The data in this table is provided is indicative only and should be read in conjunction with the Prospectus and Pre-contractual disclosures and website disclosures that describe the exact application of different concepts summarised here to each fund.

Impact Data is shown as of April 2022 indicating where there is a impact of the Baseline exclusions approach on the investment strategy. Article 8 funds have additional exclusions which have materially higher impacts on their investment universe - see the Sustainable Outcomes exclusions policy for full details of these exclusions. The impacts estimated here only indicate the effects of the BEP on these Article 8 funds.

<sup>15</sup> Table details only the facets of the ESG screening which constrain our definition of the fund's investable universe and how the fund typically invests.

<sup>16</sup> Data provided for informational purposes only and should be used in conjunction with the product prospectus.

<sup>17</sup> In the majority of cases, the sub-fund benchmark is used as a reasonable approximation of the investable universe for the sub-fund. This is an estimate at a point in time, the actual impact of the restrictions could be higher based on wider investment powers of the funds to invest off benchmark. This is therefore the minimum rate as our best estimate and does not take into consideration the limitations these exclusions also place on the funds to be overweight the assets/vectors screened out. For some funds (noted "n/a") it is not possible to provide an estimated impact of the screen because there is no suitable index to use in the assessment or the sub-fund has an interest rate as a performance benchmark. Additionally, where the benchmark is not a full representation of the fund's investable universe but the ESG screen is considered applicable to the fund, this has been indicated by the investment manager.

<sup>18</sup> Further information on Aviva Investors' ESG criteria can be found on the Aviva Investors' website and in the ESG definitions document.
