

Aviva Climate-Ready Index

Overall Index Ranking

Rank	Country	Score
1 st	Germany	66.34
2 nd	France	65.22
3 rd	UK	62.83
4 th	Japan	55.36
5 th	Ireland	52.90
6 th	Italy	50.07
7 th	USA	46.81
8 th	Canada	45.18

Aviva has created a framework to show the key factors of climate readiness and highlighting how the UK compares to other Large Economies.

Our aim is to help the UK become the most climate-ready advanced economy by supporting people, businesses and communities to reduce carbon emissions and adapt how we live and work to be as protected as possible from its effects.

Pillar	Factor	Lead Country	UK Score
--------	--------	--------------	----------

Emissions & Mitigation

Relates to national-level net-zero targets, progress towards targets and the ambition of future policies.

Pillar top score: 73.09 UK

Climate Performance **73.09** UK —

Environment & Adaptation

Addresses the consequences of climate change, including both the natural and human environment, and the importance of fair and universal adaptation measures.

Pillar top score: 59.60 Germany **UK Score: 52.17 (4th)**
