow for the effect of certain product features. If an option or guarantee affects shareholder cash flows in the base scenario, the impact is included in the PVFP and is referred to as the intrinsic value of the option guarantee; however, future investment returns are uncertain and the actual impact on shareholder profits may be higher or lower. The value of in-force business needs to be adjusted for the impact of the range of potential future outcomes. Stochastic modelling techniques can be used to assess the impact of potential future outcomes, and the difference between the intrinsic value and the total stochastic value is referred to as the time value of the option or guarantee (TVOG).

Stochastic modelling typically involves projecting the future cash flows of the business under thousands of economic scenarios that are representative of the possible future outcomes for market variables such as interest rates and equity returns. Under a market consistent approach, the economic scenarios generated reflect the market's tendency towards risk aversion. Allowance is made, where appropriate, for the effect of management and/or policyholder actions in different economic conditions on future assumptions such as asset mix, bonus rates and surrender rates.

Stochastic models are calibrated to market yield curves and volatility levels at the valuation date. Tests are performed to confirm that the scenarios used produce results that replicate the market price of traded instruments.

Where evidence exists that persistency rates are linked to economic scenarios, dynamic lapse assumptions are set that vary depending on the individual scenarios. This cost is included in the TVOG. Dynamic lapses are modelled for parts of the UK, US and French businesses. Asymmetries in non-economic assumptions that are linked to economic scenarios, but that have insufficient evidence for credible dynamic assumptions, are allowed for within mean best estimate assumptions.

### Frictional costs of required capital

The additional costs to a shareholder of holding the assets backing required capital within an insurance company rather than directly in the market are called frictional costs. They are explicitly deducted from the PVFP. The additional costs allowed for are the taxation costs and any additional investment expenses on the assets backing the required capital. The level of required capital has been set out above in the net worth section.

Frictional costs are calculated by projecting forwards the future levels of required capital. Tax on investment return and investment expenses are payable on the assets backing required capital, up until the point that they are released to shareholders.

### Cost of residual non-hedgeable risks (CNHR)

The cost of residual non-hedgeable risks (CNHR) covers risks not already allowed for in the TVOG or the PVFP. The allowance includes the impact of both non-hedgeable financial and non-financial risks. The most significant risk not included in the PVFP or TVOG is operational risk.

Asymmetric risks allowed for in the TVOG or PVFP are described earlier in the basis of preparation. No allowance has been made within the cost of non-hedgeable risk for symmetrical risks as these are diversifiable by investors.

### US capital solutions

Credit has been taken within the US embedded value, and value of new business, for the anticipated reduction in capital requirements based on management's intention to enact transactions which allow recognition of additional assets that can be held against certain reserves, reducing shareholder capital requirements. By the end of 2011 transactions have been enacted for business written from 2006 to 2011.

### US new business tax

US new business has been valued on a basis with tax applied at the full corporation rate and consequential movements in the value of the Deferred Tax Asset included as a variance within existing business operating return.

### Participating business

Future regular bonuses on participating business are projected in a manner consistent with current bonus rates and expected future market-consistent returns on assets deemed to back the policies.

For with-profit funds in the UK and Ireland, for the purpose of recognising the value of the estate, it is assumed that terminal bonuses are increased to exhaust all of the assets in the fund over the future lifetime of the in-force with-profit policies. However, under stochastic modelling there may be some extreme economic scenarios when the total assets in the Group's with-profit funds are not sufficient to pay all policyholder claims. The average additional shareholder cost arising from this shortfall has been included in the TVOG.

For profit-sharing business in continental Europe, where policy benefits and shareholder value depend on the timing of realising gains, the apportionment of unrealised gains between policyholders and shareholders reflect contractual requirements as well as existing practice. Under certain economic scenarios where additional shareholder injections are required to meet policyholder payments, the average additional cost has been included in the TVOG.

## E1 – Basis of preparation continued

The embedded value of the US spread-based products anticipates the application of management discretion allowed for contractually within the policies, subject to contractual guarantees. This includes the ability to change the crediting rates and indexed strategies available within the policy. Consideration is taken of the economic environment assumed in future projections and returns in excess of the reference rate are not assumed. Anticipated market and policyholder reaction to management action has been considered.

### Consolidation adjustments

The effect of transactions between Group life companies such as loans and reinsurance arrangements have been included in the results split by territory in a consistent manner. No elimination is required on consolidation.

As the MCEV methodology incorporates the impact of profits and losses arising from subsidiary companies providing administration, investment management and other services to the Group's life companies, the equivalent profits and losses have been removed from the relevant segment (non-insurance or fund management) and are instead included within the results of life and related businesses. In addition, the underlying basis of calculation for these profits has changed from the IFRS basis to the MCEV basis.

The capitalised value of the future profits and losses from such service companies are included in the embedded value and value of new business calculations for the relevant business, but the net assets (representing historical profits and other amounts) remain under non-insurance or fund management. In order to reconcile the profits arising in the financial period within each segment with the assets on the opening and closing statement of financial positions, a transfer of IFRS profits from life and related business to the appropriate segment is deemed to occur. An equivalent approach has been adopted for expenses within our holding companies. The assessments of goodwill, intangibles and pension schemes relating to life insurance business utilise the IFRS measurement basis.

### Exchange rates

The Group's principal overseas operations during the period were located within the eurozone and the US.

The results and cash flows of these operations have been translated at the average rates for that period and the assets and liabilities have been translated at the period end rates. Please refer to note 1 on page 191 of the IFRS financial statements.

### Restatement

The 2010 opening and closing embedded values have been restated for the US, primarily reflecting modelling corrections to the valuation of certain life contracts and an overstatement of asset income identified in 2011. The resulting impact of the restatement was that the opening 2010 embedded value increased by £12 million and the closing 2010 embedded value reduced by £257 million, with no impact on operating profit.

### Impact of Delta Lloyd disposal

On 6 May 2011, the Group sold 25 million shares in Delta Lloyd N.V. ("Delta Lloyd") (the Group's Dutch long-term insurance, general insurance and fund management subsidiary), reducing our holding to approximately 43% of Delta Lloyd's ordinary share capital.

In line with IFRS, up to the date of partial disposal, Delta Lloyd has been presented as a discontinued operation. Following the partial disposal, when Delta Lloyd became an associate of Aviva, Delta Lloyd has been removed from covered business as it is not managed by either Aviva or Delta Lloyd on an MCEV basis. The impact on MCEV as at 6 May 2011 is a reduction of £1,519 million.

## E2 – Geographical analysis of life MCEV operating earnings

	2011						Total £m
	United Kingdom £m	Aviva Europe £m	North America £m	Asia Pacific £m	Continuing operations £m	Discontinued operations £m

Expected return on shareholders' net worth	179	152	82	12	425	124	549
Other operating variances	(4)	271	133	15	415	157	572
<b>Operating earnings before tax</b>	<b>1,085</b>	<b>2,013</b>	<b>289</b>	<b>109</b>	<b>3,496</b>	<b>83</b>	<b>3,579</b>

### United Kingdom

**MCEV operating earnings** were 10% higher at £1,193 million (2010: £1,085 million) mainly due to increases in the value of new business and experience variances, partly offset by lower expected return.

**Value of new business** grew 7% to £380 million (2010: £354 million) due to our focus on value maximisation through active management of our new business mix, robust cost control and pricing discipline.

**Total expected return** decreased by 9% to £701 million (2010: £773 million) as a result of a lower opening implied discount rate, albeit on a higher embedded value.

**Experience variances** of £116 million (2010: £20 million adverse) primarily reflect benefits from the Part VII transfer of the former RBS JV business, partly offset by £30 million adverse project expenditures due to increased level of regulatory change.

**Assumption changes** were £11 million adverse (2010: £18 million adverse) reflecting the strengthening of mortality and morbidity rates.

### Aviva Europe

**MCEV operating earnings** decreased 20% to £1,617 million (2010: £2,013 million) as operating variances and assumption changes were less favourable than in the prior period. Additionally, our lower new business volumes, as a result of our focus on value over volume, have led to a corresponding decline in the value of new business.

**Value of new business** was 27% lower at £369 million (2010: £504 million) following lower sales in Spain and management action to reduce sales of profit-sharing products in Italy and, to a lesser extent, in France.

**Total expected return** increased by 5% to £792 million (2010: £753 million) due to increased yields on shareholders' net worth.

**Experience variances** were favourable at £41 million (2010: £147 million) following positive mortality and other experience across the region, partly offset by adverse expenses in France and Ireland and lapse experience in Ireland.

**Assumption changes** on existing business were favourable at £178 million (2010: £338 million) primarily reflecting positive impact of changes to mortality and lapse assumptions in France and changes to assumed expense levels and management actions in relation to product charges in Poland, offset by adverse impacts of lapse and expense changes in Ireland, Italy, Spain and Other Europe.

**Other operating variances** were positive at £237 million (2010: £271 million). These largely arose in France and relate to modelling refinements of £324 million, offset by adverse modelling refinements in Italy of £110 million.

## E2 – Geographical analysis of life MCEV operating earnings continued

### North America

**MCEV operating earnings** decreased by 17% to £241 million (2010: £289 million) as higher expected return and improved value of new business were more than offset by adverse experience, operating assumption changes and other operating variances.

**Value of new business** of negative £131 million (2010: £194 million negative) reflects the continuing adverse economic environment with low risk-free rates. The year on year improvement results from product actions, together with assumption and modelling changes, that more than offset adverse economic movements.

**Total expected return** increased by 27% to £641 million (2010: £503 million) reflecting a higher implied discount rate.

**Operating experience and assumption changes** on existing business were £213 million adverse (2010: £153 million adverse) reflecting adverse expense and mortality experience, the strengthening of future expense assumptions and revisions to policyholder behaviour and annuity spread assumptions.

**Other operating variances** were £56 million adverse (2010: £133 million favourable), primarily reflecting the marginal impact of new business on the value of deferred tax losses.

### Asia Pacific

**MCEV operating earnings** were 28% lower at £78 million (2010: £109 million) as the higher value of new business was more than offset by lower expected return and adverse impacts of existing business.

**Value of new business** was 37% higher at £71 million (2010: £52 million), reflecting improved scale efficiencies, product mix and volumes.

**Total expected return** decreased by 26% to £42 million (2010: £57 million), as a result of lower implied discount rates.

**Operating experience variances, other operating variances and assumption changes** on existing business were adverse £35 million (2010: nil), primarily reflecting adverse lapse experience and assumption strengthening.

<b>Earnings before tax and non-controlling interests</b>	<b>1,193</b>	<b>1,077</b>	<b>(91)</b>	<b>74</b>	<b>410</b>	<b>137</b>	<b>10</b>	<b>1,617</b>	<b>241</b>	<b>78</b>	<b>3,129</b>	<b>270</b>	<b>3,399</b>

<sup>1</sup> Adverse experience occurred across a number of businesses.

<sup>2</sup> Mortality experience continues to be better than the assumption set across a number of our businesses, most notably in France. Adverse experience reflects normal volatility in mortality and increased retention limits in the US.

<sup>3</sup> Persistency experience continues to be somewhat volatile across our businesses. Asia reflects an accumulation of small adverse experience across businesses.

<sup>4</sup> Other experience includes tax benefits from the transfer of former RBS joint venture business into the long-term fund in the UK.

<sup>5</sup> Maintenance and project expense assumptions have been revised in many regions with a broadly neutral impact on continuing business and a benefit from restructuring in Delta Lloyd.

<sup>6</sup> Mortality assumptions have been updated in France reflecting experience.

<sup>7</sup> Persistency assumptions have been updated in a number of businesses reflecting lower expected lapses in France (AFER), increases due to the economic environment in Ireland and Spain and, in the US, revisions to dynamic policyholder lapse behaviour.

<sup>8</sup> Other operating assumption changes in Poland relate to a change to assumed management actions in relation to product charges, and, in the US, revisions to policyholder utilisation of rider benefits offset by revisions to annuity spread assumptions.

<sup>9</sup> Other operating variances relate to modelling changes and the release of a modelling provision in France, and modelling refinements in Italy, and in the US, the marginal impact of new business on the value of deferred tax losses, with cost of capital transactions and model refinements broadly offsetting.

1 Adverse expense experience occurred across a number of businesses.

2 Mortality experience continues to be better than the assumption set across a number of our businesses, most notably in France and the UK Annuity business.

3 Persistency experience remains volatile across most of our businesses, in part reflecting the wider economic circumstances. In France, persistency experience reflects a release of the short-term provision.

4 Other experience includes, in France, the benefit from policyholders switching to unit-linked funds and, in the USA, favourable spread experience.

5 Favourable maintenance expense assumptions reflect the benefit of the shared service centre in Spain, together with the release of margins in Spain, related to bancassurance joint venture governance costs, and Poland. In the UK, the expense assumptions include a reallocation of provisions in the service company, better reflecting the expected future allocation of costs. In the USA, the adverse impact reflects a revised allocation of costs between ongoing and one-off. In Delta Lloyd, favourable expense assumptions relate to planned expense saving following restructuring activities.

6 Delta Lloyd has updated mortality assumptions to reflect recently published tables, which include a significantly increased allowance for mortality improvements. In France and the USA, mortality assumptions have been updated reflecting experience.

7 Persistency assumptions have been updated in a number of businesses.

8 Other operating variances for France relate to modelling changes, particularly relating to the time value of options and guarantees, and the benefit of reducing minimum guarantee rates. In Delta Lloyd, modelling changes include impacts related to commercial mortgages partly offset by changes to group pensions business. In the US, other operating variances related to the benefit of an AXXX capital solution together with modelling refinements on our asset portfolio.

### E3 – Geographical analysis of fund management operating earnings

The summarised consolidated income statement – MCEV basis includes earnings from the Group's fund management operations as analysed below. This excludes the proportion of the results of Aviva Investors fund management businesses and other fund management operations within the Group that arise from the provision of fund management services to our Life businesses. These results are included within the Life MCEV operating earnings.

	2011 £m	2010 £m
United Kingdom	14	28
Europe	12	10
North America	—	(8)
Asia Pacific	(5)	—
<b>Aviva Investors</b>	<b>21</b>	<b>30</b>
United Kingdom	11	3
Aviva Europe	—	—
Asia Pacific	—	(2)
<b>Total – continuing operations</b>	<b>32</b>	<b>31</b>
<b>Total – discontinued operations</b>	<b>9</b>	<b>94</b>
<b>Total</b>	<b>41</b>	<b>125</b>

### E4 – Analysis of other operations and regional costs

Where subsidiaries provide services to our life business, that proportion has been excluded. These results are included within the Life MCEV operating return.

	2011			2010		
	Regional costs £m	Other operations £m	Total £m	Regional costs £m	Other operations £m	Total £m
United Kingdom	—	(61)	(61)	—	(21)	(21)
Aviva Europe	(57)	(38)	(95)	(55)	(43)	(98)
North America	(15)	(3)	(18)	(26)	6	(20)

<b>Total</b>	<b>(102)</b>	<b>(95)</b>	<b>(197)</b>	<b>(113)</b>	<b>(82)</b>	<b>(195)</b>

### E5 – Exceptional items and integration and restructuring costs

Exceptional Items of £57 million (2010: £428 million) were mainly due to a £22 million provision for compensation scheme costs for the leveraged property fund in Ireland, as well as a £35 million expense for the discounted cost of strengthening latent claims provisions in the UK.

For full year 2010, exceptional items were mainly due to a change in the cost of capital charge for the Cost of Non-Hedgeable Risk, from 2.5% to 3.3% p.a. with total impact of £365 million, the impact of reducing state contributions to Pillar II Pension funds in Poland, following the announcement to change legislation on 1 April 2011 of £280 million, and the recognition by Delta Lloyd of £59 million costs in relation to unit-linked insurance compensation scheme and compensation costs in defined contribution pension schemes, partly offset by a £286 million benefit from the closure of the final salary section of the UK staff pension scheme to future accruals.

Integration and restructuring costs incurred in the year amounted to £212 million (FY10: £312 million). This includes costs associated with preparing the businesses for Solvency II implementation of £88 million expenditure relating to the Quantum Leap project in Europe of £51 million, and other restructuring exercises across the Group of £91 million partly offset by benefits of regulatory changes of £20 million.

## E6 – Segmentation of condensed consolidated statement of financial position

Liabilities of the general insurance and other businesses	—	(30,391)	(30,391)	—	(46,709)	(46,709)
<b>Net assets on a statutory IFRS basis</b>	<b>15,664</b>	<b>(301)</b>	<b>15,363</b>	19,056	(1,331)	17,725
Additional value of in-force long-term business <sup>1</sup>	132	—	132	2,480	—	2,480
<b>Net assets on an MCEV basis<sup>2</sup></b>	<b>15,796</b>	<b>(301)</b>	<b>15,495</b>	21,536	(1,331)	20,205
Equity capital, capital reserves, shares held by employee trusts and other reserves			6,389			7,207
IFRS basis retained earnings			5,954			5,411
Additional MCEV basis retained earnings			486			2,420
<b>Equity attributable to ordinary shareholders of Aviva plc on an MCEV basis</b>			<b>12,829</b>			15,038
Preference share capital and direct capital instruments			1,190			1,190
Non-controlling interests			1,476			3,977
<b>MCEV basis total equity</b>			<b>15,495</b>			20,205

1 The analysis between the Group's and non-controlling interests' share of the additional value of in-force long-term business is as follows:

	2011 £m	Restated 2010 £m	Movement in year £m
Group's share included in shareholders' funds	486	2,420	(1,934)
Non-controlling interests' share	(54)	236	(289)
Movements in AFS securities	(300)	(176)	(125)
Additional value of in-force long-term business	132	2,480	(2,348)

2 Analysis of net assets on an MCEV basis is made up as follows:

	2011 £m	Restated 2010 £m
Embedded value	12,274	15,874
Non-controlling interests	820	3,133
	13,094	19,007
Goodwill and intangible assets allocated to long-term business <sup>3</sup>	2,117	2,356
Notional allocation of IAS19 pension fund surplus/(deficit) to long-term business <sup>4</sup>	585	173
Long-term business net assets on an MCEV basis	15,796	21,536

3 Goodwill and intangible assets include amounts related to associated undertakings and joint ventures.

4 The value of the Aviva Staff Pension Scheme surplus has been notionally allocated between segments, based on current funding and the Life proportion has been included within the long-term business net assets on an MCEV basis. The pension fund surplus notionally allocated to long-term business is net of the agreed funding borne by the UK with-profit funds.

## E7 – Analysis of life and pension earnings

The following table provides an analysis of the movement in embedded value for covered business. The analysis is shown separately for free surplus, required capital and the value of in-force (VIF) covered business, and includes amounts transferred between these categories. All figures are shown net of tax and non-controlling interests.

Net of tax and non-controlling interests 2011	Continuing operations				Discontinued operations				Total

1 Required capital is shown net of implicit items permitted by local regulators to cover minimum solvency margins.

2 Other non-operating variances are described under Exceptional items in note E5.

3 Included within capital and dividend flows is the transfer to Life and related businesses from other segments consisting of service company profits and losses during the reported period that have emerged from the value of in-force. Since the 'look through' into service companies includes only future profits and losses, these amounts must be eliminated from the closing embedded value.

4 As a result of the January 2012 announced disposal of the Czech, Hungarian, and Romanian businesses, the VIF movement reflects the write-down of this business to the IFRS carrying value.

Divested business is the removal of Delta Lloyd from covered business subsequent to the reduction of our holding to 42%.

1 Required capital is shown net of implicit items permitted by local regulators to cover minimum solvency margins.

2 Other non-operating variances relate to increase in CNHR charge from 2.5% to 3.3% p.a., legislation changes to Poland Pensions, costs for Solvency II implementation and other restructuring and unit-linked insurance compensation scheme and compensation costs in Delta Lloyd.

3 Included within capital and dividend flows is the transfer to Life and related businesses from other segments consisting of service company profits and losses during the reported period that have emerged from the value of in-force. Since the 'look through' into service companies includes only future profits and losses, these amounts must be eliminated from the closing embedded value.

## E8 – Life MCEV operating earnings

The table below presents the life and pensions MCEV earnings broken down into constituent parts. The life and pensions MCEV operating earnings comprise: the value of new business written during the year; the earnings from existing business including other operating variances; and the expected investment return on the shareholders' net worth.

These components are calculated using economic assumptions as at the start of the year (in-force business) or start of the quarter (new business) and operating (demographic and expenses) assumptions as at the end of the year.

	2011 £m	Restated 2010 £m
Value of new business	689	716
Earnings from existing business		
– expected returns at the reference rate	566	453
– expected returns in excess of the reference rate	1,199	1,208
– expected returns	1,765	1,661
– experience variances	46	92
– operating assumption changes	41	187
Other operating variance	177	415
Expected return on shareholders' net worth	411	425
<b>Life and pensions operating earnings before tax</b>	<b>3,129</b>	3,496
Economic variances	(6,541)	(450)
Other non-operating variances	(32)	(686)
<b>Life and pensions earnings before tax</b>	<b>(3,444)</b>	2,360
Tax on operating earnings	(908)	(1,035)
Tax on other activities	2,098	296
<b>Life and pensions earnings after tax – continuing operations</b>	<b>(2,254)</b>	1,621
<b>Life and pensions earnings after tax – discontinued operations</b>	<b>(33)</b>	(83)
<b>Total life and pensions earnings after tax</b>	<b>(2,287)</b>	1,538

There were no separate development costs reported in these years.

Other non-operating variances are described under Exceptional items in note E5.

The table above presents a summarised breakdown of the life and pensions MCEV earnings on a gross of non-controlling interests basis and gross of tax with tax shown separately. The Group favours the gross presentation for consistency with the IFRS results. The table below compares the key items on the different bases as the subsequent analysis is provided predominantly on a net of tax and non-controlling interests basis as preferred by the CFO Forum Principles.

### Key indicators

	2011		Restated 2010

## E9 – Present value of life new business premiums

The tables below set out the present value of new business premiums (PVNBP) written by the life and related businesses, gross of tax and non-controlling interests. The PVNBP calculation is equal to total single premium sales received in the period plus the discounted value of regular premiums expected to be received over the term of the new contracts, and is expressed at the point of sale.

The premium volumes and projection assumptions used to calculate the present value of regular premiums for each product are the same as those used to calculate the value of new business, so the components of the new business margin are on a consistent basis.

The weighted average capitalisation factor (WACF) is the multiple of the annualised regular premium which gives the present value at point of sale of the regular premiums.

Gross of non-controlling interests 2011	Regular premiums £m	WACF	Present value of regular premiums £m	Single premiums £m	Present value of new business premiums £m

<b>Aviva Europe</b>	<b>453</b>	<b>5.8</b>	<b>2,626</b>	<b>10,911</b>	<b>13,537</b>
<b>North America</b>	<b>97</b>	<b>10.2</b>	<b>993</b>	<b>3,735</b>	<b>4,728</b>
<b>Asia Pacific</b>	<b>240</b>	<b>4.7</b>	<b>1,132</b>	<b>485</b>	<b>1,617</b>
<b>Total life and pensions – continuing operations</b>	<b>1,369</b>	<b>5.7</b>	<b>7,748</b>	<b>22,432</b>	<b>30,180</b>
<b>Total life and pensions – discontinued operations</b>	<b>172</b>	<b>9.3</b>	<b>1,591</b>	<b>1,587</b>	<b>3,178</b>
<b>Total life and pensions</b>	<b>1,541</b>	<b>6.1</b>	<b>9,339</b>	<b>24,019</b>	<b>33,358</b>

In Poland, the decrease in the WACF reflects the lower proportion of new pension business written following legislative changes, making this business less attractive. This business had a high WACF, reflecting the long duration of the business combined with premiums increasing each year.

## E10 – Geographical analysis of value of new business

The tables below set out the present value of new business premiums (PVNBP) written by the life and related businesses, the value of the new business and the resulting margin, firstly gross and then net of tax and non-controlling interests. The value generated by new business written during the period is the present value of the projected stream of after-tax distributable profit from that business, including expected profit between point of sale and the valuation date. The value of new business has been calculated using economic assumptions at the point of sale which has been implemented with the assumptions being taken as those appropriate to the start of each quarter. For contracts that are re-priced more frequently, weekly or monthly economic assumptions have been used.

The operating assumptions are consistent with those used to determine the embedded value. The value of new business is shown after the effect of the frictional costs of holding required capital, and after the effect of the costs of residual non-hedgeable risks on the same basis as for the in-force covered business.

	Present value of new business premiums		Value of new business		New business margin

<sup>1</sup> Current period discontinued operations represent the results of Delta Lloyd up to 6 May 2011 only.

## E11 – Post-tax internal rate of return and payback period on life and pensions new business

The new business written requires up-front capital investment due to high set-up costs and capital requirements. The internal rate of return (IRR) is a measure of the shareholder return expected on this capital investment. It is equivalent to the discount rate at which the present value of the post-tax cash flows expected to be earned over the lifetime of the business written, including allowance for the time value of options and guarantees, is equal to the total invested capital to support the writing of the business. The capital included in the calculation of the IRR is the initial capital required to pay acquisition costs and set up statutory reserves in excess of premiums received (initial capital), plus required capital at the same level as for the calculation of the value of new business.

The payback period shows how quickly shareholders can expect the total capital to be repaid. The payback period has been calculated based on undiscounted cash flows and allows for the initial and required capital.

The projected investment returns in both the IRR and payback period calculations assume that equities, properties and bonds earn a return in excess of risk-free consistent with the long-term rate of return assumed in operating earnings.

The IRR on life and pensions new business for the Group (excluding Delta Lloyd) was 14.4% (2010: 13.3%).

<sup>1</sup> Required capital is shown net of implicit items permitted by local regulators to cover minimum solvency margins.

<sup>2</sup> France and Aviva USA have a positive surplus on a statutory basis.

<sup>3</sup> Aviva USA's holding company debt amounting to £765 million at 31 December 2010 has been included within non-covered business.

## E14– Segmental analysis of life and related business embedded value continued

The required capital across our life businesses varies between 100% and 325% of EU minimum or equivalent. The weighted average level of required capital for our life business, excluding Delta Lloyd, expressed as a percentage of the EU minimum (or equivalent) solvency margin has increased to 135% (2010: 130%). These levels of required capital are used in the calculation of the Group's embedded value to evaluate the cost of locked in capital. At 31 December 2011 the aggregate regulatory requirements based on the EU minimum test amounted to £5.9 billion (2010: £6.0 billion). At this date, the actual net worth held in our long-term business, excluding Delta Lloyd, was £9.3 billion (2010: £8.6 billion) which represents 158% (2010: 144%) of these minimum requirements.

## E15 – Risk allowance within present value of in-force (VIF)

Within the VIF in the tables, there are additional allowances for risks not included within the basic present value of future profits calculation.

Net of non-controlling interests 2011	PVFP £m	Frictional costs £m	Non-hedgeable risks £m	Time value of financial options and guarantees £m	VIF £m
<b>United Kingdom</b>	<b>2,990</b>	<b>(241)</b>	<b>(390)</b>	<b>(27)</b>	<b>2,332</b>
France	1,721	(147)	(182)	(592)	800
Ireland	439	(14)	(22)	(3)	400
Italy	(550)	(3)	(20)	(85)	(658)
Poland	1,088	(11)	(145)	(3)	929
Spain	176	(12)	(45)	(14)	105
Other Europe	130	(2)	(7)	(2)	119
<b>Aviva Europe</b>	<b>3,004</b>	<b>(189)</b>	<b>(421)</b>	<b>(699)</b>	<b>1,695</b>
<b>North America</b>	<b>(513)</b>	<b>(160)</b>	<b>(67)</b>	<b>(622)</b>	<b>(1,362)</b>
<b>Asia Pacific</b>	<b>455</b>	<b>(26)</b>	<b>(67)</b>	<b>(62)</b>	<b>300</b>
<b>Total</b>	<b>5,936</b>	<b>(616)</b>	<b>(945)</b>	<b>(1,410)</b>	<b>2,965</b>

The time value of options and guarantees (excluding Delta Lloyd) has increased by £621 million to £1,410 million, reflecting adverse impacts from economic movements over the year; in particular, significant increases in swaption volatility and decreases in risk-free rates.

The allowance for non-hedgeable risks (excluding Delta Lloyd) increased by £124 million to £945 million, primarily due to lower reference rates. The charge for CNHR remains unchanged at 3.3%.

Restated Net of non-controlling interests 2010	PVFP £m	Frictional costs £m	Non-hedgeable risks £m	Time value of financial options and guarantees £m	VIF £m
<b>United Kingdom</b>	<b>2,938</b>	<b>(291)</b>	<b>(322)</b>	<b>(28)</b>	<b>2,297</b>

<b>Total – Delta Lloyd</b>	<b>580</b>	<b>(107)</b>	<b>(85)</b>	<b>(192)</b>	<b>196</b>
<b>Total</b>	<b>8,562</b>	<b>(746)</b>	<b>(906)</b>	<b>(981)</b>	<b>5,929</b>

## E16 – Implied discount rates (IDR)

In the valuation of a block of business, the IDR is the rate of discount such that a traditional embedded value calculation for the covered business equates to the MCEV.

The cash flows projected are the expected future cash flows including expected investment cash flows from equities, bonds and properties earning a risk premium in excess of risk free, statutory reserves and required capital. The risk premiums used are consistent with those used in the expected existing business contribution within operating earnings. As the risk premiums are positive, a discount rate higher than risk-free is required to give a value equal to the market-consistent embedded value.

Average derived risk discount rates are shown below for the embedded value.

	2011 %	Restated 2010 %
<b>United Kingdom</b>	<b>9.3</b>	8.4
France	<b>7.9</b>	6.7
Ireland	<b>4.1</b>	4.4
Italy <sup>1</sup>	<b>n/a</b>	7.3
Poland	<b>6.5</b>	7.3
Spain	<b>15.0</b>	9.6
Other Europe	<b>6.7</b>	8.0
<b>Aviva Europe</b>	<b>n/a</b>	6.9
<b>North America<sup>1</sup></b>	<b>n/a</b>	34.2
<b>Asia Pacific</b>	<b>5.2</b>	5.9
<b>Total</b>	<b>n/a</b>	9.8

<sup>1</sup> Where there is significant difference in projected real world and risk neutral profits and the value of the in force business plus required capital is negative or close to zero, the IDR is not well defined and consequently IDR is not meaningful.

## E17 – Summary of non-controlling interest in life and related businesses' MCEV results

There are no non-controlling interests in the UK or North America.

## E18 – Principal assumptions

### (a) Economic assumptions – deterministic calculations

Economic assumptions are derived actively, based on market yields on risk-free fixed interest assets at the end of each reporting period.

In setting the risk-free rate we have, wherever possible, used the mid-price swap yield curve for an AA-rated bank. The curve is extrapolated if necessary to get rates suitable to the liabilities. For markets in which there is no reliable swap yield curve the relevant government bond yields are used. For certain business, swap rates are adjusted for a 'liquidity premium' in deriving the risk-free rates, and these adjustments are shown below the reference rate table.

Required capital is shown as a multiple of the EU statutory minimum solvency margin or equivalent.

The principal economic assumptions used are as follows:

#### Reference rate (spot, swap rates) and expense inflation

	United Kingdom		
	2011	2010	2009
Reference rate			
1 year	<b>1.2%</b>	1.0%	1.2%
5 years	<b>1.6%</b>	2.7%	3.5%
10 years	<b>2.3%</b>	3.7%	4.3%
15 years	<b>2.8%</b>	4.1%	4.6%
20 years	<b>3.0%</b>	4.2%	4.6%
Expense inflation	<b>2.8%</b>	3.3%	3.3%

	Delta Lloyd		
	2011	2010	2009
Reference rate			
1 year	<b>n/a</b>	1.3%	1.3%
5 years	<b>n/a</b>	2.6%	2.9%
10 years	<b>n/a</b>	3.4%	3.7%
15 years	<b>n/a</b>	3.8%	4.1%
20 years	<b>n/a</b>	3.8%	4.2%
Expense inflation	<b>n/a</b>	2.0%	2.4%

	Eurozone (excluding Delta Lloyd)		
	2011	2010	2009
Reference rate			
1 year	<b>1.4%</b>	1.3%	1.3%
5 years	<b>1.7%</b>	2.5%	2.8%
10 years	<b>2.4%</b>	3.4%	3.7%
15 years	<b>2.8%</b>	3.8%	4.1%
20 years	<b>2.8%</b>	3.8%	4.2%
Expense inflation	<b>1.9%</b>	2.1%	2.5%

## E18 – Principal assumptions continued

	Poland		
	2011	2010	2009
Reference rate			
1 year	<b>4.9%</b>	4.4%	4.5%
5 years	<b>4.8%</b>	5.5%	5.8%
10 years	<b>5.0%</b>	5.7%	5.8%
15 years	<b>4.7%</b>	5.4%	5.7%
20 years	<b>4.3%</b>	5.1%	5.5%
Expense inflation	<b>2.9%</b>	3.0%	3.0%

	United States		
	2011	2010	2009
Reference rate			
1 year	<b>0.7%</b>	0.4%	0.7%
5 years	<b>1.2%</b>	2.2%	3.1%
10 years	<b>2.1%</b>	3.5%	4.2%
15 years	<b>2.5%</b>	4.0%	4.6%
20 years	<b>2.6%</b>	4.2%	4.8%
Expense inflation	<b>2.0%</b>	3.0%	3.0%

For service companies, expense inflation relates to the underlying expenses rather than the fees charged to the life company.

The following adjustments are made to the swap rate for immediate annuity type contracts and for all contracts for Aviva USA. The risk-free rate is taken as the swap yield curve for the currency of the liability, adjusted as follows:

	New business								Embedded value	
	Q4 2011	Q3 2011	Q2 2011	Q1 2011	Q4 2010	Q3 2010	Q2 2010	Q1 2010	2011	2010
UK immediate annuities	<b>1.27%</b>	<b>1.20%</b>	<b>1.00%</b>	<b>1.14%</b>	1.09%	0.87%	0.75%	0.80%	<b>1.30%</b>	1.09%
UK bulk purchase annuities	<b>1.36%</b>	<b>1.38%</b>	<b>0.65%</b>	<b>0.72%</b>	0.72%	0.69%	0.70%	0.75%	<b>1.30%</b>	1.09%
France	<b>n/a</b>	<b>n/a</b>	<b>n/a</b>	<b>n/a</b>	n/a	n/a	n/a	n/a	<b>1.18%</b>	0.36%
Spain	<b>0.96%</b>	<b>0.33%</b>	<b>0.31%</b>	<b>0.36%</b>	0.15%	0.12%	0.20%	0.15%	<b>0.88%</b>	0.36%
Delta Lloyd	<b>n/a</b>	<b>n/a</b>	<b>0.31%</b>	<b>0.36%</b>	0.38%	0.39%	0.34%	0.43%	<b>n/a</b>	0.36%
US immediate annuities	<b>1.28%</b>	<b>0.59%</b>	<b>0.57%</b>	<b>0.66%</b>	0.76%	0.85%	0.65%	0.65%	<b>1.33%</b>	0.66%
US deferred annuities and all other contracts	<b>1.09%</b>	<b>0.51%</b>	<b>0.49%</b>	<b>0.56%</b>	0.64%	0.70%	0.55%	0.55%	<b>1.13%</b>	0.56%

For Delta Lloyd, the adjustment shown is applied to immediate annuity type contracts. For participating contracts, 75% of this value is used and for all other contracts, 50% of this value is used. This methodology is consistent with QIS 5 Solvency II requirements.

The approach to estimating the market level of liquidity premium in corporate bond assets is consistent with the formula structure proposed by the CFO/CRO Forum working party.

The formula is:

UK/Europe:	50% of (iBoxx Corporate bond spread – 40bp)
USA:	60% of (iBoxx Corporate bond spread – 40bp)

Adjustments are made where liabilities are not fully backed by assets earning a liquidity premium and for contracts that are exposed to some lapse risk. There has been no change to the types of contracts to which a liquidity premium is applied.

#### Risk premium – used for operating profit, implied discount rates (IDR), internal rates of return (IRR) and payback period

For life and pensions operating earnings, Aviva uses normalised investment returns. The normalised investment returns are expressed as a swap rate based on the typical duration of the assets held plus an asset risk premium. More detail is given in note E1 – Basis of preparation.

The use of asset risk premia only impacts operating earnings as expected returns reflect management's long-term expectations of asset returns in excess of the reference rate from investing in different asset classes. This assumption does not impact the embedded value or value of new business as asset risk premia are not recognised until earned. The asset risk premia set out in the table below are added to the ten-year swap rate to calculate expected returns.

## E18 – Principal assumptions continued

	All territories		
	2011	2010	2009
Equity risk premium	<b>3.5%</b>	3.5%	3.5%
Property risk premium	<b>2.0%</b>	2.0%	2.0%

Future returns on fixed interest investments are calculated from prospective yields less an adjustment for credit risk.

### Required capital and tax

	Tax rates <sup>5</sup>			Required capital (% EU minimum or equivalent)	
	2011	2010	2009	2011	2010

United States	<b>35.0%</b>	35.0%	0.0%	<b>325%</b>	325%

<sup>1</sup> The required capital in the United Kingdom under MCEV is 100% for unit-linked and other non-participating business and annuity business with 200% for BPA business. In addition, the reattribution of the inherited estate has led to additional capital being locked in to support the with-profit business, and this has been included within required capital.

<sup>2</sup> Required capital in Ireland under MCEV is 174% for bancassurance and 180% for retail business.

<sup>3</sup> This is the aggregate required capital level in Italy. The required capital as a percentage of EU minimum has increased due to the current economic environment.

<sup>4</sup> Required capital in Spain is 156% of the EU minimum for Aviva Vida y Pensiones and 122%–130% for bancassurance companies.

<sup>5</sup> Current tax legislation and rates have been assumed to continue unaltered except where changes in future tax rates have been substantively enacted as at the valuation date.

A reduction in the UK corporation tax rate from 28% to 26% was substantively enacted in March 2011 and is effective from 1 April 2011. A further reduction from 26% to 25% was substantively enacted in July 2011 and will be effective from 1 April 2012. The effect of the 25% rate has been reflected in the Group's MCEV net assets as at 31 December 2011. In addition, the Government announced its intention to further reduce the UK corporation tax rate to 24% from 1 April 2013 and to 23% from 1 April 2014. The benefit to the Group's MCEV net assets from the further 2% reduction in the rate from 25% to 23% is estimated at approximately £100 million in total.

Considerable changes to the regime for taxing UK life insurance companies will be made with effect from 1 January 2013. Draft legislation on this was included in the draft 2012 Finance Bill published on 6 December 2011, and consultation on the changes and the draft legislation has continued since then. Based on the draft legislation published in December 2011 and the continued consultation, it is not expected that these changes will have a material impact on the Group's MCEV net assets.

### Other economic assumptions

Required capital relating to with-profit business is generally assumed to be covered by the surplus within the with-profit funds and no effect has been attributed to shareholders. Where the fund is insufficient and additional shareholder support is required, this is included within required capital, including the RIEESA in the UK. Bonus rates on participating business have been set at levels consistent with the economic assumptions. The distribution of profit between policyholders and shareholders within the with-profit funds assumes that the shareholder interest in conventional with-profit business in the UK and Ireland continues at the current rate of one-ninth of the cost of bonus.

### (b) Economic assumptions – stochastic calculations

The calculation of time value of options and guarantees allows for expected management and policyholder actions in response to varying future investment conditions. The management actions modelled include changes to asset mix, bonus rates and rates of interest and other guarantees granted to policyholders. Modelled policyholder actions are described under 'Other assumptions'.

## E18 – Principal assumptions continued

### Model – Europe (excluding Delta Lloyd) and Asia Pacific

Swap rates are generated by a model, the LIBOR Market Model (LMM), that projects a full swap curve at monthly intervals. Forward rates are assumed to have a log-normal distribution which guarantees non-negative interest rates. The model is calibrated to at-the-money swaptions of a variety of terms and tenors. Swaption volatilities are taken from SuperDerivatives. Tests have been performed to ensure that sufficient scenarios have been used that the result converges to the stochastic value of the business being valued.

The total annual return on equities is calculated as the return on one-year swaps plus an excess return. This excess return is generally modelled using a log-normal model where volatility varies by time horizon. This allows the model to capture the term structure of implied volatilities. The model is calibrated to at-the-money options of a variety of terms. Option volatilities are taken from Markit.

The model also generates property total returns and real yield curves, although these are not significant asset classes for Aviva outside the UK. In the absence of liquid market data, the volatilities of these asset classes are based on historic data.

Assumptions for correlations between asset classes have been set based on historic data.

### Model – North America and United Kingdom

Swap rates are generated by a model, the LIBOR Market Model Plus (LMM+), which projects a full swap curve at monthly intervals. Previously the LMM model was used in the UK to generate scenarios. Forward rates are assumed to have a distribution that lies between the log-normal and normal distributions. Although this no longer guarantees non-negative interest rates, it maintains interest rates within a more plausible range than the standard Libor Market Model, and gives a better fit to certain swaption volatility surfaces. The model is calibrated to volatilities for swaptions for ten-year swaps for a range of option terms and strike rates. Swaption volatilities are taken from SuperDerivatives. Tests have been performed to ensure that sufficient scenarios have been used that the result converges to the stochastic value of the business being valued.

The total annual return on equities is calculated as the return on one-year swaps plus an excess return. For the US, this excess return is modelled using a log-normal model where volatility varies by time horizon. This allows the model to capture the term structure of implied volatilities. The model is calibrated to at-the-money options of a variety of terms. For the UK, a two-dimensional model is used to capture the term structure of implied volatilities and the projected in the money position. Option volatilities are taken from Markit.

Assumptions for correlations between asset classes have been set based on historic data.

### Model – Delta Lloyd

The interest rate model used is a short rate G2++ model. The model is calibrated to the QIS5 yield curve and the swaption implied volatilities. Swaption implied volatilities are taken from Bloomberg. The equity model is a Heston model.

Assumptions for correlations between asset classes have been set based on historic data.

### Asset classes

The significant asset classes for UK participating business are equities, property and long-term fixed rate bonds. The most significant assumptions are the distribution of future long-term interest rates (nominal and real) and swaption implied volatilities.

For many businesses, including US, France and Delta Lloyd, the most important assets are fixed rate bonds of various durations.

## Summary statistics

### Swaption implied volatilities

The implied volatility is that determined by Black-Scholes formula to reproduce the market price of the option. The following table sets out the swaption implied volatilities.

Option length	2011 swap length				2010 swap length			
	10 years	15 years	20 years	25 years	10 years	15 years	20 years	25 years
<b>UK sterling</b>								
10 years	18.0%	16.8%	16.1%	15.6%	15.3%	14.8%	14.3%	13.6%
15 years	16.2%	15.4%	14.8%	14.1%	14.1%	13.6%	13.1%	12.3%
20 years	15.3%	14.5%	13.8%	13.1%	13.1%	12.5%	12.0%	11.2%
25 years	15.4%	14.3%	13.5%	12.8%	12.3%	11.7%	11.2%	10.4%
<b>Euro</b>								
10 years	27.3%	28.1%	28.7%	28.4%	21.2%	20.9%	20.6%	20.3%
15 years	31.6%	30.9%	29.3%	28.1%	20.7%	20.1%	19.5%	18.8%
20 years	38.2%	32.6%	29.2%	27.7%	19.2%	18.5%	17.8%	16.9%

25 years	n/a	n/a	n/a	n/a	28.5%	26.4%	24.0%	22.5%

## E18 – Principal assumptions continued

### Equity implied volatilities

The implied volatility is that determined by the Black-Scholes formula to reproduce the market price of the option. The following table sets out the model equity implied volatilities.

Option length	2011						2010						Delta Lloyd
	UK	France	Italy	Ireland	Spain	US	UK	France	Italy	Ireland	Spain	US	
5 years	25.8%	27.5%	31.9%	27.5%	30.4%	28.9%	24.5%	29.0%	27.5%	27.7%	32.4%	28.8%	27.2%
10 years	27.2%	27.9%	31.5%	27.9%	30.1%	31.0%	25.5%	28.4%	27.0%	27.6%	31.2%	29.1%	27.0%
15 years	27.1%	29.4%	33.0%	29.4%	31.6%	31.2%	26.4%	29.1%	26.1%	28.4%	30.2%	29.7%	26.3%

### Property implied volatilities

Best estimate levels of volatility have been used in the absence of meaningful option prices from which implied levels of volatility can be derived.

For the UK, model property implied volatility is 15% for 31 December 2011 (*31 December 2010: 15%*).

### Demographic assumptions

Assumed future mortality, morbidity and lapse rates have been derived from an analysis of Aviva's recent operating experience with a view to giving a best estimate of future experience. We have anticipated future changes in experience where that is appropriate, e.g. we have allowed for improvements in future policyholder longevity.

We have set the assumptions based on a best estimate of shareholder outcomes. In particular, where the policyholder behaviour varies with economic experience, we have set assumptions which are dynamic, i.e. vary depending on the economic assumptions. For example, surrender and option take-up rate assumptions that vary according to the investment scenario under consideration have been used in the calculation of the time value of options and guarantees, based on our assessment of likely policyholder behaviour in different investment scenarios.

Additionally, where demographic experience is not driven by economic scenarios but is asymmetric on a standalone basis, the best estimate assumption considers the weighted-average expected experience, not simply the median or most likely outcome.

Notwithstanding the notification on 15 December 2011 that the bancassurance distribution agreement with Allied Irish Bank was not being renewed, the Aviva Ireland demographic assumptions have been set assuming the business remains open to new business and does not incur diseconomies of scale or other operating impacts.

### Expense assumptions

Management expenses and operating expenses of holding companies attributed to life and related businesses have been included in the MCEV calculations and split between expenses relating to the acquisition of new business, the maintenance of business in-force and project expenses. Future expense assumptions include an allowance for maintenance expenses and a proportion of recurring project expenses. Certain expenses of an exceptional nature, when they occur, are identified separately and are generally charged as incurred. No future productivity gains have been anticipated.

Where subsidiary companies provide administration, investment management or other services to our life businesses, the value of profits or losses arising from these services have been included in the embedded value and value of new business.

### Non-hedgeable risk

For the balance sheet and operating profit, a charge of 3.3% has been applied to the group-diversified capital required on a 1-in-200 one-year basis over the remaining lifetime of in-force business. The charge is set so as to give an aggregate allowance that is in excess of the expected operational risk costs arising from the in-force covered business over its remaining lifetime.

The capital levels used are projected to be sufficient to cover non-hedgeable risks at the 99.5% confidence level one-year after the valuation date. The capital is equal to the capital from the ICA results for those risks considered. The capital has been projected as running off over the remaining life of the in-force portfolio in line with the drivers of the capital requirement.

In addition to the operational risk allowance, financial non-hedgeable risks and other product level asymmetries have been allowed for. These allowances are not material as significant financial non-hedgeable risks and product level asymmetries are either modelled explicitly and included in the TVOG or are included in the PVFP through the use of appropriate best estimate assumptions.

## E18 – Principal assumptions continued

### (c) Other assumptions

#### Valuation of debt

Borrowings in the MCEV consolidated statement of financial position are valued on an IFRS basis, consistent with the primary financial statements. At 31 December 2011 the market value of the Group's external debt, subordinated debt, preference shares including General Accident plc preference shares of £250 million (classified as non-controlling interests) and direct capital instrument was £5,782 million (31 December 2010: £7,279 million).

	2011 £m	2010 £m
<b>Borrowings per summarised consolidated statement of financial position – MCEV basis</b>	<b>8,450</b>	14,949
Less: Securitised mortgage funding	<b>(1,306)</b>	(6,332)
Borrowings excluding non-recourse funding – MCEV basis	<b>7,144</b>	8,617
Less: Operational financing by businesses	<b>(1,889)</b>	(2,551)
External debt and subordinated debt – MCEV basis	<b>5,255</b>	6,066
Add: Preference shares (including General Accident plc) and direct capital instrument	<b>1,440</b>	1,440
External debt, subordinated debt, preference shares and direct capital instrument – MCEV basis	<b>6,695</b>	7,506
Effect of marking these instruments to market	<b>(913)</b>	(227)
<b>Market value of external debt, subordinated debt, preference shares and direct capital instrument</b>	<b>5,782</b>	7,279

#### Other

It has been assumed that there will be no changes to the methods and bases used to calculate the statutory technical provisions and current surrender values, except where driven by varying future investment conditions under stochastic economic scenarios.

## E19 – Sensitivity analysis

### (a) Economic assumptions

The following tables show the sensitivity of the embedded value and the value of new business to:

- 10 basis point increase in the liquidity premium adjustment, where applicable;
- one percentage point increase and decrease in the risk-free rate, including all consequential changes (including assumed investment returns for all asset classes, market values of fixed interest assets, risk discount rates);
- 10% increase and decrease in market values of equity and property assets;
- 25% increase in equity and swaption volatilities;
- 50 basis point increase and decrease in credit spreads with no change to liquidity premium; and
- decrease in the level of required capital to 100% EU minimum (or equivalent).

In each sensitivity calculation, all other assumptions remain unchanged except where they are directly affected by the revised economic conditions. For example, future bonus rates are automatically adjusted to reflect sensitivity changes to future investment returns. Some of the sensitivity scenarios may have consequential effects on valuation bases, where the basis for certain blocks of business is actively updated to reflect current economic circumstances. Consequential valuation impacts on the sensitivities are allowed for where an active valuation basis is used. Where businesses have a target asset mix, the portfolio is re-balanced after a significant market movement otherwise no re-balancing is assumed.

For new business, the sensitivities reflect the impact of a change immediately after inception of the policy.

In general, the magnitude of the sensitivities will reflect the size of the embedded values, though this will vary as the sensitivities have different impacts on the different components of the embedded value. In addition, other factors can have a material impact, such as the nature of the options and guarantees, as well as the types of investments held.

The credit spread sensitivities assume that the change relates to credit risk and not liquidity risk; in practice, credit spread movements may be partially offset due to changes in liquidity risk.

Sensitivities will also vary according to the current economic assumptions, mainly due to the impact of changes to both the intrinsic cost and time value of options and guarantees. Options and guarantees are the main reason for the asymmetry of the sensitivities where the guarantee impacts to different extents under the different scenarios.

<b>North America</b>	<b>202</b>	<b>30</b>	<b>(35)</b>	<b>—</b>	<b>(990)</b>	<b>985</b>	<b>110</b>
<b>Asia Pacific</b>	<b>668</b>	<b>20</b>	<b>(20)</b>	<b>(15)</b>	<b>(20)</b>	<b>20</b>	<b>35</b>
<b>Total</b>	<b>12,274</b>	<b>535</b>	<b>(635)</b>	<b>(415)</b>	<b>(2,105)</b>	<b>2,300</b>	<b>175</b>

In line with the CFO Forum press release on 9 December 2011, a sensitivity to include an allowance for the current sovereign debt market conditions has been performed. The calculated sensitivity uses the ECB AAA and other curve in place of the reference rate for liabilities in Italy and Spain and results in an increase of £0.6 billion to the embedded value of £12.3 billion.

## E19 – Sensitivity analysis continued

### (b) Non-economic assumptions

The following tables below show the sensitivity of the embedded value and the value of new business to the following changes in non-economic assumptions:

- 10% decrease in maintenance expenses (a 10% sensitivity on a base expense assumption of £10 p.a. would represent an expense assumption of £9 p.a.). Where there is a 'look through' into service company expenses the fee charged by the service company is unchanged while the underlying expense decreases;
- 10% decrease in lapse rates (a 10% sensitivity on a base assumption of 5% p.a. would represent a lapse rate of 4.5% p.a.); and
- 5% decrease in both mortality and morbidity rates disclosed separately for life assurance and annuity business.

No future management actions are modelled in reaction to the changing non-economic assumptions. In each sensitivity calculation all other assumptions remain unchanged. No changes to valuation bases have been included.

#### Embedded value

## Statement of directors' responsibilities in respect of the MCEV basis

When compliance with the European Insurance CFO Forum Market Consistent Embedded Value Principles (MCEV Principles), published in October 2009, is stated, those principles require the directors to prepare supplementary information in accordance with the methodology contained in the MCEV Principles and to disclose and explain any non-compliance with the guidance included in the MCEV Principles.

In preparing this supplementary information, the directors have done so in accordance with these MCEV Principles and have also fully complied with all the guidance included therein. Specifically, the directors have:

- determined assumptions on a realistic basis, having regard to past, current and expected future experience and to relevant external data, and then applied them consistently;
- made estimates that are reasonable and consistent; and,
- provided additional disclosures when compliance with the specific requirements of the MCEV Principles is insufficient to enable users to understand the impact of particular transactions, other events and conditions and the Group's financial position and financial performance.

By order of the Board

**Patrick Regan**  
Chief financial officer  
7 March 2012

## Independent auditor's report to the directors of Aviva plc on the consolidated MCEV financial statements

We have audited the consolidated MCEV financial statements of Aviva plc for the year ended 31 December 2011, which comprises the Condensed consolidated income statement – MCEV basis, the Condensed consolidated statement of comprehensive income – MCEV basis, the Condensed consolidated statement of changes in equity – MCEV basis, the Condensed consolidated statement of financial position – MCEV basis, the Reconciliation of shareholders' equity on IFRS and MCEV bases, the Reconciliation of IFRS total equity to MCEV net worth, the Group MCEV analysis of earnings and the related notes E1 to E19. The Consolidated MCEV financial statements have been prepared by the directors of Aviva plc in accordance with the MCEV Principles issued in June 2008 by the CFO Forum as amended in October 2009 ('the CFO Forum Principles') and the basis of preparation set out on pages 328 to 331.

### Directors' responsibilities for the Consolidated MCEV financial statements

The directors are responsible for the preparation of these Consolidated MCEV financial statements in accordance with the basis of preparation set out on pages 328 to 331 and for such internal control as the directors determine is necessary to enable the preparation of the financial statements that are free from material misstatement, whether due to fraud or error.

### Auditor's responsibility

Our responsibility is to express an opinion on the Consolidated MCEV financial statements based on our audit. We conducted our audit in accordance with the International Standards on Auditing (UK and Ireland). Those standards require us to comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the Consolidated MCEV financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the Consolidated MCEV financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the Consolidated MCEV financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation of the Consolidated MCEV financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by Directors, as well as evaluating the overall presentation of the Consolidated MCEV financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

### Opinion

In our opinion the Consolidated MCEV financial statements, for the year ended 31 December 2011, are prepared, in all material respects, in accordance with the CFO Forum Principles and the basis of preparation set out on pages 328 to 331.

### Basis of accounting and restriction on use

Without modifying our opinion, we draw attention to Note E1 to the Consolidated MCEV financial statements, which describes the basis of preparation. The Consolidated MCEV financial statements are prepared by Aviva plc in accordance with the CFO Forum Principles. As a result, the Consolidated MCEV financial statements may not be suitable for another purpose. This report, including the opinion, has been prepared for and only for the Company's directors as a body in accordance with our letter of engagement dated 3 August 2011 and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

### Other matter

We have reported separately on the statutory Group financial statements of Aviva plc for the year ended 31 December 2011. The information contained in the consolidated MCEV financial statements should be read in conjunction with the financial statements prepared on an IFRS basis.

### Ernst & Young LLP

London  
7 March 2012

1 The maintenance and integrity of Aviva plc's website is the responsibility of the directors; the work carried out by the auditors does not involve consideration of these matters and, accordingly, the auditors accept no responsibility for any changes that may have occurred to the financial statements since they were initially presented on the website.

2 Legislation in the United Kingdom governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

## Product definitions

### Annuities

A type of policy that pays out regular amounts of benefit, either immediately and for the remainder of a person's lifetime, or deferred to commence from a future date. Immediate annuities may be purchased for an individual and his or her dependants or on a bulk purchase basis for groups of people. Deferred annuities are accumulation contracts, which may be used to provide benefits in retirement, and may be guaranteed, unit-linked or index-linked.

### Bonds and savings

These are accumulation products with single or regular premiums and unit-linked or guaranteed investment returns. Our product ranges include single premium investment bonds, regular premium savings plans and mortgage endowment products.

### Critical illness cover

Critical illness cover pays out a lump sum if the insured person is diagnosed with a serious illness that meets the plan definition. The cover is often provided in conjunction with other benefits under a protection contract.

### Deferred annuities

An annuity (or pension) due to be paid from a future date or when the policyholder reaches a specified age. A deferred annuity may be funded by a policyholder by payment of a series of regular contributions or by a capital sum (the latter often provided from a pension fund).

### Group pensions

A pension plan that covers a group of people, which is typically purchased by a company and offered to their employees.

### Guaranteed annuities

A policy that pays out a fixed regular amount of benefit for a defined period.

### Income drawdown

The policyholder can transfer money from any pension fund to an income drawdown plan from which they receive an income. The remainder of the pension fund continues to be invested, giving it the potential for growth.

### Index linked annuities

An index linked annuity is a type of deferred annuity whose credited interest is linked to an equity index. It guarantees a minimum interest rate and protects against a loss of principal.

### Investment sales

Comprise retail sales of mutual fund-type products such as unit trusts, individual savings accounts (ISAs) and open ended investment companies (OEICs).

### ISAs

Individual savings accounts – Tax-efficient plans for investing in stocks and shares, cash deposits or life insurance investment funds, subject to certain limits. Introduced in the UK in 1999.

### Monolines

Financial companies specialising in a single line of products such as credit cards, mortgages or home equity loans.

### Mortgage endowment

An insurance contract combining savings and protection elements which is designed to repay the principal of a loan or mortgage.

### Mortgage life insurance

A protection contract designed to pay off the outstanding amount of a mortgage or loan in the event of death of the insured.

### Non profits

Long-term savings and insurance products sold in the UK other than 'With profits' (see definition below) products.

### OEIC

An open ended investment company is a collective investment fund structured as a limited company in which investors can buy and sell shares.

### Pensions

A means of providing income in retirement for an individual and possibly his/her dependants. Our pensions products include personal and group pensions, stakeholder pensions and income drawdown.

### Personal pensions

A pension plan tailored to the individual policyholder, which includes the options to stop, start or change their payments.

### Protection

An insurance contract that protects the policyholder or his/her dependants against financial loss on death or ill-health. Our product ranges include term assurance, mortgage life insurance, flexible whole life and critical illness cover.

### Regular premium

A series of payments are made by the policyholder, typically monthly or annually, for part of or all of the duration of the contract.

### SICAVs

*Société d'investissement à capital variable* (variable capital investment company). This is an open-ended investment fund, structured as a legally independent joint stock company, whose units are issued in the form of shares.

### Single premium

A single lump sum is paid by the policyholder at commencement of the contract.

### Stakeholder pensions

Low cost and flexible pension plans available in the UK, governed by specific regulations.

### Takaful

Insurance products that observe the rules and regulations of Islamic law.

### Term assurance

A simple form of life insurance, offering cover over a fixed number of years during which a lump sum will be paid out if the life insured dies.

## Product definitions cont.

### Unit trusts

A form of open ended collective investment constituted under a trust deed, in which investors can buy and sell units.

### Unit-linked annuities

A unit-linked annuity is a type of deferred annuity which is invested in units of investment funds, whose value depends directly on the market value of assets in those funds.

### Whole life

Whole life insurance is a protection policy that remains in force for the insured's whole life. Traditional whole life contracts have fixed premium payments that typically cannot be missed without lapsing the policy. Flexible whole life contracts allow the policyholder to vary the premium and/or amount of life cover, within certain limits.

### With-profits

A type of long-term savings and insurance product sold in the UK under with-profits policies premiums are paid into a separate fund. Policyholders receive a return on their policies through bonuses, which 'smooth' the investment return from the assets which premiums are invested in. Bonuses are declared on an annual and terminal basis. Shareholders have a participating interest in the with-profit funds and any declared bonuses. Generally, policyholder and shareholder participation in with-profit funds in the UK is split 90:10.

### Wrap investments

An account in which a broker or fund manager executes investment decisions on behalf of a client in exchange for a single quarterly or annual fee, usually based on the total assets in the account rather than the number of transactions.

## General terms

### Acquired value of in force (AVIF)

An estimate of future profits that will emerge over the remaining term of all existing life and pensions policies for which premiums are being paid or have been paid at the statement of financial position date.

### Association of British Insurers (ABI)

Association of British Insurers – A major trade association for UK insurance companies, established in July 1985.

### Available for sale (AFS)

Securities that have been acquired neither for short-term sale nor to be held to maturity. These are shown at fair value on the statement of financial position and changes in value are taken straight to equity instead of the income statement.

### Bancassurance

An arrangement whereby banks and building societies sell insurance and investment products to their customers on behalf of other financial providers.

### UK Corporate Governance Code

The UK Corporate Governance Code sets out guidance in the form of principles and provisions on how companies should be directed and controlled to follow good governance practice. The Financial Services Authority (FSA) requires companies with a UK Premium

listing to disclose, in relation to the UK Corporate Governance Code, how they have applied its principles and whether they have complied with its provisions throughout the accounting year. Where the provisions have not been complied with, companies must provide an explanation for this.

### Deferred acquisition costs (DAC)

The costs directly attributable to the acquisition of new business for insurance and investment contracts may be deferred to the extent that they are expected to be recoverable out of future margins in revenue on these contracts.

### Fair value

The price that a reasonable buyer would be willing to pay and a reasonable seller would be willing to accept for a product on the open market.

### FSA

The UK's Financial Services Authority – Main regulatory body appointed by the Government to oversee the financial services industry in the UK. Since December 2001 it has been the single statutory regulator responsible for the savings, insurance and investment business.

### Funds under management

Represents all assets actively managed or administered by or on behalf of the Group including those funds managed by third parties.

### Funds under management by Aviva

Represents all assets actively managed or administered by the fund management operations of the Group.

### General insurance

Also known as non-life or property and casualty insurance. Property insurance covers loss or damage through fire, theft, flood, storms and other specified risks. Casualty insurance primarily covers losses arising from accidents that cause injury to other people or damage the property of others.

### Gross written premiums

The total earnings or revenue generated by sales of insurance products, before any reinsurance is taken into account. Not all premiums written will necessarily be treated as income in the current financial year, because some of them could relate to insurance cover for a subsequent period.

### 'Hard' insurance market

A term used to describe the state of the general insurance market. A 'hard' insurance market is characterised by high levels of underwriting profits and the ability of insurers to charge high premium rates. Hard insurance markets generally occur when capital is scarce and are the opposite of 'soft' insurance markets.

### Independent financial advisers (IFAs)

A person or organisation authorised to give advice on financial matters and to sell the products of all financial service providers. In the UK they are legally obliged to offer the product that best suits their clients' needs. Outside the UK IFAs may be referred to by other names.

**General terms cont.****IFRS**

International Financial Reporting Standards. These are accounting regulations designed to ensure comparable statement of financial position preparation and disclosure, and are the standards that all publicly listed companies in the European Union are required to use.

**Operating profit**

From continuing operations on an IFRS basis, stated before tax attributable to shareholders' profits, impairment of goodwill and exceptional items. This is also referred to as adjusted operating profit.

**Inherited estate**

In the UK, the assets of the long-term with-profit funds less the realistic reserves for non-profit policies written within the with-profit funds, less asset shares aggregated across the with-profit policies and any additional amounts expected at the valuation date to be paid to in-force policyholders in the future in respect of smoothing costs and guarantees.

**Long-term and savings business**

Collective term for life insurance, pensions, savings, investments and related business.

**MCEV**

Aviva's Market Consistent Embedded Value (MCEV) methodology which is in accordance with the MCEV Principles published by the CFO Forum in June 2008 as amended in October 2009.

**Net asset value per ordinary share**

Net asset value divided by the number of ordinary shares in issue. Net asset value is based on equity shareholders' funds.

**Net written premiums**

Total gross written premiums for the given period, minus premiums paid over or 'ceded' to reinsurers.

**Present value of new business (PVNBP)**

Present value of new regular premiums plus 100% of single premiums, calculated using assumptions consistent with those used to determine the value of new business under MCEV principles published by the CFO Forum.

**'Soft' insurance market**

A term used to describe the state of the general insurance market. A 'soft' insurance market is characterised by low levels of profitability and market competition driving premium rates lower. Soft insurance markets generally occur when there is excess capital and are the opposite of 'hard' insurance markets.

**Turnbull Guidance on Internal Control**

The Turnbull Guidance sets out best practice on internal controls for UK listed companies, and provides additional guidance in applying certain sections of the UK Corporate Governance.

**Market Consistent Embedded Value (MCEV) terms****Asymmetric risk**

Risks that will cause shareholder profits to vary where the variation above and below the average are not equal in distribution.

**CFO Forum**

The CFO Forum ([www.cfoforum.nl](http://www.cfoforum.nl)) is a high-level group formed by the chief financial officers of major European listed and non-listed insurance companies. Its aim is to discuss issues relating to proposed new accounting regulations for their businesses and how they can create greater transparency for investors.

The forum was created in 2002, the Market Consistent Embedded Value Principles were launched in June 2008. The principles are a further development of the European Embedded Value Principles first launched in May 2004.

**Cost of non-hedgeable risks**

This is the cost of undertaking those risks for which a deep and liquid market in which to hedge that risk does not exist. This can include both financial risks and non-financial risks such as mortality, persistency and expense.

**Covered business**

The contracts to which the MCEV methodology has been applied.

**EU solvency**

The excess of assets over liabilities and the worldwide minimum solvency margins, excluding goodwill and the additional value of in-force long-term business, and excluding the surplus held in the Group's life funds. The Group solvency calculation is determined according to the UK Financial Services Authority application of EU Insurance Groups Directive rules.

**Financial options and guarantees**

Features of the covered business conferring potentially valuable guarantees underlying, or options to change, the level or nature of policyholder benefits and exercisable at the discretion of the policyholder, whose potential value is impacted by the behaviour of financial variables.

**Free surplus**

The amount of any capital and surplus allocated to, but not required to support, the in-force covered business.

**Frictional costs**

The additional taxation and investment costs incurred by shareholders through investing the required capital in the Company rather than directly.

**Group MCEV**

A measure of the total consolidated value of the Group with covered life business included on an MCEV basis and non-covered business (including pension schemes and goodwill) included on an IFRS basis.

**Gross risk-free yields**

Gross of tax yields on risk-free fixed interest investments, generally swap rates under MCEV.

## Market Consistent Embedded Value (MCEV) terms cont.

### Implicit items

Amounts allowed by local regulators to be deducted from capital amounts when determining the EU required minimum margin.

### Life business

Subsidiaries selling life and pensions contracts that are classified as covered business under MCEV.

### Life MCEV

The MCEV balance sheet value of covered business as at the reporting date. Excludes non-covered business including pension schemes and goodwill.

### Life MCEV operating earnings

Operating earnings on the MCEV basis relating to the lines of business included in the embedded value calculations. From continuing operations and is stated before tax, impairment of goodwill and exceptional items.

### Life MCEV earnings

Total earnings on the MCEV basis relating to the lines of business included in the embedded value calculations. From continuing operations.

### Look-through basis

Inclusion of the capitalised value of profits and losses arising from subsidiary companies providing administration, investment management and other services to the extent that they relate to covered business.

### Long-term savings

Includes life and pension sales calculated under MCEV and retail investment sales.

### Market consistent

A measurement approach where economic assumptions are such that projected asset cash flows are valued consistently with current market prices for traded assets.

### Net worth

The market value of the shareholders' funds and the shareholders' interest in the surplus held in the non-profit component of the long-term business funds, determined on a statutory solvency basis and adjusted to add back any non-admissible assets, and consists of the required capital and free surplus.

### New business margin

New business margins are calculated as the value of new business divided by the present value of new business premiums (PVNBP), and expressed as a percentage.

### Present value of new business premiums (PVNBP)

The present value of new regular premiums plus 100% of single premiums, calculated using assumptions consistent with those used to determine the value of new business.

### Required capital

The amount of assets, over and above the value placed on liabilities in respect of covered business, whose distribution to shareholders is restricted.

### Risk-free rate (reference rate in CFO Forum terminology)

The risk-free rate is taken as swaps except for all contracts that contain features similar to immediate annuities and are backed by appropriate assets, including paid-up group deferred annuities and all other contracts in the Netherlands, and deferred annuities and all other contracts in the US. The adjusted risk-free rate is taken as swaps plus the additional return available for products and where backing asset portfolios can be held to maturity.

### Service companies

Companies providing administration or fund management services to the covered business.

### Solvency cover

The excess of the regulatory value of total assets over total liabilities, divided by the regulatory value of the required minimum solvency margin.

### Spread business

Contracts where a significant source of shareholder profits is the taking of credit spread risk that is not passed on to policyholders. The most significant spread business in Aviva are immediate annuities and US deferred annuities and life business.

### Statutory basis

The valuation basis and approach used for reporting financial statements to local regulators.

### Stochastic techniques

Techniques that incorporate the potential future variability in assumptions.

### Symmetric risks

Risks that will cause shareholder profits to vary where the variation above and below the average are equal and opposite. Financial theory says that investors do not require compensation for non-market risks that are symmetrical as the risks can be diversified away by investors.

### Time value and intrinsic value

A financial option or guarantee has two elements of value, the time value and intrinsic value. The intrinsic value is the discounted value of the option or guarantee at expiry, assuming that future economic conditions follow best estimate assumptions. The time value is the additional value arising from uncertainty about future economic conditions.

### Value of new business

Is calculated using economic assumptions set at the start of each quarter and the same operating assumptions as those used to determine the embedded values at the end of the reporting period and is stated after the effect of any frictional costs. Unless otherwise stated, it is also quoted net of tax and minority interests.

## Shareholder profile as at 31 December 2011

By category of shareholder	Number of shareholders	%	Number of shares	%
Individual	578,603	96.88	270,555,684	9.31

<b>Total</b>	<b>597,245</b>	<b>100</b>	<b>2,905,712,938</b>	<b>100</b>

<sup>+</sup>The number of registered ordinary shares represented by ADRs. Please note that each Aviva ADR represents two (2) ordinary Aviva shares.

## 2012 financial calendar

Annual General Meeting	3 May 2012
Announcement of first quarter Interim Management Statement	17 May 2012
Announcement of unaudited half-year results	9 August 2012
Announcement of third quarter Interim Management Statement	8 November 2012

## 2011 final dividend dates – ordinary shares

Ex-dividend date	21 March 2012
Record date	23 March 2012
Scrip dividend price setting period	21, 22, 23, 26, 27 March 2012
Scrip dividend price announcement date	28 March 2012
Last date for receipt of Scrip elections	18 April 2012
Dividend payment date*	17 May 2012

\*Please note that the ADR local payment date will be approximately five business days after the proposed dividend date for ordinary shares.

## Annual General Meeting (AGM)

- The 2012 Aviva AGM will be held at The Barbican Centre, Silk Street, London EC2Y 8DS, on Thursday, 3 May 2012 at 11am.
- Details of all the resolutions to be considered at the AGM are given in the Notice of AGM, which is available on the Company's website at [www.aviva.com/agm](http://www.aviva.com/agm).
- Shareholders can vote:
  - by attending the meeting in person;
  - electronically at [www.aviva.com/agm](http://www.aviva.com/agm); or
  - by completing and returning the relevant voting card(s) by post.
- The voting results for the 2012 AGM, including proxy votes and votes withheld, will be accessible on the Company's website at [www.aviva.com/agm](http://www.aviva.com/agm) shortly after the meeting.
- If you are unable to attend the AGM but would like to ask the directors a question regarding the business of the meeting, please send an email to [avivashareholders@aviva.com](mailto:avivashareholders@aviva.com). We will endeavour to provide a formal response to all questions submitted by shareholders.

## Do you receive duplicate documents?

A number of shareholders still receive duplicate documentation and split dividend payments as a result of having more than one account on the Aviva Register of Members. If you think you fall into this group and would like to combine your accounts, please contact the Company's Registrar, Computershare, on the telephone number listed overleaf.

## Dividends

- Dividends on Aviva ordinary shares are normally paid in May and November; please see the table above for the key dates in respect of the 2011 final dividend.
- Dividends paid on Aviva preference shares are normally paid in March, June, September and December; please visit [www.aviva.com/preferenceshares](http://www.aviva.com/preferenceshares) for the latest dividend payment dates.
- Holders of ordinary and preference shares will receive any dividends payable in sterling and holders of ADRs will receive any dividends payable in US dollars.

## Direct credit of dividend payments:

If you would like to have your cash dividends paid directly into your bank or building society account, please visit [www.aviva.com/dividendmandate](http://www.aviva.com/dividendmandate) for more information or contact Computershare on the telephone number listed overleaf.

## Aviva Scrip Dividend Scheme:

If you would like to receive your dividends on ordinary shares in the form of new shares instead of cash, you can choose to join the Aviva Scrip Dividend Scheme. Please contact Computershare on the telephone number listed overleaf to acquire a personalised application form and a copy of the terms and conditions or, alternatively, you may visit [www.aviva.com/ecomms](http://www.aviva.com/ecomms) for more information on how to make this election online.

## Online Shareholder Services Centre – [www.aviva.com/shareholderservices](http://www.aviva.com/shareholderservices)

The online shareholder services centre has been designed to provide useful information for holders of Aviva ordinary shares, preference shares and ADRs, and includes features to allow shareholders to manage their Aviva shareholdings easily and efficiently.

Within the online centre you will be able to find a shareholders' guide, current and historic ordinary share and ADR prices, share dealing information, news, updates and, when available, presentations from Aviva's senior management. You will also be able to download an electronic copy of recent Company reports.

The Shareholders' Guide contains answers to a range of frequently asked questions on holding shares in Aviva.

### Manage your holdings online

You can view and manage your shareholding online by visiting [www.aviva.com/ecomms](http://www.aviva.com/ecomms). To log in you will require your 11-digit Shareholder Reference Number (SRN), which you will find on your proxy or voting card, latest dividend stationery, or any share certificate issued since 4 July 2011.

Shareholders can elect to receive electronic communications by registering their email address online, or by contacting Computershare directly. Making this election will save on printing and distribution costs and has environmental benefits.

## Aviva share price information

- For ordinary shares and ADRs, please visit [www.aviva.com/shareprice](http://www.aviva.com/shareprice)
- For preference shares, please visit [www.londonstockexchange.com](http://www.londonstockexchange.com)

### ShareGift

If you have a small number of shares which you consider uneconomical to sell, you may wish to consider donating them to ShareGift (Registered Charity: 1052686), a charity that specialises in accepting such unwanted small shareholdings. Donated shares are aggregated and sold, with the proceeds being used to support a wide range of UK registered charities.

You can find out more about ShareGift by visiting [www.sharegift.org](http://www.sharegift.org) or by calling them on +44 (0)207 930 3737. If you would like to donate your shares to ShareGift, please contact Computershare.

## Contact details

### Ordinary and preference shares – Computershare

Shareholders will be aware that Aviva changed its Registrar from Equiniti Limited to Computershare Investor Services plc in July 2011.

For any queries regarding your shareholding, or to advise of changes to your personal details, please contact Computershare:

**In writing:** Computershare Investor Services plc,  
The Pavilions, Bridgwater Road, Bristol BS99 6ZZ

**By telephone:** 0871 495 0105 (Lines are open from 8.30am to 5pm (UK time), Monday to Friday)  
+44 117 378 8361 (if you are calling outside the UK).

**By email:** [avivaSHARES@computershare.co.uk](mailto:avivaSHARES@computershare.co.uk)

### American Depositary Receipts (ADRs) – Citibank

Aviva has a sponsored ADR facility administered by Citibank, NA. Any queries regarding Aviva ADRs can be directed to Citibank:

**In writing:** Citibank Shareholder Services,  
PO Box 43077, Providence,  
Rhode Island 02940-5000, USA

**By telephone:** 1 877 248 4237  
(free phone for callers within the US)  
+1 781 575 4555 (for callers outside the US non-free phone).

**By email:** [citibank@shareholders-online.com](mailto:citibank@shareholders-online.com)

**Fax enquiries:** +1 201 324 3284

Please visit [www.citi.com/dr](http://www.citi.com/dr) for further information about Aviva's ADR programme.

### Group company secretary

Shareholders may contact the Group company secretary as follows:

**In writing:** Kirstine Cooper, Group Company Secretary,  
St Helen's, 1 Undershaft, London EC3P 3DQ

**By telephone:** +44 (0)20 7283 2000

**By email:** [aviva.shareholders@aviva.com](mailto:aviva.shareholders@aviva.com)

## Form 20-F

Aviva is a foreign private issuer in the United States of America and is subject to certain reporting requirements of the Securities Exchange Commission (SEC). Aviva files its Form 20-F with the SEC, copies of which can be found at [www.aviva.com/reports](http://www.aviva.com/reports).

## Be on your guard – beware of fraudsters!

Shareholders are advised to be very wary of any unsolicited telephone calls or correspondence offering to buy shares at a discount or offering free financial advice or company reports. If you receive any unsolicited calls or advice:

- make sure you get the correct name of the person and organisation;
- check that they are properly authorised by the Financial Services Authority (FSA) by visiting [www.fsa.gov.uk/register/](http://www.fsa.gov.uk/register/); and
- if the calls persist, hang up.

For more information please visit the 'warning to shareholders' page at: [www.aviva.com/shareholderservices](http://www.aviva.com/shareholderservices).

"They saw us not only as insurers, but also and most importantly as human beings who were there to help them."

Gaël Roux

## Gaël Roux

---

When Hurricane Xynthia cut a swathe of destruction across west France, in its wake came Aviva adviser Gaël Roux, ready to help. He arranged advance payments so that Aviva customers could start repairing the damage without delay.
