Multi-asset fund range in brief

It takes Aviva Investors

Our fund ranges

We offer two multi-asset fund ranges and a dedicated multi-asset income fund, to help you find the right solution for your clients.

	MAF Core	MAF Plus	MAF Income*
	5	5	1
Invests in	Over 4,000 global equity and fixed income assets	Over 8,000 global shares, bonds and alternative assets for extra diversification	2,500+ global equity and fixed income assets
Investment style	A passive management bias, to keep costs low	A focus on active management, with the aim to enhance performance	A focus on delivering monthly income, from a diversified portfolio of assets
Ongoing charges figure (OCF)**	0.15% fixed OCF	0.60% capped OCF	0.60% capped OCF
Partnership pricing	X	✓	✓

*Please note that unlike the other funds in the range, MAF Income does not have a specific volatility aim, and instead operates to an average yearly tracking error range. See individual fund range for list of risk ratings and profilfers.

**We offer partnership pricing based on pre-agreed thresholds and agreements in place. Capped across all 3 OCFs. This applies to share class 2.

MAF Core

This multi-asset solution offers exposure to a broad range of global growth and defensive assets aiming to manage risk and deliver long-term growth for clients. The MAF Core range has a passive management bias, with responsibility considerations incorporated into it.

Low-cost without compromising quality

- 5** 5 low-cost, **risk-profiled** funds to cater for clients' different risk levels
- ESG-tilted **global equity & sovereign bonds**¹
- Flexible and global** asset allocation that invests in over 4,000 securities
- A blend of **active and passive building blocks** to drive returns
- Access to **active Global High Yield and Emerging Market Debt**. These asset classes can provide higher levels of income and are not usually included in low-cost strategies
- Low **0.15% fixed OCF** achieved using our firm's heritage and scale

Source; Aviva Investors. ¹The investment manager always applies the Firm's Baseline Exclusions Policy and any specific constraints within a prospectus or IMA, but any other ESG factors or risk considerations are adopted at the manager's discretion. Tilts are applied for global equities and sovereigns in the portfolio to achieve a higher ESG score than the respective benchmarks (MSCI World Index & Bloomberg Global Aggregate Treasuries Index). Global equities also tilt towards companies with lower carbon intensity than the benchmark (MSCI World Index).

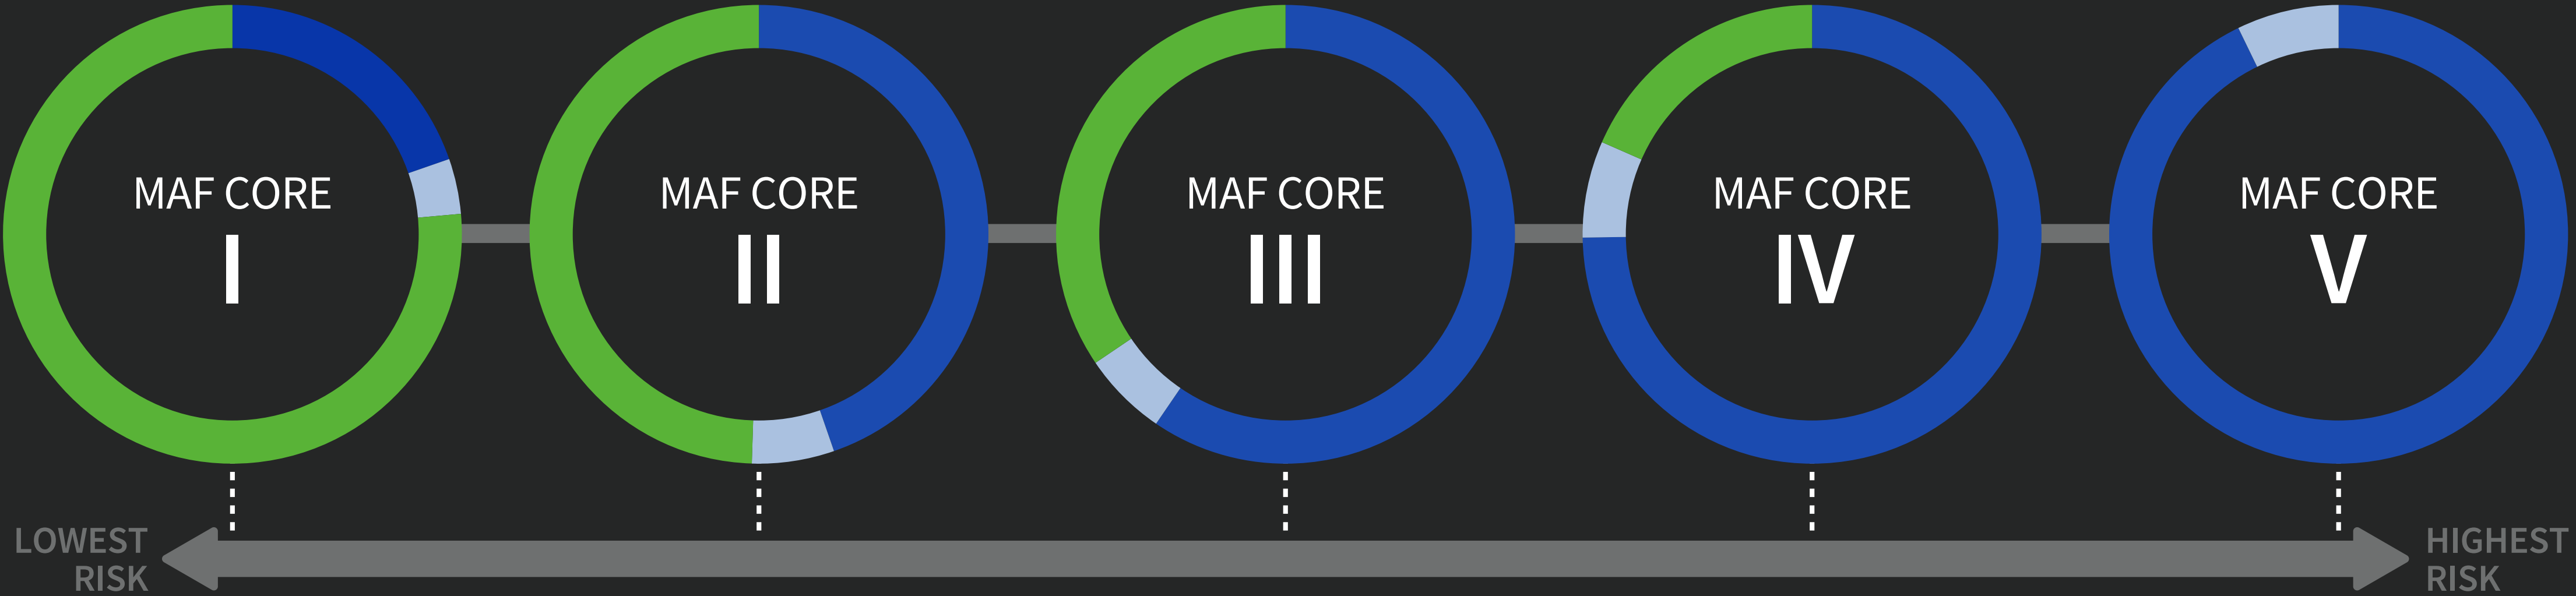

This product does not have a UK sustainable investment label. This is because – although the fund has sustainability characteristics - it does not meet the criteria for a label. Sustainable investment labels help investors find products that have a specific sustainability goal. They can only be applied to funds with an explicit sustainability objective and that meet other specific regulatory criteria for a UK sustainable investment label.

MAF Core

RISK PROFILERS:

RATINGS:

● **Growth (Equity)**

Equities are used in the portfolios to drive capital growth. Lower risk portfolios have less exposure to equity markets.

● **Growth (Fixed income)**

Higher yielding forms of fixed income can be used to drive a portfolio's capital growth. These assets typically have a higher level of risk than defensive fixed income investments.

● **Defensive**

Aims to protect the value of your investments and manage risk. This includes cash, government bonds and lower-risk corporate bonds.

MAF Plus

This multi-asset solution offers exposure to a broad range of global growth, defensive and alternative assets. It aims to manage risk and deliver long-term growth for clients. It also has an active management bias.

Active performance focus and additional diversification

-  5 cost-effective, **risk-profiled** funds to cater for clients' different risk levels
-  **Active, tactical and global asset allocation** that invests in over 8,000 securities
-  A blend of **active and passive building blocks** to drive returns
-  Alternative assets for **extra diversification**
-  **0.60% capped OCF*** to deliver active outcomes at great value

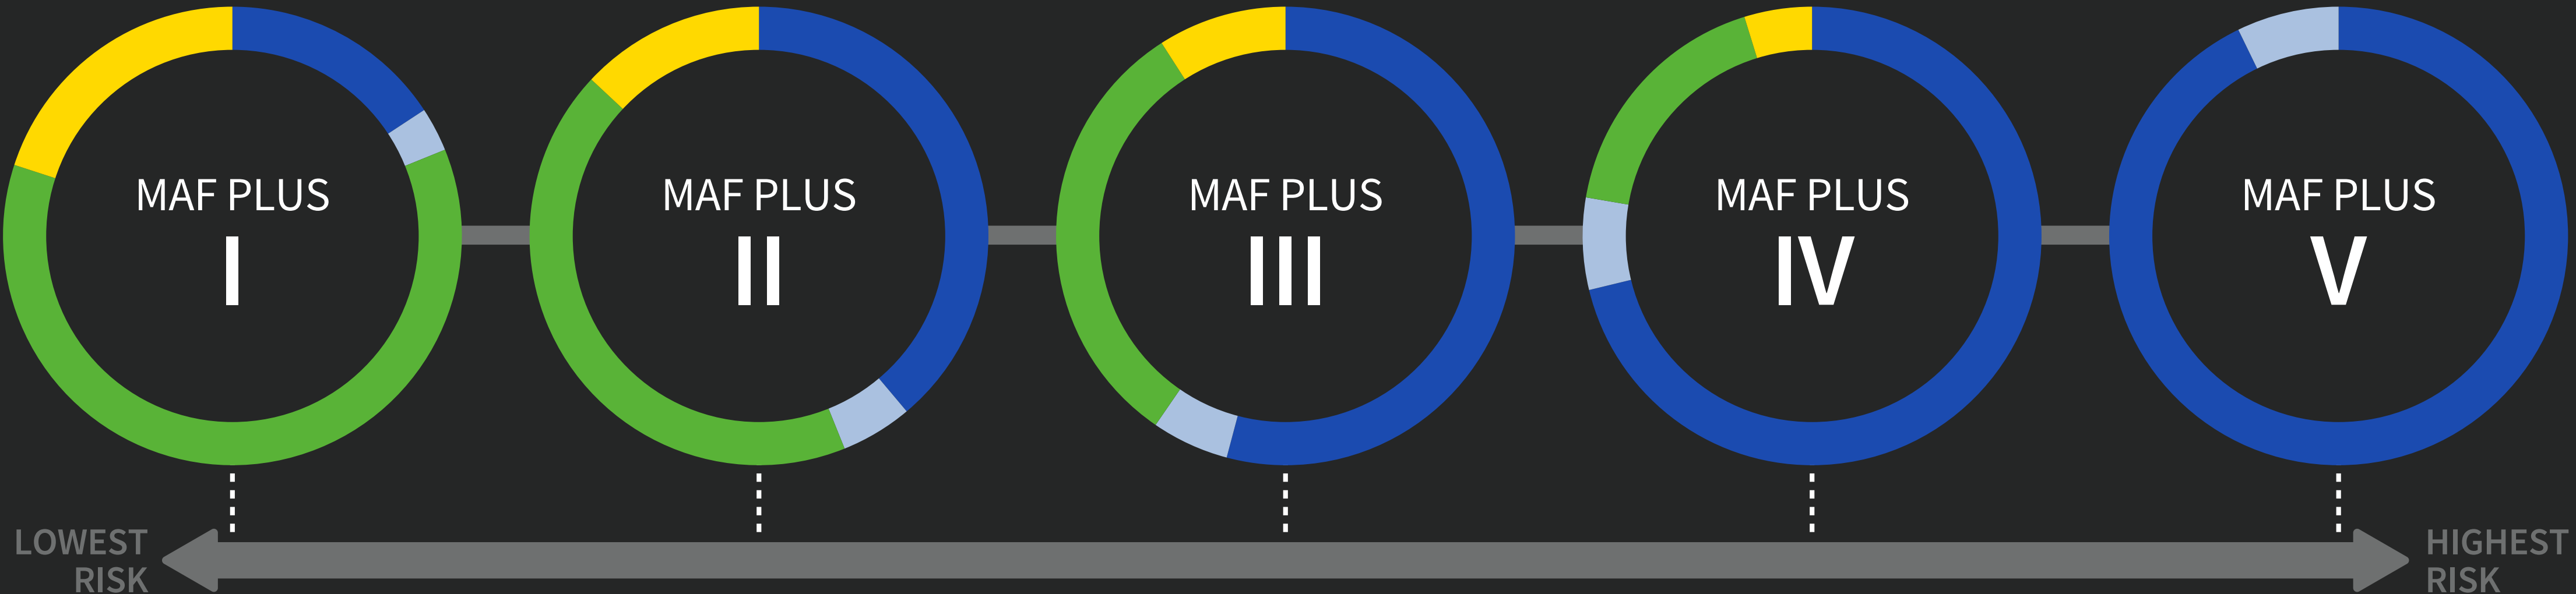

*We offer partnership pricing based on pre-agreed thresholds and agreements in place.

The Investment Manager endeavours to comply with the requirements of the UK Stewardship Code when managing the Funds' assets. Stewardship is the responsible allocation, management and oversight of capital to create long-term value for investors leading to sustainable benefits for the economy, the environment and society. Environmental (particularly climate) and social factors, in addition to governance, have become material issues for fund managers to consider when making investment decisions and undertaking stewardship. The Investment Manager therefore considers a range of financial and non-financial information when assessing investments and to inform its stewardship activities, including considering the potential or actual material risk that sustainability issues may have on an investment. For more information on how the Investment Manager carries out this activity and meets the requirements of the UK Stewardship Code, as well as details about Aviva Investors' firmwide policy, please see our website: <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>

MAF Plus

RISK PROFILERS: defaqto  Synaptic EValue FinaMetrica

RATINGS:   

- **Growth (Equity)**
Equities are used in the portfolios to drive capital growth. Lower risk portfolios have less exposure to equity markets.
- **Growth (Fixed income)**
Higher yielding forms of fixed income can be used to drive a portfolio's capital growth. These assets typically have a higher level of risk than defensive fixed income investments.

- **Defensive**
Aims to protect the value of your investments and manage volatility. This includes cash, government bonds and lower-risk corporate bonds.
- **Alternative assets**
Assets that improve diversification of returns as they perform differently to traditional equity or fixed income assets.

MAF Income

This actively-managed global multi-asset fund aims to pay a monthly income while growing clients' money over the long-term.

Monthly income from a diversified portfolio

Strategic and tactical asset allocation, that invests in 2,500+ equity and fixed income assets

Designed to generate income, while seeking to provide capital growth over the long-term

Diversified opportunities through access to a global marketplace

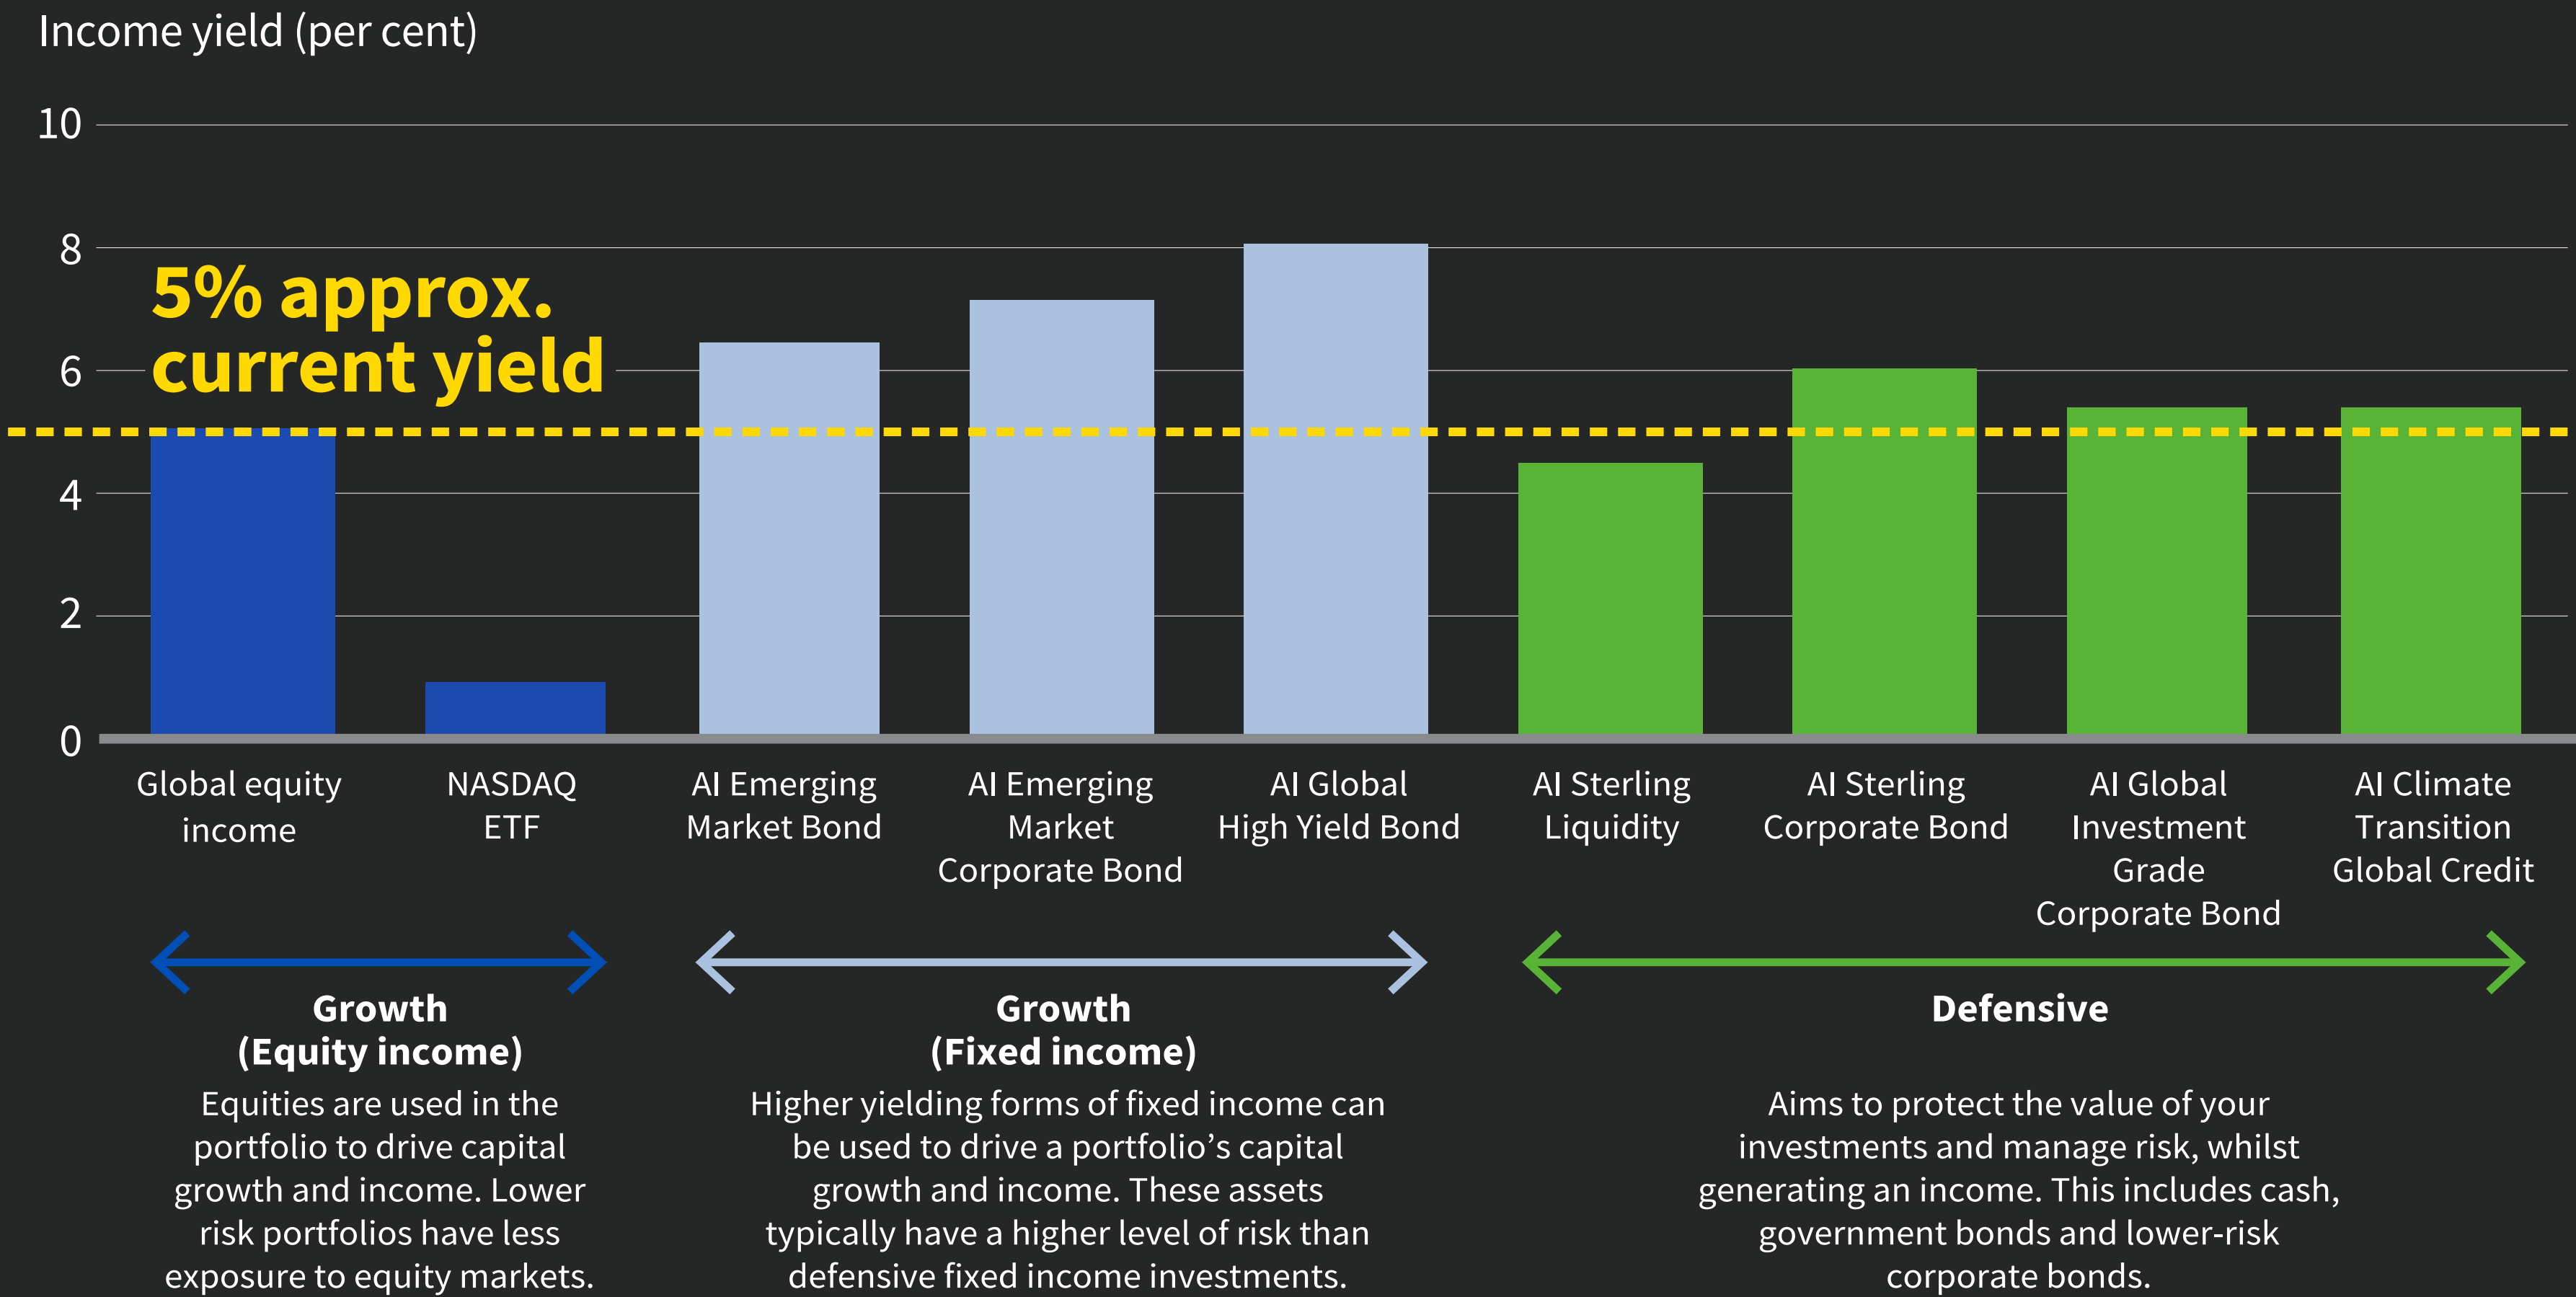

0.60% capped OCF* which includes active strategies designed to generate income

*We offer partnership pricing based on pre-agreed thresholds and agreements in place. Capped across all 3 OCFs.

MAF Income

Income generated from a diverse portfolio of assets

For a **£250,000** portfolio this equates to a gross income of **£12,500 p/a***

*Please note this figure represents the approximate current yield of the fund. This is the total sum of each underlying building block's yield multiplied by its respective weight in the strategy.

Key risks

Before you invest in a multi-asset fund, the below risks should be considered.

For further information on the risks and risk profiles of each fund, please refer to the KIID and Prospectus documents that can be found on our website:

Investment & currency

The value of an investment and any income from it can go down as well as up and can fluctuate in response to changes in currency and exchange rates. Investors may not get back the original amount invested.

Emerging markets

Investments can be made in emerging markets. These markets may be volatile and carry higher risk than developed markets.

Derivatives

Investments can be made in derivatives, which can be complex and highly volatile. Derivatives may not perform as expected, meaning significant losses may be incurred.

Convertible Securities Risk

Convertible bonds can earn less income than comparable debt securities and less growth than comparable equity securities, and carry a high level of risk.

Illiquid Securities Risk

Certain assets held in the Fund could be hard to value or to sell at a desired time or at a price considered to be fair (especially in large quantities), and as a result their prices could be very volatile.

Credit risk

Bond values are affected by changes in interest rates and the bond issuer’s creditworthiness. Bonds that offer the potential for a higher income typically have a greater risk of default.

Please note these are the key risks and are not exhaustive, please see the KIID and Prospectus for further information on other risks.

Important information

THIS IS A MARKETING COMMUNICATION.

Except where stated as otherwise, the source of all information is Aviva Investors Global Services Limited (“Aviva Investors”). Unless stated otherwise any opinions expressed are those of Aviva Investors. They should not be viewed as indicating any guarantee of return from an investment managed by Aviva Investors nor as advice of any nature.
