STRATEGY IN BRIEF

Aviva Investors Multi-Strategy Target Return

Aiming to deliver positive and consistent returns through all market cycles

This document is for professional clients/qualified investors only. It is not to be distributed to, or relied on by retail clients.

Please don't print this unless you really need to.

The case for liquid alternatives

The continued volatile inflation backdrop has brought higher uncertainty to the negative equity-bond correlation that investors have been used to in the recent past. The need for greater diversification outside of these assets is as important as ever.

In an elevated inflationary environment macro funds are particularly well placed to exploit increased dispersion in markets (figure 1)

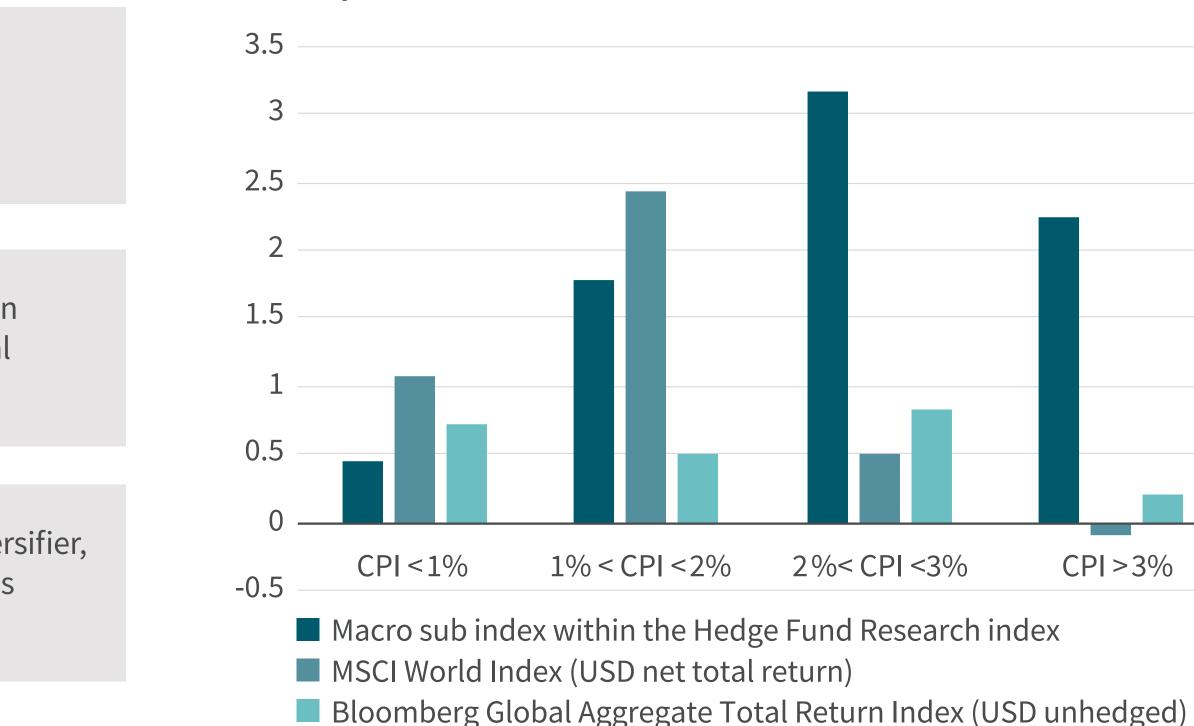

These types of strategies can potentially generate excess-of-cash returns in a low or high interest rate regime, due to the increased return on collateral and cash

Liquid alternatives funds can play a vital role in a broad portfolio as a diversifier, due to their ability to harness return sources outside of traditional equities and bonds

Past performance is not a reliable indicator of future performance. The value of an investment and any income from it can go down as well as up. Investors may not get back the original amount invested. Source: Aviva Investors, Macrobond as at 30 June 2024. Inflation is defined as US CPI YoY figures. Performance is based on the annualised monthly returns divided by the 3-year rolling standard deviation for each inflationary period.

Figure 1. Performance of equities and bonds versus macro funds across different inflationary periods, 1990-2024

Risk-adjusted annualised returns

Our approach to multi-strategy investing

Unconstrained approach

Harnessing a broad macro, thematic and idiosyncratic opportunity set, across and within asset classes

- Benchmark unconstrained
- Access return drivers outside of traditional equities and bonds

Connected thinking

We take advantage of the full breadth of Aviva Investors' return generating capabilities across Multi-asset & Macro, Equities, Credit, Real Assets and ESG

- Best ideas approach
- **behind AIMS**

Targeted Outcomes:

Source: Aviva Investors as at 30 June 2024. ¹Target for return and volatility is over a rolling three-year period. Outcomes and targets are not guaranteed and may not be achieved.

• Aligned firm wide investment resources

Robust portfolio construction

Focus on capital preservation to generate absolute returns across market cycles

- 'Three lines of defence' risk framework
- **ESG integrated***

Enhanced diversification

Lower sensitivity to equities and bonds

Minimising volatility

Manage strategy volatility to less than half that of global equities¹

*Beyond any binding ESG constraints in the strategy and baseline exclusions policy, the investment manager retains discretion over final investment decisions, taking into account wider risk factors.

Portfolio characteristics

Target return	Cash +5% ¹
Target volatility	Less than half of global equities ¹
Strategy AUM	\$4.1bn
Inception date	July 2014
Number of strategies	20-30 (see figure 2 for portfolio categories)
<section-header></section-header>	 Commodities Convertibles Credit Currency Duration Equities Inflation Property Volatility

Source: Aviva Investors, as at 30 September 2024.

1. Target for return and volatility is over a rolling three-year period.

2. Equity beta calculated over a rolling 26-week lookback period.

Targets and outcomes are not guaranteed and may not be achieved.

Figure 2. Main categories of strategy

Utilising quant tools and convex implementation strategies to set dynamic allocation to traditional risk premia. Historical equity beta averages 0.2²

Opportunistic returns

Macro and Idiosyncratic investment themes that typically exhibit lower market correlation e.g., volatility, relative value strategies, currencies

Risk-reducing returns

Seeks to protect the portfolio in the event the world plays out differently to our **central scenario, through discretionary and** systematic hedging strategies

Multi-strategy Fund Manager

Key risks

Investment risk & Currency risk

The value of an investment and any income from it can go down as well as up and can fluctuate in response to changes in currency and exchange rates. Investors may not get back the original amount invested.

Derivatives Risk

Investments can be made in derivatives, which can be complex and highly volatile. Derivatives may not perform as expected, meaning significant losses may be incurred.

Illiquid Securities Risk

Some investments could be hard to value or to sell at a desired time, or at a price considered to be fair (especially in large quantities). As a result their prices can be volatile.

Sustainability Risk

The level of sustainability risk may fluctuate depending on which investment opportunities the Investment Manager identifies. This means that the fund is exposed to Sustainability Risk which may impact the value of investments over the long term.
