REPORT OF THE AUTHORISED CORPORATE DIRECTOR

THE COMPANY

Aviva Investors Investment Funds ICVC ("the Company") is an Open-Ended Investment Company ("OEIC") with variable capital incorporated in England and Wales on 9 September 1998. The property of the Company is entrusted to J.P. Morgan Europe Limited ("the Depositary"). The shareholders are not liable for any debts of the Company.

The object of the Company is to invest the scheme property in transferable securities, money market instruments, units in collective investment schemes, deposits and derivatives and forward transactions in accordance with the COLL Sourcebook with the aim of spreading investment risk and giving its shareholders the benefit of the results of the management of that property.

The Company has an umbrella structure and currently has twenty sub-funds ("Funds") which are available for investment, each with a different investment objective. In the financial statements you will find an investment review for each Fund which includes details of the investment objectives.

AUTHORISED STATUS

From 9 September 1998 the Company has been authorised as an Open-Ended Investment Company under Regulation 7 of the Open-Ended Investment Companies Regulations 1996 (superseded by Regulation 12 of the Open-Ended Investment Companies Regulations 2001). The Company is a UCITS Scheme operating under the COLL Sourcebook and is constituted as an "umbrella company" under the Regulations, which means that the Company issues shares linked to different Funds.

THE FINANCIAL STATEMENTS

We are pleased to present the annual financial statements of the Company for the year ended 15 October 2019. As required by the Regulations, information for each of the Funds has been included in these financial statements. On the following pages we review the performance of each of those Funds during the year. We hope that you find our review useful and informative.

ANNUAL GENERAL MEETINGS

The Company will not be holding Annual General Meetings.

SIGNIFICANT INFORMATION

On 1 December 2018, the Depositary, Citibank Europe plc, UK Branch, was replaced by J.P. Morgan Europe Limited. J.P. Morgan Europe Limited is registered at 25 Bank Street, Canary Wharf, London E14 5JP. J.P. Morgan Europe Limited is authorised and regulated by the Financial Conduct Authority.

With effect from 2 January 2019, the Aviva Investors UK Growth Fund's investment objective and policy was amended (following a vote of investors) and the name changed to the Aviva Investors UK Listed Small and Mid Cap Fund to reflect the Fund's new focus. The name of the Aviva Investors UK Equity Fund was changed to the Aviva Investors UK Listed Equity Unconstrained Fund, and the name of the Aviva Investors European Equity Fund was changed to the Aviva Investors Continental European Equity Fund.

The Aviva Investors Cash Fund commenced termination on 1 April 2019 and is no longer available for investment.

On 10 July 2019, following FCA approval to do so, the Authorised Corporate Director ("ACD") launched a new fund within the ICVC – the Aviva Investors Sustainable Income & Growth Fund.

On 18 July 2019, following approval by the Depositary, the Nigeria Stock Exchange was added as an eligible securities market and eligible derivatives market for the Aviva Investors Multi-Strategy Target Return Fund.

On 29 July 2019, following FCA approval to do so, the ACD launched a new fund within the ICVC – the Aviva Investors Global Emerging Markets Equity Unconstrained Fund.

On 1 August 2019, following FCA approval to do so, the ACD launched a new fund within the ICVC – the Aviva Investors Global Equity Unconstrained Fund.

On 7 August 2019, the ACD made a number of changes to the investment objective and policy of the funds in response to new requirement set out in FCA PS19/04 and some further clarifications were made in December 2019 and January 2020. These changes have been communicated in a mailing and in statements to investors. If you want further information on the changes made, please see <https://www.avivainvestors.com/en-gb/capabilities/regulatory/amms/>

On 30 September 2019, the ACD launched a new share class 4 of the Aviva Investors UK Listed Equity Income Fund. Full details are available in the prospectus.

We made some minor changes to the investment objective and policy descriptions for the following funds in December 2019 and January 2020. For the current Objective and Policy wording please see the Prospectus or KIID. The investment objective and policy descriptions within these report and accounts are as at 15 October 2019.

- Aviva Investors UK Listed Equity Unconstrained Fund
- Aviva Investors UK Listed Small and Mid-Cap Fund
- Aviva Investors Global Equity Endurance Fund
- Aviva Investors Strategic Bond Fund
- Aviva Investors Multi-Strategy Target Return Fund
- Aviva Investors Global Equity Income Fund
- Aviva Investors UK Listed Equity Income Fund

REPORT OF THE AUTHORISED CORPORATE DIRECTOR (CONTINUED)

SIGNIFICANT INFORMATION (CONTINUED)

The ACD has adopted a policy whereby funds within its OEIC range that are actively managed by investment managers within the Aviva group, such as Aviva Investors Global Services Limited, will no longer be permitted to directly or indirectly invest in or hold Aviva Plc shares and other securities issued by Aviva Plc such as bonds, commercial paper and derivatives of these securities (collectively 'Aviva Securities'). The following funds are out of scope of the policy and may continue to invest in and hold Aviva Securities:

– Aviva Investors International Index Tracking Fund and Aviva Investors UK Index Tracking Fund, which are both passively managed funds that track the performance of an index.

Responsible Investment Policy

With effect from 30 April 2020, Aviva Investors UK Fund Services Limited ("ACD") will update the Responsible Investment Policy ("Policy") to prohibit funds from investing in companies which derive prescribed levels of revenue from Controversial Weapons and Civilian Firearms ("Excluded Companies").

We have defined Controversial Weapons as weapons that have been subject to widespread ban or restriction by International Treaties and Conventions, on the basis they have one or more of the following characteristics:

- The weapon is indiscriminate, i.e. there is an increased risk of civilian casualties.
- The weapon can be classified as a weapon of mass destruction with a single incident resulting in a large number of deaths.
- The weapon is considered to be excessively injurious, i.e. it causes an inordinate amount of pain and suffering.
- The weapon may have long term health impacts on the populations in areas where they are used.

We have defined Civilian Firearms as firearms and small arms ammunitions designed for civilian use, excluding products exclusively sold for the military, government, and law enforcement markets.

The ACD has prohibited direct investment by the funds into any Excluded Companies. The funds are also prohibited from having indirect exposure to Excluded Companies except where:

- The Fund has indirect exposure to a financial index and Excluded Companies are constituents of the financial index and,
- The Fund invests in other funds managed by third parties. While, consideration of environmental, social, and governance factors are an integral part of the Fund selection process, the underlying funds may not operate exclusions equivalent to the Policy.

The Policy will be updated to reflect these prohibitions and will be available from 30 April 2020 on the Aviva Investors website.

Impact on our funds

The Policy applies to all our funds.

As at the date of this statement, the Aviva Investors International Index Tracking Fund and the Aviva Investors UK Index Tracking Fund, have direct exposure to Excluded Companies as they are passively managed tracker funds that seek to track the performance of their respective indices. As the Policy will apply to these Funds, the Investment Manager will divest from the Excluded Companies by the end of July 2020. The holdings in Excluded Companies and the costs of divesting are not material.

From 30 April 2020 all fund Prospectuses will be updated to reflect the amended Policy.

In addition, currently the funds listed below do not refer to the Policy in their respective investment objectives and policies. We wish to make it clear that the funds are subject to the restrictions and exclusions set out in the Policy and therefore are applying to the Financial Conduct Authority to include the following sentence within the investment objective and policy. "In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment Policy."

- Aviva Investors UK Index Tracking Fund
- Aviva Investors International Index Tracking Fund
- Aviva Investors UK Listed Equity Unconstrained Fund
- Aviva Investors UK Listed Small and Mid-Cap Fund

New eligible markets

The following markets have been added as eligible markets for the Funds listed below, and the relevant Prospectuses have been updated accordingly.

Fund	New Eligible Markets
Aviva Investors Multi-Strategy Target Return Fund	Nigerian Stock Exchange, Taiwan Stock Exchange, BOX Options Exchange LLC, C2 Options Exchange, EDGX Options Exchange, Miami International Securities Exchange, MIAAX Pearl, MIAAX Emerald, NASDAQ GEMX, NASDAQ MRX
Aviva Investors Global Emerging Markets Equity Unconstrained Fund	Six Swiss Exchange, Tokyo Stock Exchange
Aviva Investors International Index Tracking Fund	NYSE MKT LLC, BZX Exchange, Taipei Exchange, New York Stock Exchange
Aviva Investors Global Equity Income Fund Aviva Investors Global Equity Unconstrained Fund	New York Stock Exchange

FATCA AND CRS REPORTING

Tax regulations require us to collect information about your tax residency and you will have therefore provided this at the time of making your investment with us. The term tax regulations refers to the International Tax Compliance Regulations 2015 which implements the Foreign Account Tax Compliance Act (FATCA) and the OECD Common Reporting Standard (CRS) for Automatic Exchange of Financial Account Information. As a result, in certain circumstances we will be obliged to share information about your account(s) with Her Majesty's Revenue & Customs (HMRC) who may in turn share this information with any or all jurisdictions that have agreed to exchange information under FATCA and CRS. The information previously provided by you at the time of making your investment will be used by us to report to HMRC regarding your account(s), where so required. This does not apply where you have invested with us solely via an ISA.

REPORT OF THE AUTHORISED CORPORATE DIRECTOR (CONTINUED)

REMUNERATION POLICY

In line with the requirements of the Undertakings for Collective Investment in Transferable Securities Directive V ("UCITS V"), Aviva Investors UK Fund Services Limited ("AIUKFSL") is subject to a remuneration policy which is consistent with the principles outlined in the European Securities and Markets Authority guidelines on sound remuneration policies under the UCITS Directive.

Aviva Investors' remuneration framework is based on a total reward approach and is designed to reflect the success or failure against a range of personal and company performance objectives. There are four components of pay: base salary; annual bonus (including deferred bonus); long term incentive plan; and benefits. Aviva believes in rewarding strong performance and the achievement of our business and individual goals; however, the manner in which these goals are achieved is also an important factor in determining outcomes. Annual bonus awards are discretionary and where bonuses are £75,000 and over, a 3 year deferral with pro-rata vesting in Aviva Investors funds and/or Aviva Group plc shares occurs.

The extent to which each aspect of performance affects the overall payment level depends on the role and responsibilities of the individual. Performance is measured against personal objectives, including Risk and Control objectives, as well as Aviva Investors' and the business unit performance against agreed targets. A combination of individual, business unit, Aviva Investors and Group performance over an appropriate period.

The financial considerations includes the following comparisons:-

- Actual results vs. prior period results
- Actual results vs. agreed plans
- Actual results relative to competitors
- Actual results vs., and progress towards, our long-term target ambition.
- The non-financial considerations include risk, conduct, culture, customer and employee engagement metrics, with Aviva values clearly underpinning all our decisions. In certain roles, adherence to Responsible Investment and ESG principles will also be a consideration.
- The Performance assessment does not encourage risk taking outside the Aviva Investors stated risk appetite, and includes mechanisms by which performance against risk and conduct related measures has a significant impact on the availability and size of business and individual variable awards.

The remuneration policies are designed to ensure that any relevant conflicts of interest can be managed appropriately at all times and that the remuneration of its senior staff is in line with the risk policies and objectives of the UCITS funds it manages, and takes into account the promotion of sound and effective risk management and the achievement of fair outcomes for all customers.

AIUKFSL has no employees but is a wholly owned subsidiary of Aviva Investors Holdings Limited. For the year to 31 December 2018, apportioned remuneration based on the time assessed to be spent on AIUKFSL UCITS activity paid by Aviva Plc, the ultimate parent of AIUKFSL, to its senior management team, and staff whose actions have a material impact on the risk profile of AIUKFSL ("Code staff"), is as follows:

	Senior Management	Other Code Staff
Total Remuneration:	£0.36m	£0.38m
Of which, Fixed Remuneration:	34%	39%
Variable Remuneration:	60%	54%
Pension/Benefits:	6%	7%
Number of Code staff:	10	7

MANAGER'S MARKET REVIEW

EQUITY MARKET REVIEW

Global equities, as measured by the MSCI World Index, rose by 11.4% in sterling terms in the twelve months to 15 October 2019. The period witnessed a rising trend for equity prices which was punctuated by short bouts of weakness in December and August. Equities were supported by hopes – which were subsequently borne out – of further monetary stimulus by the main central banks. Expectations that interest rates would be cut helped support stock markets, despite concerns that the current extended cycle of global growth was finally coming to an end. With the trade war between the US and China intensifying, there were concerns that weakness in manufacturing in the US and particularly the Eurozone would be the precursor of a broader-based slowdown. However, the ongoing strength of the consumer, which was underpinned by robust jobs markets, suggested that any downturn that did materialise would be shallow. The UK market remained fairly resilient to the ongoing and seemingly intractable saga of Brexit, even though the Bank of England appeared out of step with other central banks by failing to talk up looser monetary policy.

FIXED INCOME – CORPORATE AND HIGH-YIELD BONDS

Fixed-income assets posted solid returns in the six months under review. Government bonds lent fundamental strength to the markets as the US Federal Reserve indicated it was switching to looser monetary policy. This reversed earlier guidance suggesting that further interest rate hikes were to be expected in 2019. As American interest rates were cut twice and the European Central Bank announced a re-start of its asset purchasing programme (quantitative easing), government bond yields reached new historic lows during the summer. Excess returns for corporate bonds were positive as the prospect of lower interest rates stabilised investor sentiment towards companies with high levels of debt. Corporate bonds also attracted sustained demand from investors hunting for income in a historically low-yield environment. High-yield bonds were nevertheless more volatile as fears about a possible global recession increased the potential for defaults.

November 2019

Source of market data: FactSet, Bloomberg

Past performance is not a guide to the future. The value of an investment and any income from it can go down as well as up. Investors may not get back the original amount invested. Any opinions expressed are those of the Fund manager. They should not be viewed as a guarantee of a return from an investment in the Funds. The content of the commentary should not be viewed as a recommendation to invest nor buy or sell securities.

STATEMENT OF CROSS HOLDINGS

There are no cross holdings as at 15 October 2019.

POLICIES AND RISKS

ACCOUNTING POLICIES

a Basis of accounting

The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Practice for UK Authorised Funds issued by The Investment Management Association in May 2014 (SORP 2014), and in accordance with United Kingdom Generally Accepted Accounting Practice as defined within FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland. Both of which became effective for the accounting periods commencing 1 January 2015.

All of the Funds have been prepared on a going concern basis.

b Share classes

The Funds have three types of share classes; retail shares (classes 1 and 6), institutional shares (classes A, 2 and 5) and shares held by associated undertakings of Aviva Plc (classes 3 and 9). Each class bears different charges and consequently the level of revenue allocated to each share class will differ. Some share classes consist of accumulation shares only, some consist of income shares only, whilst others consist of both accumulation and income shares.

c Recognition of revenue

Dividends are recognised when the investment is quoted ex-dividend. Interest arising on interest stocks is recognised on an effective yield basis. Deposit interest and other revenues are recognised on an accruals basis.

Revenue received from Collective Investment Schemes (CIS) is recognised when the CIS is quoted ex-dividend. Equalisation received as part of the revenue from CIS is deducted from the cost of the investment. Special dividends are either treated as income or capital depending on the facts of each dividend.

d Expenses

Each Fund will be charged a single fixed rate charge, referred to as the Fund Management Fee, to cover the underlying fees and expenses in relation to the operation and administration of the Company and/or that Fund.

The Fund Management Fee accrues daily and is calculated as a percentage of the Net Asset Value of that Fund on the previous Business Day, calculated on a mid market basis and the current Fund Management Fee for each Class and Fund is set out in the Prospectus.

e Treatment of derivatives

In determining the accounting treatment for derivatives, consideration is given to the instrument itself and the Funds' objectives for investment in derivative instruments. Where positions are held to protect capital, the returns are treated as capital. Where positions are held to generate revenue, the returns are treated as revenue. Where positions generate total returns, these returns are apportioned between capital and revenue to properly reflect the nature of the transaction.

The revenue element in respect of futures is calculated by reference to the quoted yield of the relevant index compared to LIBOR. This revenue element will either be revenue or an expense, depending on whether the position held is "long" or "short".

Premiums received on options are treated as revenue or capital depending on the motives and circumstances of the transaction.

f Dilution Levy Policy

The Company reserves the right to charge a dilution levy (Investor Protection Fee) to protect existing investors in a fund from the costs of buying or selling investments that may result from the sale and/or purchase of shares in that Fund. The amount of any such dilution levy is calculated by reference to the estimated costs of dealing in the underlying investments, including any dealing spreads, broker commissions and taxes. When the Company impose a dilution levy on a particular investor or group of investors, this is paid into the Fund and helps to protect existing investors from the costs of the resultant transactions. For details of the circumstances in which a dilution levy may be imposed, dilution levies applied in a Fund historically, and on what values, please see that Fund's Prospectus.

g Underwriting commission

Underwriting commission is accounted for when the issue underwritten takes place and is normally taken to revenue. Where the Company is required to take up all the shares underwritten, the commission received is treated as a deduction from the cost of the shares taken up. Where the Company is required to take up a proportion of the shares underwritten, the same proportion of the commission received is treated as a deduction from the cost of shares taken up and the balance is taken to revenue.

h Basis of valuation of investments

Quoted investments

The quoted investments of the Company have been valued at bid market value at midday on the last working day of the accounting period with the exception of Aviva Investors UK Index Tracking Fund which was valued at bid market value at 5.00 p.m. and Aviva Investors Multi-Strategy Target Return Fund which was valued at bid market value at 11.59 p.m.

Unquoted and unapproved investments

The unquoted and unapproved investments of the Company have been valued by the Investment Manager using available information to arrive at an estimated fair value.

Suspended securities

Suspended securities have been valued at the suspended market price per share or valued by the Investment Manager using available information to arrive at an estimated fair value.

Delisted securities

Delisted securities have been valued at nil pence per share.

Forward foreign currency contracts

The Company's forward foreign currency positions on the last working day of the accounting period are included in the portfolio statement as an asset or liability so as to reflect the value of the aggregate positions in each currency.

Over the counter (OTC) derivatives

OTC derivatives are either valued by the relevant counterparty or by the investment manager using available information to arrive at an estimated fair value.

Exchange traded derivatives (ETDs)

ETDs are included at the aggregate unrealised market value of the open contracts.

CIS investments

CIS investments are valued at the last sale price available at the valuation point.

POLICIES AND RISKS (CONTINUED)

ACCOUNTING POLICIES (CONTINUED)

i Exchange rates

Assets and liabilities held in foreign currencies are translated at the rate ruling at midday on the last working day of the accounting period for all Funds except for the Aviva Investors UK Index Tracking Fund which is translated at 5.00 p.m and Aviva Investors Multi-Strategy Target Return Fund which was valued at bid market value at 11.59 p.m. Revenue and expenditure items are translated at the rate ruling at the date of the transaction.

j Taxation and deferred taxation

Provision for Corporation Tax is based at the current rate, as appropriate, on the excess of taxable revenue over allowable expenses and takes into account taxation deferred because of timing differences between the treatment of certain items for taxation and accounting purposes. Deferred taxation is provided using the liability method on all timing differences, and is calculated at the rate at which it is anticipated the timing differences will reverse. Deferred tax assets are recognised only when, on the basis of available evidence, it is more likely than not that there will be taxable profits in the future against which the deferred tax asset can be offset.

k Unclaimed distributions

Any distribution remaining unclaimed after a period of six years is paid back to the relevant Fund and forms part of the capital property of the Fund.

DISTRIBUTION POLICIES

a Distribution policy

Where appropriate the Company will pay any surplus revenue as a revenue distribution or accumulation to capital. The following Funds were more than 60% invested in qualifying investments and so have proposed interest distributions:

- Aviva Investors Higher Income Plus Fund
- Aviva Investors Managed High Income Fund
- Aviva Investors Monthly Income Plus Fund
- Aviva Investors Distribution Fund
- Aviva Investors Corporate Bond Fund
- Aviva Investors High Yield Bond Fund
- Aviva Investors Strategic Bond Fund
- Aviva Investors Sustainable Income & Growth Fund

All other Funds have proposed dividend distributions. Full details are set out in the distribution tables.

b Treatment of stock dividends

The ordinary element of stock dividends is treated as revenue and forms part of the Fund's distribution. The value of the stock dividend is based on the market value of the shares on the dates they are quoted ex-dividend. Where an enhancement is offered, the amount by which the market value of the shares (on the date they are quoted ex-dividend) exceeds the cash dividend is treated as capital.

c Treatment of Fund Management Fee

All expenses are charged to revenue on an accruals basis. For the purposes of the distribution, 100% of the Fund Management Fee of the Aviva Investors UK Listed Equity Income Fund, the Aviva Investors Global Equity Income Fund, and Aviva Investors Sustainable Income & Growth Fund, and 50% of the ACD's periodic charge of the Aviva Investors Distribution Fund, is deducted from capital.

FINANCIAL INSTRUMENTS

The Company's financial instruments, other than derivatives, comprise securities and other investments, cash balances and debtors and creditors that arise directly from its operations, for example, in respect of sales and purchases awaiting settlement, amounts receivable for creations and payable for liquidations, and debtors for accrued income.

The Company also enters into derivative transactions in the form of forward foreign currency contracts, credit default swaps, interest rate swaps, total return swaps, equity variance swaps, options and stock index futures. The Aviva Investors Multi-Strategy Target Return Fund uses these financial instruments as a cheaper or more liquid alternative to other investments, to hedge or reduce overall risk, or in pursuit of its investment objectives. All other Funds use these financial instruments for the purposes of efficient portfolio management. In particular, forward foreign currency contracts are used to manage currency risk arising from holdings of overseas securities. Stock index futures are used to manage market price risk arising from the time lag between funds being receivable or payable by the Company and investment or disinvestment in underlying securities.

Interest rate swaps and swaptions are generally held to mitigate exposure to interest rate movements which could adversely affect the value of bonds held within the Fund portfolios. Credit default swaps are used to manage credit risk through selling protection.

Interest and finance charges from interest rate swaps are taken to revenue. The premiums from credit default swaps are taken to revenue. The gains and losses on interest rate swaps and credit default swaps are taken to capital.

In accordance with requirements set out in the Collective Investment Schemes Sourcebook of the Financial Conduct Authority, such scheme transactions must be economically appropriate, any exposure must be fully covered and the transactions must be entered into with the aim of reducing risk and/or costs and/or generating additional capital or revenue for the scheme with no, or an acceptably low level of risk.

The Company's use of financial instruments satisfies these requirements and no trading in financial instruments is undertaken. The Company has exposure to a number of different risks to varying degrees. The main risks it faces from its financial instruments and the Manager's policies for managing these risks are summarised below:

a Foreign currency risk

The Funds can be exposed to foreign currency risk as a result of investing in assets denominated in currencies other than sterling. Where the manager deems it necessary, this exposure to foreign currency fluctuations is mitigated by the use of forward foreign currency contracts. Numerical disclosures can be found in the notes to the financial statements for each Fund.

b Interest rate risk

The value of debt securities may be affected by interest rate movements or the expectation of such movements in the future. Interest receivable on bank deposits or payable on bank overdraft positions will be affected by fluctuations in interest rates. The Manager manages this risk by maintaining a balanced portfolio with due consideration to interest rate and redemption profiles. Interest rate risk is also managed by ensuring that deposits mature within a relatively short period. Numerical disclosures can be found in the notes to the financial statements for each Fund.

POLICIES AND RISKS (CONTINUED)

FINANCIAL INSTRUMENTS (CONTINUED)

c Market risk

The Funds' investment portfolios are exposed to market price fluctuations which are monitored by the Manager in pursuance of the investment objectives and policies of the Funds. Adherence to investment and borrowing powers set out in the Instrument of Incorporation and in the Collective Investment Schemes Sourcebook of the Financial Conduct Authority, mitigates the risk of excessive exposure to any particular type of security or issuer. Further information on the investment portfolios is set out in the investment reports and portfolio statements, of the individual Funds.

d Credit risk

The Funds restrict their exposure to credit losses on derivative instruments by trading via International Swap and Derivative Association (ISDA) Master Arrangements with each counterparty. The Funds are exposed to the risk that a bond issuer may default on the interest payments or the redemption of the bond. The Funds manage this risk by due consideration to interest rate and redemption profiles and maintaining a balanced portfolio with the credit worthiness of the bond issuer.

e Liquidity risk

This is the risk that there is insufficient liquidity which restricts a Fund's investment opportunities or ability to pay liabilities at short notice. This risk is managed by ensuring that overdrafts are monitored and maintained within investment limits and exposure to unquoted or illiquid securities is limited.

f Counterparty Risk

There is a risk that the Counterparty will not be able to settle its obligations under the agreement. This is mitigated by an assessment of the credit worthiness of the Counterparty, and the use of multiple counterparties to ensure that no more than 20% of the Fund value is exposed to one counterparty.

Further information on the investment portfolio is set out in the investment reports and portfolio statements.

AVIVA INVESTORS UK INDEX TRACKING FUND

INVESTMENT OBJECTIVE

The Fund aims to track the performance of the FTSE® All-Share Index (before charges and taxes). Any returns will be a combination of capital growth and income.

INVESTMENT POLICY

Core investment: The Fund will invest directly into shares of companies that make up the FTSE® All-Share Index (the "Index").

Other investments: The Fund may also invest in other funds (including funds managed by Aviva Investors companies), cash and deposits.

Derivatives, such as futures, may be used from time to time to gain a particular market exposure which would otherwise be difficult or costly to achieve, or to manage the Fund's cash flows in a cost-effective manner, this type of derivative usage is called "efficient portfolio management".

Strategy: The Fund will aim to replicate the Index by investing in all the companies that make up the Index, and in the same proportions, with the aim of providing full exposure to the companies within the Index.

Performance & Risk Measurement: The Fund's performance is measured against the Index over any given 12-month period, because the Fund intends to replicate the performance of the Index.

The Fund uses a "tracking error" to measure the consistency between the Fund's returns and the returns of the Index. In general, the lower the tracking error, the more consistent the Fund's returns are relative to the Index, and vice-versa.

The Fund has a yearly tracking error target of 0% (excluding charges). In normal market conditions the anticipated level of tracking error will be within 0.20% (excluding charges) of the Index.

Factors which are likely to affect the ability of the Fund to track the performance of the Index might include transaction costs (from Index and Fund turnover and dividend reinvestment), portfolio weightings not being exactly the same as the Index, residual cash holdings, or other related factors such as efficient portfolio management, illiquid components, and any trading restrictions that may be in place.

The Index represents the performance of all eligible companies listed on the London Stock Exchange, and 98% of the UK's market capitalisation (total market value of a company's outstanding shares).

FUND MANAGER'S REPORT

Performance

Over the twelve months ended 15 October 2019, the Aviva Investors UK Index Tracking Fund delivered a total return of 7.07% (share class 1), net of fees. The Fund's benchmark, the FTSE® All Share Index, returned 7.70%.

Market and Fund Review

The UK equity market has struggled to make progress over the reporting period with various headwinds undermining investor sentiment. The fourth quarter of 2018 saw weak markets globally, which was precipitated by US Federal Reserve (Fed) Chairman Jerome Powell cautioning in early October that the central bank was still a long way from returning interest rates to a neutral level, implying monetary policy would tighten further in 2019. This impacted equity market sentiment across the world, and in the UK it was highly valued companies in particular which came under pressure as 2018 ended. In early 2019, with global economic data softening and the uncertainty of trade wars escalating between the US and China, the Fed signalled an abrupt change in policy and stepped back from interest rate hikes, which led to a broad-based rally across the UK equity market during the first quarter of 2019. Given concerns over the impact of the US-China trade dispute and signs of softer US economic data, the Fed subsequently sanctioned two rate cuts in July and September. In China, economic growth decelerated to its lowest rate since 1992 during the third quarter, while the European Central Bank launched a new package of stimulus measures in an effort to tackle low growth and low inflation in the Eurozone.

However, the main factor which has accounted for the underperformance of UK equities in comparison with global indices was uncertainty over Brexit negotiations and scepticism amongst investors globally that the UK's withdrawal from the European Union can be resolved in a timely and efficient manner. Indeed, it remains highly uncertain as to how, and indeed when, the UK's withdrawal will be executed. This has had negative repercussions for the UK economy, with companies reticent to sign off long term investment projects, hiring freezes being witnessed and the housing market stuck in the doldrums. Although inventory building amongst UK businesses as a contingency measure against a disorderly Brexit boosted economic growth during the opening months of 2019, subsequently the UK economy shrank during the second quarter for the first time in almost seven years, as stockpiling activity slowed and Brexit uncertainty intensified against a backdrop of weaker global growth.

Increased perceived risks of a UK and/or global recession have been the key drivers of share price performance over the reporting period, overriding relative company valuations. Most notably, valuations amongst economically sensitive and domestically-focused stocks remain extremely depressed due to concerns over the risk of a pronounced economic slowdown, particularly in the event of a disorderly Brexit but also the impact of a prolonged US-led trade war.

On a more positive note, ongoing merger and acquisition activity, which has not solely been confined to larger, more liquid stocks, has been a feature of the UK equity market over the last 12 months. A combination of sterling weakness, attractive valuations and the low cost of debt finance have provided an accommodating backdrop for acquisitive corporations and private equity investors.

AVIVA INVESTORS UK INDEX TRACKING FUND (CONTINUED)

FUND MANAGER'S REPORT (CONTINUED)

There was a marked dispersion in sector returns during the reporting period. Healthcare was the strongest sector, led by major drug companies AstraZeneca and GlaxoSmithKline (GSK). AstraZeneca lifted its sales outlook in the summer after posting its fourth consecutive quarter of rising revenues on the back of strong performance by new medicines for cancer and heart disease. GSK also raised its earnings outlook, with the strength of its vaccines and consumer health businesses offsetting weakness in the pharmaceuticals unit caused by the launch of a generic rival to its asthma treatment Advair.

In contrast, energy stocks were the weakest major sector. The oil price (Brent crude) declined sharply to just over \$50/barrel in December – its lowest level for 15 months, driven by increased levels of supply, notably US inventories. Subsequently, following a recovery during the first quarter of 2019, escalating US-China trade tensions and an abundance of supply has kept the oil price well below \$70/barrel since early summer, squeezing the earnings of oil majors BP and Royal Dutch Shell.

Outlook

The UK equity market continues to trade at a valuation discount to global peers due to overhanging macroeconomic and Brexit-related uncertainties holding back investor flows. Looking forward, Brexit and global trade risks will continue to weigh heavily on the UK equity market, and in this context a resolution to Brexit that avoids 'no-deal' in favour of a more orderly withdrawal would be positive for market sentiment.

November 2019

Synthetic Risk and Reward Indicator

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at www.avivainvestors.com or from the ACD on request.

[‡] The operating charges are calculated on an ex-post basis and as such may differ from the Ongoing Charge Figure where:

(a) Changes to fee rates were made during the year and the Ongoing Charge Figure has been amended to be future proofed for this change.

(b) The Ongoing Charge has been annualised for a share class that has not yet been open for a full year.

[#] The direct transaction costs have been stated after deducting, in the case of single-priced funds, the proportion of the amounts collected from dilution adjustments or dilution levies that relates to direct transaction costs and, in the case of dual-priced funds, the amounts collected in relation to direct transaction costs added to, or subtracted from, the valuations by virtue of COLL 6.3.6 G (4).

[≈] The high and low prices disclosed are the high and low prices for the accounting period and not the calendar year. The net asset value per share price is based on the net asset value in the published accounts and may be different due to post year end accounting adjustments.

Ongoing Charges Figure*

Share class	15.10.19	15.10.18
Class 1	0.48%	0.48%
Class 2	0.23%	0.23%
Class 3	0.23%	0.23%
Class A	0.10%	0.10%

* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the year. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme. The OCF for share class 1, when aggregated with certain other payments out of scheme property incurred in respect of it, is capped at 0.70%. The OCF for share class A is capped at 0.10%. Please see the Prospectus for full details.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

	3	52
Other expenses:		
Audit fee**	–	7
FTSE® Index Tracker Fund licence fee	–	47
Printing and postage expenses	–	1
Statement fees	–	15
	–	70
Total expenses	2,058	2,062
Less those expenses rebated by the ACD	–	(12)
Net expenses	2,058	2,050

* From 4 June 2018 the Fund changed to a single fixed charge known as the Fund Management Fee (FMF). The FMF covers fees and expenses in relation to the operation and administration of the Company and the Fund.

** The audit fee was £9,790 (2018: £9,413) net of VAT. With effect from 4 June 2018, the audit fee was no longer accrued for separately and now forms part of the FMF.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

5 Taxation**a Analysis of tax charge**

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Adjustments in respect of prior period	–	(2)
Overseas tax suffered	347	229
Total current tax (see note 5b)	347	227

b Factors affecting current tax charge

The tax assessed for the year is lower (2018: lower) than the standard rate of corporation tax in the UK for an Authorised Investment Fund (20%) (2018: 20%).

The differences are explained below:

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Net revenue before taxation	35,565	29,247
Corporation tax at 20%	7,113	5,849
Effects of:		
Adjustments in respect of prior period	–	(2)
Movement in excess management expenses	260	286
Overseas dividends not subject to corporation tax	(1,098)	(912)
Overseas tax expensed	(1)	–
Overseas tax suffered	347	229
Revenue taxable in different periods	(2)	–
UK dividends not subject to corporation tax	(6,272)	(5,223)
Current tax charge (see note 5a)	347	227

Authorised Investment Funds are exempt from tax on capital gains, therefore, any capital returns are not included in the above reconciliation.

c Deferred tax

There is no material unprovided deferred tax (2018: £nil).

After claiming relief against accrued income taxable on receipt, the Fund has unrelieved excess expenses of £38,870,326 (2018: £37,568,495) creating a potential deferred tax asset of £7,774,065 (2018: £7,513,699). It is unlikely that the Fund will generate taxable profits in the future to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

6 Distributions

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:		
Interim distribution	14,165	11,964
Final distribution	20,951	17,266
	35,116	29,230
Add: Revenue deducted on cancellation of shares	503	433
Deduct: Revenue received on issue of shares	(400)	(643)
Total distributions	35,219	29,020
Reconciliation of distributions for the year to net revenue after taxation		
Distributions for the year	35,219	29,020
Undistributed revenue brought forward	(1)	(1)
Undistributed revenue carried forward	–	1
Net revenue after taxation	35,218	29,020

Details of the distributions per share are set out in the distribution tables on page 38.

7 Fair value hierarchy

Valuation technique	Assets at 15.10.19 £000	Assets at 15.10.18 £000
Level 1: Quoted prices	902,356	758,681
Total value	902,356	758,681

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities.

The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority to unobservable inputs. Disclosure is required of the value in each category in order to give an insight into the extent to which fair value measurements are subjective.

The disclosure is split into the following categories:

Level 1: Unadjusted quoted price in an active market for an identical instrument;

Level 2: Valuation techniques using observable inputs other than quoted prices within level 1;

Level 3: Valuation techniques using unobservable inputs.

8 Debtors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued revenue	2,359	2,007
Amounts receivable on issue of shares	24	1,422
Overseas tax recoverable	209	144
Sales awaiting settlement	16	3,896
Total debtors	2,608	7,469

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

9 Cash and bank balances

	As at 15.10.19 £000	As at 15.10.18 £000
Cash and bank balances	1,931	18,436
Total cash and bank balances	1,931	18,436

10 Other creditors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued expenses	272	232
Amounts payable for cancellation of shares	890	627
Total other creditors	1,162	859

11 Contingent liabilities and commitments

The contingent liabilities and commitments at the year end date are as follows:

	As at 15.10.19 £000	As at 15.10.18 £000
Elementis Rights 18/10/2018	–	58
EnQuest Rights 19/10/2018	–	32
Total contingent liabilities	–	90

12 Related party transactions

Aviva Investors UK Fund Services Limited, Aviva Investors Global Services Limited and the Aviva Group are deemed to be related parties per section 33.10 of FRS 102 as they are entities with control, joint control or significant influence over the entity.

Fund Management Fee/ACD periodic charges paid to Aviva Investors UK Fund Services Limited ("the ACD") are shown in note 4 and details of shares issued and cancelled by the ACD are shown in the statement of change in net assets attributable to shareholders. The balance due to the ACD at the year end in respect of Fund Management Fee/ACD periodic charges was £271,736 (2018: £232,151). Any balance due from the ACD in respect of issues is shown in note 8. Any balance due to the ACD in respect of cancellations is shown in note 10.

Distributions payable to the ACD and related parties of the ACD during the year amounted to £28,307,854 (2018: £22,836,778). The amount outstanding at the year end was £17,139,856 (2018: £13,579,107). Related parties of the ACD are deemed to be all companies under the control of Aviva Plc. This will include companies which hold shares in the Fund on behalf of other external investors.

Any investments managed and advised by Aviva Investors Global Services Limited or associated with the Aviva Group are identified on the portfolio statement.

The total purchases and sales on these investments during the year amounted to £103,246,956 (2018: £33,199,451) and £102,216,775 (2018: £33,142,192) respectively. The income received during the year amounted to £449,970 (2018: £375,666).

Holdings at the year end and movements during the year are as follows:

	Holdings at 15.10.19 (shares)	Movement (shares)	Holdings at 15.10.18 (shares)
ACD and related parties (Class 1 Income shares)	9,642	(19,110)	28,752
ACD and related parties (Class 2 Income shares)	1,405,099	(128,032)	1,533,131
ACD and related parties (Class 3 Accumulation shares)	288,331,845	31,490,477	256,841,368

The ACD and related parties of the ACD are ineligible to vote at any general meeting.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

13 Shareholder funds

The Fund currently has four share classes: Class 1 and A (Retail), Class 2 (Institutional) and Class 3 (Associated undertakings of Aviva Plc). The Fund Management Fees are as follows:

Class 1: 0.48%
 Class 2: 0.23%
 Class 3: 0.23%
 Class A: 0.10%

The net asset value of the share class, the net asset value per share and the number of shares in the class are shown on pages 13 and 14. The distributions per share are given in the distribution tables on page 38. All the share classes have the same rights on winding up.

14 Shares in issue reconciliation

	Number of shares in issue at 15.10.18	Number of shares issued	Number of shares cancelled	Number of shares converted	Number of shares in issue at 15.10.19
Class 1 Income shares	111,830,211	5,413,750	(7,755,956)	(400,474)	109,087,531
Class 2 Income shares	10,311,248	1,257,339	(1,344,093)	244,419	10,468,913
Class 3 Accumulation shares	256,841,368	44,304,441	(12,813,964)	–	288,331,845
Class A Accumulation shares	69,943,629	1,293,573	(10,284,489)	–	60,952,713

15 Derivatives and other financial instruments

The policies applied in the management of financial instruments are set out on pages 9 and 10.

Fair value of financial assets and financial liabilities

There is no significant difference between the carrying values of the financial assets and liabilities and their fair values (2018: £nil).

Currency risk

At the year end date, 0.08% (2018: 0.09%) of the net assets of the Fund were denominated in currencies other than sterling and as such the currency risk is not considered significant.

Interest rate risk

The Fund does not invest in either fixed or floating rate securities and interest rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions which will be affected by fluctuations in interest rates.

At the year end date 0.21% (2018: 2.36%) of the net assets of the Fund were interest bearing and as such the interest rate risk is not considered significant.

The floating rate on bank balances is linked to the Depositary's base rate.

The floating rate on deposits is linked to LIBOR or its overseas equivalent.

Market price risk

At the year end date, 99.87% (2018: 97.06%) of the net assets of the Fund were invested in ordinary shares or stock units admitted to an official stock exchange. If the market value were to change by 10%, the value of the Fund would change by 9.99% (2018: 9.71%).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

16 Direct transaction costs

In the case of shares, broker commissions and transfer taxes, stamp duty is paid by the Fund on each transaction. In addition, there is a dealing spread between buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of the dealing spread.

Dealing spread

As at 15 October 2019, the average portfolio dealing spread was 0.09% (2018: 0.10%). This spread represents the difference between the values determined retrospectively by reference to the bid and offer prices of investments expressed as a percentage of the value determined by reference to the offer price.

17 Post balance sheet events

There are no post balance sheet events which require adjustment or disclosure at the year end (2018: £nil).

DISTRIBUTION TABLES

Final distribution payable in pence per share for the six months ended 15 October 2019

Income shares		Net revenue	Equalisation	Final distribution payable 15 December 2019	Final distribution paid 15 December 2018
Class 1 Income shares	Group 1	1.7456	–	1.7456	1.5858
	Group 2	1.0423	0.7033	1.7456	1.5858
Class 2 Income shares	Group 1	3.0229	–	3.0229	2.7952
	Group 2	1.5876	1.4353	3.0229	2.7952

Accumulation shares		Net revenue	Equalisation	Final distribution payable 15 December 2019	Final distribution paid 15 December 2018
Class 3 Accumulation shares	Group 1	5.9297	–	5.9297	5.2701
	Group 2	5.1445	0.7852	5.9297	5.2701
Class A Accumulation shares	Group 1	2.6793	–	2.6793	2.3857
	Group 2	1.3753	1.3040	2.6793	2.3857

Final distribution

Group 1 shares are those shares purchased at or before 5:00pm on 15 April 2019.

Group 2 shares are those shares purchased after 5:00pm on 15 April 2019.

Interim distribution paid in pence per share for the six months ended 15 April 2019

Income shares		Net revenue	Equalisation	Interim distribution paid 15 June 2019	Interim distribution paid 15 June 2018
Class 1 Income shares	Group 1	1.3102	–	1.3102	1.0883
	Group 2	0.8997	0.4105	1.3102	1.0883
Class 2 Income shares	Group 1	2.3015	–	2.3015	2.0458
	Group 2	1.4999	0.8016	2.3015	2.0458

Accumulation shares		Net revenue	Equalisation	Interim distribution paid 15 June 2019	Interim distribution paid 15 June 2018
Class 3 Accumulation shares	Group 1	4.4368	–	4.4368	3.7960
	Group 2	2.3729	2.0639	4.4368	3.7960
Class A Accumulation shares	Group 1	2.0171	–	2.0171	1.7319
	Group 2	1.2569	0.7602	2.0171	1.7319

Interim distribution

Group 1 shares are those shares purchased at or before 5:00pm on 15 October 2018.

Group 2 shares are those shares purchased after 5:00pm on 15 October 2018.

Equalisation

Equalisation applies only to Group 2 shares, in other words shares purchased during the relevant period. It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

AVIVA INVESTORS UK LISTED EQUITY INCOME FUND

(PREVIOUSLY AVIVA INVESTORS UK EQUITY INCOME FUND)

INVESTMENT OBJECTIVE

The Fund aims to deliver an income return of at least 110% of the income return of the FTSE® All Share Index over any given 12-month period, whilst also aiming to grow your investment over the long term (5 years or more) by investing in shares of UK companies.

Both the income and return aims are measured before the deduction of Fund charges and tax.

INVESTMENT POLICY

Core investment: At least 80% of the Fund will be invested in shares of UK companies (incorporated or domiciled in the UK), or non UK companies which are listed in the UK or which have significant trading activities in the UK.

Other investments: The Fund may also invest in other shares, other funds (including funds managed by Aviva Investors companies), cash and deposits.

Strategy: The Fund is actively managed, and the Investment Manager will adopt a high conviction approach (a strong belief), with a particular focus on “cash compounding” companies. These are typically mature companies which benefit from high barriers to entry given their competitive position in their industry, which we believe will offer good to high returns, and generate stable cash flows which will either be returned to investors as income or re-invested into the company to generate future dividends. The Investment Manager is also likely to invest in companies with a focus on the potential future cash flow growth they will generate, and their perceived ability to steadily grow their dividends, while showing what we believe to be financial strength and/or low levels of debt, with a strong management capability. In addition, the Investment Manager is likely to identify companies which are out of favour at a particular point in time, but where there is a specific opportunity for the company to increase their future cash flows, and therefore potentially increase their dividends in the future.

Environmental, Social & Governance (ESG) factors: ESG factors are integrated into the investment process and are considered alongside a range of financial metrics and research, but the Investment Manager retains discretion over which investments are selected. We also actively engage with companies and use voting rights with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in the prospectus.

Performance & Risk Measurement: The Fund's income return target is measured against the FTSE® All Share Index (the “Index”). The Fund's overall performance is also compared against the Index.

The Fund does not base its investment process upon the Index, so will not hold every company in the Index and may also hold companies that do not form part of it.

The Fund uses a “tracking error” to measure the consistency of the Fund's returns and the returns of the Index. In general, the lower the tracking error, the more consistent the Fund's returns are relative to the Index, and vice-versa. The Fund is expected to have an average yearly tracking error of between 2% and 6% when compared to the Index. In certain conditions the Fund may be outside of this range.

The Index represents the performance of all eligible companies listed on the London Stock Exchange, and 98% of the UK's market capitalisation (total market value of a company's outstanding shares).

The Index has been selected as a benchmark for the income target and for performance and risk measurement because it is representative of the type of companies in which the Fund is likely to invest, and it is therefore an appropriate target in relation to the income return and as a comparator for the Fund's overall performance.

FUND MANAGER'S REPORT

Performance

Over the twelve months ended 15 October 2019, the Aviva Investors UK Listed Equity Income Fund delivered a total return of 8.73% (share class 1), net of fees. The Fund's benchmark, the FTSE® All Share Index, returned 7.70%.

Market Review

The UK equity market has struggled to make progress over the reporting period with various headwinds undermining investor sentiment. The fourth quarter of 2018 saw weak markets globally, which was precipitated by US Federal Reserve (Fed) Chairman Jerome Powell cautioning in early October that the central bank was still a long way from returning interest rates to a neutral level, implying monetary policy would tighten further in 2019. This impacted equity market sentiment across the world, and in the UK it was highly valued companies in particular which came under pressure as 2018 ended. In early 2019, with global economic data softening and the uncertainty of trade wars escalating between the US and China, the Fed signalled an abrupt change in policy and stepped back from interest rate hikes, which led to a broad-based rally across the UK equity market during the first quarter of 2019. Given concerns over the impact of the US-China trade dispute and signs of softer US economic data, the Fed subsequently sanctioned two rate cuts in July and September. In China, economic growth decelerated to its lowest rate since 1992 during the third quarter, while the European Central Bank launched a new package of stimulus measures in an effort to tackle low growth and low inflation in the Eurozone.

However, the main factor which has accounted for the underperformance of UK equities in comparison with global indices was uncertainty over Brexit negotiations and scepticism amongst investors globally that the UK's withdrawal from the European Union can be resolved in a timely and efficient manner. Indeed, it remains highly uncertain as to how, and indeed when, the UK's withdrawal will be executed. This has had negative repercussions for the UK economy, with companies reticent to sign off long term investment projects, hiring freezes being witnessed and the housing market stuck in the doldrums. Although inventory building amongst UK businesses as a contingency measure against a disorderly Brexit boosted economic growth during the opening months of 2019, subsequently the UK economy shrank during the second quarter for the first time in almost seven years, as stockpiling activity slowed and Brexit uncertainty intensified against a backdrop of weaker global growth.

AVIVA INVESTORS UK LISTED EQUITY INCOME FUND (CONTINUED)

FUND MANAGER'S REPORT (CONTINUED)

Increased perceived risks of a UK and/or global recession have been the key drivers of share price performance over the reporting period, overriding relative company valuations. Most notably, valuations amongst economically sensitive and domestically-focused stocks remain extremely depressed due to concerns over the risk of a pronounced economic slowdown, particularly in the event of a disorderly Brexit but also the impact of a prolonged US-led trade war.

On a more positive note, ongoing merger and acquisition activity, which has not solely been confined to larger, more liquid stocks, has been a feature of the UK equity market over the last 12 months. A combination of sterling weakness, attractive valuations and the low cost of debt finance have provided an accommodating backdrop for acquisitive corporations and private equity investors.

Fund Review

The Fund outperformed its benchmark over the reporting period. The main contributory factor was stock selection in the financials sector, where we have identified several attractive investment opportunities. Holdings in Pheonix Group and Intermediate Capital performed well. Life insurance group Phoenix raised its cash generation targets following the acquisition of Standard Life Aberdeen's (SLA) open-book insurance business, allowing management to raise the company's final dividend payment for 2018. More recently, Phoenix's recent interim results had revealed synergies from last year's acquisition of Standard Life Aberdeen's assurance business, while better than expected cash generation led management to guide towards the top end of their forecasted range for 2019 as a whole. Intermediate Capital, a specialist asset manager which invests across a range of debt, private equity and real estate through closed-ended funds, continues to beat AUM (assets under management) raising targets, launch new vintages and has the seemingly unique ability to increase fees. The company has been very successful at matching investor appetite for alternative assets with strong capital demand from underfunded small and medium-sized companies.

Other notable contributors during the period included Sage. The software group reported a rise in quarterly sales at the beginning of 2019, as the company is moving from a licence-based business to subscriptions, while growth in its North American business has been encouraging. Subsequently, the shares fell back in July after the company announced a decline in software revenues but we remain positive on the long-term prospects for the business as the company's strategy remains broadly on track. Positioning in the mining sector also contributed positively to the Fund's performance as our holding in mining group BHP gained ground on iron ore price strength following Rio Tinto's cut in production, while we avoided Glencore which announced that earnings had been badly hit by weak metals prices, particularly copper and cobalt, during the first half of 2019.

Detractors during the reporting period included holdings in Imperial Tobacco and Cineworld, as well as not holding AstraZeneca. Imperial cautioned that the backlash against vaping and e-cigarettes in the US would have a negative impact on revenues. This lower revenue guidance came shortly after Philip Morris called off talks on a \$200 billion merger with US peer Altria. Cineworld's shares underperformed on weak admission data, which we believe is a timing issue given the year-on-year difference in the film slate releases. We added to our position, taking the view that the self-help story at US Chain Regal will be the bigger driver of sentiment as increasing evidence of this emerges in the coming 12-18 months. Amongst pharmaceuticals, not owning AstraZeneca in particular has continued to be a drag on relative performance given its size in the benchmark. Despite the company's impressive drugs pipeline, we were deterred by its high valuation.

We took advantage of periods of market weakness to add to several holdings in industrial companies such as engineering group IMI, equipment leasing firm Ashtead, turnaround specialist Melrose, packaging group DS Smith, airport services business BBA Aviation and brick manufacturer Ibstock. We started a new position in Ultra Electronics, the defence & aerospace, security, transport and energy company. We have a long-term positive view on defence spending and we believe there is a self-help opportunity at Ultra under a new CEO to focus more on its defence electronics business, which may see other divisions sold off. Subsequently, the company's interim results highlighted that US defence spending buoyed revenues in the aerospace and communications divisions, as well as the company citing a strong order book for the second half.

Amongst financials, we increased our position in Close Brothers, a leading UK specialist financial services group. We believe they are a consistent, high margin, high return business that has a track record of delivering loan book growth through the cycle. Following periods of negative UK political sentiment, we took the opportunity to capitalise on the company's attractive valuation.

We sold our position in HSBC, as we believe the bank's net interest margin will remain under pressure.

Amongst consumer stocks, we exited our position in Ted Baker following a profit warning that mainly stemmed from higher-than-anticipated discounting affecting gross margins. Whilst we believe competitors are struggling to match Ted Baker's fashion range and e-commerce presence, the wider negative sentiment around the UK retail sector and consumer demand has provided strong headwinds in this upper tier of high street fashion. We believe this difficult trading environment will persist over the medium term.

AVIVA INVESTORS UK LISTED EQUITY INCOME FUND (CONTINUED)

FUND MANAGER'S REPORT (CONTINUED)

Outlook

Looking forward, Brexit and global trade risks will continue to weigh heavily on the UK equity market although we believe the valuations of UK domestic-oriented stocks are now virtually discounting all but the worst-case Brexit scenario. The UK equity market continues to trade at a valuation discount to global peers, due to overhanging macroeconomic and Brexit-related uncertainties holding back investor flows, which is providing multiple stock-specific opportunities. Our approach continues to look through short-term market volatility and invest based on company fundamentals, with a rigorous focus on cash and valuation discipline.

Synthetic Risk and Reward Indicator

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- The level of targeted income is not guaranteed and may not be achieved.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at www.avivainvestors.com or from the ACD on request.

§ The share class was closed on 1 June 2018.

◊ This share class was launched on 30 September 2019.

‡ The operating charges are calculated on an ex-post basis and as such may differ from the Ongoing Charge Figure where:

(a) Changes to fee rates were made during the year and the Ongoing Charge Figure has been amended to be future proofed for this change.

(b) The Ongoing Charge has been annualised for a share class that has not yet been open for a full year.

The direct transaction costs have been stated after deducting, in the case of single-priced funds, the proportion of the amounts collected from dilution adjustments or dilution levies that relates to direct transaction costs and, in the case of dual-priced funds, the amounts collected in relation to direct transaction costs added to, or subtracted from, the valuations by virtue of COLL 6.3.6 G (4).

≈ The high and low prices disclosed are the high and low prices for the accounting period and not the calendar year. The net asset value per share price is based on the net asset value in the published accounts and may be different due to post year end accounting adjustments.

Ongoing Charges Figure*

Share class	15.10.19	15.10.18
Class 1	1.00%	1.00%
Class 2	0.81%	0.81%
Class 3	0.32%	0.32%
Class 4	0.45%	–

* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the year. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as “synthetic charges” or the “synthetic” part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme. The OCF for share class 1, when aggregated with certain other payments out of scheme property incurred in respect of it, is capped at 1.00%. Please see the Prospectus for full details.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

NOTES TO THE FINANCIAL STATEMENTS

1 Accounting basis and policies

Please see pages 8 to 10 for accounting basis and policies.

2 Net capital gains/(losses)

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Net capital gains/(losses) on investments during the year comprise:		
Currency losses	(1)	(5)
Expenses relating to the purchase and sale of investments	–	(2)
Non-derivative securities gains/(losses)	45,275	(87,223)
Net capital gains/(losses)	45,274	(87,230)

3 Revenue

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Bank and deposit interest	14	78
Interest on debt securities	115	16
Overseas dividends	1,120	3,167
Property income distributions	1,438	338
UK dividends	42,085	39,242
Underwriting commission	9	–
Total revenue	44,781	42,841

4 Expenses

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Payable to the Authorised Corporate Director ("ACD"), associates of the ACD or agents of either of them:		
Fund Management Fee/ACD's periodic charge*	5,553	5,470
Registration fees	–	170
	5,553	5,640
Payable to the Depositary, associates of the Depositary or agents of either of them:		
Depositary's fee	–	47
Interest payable	7	–
Safe custody fee	–	10
	7	57
Other expenses:		
Audit fee**	–	7
Printing and postage expenses	–	1
Statement fees	–	20
	–	28
Total expenses	5,560	5,725
Less those expenses rebated by the ACD	–	(13)
Total expenses	5,560	5,712

* From 4 June 2018 the Fund changed to a single fixed charge known as the Fund Management Fee (FMF). The FMF covers fees and expenses in relation to the operation and administration of the Company and the Fund.

** The audit fee was £9,455 (2018: £9,091) net of VAT. With effect from 4 June 2018, the audit fee was no longer accrued for separately and now forms part of the FMF.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

5 Taxation**a Analysis of tax charge**

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Adjustments in respect of prior period	(70)	–
Overseas tax suffered	(13)	1
Total current tax (see note 5b)	(83)	1

b Factors affecting current tax charge

The tax assessed for the year is lower (2018: lower) than the standard rate of corporation tax in the UK for an Authorised Investment Fund (20%) (2018: 20%).

The differences are explained below:

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Net revenue before taxation	39,221	37,129
Corporation tax at 20%	7,844	7,426
Effects of:		
Adjustments in respect of prior period	(70)	–
Movement in excess management expenses	797	871
Overseas dividends not subject to corporation tax	(224)	(634)
Overseas tax suffered	(13)	1
UK dividends not subject to corporation tax	(8,417)	(7,663)
Current tax charge (see note 5a)	(83)	1

Authorised Investment Funds are exempt from tax on capital gains. Therefore, any capital return is not included in the above reconciliation.

c Deferred tax

There was no provision for deferred tax at the year end (2018: £nil).

After claiming relief against accrued income taxable on receipt, the Fund has unrelieved excess expenses of £59,595,729 (2018: £55,612,630) creating a potential deferred tax asset of £11,919,146 (2018: £11,122,526). It is unlikely that the Fund will generate taxable profits in the future to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

6 Distributions

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:		
Interim distribution	19,444	18,735
Final distribution	25,148	23,877
	44,592	42,612
Add: Revenue deducted on cancellation of shares	993	762
Deduct: Revenue received on issue of shares	(1,038)	(984)
Total distributions	44,547	42,390
Reconciliations of distributions for the year to net revenue after taxation		
Distributions for the year	44,547	42,390
Fund Management Fee/ACD's periodic charge borne by the capital account	(5,553)	(5,471)
Equalisation on conversions	–	(6)
Tax relief on capitalised ACD's periodic charge	311	214
Undistributed revenue brought forward	(1)	–
Undistributed revenue carried forward	–	1
Net revenue after taxation	39,304	37,128

Details of the distributions per share are set out in the distribution tables on page 58 and 59.

7 Fair value hierarchy

Valuation technique	Assets at 15.10.19 £000	Assets at 15.10.18 £000
Level 1: Quoted prices	958,504	920,015
Level 2: Observable market data	22,500	–
Total value	981,004	920,015

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities.

The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority to unobservable inputs. Disclosure is required of the value in each category in order to give an insight into the extent to which fair value measurements are subjective.

The disclosure is split into the following categories:

Level 1: Unadjusted quoted price in an active market for an identical instrument;

Level 2: Valuation techniques using observable inputs other than quoted prices within level 1;

Level 3: Valuation techniques using unobservable inputs.

8 Debtors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued revenue	1,876	1,723
Amounts receivable on issue of shares	1,142	427
Income tax recoverable	9	–
Overseas tax recoverable	–	38
Total debtors	3,027	2,188

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

9 Cash and bank balances

	As at 15.10.19 £000	As at 15.10.18 £000
Cash and bank balances	363	14,989
Total cash and bank balances	363	14,989

10 Other creditors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued expenses	238	675
Amounts payable for cancellation of shares	751	518
Purchases awaiting settlement	–	156
Total other creditors	989	1,349

11 Contingent liabilities and commitments

There were no contingent liabilities or commitments at the year end (2018: £nil).

12 Related party transactions

Aviva Investors UK Fund Services Limited, Aviva Investors Global Services Limited and the Aviva Group are deemed to be related parties per section 33.10 of FRS 102 as they are entities with control, joint control or significant influence over the entity.

Fund Management Fee/ACD periodic charge paid to Aviva Investors UK Fund Services Limited ("the ACD") are shown in note 4 and details of shares issued and cancelled by the ACD are shown in the statement of change in net assets attributable to shareholders. The balance due to the ACD at the year end in respect of Fund Management Fee/ACD periodic charge was £237,589 (2018: £675,396). Any balance due from the ACD in respect of issues is shown in note 8. Any balance due to the ACD in respect of cancellations is shown in note 10.

Distributions payable to the ACD and related parties of the ACD during the year amounted to £24,169,249 (2018: £25,280,135). The amount outstanding at the year end was £12,666,696 (2018: £14,339,370). Related parties of the ACD are deemed to be all companies under the control of Aviva Plc. This will include companies which hold shares in the Fund on behalf of other external investors.

Any investments managed and advised by Aviva Investors Global Services Limited or associated with the Aviva Group are identified on the portfolio statement.

The total purchases and sales on these investments during the year amounted to £243,100,000 (2018: £67,170,734) and £220,600,000 (2018: £109,106,951) respectively. The income received during the year amounted to £115,355 (2018: £1,055,456).

Holdings at the year end and movements during the year are as follows:

	Holdings at 15.10.19 (shares)	Movement (shares)	Holdings at 15.10.18 (shares)
ACD and related parties (Class 1 Income shares)	14,620	(30,862)	45,482
ACD and related parties (Class 2 Income shares)	5,361,097	160,821	5,200,276
ACD and related parties (Class 3 Income shares)	225,393,858	(44,642,888)	270,036,746
ACD and related parties (Class 2 Accumulation shares)	5,063,968	277,359	4,786,609
ACD and related parties (Class 3 Accumulation shares)	2,210,974	(263,441)	2,474,415

The ACD and related parties of the ACD are ineligible to vote at any general meeting.

13 Shareholder funds

The Fund currently has four share classes: Class 1 and 4 (Retail), Class 2 (Institutional) and Class 3 (Associated undertakings of Aviva Plc). The Fund Management Fees are as follows:

Class 1: 1.00%
Class 2: 0.81%
Class 3: 0.32%
Class 4: 0.45%

The net asset value of the share class, the net asset value per share and the number of shares in the class are shown on pages 43 to 45. The distributions per share are given in the distribution tables on page 58 and 59. All the share classes have the same rights on winding up.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

14 Shares in issue reconciliation

	Number of shares in issue at 15.10.18	Number of shares issued	Number of shares cancelled	Number of shares converted	Number of shares in issue at 15.10.19

Class 3 Accumulation shares	2,474,415	23,394	(286,835)	–	2,210,974

15 Derivatives and other financial instruments

The policies applied in the management of financial instruments are set out on pages 9 and 10.

Fair value of financial assets and financial liabilities

There is no significant difference between the carrying values of the financial assets and liabilities and their fair values (2018: £nil).

Currency risk

At the year end date, 0.03% (2018: 0.06%) of the net assets of the Fund were denominated in currencies other than sterling and as such the currency risk is not considered significant.

Interest rate risk

The Fund does not invest in either fixed or floating rate securities and interest rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions which will be affected by fluctuations in interest rates.

At the year end date 2.38% (2018: 1.64%) of the net assets of the Fund were interest bearing and as such the interest rate risk is not considered significant.

The floating rate on bank balances is linked to the Depositary's base rate.

The floating rate on deposits is linked to LIBOR or its overseas equivalent.

Market price risk

At the year end date, 102.12% (2018: 100.67%) of the net assets of the Fund were invested in ordinary shares or stock units or debt securities admitted to an official stock exchange. If the market value were to change by 10%, the value of the Fund would change by 10.21% (2018: 10.07%).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

16 Direct transaction costs

In the case of shares, broker commissions and transfer taxes, stamp duty is paid by the Fund on each transaction. In addition, there is a dealing spread between buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of the dealing spread.

Dealing spread

As at 15 October 2019, the average portfolio dealing spread was 0.12% (2018: 0.13%). This spread represents the difference between the values determined retrospectively by reference to the bid and offer prices of investments expressed as a percentage of the value determined by reference to the offer price.

17 Post balance sheet events

There are no post balance sheet events which require adjustment or disclosure at the year end (2018: £nil).

DISTRIBUTION TABLES

Final distribution payable in pence per share for the six months ended 15 October 2019

	Group 2	6.7130	0.0000	6.7130	6.5017
Class 4 Accumulation shares	Group 1	0.0000	–	0.0000	3.1554
	Group 2	0.0000	0.0000	0.0000	3.1554

Interim distribution

Group 1 shares are those shares purchased at or before 12:00 noon on 15 October 2018.

Group 2 shares are those shares purchased after 12:00 noon on 15 October 2018.

Equalisation

Equalisation applies only to Group 2 shares, in other words shares purchased during the relevant period. It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

AVIVA INVESTORS UK LISTED EQUITY UNCONSTRAINED FUND

(PREVIOUSLY AVIVA INVESTORS UK EQUITY FUND)

The name of the Fund was changed to the Aviva Investors UK Listed Equity Unconstrained Fund on 2 January 2019.

INVESTMENT OBJECTIVE

The Fund aims to grow your investment over the long term (5 years or more) by investing in shares of UK companies.

INVESTMENT POLICY

Core investment: At least 80% of the Fund will be invested in shares of UK companies, and non-UK companies which are listed in the UK or which have significant trading activities in the UK.

Other investments: The Fund may also invest in shares of unlisted companies, other funds (including funds managed by Aviva Investors companies), cash and deposits.

Strategy: The Fund is actively managed with an unconstrained investment style, allowing the Investment Manager the freedom to invest in selected companies of any size, and at any stage of the business cycle. This will include investing in market leading and mature companies with the potential for superior earnings growth and sustainable dividends respectively, as well as identifying companies which are out of favour at a particular point in time, but where there is a specific opportunity for the company's value to increase in the future.

The process for making investment decisions follows detailed analysis based on a wide range of financial metrics and research. This includes consideration of environmental, social and governance (ESG) criteria, but there are no specific ESG restrictions on the Investment Manager's decision making, which is determined in line with the Fund's objectives. Decisions are supported by active engagement with companies and use of voting rights, with the intention of positively influencing company behaviour to contribute to competitive returns. Further information regarding how we integrate ESG into our investment approach and how we engage with companies is available on our website and in the prospectus.

Performance & Risk Measurement: The Fund's performance is compared against the FTSE® All Share Index (the "Index").

The Fund's investment process is not constrained by the Index, so it will not hold every company in the Index and may also hold companies that do not form part of it.

The Fund uses a "tracking error" to measure the consistency between the Fund's returns and the returns of the Index. In general, the lower the tracking error, the more consistent the Fund's returns are relative to the Index, and vice-versa. The Fund is expected to have an average yearly tracking error of between 3% and 8% when compared to the Index. However, as the Fund is unconstrained by the range, it could operate outside of it and the Investment Manager has discretion on how best to position the Fund in seeking to achieve its outcome. Therefore the Fund's returns could be very similar to or very different from the Index.

FTSE® All Share Index represents the performance of all eligible companies listed on the London Stock Exchange, and 98% of the UK's market capitalisation (total market value of a company's outstanding shares).

The benchmark index has been selected for performance and risk measurement as the Fund's portfolio will be constructed by investing in shares included within the Index, and it is therefore an appropriate comparator for the Fund's performance.

FUND MANAGER'S REPORT

Performance

Over the twelve months ended 15 October 2019, the Aviva Investors UK Listed Equity Unconstrained Fund delivered a total return of 1.58% (share class 1), net of fees. The Fund's benchmark, the FTSE® All Share Index, returned 7.70%.

Market Review

The UK equity market has struggled to make progress over the reporting period with various headwinds undermining investor sentiment. The fourth quarter of 2018 saw weak markets globally, which was precipitated by US Federal Reserve (Fed) Chairman Jerome Powell cautioning in early October that the central bank was still a long way from returning interest rates to a neutral level, implying monetary policy would tighten further in 2019. This impacted equity market sentiment across the world, and in the UK it was highly valued companies in particular which came under pressure as 2018 ended. In early 2019, with global economic data softening and the uncertainty of trade wars escalating between the US and China, the Fed signalled an abrupt change in policy and stepped back from interest rate hikes, which led to a broad-based rally across the UK equity market during the first quarter of 2019. Given concerns over the impact of the US-China trade dispute and signs of softer US economic data, the Fed subsequently sanctioned two rate cuts in July and September. In China, economic growth decelerated to its lowest rate since 1992 during the third quarter, while the European Central Bank launched a new package of stimulus measures in an effort to tackle low growth and low inflation in the Eurozone.

However, the main factor which has accounted for the underperformance of UK equities in comparison with global indices was uncertainty over Brexit negotiations and scepticism amongst investors globally that the UK's withdrawal from the European Union can be resolved in a timely and efficient manner. Indeed, it remains highly uncertain as to how, and indeed when, the UK's withdrawal will be executed. This has had negative repercussions for the UK economy, with companies reticent to sign off long term investment projects, hiring freezes being witnessed and the housing market stuck in the doldrums. Although inventory building amongst UK businesses as a contingency measure against a disorderly Brexit boosted economic growth during the opening months of 2019, subsequently the UK economy shrank during the second quarter for the first time in almost seven years, as stockpiling activity slowed and Brexit uncertainty intensified against a backdrop of weaker global growth.

Increased perceived risks of a UK and/or global recession have been the key drivers of share price performance over the reporting period, overriding relative company valuations. Most notably, valuations amongst economically sensitive and domestically-focused stocks remain extremely depressed due to concerns over the risk of a pronounced economic slowdown, particularly in the event of a disorderly Brexit but also the impact of a prolonged US-led trade war.

On a more positive note, ongoing merger and acquisition activity, which has not solely been confined to larger, more liquid stocks, has been a feature of the UK equity market over the last 12 months. A combination of sterling weakness, attractive valuations and the low cost of debt finance have provided an accommodating backdrop for acquisitive corporations and private equity investors.

AVIVA INVESTORS UK LISTED EQUITY UNCONSTRAINED FUND (CONTINUED)

FUND MANAGER'S REPORT (CONTINUED)

Fund Review

The main factor that detracted from Fund performance over the reporting period was exposure to several consumer stocks, most notably Thomas Cook, Ted Baker and Cineworld. Thomas Cook was the largest detractor after announcing a rescue deal with Chinese backer Forsun that would see it take a majority stake in the tour operating business and a minority stake in the airline business in exchange for £750m funding. Given previous reassurances we had received from management regarding the company's funding position, we were disappointed when this deal was announced and we exited this holding in July, prior to the company going into liquidation in September. Clothing store Ted Baker was a significant detractor following a profit warning that mainly stemmed from higher-than-anticipated discounting affecting gross margins. Wider negative sentiment around the UK retail sector and consumer spending are strong headwinds despite Ted Baker's brand awareness and e-commerce offering. Cineworld's shares underperformed on weak admission data, which we believe is a timing issue given the year-on-year difference in the film slate releases. We added to our position, taking the view that the self-help story at US Chain Regal will be the bigger driver of sentiment as increasing evidence of this emerges in the coming 12-18 months.

An underweight position in the pharmaceuticals sector also detracted over the reporting period. Not owning AstraZeneca in particular has continued to be a drag on relative performance given its size in the benchmark. Despite the company's impressive drugs pipeline, we were deterred by its high valuation. Likewise, an underweight position in GlaxoSmithKline also detracted. In the energy sector, our holding in oil services company Wood Group lost ground, although this was largely attributable to weakness in the oil price which accounted for the underperformance of the whole sector. The company maintained guidance on their debt, earmarking future disposals which should result in increased revenue growth and cash generation.

The main contributor was our holding in Mitchells & Butlers, the pub and restaurant group, which reported margin progress and outperformance on sales growth in the spring, and continued to perform well in the aftermath of a recent bid for peer Greene King from Hong Kong listed CKA Group. Post the strong performance, and due to the large position size, we subsequently trimmed our holding reflecting the company's higher valuation. Exposure to financials was also a contributory factor over the reporting period, notably holdings in Charter Court Financial Services and Intermediate Capital. Charter Court Financial Services a specialist UK-focused mortgage lender, posted solid annual results in February, prior to accepting a takeover offer from OneSavings Bank, which separately reported a strong increase in underlying pre-tax profit. Intermediate Capital, the alternative asset manager, surpassed lending targets, creating upward fee margin pressure as the demand for this asset class increases. The company has been very successful at matching investor appetite for alternative assets with strong capital demand from underfunded small and medium-sized companies. Elsewhere, our holding in mining group BHP gained ground on iron ore price strength following Rio Tinto's cut in production.

We took advantage of periods of market weakness to add to several holdings where the fundamental investment case remains intact notably housebuilder Bellway, Cineworld – highlighted above, airline IAG, construction group Morgan Sindall, OneSavings Bank and Wood Group. We trimmed holdings in equipment leasing specialist Ashtead and gaming group 888 to realise some gains and rebalance the risk profile of the Fund. We participated in the IPO of travel booking app Trainline. As the dominant player in the rail industry, we were attracted by prospects for growth in both the UK and Europe through new product innovation, geographic expansion, and the shift to online bookings. We subsequently exited our position after the share price appreciation since the IPO more fully reflected the future opportunities for the business.

During the third quarter of 2019 we started a new position in FTSE® 250 engineered ceramics company, Vesuvius. We believe they will continue to benefit from the delivery of manufacturing efficiencies, improving margins more than the market consensus, on growing revenue. We also added new holdings in Grafton and Future. The share price of Grafton, the international distributor of building materials, had been weak on slowing like-for-like growth from 2018 weather distortion. We believe the market is underappreciating the growth from higher margin areas of the business, which either operates in a niche or is a market leader. Future is a media business with focus on special interest magazine and websites. We see a significant opportunity for subscriber and price growth in the UK and US markets, which should generate cash flow growth ahead of market expectations.

Outlook

Looking forward, Brexit and global trade risks will continue to weigh heavily on the UK equity market although we believe the valuations of UK domestic-oriented stocks are now virtually discounting all but the worst-case Brexit scenario. The Fund is managed using an unconstrained best ideas approach – actively taking high conviction positions where we believe that we have identified a difference to the consensus view sentiment. The UK equity market continues to trade at a valuation discount to global peers due to overhanging macroeconomic and Brexit-related uncertainties holding back investor flows, which is providing multiple stock-specific opportunities. The portfolio is constructed with a diverse range of holdings driven by fundamental insights. Currently, the overall portfolio has a lower forecast P/E ratio (price earnings ratio) and a higher running dividend yield than the UK equity market as a whole.

Synthetic Risk and Reward Indicator

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at www.avivainvestors.com or from the ACD on request.

§ The share class was closed on 1 June 2018.

‡ The operating charges are calculated on an ex-post basis and as such may differ from the Ongoing Charge Figure where:

(a) Changes to fee rates were made during the year and the Ongoing Charge Figure has been amended to be future proofed for this change.

(b) The Ongoing Charge has been annualised for a share class that has not yet been open for a full year.

The direct transaction costs have been stated after deducting, in the case of single-priced funds, the proportion of the amounts collected from dilution adjustments or dilution levies that relates to direct transaction costs and, in the case of dual-priced funds, the amounts collected in relation to direct transaction costs added to, or subtracted from, the valuations by virtue of COLL 6.3.6 G (4).

≈ The high and low prices disclosed are the high and low prices for the accounting period and not the calendar year and are based on published prices. The net asset value per share price is based on the net asset value in the published accounts and may be different due to post year end accounting adjustments.

Ongoing Charges Figure*

Share class	15.10.19	15.10.18
Class 1	1.00%	1.00%
Class 2	0.82%	0.82%
Class 3	0.32%	0.32%

* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the year. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme. The OCF for share class 1, when aggregated with certain other payments out of scheme property incurred in respect of it, is capped at 1.00%. Please see the Prospectus for full details.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

NOTES TO THE FINANCIAL STATEMENTS

1 Accounting basis and policies

Please see pages 8 to 10 for accounting basis and policies.

2 Net capital losses

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Net capital losses on investment during the year comprise:		
Currency losses	(24)	(2)
Expenses relating to the purchase and sale of investments	–	(2)
Non-derivative securities losses	(1,083)	(20,373)
Net capital losses	(1,107)	(20,377)

3 Revenue

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Bank and deposit interest	4	2
Interest on debt securities	56	43
Overseas dividends	2,068	424
Property income distributions	33	127
UK dividends	7,740	7,924
Total revenue	9,901	8,520

4 Expenses

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Payable to the Authorised Corporate Director ("ACD"), associates of the ACD or agents of either of them:		
Fund Management Fee/ ACD Periodic Charges*	1,926	2,208
Registration fees	–	46
	1,926	2,254
Payable to the Depositary, associates of the Depositary or agents of either of them:		
Depositary's fee	–	20
Interest payable	2	–
Safe custody fee	–	3
	2	23
Other expenses:		
Audit fee**	–	7
Printing and postage expenses	–	1
Statement fee	–	6
	–	14
Total expenses	1,928	2,291
Less those expenses rebated by the ACD	–	(24)
Net expenses	1,928	2,267

* From 4 June 2018 the Fund changed to a single fixed charge known as the Fund Management Fee (FMF). The FMF covers fees and expenses in relation to the operation and administration of the Company and the Fund.

** The audit fee was £9,455 (2018: £9,091) net of VAT. With effect from 4 June 2018, the audit fee was no longer accrued for separately and now forms part of the FMF.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

5 Taxation**a Analysis of tax charge**

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Overseas tax suffered	30	–
Total current tax (see note 5b)	30	–

b Factors affecting current tax charge

The tax assessed for the year is lower (2018: lower) than the standard rate of corporation tax in the UK for an Authorised Investment Fund (20%) (2018: 20%).

The differences are explained below:

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Net revenue before taxation	7,973	6,253
Corporation tax at 20%	1,595	1,251
Effects of:		
Movement in excess management expenses	367	419
Overseas dividends not subject to corporation tax	(414)	(85)
Overseas tax suffered	30	–
UK dividends not subject to corporation tax	(1,548)	(1,585)
Current tax charge (see note 5a)	30	–

Authorised Investment Funds are exempt from tax on capital gains. Therefore, any capital return is not included in the above reconciliation.

c Deferred tax

There was no provision for deferred tax at the year end (2018: £nil).

After claiming relief against accrued income taxable on receipt, the Fund has unrelieved excess expenses of £51,459,554 (2018: £49,624,968) creating a potential deferred tax asset of £10,291,911 (2018: £9,924,994). It is unlikely that the Fund will generate taxable profits in the future to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

6 Distributions

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:		
Interim distribution	3,067	2,791
Final distribution	4,613	3,581
	7,680	6,372
Add: Revenue deducted on cancellation of shares	304	87
Deduct: Revenue received on issue of shares	(41)	(197)
Total distributions	7,943	6,262
Reconciliations of distributions for the year to net revenue after taxation		
Distributions for the year	7,943	6,262
Equalisation on conversions	–	(9)
Net revenue after taxation	7,943	6,253

Details of the distributions per share are set out in the distribution tables on page 76.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

7 Fair value hierarchy

Valuation technique	Assets at 15.10.19 £000	Assets at 15.10.18 £000
Level 1: Quoted prices	186,821	213,123
Level 2: Observable market data	6,000	11,800
Total value	192,821	224,923

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities.

The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority to unobservable inputs. Disclosure is required of the value in each category in order to give an insight into the extent to which fair value measurements are subjective.

The disclosure is split into the following categories:

Level 1: Unadjusted quoted price in an active market for an identical instrument;

Level 2: Valuation techniques using observable inputs other than quoted prices within level 1;

Level 3: Valuation techniques using unobservable inputs.

8 Debtors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued revenue	765	592
Amounts receivable on issue of shares	95	233
Overseas tax recoverable	47	–
Sales awaiting settlement	370	500
Total debtors	1,277	1,325

9 Cash and bank balances

	As at 15.10.19 £000	As at 15.10.18 £000
Cash and bank balances	1,126	7,634
Total cash and bank balances	1,126	7,634

10 Other creditors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued expenses	71	271
Amounts payable for cancellation of shares	477	201
Purchases awaiting settlement	459	2,686
Total other creditors	1,007	3,158

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

11 Contingent liabilities and commitments

There were no contingent liabilities or commitments at the year end (2018: £nil).

12 Related party transactions

Aviva Investors UK Fund Services Limited, Aviva Investors Global Services Limited and the Aviva Group are deemed to be related parties per section 33.10 of FRS 102 as they are entities with control, joint control or significant influence over the entity.

Fund Management Fee/ACD periodic charges paid to Aviva Investors UK Fund Services Limited ("the ACD") are shown in note 4 and details of shares issued and cancelled by the ACD are shown in the statement of change in net assets attributable to shareholders. The balance due to the ACD at the year end in respect of Fund Management Fee/ACD periodic charges was £70,823 (2018: £271,048). Any balance due from the ACD in respect of issues is shown in note 8. Any balance due to the ACD in respect of cancellations is shown in note 10.

Distributions payable to the ACD and related parties of the ACD during the year amounted to £525,991 (2018: £214,278). The amount outstanding at the year end was £306,282 (2018: £123,120). Related parties of the ACD are deemed to be all companies under the control of Aviva Plc. This will include companies which hold shares in the Fund on behalf of other external investors.

Any investments managed and advised by Aviva Investors Global Services Limited or associated with the Aviva Group are identified on the portfolio statement.

The total purchases and sales on these investments during the year amounted to £132,400,341 (2018: £73,900,000) and £138,200,341 (2018: £88,100,000) respectively. The income received during the year amounted to £56,094 (2018: £43,481).

Holdings at the year end and movements during the year are as follows:

	Holdings at 15.10.19 (shares)	Movement (shares)	Holdings at 15.10.18 (shares)
ACD and related parties (Class 1 Income shares)	868	(11,858)	12,726
ACD and related parties (Class 2 Income shares)	972,457	(251,546)	1,224,003
ACD and related parties (Class 3 Income shares)	2,672,209	(277,512)	2,949,721
ACD and related parties (Class 2 Accumulation shares)	1,452,418	(500,761)	1,953,179

The ACD and related parties of the ACD are ineligible to vote at any general meeting.

13 Shareholder funds

The Fund currently has three share classes: Class 1 (Retail), Class 2 (Institutional) and Class 3 (Associated undertakings of Aviva Plc). The Fund Management Fees are as follows:

Class 1: 1.00%
Class 2: 0.82%
Class 3: 0.32%

The net asset value of the share class, the net asset value per share and the number of shares in the class are shown on pages 63 and 64. The distributions per share are given in the distribution tables on page 76. All the share classes have the same rights on winding up.

14 Shares in issue reconciliation

	Number of shares in issue at 15.10.18	Number of shares issued	Number of shares cancelled	Number of shares converted	Number of shares in issue at 15.10.19
Class 1 Income shares	126,468,272	4,042,713	(8,925,582)	(216,612)	121,368,791
Class 2 Income shares	19,036,856	751,888	(4,343,157)	176,630	15,622,217
Class 3 Income shares	2,949,721	103,525	(381,037)	–	2,672,209
Class 2 Accumulation shares	16,663,945	527,485	(9,647,586)	–	7,543,844

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

15 Derivatives and other financial instruments

The policies applied in the management of financial instruments are set out on pages 9 and 10.

Fair value of financial assets and financial liabilities

There is no significant difference between the carrying values of the financial assets and liabilities and their fair values (2018: £nil).

Currency risk

At the year end date, 0.64% (2018: 0.04%) of the net assets of the Fund were denominated in currencies other than sterling and as such the currency risk is not considered significant.

Interest rate risk

The Fund does not invest in either fixed or floating rate securities and interest rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions which will be affected by fluctuations in interest rates.

At the year end date 3.75% (2018: 8.53%) of the net assets of the Fund were interest bearing and as such the interest rate risk is not considered significant.

Market price risk

At the year end date, 101.41% (2018: 98.69%) of the net assets of the Fund were invested in ordinary shares or stock units or debt securities admitted to an official stock exchange. If the market value were to change by 10%, the value of the Fund would change by 10.14% (2018: 9.87%).

16 Direct transaction costs

In the case of shares, broker commissions and transfer taxes, stamp duty is paid by the Fund on each transaction. In addition, there is a dealing spread between buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of the dealing spread.

15.10.19	Principal before costs £000	Commissions £000	Taxes £000	Total after costs £000	Commissions as % of principal	Taxes as % of principal

Dealing spread

As at 15 October 2019, the average portfolio dealing spread was 0.15% (2018: 0.13%). This spread represents the difference between the values determined retrospectively by reference to the bid and offer prices of investments expressed as a percentage of the value determined by reference to the offer price.

17 Post balance sheet events

There are no post balance sheet events which require adjustment or disclosure at the year end (2018: £nil).

DISTRIBUTION TABLES

Final distribution payable in pence per share for the six months ended 15 October 2019

Income shares		Net revenue	Equalisation	Final distribution payable 15 December 2019	Final distribution paid 15 December 2018
Class 1 Income shares	Group 1	2.7644	–	2.7644	1.7766
	Group 2	1.8146	0.9498	2.7644	1.7766

	Group 2	0.0000	0.0000	0.0000	1.3505

Accumulation shares		Net revenue	Equalisation	Interim distribution paid 15 June 2019	Interim distribution paid 15 June 2018
Class 2 Accumulation shares	Group 1	4.5071	–	4.5071	3.6665
	Group 2	3.6902	0.8169	4.5071	3.6665

Interim distribution

Group 1 shares are those shares purchased at or before 12:00 noon on 15 October 2018.

Group 2 shares are those shares purchased after 12:00 noon on 15 October 2018.

Equalisation

Equalisation applies only to Group 2 shares, in other words shares purchased during the period. It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

AVIVA INVESTORS UK LISTED SMALL AND MID-CAP FUND

(PREVIOUSLY AVIVA INVESTORS UK GROWTH FUND)

The name of the Fund was changed to the Aviva Investors UK Listed Small and Mid-Cap Fund on 2 January 2019.

INVESTMENT OBJECTIVE

The Fund aims to grow your investment over the long term (5 years or more) by investing in shares of small and medium sized UK companies.

INVESTMENT POLICY

Core investment: At least 80% of the Fund will be invested in shares of UK companies, or non-UK companies which are listed in the UK or which have significant trading activities in the UK.

Other investments: The Fund may also invest in shares of unlisted companies, other funds (including funds managed by Aviva Investors companies), cash and deposits.

Strategy: The Fund is actively managed, and the Investment Manager will focus investment on small and medium sized companies which are deemed to be undervalued by the market. This approach concentrates on companies that are considered to have growth, quality or recovery characteristics, as determined by where a company is in its lifecycle. Growth can come from being in a growing sector, gaining market share, or as a result of industry consolidation. Quality can be defined as companies with market leading products or services, with the potential for stable profits and strong cash generation. A company's potential for recovery could be as a result of management change, or a change in strategic direction.

The process for making investment decisions follows detailed analysis based on a wide range of financial metrics and research. This includes consideration of environmental, social and governance (ESG) criteria, but there are no specific ESG restrictions on the Investment Manager's decision making, which is determined in line with the Fund's objectives. Decisions are supported by active engagement with companies and use of voting rights, with the intention of positively influencing company behaviour to contribute to competitive returns. Further information regarding how we integrate ESG into our investment approach and how we engage with companies is available on our website and in the prospectus.

Performance & Risk Measurement: The Fund's performance, is compared against the FTSE® 250 ex Investment Trust (the "Index").

The Fund does not base its investment process upon the Index, so will not hold every company in the Index and may also hold companies that do not form part of it.

The Fund uses a "tracking error" to measure the variation between the Fund's returns and the returns of the Index. In general, the lower the tracking error, the more closely the Index is tracked by the Fund, and vice-versa. The Fund is expected to have an average yearly tracking error of between 3% and 8% when compared to the Index. In certain conditions the Fund may be outside of this range.

FTSE® 250 ex Investment Trust Index is currently comprised of approximately 200 medium sized UK companies, as determined by their market capitalisation (total market value of a company's outstanding shares). The companies included on this Index have a market capitalisation between approximately £200 million and £5.5 billion.

The benchmark index has been selected for performance and risk measurement because it is representative of the type of companies in which the Fund is likely to invest, and it is therefore an appropriate comparator for the Fund's performance.

FUND MANAGER'S REPORT

Performance

Over the twelve months ended 15 October 2019, the Aviva Investors UK Listed Small and Mid-Cap Fund delivered a total return of 11.99%. The Fund's benchmark, the FTSE® 250 ex Investment Trust (the "Index"), returned 14.20%.

Market Review

The UK equity market has struggled to make progress over the reporting period with various headwinds undermining investor sentiment. The fourth quarter of 2018 saw weak markets globally, which was precipitated by US Federal Reserve (Fed) Chairman Jerome Powell cautioning in early October that the central bank was still a long way from returning interest rates to a neutral level, implying monetary policy would tighten further in 2019. This impacted equity market sentiment across the world, and in the UK it was highly valued companies in particular which came under pressure as 2018 ended. In early 2019, with global economic data softening and the uncertainty of trade wars escalating between the US and China, the Fed signalled an abrupt change in policy and stepped back from interest rate hikes, which led to a broad-based rally across the UK equity market during the first quarter of 2019. Given concerns over the impact of the US-China trade dispute and signs of softer US economic data, the Fed subsequently sanctioned two rate cuts in July and September. In China, economic growth decelerated to its lowest rate since 1992 during the third quarter, while the European Central Bank launched a new package of stimulus measures in an effort to tackle low growth and low inflation in the Eurozone.

However, the main factor which has accounted for the underperformance of UK equities in comparison with global indices was uncertainty over Brexit negotiations and scepticism amongst investors globally that the UK's withdrawal from the European Union can be resolved in a timely and efficient manner. Indeed, it remains highly uncertain as to how, and indeed when, the UK's withdrawal will be executed. This has had negative repercussions for the UK economy, with companies reticent to sign off long term investment projects, hiring freezes being witnessed and the housing market stuck in the doldrums. Although inventory building amongst UK businesses as a contingency measure against a disorderly Brexit boosted economic growth during the opening months of 2019, subsequently the UK economy shrank during the second quarter for the first time in almost seven years, as stockpiling activity slowed and Brexit uncertainty intensified against a backdrop of weaker global growth.

Increased perceived risks of a UK and/or global recession have been the key drivers of share price performance over the reporting period, overriding relative company valuations. Most notably, valuations amongst economically sensitive and domestically-focused stocks remain extremely depressed due to concerns over the risk of a pronounced economic slowdown, particularly in the event of a disorderly Brexit but also the impact of a prolonged US-led trade war.

AVIVA INVESTORS UK LISTED SMALL AND MID-CAP FUND (CONTINUED)

FUND MANAGER'S REPORT (CONTINUED)

On a more positive note, ongoing merger and acquisition activity, which has not solely been confined to larger, more liquid stocks, has been a feature of the UK equity market over the last 12 months. A combination of sterling weakness, attractive valuations and the low cost of debt finance have provided an accommodating backdrop for acquisitive corporations and private equity investors. This has boosted the performance of mid-cap stocks although smaller companies, which are perceived as being more exposed to the domestic economy, underperformed trailing both FSTE® 250 and FSTE® 100 constituents over the reporting period.

Fund Review

During the reporting period, the Fund changed strategy as of the 1st January 2019, from a multi-cap growth and quality focused mandate to one targeting UK small and mid-caps, with a corresponding benchmark change from the FSTE® All Share Index to the FSTE® 250 ex Investment Trusts Index. Accordingly, the Fund's name changed from the AI UK Growth Fund to the AI UK Listed Small and Mid-Cap Fund. Investors should be aware that this reporting period contains periods relating to the two different mandates. The Fund's mid-cap positioning skewed to growth companies caused volatility over the period given the FSTE® 250 Index, and growth as a style, underperformed during the fourth quarter of 2018. However, this trend reversed during the opening months of 2019 with a beneficial impact on fund performance.

A key contributor has been our holding in 4imprint, the supplier of imprinted promotional merchandise. 97% of the company's revenues derived from the US. 4imprint recently announced another strong period of trading, with organic revenue growth of 16% for the first half of the trading year. The company has a very strong track record of gaining market share, as they are one of very few operators of a sufficient size and scale to serve corporate America. In addition, we saw strong performance from Future PLC, a new addition to the Fund in April. Future is a special interest media company, which produces special interest websites, events and magazines amongst a variety of leisure sector with a significant opportunity for volume and yield growth both in the UK and US markets. We took advantage of the pullback in the share price to increase our holding, and subsequently the company upgraded earnings forecasts for the third time in four months in July.

CVS, the veterinary services company, was also a notable contributor. The company announced it was no longer seeing inflation in vets and nurse salaries while it had met planned costs targets, which coupled with a strong demand backdrop led to an upgrade versus previous financial expectations.

As noted above, merger and acquisition activity has been a prominent feature throughout the reporting period, and the Fund benefited from takeover activity focused on several holdings. Amongst financials, London Stock Exchange (LSE) agreed a deal to buy financial data analysis firm Refinitiv for US\$27 billion, and was subsequently itself the subject of an unsolicited takeover offer from the Hong Kong Stock Exchange. Pub operator EI Group received a bid from TDR Capital, the private equity owner of the Stonegate Pub company, having traded at a material discount to its net asset value for some time, while car auctioneer BCA Marketplace agreed to a takeover bid from private equity group TDR Capital.

Our holdings in Fever-Tree, Keywords Studios, Cineworld and Ted Baker detracted during the reporting period. Fever-Tree's sales slowed slightly as they faced very tough comparables from the hot weather this time last year. However, we continue to believe in the structural growth drivers behind their market leading high-end mixer drinks range and scalable business model which continues to aid international expansion. Keywords Studios provides services such as artworks and testing to the significantly expanding video gaming industry. The shares gave back some of their 2019 gains in September, following a short seller note and worries over near-term margin progression. However, as shown in the company's recent results, revenue growth remains well ahead of expectations and we believe this should facilitate longer term expansion. Cineworld's shares underperformed on weak admission data, which we believe is a timing issue given the year-on-year difference in the film slate releases. We added to our position, taking the view that the self-help story at US Chain Regal will be the bigger driver of sentiment as increasing evidence of this emerges in the coming 12-18 months. Clothing retailer Ted Baker issued a profit warning, which mainly stemmed from higher than anticipated discounting affecting gross margins. We exited our holding given our concerns about the company's ability to weather turbulent conditions in the apparel market.

Fund activity during the reporting year was focused on reducing exposure to large cap stocks, and increasing the emphasis on mid-caps and smaller companies. Accordingly, we exited our positions in BHP, Compass, Halma, Reckitt Benckiser, Vodafone and HSBC, while we partially sold our holding in Prudential.

New positions were started in SimplyBiz and Spectris. SimplyBiz is a compliance support company and we see greater regulation placed on IFAs and other financial institutions forcing them down the outsourcing route to specialists. Spectris enhances productivity for clients by combining hardware and software for use in technically demanding industrial applications. We believe the new CEO and company strategy will see high gross margins convert to future higher operating margins.

As the reporting period ended, we added new holdings in Euromoney, WH Smith and Meggitt. Euromoney's management is shifting the company significantly towards the higher growth and margin price reporting businesses. However, the market is focused on the near-term underperformance in asset management, despite this division currently being under strategic review and potentially non-core. We believe there is a significant opportunity for WH Smith's travel business, where the acquisition of InMotion could be the catalyst to unlocking the opportunity in US airports. We are positive on the prospects for cash flow growth ahead of consensus expectations at Meggitt, the aerospace and defence company.

AVIVA INVESTORS UK LISTED SMALL AND MID-CAP FUND (CONTINUED)

FUND MANAGER'S REPORT (CONTINUED)

Outlook

As we approach a potential resolution to Brexit that avoids 'no-deal' in favour of a more orderly withdrawal, we expect UK domestic mid-caps to be the main beneficiaries should sterling strengthen and UK growth expectations improve. We construct the portfolio based on a bottom-up, style agnostic, stock thesis with high conviction where we identify a market mispricing. Many of these investment opportunities are currently coming from contagion effects, such as in UK housing and gambling sectors, or where the growth outlook is underappreciated by the market, such as in digital marketing and fast growing niches within global health care.

Synthetic Risk and Reward Indicator

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at www.avivainvestors.com or from the ACD on request.

§ The share class was closed on 1 June 2018.

‡ The operating charges are calculated on an ex-post basis and as such may differ from the Ongoing Charge Figure where:

(a) Changes to fee rates were made during the year and the Ongoing Charge Figure has been amended to be future proofed for this change.

(b) The Ongoing Charge has been annualised for a share class that has not yet been open for a full year.

The direct transaction costs have been stated after deducting, in the case of single-priced funds, the proportion of the amounts collected from dilution adjustments or dilution levies that relates to direct transaction costs and, in the case of dual-priced funds, the amounts collected in relation to direct transaction costs added to, or subtracted from, the valuations by virtue of COLL 6.3.6 G (4).

≈ The high and low prices disclosed are the high and low prices for the accounting period and not the calendar year. The net asset value per share price is based on the net asset value in the published accounts and may be different due to post year end accounting adjustments.

Ongoing Charges Figure*

Share class	15.10.19	15.10.18
Class 1	1.00%	1.00%
Class 2	0.83%	0.83%
Class 3	0.33%	0.33%

* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the year. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme. The OCF for share class 1, when aggregated with certain other payments out of scheme property incurred in respect of it, is capped at 1.00%. Please see the Prospectus for full details.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

NOTES TO THE FINANCIAL STATEMENTS

1 Accounting basis and policies

Please see pages 8 to 10 for accounting basis and policies.

2 Net capital gains/(losses)

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Net capital gains/(losses) on investment during the year comprise:		
Currency losses	(1)	(2)
Expenses relating to the purchase and sale of investments	–	(1)
Non-derivative securities gains/(losses)	16,450	(12,218)
Net capital gains/(losses)	16,449	(12,221)

3 Revenue

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Bank and deposit interest	2	1
Interest on debt securities	39	17
Overseas dividends	539	133
Property income distributions	83	78
UK dividends	3,962	4,719
Total revenue	4,625	4,948

4 Expenses

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Payable to the Authorised Corporate Director ("ACD"), associates of the ACD or agents of either of them:		
Fund Management Fee/ ACD's periodic charge*	1,613	1,832
Registration fees	–	15
	1,613	1,847
Payable to the Depositary, associates of the Depositary or agents of either of them:		
Depositary's fee	–	16
Safe custody fee	–	2
	–	18
Other expenses:		
Audit fee**	–	7
Statement fees	–	4
	–	11
Total expenses	1,613	1,876
Less those expenses rebated by the ACD	–	(23)
Net expenses	1,613	1,853

* From 4 June 2018 the Fund changed to a single fixed charge known as the Fund Management Fee (FMF). The FMF covers fees and expenses in relation to the operation and administration of the Company and the Fund.

** The audit fee was £9,455 (2018: £9,091) net of VAT. With effect from 4 June 2018, the audit fee was no longer accrued for separately and now forms part of the FMF.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

5 Taxation**a Analysis of tax charge**

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Overseas tax suffered	9	5
Total current tax (see note 5b)	9	5

b Factors affecting current tax charge

The tax assessed for the year is lower (2018: lower) than the standard rate of corporation tax in the UK for an Authorised Investment Fund (20%) (2018: 20%).

The differences are explained below:

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Net revenue before taxation	3,012	3,095
Corporation tax at 20%	602	619
Effects of:		
Movement in excess management expenses	298	351
Overseas dividends not subject to corporation tax	(108)	(26)
Overseas tax suffered	9	5
UK dividends not subject to corporation tax	(792)	(944)
Current tax charge (see note 5a)	9	5

Authorised Investment Funds are exempt from tax on capital gains. Therefore, any capital return is not included in the above reconciliation.

c Deferred tax

There was no provision for deferred tax at the year end (2018: £nil).

After claiming relief against accrued income taxable on receipt, the Fund has unrelieved excess expenses of £35,750,612 (2018: £34,261,644) creating a potential deferred tax asset of £7,150,122 (2018: £6,852,329). It is unlikely that the Fund will generate taxable profits in the future to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

6 Distributions

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:		
Interim distribution	1,389	1,607
Final distribution	1,560	1,441
	2,949	3,048
Add: Revenue deducted on cancellation of shares	62	76
Deduct: Revenue received on issue of shares	(7)	(25)
Total distributions	3,004	3,099
Reconciliations of distributions for the year to net revenue after taxation		
Distributions for the year	3,004	3,099
Equalisation on conversions	(1)	(9)
Net revenue after taxation	3,003	3,090

Details of the distributions per share are set out in the distribution tables on page 94.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

7 Fair value hierarchy

Valuation technique	Assets at 15.10.19 £000	Assets at 15.10.18 £000
Level 1: Quoted prices	173,601	165,283
Level 2: Observable market data	2,700	1,300
Total value	176,301	166,583

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities.

The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority to unobservable inputs. Disclosure is required of the value in each category in order to give an insight into the extent to which fair value measurements are subjective.

The disclosure is split into the following categories:

Level 1: Unadjusted quoted price in an active market for an identical instrument;

Level 2: Valuation techniques using observable inputs other than quoted prices within level 1;

Level 3: Valuation techniques using unobservable inputs.

8 Debtors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued revenue	392	340
Amounts receivable on issue of shares	–	36
Income tax recoverable	2	–
Overseas tax recoverable	3	–
Sales awaiting settlement	128	–
Total debtors	525	376

9 Cash and bank balances

	As at 15.10.19 £000	As at 15.10.18 £000
Cash and bank balances	55	5,154
Total cash and bank balances	55	5,154

10 Other creditors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued expenses	65	216
Amounts payable for cancellation of shares	270	261
Total other creditors	335	477

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

11 Contingent liabilities and commitments

There were no contingent liabilities or commitments at the year end (2018: £nil).

12 Related party transactions

Aviva Investors UK Fund Services Limited, Aviva Investors Global Services Limited and the Aviva Group are deemed to be related parties per section 33.10 of FRS 102 as they are entities with control, joint control or significant influence over the entity.

Fund Management Fee / ACD paid to Aviva Investors UK Fund Services Limited ("the ACD") are shown in note 4 and details of shares issued and cancelled by the ACD are shown in the statement of change in net assets attributable to shareholders. The balance due to the ACD at the year end in respect of Fund Management Fee / ACD periodic charges was £64,697 (2018: £216,106). Any balance due from the ACD in respect of issues is shown in note 8. Any balance due to the ACD in respect of cancellations is shown in note 10.

Distributions payable to the ACD and related parties of the ACD during the year amounted to £291,566 (2018: £163,436). The amount outstanding at the year end was £151,085 (2018: £151,115). Related parties of the ACD are deemed to be all companies under the control of Aviva Plc. This will include companies which hold shares in the Fund on behalf of other external investors.

Any investments managed and advised by Aviva Investors Global Services Limited or associated with the Aviva Group are identified on the portfolio statement.

The total purchases and sales on these investments during the year amounted to £63,100,088 (2018: £35,200,000) and £63,537,681 (2018: £40,464,153) respectively. The income received during the year amounted to £130,879 (2018: £167,465).

Holdings at the year end and movements during the year are as follows:

	Holdings at 15.10.19 (shares)	Movement (shares)	Holdings at 15.10.18 (shares)
ACD and related parties (Class 3 Income shares)	4,122,967	(411,042)	4,534,009
ACD and related parties (Class 1 Accumulation shares)	4,177	(7,655)	11,832
ACD and related parties (Class 2 Accumulation shares)	368,113	(51,598)	419,711

The ACD and related parties of the ACD are ineligible to vote at any general meeting.

13 Shareholder funds

The Fund currently has three share classes: Class 1 (Retail), Class 2 (Institutional) and Class 3 (Associated undertakings of Aviva Plc). The Fund Management Fees are as follows:

Class 1: 1.00%
Class 2: 0.83%
Class 3: 0.33%

The net asset value of the share class, the net asset value per share and the number of shares in the class are shown on pages 80 and 81. The distributions per share are given in the distribution tables on page 94. All the share classes have the same rights on winding up.

14 Shares in issue reconciliation

	Number of shares in issue at 15.10.18	Number of shares issued	Number of shares cancelled	Number of shares converted	Number of shares in issue at 15.10.19
Class 3 Income shares	4,534,009	168,538	(579,580)	–	4,122,967
Class 1 Accumulation shares	80,571,409	557,781	(6,584,765)	(260,814)	74,283,611
Class 2 Accumulation shares	4,559,144	121,098	(716,177)	171,582	4,135,647

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

15 Derivatives and other financial instruments

The policies applied in the management of financial instruments are set out on pages 9 and 10.

Fair value of financial assets and financial liabilities

There is no significant difference between the carrying values of the financial assets and liabilities and their fair values (2018: £nil).

Currency risk

At the year end date, 0.04% (2018: 0.05%) of the net assets of the Fund were denominated in currencies other than sterling and as such the currency risk is not considered significant.

Interest rate risk

The Fund does not invest in either fixed or floating rate securities and interest rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions which will be affected by fluctuations in interest rates.

At the year end date 1.56% (2018: 3.76%) of the net assets of the Fund were interest bearing and as such the interest rate risk is not considered significant.

The floating rate on bank balances is linked to the Depositary's base rate.

The floating rate on deposits is linked to LIBOR or its overseas equivalent.

Market price risk

At the year end date, 99.94% (2018: 97.14%) of the net assets of the Fund were invested in ordinary shares or stock units or debt securities admitted to an official stock exchange. If the market value were to change by 10%, the value of the Fund would change by 9.99% (2018: 9.71%).

16 Direct transaction costs

In the case of shares, broker commissions and transfer taxes, stamp duty is paid by the Fund on each transaction. In addition, there is a dealing spread between buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of the dealing spread.

Dealing spread

As at 15 October 2019, the average portfolio dealing spread was 0.47% (2018: 0.34%). This spread represents the difference between the values determined retrospectively by reference to the bid and offer prices of investments expressed as a percentage of the value determined by reference to the offer price.

17 Post balance sheet events

There are no post balance sheet events which require adjustment or disclosure at the year end (2018: £nil).

DISTRIBUTION TABLES

Final distribution payable in pence per share for the six months ended 15 October 2019

Income shares		Net revenue	Equalisation	Final distribution payable 15 December 2019	Final distribution paid 15 December 2018
Class 3 Income shares	Group 1	3.4025	–	3.4025	3.0975
	Group 2	2.5735	0.8290	3.4025	3.0975

Accumulation shares		Net revenue	Equalisation	Final distribution payable 15 December 2019	Final distribution paid 15 December 2018
Class 1 Accumulation shares	Group 1	1.7486	–	1.7486	1.4723
	Group 2	0.7082	1.0404	1.7486	1.4723
Class 2 Accumulation shares	Group 1	2.9144	–	2.9144	2.5016
	Group 2	0.7266	2.1878	2.9144	2.5016

Final distribution

Group 1 shares are those shares purchased at or before 12:00 noon on 15 April 2019.

Group 2 shares are those shares purchased after 12:00 noon on 15 April 2019.

Interim distribution paid in pence per share for the six months ended 15 April 2019

Income shares		Net revenue	Equalisation	Interim distribution paid 15 June 2019	Interim distribution paid 15 June 2018
Class 3 Income shares	Group 1	2.9828	–	2.9828	3.3008
	Group 2	2.2439	0.7389	2.9828	3.3008

Accumulation shares		Net revenue	Equalisation	Interim distribution paid 15 June 2019	Interim distribution paid 15 June 2018
Class 1 Accumulation shares	Group 1	1.4899	–	1.4899	1.6382
	Group 2	1.0670	0.4229	1.4899	1.6382
Class 2 Accumulation shares	Group 1	2.4982	–	2.4982	2.7381
	Group 2	1.7977	0.7005	2.4982	2.7381
Class A Accumulation shares	Group 1	0.0000	–	0.0000	0.9438
	Group 2	0.0000	0.0000	0.0000	0.9438

Interim distribution

Group 1 shares are those shares purchased at or before 12:00 noon on 15 October 2018.

Group 2 shares are those shares purchased after 12:00 noon on 15 October 2018.

Equalisation

Equalisation applies only to Group 2 shares, in other words shares purchased during the relevant period. It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

AVIVA INVESTORS UK SMALLER COMPANIES FUND

INVESTMENT OBJECTIVE

The Fund aims to grow your investment over the long term (5 years or more) by investing in shares of small UK companies.

INVESTMENT POLICY

Core investment: At least 80% of the Fund will be invested in shares of smaller companies domiciled or incorporated in the UK.

Other investments: The Fund may also invest in other shares, other funds (including funds managed by Aviva Investors companies), cash and deposits.

Strategy: The Fund is actively managed, and the Investment Manager will have a high conviction approach (a strong belief) to investing in smaller companies. These smaller companies will have a market capitalisation (the total market value of a company's outstanding shares) of the bottom 10% of the FTSE® All Share Index, excluding investment trusts. The Fund will focus its investments in companies which the Investment Manager believes are, or will become market leaders, which benefit from high barriers to entry due to their competitive position within the industry, and which may offer further opportunities for revenue, earnings and cash flow growth, perhaps driven by new market opportunities. This is balanced by an emphasis on risk management within the Fund, whereby the portfolio will be built from a varied range of companies across different industry sectors.

Environmental, Social & Governance (ESG) factors: ESG factors are integrated into the investment process and are considered alongside a range of financial metrics and research, but the Investment Manager retains discretion over which investments are selected. We also actively engage with companies and use voting rights with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in the prospectus.

Performance & Risk Measurement: The Fund's performance is compared against the FTSE® Small Cap ex Investment Trusts Index (the "Index").

The Fund does not base its investment process upon the Index, so will not hold every company in the Index and may also hold companies that do not form part of it.

The Fund uses a "tracking error" to measure the consistency of the Fund's returns and the returns of the Index. In general, the lower the tracking error, the more consistent the Fund's returns are relative to the Index, and vice-versa. The Fund is expected to have an average yearly tracking error of between 3% and 8% when compared to the Index. In certain conditions the Fund may be outside of this range.

The Index is currently comprised of approximately 150 smaller sized UK companies, as determined by their market capitalisation (total market value of a company's outstanding shares). The companies included on this Index have a market capitalisation between approximately £30 million and £1 billion.

The Index has been selected as a benchmark for performance and risk measurement because it is representative of the type of companies in which the Fund is likely to invest, and the Fund will not invest in investment trusts. It is therefore an appropriate comparator for the Fund's performance.

FUND MANAGER'S REPORT

Performance

Over the twelve months ended 15 October 2019, the Aviva Investors UK Smaller Companies Fund delivered a total return of 4.21% (share class 1), net of fees. The Fund's benchmark, the FTSE® UK Small Cap ex Investment Trust Index, returned -3.55%.

Market Review

The UK equity market has struggled to make progress over the reporting period with various headwinds undermining investor sentiment. The fourth quarter of 2018 saw weak markets globally, which was precipitated by US Federal Reserve (Fed) Chairman Jerome Powell cautioning in early October that the central bank was still a long way from returning interest rates to a neutral level, implying monetary policy would tighten further in 2019. This impacted equity market sentiment across the world, and in the UK it was highly valued companies in particular which came under pressure as 2018 ended. In early 2019, with global economic data softening and the uncertainty of trade wars escalating between the US and China, the Fed signalled an abrupt change in policy and stepped back from interest rate hikes, which led to a broad-based rally across the UK equity market during the first quarter of 2019. Given concerns over the impact of the US-China trade dispute and signs of softer US economic data, the Fed subsequently sanctioned two rate cuts in July and September. In China, economic growth decelerated to its lowest rate since 1992 during the third quarter, while the European Central Bank launched a new package of stimulus measures in an effort to tackle low growth and low inflation in the Eurozone.

However, the main factor which has accounted for the underperformance of UK equities in comparison with global indices was uncertainty over Brexit negotiations and scepticism amongst investors globally that the UK's withdrawal from the European Union can be resolved in a timely and efficient manner. Indeed, it remains highly uncertain as to how, and indeed when, the UK's withdrawal will be executed. This has had negative repercussions for the UK economy, with companies reticent to sign off long term investment projects, hiring freezes being witnessed and the housing market stuck in the doldrums. Although inventory building amongst UK businesses as a contingency measure against a disorderly Brexit boosted economic growth during the opening months of 2019, subsequently the UK economy shrank during the second quarter for the first time in almost seven years, as stockpiling activity slowed and Brexit uncertainty intensified against a backdrop of weaker global growth.

Increased perceived risks of a UK and/or global recession have been the key drivers of share price performance over the reporting period, overriding relative company valuations. Most notably, valuations amongst economically sensitive and domestically-focused stocks remain extremely depressed due to concerns over the risk of a pronounced economic slowdown, particularly in the event of a disorderly Brexit but also the impact of a prolonged US-led trade war. This has affected UK smaller companies, which are perceived as being more exposed to the domestic economy, with small caps trailing FTSE® 250 and FTSE® 100 constituents over the reporting period.

On a more positive note, ongoing merger and acquisition activity, which has not solely been confined to larger, more liquid stocks, has been a feature of the UK equity market over the last 12 months. A combination of sterling weakness, attractive valuations and the low cost of debt finance have provided an accommodating backdrop for acquisitive corporations and private equity investors.

AVIVA INVESTORS UK SMALLER COMPANIES FUND (CONTINUED)

FUND MANAGER'S REPORT (CONTINUED)

Fund Review

In difficult market conditions, the Fund outperformed the benchmark FTSE® Small Cap ex Investment Trust Index over the period by a significant margin.

As noted above, the UK economic background remains challenging but we have identified several smaller companies which are much less dependent on the domestic economy with substantial international exposure. This has enabled us to diversify away from the slowing UK economy, and has boosted Fund performance over the reporting period. A key contributor has been our holding in 4imprint, the supplier of imprinted promotional merchandise, which has been one of the Fund's largest holdings for a few years now with 97% of the company's revenues derived from the US. 4imprint recently announced another strong period of trading, with organic revenue growth of 16% for the first half of the trading year. The company has a very strong track record of gaining market share, as they are one of very few operators of a sufficient size and scale to serve corporate America.

Smaller companies by nature of their size can be more dynamic, innovative and grow faster than larger companies and this is clearly illustrated in two of the largest contributors to performance this year. AB Dynamics, the automotive testing and measurement business which is benefiting from the structural move to hybrid and autonomous vehicles, continues to deliver exceptional organic growth. Secondly GlobalData, the technology enabled market research company with an online data and analytics portal, has benefited from being exposed to the fastest part of the market and due to its high quality of content able to make very high returns.

One of the main attractions for investing down the market capitalisation scale is to catch companies early in their life cycle and which are less exposed to macroeconomic factors. Two examples of where this has helped performance last year are GoCo Group (Gocompare.com) with their autosave proposition weflip, which was launched in January 2019, and Tritax Eurobox the early stage continental European logistics assets owner.

Merger and acquisition activity can have a more meaningful impact on smaller than larger companies in materially positive and negative ways. On the positive front, the Fund benefited from takeovers of BCA Marketplace, Faroe Petroleum and El Group over the reporting period, but just as relevant is DiscoverIE Group who have continued to undertake value enhancing acquisitions as they have grown their international footprint through expanding their Design & Manufacturing division, thereby diluting the more commodity-related side of the business. St Modwen Properties has continued its repositioning to higher growth areas through portfolio repositioning which has seen the sale of their retail and other non-core assets. The sad demise of Thomas Cook also aided fund performance, as we did not own the shares, after the historic acquisition of MyTravel in 2007 and then the Co-Operative Travel branch network saddled the company with higher levels of debt as they moved further onto the high street just as holiday bookings were migrating online. These examples are a reminder that, even on a small scale, acquisitions can materially enhance or detract value from a business.

Two holdings that detracted from fund performance over the reporting period were Ted Baker and M&C Saatchi. Clothing store Ted Baker, which is struggling against high levels of competitive promotional activity and challenges with its Spring/Summer collections, issued a profit warning in June. This was a major disappointment because the company has a long track record of being able to trade through difficult conditions in the apparel market in the past. Following their accounting issues disclosure in August, advertising group M&C Saatchi cut full year earnings guidance during September, with the independent auditors report they commissioned due in November.

Outlook

The key issues impacting on equity markets at present are the slowdown in global economic growth, with the IMF downgrading its forecast to its lowest level since 2008-9, and low inflation in developed countries. Such a backdrop has serious implications for the world's major central banks, which have maintained highly accommodative monetary policy since the global financial crisis, and also for corporate earnings growth. Accordingly, we are continuing to focus on UK smaller companies with sustainable growth characteristics which are either niche businesses, or which are largely detached from macroeconomic headwinds. This strategy has been a key factor behind the Fund's strong performance relative to its benchmark, and in comparison with the peer group. Looking ahead, we believe that avoiding companies that are particularly vulnerable and worst affected by the ongoing economic slowdown will remain a key factor in determining fund performance in the UK small cap market. We harbour serious concerns on the negative implications for the UK economy from the never-ending delays to any form of Brexit resolution, particularly as such uncertainty continues to undermine consumer confidence and business investment plans. Nevertheless, while we are undoubtedly in a highly uncertain economic and political climate, we remain highly positive about the investment opportunities that still exist in the UK small cap market particularly from a longer-term perspective.

Synthetic Risk and Reward Indicator

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- A significant proportion of the Fund may be invested in securities which are not actively traded, and as a result may experience large daily price changes.
- During the year ended 15 October 2019, the indicator changed from category 4 to category 5.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at www.avivainvestors.com or from the ACD on request.

[‡] The operating charges are calculated on an ex-post basis and as such may differ from the Ongoing Charge Figure where:

(a) Changes to fee rates were made during the year and the Ongoing Charge Figure has been amended to be future proofed for this change.

(b) The Ongoing Charge has been annualised for a share class that has not yet been open for a full year.

[#] The direct transaction costs have been stated after deducting, in the case of single-priced funds, the proportion of the amounts collected from dilution adjustments or dilution levies that relates to direct transaction costs and, in the case of dual-priced funds, the amounts collected in relation to direct transaction costs added to, or subtracted from, the valuations by virtue of COLL 6.3.6 G (4).

[≈] The high and low prices disclosed are the high and low prices for the accounting period and not the calendar year. The net asset value per share price is based on the net asset value in the published accounts and may be different due to post year end accounting adjustments.

Ongoing Charges Figure*

Share class	15.10.19	15.10.18
Class 1	1.04%	1.04%
Class 2	0.89%	0.89%
Class 3	0.34%	0.34%

* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the year. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

1 Accounting basis and policies

Please see pages 8 to 10 for accounting basis and policies.

2 Net capital gains/(losses)

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Net capital gains/(losses) on investment during the year comprise:		
Currency losses	(14)	(4)
Expenses relating to the purchase and sale of investments	–	(2)
Non-derivative securities gains/(losses)	1,267	(603)
Net capital gains/(losses)	1,253	(609)

3 Revenue

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Bank and deposit interest	1	–
Interest on debt securities	5	5
Overseas dividends	22	23
Property income distributions	103	78
UK dividends	706	728
Total revenue	837	834

4 Expenses

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Payable to the Authorised Corporate Director ("ACD"), associates of the ACD or agents of either of them:		
Fund Management Fee/ACD's periodic charge*	351	420
Registration fees	–	24
	351	444
Payable to the Depositary, associates of the Depositary or agents of either of them:		
Depositary's fee	–	4
Interest payable	2	–
Safe custody fee	–	1
	2	5
Other expenses:		
Audit fee**	–	7
Statement fee	–	1
	–	8
Total expenses	353	457

* From 4 June 2018 the Fund changed to a single fixed charge known as the Fund Management Fee (FMF). The FMF covers fees and expenses in relation to the operation and administration of the Company and the Fund.

** The audit fee was £8,897 (2018: £8,555) net of VAT. With effect from 4 June 2018, the audit fee was no longer accrued for separately and now forms part of the FMF.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

5 Taxation**a Analysis of tax charge**

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Overseas tax suffered	(1)	–
Total current tax (see note 5b)	(1)	–

b Factors affecting current tax charge

The tax assessed for the year is lower (2018: lower) than the standard rate of corporation tax in the UK for an Authorised Investment Fund (20%) (2018: 20%).

The differences are explained below:

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Net revenue before taxation	484	377
Corporation tax at 20%	97	75
Effects of:		
Movement in excess management expenses	49	75
Overseas dividends not subject to corporation tax	(5)	(5)
Overseas tax suffered	(1)	–
UK dividends not subject to corporation tax	(141)	(145)
Current tax charge (see note 5a)	(1)	–

Authorised Investment Funds are exempt from tax on capital gains. Therefore, any capital return is not included in the above reconciliation.

c Deferred tax

There was no provision for deferred tax at the year end (2018: £nil).

After claiming relief against accrued income taxable on receipt, the Fund has unrelieved excess expenses of £19,499,862 (2018: £19,255,931) creating a potential deferred tax asset of £3,899,972 (2018: £3,851,186). It is unlikely that the Fund will generate taxable profits in the future to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

6 Distributions

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:		
Interim distribution	152	137
Final distribution	314	235
	466	372
Add: Revenue deducted on cancellation of shares	26	9
Deduct: Revenue received on issue of shares	(7)	(4)
Total distributions	485	377
Net revenue after taxation	485	377

Details of the distributions per share are set out in the distribution tables on page 111.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

7 Fair value hierarchy

Valuation technique	Assets at 15.10.19 £000	Assets at 15.10.18 £000
Level 1: Quoted prices	31,450	38,368
Level 2: Observable market data	1,700	–
Level 3: Unobservable data	–	599
Total value	33,150	38,967

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities.

The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority to unobservable inputs. Disclosure is required of the value in each category in order to give an insight into the extent to which fair value measurements are subjective.

The disclosure is split into the following categories:

Level 1: Unadjusted quoted price in an active market for an identical instrument;

Level 2: Valuation techniques using observable inputs other than quoted prices within level 1;

Level 3: Valuation techniques using unobservable inputs.

8 Debtors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued revenue	51	62
Amounts receivable on issue of shares	38	20
Income tax recoverable	10	–
Sales awaiting settlement	137	–
Total debtors	236	82

9 Cash and bank balances

	As at 15.10.19 £000	As at 15.10.18 £000
Cash and bank balances	772	1,861
Total cash and bank balances	772	1,861

10 Other creditors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued expenses	12	49
Amounts payable for cancellation of shares	15	63
Purchases awaiting settlement	–	1,038
Total other creditors	27	1,150

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

11 Contingent liabilities and commitments

There were no contingent liabilities or commitments at the year end (2018: £nil).

12 Related party transactions

Aviva Investors UK Fund Services Limited, Aviva Investors Global Services Limited and the Aviva Group are deemed to be related parties per section 33.10 of FRS 102 as they are entities with control, joint control or significant influence over the entity.

Fund Management Fee/ACD's periodic charge paid to Aviva Investors UK Fund Services Limited ("the ACD") are shown in note 4 and details of shares issued and cancelled by the Fund Management Fee are shown in the statement of change in net assets attributable to shareholders. The balance due to the ACD at the year end in respect of ACD periodic charges was £12,250 (2018: £48,603). Any balance due from the ACD in respect of issues is shown in note 8. Any balance due to the ACD in respect of cancellations is shown in note 10.

Distributions payable to the ACD and related parties of the ACD during the year amounted to £90,860 (2018: £107,247). The amount outstanding at the year end was £60,256 (2018: £62,549). Related parties of the ACD are deemed to be all companies under the control of Aviva Plc. This will include companies which hold shares in the Fund on behalf of other external investors.

Any investments managed and advised by Aviva Investors Global Services Limited or associated with the Aviva Group are identified on the portfolio statement.

The total purchases and sales on these investments during the year amounted to £10,200,000 (2018: £8,400,000) and £8,500,000 (2018: £9,200,000) respectively. The income received during the year amounted to £4,818 (2018: £4,901).

Holdings at the year end and movements during the year are as follows:

	Holdings at 15.10.19 (shares)	Movement (shares)	Holdings at 15.10.18 (shares)
ACD and related parties (Class 3 Income shares)	488,340	153,072	335,268
ACD and related parties (Class 1 Accumulation shares)	302	(3,680)	3,982
ACD and related parties (Class 2 Accumulation shares)	356,879	(736,447)	1,093,326

The ACD and related parties of the ACD are ineligible to vote at any general meeting.

13 Shareholder funds

The Fund currently has three share classes: Class 1 (Retail), Class 2 (Institutional) and Class 3 (Associated undertakings of Aviva Plc). The Fund Management Fees are as follows:

Class 1: 1.04%

Class 2: 0.89%

Class 3: 0.34%

The net asset value of the share class, the net asset value per share and the number of shares in the class are shown on page 98. The distributions per share are given in the distribution tables on page 111. All the share classes have the same rights on winding up.

14 Shares in issue reconciliation

	Number of shares in issue at 15.10.18	Number of shares issued	Number of shares cancelled	Number of shares converted	Number of shares in issue at 15.10.19
Class 3 Income shares	500,537	7,633	(19,830)	–	488,340
Class 1 Accumulation shares	6,014,119	21,729	(373,351)	(24,944)	5,637,553
Class 2 Accumulation shares	2,305,605	188,254	(1,112,081)	15,668	1,397,446

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

15 Derivatives and other financial instruments

The policies applied in the management of financial instruments are set out on pages 9 and 10.

Fair value of financial assets and financial liabilities

There is no significant difference between the carrying values of the financial assets and liabilities and their fair values (2018: £nil).

Currency risk

At the year end date, 2.24% (2018: 2.15%) of the net assets of the Fund were denominated in currencies other than sterling with the effect that the balance sheet and total return can be significantly affected by currency movements. If currency rates were to change by 10.00%, the value of the Fund would change by 0.22% (2018: 0.22%).

Interest rate risk

The Fund does not invest in either fixed or floating rate securities and interest rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions which will be affected by fluctuations in interest rates.

At the year end date 7.25% (2018: 4.68%) of the net assets of the Fund were interest bearing and as such the interest rate risk is not considered significant.

The floating rate on bank balances is linked to the Depositary's base rate.

The floating rate on deposits is linked to LIBOR or its overseas equivalent.

Market price risk

At the year end date, 97.24% (2018: 98.08%) of the net assets of the Fund were invested in ordinary shares or stock units or debt securities admitted to an official stock exchange. If the market value were to change by 10%, the value of the Fund would change by 9.72% (2018: 9.81%).

16 Direct transaction costs

In the case of shares, broker commissions and transfer taxes, stamp duty is paid by the Fund on each transaction. In addition, there is a dealing spread between buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of the dealing spread.

	Principal before costs £000	Commissions £000	Taxes £000	Total after costs £000	Commissions as % of principal	Taxes as % of principal

Dealing spread

As at 15 October 2019, the average portfolio dealing spread was 1.61% (2018: 1.40%). This spread represents the difference between the values determined retrospectively by reference to the bid and offer prices of investments expressed as a percentage of the value determined by reference to the offer price.

17 Post balance sheet events

There are no post balance sheet events which require adjustment or disclosure at the year end (2018: £nil).

DISTRIBUTION TABLES

Final distribution payable in pence per share for the six months ended 15 October 2019

Income shares		Net revenue	Equalisation	Final distribution payable 15 December 2019	Final distribution paid 15 December 2018
Class 3 Income shares	Group 1	8.0127	–	8.0127	6.0221
	Group 2	3.8856	4.1271	8.0127	6.0221

Accumulation shares		Net revenue	Equalisation	Final distribution payable 15 December 2019	Final distribution paid 15 December 2018
Class 1 Accumulation shares	Group 1	3.4133	–	3.4133	1.9279
	Group 2	1.4886	1.9247	3.4133	1.9279
Class 2 Accumulation shares	Group 1	5.9171	–	5.9171	3.8673
	Group 2	2.1186	3.7985	5.9171	3.8673

Final distribution

Group 1 shares are those shares purchased at or before 12:00 noon on 15 April 2019.

Group 2 shares are those shares purchased after 12:00 noon on 15 April 2019.

Interim distribution paid in pence per share for the six months ended 15 April 2019

Income shares		Net revenue	Equalisation	Interim distribution paid 15 June 2019	Interim distribution paid 15 June 2018
Class 3 Income shares	Group 1	4.2884	–	4.2884	4.7401
	Group 2	2.4731	1.8153	4.2884	4.7401

Accumulation shares		Net revenue	Equalisation	Interim distribution paid 15 June 2019	Interim distribution paid 15 June 2018
Class 1 Accumulation shares	Group 1	1.2807	–	1.2807	0.7879
	Group 2	0.5335	0.7472	1.2807	0.7879
Class 2 Accumulation shares	Group 1	2.4790	–	2.4790	2.7873
	Group 2	0.9762	1.5028	2.4790	2.7873

Interim distribution

Group 1 shares are those shares purchased at or before 12:00 noon on 15 October 2018.

Group 2 shares are those shares purchased after 12:00 noon on 15 October 2018.

Equalisation

Equalisation applies only to Group 2 shares, in other words shares purchased during the relevant period. It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

AVIVA INVESTORS CONTINENTAL EUROPEAN EQUITY FUND

(PREVIOUSLY AVIVA INVESTORS EUROPEAN EQUITY FUND)

The name of the Fund was changed to the Aviva Investors Continental European Equity Fund on 2 January 2019.

INVESTMENT OBJECTIVE

The Fund aims to grow your investment over the long term (5 years or more) by investing in shares of European companies.

INVESTMENT POLICY

Core investment: At least 80% of the Fund will be invested in shares of European companies (including those in emerging markets in Europe but excluding companies in the UK).

Other investments: The Fund may also invest in other shares, other funds (including funds managed by Aviva Investors companies), cash and deposits.

Strategy: The Fund is actively managed with an unconstrained investment style, allowing the Investment Manager the freedom to invest in companies of any size, and at any stage of the business cycle. This will include investing in companies which the Investment Manager considers to be market leading or to have superior business models. It will include companies where the Investment Manager sees future opportunities for growth arising from long-term industry or consumer themes, or "hidden value", which the Investment Manager believes are currently undervalued by the market. This is balanced by an emphasis on risk management within the Fund, so the portfolio will be built from a diverse range of companies across different industry sectors.

Environmental, Social & Governance (ESG) factors: ESG factors are integrated into the investment process and are considered alongside a range of financial metrics and research, but the Investment Manager retains discretion over which investments are selected. We also actively engage with companies and use voting rights with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in the prospectus.

Performance & Risk Measurement: The Fund's performance, is compared against the FTSE® Europe ex UK Total Return Index (the "Index").

The Fund does not base its investment process upon the Index, so will not hold every company in the Index and may also hold companies that do not form part of it.

The Fund uses a "tracking error" to measure the consistency of the Fund's returns and the returns of the Index. In general, the lower the tracking error, the more consistent the Fund's returns are relative to the Index, and vice-versa. The Fund is expected to have an average yearly tracking error of between 3% and 8% when compared to the Index. In certain conditions the Fund may be outside of this range.

The Index represents developed and emerging markets in Europe, excluding the UK, and consists of large and medium sized companies, as defined by their market capitalisation (total market value of a company's outstanding shares).

The Index has been selected as a benchmark for performance and risk measurement because it is representative of the type of companies in which the Fund is likely to invest, and it is therefore an appropriate comparator for the Fund's performance.

FUND MANAGER'S REPORT

Performance

Over the twelve months ended 15 October 2019, the Aviva Investors Continental European Fund delivered a total return of 3.50% (share class 1), net of fees. The Fund's benchmark, the FTSE® Europe ex UK Index returned 12.12%.

Market Review

Over the last 12 months, global economic indicators have highlighted a synchronised slowdown although activity continues to expand. The closely-watched global manufacturing PMI composite index fell back to its lowest level for three and a half years in February. This was partly a result of the US-China trade dispute, but also reflective of a slowdown in the Chinese economy. Worldwide, inflationary pressures have remained subdued by historical standards. Having risen to its highest level in four years in early October, the oil price (Brent crude) declined sharply to just over \$50/barrel in December – its lowest level for 15 months, driven by increased levels of supply, notably US inventories, before rallying during the opening quarter of 2019.

There has been a sharp loss of momentum in the Eurozone. Although Eurozone economic activity picked up over the first quarter of 2019, forward-looking indicators have been less reassuring. The closely watched purchasing managers' index for the Eurozone fell to a six-year low in September, while manufacturing activity in Germany declined to its lowest level since mid-2009, as the country's export-led economy has continued to suffer from global trade tensions and weakening growth. In response, the European Central Bank (ECB) announced it would recommence QE (quantitative easing), with effect from November, at €20 billion a month and maintain this policy until inflation returns to its 2% target.

European equities gained ground but trailed global indices over the reporting period. Political concerns resurfaced as the year progressed, most notably in Italy. The coalition government, comprising the populist Five Star Movement and the Northern League, appeared set on a collision course with the European Central Bank over its spending plans, until an agreement was eventually reached as 2018 ended. As the period ended, the coalition fragmented with the League withdrawing and the Five Star Movement forming a new alliance with the Democratic Party. This reawakened the debate on the existential future of the Eurozone. As a result, widening credit spreads in Italy awakened fears of contagion risk and a slowdown in regional economic growth weakened financial stocks, notably banks. With economic growth remaining sluggish, combined with ongoing concerns over the impact of the escalating US-China trade dispute on exports, cyclical sectors notably industrials, basic materials and technology underperformed broader market indices. Investors took refuge in more defensive sectors, particularly utilities which outperformed the rest of the market by a wide margin, but also consumer staples and healthcare.

AVIVA INVESTORS CONTINENTAL EUROPEAN EQUITY FUND (CONTINUED)

FUND MANAGER'S REPORT (CONTINUED)

Fund Review

Positioning within the healthcare sector had the largest negative impact on fund performance over the reporting year. Broadly, performance was impacted by our underweight position in large-cap pharmaceuticals, stock specific issues at Fresenius SE and EssilorLuxottica, and our favoured biotech positions. The historically 'defensive' large-cap pharmaceuticals companies benefited from an uncertain macroeconomic and geopolitical environment, prompting further sector rotation. Investor sentiment for large-cap pharmaceuticals also improved as the market concluded that President Trump's headline grabbing rhetoric in October 2018 regarding U.S. drug prices would have a limited financial impact on earnings. China also became a bigger theme with Roche, in particular, using higher Chinese demand to help offset biosimilar pressures. Our holding in Fresenius SE detracted heavily from performance in late 2018. The company first posted a profit warning due to issues from its dialysis business (FMC) and its German hospital business (Helios). Eight weeks later Fresenius SE shocked the market by issuing another profit warning, where it cut 2019 margin guidance again for the FMC and Helios divisions, and gave conservative guidance for the injectables business (Kabi). After meeting with the CEO in January, we decided to look through the period of near-term uncertainty and hold our position in Fresenius SE. This decision has recently started to have a positive impact on the Fund's performance.

EssilorLuxottica, which now sits within the consumer sector, was impacted by escalating corporate government issues surrounding the merger of Essilor (lenses provider) and Luxottica (eyewear provider). We sold our position due to concerns over Luxottica trading and the level of synergies that can be achieved.

Our 'portfolio' of higher-risk biotech positions also impacted performance as 2018 ended. Biotechs were casualties of the market's 'risk-off' reaction to macroeconomic and geopolitical uncertainty, as well as the misfortunes of Neil Woodford's biotech-heavy income fund. Our decision to divest a large proportion of these legacy biotech holdings over the last few years has been correct. The impact from biotech holdings was mitigated by the decision to reallocate to more established biopharma companies – with our recently added holding in Galapagos benefitting from a \$5.1bn deal with US pharmaceutical giant Gilead.

In the financial sector, our banking exposure detracted from performance as the ECB extended its forward guidance to keep interest rates unchanged. In addition, Caixabank and Santander were impacted by unfavourable operating margins and a series of disappointing quarterly results, whilst ABN Amro was impacted by concerns surrounding litigation risk and money laundering rumours. Elsewhere, the market paid little attention to asset manager Anima's resilient fund flows, as the company remained a victim of widening credit spreads in Italy amidst an unfavourable political environment and macroeconomic uncertainty. The negative impact from the financials sector on fund performance was somewhat mitigated by strong performance from Deutsche Boerse, our decision to not hold either of the large Swiss banks and our underweight positioning in the real estate sector.

Within the consumer goods sector, strong performance from luxury goods group LVMH and beverages group Anheuser-Busch InBev was not enough to offset the negative impact from Nestle. LVMH had a strong 12 months as growth in China continued to accelerate and management gave confident guidance on earnings. This triggered valuation upgrades following the stock's de-rating during the fourth quarter of 2018. Anheuser-Busch InBev also performed strongly, driven by

a resilient beverage market and an impressive de-leveraging. We took the opportunity to invest in the company early in 2019 at an attractive valuation. However, the exceptionally strong performance of Nestle over-shadowed some successful stock picking in the consumer goods sector. Nestle performed well amid the step down in interest rate outlook and the Fund was impacted from not holding shares in the company.

The two holdings that detracted significantly from performance – Stabilus and Pirelli – are both exposed to the automotive market. This cyclical sub-sector was heavily impacted by the US-China trade tensions and numerous other headwinds facing the global auto market. Another individual stock that negatively impacted performance was Ryanair. European airlines performed poorly due to Brexit concerns and potential impacts from Boeing's 737 MAX troubles. We continue to hold Ryanair based on its superior operating model and the structural advantages in its cost base.

Our holdings in the technology sector saw mixed performance. Whilst trade tensions have ebbed and flowed over the last 12 months ASML gave reassuring trading statements, creating more confidence in the company's order book. STMicroelectronics, another company exposed to the semiconductor cycle, rebounded after a challenging trading period. On the other hand, Amadeus suffered from a set of slightly weak results and an announcement that it was under investigation from the EU Antitrust Commission. We maintain our position in Amadeus as the company has a market leading position as a global GDS provider to the airline industry. Hotel IT is also a very interesting growth market for the business that is not fully appreciated by the market, in our opinion.

Outlook

After an upturn during the first quarter of 2019, Eurozone economic growth slowed sharply over the three months to June to a below-trend pace and there have been no signs of any noticeable pick up during the third quarter. The malaise in the manufacturing sector has got incrementally worse, largely because of the slump in global trade which has hurt exports. More worryingly, there are limited signs that weakness is being transmitted to the more domestically focused services sector which, until now, has remained reassuringly resilient. In contrast to many businesses, households are still reasonably upbeat, while some money and credit indicators have improved modestly. Nevertheless, the additional stimulus promised by the ECB is warranted, especially as inflation – to which they have now directly linked monetary policy – is still troublingly low. Fiscal policy should also lift demand at the margin, but is unlikely to be a game-changer. European equity markets are on lower forward earnings multiples than the US, although the discrepancy between valuation multiples with Europe from sector to sector remains large. Despite challenging macro-economic conditions, we still see opportunities for our clients where our view of the intrinsic value of a company is different to the stock market's view as reflected by the stock price.

Synthetic Risk and Reward Indicator

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- The value of investments will be affected by changes in exchange rates.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at www.avivainvestors.com or from the ACD on request.

Prices[≈]		
Highest share price	251.73	245.65
Lowest share price	229.84	191.61

§ The share class was closed 1 June 2018.

‡ The operating charges are calculated on an ex-post basis and as such may differ from the Ongoing Charge Figure where:

(a) Changes to fee rates were made during the year and the Ongoing Charge Figure has been amended to be future proofed for this change.

(b) The Ongoing Charge has been annualised for a share class that has not yet been open for a full year.

The direct transaction costs have been stated after deducting, in the case of single-priced funds, the proportion of the amounts collected from dilution adjustments or dilution levies that relates to direct transaction costs and, in the case of dual-priced funds, the amounts collected in relation to direct transaction costs added to, or subtracted from, the valuations by virtue of COLL 6.3.6 G (4).

≈ The high and low prices disclosed are the high and low prices for the accounting period and not the calendar year. The net asset value per share price is based on the net asset value in the published accounts and may be different due to post year end accounting adjustments.

Ongoing Charges Figure*

Share class	15.10.19	15.10.18
Class 1	1.00%	1.00%
Class 2	0.85%	0.85%
Class 3	0.35%	0.35%

* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the year. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme. The OCF for share class 1, when aggregated with certain other payments out of scheme property incurred in respect of it, is capped at 1.00%. Please see the Prospectus for full details.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

NOTES TO THE FINANCIAL STATEMENTS

1 Accounting basis and policies

Please see pages 8 to 10 for accounting basis and policies.

2 Net capital gains/(losses)

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Net capital gains/(losses) on investment during the year comprise:		
Currency losses	(101)	(24)
Expenses relating to the purchase and sale of investments	–	(3)
Non-derivative securities gains/(losses)	3,093	(20,504)
Net capital gains/(losses)	2,992	(20,531)

3 Revenue

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Bank and deposit interest	1	170
Interest on debt securities	4	3
Overseas dividends	4,436	4,751
Total revenue	4,441	4,924

4 Expenses

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Payable to the Authorised Corporate Director ("ACD"), associates of the ACD or agents of either of them:		
Fund Management Fee/ACD's periodic charge*	1,428	1,736
Registration fees	–	31
	1,428	1,767
Payable to the Depositary, associates of the Depositary or agents of either of them:		
Depositary's fee	–	17
Interest payable	10	–
Safe custody fee	–	19
	10	36
Other expenses:		
Audit fee**	–	7
Professional fee	–	18
Statement fee	–	3
	–	28
Total expenses	1,438	1,831
Less those expenses rebated by the ACD	–	(41)
Net expenses	1,438	1,790

* From 4 June 2018 the Fund changed to a single fixed charge known as the Fund Management Fee (FMF). The FMF covers fees and expenses in relation to the operation and administration of the Company and the Fund.

** The audit fee was £8,897 (2018: £8,555) net of VAT. With effect from 4 June 2018, the audit fee was no longer accrued for separately and now forms part of the FMF.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

5 Taxation**a Analysis of tax charge**

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Overseas tax suffered	414	403
Total current tax (see note 5b)	414	403

b Factors affecting current tax charge

The tax assessed for the year is lower (2018: lower) than the standard rate of corporation tax in the UK for an Authorised Investment Fund (20%) (2018: 20%).

The differences are explained below:

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Net revenue before taxation	3,003	3,134
Corporation tax at 20%	601	627
Effects of:		
Movement in excess management expenses	286	323
Overseas dividends not subject to corporation tax	(888)	(950)
Overseas tax suffered	414	403
Tax credit on Loan relationship deficit	1	–
Current tax charge (see note 5a)	414	403

Authorised Investment Funds are exempt from tax on capital gains. Therefore, any capital return is not included in the above reconciliation.

c Deferred tax

There was no provision for deferred tax at the year end (2018: £nil).

After claiming relief against accrued income taxable on receipt, the Fund has unrelieved excess expenses of £22,769,640 (2018: £21,340,910) creating a potential deferred tax asset of £4,553,928 (2018: £4,268,182). It is unlikely that the Fund will generate taxable profits in the future to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

6 Distributions

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:		
Interim distribution	378	129
Final distribution	2,081	2,578
	2,459	2,707
Add: Revenue deducted on cancellation of shares	138	97
Deduct: Revenue received on issue of shares	(8)	(16)
Total distributions	2,589	2,788
Reconciliations of distributions for the year to net revenue after taxation		
Distributions for the year	2,589	2,788
Equalisation on conversions	–	(57)
Net revenue after taxation	2,589	2,731

Details of the distributions per share are set out in the distribution tables on page 127.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

7 Fair value hierarchy

Valuation technique	Assets at 15.10.19 £000	Assets at 15.10.18 £000
Level 1: Quoted prices	153,584	164,147
Level 2: Observable market data	–	1
Total value	153,584	164,148

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities.

The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority to unobservable inputs. Disclosure is required of the value in each category in order to give an insight into the extent to which fair value measurements are subjective.

The disclosure is split into the following categories:

Level 1: Unadjusted quoted price in an active market for an identical instrument;

Level 2: Valuation techniques using observable inputs other than quoted prices within level 1;

Level 3: Valuation techniques using unobservable inputs.

8 Debtors

	As at 15.10.19 £000	As at 15.10.18 £000
Corporation tax recoverable	69	68
Overseas tax recoverable	487	330
Sales awaiting settlement	397	855
Total debtors	953	1,253

9 Cash and bank balances

	As at 15.10.19 £000	As at 15.10.18 £000
Cash and bank balances	1,597	6,977
Total cash and bank balances	1,597	6,977

10 Other creditors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued expenses	53	188
Amounts payable for cancellation of shares	176	213
Purchases awaiting settlement	794	5,361
Total other creditors	1,023	5,762

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

11 Contingent liabilities and commitments

There were no contingent liabilities or commitments at the year end (2018: £nil).

12 Related party transactions

Aviva Investors UK Fund Services Limited, Aviva Investors Global Services Limited and the Aviva Group are deemed to be related parties per section 33.10 of FRS 102 as they are entities with control, joint control or significant influence over the entity.

Fund Management Fee/ACD periodic charges paid to Aviva Investors UK Fund Services Limited ("the ACD") are shown in note 4 and details of shares issued and cancelled by the ACD are shown in the statement of change in net assets attributable to shareholders. The balance due to the ACD at the year end in respect of Fund Management Fee/ACD periodic charges was £52,677 (2018: £188,328). Any balance due from the ACD in respect of issues is shown in note 8. Any balance due to the ACD in respect of cancellations is shown in note 10.

Distributions payable to the ACD and related parties of the ACD during the year amounted to £425,361 (2018: £486,096). The amount outstanding at the year end was £324,137 (2018: £407,127). Related parties of the ACD are deemed to be all companies under the control of Aviva Plc. This will include companies which hold shares in the Fund on behalf of other external investors.

Any investments managed and advised by Aviva Investors Global Services Limited or associated with the Aviva Group are identified on the portfolio statement.

The total purchases and sales on these investments during the year amounted to £14,800,060 (2018: £16,200,000) and £14,801,160 (2018: £16,299,000) respectively. The income received during the year amounted to £3,734 (2018: £3,614).

Holdings at the year end and movements during the year are as follows:

	Holdings at 15.10.19 (shares)	Movement (shares)	Holdings at 15.10.18 (shares)
ACD and related parties (Class 3 Income shares)	4,721,831	(380,978)	5,102,809
ACD and related parties (Class 1 Accumulation shares)	8,016	(1,382)	9,398
ACD and related parties (Class 2 Accumulation shares)	838,192	(328,555)	1,166,747

The ACD and related parties of the ACD are ineligible to vote at any general meeting.

13 Shareholder funds

The Fund currently has three share classes: Class 1 (Retail), Class 2 (Institutional) and Class 3 (Associated undertakings of Aviva Plc). The Fund Management Fees are as follows:

Class 1: 1.00%

Class 2: 0.85%

Class 3: 0.35%

The net asset value of the share class, the net asset value per share and the number of shares in the class are shown on pages 115 and 116. The distributions per share are given in the distribution tables on page 127. All the share classes have the same rights on winding up.

14 Shares in issue reconciliation

	Number of shares in issue at 15.10.18	Number of shares issued	Number of shares cancelled	Number of shares converted	Number of shares in issue at 15.10.19

Class 1 Accumulation shares	52,419,736	243,996	(4,081,157)	(164,532)	48,418,043
Class 2 Accumulation shares	8,351,233	110,750	(1,925,024)	105,165	6,642,124

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

15 Derivatives and other financial instruments

The policies applied in the management of financial instruments are set out on pages 9 and 10.

Fair value of financial assets and financial liabilities

There is no significant difference between the carrying values of the financial assets and liabilities and their fair values (2018: £nil).

Currency risk

At the year end date, 99.93% (2018: 98.06%) of the net assets of the Fund were denominated in currencies other than sterling with the effect that the balance sheet and total return can be significantly affected by currency movements. If currency rates were to change by 10.00%, the value of the Fund would change by 9.99% (2018: 9.81%).

Currency	Net foreign currency assets					
	Monetary exposure £000		Non monetary exposure £000		Total £000	
	15.10.19	15.10.18	15.10.19	15.10.18	15.10.19	15.10.18
Danish krone	16	49	–	–	16	49
Euro	1,466	(440)	133,501	154,210	134,967	153,770

Swiss franc	110	512	17,481	5,822	17,591	6,334
US dollar	51	–	–	–	51	–

Interest rate risk

The Fund does not invest in either fixed or floating rate securities and interest rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions which will be affected by fluctuations in interest rates.

At the year end date 1.03% (2018: 4.20%) of the net assets of the Fund were interest bearing and as such the interest rate risk is not considered significant.

The floating rate on bank balances is linked to the Depositary's base rate.

The floating rate on deposits is linked to LIBOR or its overseas equivalent.

Market price risk

At the year end date, 99.20% (2018: 98.72%) of the net assets of the Fund were invested in ordinary shares or stock units admitted to an official stock exchange. If the market value were to change by 10%, the value of the Fund would change by 9.92% (2018: 9.87%).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

16 Direct transaction costs

In the case of shares, broker commissions and transfer taxes, stamp duty is paid by the Fund on each transaction. In addition, there is a dealing spread between buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of the dealing spread.

Dealing spread

As at 15 October 2019, the average portfolio dealing spread was 0.10% (2018: 0.12%). This spread represents the difference between the values determined retrospectively by reference to the bid and offer prices of investments expressed as a percentage of the value determined by reference to the offer price.

17 Post balance sheet events

There are no post balance sheet events which require adjustment or disclosure at the year end (2018: £nil).

DISTRIBUTION TABLES

Final distribution payable in pence per share for the six months ended 15 October 2019

Income shares		Net revenue	Equalisation	Final distribution payable 15 December 2019	Final distribution paid 15 December 2018
Class 3 Income shares	Group 1	5.9699	–	5.9699	6.7034
	Group 2	0.2910	5.6789	5.9699	6.7034

Accumulation shares		Net revenue	Equalisation	Final distribution payable 15 December 2019	Final distribution paid 15 December 2018
Class 1 Accumulation shares	Group 1	3.0277	–	3.0277	3.3827
	Group 2	0.1496	2.8781	3.0277	3.3827
Class 2 Accumulation shares	Group 1	5.0115	–	5.0115	5.5494
	Group 2	0.8669	4.1446	5.0115	5.5494

Final distribution

Group 1 shares are those shares purchased at or before 12:00 noon on 15 April 2019.

Group 2 shares are those shares purchased after 12:00 noon on 15 April 2019.

Interim distribution paid in pence per share for the six months ended 15 April 2019

Income shares		Net revenue	Equalisation	Interim distribution paid 15 June 2019	Interim distribution paid 15 June 2018
Class 3 Income shares	Group 1	1.7914	–	1.7914	1.3999
	Group 2	1.1762	0.6152	1.7914	1.3999

Accumulation shares		Net revenue	Equalisation	Interim distribution paid 15 June 2019	Interim distribution paid 15 June 2018
Class 1 Accumulation shares	Group 1	0.4293	–	0.4293	0.0417
	Group 2	0.3473	0.0820	0.4293	0.0417
Class 2 Accumulation shares	Group 1	0.9256	–	0.9256	0.3897
	Group 2	0.7203	0.2053	0.9256	0.3897

Interim distribution

Group 1 shares are those shares purchased at or before 12:00 noon on 15 October 2018.

Group 2 shares are those shares purchased after 12:00 noon on 15 October 2018.

Equalisation

Equalisation applies only to Group 2 shares, in other words shares purchased during the relevant period. It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

AVIVA INVESTORS CORPORATE BOND FUND

INVESTMENT OBJECTIVE

The Fund will aim to grow your investment through a combination of income and capital returns by investing in bonds issued by companies, whilst aiming to provide a net return greater than the benchmark over the long term (5 years or more).

The benchmark (the "Index") is Markit iBoxx® Sterling Non-Gilts Total Return Index.

INVESTMENT POLICY

Core investment: At least 80% of the Fund will be invested in high quality bonds, which have been independently rated as "investment grade" with a credit rating of BBB-/Baa3 or above, issued by companies and supranational organisations in Sterling or hedged to Sterling.

Other investments: The Fund may also invest in other bonds, including those issued by governments, shares of companies, other funds (including funds managed by Aviva Investors companies), cash and deposits.

Derivatives, such as futures, may be used from time to time, to gain a particular market exposure which would otherwise be difficult or costly to achieve, or to manage the Fund's cash flows in a cost-effective manner. Derivatives may also be used to reduce risk, such as foreign currency risk within the Fund. This type of derivative usage is called "efficient portfolio management".

Strategy: The Fund is actively managed, and the Investment Manager will make high conviction (strong belief) investments at both a company and sector level, basing their investment selection process on a long-term outlook, whilst looking to deliver optimum risk-adjusted returns. The Investment Manager will focus on identifying what they judge to be higher quality corporate bonds through assessment of the business strengths and risks associated with the underlying companies, the valuation of the bonds relative to the market, the views of independent risk rating agencies, and any other relevant factors, whilst also taking advantage of short-term opportunities when they arise.

Environmental, Social and Governance (ESG) factors: ESG factors are integrated into the investment process and are considered alongside a range of financial metrics and research, but the Investment Manager retains discretion over which investments are selected. We also actively engage with companies with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in the prospectus.

Performance & Risk Measurement: The Fund's performance is measured against the Index, after charges and taxes. The Fund does not base its investment process upon the Index, which is only a representation of the investment universe, therefore the Fund will hold bonds that are not part of the Index, and will only hold a relatively small proportion of bonds relative to the number in the Index.

The Index represents the performance of a broad range of investment grade bonds issued by companies and denominated in sterling, with a maturity date exceeding 1 year, but excludes government bonds.

The Index has been selected as a benchmark for performance measurement because it is representative of the type of bonds in which the Fund is likely to invest, and it is therefore an appropriate measure for the Fund's performance.

FUND MANAGER'S REPORT

Performance

Over the twelve months ended 15 October 2019, the Aviva Investors Corporate Bond Fund delivered a total return of 8.27% (share class 1), net of fees. The Fund's benchmark, the Markit iBoxx Sterling Non-Gilts Total Return Index, returned 8.95%.

Review

The Fund posted an attractive total return in what was a positive twelve months for fixed income markets. In the latter stages of 2018, when the corporate bond market was under significant pressure because of worries about possible interest rate hikes in an environment of slowing global growth, we held a cautious stance in terms of the Fund's duration (sensitivity to changes in interest rates). We gradually unwound this position when bond prices recovered in early 2019 and added credit risk to the portfolio, thereby taking advantage of cheaper valuations for many bonds. From spring into the period end, both credit risk and duration were held close to the benchmark. For some of our bond holdings, the recovery of 2019 was not strong enough to offset earlier losses. A notable disappointment was roadside recovery group AA, which struggled after announcing weak profits in 2018. Uncertainty about the prospects for UK retailers also led to disappointing returns by the shopping centre operator Intu Metrocentre. On the positive side, exposure to gilts was helpful given the market's strong rally on hopes for looser monetary policy globally. In sector terms, exposure to UK banks (Barclays, HSBC) and subordinated insurance debt (AXA, Aviva) added value, while Tesco contributed well after a strong operating recovery saw its credit rating restored to investment-grade.

Outlook

We are concerned about corporate bond market fundamentals, and in particular the high levels of debt carried by some issuers going into an environment of slowing growth. Uncertainty over trade is negative for some areas of the credit market and we are therefore avoiding cyclical companies and instead focusing on stable businesses in the higher-quality areas. While we believe that credit spreads will widen next year as the contraction of the global economy becomes more obvious, in the shorter term we expect further positive performance, not least because investor flows into the asset class have picked up significantly from twelve months ago. The market is also underpinned by the restarting of the European Central Bank's quantitative easing (QE) programme, which is scheduled for November. Although the composition of the asset repurchasing has not yet been announced, the fact that the ECB is already close to its limits in terms of sovereign bond buying means that corporate bonds are likely to be included. During the last round of QE, this proved to be highly supportive of the credit markets, including sterling.

Synthetic Risk and Reward Indicator

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean ‘risk free’.
- Bond values are affected by changes in interest rates, and the bond issuer’s creditworthiness. Bonds that produce a higher level of income usually have a greater risk of default.
- Further information on the risks applicable to the Fund is detailed in the Fund’s Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at www.avivainvestors.com or from the ACD on request.

§ The share class was closed on 1 June 2018.

‡ The operating charges are calculated on an ex-post basis and as such may differ from the Ongoing Charge Figure where:

(a) Changes to fee rates were made during the year and the Ongoing Charge Figure has been amended to be future proofed for this change.

(b) The Ongoing Charge has been annualised for a share class that has not yet been open for a full year.

The direct transaction costs have been stated after deducting, in the case of single-priced funds, the proportion of the amounts collected from dilution adjustments or dilution levies that relates to direct transaction costs and, in the case of dual-priced funds, the amounts collected in relation to direct transaction costs added to, or subtracted from, the valuations by virtue of COLL 6.3.6 G (4).

≈ The high and low prices disclosed are the high and low prices for the accounting period and not the calendar year and are based on published prices. The net asset value per share price is based on the net asset value in the published accounts and may be different due to post year end accounting adjustments.

Ongoing Charges Figure*

Class 3	0.32%	0.32%

* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the year. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme. The OCF for share class 1, when aggregated with certain other payments out of scheme property incurred in respect of it, is capped at 0.80%. Please see the Prospectus for full details.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

Net capital gains/(losses) on investment during the year comprise:		
Currency gains	21	36
Derivative contracts (losses)/gains	(3,546)	936
Expenses relating to the purchase and sale of investments	–	(3)
Forward currency contracts gains/(losses)	9	(90)
Non-derivative securities gains/(losses)	141,025	(69,075)
Net capital gains/(losses)	137,509	(68,196)

3 Revenue

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Bank and deposit interest	39	94
Interest on debt securities	76,606	72,532
Income from derivatives	(89)	(166)
Total revenue	76,556	72,460

4 Expenses

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Payable to the Authorised Corporate Director ("ACD"), associates of the ACD or agents of either of them:		
Fund Management Fee/ACD's periodic charge*	8,369	7,417
Registration fees	–	69
	8,369	7,486
Payable to the Depositary, associates of the Depositary or agents of either of them:		
Depositary's fee	–	71
Interest payable	9	58
Safe custody fee	–	121
	9	250
Other expenses:		
Audit fee**	–	8
Printing and postage expenses	–	3
Statement fees	–	47
	–	58
Total expenses	8,378	7,794
Less those expenses rebated by the ACD	–	(5)
Net expenses	8,378	7,789

* From 4 June 2018 the Fund changed to a single fixed charge known as the Fund Management Fee (FMF). The FMF covers fees and expenses in relation to the operation and administration of the Company and the Fund.

** The audit fee was £10,013 (2018: £9,628) net of VAT. With effect from 4 June 2018, the audit fee was no longer accrued for separately and now forms part of the FMF.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

5 Taxation

a Analysis of tax charge

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Corporation tax	–	–
Total current tax (see note 5b)	–	–

b Factors affecting current tax charge

The tax assessed for the year is lower (2018: lower) than the standard rate of corporation tax in the UK for an Authorised Investment Fund (20%) (2018: 20%).

The differences are explained below:

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Net revenue before taxation	68,178	64,671
Corporation tax at 20%	13,636	12,934
Effects of:		
Tax deductible on interest distributions	(13,636)	(12,934)
Current tax charge (see note 5a)	–	–

Authorised Investment Funds are exempt from tax on capital gains. Therefore, any capital return is not included in the above reconciliation.

c Deferred tax

There was no provision for deferred tax at the year end (2018: £nil).

6 Distributions

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:		
Gross interest distribution for the three months ended 15 January	15,923	16,782
Gross interest distribution for the three months ended 15 April	17,607	15,591
Gross interest distribution for the three months ended 15 July	17,863	16,521
Gross interest distribution for the three months ended 15 October	17,091	16,307
	68,484	65,201
Add: Revenue deducted on cancellation of shares	1,432	545
Deduct: Revenue received on issue of shares	(1,737)	(1,054)
Total distributions	68,179	64,692
Reconciliations of distributions for the year to net revenue after taxation		
Distributions for the year	68,179	64,692
Equalisation on conversions	–	(22)
Undistributed revenue brought forward	(2)	(1)
Undistributed revenue carried forward	1	2
Net revenue after taxation	68,178	64,671

Details of the distributions per share are set out in the distribution tables on pages 144 and 145.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

7 Fair value hierarchy

Valuation technique	As at 15.10.19		As at 15.10.18	
	Assets £000	Liabilities £000	Assets £000	Liabilities £000
Level 1: Quoted prices	258	–	689	–
Level 2: Observable market data	2,482,471	–	2,072,841	(2,006)
Level 3: Unobservable data	1	–	1	–
Total value	2,482,730	–	2,073,531	(2,006)

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities.

The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority to unobservable inputs. Disclosure is required of the value in each category in order to give an insight into the extent to which fair value measurements are subjective.

The disclosure is split into the following categories:

Level 1: Unadjusted quoted price in an active market for an identical instrument;

Level 2: Valuation techniques using observable inputs other than quoted prices within level 1;

Level 3: Valuation techniques using unobservable inputs.

8 Debtors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued revenue	33,201	31,223
Amounts receivable on issue of shares	1,974	170
Sales awaiting settlement	667	2,905
Total debtors	35,842	34,298

9 Cash and bank balances

	As at 15.10.19 £000	As at 15.10.18 £000
Amounts held at futures clearing houses and brokers	40	336
Cash and bank balances	171	65,854
Total cash and bank balances	211	66,190

10 Other creditors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued expenses	333	879
Amounts payable for cancellation of shares	626	982
Purchases awaiting settlement	10,257	–
Total other creditors	11,216	1,861

11 Contingent liabilities and commitments

There were no contingent liabilities or commitments at the year end (2018: £nil).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

12 Related party transactions

Aviva Investors UK Fund Services Limited, Aviva Investors Global Services Limited and the Aviva Group are deemed to be related parties per section 33.10 of FRS 102 as they are entities with control, joint control or significant influence over the entity.

Fund Management Fee/ACD periodic charges paid to Aviva Investors UK Fund Services Limited ("the ACD") are shown in note 4 and details of shares issued and cancelled by the ACD are shown in the statement of change in net assets attributable to shareholders. The balance due to the ACD at the year end in respect of Fund Management Fee/ACD periodic charges was £332,508 (2018: £879,004). Any balance due from the ACD in respect of issues is shown in note 8. Any balance due to the ACD in respect of cancellations is shown in note 10.

Distributions payable to the ACD and related parties of the ACD during the year amounted to £64,622,369 (2018: £60,335,833). The amount outstanding at the year end was £16,073,676 (2018: £15,343,547). Related parties of the ACD are deemed to be all companies under the control of Aviva Plc. This will include companies which hold shares in the Fund on behalf of other external investors.

Any investments managed and advised by Aviva Investors Global Services Limited or associated with the Aviva Group are identified on the portfolio statement.

The total purchases and sales on these investments during the year amounted to £1,086,877,100 (2018: £667,100,000) and £1,071,435,474 (2018: £686,000,000) respectively. The income received during the year amounted to £1,862,899 (2018: £1,195,914).

Holdings at the year end and movements during the year are as follows:

	Holdings at 15.10.19 (shares)	Movement (shares)	Holdings at 15.10.18 (shares)
ACD and related parties (Class 1 Income shares)	13,640	(23,267)	36,907
ACD and related parties (Class 2 Income shares)	2,570,607	(2,396,489)	4,967,096
ACD and related parties (Class 3 Income shares)	1,856,466,415	160,474,352	1,695,992,063
ACD and related parties (Class 3 Accumulation shares)	14,433,202	674,523	13,758,679

The ACD and related parties of the ACD are ineligible to vote at any general meeting.

13 Shareholder funds

The Fund currently has three share classes: Class 1 (Retail), Class 2 (Institutional) and Class 3 (Associated undertakings of Aviva Plc). The Fund Management Fees are as follows:

Class 1: 0.77%
Class 2: 0.62%
Class 3: 0.32%

The net asset value of the share class, the net asset value per share and the number of shares in the class are shown on pages 130 and 131. The distributions per share are given in the distribution tables on pages 144 and 145. All the share classes have the same rights on winding up.

14 Shares in issue reconciliation

	Number of shares in issue at 15.10.18	Number of shares issued	Number of shares cancelled	Number of shares converted	Number of shares in issue at 15.10.19
Class 1 Income shares	153,092,711	3,180,392	(16,704,391)	–	139,568,712
Class 2 Income shares	67,946,604	28,525,031	(4,391,742)	–	92,079,893
Class 3 Income shares	1,695,992,063	468,831,448	(308,357,096)	–	1,856,466,415
Class 3 Accumulation shares	13,763,690	2,438,212	(1,768,700)	–	14,433,202

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

15 Derivatives and other financial instruments

The policies applied in the management of financial instruments are set out on pages 9 and 10.

Fair value of financial assets and financial liabilities

There is no significant difference between the carrying values of the financial assets and liabilities and their fair values (2018: £nil).

Currency risk

At the year end date, none (2018: 0.01%) of the net assets of the Fund were denominated in currencies other than sterling and as such the currency risk is not considered significant.

Interest rate risk

The interest rate profile of the Fund's financial assets and liabilities at 15 October 2019 was:

Currency 15.10.19	Floating Rate £000	Fixed Rate £000	None £000	Total £000
Financial Assets				
Sterling	32,127	2,450,457	36,199	2,518,783
Financial Liabilities				
Sterling	–	–	(28,117)	(28,117)
Total	32,127	2,450,457	8,082	2,490,666

The interest rate profile of the Fund's financial assets and liabilities at 15 October 2018 was:

Currency 15.10.18	Floating Rate £000	Fixed Rate £000	None £000	Total £000
Financial Assets				
Sterling	88,296	2,049,041	34,988	2,172,325
Euro	1,694	–	563	2,257
Financial Liabilities				
Sterling	–	–	(18,564)	(18,564)
Euro	–	–	(1,990)	(1,990)
Total	89,990	2,049,041	14,997	2,154,028

The floating rate on bank balances is linked to the Depositary's base rate.

The floating rate on deposits is linked to LIBOR or its overseas equivalent.

Interest rate exposures

The Aviva Investors Investment Risk Team performs regular stress testing across all portfolios to determine market sensitivities and risk exposures using BlackRock's Aladdin risk model and stress testing methodology. Under this methodology, if 5Y GBP interest rates had increased by 1% as at the balance sheet date, the net asset value of the Fund would have decreased by £189,554,564 (2018: £153,979,110). If interest rates had decreased by 1% as at the balance sheet date, the net asset value of the Fund would have increased by £189,554,564 (2018: £153,979,110). These calculations assume the interest rate shock is propagated to all risk factors the Fund is exposed to, based on historical market correlations and volatilities between factors.

Market price risk

At the year end date, 99.68% (2018: 96.17%) of the net assets of the Fund were invested in debt securities admitted to an official stock exchange. If the market value were to change by 10%, the value of the Fund would change by 9.97% (2018: 9.62%).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

16 Counterparty exposure**Financial derivative exposure**

The types of derivatives held at the year end date were forward currency contracts and credit default swaps. Details of individual contracts are disclosed in the Portfolio Statement and the total position by counterparty at the year end date was as follows:

15.10.19	Futures contracts £000	Total £000
JPMorgan	258	258
Total	258	258

15.10.18	Forward currency contracts £000	Futures contracts £000	Total £000
J.P. Morgan	(16)	–	(16)
Royal Bank of Scotland	–	689	689
Total	(16)	689	673

The counterparty exposure on forward currency contracts is reported at their mark to market values, but for credit default swaps it is only the positive mark to market values that are reported.

Collateral

At the year end date no collateral was held or pledged by the Fund or on behalf of the counterparties in respect of the above (2018: £nil).

17 Debt security credit analysis

	Market value £000		Total net assets %	
	15.10.19	15.10.18	15.10.19	15.10.18
Investment grade securities	2,379,188	1,935,550	95.53%	89.86%
Below investment grade securities	69,581	113,491	2.79%	5.27%
Unrated securities	1	1	–	–
Total debt securities	2,448,770	2,049,042	98.32%	95.13%

Credit rating designations BBB or above are considered investment grade whereas credit rating designations BB or lower are considered below investment grade.

18 Direct transaction costs

Due to the nature of the investments held, no transaction costs or taxes were incurred on the Fund's purchases or sales during the current year ended 15 October 2019 (2018: £nil). The total purchases for the year amounted to £2,072,390,188 (2018: £1,301,073,193) and the total sales amounted to £1,785,657,219 (2018: £1,262,971,885).

Dealing spread

As at 15 October 2019, the average portfolio dealing spread was 0.57% (2018: 0.53%). This spread represents the difference between the values determined retrospectively by reference to the bid and offer prices of investments expressed as a percentage of the value determined by reference to the offer price.

19 Post balance sheet events

There are no post balance sheet events which require adjustment or disclosure at the year end (2018: £nil).

DISTRIBUTION TABLES

Final distribution payable in pence per share for the three months ended 15 October 2019

Income shares		Gross revenue	Equalisation	Final distribution payable 15 December 2019	Final distribution paid 15 December 2018
Class 1 Income shares	Group 1	0.3591	–	0.3591	0.3798

	Group 2	0.0000	0.0000	0.0000	0.3177

Accumulation shares		Gross revenue	Equalisation	Interim distribution paid 15 March 2019	Interim distribution paid 15 March 2018
Class 3 Accumulation shares	Group 1	1.3288	–	1.3288	1.3514
	Group 2	0.3940	0.9348	1.3288	1.3514

Interim distribution

Group 1 shares are those shares purchased at or before 12:00 noon on 15 October 2018.

Group 2 shares are those shares purchased after 12:00 noon on 15 October 2018.

Equalisation

Equalisation applies only to Group 2 shares, in other words shares purchased during the relevant period. It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

AVIVA INVESTORS DISTRIBUTION FUND

INVESTMENT OBJECTIVE

The Fund aims to deliver an income equivalent to the benchmark income whilst seeking to provide capital growth over the long term (5 years or more).

The benchmark (the Index[®]) combines 35% FTSE[®] All-Share Index and 65% of a ML[®] Composite index. The income target is measured over any given 3-year period (before charges and taxes).

The Index of 35% FTSE[®] All Share and 65% ML composite combines a broad UK equities index with a broad global bond index. The ML composite index in turn combines 50% ML £ Non-Gilt A, 50% ML £ Non-Gilt BBB, this means it covers a range of bonds with different credit ratings.

The Index has been selected as a benchmark for performance and risk measurement because it is representative of the type of bonds and shares in which the Fund is likely to invest, and it is therefore an appropriate comparator for the Fund's performance.

INVESTMENT POLICY

Core investment: At least 60% of the Fund will be invested in bonds issued by companies, governments or supranational organisations. The Fund will also invest in shares of UK companies (incorporated or domiciled in the UK), or non-UK companies which are listed in the UK or which have significant trading activities in the UK. Bonds will be issued in Sterling or hedged to Sterling, and a minimum of 80% of bond holdings will have been independently rated as "investment grade" with a credit rating of BBB-/Baa3 or above.

Other investments: The Fund may also invest in other shares, other funds (including funds managed by Aviva Investors companies), cash, and deposits.

Derivatives, such as futures, may be used from time to time, to gain a particular market exposure which would otherwise be difficult or costly to achieve, or to manage the Fund's cash flows in a cost-effective manner. Derivatives may also be used to reduce risk, such as foreign currency risk within the Fund, which is hedged using Forward Foreign Exchange contracts. This type of derivative usage is called "efficient portfolio management".

Strategy: The Fund is actively managed, and the Investment Manager will make high conviction (strong belief) investments at both a security and sector level, with a view to delivering a sustainable and diversified level of income, whilst basing their investment selection process on a long-term outlook, and with the intention of delivering efficient risk-adjusted returns.

Environmental, Social & Governance (ESG) factors: ESG factors are integrated into the investment process and are considered alongside a range of financial metrics and research, but the Investment Manager retains discretion over which investments are selected. We also actively engage with companies and use voting rights with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in the prospectus.

Performance & Risk Measurement: The Fund's income return target is measured against the Index, and the Fund's overall performance is also compared against the Index.

The Fund does not base its investment process upon the Index, so will not hold every company in the Index, and may also hold companies that do not form part of it.

The Fund uses a "tracking error" to measure the consistency between the Fund's returns and the returns of the Index. In general, the lower the tracking error, the more consistent the Fund's returns are relative to the Index, and vice-versa. The Fund is expected to have an average yearly tracking error of between 1.25% and 3.75% when compared to the Index. In certain conditions the Fund may be outside of this range.

FUND MANAGER'S REPORT

Performance

Over the twelve months ended 15 October 2019, the Aviva Investors Distribution Fund delivered a total return of 9.38% (share class 1) net of fees. The Fund's benchmark, which comprises 35% FTSE[®] All-Share Index and 65% ML Composite (50% ML £ Non-Gilt A, 50% ML £ Non Gilt BBB), returned 9.50%.

Review

The Fund posted an attractive total return in what was a positive twelve months for financial assets. In the corporate bond portion of the Fund, returns were by boosted holdings of corporate hybrids (a mixture of debt and equity), with long-dated issues from Telefonica, Enel and Orange performing strongly over the year. Exposure to gilts was also helpful given the market's strong rally on hopes for looser monetary policy globally. In sector terms, exposure to UK banks (Barclays, HSBC) and subordinated insurance debt (AXA, Aviva) added value, while Tesco contributed well after a strong operating recovery saw its credit rating restored to investment-grade. A notable detractor was roadside recovery group AA, which only belatedly regained momentum after announcing weak profits in 2018. Uncertainty about the prospects for UK retailers also led to disappointing returns by the shopping centre operator Intu Metrocentre.

A strong contribution to returns was made by UK equity investment over the period. The main source of added value was stock selection in the financials sector, where we have identified several attractive investment opportunities. Holdings in Pheonix Group and Intermediate Capital performed well. Life insurance group Phoenix raised its cash generation targets following the acquisition of Standard Life Aberdeen's open-book insurance business, allowing management to raise the company's final dividend payment for 2018. More recently, Phoenix's interim results revealed synergies from last year's acquisition of Standard Life Aberdeen's assurance business, while better than expected cash generation led management to guide towards the top end of their forecasted range for 2019 as a whole. Intermediate Capital, a specialist asset manager which invests across a range of debt, private equity and real estate through closed-ended funds, continues to beat asset raising targets, launch new vintages and has the seemingly unique ability to increase fees. The company has been very successful at matching investor appetite for alternative assets with strong capital demand from underfunded small and medium-sized companies.

AVIVA INVESTORS DISTRIBUTION FUND (CONTINUED)

FUND MANAGER'S REPORT (CONTINUED)

Outlook

We are concerned about corporate bond market fundamentals, and in particular the high levels of debt carried by some issuers going into an environment of slowing growth. Uncertainty over trade is negative for some areas of the credit market and we are therefore avoiding cyclical companies and instead focusing on stable businesses in the higher-quality areas. While we believe that credit spreads will widen next year as the contraction in the global economy becomes more obvious, in the shorter term we expect further positive performance, not least because investor flows into the asset class have picked up significantly from twelve months ago. The market is also underpinned by the restarting of the European Central Bank's quantitative easing programme, which is scheduled for November. In the equity portion of the Fund, we continue to look through the market noise and invest based on company fundamentals with a rigorous focus on cash and valuation discipline. We believe the UK equities market continues to trade at a discount to global peers and that geopolitical and economic volatility will continue to create fundamentally-driven investment opportunities at attractive valuations.

November 2019

Sources: Fund and peer group performance figures – Lipper, a Thomson Reuters Company, mid to mid basis with net income reinvested in GBP, with no initial charges applied. Market data – Bloomberg.

As noted above, the performance figures in this commentary have been sourced from an external party and are based on published prices. The performance figures quoted in the comparative tables on page 148 and 149 are based on the net asset value per the published accounts and may be different due to post year end accounting adjustments.

Any opinions expressed are those of the Fund manager. They should not be viewed as a guarantee of a return from an investment in the Funds. The content of the commentary should not be viewed as a recommendation to invest nor buy or sell securities. Past performance is not a guide to the future. The value of an investment and any income from it can go down as well as up. Investors may not get back the original amount invested.

Synthetic Risk and Reward Indicator

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- Bond values are affected by changes in interest rates, and the bond issuer's creditworthiness. Bonds that produce a higher level of income usually have a greater risk of default.
- The value of investments will be affected by changes in exchange rates.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at www.avivainvestors.com or from the ACD on request.

Highest share price	123.42	123.74
Lowest share price	117.35	114.06

§ The share class was closed on 1 June 2018.

‡ The operating charges are calculated on an ex-post basis and as such may differ from the Ongoing Charge Figure where:

(a) Changes to fee rates were made during the year and the Ongoing Charge Figure has been amended to be future proofed for this change.

(b) The Ongoing Charge has been annualised for a share class that has not yet been open for a full year.

The direct transaction costs have been stated after deducting, in the case of single-priced funds, the proportion of the amounts collected from dilution adjustments or dilution levies that relates to direct transaction costs and, in the case of dual-priced funds, the amounts collected in relation to direct transaction costs added to, or subtracted from, the valuations by virtue of COLL 6.3.6 G (4).

≈ The high and low prices disclosed are the high and low prices for the accounting period and not the calendar year and are based on published prices. The net asset value per share price is based on the net asset value in the published accounts and may be different due to post year end accounting adjustments.

Ongoing Charges Figure*

Share class	15.10.19	15.10.18
Class 1	0.88%	0.88%
Class 2	0.73%	0.73%
Class 3	0.33%	0.33%

* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the year. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

NOTES TO THE FINANCIAL STATEMENTS

1 Accounting basis and policies

Please see pages 8 to 10 for accounting basis and policies.

2 Net capital gains/(losses)

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Net capital gains/(losses) on investment during the year comprise:		
Currency gains	3	2
Derivative contracts (losses)/gains	(2)	16
Expenses relating to the purchase and sale of investments	–	(2)
Non-derivative securities gains/(losses)	16,601	(14,293)
Net capital gains/(losses)	16,602	(14,277)

3 Revenue

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Bank and deposit interest	18	3
Interest on debt securities	6,577	6,108
Income from derivatives	(2)	(8)
Overseas dividends	35	283
Property income distributions	142	33
UK dividends	4,234	3,944
Underwriting commission	1	–
Total revenue	11,005	10,363

4 Expenses

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Payable to the Authorised Corporate Director ("ACD"), associates of the ACD or agents of either of them:		
Fund Management Fee/ACD's periodic charge*	2,150	2,163
Registration fees	–	169
	2,150	2,332
Payable to the Depositary, associates of the Depositary or agents of either of them:		
Depositary's fee	–	23
Interest payable	1	–
Safe custody fee	–	11
	1	34
Other expenses:		
Audit fee**	–	7
Printing & postage expenses	–	1
Statement fees	–	4
	–	12
Total expenses	2,151	2,378

* From 4 June 2018 the Fund changed to a single fixed charge known as the Fund Management Fee (FMF). The FMF covers fees and expenses in relation to the operation and administration of the Company and the Fund.

** The audit fee was £9,790 (2018: £9,413) net of VAT. With effect from 4 June 2018, the audit fee was no longer accrued for separately and now forms part of the FMF.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

5 Taxation**a Analysis of tax charge**

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Adjustments in respect of prior period	6	–
Overseas tax suffered	(5)	–
Tax on property income distributions	29	–
Total current tax (see note 5b)	30	–

b Factors affecting current tax charge

The tax assessed for the year is lower (2018: lower) than the standard rate of corporation tax in the UK for an Authorised Investment Fund (20%) (2018: 20%).

The differences are explained below:

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Net revenue before taxation	8,854	7,985
Corporation tax at 20%	1,771	1,597
Effects of:		
Adjustments in respect of prior period	6	–
Overseas dividends not subject to corporation tax	(7)	(57)
Overseas tax suffered	(5)	–
Tax deductible on interest distributions	(917)	(765)
UK dividends not subject to corporation tax	(847)	(775)
Tax on property income distributions	29	–
Current tax charge (see note 5a)	30	–

Authorised Investment Funds are exempt from tax on capital gains. Therefore, any capital return is not included in the above reconciliation.

c Deferred tax

There was no provision for deferred tax at the year end (2018: £nil).

6 Distributions

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:		
Gross interest distribution for the three months ended 15 January	2,075	1,839
Gross interest distribution for the three months ended 15 April	2,620	2,373
Gross interest distribution for the three months ended 15 July	2,529	2,343
Gross interest distribution for the three months ended 15 October	2,671	2,604
	9,895	9,159
Add: Revenue deducted on cancellation of shares	98	74
Deduct: Revenue received on issue of shares	(93)	(167)
Total distributions	9,900	9,066
Reconciliations of distributions for the year to net revenue after taxation		
Distributions for the year	9,900	9,066
ACD's periodic charge borne by the capital account	(1,076)	(1,081)
Net revenue after taxation	8,824	7,985

Details of the distributions per share are set out in the distribution tables on pages 163 and 164.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

7 Fair value hierarchy

Valuation technique	As at 15.10.19		As at 15.10.18	
	Assets at £000	Liabilities at £000	Assets at £000	Liabilities at £000
Level 1: Quoted prices	99,572	(35)	90,952	–
Level 2: Observable market data	180,864	–	174,234	(169)
Total value	280,436	(35)	265,186	(169)

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities.

The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority to unobservable inputs. Disclosure is required of the value in each category in order to give an insight into the extent to which fair value measurements are subjective.

The disclosure is split into the following categories:

Level 1: Unadjusted quoted price in an active market for an identical instrument;

Level 2: Valuation techniques using observable inputs other than quoted prices within level 1;

Level 3: Valuation techniques using unobservable inputs.

8 Debtors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued revenue	2,793	2,972
Amounts receivable on issue of shares	209	723
Income tax recoverable	1	–
Overseas tax recoverable	–	3
Sales awaiting settlement	–	296
Total debtors	3,003	3,994

9 Cash and bank balances

	As at 15.10.19 £000	As at 15.10.18 £000
Amounts held at futures clearing house and brokers	106	15
Cash and bank balances	6,492	5,898
Total cash and bank balances	6,598	5,913

10 Other creditors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued expenses	86	256
Amounts payable for cancellation of shares	490	105
Income tax payable	28	–
Purchases awaiting settlement	769	13
Total other creditors	1,373	374

11 Contingent liabilities and commitments

There were no contingent liabilities or commitments at the year end (2018: £nil).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

12 Related party transactions

Aviva Investors UK Fund Services Limited, Aviva Investors Global Services Limited and the Aviva Group are deemed to be related parties per section 33.10 of FRS 102 as they are entities with control, joint control or significant influence over the entity.

Fund Management Fee/ACD's periodic charge paid to Aviva Investors UK Fund Services Limited ("the ACD") are shown in note 4 and details of shares issued and cancelled by the ACD are shown in the statement of change in net assets attributable to shareholders. The balance due to the ACD at the year end in respect of Fund Management Fee/ACD's periodic charges was £86,498 (2018: £255,739). Any balance due from the ACD in respect of issues is shown in note 8. Any balance due to the ACD in respect of cancellations is shown in note 10.

Distributions payable to the ACD and related parties of the ACD during the year amounted to £2,065,764 (2018: £1,807,120). The amount outstanding at the year end was £579,308 (2018: £533,621). Related parties of the ACD are deemed to be all companies under the control of Aviva Plc. This will include companies which hold shares in the Fund on behalf of other external investors.

Any investments managed and advised by Aviva Investors Global Services Limited or associated with the Aviva Group are identified on the portfolio statement.

The total purchases and sales on these investments during the year amounted to £nil (2018: £nil) and £1,694,160 (2018: £2,861,908) respectively. The income received during the year amounted to £179,685 (2018: £291,082).

Holdings at the year end and movements during the year are as follows:

	Holdings at 15.10.19 (shares)	Movement (shares)	Holdings at 15.10.18 (shares)
ACD and related parties (Class 1 Income shares)	–	(7,605)	7,605
ACD and related parties (Class 2 Income shares)	17,116,839	2,687,767	14,429,072
ACD and related parties (Class 3 Income shares)	1,356,947	(97,318)	1,454,265
ACD and related parties (Class 2 Accumulation shares)	8,329,195	(1,394,830)	9,724,025

The ACD and related parties of the ACD are ineligible to vote at any general meeting.

13 Shareholder funds

The Fund currently has three share classes: Class 1 (Retail), Class 2 (Institutional) and Class 3 (Associated undertakings of Aviva Plc). The Fund Management Fees are as follows:

Class 1: 0.88%
Class 2: 0.73%
Class 3: 0.33%

The net asset value of the share class, the net asset value per share and the number of shares in the class are shown on pages 148 and 149. The distributions per share are given in the distribution tables on pages 163 and 164. All the share classes have the same rights on winding up.

14 Shares in issue reconciliation

	Number of shares in issue at 15.10.18	Number of shares issued	Number of shares cancelled	Number of shares converted	Number of shares in issue at 15.10.19
Class 1 Income shares	30,314,937	1,078,419	(2,674,966)	(244,595)	28,473,795
Class 2 Income shares	70,635,737	4,521,555	(5,534,740)	237,664	69,860,216
Class 3 Income shares	1,454,265	47,545	(144,863)	–	1,356,947
Class 1 Accumulation shares	3,524,294	139,305	(652,350)	(24,024)	2,987,225
Class 2 Accumulation shares	21,371,510	2,968,830	(1,361,507)	32,316	23,011,149

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

15 Derivatives and other financial instruments

The policies applied in the management of financial instruments are set out on pages 9 and 10.

Fair value of financial assets and financial liabilities

There is no significant difference between the carrying values of the financial assets and liabilities and their fair values (2018: £nil).

Currency risk

At the year end date, 0.00% (2018: 0.00%) of the net assets of the Fund were denominated in currencies other than sterling and as such the currency risk is not considered significant.

Interest rate risk

The interest rate profile of the Fund's financial assets and liabilities at 15 October 2019 was:

Currency 15.10.19	Floating Rate £000	Fixed Rate £000	None £000	Total £000
Financial Assets				
Sterling	10,976	176,480	102,575	290,031
US dollar	6	–	–	6
Financial Liabilities				
Sterling	–	–	(3,447)	(3,447)
Total	10,982	176,480	99,128	286,590

The interest rate profile of the Fund's financial assets and liabilities at 15 October 2018 was:

Currency 15.10.18	Floating Rate £000	Fixed Rate £000	None £000	Total £000
Financial Assets				
Euro	140	–	–	140
Sterling	10,943	169,059	94,918	274,920
US dollar	6	–	27	33
Financial Liabilities				
Euro	–	–	(169)	(169)
Sterling	–	–	(2,404)	(2,404)
Total	11,089	169,059	92,372	272,520

The floating rate on bank balances is linked to the Depositary's base rate.

The floating rate on deposits is linked to LIBOR or its overseas equivalent.

Interest rate exposures

The Aviva Investors Investment Risk Team performs regular stress testing across all portfolios to determine market sensitivities and risk exposures using BlackRock's Aladdin risk model and stress testing methodology. Under this methodology, if 5Y GBP interest rates had increased by 1% as at the balance sheet date, the net asset value of the Fund would have decreased by £23,785,447 (2018: £14,044,463). If interest rates had decreased by 1% as at the balance sheet date, the net asset value of the Fund would have increased by £23,785,447 (2018: £14,044,463). These calculations assume the interest rate shock is propagated to all risk factors the Fund is exposed to, based on historical market correlations and volatilities between factors.

Market price risk

At the year end date, 97.84% (2018: 97.25%) of the net assets of the Fund were invested in ordinary shares or stock units or debt securities admitted to an official stock exchange. If the market value were to change by 10%, the value of the Fund would change by 9.78% (2018: 9.73%).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

16 Counterparty exposure**Financial derivative exposure**

The types of derivatives held at the year end date were futures contracts and credit default swaps. Details of individual contracts are disclosed in the Portfolio Statement.

	Swaps £000	Futures contracts £000	Total £000
15.10.19			
JPMorgan	–	–	–
Total	–	–	–

	Swaps £000	Futures contracts £000	Total £000
15.10.18			
JPMorgan	–	–	–
Total	–	–	–

The counterparty exposure on futures contracts is reported at their positive mark to market values.

Collateral

At the year end date no collateral was held or pledged by the Fund or on behalf of the counterparties in respect of the above (2018: £nil).

17 Debt security credit analysis

	Market value £000		Total net assets %	
	15.10.19	15.10.18	15.10.19	15.10.18
Investment grade securities	161,091	151,884	56.23	55.75%
Below investment grade securities	19,773	22,350	6.88	8.19%
Total debt securities	180,864	174,234	63.11	0.64

Credit rating designations BBB or above are considered investment grade whereas credit rating designations BB or lower are considered below investment grade.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

18 Direct transaction costs

In the case of shares, broker commissions and transfer taxes, stamp duty is paid by the Fund on each transaction. In addition, there is a dealing spread between buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of the dealing spread.

Dealing spread

As at 15 October 2019, the average portfolio dealing spread was 0.51% (2018: 0.44%). This spread represents the difference between the values determined retrospectively by reference to the bid and offer prices of investments expressed as a percentage of the value determined by reference to the offer price.

19 Post balance sheet events

There are no post balance sheet events which require adjustment or disclosure at the year end (2018: £nil).

DISTRIBUTION TABLES

	Group 2	0.8863	0.8407	1.7270	1.6271

Interim distribution

Group 1 shares are those shares purchased at or before 12:00 noon on 15 October 2018.

Group 2 shares are those shares purchased after 12:00 noon on 15 October 2018.

Equalisation

Equalisation applies only to Group 2 shares, in other words shares purchased during the relevant period. It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

AVIVA INVESTORS HIGH YIELD BOND FUND

INVESTMENT OBJECTIVE

The Fund will aim to grow your investment through a combination of income and capital returns by investing in bonds issued by companies, whilst aiming to provide a net return greater than the benchmark over the long term (5 years or more).

The benchmark (the "Index") is Bloomberg® Barclays® Pan European High Yield Index 2% Issuer Capped (Sterling Hedged).

INVESTMENT POLICY

Core investment: At least 80% of the Fund will be invested in high yield bonds, which have been independently rated as sub-investment grade with a credit rating below BBB-/Baa3, issued by companies and supranational organisations in Sterling or hedged to Sterling.

Sub-investment grade bonds are typically regarded as being of lower quality and therefore higher risk than "investment grade" bonds, but typically offer a higher yield.

Other investments: The Fund may also invest in other bonds, including those issued by governments, shares of companies, other funds (including funds managed by Aviva Investors companies), cash and deposits.

Derivatives, such as futures, may be used from time to time, to gain a particular market exposure which would otherwise be difficult or costly to achieve, or to manage the Fund's cash flows in a cost-effective manner. Derivatives may also be used to reduce risk, such as foreign currency risk within the Fund. This type of derivative usage is called "efficient portfolio management".

Strategy: The Fund is actively managed, and the Investment Manager will make high conviction (strong belief) investments at both a company and sector level, basing their investment selection process on a long-term outlook, whilst looking to deliver optimum risk adjusted-returns. The Investment Manager will focus on identifying what they judge to be higher quality sub-investment grade bonds through assessment of the business strengths and risks associated with the underlying companies, the valuation of the bonds relative to the market, the views of independent risk rating agencies, and any other relevant factors, whilst also taking advantage of short-term opportunities when they arise.

Environmental, Social and Governance (ESG) factors: ESG factors are integrated into the investment process and are considered alongside a range of financial metrics and research, but the Investment Manager retains discretion over which investments are selected. We also actively engage with companies with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in the prospectus.

Performance & Risk Measurement: The Fund's performance is measured against the Index, after charges and taxes.

The Fund does not base its investment process upon the Index, which is only a representation of the investment universe, therefore the Fund will hold bonds that are not part of the Index, and will only hold a relatively small proportion of bonds relative to the number in the Index.

The Index represents the performance of a broad range of sub-investment grade bonds issued in Euro, Sterling, Danish krone, Norwegian krone, Swedish krona, and Swiss franc, hedged to Sterling, but caps the exposure to a single issuer (company) at 2%.

The Index has been selected as a benchmark for performance measurement because it is representative of the type of bonds in which the Fund is likely to invest, and it is therefore an appropriate measure for the Fund's performance.

FUND MANAGER'S REPORT

Performance

Over the twelve months ended 15 October 2019, the Aviva Investors High Yield Bond Fund delivered a total return of 5.23% (share class 1) net of fees. The Fund's benchmark*, the Bloomberg Barclays Pan European High Yield Index 2% Issuer Capped, returned 6.70%.

Review

High-yield corporate bonds posted steady gains in the twelve months under review, which was against many expectations. The period was not without volatility, however. In the latter stages of 2018, when the market was under significant pressure on worries about stuttering global growth and hawkish central bank rhetoric, we held a cautious stance in terms of the Fund's sensitivity to changes in interest rates ('duration'). We gradually unwound this position when bond prices recovered in early 2019 and added credit risk to the portfolio, thereby taking advantage of cheaper valuations for many bonds. The Fund ended the period neutrally positioned in terms of both credit risk and duration. Performance was boosted by exposure to longer-dated bonds, which rallied as investors reappraised their outlook for interest rates. Security selection was helpful overall, with good contributions being made by Peugeot, Softbank, Telecom Italia and Virgin Media. For Peugeot and Softbank, the main performance catalyst was merger and acquisition speculation. Among the disappointments over the period were heat exchanger maker Galapagos and plastic films manufacturer Kloeckner Pentaplast. We had purchased Galapagos in the expectation that it would benefit from higher oil prices. However, while oil prices did indeed rise in the first half of the period, its bonds suffered as the company's restructuring programme failed to be completed as quickly as hoped. Against our expectations, Kloeckner has been unable to pass on higher input costs to its customers.

AVIVA INVESTORS HIGH YIELD BOND FUND (CONTINUED)

FUND MANAGER'S REPORT

Outlook

With the outlook for the global economy is clouded by trade and political uncertainties, we expect fixed income markets to be supported by further stimulus. In 2020 we foresee at least one more interest rate cut by the US Federal Reserve and a further expansion of monetary support by the European Central Bank. This could be complemented by governments stepping up fiscal policy, with increased public spending and tax cuts to stimulate growth. High-yield bonds are likely to be supported by investors' ongoing hunt for income in a low-yield environment. However, total returns on a twelve-month view are likely to be modest given the potential for rising defaults as global growth slows.

November 2019

* The Fund's benchmark changed on 7 August 2019.

Sources: Fund and peer group performance figures – Lipper, a Thomson Reuters Company, mid to mid basis with net income reinvested in GBP, with no initial charges applied. Market data – Bloomberg.

As noted above, the performance figures in this commentary have been sourced from an external party and are based on published prices. The performance figures quoted in the comparative tables on page 167 are based on the net asset value per the published accounts and may be different due to post year end accounting adjustments.

Any opinions expressed are those of the Fund manager. They should not be viewed as a guarantee of a return from an investment in the Funds. The content of the commentary should not be viewed as a recommendation to invest nor buy or sell any securities. Past performance is not a guide to the future. The value of an investment and any income from it can go down as well as up. Investors may not get back the original amount invested.

Synthetic Risk and Reward Indicator

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- Bond values are affected by changes in interest rates, and the bond issuer's creditworthiness. Bonds that produce a higher level of income usually have a greater risk of default.
- The value of investments will be affected by changes in exchange rates.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at www.avivainvestors.com or from the ACD on request.

(a) Changes to fee rates were made during the year and the Ongoing Charge Figure has been amended to be future proofed for this change.

(b) The Ongoing Charge has been annualised for a share class that has not yet been open for a full year.

[#] The direct transaction costs have been stated after deducting, in the case of single-priced funds, the proportion of the amounts collected from dilution adjustments or dilution levies that relates to direct transaction costs and, in the case of dual-priced funds, the amounts collected in relation to direct transaction costs added to, or subtracted from, the valuations by virtue of COLL 6.3.6 G (4).

[≈] The high and low prices disclosed are the high and low prices for the accounting period and not the calendar year and are based on published prices. The net asset value per share price is based on the net asset value in the published accounts and may be different due to post year end accounting adjustments.

Ongoing Charges Figure*

Share class	15.10.19	15.10.18
Class 1	0.88%	1.05%
Class 2	0.64%	0.64%
Class 3	0.34%	0.34%

* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the year. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

NOTES TO THE FINANCIAL STATEMENTS

1 Accounting basis and policies

Please see pages 8 to 10 for accounting basis and policies.

2 Net capital losses

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Net capital losses on investment during the year comprise:		
Currency (losses)/gains	(1,451)	119
Derivative contracts (losses)/gains	(768)	4
Expenses relating to the purchase and sale of investments	–	(4)
Forward currency contracts gains	1,468	590
Non-derivative securities gains/(losses)	724	(10,130)
Net capital losses	(27)	(9,421)

3 Revenue

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Bank and deposit interest	23	–
Interest on debt securities	5,739	8,529
Income from derivatives	(20)	(47)
Total revenue	5,742	8,482

4 Expenses

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Payable to the Authorised Corporate Director ("ACD"), associates of the ACD or agents of either of them:		
Fund Management Fee/ACD's periodic charge*	602	778
Registration fees	–	77
	602	855
Payable to the Depositary, associates of the Depositary or agents of either of them:		
Depositary's fee	–	14
Interest payable	12	12
Safe custody fee	–	10
	12	36
Other expenses:		
Audit fee**	–	7
Statement fees	–	3
	–	10
Total expenses	614	901

* From 4 June 2018 the Fund changed to a single fixed charge known as the Fund Management Fee (FMF). The FMF covers fees and expenses in relation to the operation and administration of the Company and the Fund.

** The audit fee was £9,455 (2018: £9,091) net of VAT. With effect from 4 June 2018, the audit fee was no longer accrued for separately and now forms part of the FMF.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

5 Taxation**a Analysis of tax charge**

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Corporation tax	–	–
Total current tax (see note 5b)	–	–

b Factors affecting current tax charge

The tax assessed for the year is lower (2018: lower) than the standard rate of corporation tax in the UK for an Authorised Investment Fund (20%) (2018: 20%).

The differences are explained below:

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Net revenue before taxation	5,128	7,581
Corporation tax at 20%	1,026	1,516
Effects of:		
Tax deductible on interest distributions	(1,026)	(1,516)
Current tax charge (see note 5a)	–	–

Authorised Investment Funds are exempt from tax on capital gains. Therefore, any capital return is not included in the above reconciliation.

c Deferred tax

There was no provision for deferred tax at the year end (2018: £nil).

6 Distributions

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:		
Gross interest distribution for the three months ended 15 January	1,586	1,997
Gross interest distribution for the three months ended 15 April	1,216	1,715
Gross interest distribution for the three months ended 15 July	1,268	1,839
Gross interest distribution for the three months ended 15 October	804	1,763
	4,874	7,314
Add: Revenue deducted on cancellation of shares	289	394
Deduct: Revenue received on issue of shares	(35)	(127)
Total distributions	5,128	7,581

Details of the distributions per share are set out in the distribution tables on pages 179 and 180.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

7 Fair value hierarchy

Valuation technique	As at 15.10.19		As at 15.10.18	
	Assets at £000	Liabilities at £000	Assets at £000	Liabilities at £000
Level 1: Quoted prices	143	–	100	–
Level 2: Observable market data	91,163	(7)	132,018	(190)
Level 3: Unobservable data	443	–	376	–
Total value	91,749	(7)	132,494	(190)

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities.

The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority to unobservable inputs. Disclosure is required of the value in each category in order to give an insight into the extent to which fair value measurements are subjective.

The disclosure is split into the following categories:

Level 1: Unadjusted quoted price in an active market for an identical instrument;

Level 2: Valuation techniques using observable inputs other than quoted prices within level 1;

Level 3: Valuation techniques using unobservable inputs.

8 Debtors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued revenue	1,237	1,964
Amounts receivable on issue of shares	53	153
Overseas tax recoverable	–	111
Prepaid expenses	13	–
Sales awaiting settlement	47	7
Total debtors	1,350	2,235

9 Cash and bank balances

	As at 15.10.19 £000	As at 15.10.18 £000
Amounts held at futures clearing houses and brokers	–	1
Cash and bank balances	5,146	4,946
Total cash and bank balances	5,146	4,947

10 Other creditors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued expenses	–	90
Amounts payable for cancellation of shares	385	1,746
Purchases awaiting settlement	1,126	–
Total other creditors	1,511	1,836

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

11 Contingent liabilities and commitments

There were no contingent liabilities or commitments at the year end (2018: £nil).

12 Related party transactions

Aviva Investors UK Fund Services Limited, Aviva Investors Global Services Limited and the Aviva Group are deemed to be related parties per section 33.10 of FRS 102 as they are entities with control, joint control or significant influence over the entity.

Fund Management Fee/ACD's periodic charge paid to Aviva Investors UK Fund Services Limited ("the ACD") are shown in note 4 and details of shares issued and cancelled by the ACD are shown in the statement of change in net assets attributable to shareholders. The balance due from the ACD at the year end in respect of Fund Management Fee/ACD's periodic charge was £12,534 (2018: balance due to ACD was £90,282). Any balance due from the ACD in respect of issues is shown in note 8. Any balance due to the ACD in respect of cancellations is shown in note 10.

Distributions payable to the ACD and related parties of the ACD during the year amounted to £2,180,752 (2018: £2,641,571). The amount outstanding at the year end was £389,392 (2018: £688,391). Related parties of the ACD are deemed to be all companies under the control of Aviva Plc. This will include companies which hold shares in the Fund on behalf of other external investors.

Any investments managed and advised by Aviva Investors Global Services Limited or associated with the Aviva Group are identified on the portfolio statement.

The total purchases and sales on these investments during the year amounted to £43,900,000 (2018: £99,000,000) and £45,700,000 (2018: £102,002,000) respectively. The income received during the year amounted to £11,575 (2018: £5,204).

Holdings at the year end and movements during the year are as follows:

	Holdings at 15.10.19 (shares)	Movement (shares)	Holdings at 15.10.18 (shares)
ACD and related parties (Class 2 Income shares)	6,776,854	(4,436,918)	11,213,772
ACD and related parties (Class 3 Accumulation shares)	14,883,760	(1,985,007)	16,868,767

The ACD and related parties of the ACD are ineligible to vote at any general meeting.

13 Shareholder funds

The Fund currently has three share classes: Class 1 (Retail), Class 2 (Institutional) and Class 3 (Associated undertakings of Aviva Plc). The Fund Management Fees are as follows:

Class 1: 0.88%
Class 2: 0.64%
Class 3: 0.34%

The net asset value of the share class, the net asset value per share and the number of shares in the class are shown on page 167. The distributions per share are given in the distribution tables on pages 179 and 180. All the share classes have the same rights on winding up.

14 Shares in issue reconciliation

	Number of shares in issue at 15.10.18	Number of shares issued	Number of shares cancelled	Number of shares converted	Number of shares in issue at 15.10.19
Class 1 Income shares	6,818,484	2,786,918	(3,034,465)	(49,368)	6,521,569
Class 2 Income shares	87,597,844	800,677	(36,583,177)	32,563	51,847,907
Class 3 Accumulation shares	17,214,629	947,416	(3,278,285)	–	14,883,760

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

15 Derivatives and other financial instruments

The policies applied in the management of financial instruments are set out on pages 9 and 10.

Fair value of financial assets and financial liabilities

There is no significant difference between the carrying values of the financial assets and liabilities and their fair values (2018: £nil).

Currency risk

At the year end date, (0.12)% (2018: (0.09)%) of the net assets of the Fund were denominated in currencies other than sterling and as such the currency risk is not considered significant.

Interest rate risk

The interest rate profile of the Fund's financial assets and liabilities at 15 October 2019 was:

Currency 15.10.19	Floating Rate £000	Fixed Rate £000	None £000	Total £000
Financial Assets				
Euro	5,483	41,359	946	47,788
Sterling	4,288	34,255	58,830	97,373
US dollar	1,975	6,929	145	9,049
Financial Liabilities				
Euro	(93)	–	(47,798)	(47,891)
Sterling	80	–	(1,122)	(1,042)
US dollar	(30)	–	(9,035)	(9,065)
Total	11,703	82,543	1,966	96,212

The interest rate profile of the Fund's financial assets and liabilities at 15 October 2018 was:

Currency 15.10.18	Floating Rate £000	Fixed Rate £000	None £000	Total £000
Financial Assets				
Argentine peso	4	–	–	4
Euro	8,267	44,960	3,018	56,245
Sterling	11,659	49,140	84,780	145,579
US dollar	1,958	19,134	3,885	24,977
Financial Liabilities				
Argentine peso	–	–	(3)	(3)
Euro	–	–	(56,385)	(56,385)
Sterling	–	–	(9,025)	(9,025)
US dollar	–	–	(24,954)	(24,954)
Total	21,888	113,234	1,316	136,438

The floating rate on bank balances is linked to the Depositary's base rate.

The floating rate on deposits is linked to LIBOR or its overseas equivalent.

The floating rate on Euro FRNs is linked to LIBOR or its overseas equivalent.

The floating rate on US Dollar FRNs is linked to LIBOR or its overseas equivalent.

Interest rate exposures

The Aviva Investors Investment Risk Team performs regular stress testing across all portfolios to determine market sensitivities and risk exposures using BlackRock's Aladdin risk model and stress testing methodology. Under this methodology, if 5Y GBP interest rates had increased by 1% as at the balance sheet date, the net asset value of the Fund would have decreased by £2,524,032 (2018: £5,061,244). If interest rates had decreased by 1% as at the balance sheet date, the net asset value of the Fund would have increased by £2,524,032. (2018: £5,061,244). These calculations assume the interest rate shock is propagated to all risk factors the Fund is exposed to, based on historical market correlations and volatilities between factors.

Market price risk

At the year end date, 95.35% (2018: 96.97%) of the net assets of the Fund were invested in ordinary shares or stock units or debt securities admitted to an official stock exchange. If the market value were to change by 10%, the value of the Fund would change by 9.54% (2018: 9.70%).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

16 Counterparty exposure

Financial derivative exposure

The types of derivatives held at the year end date were forward currency contracts, futures contracts and credit default swaps. Details of individual contracts are disclosed in the Portfolio Statement and the total position by counterparty at the year end date was as follows:

	Forward currency contracts £000	Futures contracts £000	Total £000
15.10.19			
Goldman Sachs	2,048	–	2,048
J.P. Morgan	10	143	153
Merrill Lynch	(3)	–	(3)
Royal Bank of Canada	401	–	401
Total	2,456	143	2,599

	Forward currency contracts £000	Futures contracts £000	Total £000
15.10.18			
Citibank	(45)	–	(45)
Goldman Sachs	1,559	–	1,559
JPMorgan	–	100	100
Royal Bank of Canada	3	–	3
Royal Bank of Scotland	657	–	657
UBS	(10)	–	(10)
Total	2,164	100	2,264

The counterparty exposure on forward currency contracts is reported at their mark to market values but for futures contracts and credit default swaps it is only the positive mark to market value that are reported.

Collateral

At the year end date no collateral was held or pledged by the Fund or on behalf of the counterparties in respect of the above (2018: £nil).

17 Debt security credit analysis

	Market value £000		Total net assets %	
	15.10.19	15.10.18	15.10.19	15.10.18
Investment grade securities	6,787	10,276	7.06%	7.52%
Below investment grade securities	79,769	111,326	82.90%	81.60%
Unrated securities	787	4,774	0.82%	3.50%
Total debt securities	87,343	126,376	90.78%	92.62%

Credit rating designations BBB or above are considered investment grade whereas credit rating designations BB or lower are considered below investment grade.

18 Direct transaction costs

Due to the nature of the investments held, no transaction costs or taxes were incurred on the Fund's purchases or sales during the current year ended 15 October 2019 (2018: £nil). The total purchases for the year amounted to £79,563,841 (2018: £104,457,476) and the total sales amounted to £121,239,498 (2018: £138,225,558).

Dealing spread

As at 15 October 2019, the average portfolio dealing spread was 1.18% (2018: 1.03%). This spread represents the difference between the values determined retrospectively by reference to the bid and offer prices of investments expressed as a percentage of the value determined by reference to the offer price.

19 Post balance sheet events

There are no post balance sheet events which require adjustment or disclosure at the year end (2018: £nil).

DISTRIBUTION TABLES

Final distribution payable in pence per share for the three months ended 15 October 2019

Income shares		Gross revenue	Equalisation	Final distribution payable 15 December 2019	Final distribution paid 15 December 2018
Class 1 Income shares	Group 1	0.5161	–	0.5161	0.8269
	Group 2	0.2355	0.2806	0.5161	0.8269
Class 2 Income shares	Group 1	0.8456	–	0.8456	1.3186
	Group 2	0.4841	0.3615	0.8456	1.3186

Accumulation shares		Gross revenue	Equalisation	Final distribution payable 15 December 2019	Final distribution paid 15 December 2018
Class 3 Accumulation shares	Group 1	2.2312	–	2.2312	3.2043
	Group 2	0.6739	1.5573	2.2312	3.2043

Final distribution

Group 1 shares are those shares purchased at or before 12:00 noon on 15 July 2019.

Group 2 shares are those shares purchased after 12:00 noon on 15 July 2019.

Interim distribution paid in pence per share for the three months ended 15 July 2019

Income shares		Gross revenue	Equalisation	Interim distribution paid 15 September 2019	Interim distribution paid 15 September 2018
Class 1 Income shares	Group 1	0.8124	–	0.8124	0.8217
	Group 2	0.1450	0.6674	0.8124	0.8217

	Group 2	0.5377	0.7559	1.2936	1.3462

Accumulation shares		Gross revenue	Equalisation	Interim distribution paid 15 September 2019	Interim distribution paid 15 September 2018
Class 3 Accumulation shares	Group 1	3.2649	–	3.2649	3.2198
	Group 2	1.8827	1.3822	3.2649	3.2198

Interim distribution

Group 1 shares are those shares purchased at or before 12:00 noon on 15 April 2019.

Group 2 shares are those shares purchased after 12:00 noon on 15 April 2019.

DISTRIBUTION TABLES (CONTINUED)

Interim distribution paid in pence per share for the three months ended 15 April 2019

Income shares		Gross revenue	Equalisation	Interim distribution paid 15 June 2019	Interim distribution paid 15 June 2018
Class 1 Income shares	Group 1	0.7254	–	0.7254	0.7021
	Group 2	0.1263	0.5991	0.7254	0.7021
Class 2 Income shares	Group 1	1.1599	–	1.1599	1.1948
	Group 2	0.3925	0.7674	1.1599	1.1948

Accumulation shares		Gross revenue	Equalisation	Interim distribution paid 15 June 2019	Interim distribution paid 15 June 2018
Class 3 Accumulation shares	Group 1	2.9062	–	2.9062	2.8420
	Group 2	1.2147	1.6915	2.9062	2.8420

Interim distribution

Group 1 shares are those shares purchased at or before 12:00 noon on 15 January 2019.

Group 2 shares are those shares purchased after 12:00 noon on 15 January 2019.

Interim distribution paid in pence per share for the three months ended 15 January 2019

Income shares		Gross revenue	Equalisation	Interim distribution paid 15 March 2019	Interim distribution paid 15 March 2018
Class 1 Income shares	Group 1	0.8260	–	0.8260	0.7938
	Group 2	0.4891	0.3369	0.8260	0.7938
Class 2 Income shares	Group 1	1.3135	–	1.3135	1.3455
	Group 2	0.7462	0.5673	1.3135	1.3455

Accumulation shares		Gross revenue	Equalisation	Interim distribution paid 15 March 2019	Interim distribution paid 15 March 2018
Class 3 Accumulation shares	Group 1	3.2259	–	3.2259	3.1522
	Group 2	1.4847	1.7412	3.2259	3.1522

Interim distribution

Group 1 shares are those shares purchased at or before 12:00 noon on 15 October 2018.

Group 2 shares are those shares purchased after 12:00 noon on 15 October 2018.

Equalisation

Equalisation applies only to Group 2 shares, in other words shares purchased during the relevant period. It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

AVIVA INVESTORS HIGHER INCOME PLUS FUND

INVESTMENT OBJECTIVE

The Fund will invest in bonds issued by companies and aims to provide an income of at least 110% of the income return of the benchmark, and an overall net return greater than the benchmark over the long term (5 years or more).

INVESTMENT POLICY

Core investment: At least 80% of the Fund will be invested in bonds (including those issued by governments and supranational organisations) issued in Sterling or hedged to Sterling, including exposure to emerging markets. A maximum of 60% of the Fund may be invested in sub-investment grade bonds, which have been independently rated as sub-investment grade with a credit rating below BBB-/Baa3.

Sub-investment grade bonds are typically regarded as being of lower quality than "investment grade" bonds, but typically offer a higher yield.

Other investments: The Fund may also invest in other bonds, shares of companies, other funds (including funds managed by Aviva Investors companies), cash and deposits.

Derivatives, such as futures, may be used from time to time, to gain a particular market exposure which would otherwise be difficult or costly to achieve, or to manage the Fund's cash flows in a cost-effective manner. Derivatives may also be used to reduce risk, such as foreign currency risk within the Fund, which is hedged using Forward Foreign Exchange contracts. This type of derivative usage is called "efficient portfolio management".

Strategy: The Fund is actively managed with a flexible investment allocation approach across global bond markets. The Investment Manager will make high conviction (strong belief) investments at both a company and sector level, basing their investment selection process on a long-term outlook, whilst looking to deliver optimum risk-adjusted returns. The Investment Manager will focus on identifying what they judge to be higher quality investment grade or sub-investment grade bonds through assessment of the business strengths and risks associated with the underlying companies, the valuation of the bonds relative to the market, the views of independent risk rating agencies, and any other relevant factors, whilst also taking advantage of short-term opportunities when they arise.

Environmental, Social and Governance (ESG) factors:

ESG factors are integrated into the investment process and are considered alongside a range of financial metrics and research, but the Investment Manager retains discretion over which investments are selected. We also actively engage with companies with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in the prospectus.

Performance & Risk Measurement: The Fund's performance is measured against the Index, a composite benchmark of 50% Markit iBoxx® Sterling Non-Gilts Index, 40% Bloomberg® Barclays® Pan European High Yield Index 2% Issuer Capped (Sterling Hedged) and 10% JPM® Emerging Market Bond Index (Sterling Hedged) after charges and taxes, whilst the income target is measured before charges and taxes.

The Fund does not base its investment process upon the Index, which is only a representation of the investment universe, therefore the Fund will hold bonds that are not part of the Index, and will only hold a relatively small proportion of bonds relative to the number in the Index.

The Index represents the performance of a broad range of global bonds (approximately 2,100).

The Index has been selected as a benchmark for performance measurement because it is representative of the type of bonds in which the Fund is likely to invest, and it is therefore an appropriate measure for the Fund's performance.

FUND MANAGER'S REPORT

Performance

Over the twelve months ended 15 October 2019, the Aviva Investors Higher Income Plus Fund delivered a total return of 8.10% (share class 1) net of fees. The Fund's benchmark*, 50% Markit iBoxx Sterling Non-Gilts Index, 40% Bloomberg Barclays Pan European High Yield Index 2% issuer capped and 10% JPM Emerging Market Bond Index, returned 8.19%.

Review

The Fund posted an attractive total return in what was a positive twelve months for fixed income markets. In the latter stages of 2018, when the corporate bond market was under significant pressure because of worries about possible interest rate hikes in an environment of slowing global growth, we held a cautious stance in terms of the Fund's duration (sensitivity to changes in interest rates). We gradually unwound this position when bond prices recovered in early 2019 and added credit risk to the portfolio, thereby taking advantage of cheaper valuations for many bonds. From spring into the period end, both credit risk and duration were held close to the benchmark. In sector terms, exposure to telecommunications (Verizon, AT&T, America Movil) and subordinated insurance debt (AXA, Aviva) added value, while Tesco contributed well after a strong operating recovery saw its credit rating restored to investment-grade. Overall, exposure to longer-dated bonds profited from the change in interest rate guidance to looser policy. On the negative side, the main detractors included high-yield issuer Galapagos, which suffered as its restructuring programme failed to be completed as quickly as hoped, and tobacco company Imperial Brands, whose outlook was hit by negative publicity surrounding vaping.

AVIVA INVESTORS HIGHER INCOME PLUS FUND (CONTINUED)

FUND MANAGER'S REPORT (CONTINUED)

Outlook

With the outlook for the global economy clouded by trade and political uncertainties, we expect fixed income markets to be supported by further stimulus. In 2020 we foresee at least one more interest rate cut by the US Federal Reserve and a further expansion of monetary support by the European Central Bank. This could be complemented by governments stepping up fiscal policy, with increased public spending and tax cuts to stimulate growth. We are nevertheless concerned about corporate bond market fundamentals, and in particular the high levels of debt carried by some issuers going into an environment of slowing growth. Uncertainty over trade is negative for some areas of the credit market and we are therefore avoiding cyclical companies and instead focusing on stable businesses in the higher-quality areas. While we believe that credit spreads will widen next year as the contraction in the global economy becomes more obvious, in the shorter term we expect further positive performance, not least because investor flows into the asset class have picked up significantly from twelve months ago. The market is also underpinned by the restarting of the European Central Bank's quantitative easing (QE) programme, which is scheduled for November. High-yield bonds are likely to be supported by investors' ongoing hunt for income in a low-yield environment. However, total returns on a twelve-month view are likely to be modest given the potential for rising defaults as global growth slows.

November 2019

* The benchmark was changed on 7 August 2019.

Synthetic Risk and Reward Indicator

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- Bond values are affected by changes in interest rates, and the bond issuer's creditworthiness. Bonds that produce a higher level of income usually have a greater risk of default.
- The value of investments will be affected by changes in exchange rates.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at www.avivainvestors.com or from the ACD on request.

Prices[≈]		
Highest share price	58.69	59.44
Lowest share price	56.31	56.97

§ The share class was closed on 1 June 2018.

‡ The operating charges are calculated on an ex-post basis and as such may differ from the Ongoing Charge Figure where:

(a) Changes to fee rates were made during the year and the Ongoing Charge Figure has been amended to be future proofed for this change.

(b) The Ongoing Charge has been annualised for a share class that has not yet been open for a full year.

The direct transaction costs have been stated after deducting, in the case of single-priced funds, the proportion of the amounts collected from dilution adjustments or dilution levies that relates to direct transaction costs and, in the case of dual-priced funds, the amounts collected in relation to direct transaction costs added to, or subtracted from, the valuations by virtue of COLL 6.3.6 G (4).

≈ The high and low prices disclosed are the high and low prices for the accounting period and not the calendar year. The net asset value per share price is based on the net asset value in the published accounts and may be different due to post year end accounting adjustments.

Ongoing Charges Figure*

Share class	15.10.19	15.10.18
Class 1	0.87%	0.87%
Class 2	0.62%	0.62%
Class 3	0.32%	0.32%

* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the year. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme. The OCF for share class 1, when aggregated with certain other payments out of scheme property incurred in respect of it, is capped at 1.00%. Please see the Prospectus for full details.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

Other creditors	10	(9,962)	(680)
Total liabilities		(12,684)	(2,685)
Net assets attributable to shareholders		394,061	358,217

NOTES TO THE FINANCIAL STATEMENTS

1 Accounting basis and policies

Please see pages 8 to 10 for accounting basis and policies.

2 Net capital gains/(losses)

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Net capital gains/(losses) on investment during the year comprise:		
Currency losses	(2,531)	(631)
Derivative contracts losses	(2,185)	(261)
Expenses relating to the purchase and sale of investments	–	(3)
Forward currency contracts gains	3,003	1,052
Non-derivative securities gains/(losses)	18,072	(20,489)
Net capital gains/(losses)	16,359	(20,332)

3 Revenue

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Bank and deposit interest	61	–
Interest on debt securities	15,791	17,244
Income from derivatives	(36)	(106)
Revenue from offshore funds	1,850	1,700
Total revenue	17,666	18,838

4 Expenses

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Payable to the Authorised Corporate Director ("ACD"), associates of the ACD or agents of either of them:		
Fund Management Fee/ACD's periodic charge*	2,819	2,989
Registration fees	–	86
	2,819	3,075
Payable to the Depositary, associates of the Depositary or agents of either of them:		
Depositary's fee	–	32
Interest payable	24	13
Safe custody fee	–	23
	24	68
Other expenses:		
Audit fee**	–	8
Statement fees	–	7
	–	15
Total expenses	2,843	3,158
Less those expenses rebated by the ACD	–	(39)
Net expenses	2,843	3,119

* From 4 June 2018 the Fund changed to a single fixed charge known as the Fund Management Fee (FMF). The FMF covers fees and expenses in relation to the operation and administration of the Company and the Fund.

** The audit fee was £9,790 (2018: £9,413) net of VAT. With effect from 4 June 2018, the audit fee was no longer accrued for separately and now forms part of the FMF.

5 Taxation

a Analysis of tax charge

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Corporation tax	–	–
Total current tax (see note 5b)	–	–

b Factors affecting current tax charge

The tax assessed for the year is lower (2018: lower) than the standard rate of corporation tax in the UK for an Authorised Investment Fund (20%) (2018: 20%).

The differences are explained below:

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Net revenue before taxation	14,823	15,719
Corporation tax at 20%	2,965	3,144
Effects of:		
Tax deductible on interest distributions	(2,965)	(3,144)
Current tax charge (see note 5a)	–	–

Authorised Investment Funds are exempt from tax on capital gains. Therefore, any capital return is not included in the above reconciliation.

c Deferred tax

There was no provision for deferred tax at the year end (2018: £nil).

6 Distributions

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:		
Gross interest distribution for the six months ended 15 April	7,421	7,586
Gross interest distribution for the five months ended 15 September	5,941	6,550
Gross interest distribution for the one month ended 15 October	1,520	1,537
	14,882	15,673
Add: Revenue deducted on cancellation of shares	71	84
Deduct: Revenue received on issue of shares	(131)	(39)
Total distributions	14,822	15,718
Reconciliations of distributions for the year to net revenue after taxation		
Distributions for the year	14,822	15,718
Equalisation on conversions	–	(1)
Other fees borne by capital account	–	2
Undistributed revenue carried forward	1	–
Net revenue after taxation	14,823	15,719

Details of the distributions per share are set out in the distribution tables on pages 197 to 200.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

7 Fair value hierarchy

Valuation technique	As at 15.10.19		As at 15.10.18	
	Assets at £000	Liabilities at £000	Assets at £000	Liabilities at £000
Level 1: Quoted prices	492	–	708	–
Level 2: Observable market data	388,148	(227)	340,912	(458)
Level 3: Unobservable data	220	–	–	–
Total value	388,860	(227)	341,620	(458)

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities.

The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority to unobservable inputs. Disclosure is required of the value in each category in order to give an insight into the extent to which fair value measurements are subjective.

The disclosure is split into the following categories:

Level 1: Unadjusted quoted price in an active market for an identical instrument;

Level 2: Valuation techniques using observable inputs other than quoted prices within level 1;

Level 3: Valuation techniques using unobservable inputs.

8 Debtors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued revenue	5,047	5,621
Amounts receivable on issue of shares	387	379
Overseas tax recoverable	–	113
Sales awaiting settlement	1,905	148
Total debtors	7,339	6,261

9 Cash and bank balances

	As at 15.10.19 £000	As at 15.10.18 £000
Amounts held at futures clearing houses and brokers	84	–
Cash and bank balances	10,462	13,021
Total cash and bank balances	10,546	13,021

10 Other creditors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued expenses	50	314
Amounts payable for cancellation of shares	778	366
Purchases awaiting settlement	9,134	–
Total other creditors	9,962	680

11 Contingent liabilities and commitments

There were no contingent liabilities or commitments at the year end (2018: £nil).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

12 Related party transactions

Aviva Investors UK Fund Services Limited, Aviva Investors Global Services Limited and the Aviva Group are deemed to be related parties per section 33.10 of FRS 102 as they are entities with control, joint control or significant influence over the entity.

Fund Management Fee/ACD periodic charges paid to Aviva Investors UK Fund Services Limited ("the ACD") are shown in note 4 and details of shares issued and cancelled by the ACD are shown in the statement of change in net assets attributable to shareholders. The balance due to the ACD at the year end in respect of Fund Management Fee/ACD periodic charges was £49,630 (2018: £314,428). Any balance due from the ACD in respect of issues is shown in note 8. Any balance due to the ACD in respect of cancellations is shown in note 10.

Distributions payable to the ACD and related parties of the ACD during the year amounted to £2,244,415 (2018: £2,777,370). The amount outstanding at the year end was £221,646 (2018: £256,951). Related parties of the ACD are deemed to be all companies under the control of Aviva Plc. This will include companies which hold shares in the Fund on behalf of other external investors.

Any investments managed and advised by Aviva Investors Global Services Limited or associated with the Aviva Group are identified on the portfolio statement.

The total purchases and sales on these investments during the year amounted to £30,823,703 (2018: £52,600,000) and £28,476,520 (2018: £52,100,000) respectively. The income received during the year amounted to £2,134,360 (2018: £1,987,151).

Holdings at the year end and movements during the year are as follows:

	Holdings at 15.10.19 (shares)	Movement (shares)	Holdings at 15.10.18 (shares)
ACD and related parties (Class 1 Income shares)	37,191	17,413	19,778
ACD and related parties (Class 2 Income shares)	9,404,291	(3,504,577)	12,908,868
ACD and related parties (Class 3 Income shares)	43,343,128	(2,550,726)	45,893,854

The ACD and related parties of the ACD are ineligible to vote at any general meeting.

13 Shareholder funds

The Fund currently has three share classes: Class 1 (Retail), Class 2 (Institutional) and Class 3 (Associated undertakings of Aviva Plc). The Fund Management Fees are as follows:

Class 1: 0.87%
Class 2: 0.62%
Class 3: 0.32%

The net asset value of the share class, the net asset value per share and the number of shares in the class are shown on pages 183 and 184. The distributions per share are given in the distribution tables on pages 197 to 200. All the share classes have the same rights on winding up.

14 Shares in issue reconciliation

	Number of shares in issue at 15.10.18	Number of shares issued	Number of shares cancelled	Number of shares converted	Number of shares in issue at 15.10.19
Class 1 Income shares	438,361,268	5,143,247	(29,001,694)	(1,950,461)	412,552,360
Class 2 Income shares	129,313,727	67,593,529	(21,439,667)	1,296,298	176,763,887
Class 3 Income shares	45,895,814	3,166,532	(5,719,218)	–	43,343,128

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

15 Derivatives and other financial instruments

The policies applied in the management of financial instruments are set out on pages 9 and 10.

Fair value of financial assets and financial liabilities

There is no significant difference between the carrying values of the financial assets and liabilities and their fair values (2018: £nil).

Currency risk

At the year end date, (0.26)% (2018: (0.46)%) of the net assets of the Fund were denominated in currencies other than sterling and as such the currency risk is not considered significant.

Interest rate risk

The interest rate profile of the Fund's financial assets and liabilities at 15 October 2019 was:

Currency 15.10.19	Floating Rate £000	Fixed Rate £000	None £000	Total £000
Financial Assets				
Euro	5,671	65,271	41,494	112,436
Sterling	10,829	247,514	147,785	406,128
US dollar	4,499	24,882	363	29,744
Financial Liabilities				
Euro	–	–	(113,182)	(113,182)
Sterling	(975)	–	(10,082)	(11,057)
US dollar	–	–	(30,008)	(30,008)
Total	20,024	337,667	36,370	394,061

The interest rate profile of the Fund's financial assets and liabilities at 15 October 2018 was:

Currency 15.10.18	Floating Rate £000	Fixed Rate £000	None £000	Total £000
Financial Assets				
Euro	4,050	47,713	32,688	84,451
Sterling	17,744	222,969	121,382	362,095
US dollar	7,869	19,031	523	27,423
Financial Liabilities				
Euro	7	–	(85,786)	(85,779)
Sterling	–	–	(2,217)	(2,217)
US dollar	(17)	–	(27,739)	(27,756)
Total	29,653	289,713	38,851	358,217

The floating rate on bank balances is linked to the Depositary's base rate.

The floating rate financial assets comprise investments in variable interest rate paying corporate debt and bank balances that bear interest on LIBOR or its equivalent.

Interest rate exposures

The Aviva Investors Investment Risk Team performs regular stress testing across all portfolios to determine market sensitivities and risk exposures using BlackRock's Aladdin risk model and stress testing methodology. Under this methodology, if 5Y GBP interest rates had increased by 1% as at the balance sheet date, the net asset value of the Fund would have decreased by £22,739,736 (2018: £21,513,149). If interest rates had decreased by 1% as at the balance sheet date, the net asset value of the Fund would have increased by £22,739,736 (2018: £21,513,149). These calculations assume the interest rate shock is propagated to all risk factors the Fund is exposed to, based on historical market correlations and volatilities between factors.

Market price risk

At the year end date, 98.62% (2018: 95.24%) of the net assets of the Fund were invested in ordinary shares or stock units or debt securities admitted to an official stock exchange. If the market value were to change by 10%, the value of the Fund would change by 9.86% (2018: 9.52%).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

16 Counterparty exposure**Financial derivative exposure**

The types of derivatives held at the year end date were forward currency contracts, futures contracts and credit default swaps. Details of individual contracts are disclosed in the Portfolio Statement and the total position by counterparty at the year end date was as follows:

	Forward currency contracts £000	Futures contracts £000	Total £000
15.10.19			
Citibank	(110)	–	(110)
Goldman Sachs	4,657	–	4,657
J.P. Morgan	28	492	520
Royal Bank of Scotland	1,330	–	1,330
Société Générale	(117)	–	(117)
Total	5,788	492	6,280

	Forward currency contracts £000	Futures contracts £000	Total £000
15.10.18			
Citibank	(75)	–	(75)
Goldman Sachs	2,362	–	2,362
JPMorgan	–	102	102
Royal Bank of Scotland	952	–	952
UBS	(2)	–	(2)
Total	3,237	102	3,339

The counterparty exposure on forward currency contracts is reported at their mark to market values but for future contracts and credit default swaps it is only the positive mark to market values that are reported.

Collateral

At the year end date no collateral was held or pledged by the Fund or on behalf of the counterparties in respect of the above (2018: £nil).

17 Debt security credit analysis

	Market value £000		Total net assets %	
	15.10.19	15.10.18	15.10.19	15.10.18
Investment grade securities	208,862	159,325	53.00%	44.48%
Below investment grade securities	126,685	131,436	32.14%	36.69%
Unrated securities	8,473	13,393	2.15%	3.74%
Total debt securities	344,020	304,154	87.29%	84.91%

The Fund invests in credit default swaps to adjust the credit risk profile of the Fund. The notional exposure of these swaps has been included in the above table.

Credit rating designations BBB or above are considered investment grade whereas credit rating designations BB or lower are considered below investment grade.

18 Direct transaction costs

Due to the nature of the investments held, no transaction costs or taxes were incurred on the Fund's purchases or sales during the current year ended 15 October 2019 (2018: £nil). The total purchases for the year amounted to £248,467,232 (2018: £180,547,062) and the total sales amounted to £221,328,000 (2018: £235,214,550).

Dealing spread

As at 15 October 2019, the average portfolio dealing spread was 0.69% (2018: 0.70%). This spread represents the difference between the values determined retrospectively by reference to the bid and offer prices of investments expressed as a percentage of the value determined by reference to the offer price.

19 Post balance sheet events

There are no post balance sheet events which require adjustment or disclosure at the year end (2018: £nil).

DISTRIBUTION TABLES

Final distribution payable in pence per share for the month ended 15 October 2019

Class 2 Income shares	Group 1	0.2361	–	0.2361	0.2757
	Group 2	0.0214	0.2147	0.2361	0.2757
Class 3 Income shares	Group 1	0.3490	–	0.3490	0.4091
	Group 2	0.0395	0.3095	0.3490	0.4091

Interim distribution

Group 1 shares are those shares purchased at or before 12:00 noon on 15 October 2018.

Group 2 shares are those shares purchased after 12:00 noon on 15 October 2018.

Equalisation

Equalisation applies only to Group 2 shares, in other words shares purchased during the relevant period. It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

AVIVA INVESTORS INTERNATIONAL INDEX TRACKING FUND

INVESTMENT OBJECTIVE

The Fund aims to track the performance of the FTSE® World (ex UK) Index (before charges and taxes). Any returns will be a combination of capital growth and income.

INVESTMENT POLICY

Core investment: The Fund will invest directly into shares of companies that make up the FTSE® World (ex UK) Index (the "Index").

Other investments: The Fund may also invest in other funds (including funds managed by Aviva Investors companies), cash and deposits.

Derivatives, such as futures may be used from time to time to gain a particular market exposure which would otherwise be difficult or costly to achieve, or to manage the Fund's cash flows in a cost-effective manner. This type of derivative usage is called "efficient portfolio management".

Strategy: The Fund will aim to track the Index by investing in international companies that make up the Index, or a sample of them which are representative of the Index, with the aim of mirroring the performance of the Index.

Performance & Risk Measurement: The Fund's performance is measured against the Index over any given 12-month period, because the Fund intends to track the performance of the Index.

The Fund may not hold every company in the Index.

The Fund uses a "tracking error" to measure the consistency between the Fund's returns and the returns of the Index. In general, the lower the tracking error, the more consistent the Fund's returns are relative to the Index, and vice-versa.

The Fund has a yearly tracking error target of 0% per annum (excluding charges). In normal market conditions the anticipated level of tracking error will be within 0.30% (excluding charges) of the Index.

Factors which are likely to affect the ability of the Fund to track the performance of the Index might include transaction costs (from Index and Fund turnover and dividend reinvestment), portfolio weightings not being exactly the same as the Index, residual cash holdings, or other related factors such as efficient portfolio management, illiquid components, and any trading restrictions that may be in place.

The Index comprises large and medium-sized companies of developed and emerging markets excluding the UK, providing a broad coverage of global markets.

FUND MANAGER'S REPORT

Performance

Over the twelve months ended 15 October 2019, the Aviva Investors International Index Tracking Fund delivered a total return of 11.84% (share class 1), net of fees. The Fund's benchmark, the FTSE® World ex UK Index, returned 12.77%.

Investment Review

Global economic growth slowed to below 3 per cent (on an annual basis) in the middle of 2019, the weakest rate of increase since the Eurozone crisis of 2012. That slowdown, which began at the start of 2018, largely reflected a sharp deterioration in global manufacturing and trade, which in turn reflected a combination of factors, including: structural de-leveraging and a slowdown in China, past monetary policy tightening in the US, the imposition of and uncertainty around tariff and non-tariff barriers between the US and China and policy changes related to auto emissions in Europe. There was a further escalation in the trade war between the US and China in August, when President Trump announced a broadening of tariffs on all Chinese goods.

Escalating trade tensions between the US and China and concerns that the US Federal Reserve (Fed) had tightened monetary policy too aggressively unsettled investors, particularly during the fourth quarter of 2018 when equity markets worldwide recorded sharp falls. Since the turn of the year, international equity indices have rallied, although volatility resurfaced in May and August in response to an escalation in the US-China trade dispute, as the Fed changed course and loosened monetary policy, with the ECB following suit. In January, the Fed signalled interest rates had peaked, citing slowing global growth, the ongoing US-China trade dispute and tighter financial conditions, and subsequently reduced its key Fed Funds rate in July and in September. In response to a sharp slowdown in the Eurozone, the European Central Bank (ECB) announced it would recommence QE (quantitative easing), with effect from November, at €20 billion a month and maintain this policy until inflation returns to its 2% target.

US equities outperformed international indices in sterling terms, rebounding from a turbulent end to 2018 as the Fed's more dovish stance on monetary policy boosted sentiment. The resilience of the domestic economy has underpinned the market, although investors have scaled back earnings expectations as the one-off impact of tax cuts has run its course. Higher yielding and non-cyclical sectors – real estate, utilities, and consumer staples – outperformed while amongst the weakest areas of the market were more cyclical sectors notably energy, materials and industrials. Financial underperformed on mild inversion at the front end of the Treasury bond yield curve, potentially heralding a squeeze on profitability in the banking sector.

European equities gained ground but underperformed international indices. Political concerns resurfaced as the year progressed, most notably in Italy. The coalition government comprising the populist Five Star Movement and the Northern League appeared set on a collision course with the European Central Bank over its spending plans, until an agreement was eventually reached as 2018 ended. As the period ended, the coalition fragmented with the League withdrawing and the Five Star Movement forming a new coalition with the Democratic Party. This reawakened the debate on the existential future of the Eurozone. As a result, renewed fears of contagion risk and a slowdown in regional economic growth weakened financial stocks, notably banks.

AVIVA INVESTORS INTERNATIONAL INDEX TRACKING FUND (CONTINUED)

FUND MANAGER'S REPORT (CONTINUED)

In Asian markets, concerns over the global economic growth outlook and worries that export-orientated Asia-Pacific economies are most exposed to rising trade barriers weighed on sentiment towards the region. Most notably, the Chinese economy slowed during the second quarter. Ongoing trade tensions with the US, weakening global demand and off-balance-sheet borrowings by local government combined to result in the lowest rate of growth for the Chinese economy since the first quarter of 1992. Korean and Japanese equities lagged the region overall amid disappointing export data, albeit that optimism over the effect of falling global interest rates underpinned Japanese stocks late in the period. Following disappointing early returns, Australian equities ended the period on a firmer note amid optimism that lower interest rates and market-friendly policies following PM Scott Morrison surprise re-election will boost the trading backdrop.

Outlook

The impact of the US-China trade dispute, combined with weaker-than-expected growth outturns in the Eurozone, have led us to revise down our global growth expectations through to the end of 2020. We now expect growth to remain below 3 per cent over the next 18 months. That would represent the weakest sustained period for over a decade. We expect all major economies to be growing below potential in 2020, with unemployment likely to rise modestly and wage and inflation pressures set to remain muted. Given the uncertainty around how businesses and households will react to the imposition of further tariffs, as well as the use of non-tariff measures, we judge that the risks to growth are to the downside. Having marked down our economic outlook and become increasingly concerned about the downside risks, we are cautious about the outlook for equity markets. With many markets close to their all-time highs, we believe they are fragile and susceptible to further downside news on growth. Against this background, we remain cautious on the outlook for equity markets over the short to medium term. This is largely a function of a decelerating environment for corporate earnings in the US and Europe. We are also seeing companies reticent to embark on significant investment programs, though this may be largely down to the uncertainty regarding US and China trade as well as Brexit.

November 2019

Synthetic Risk and Reward Indicator

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- The value of investments will be affected by changes in exchange rates.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at www.avivainvestors.com or from the ACD on request.

§ This share class was launched on 3 August 2018.

‡ The operating charges are calculated on an ex-post basis and as such may differ from the Ongoing Charge Figure where:

(a) Changes to fee rates were made during the year and the Ongoing Charge Figure has been amended to be future proofed for this change.

(b) The Ongoing Charge has been annualised for a share class that has not yet been open for a full year.

The direct transaction costs have been stated after deducting, in the case of single-priced funds, the proportion of the amounts collected from dilution adjustments or dilution levies that relates to direct transaction costs and, in the case of dual-priced funds, the amounts collected in relation to direct transaction costs added to, or subtracted from, the valuations by virtue of COLL 6.3.6 G (4).

≈ The high and low prices disclosed are the high and low prices for the accounting period and not the calendar year. The net asset value per share price is based on the net asset value in the published accounts and may be different due to post year end accounting adjustments.

Ongoing Charges Figure*

Share class	15.10.19	15.10.18
Class 1	0.56%	0.56%
Class 2	0.31%	0.31%
Class 3	0.31%	0.31%
Class 5	0.25%	0.25%

* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the year. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme. The OCF for share class 1 is capped at 0.70%. This excludes, amongst other things, the charges of any other funds in which this Fund invests and which are included in the OCF. Please see the Prospectus for full details.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

Please see pages 8 to 10 for accounting basis and policies.

2 Net capital gains

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Net capital gains on investments during the year comprise:		
Currency losses	(53)	(84)
Expenses relating to the purchase and sale of investments	–	(116)
Forward currency contracts (losses)/gains	(18)	4
Non-derivative securities gains	78,484	18,667
Net capital gains	78,413	18,471

3 Revenue

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Bank and deposit interest	137	98
Interest on debt securities	17	8
Overseas dividends	19,866	19,394
Scrip dividends	17	25
UK dividends	26	29
Total revenue	20,063	19,554

4 Expenses

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Payable to the Authorised Corporate Director ("ACD"), associates of the ACD or agents of either of them:		
Fund Management Fee/ACD's periodic charge*	2,683	2,279
	2,683	2,279
Payable to the Depositary, associates of the Depositary or agents of either of them:		
Depositary's fee	–	45
Dividend collection charges	–	5
Interest payable	6	4
Safe custody fee	–	83
	6	137
Other expenses:		
Audit fee**	–	7
FTSE® Index Tracker Fund licence fee	–	74
Printing and postage expenses	–	1
Professional fee	–	14
Statement fee	–	8
	–	104
Total expenses	2,689	2,520

* From 4 June 2018 the Fund changed to a single fixed charge known as the Fund Management Fee (FMF). The FMF covers fees and expenses in relation to the operation and administration of the Company and the Fund.

** The audit fee was £9,790 (2018: £9,413) net of VAT. With effect from 4 June 2018, the audit fee was no longer accrued for separately and now forms part of the FMF.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

5 Taxation**a Analysis of tax charge**

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Overseas tax suffered	2,508	2,461
Total current tax (see note 5b)	2,508	2,461

b Factors affecting current tax charge

The tax assessed for the year is lower (2018: lower) than the standard rate of corporation tax in the UK for an Authorised Investment Fund (20%) (2018: 20%).

The differences are explained below:

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Net revenue before taxation	17,374	17,034
Corporation tax at 20%	3,475	3,407
Effects of:		
Movement in excess management expenses	401	338
Overseas dividends not subject to corporation tax	(3,848)	(3,717)
Overseas tax credit	(17)	(23)
Overseas tax suffered	2,508	2,461
Revenue taxable in different periods	(2)	6
Stock dividends not subject to corporation tax	(4)	(5)
UK dividends not subject to corporation tax	(5)	(6)
Current tax charge (see note 5a)	2,508	2,461

Authorised Investment Funds are exempt from tax on capital gains. Therefore, any capital return is not included in the above reconciliation.

c Deferred tax

There was no provision for deferred tax at the year end (2018: £nil).

After claiming relief against accrued income taxable on receipt, the Fund has unrelieved excess expenses of £15,540,864 (2018: £13,538,263) creating a potential deferred tax asset of £3,108,173 (2018: £2,707,653). It is unlikely that the Fund will generate taxable profits in the future to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

6 Distributions

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:		
Interim distributions	6,309	6,214
Final distributions	8,308	8,034
	14,617	14,248
Add: Revenue deducted on cancellation of shares	752	668
Deduct: Revenue received on issue of shares	(502)	(343)
Total distributions	14,867	14,573
Reconciliations of distributions for the year to net revenue after taxation		
Distributions for the year	14,867	14,573
Equalisation on conversions	(1)	–
Net revenue after taxation	14,866	14,573

Details of the distributions per share are set out in the distribution tables on page 258.

7 Fair value hierarchy

Valuation technique	Assets at 15.10.19 £000	Assets at 15.10.18 £000
Level 1: Quoted prices	830,534	795,493
Level 2: Observable market data	3,700	7,200
Level 3: Unobservable data	70	–
Total value	834,304	802,693

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities.

The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority to unobservable inputs. Disclosure is required of the value in each category in order to give an insight into the extent to which fair value measurements are subjective.

The disclosure is split into the following categories:

Level 1: Unadjusted quoted price in an active market for an identical instrument;

Level 2: Valuation techniques using observable inputs other than quoted prices within level 1;

Level 3: Valuation techniques using unobservable inputs.

8 Debtors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued revenue	1,236	1,147
Amounts receivable on issue of shares	3,655	2,305
Overseas tax recoverable	739	446
Sales awaiting settlement	12	1,358
Total debtors	5,642	5,256

9 Cash and bank balances

	As at 15.10.19 £000	As at 15.10.18 £000
Cash and bank balances	1,010	8,430
Total cash and bank balances	1,010	8,430

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

10 Other creditors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued expenses	77	283
Amounts payable for cancellation of shares	738	9,942
Purchases awaiting settlement	4,597	–
Total other creditors	5,412	10,225

11 Contingent liabilities and commitments

The contingent liabilities and commitments at the year end date are as follows:

	As at 15.10.19 £000	As at 15.10.18 £000
Cellnex Telecom Rights 25/10/2019	133	–
Harvey Norman Holdings Rights 11/10/2019	1	–
Nufarm Rights	–	3
TMB Bank Rights 31/12/2019	19	–
Total contingent liabilities	153	3

12 Related party transactions

Aviva Investors UK Fund Services Limited, Aviva Investors Global Services Limited and the Aviva Group are deemed to be related parties per section 33.10 of FRS 102 as they are entities with control, joint control or significant influence over the entity.

Fund Management Fee/ACD periodic charges paid to Aviva Investors UK Fund Services Limited ("the ACD") are shown in note 4 and details of shares issued and cancelled by the ACD are shown in the statement of change in net assets attributable to shareholders. The balance due to the ACD at the year end in respect of Fund Management Fee/ACD periodic charges was £76,836 (2018: £282,562). Any balance due from the ACD in respect of issues is shown in note 8. Any balance due to the ACD in respect of cancellations is shown in note 10.

Distributions payable to the ACD and related parties of the ACD during the year amounted to £7,027,190 (2018: £6,418,389). The amount outstanding at the year end was £4,016,767 (2018: £3,642,177). Related parties of the ACD are deemed to be all companies under the control of Aviva Plc. This will include companies which hold shares in the Fund on behalf of other external investors.

Any investments managed and advised by Aviva Investors Global Services Limited or associated with the Aviva Group are identified on the portfolio statement.

The total purchases and sales on these investments during the year amounted to £138,100,000 (2018: £98,600,000) and £141,600,000 (2018: £914,000,000) respectively. The income received during the year amounted to £17,072 (2018: £7,776).

Holdings at the year end and movements during the year are as follows:

	Holdings at 15.10.19 (shares)	Movement (shares)	Holdings at 15.10.18 (shares)
ACD and related parties (Class 1 Accumulation shares)	–	(50,163)	50,163
ACD and related parties (Class 2 Accumulation shares)	2,384,287	(29,149)	2,413,436
ACD and related parties (Class 3 Accumulation shares)	100,389,652	(1,192,143)	101,581,795

The ACD and related parties of the ACD are ineligible to vote at any general meeting.

13 Shareholder funds

The Fund currently has four share classes: Class 1 (Retail), Class 2 and Class 5 (Institutional) and Class 3 (Associated undertakings of Aviva Plc). The Fund Management Fees are as follows:

Class 1:	0.56%
Class 2:	0.31%
Class 3:	0.31%
Class 5:	0.25%

The net asset value of the share class, the net asset value per share and the number of shares in the class are shown on page 204. The distributions per share are given in the distribution tables on page 258. All the share classes have the same rights on winding up.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

14 Shares in issue reconciliation

	Number of shares in issue at 15.10.18	Number of shares issued	Number of shares cancelled	Number of shares converted	Number of shares in issue at 15.10.19
Class 5 Income shares	1,000	–	–	–	1,000
Class 1 Accumulation shares	36,740,324	64,859,737	(68,089,782)	(429,168)	33,081,111
Class 2 Accumulation shares	212,793,406	868,995	(28,402,455)	399,212	185,659,158
Class 3 Accumulation shares	101,909,591	3,025,955	(4,545,894)	–	100,389,652

15 Derivatives and other financial instruments

The policies applied in the management of financial instruments are set out on pages 9 and 10.

Fair value of financial assets and financial liabilities

There is no significant difference between the carrying values of the financial assets and liabilities and their fair values (2018: £nil).

Currency risk

At the year end date, 99.72% (2018: 99.16%) of the net assets of the Fund were denominated in currencies other than sterling with the effect that the balance sheet and total return can be significantly affected by currency movements. If currency rates were to change by 10.00%, the value of the Fund would change by 9.97% (2018: 9.92%).

Currency	Net foreign currency assets

Interest rate risk

The Fund does not invest in either fixed or floating rate securities and interest rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions which will be affected by fluctuations in interest rates.

At the year end date 0.56% (2018: 1.94%) of the net assets of the Fund were interest bearing and as such the interest rate risk is not considered significant.

The floating rate on bank balances is linked to the Depositary's base rate.

The interest rate risk is not considered significant.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

15 Derivatives and other financial instruments (continued)**Market price risk**

At the year end date, 99.85% (2018: 99.57%) of the net assets of the Fund were invested in ordinary shares or stock units or debt securities admitted to an official stock exchange. If the market value were to change by 10%, the value of the Fund would change by 9.99% (2018: 9.96%).

16 Direct transaction costs

In the case of shares, broker commissions and transfer taxes, stamp duty is paid by the Fund on each transaction. In addition, there is a dealing spread between buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of the dealing spread.

Dealing spread

As at 15 October 2019, the average portfolio dealing spread was 0.07% (2018: 0.06%). This spread represents the difference between the values determined retrospectively by reference to the bid and offer prices of investments expressed as a percentage of the value determined by reference to the offer price.

17 Post balance sheet events

There are no post balance sheet events which require adjustment or disclosure at the year end (2018: £nil).

DISTRIBUTION TABLES

Final distribution payable in pence per share for the six months ended 15 October 2019

Income shares		Net revenue	Equalisation	Final distribution payable 15 December 2019	Final distribution paid 15 December 2018
Class 5 Income shares	Group 1	1.0310	–	1.0310	0.3380
	Group 2	1.0310	0.0000	1.0310	0.3380

Accumulation shares		Net revenue	Equalisation	Final distribution payable 15 December 2019	Final distribution paid 15 December 2018
Class 1 Accumulation shares	Group 1	1.6631	–	1.6631	1.4527
	Group 2	0.6555	1.0076	1.6631	1.4527
Class 2 Accumulation shares	Group 1	2.0411	–	2.0411	1.8286
	Group 2	0.9647	1.0764	2.0411	1.8286
Class 3 Accumulation shares	Group 1	3.9527	–	3.9527	3.5413
	Group 2	2.0041	1.9486	3.9527	3.5413

Final distribution

Group 1 shares are those shares purchased at or before 12:00 noon on 15 April 2019.

Group 2 shares are those shares purchased after 12:00 noon on 15 April 2019.

Interim distribution paid in pence per share for the six months ended 15 April 2019

Income shares		Net revenue	Equalisation	Interim distribution paid 15 June 2019	Interim distribution paid 15 June 2018
Class 5 Income shares	Group 1	0.7530	–	0.7530	–
	Group 2	0.7530	0.0000	0.7530	–

Interim distribution paid in pence per share for the six months ended 15 April 2019

Accumulation shares		Net revenue	Equalisation	Interim distribution paid 15 June 2019	Interim distribution paid 15 June 2018
Class 1 Accumulation shares	Group 1	1.1943	–	1.1943	0.9509
	Group 2	0.7770	0.4173	1.1943	0.9509
Class 2 Accumulation shares	Group 1	1.5099	–	1.5099	1.3709
	Group 2	1.0041	0.5058	1.5099	1.3709
Class 3 Accumulation shares	Group 1	2.9238	–	2.9238	2.6547
	Group 2	1.7023	1.2215	2.9238	2.6547

Interim distribution

Group 1 shares are those shares purchased at or before 12:00 noon on 15 October 2018.

Group 2 shares are those shares purchased after 12:00 noon on 15 October 2018.

Equalisation

Equalisation applies only to Group 2 shares, in other words shares purchased during the relevant period. It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

AVIVA INVESTORS GLOBAL EQUITY ENDURANCE FUND

INVESTMENT OBJECTIVE

The Fund aims to grow your investment over the long term (5 years or more) by investing in shares of global companies.

INVESTMENT POLICY

Core investment: At least 80% of the Fund will be invested in shares of global companies. "Global companies" means companies in any country across the globe, including in emerging markets.

Other investments: The Fund may also invest in other shares, other funds (including funds managed by Aviva Investors companies), cash and deposits.

Derivatives, such as futures, may be used from time to time, to gain a particular market exposure which would otherwise be difficult or costly to achieve, or to manage the Fund's cash flows in a cost-effective manner. Derivatives may also be used to reduce risk, such as foreign currency risk within the Fund, which is hedged using Forward Foreign Exchange contracts. This type of derivative usage is called "efficient portfolio management".

Strategy: The Fund is actively managed, and the Investment Manager invests in a concentrated portfolio, with holdings of typically 20 to 40 global companies that are considered by the Investment Manager to be leaders in their markets, with valuations which are considered to be attractive, and are expected to grow their value over the long term. They may be identified by having one or more of the following features: having a leading and/or growing market share; a history of strong and/or resilient returns on capital; a clear business model that is easy to understand; or being thought capable of maintaining their competitive advantage. The Investment Manager will aim to invest in companies which have a varied range of successful products, and which are active in a variety of geographical markets.

Environmental, Social & Governance (ESG): ESG factors are integrated into the investment process and are considered alongside a range of financial metrics and research, but the Investment Manager retains discretion over which investments are selected. We also actively engage with companies and use voting rights with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in the prospectus.

Performance & Risk Measurement: The Fund's performance is compared against the MSCI® All Country World Index (the "Index").

The Fund does not base its investment process upon the Index, so will not hold every company in the Index and may also hold companies that do not form part of it.

The Fund uses a "tracking error" to measure the consistency between the Fund's returns and the returns of the Index. In general, the lower the tracking error, the more consistent the Fund's returns are relative to the Index, and vice-versa. The Fund is expected to have an average yearly tracking error of between 3% and 8% when compared to the Index. In certain conditions the Fund may be outside of this range.

The Index comprises large and medium sized companies, as determined by their market capitalisation (total market value of a company's outstanding shares), from both developed and emerging markets, and the Index is designed to provide a broad measure of global equity market performance.

The Index has been selected as a benchmark for performance and risk measurement because it is representative of the type of companies in which the Fund is likely to invest, and it is therefore an appropriate comparator for the Fund's performance.

FUND MANAGER'S REPORT

Performance

Over the twelve months ended 15 October 2019, the Aviva Investors Global Equity Endurance Fund delivered a total return of 19.04% (share class 6), net of fees. The Fund's benchmark, the MSCI® All Countries World Index, returned 11.96%.

Review

The Endurance Fund seeks to achieve resilient returns over the long term by investing in a high-conviction, low turnover portfolio of carefully selected stocks.

Imagine surveying the worldwide universe of liquid investments through a pair of binoculars. Vision through the left-hand eyepiece sees 'durable' companies, predictable cash generative businesses; the right-hand eyepiece sees 'value' stocks trading at attractive cash-based valuations. The two fields of vision overlap in a middle focus area of what we term 'cheap endurables', a sub-set of durable businesses priced at discounts to their intrinsic value, out of which the Endurance portfolio is developed as we move from left to right as opportunities and conditions fluctuate. Both absolute returns from the market and relative returns from the Fund were strong over the period under review. During the second and third calendar quarters of 2019 we became concerned that the share price appreciation of our holdings and hence overall Fund returns was outpacing the accretion of intrinsic value within the portfolio. Making too much money, too soon could be classed as a 'good problem to have' but in our experience can be a sign of growing risk. Our response – as it ever shall be – was to buy cheap stocks and sell expensive ones based on our assessment of their intrinsic value relative to price. To adapt to the changing environment and maintain our focus on 'cheap endurables' whilst remaining invested in equities we have maintained the 'durable' settings on the imaginary binoculars but re-tuned the 'value' lens. Turnover in the Fund accordingly increased and we initiated seven new holdings (Aon, St James's Place, Comcast, First Republic, Marsh & McLennan, TravelSky Technology and Allegion), many of which brought a more value-orientated angle to the Fund, which at period-end accounted for 14% of the NAV (net asset value).

AVIVA INVESTORS GLOBAL EQUITY ENDURANCE FUND (CONTINUED)

FUND MANAGER'S REPORT (CONTINUED)

Unilever, a materially positive contributor, is one example of a stock that was sold on the other side. At the beginning of the period under review it was a 7.1% holding, the second largest overall, and has been a substantial holding since Fund inception. Back in the middle of 2017 the company guided that disposing of the structurally declining margarine business and acquiring fast-growing "speedboat" brands like Dollar Shave Club would be accretive to the overall organic revenue growth rate by 1%. However, even with this benefit the topline has failed to accelerate from the 2016 level of around 3%, in contrast to the trends exhibited by large cap peers, and despite the tailwind from pickup in emerging-markets which account for a disproportionate majority of Unilever's revenues. The recovery at Procter & Gamble, which reported 7% organic growth in the most recent period, is particularly stark (something we addressed in our August 2017 monthly commentary Big Gorilla). Indeed, Unilever's market share began to slip in 2017, coincident with the cost-cutting response to juice profits and defend against the aborted takeover bid from KraftHeinz. Whilst these deteriorating trends had been apparent to us for some time and we revised our valuation assessment accordingly, what changed more rapidly was that the share price continued to record fresh all-time highs, and consequently we trimmed our exposure substantially during the period under review.

Another materially positive contributor was Relx, a conglomerate of various media, professional services, and data assets. Towards the end of 2018 the market began to question the sustainability of the academic journal publishing activities within their Elsevier arm and the perceived threat posed by a flip to author-pays 'open access' to library-funded subscriptions. We took the other side of the debate and discussed our reasons for doing so in our previous interim report and the September 2018 monthly commentary Curriculum Vitae. As such, it is pleasing to have been rewarded with a positive share price response.

The main detractor during the period under review was UnitedHealth Group, which fell by 11%. We discussed the investment rationale and the proximate cause for the share price decline at length in our April interim report. The stock went on to recover somewhat subsequently but fell back towards the end of the period as US President hopeful Elizabeth Warren continued to rise in the polls and betting odds. We estimate that the current share price discounts a 60% likelihood of adverse 'Medicare For All' measures being enacted. However, the key sticking point to passing legislation is the Senate, where the Democrats are three short of a majority and the election odds of winning the chamber have remained consistently against even as Warren's fortunes have improved. Moreover, back in 2009 the Democrats struggled to get Obamacare through the Senate controlling 60 seats, instead watering down the proposals such that it served to further entrench UnitedHealth and other managed care companies in the US healthcare system. Should the price weakness continue we may add to the position further.

Outlook

The Global Equity Endurance Fund is a portfolio of what we believe to be above-average businesses trading at a cheaper free cash flow yield than the market and a discount to their intrinsic value. A combined focus on the durability of a company and the price we pay for the stock enables us to exploit opportunities and ought to make the approach adaptive to changing market conditions. As a long-term strategy with low turnover we fully expect and recommend that unitholders judge our performance over a period of five years or more.

November 2019

Sources: Fund and peer group performance figures – Lipper Hindsight, mid to mid basis with net income reinvested in GBP, with no initial charges applied. Market data – Bloomberg.

As noted above, the performance figures in this commentary have been sourced from an external party and are based on published prices. The performance figures quoted in the comparative tables on page 262 are based on the net asset value per the published accounts and may be different due to post year end accounting adjustments.

Any opinions expressed are those of the Fund manager. They should not be viewed as a guarantee of a return from an investment in the Funds. The content of the commentary should not be viewed as a recommendation to invest nor buy or sell any securities. Past performance is not a guide to the future. The value of an investment and any income from it can go down as well as up. Investors may not get back the original amount invested.

Synthetic Risk and Reward Indicator

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- The value of investments and the income from them will change over time.
- The Fund price may fall as well as rise and as a result you may not get back the original amount you invested.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at www.avivainvestors.com or from the ACD on request.

§ This share class was launched on 19 December 2017.

‡ The operating charges are calculated on an ex-post basis and as such may differ from the Ongoing Charge Figure where:

(a) Changes to fee rates were made during the year and the Ongoing Charge Figure has been amended to be future proofed for this change.

(b) The Ongoing Charge has been annualised for a share class that has not yet been open for a full year.

The direct transaction costs have been stated after deducting, in the case of single-priced funds, the proportion of the amounts collected from dilution adjustments or dilution levies that relates to direct transaction costs and, in the case of dual-priced funds, the amounts collected in relation to direct transaction costs added to, or subtracted from, the valuations by virtue of COLL 6.3.6 G (4).

≈ The high and low prices disclosed are the high and low prices for the accounting period and not the calendar year and are based on published prices. The net asset value per share price is based on the net asset value in the published accounts and may be different due to post year end accounting adjustments.

§ The Fund launched on 19 December 2017.

Ongoing Charges Figure*

Share class	15.10.19	19.12.17 to 15.10.18
Class 2	0.92%	0.92%
Class 3	0.47%	0.47%
Class 6	1.17%	1.17%

* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the year. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

NOTES TO THE FINANCIAL STATEMENTS

1 Accounting basis and policies

Please see pages 8 to 10 for accounting basis and policies.

2 Net capital gains/(losses)

	Year ended 15.10.19 £000	Period ended 15.10.18 [§] £000
Net capital gains/(losses) on investment during the year comprise:		
Currency gains/(losses)	345	(291)
Derivative contracts gains	–	176
Expenses relating to the purchase and sale of investments	–	(4)
Non-derivative securities gains/(losses)	37,135	(6,916)
Net capital gains/(losses)	37,480	(7,035)

3 Revenue

	Year ended 15.10.19 £000	Period ended 15.10.18 [§] £000
Bank and deposit interest	25	–
Interest on debt securities	2	2
Overseas dividends	2,731	2,606
Revenue from offshore funds	84	–
UK dividends	1,514	959
Total revenue	4,356	3,567

4 Expenses

	Year ended 15.10.19 £000	Period ended 15.10.18 [§] £000
Payable to the Authorised Corporate Director ("ACD"), associates of the ACD or agents of either of them:		
Fund Management Fee/ACD's periodic charge*	1,075	706
	1,075	706
Payable to the Depositary, associates of the Depositary or agents of either of them:		
Depositary's fee	–	11
Interest payable	9	6
Safe custody fee	–	8
	9	25
Other expenses:		
Audit fee**	–	6
Statement fee	–	2
	–	8
Total expenses	1,084	739

§ Fund launched on 19 December 2017.

* From 4 June 2018 the Fund changed to a single fixed charge known as the Fund Management Fee (FMF). The FMF covers fees and expenses in relation to the operation and administration of the Company and the Fund.

** The audit fee was £9,985 (2018: £9,601) net of VAT. With effect from 4 June 2018, the audit fee was no longer accrued for separately and now forms part of the FMF.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

5 Taxation

a Analysis of tax charge

	Year ended 15.10.19 £000	Period ended 15.10.18 [§] £000
Overseas tax suffered	235	451
Total current tax (see note 5b)	235	451

b Factors affecting current tax charge

The tax assessed for the year is lower (2018: lower) than the standard rate of corporation tax in the UK for an Authorised Investment Fund (20%) (2018: 20%).

The differences are explained below:

	Year ended 15.10.19 £000	Period ended 15.10.18 [§] £000
Net revenue before taxation	3,272	2,828
Corporation tax at 20%	654	566
Effects of:		
Movement in excess management expenses	194	147
Overseas dividends not subject to corporation tax	(546)	(522)
Overseas tax suffered	235	451
Tax credit on Loan relationship deficit	–	1
UK dividends not subject to corporation tax	(302)	(192)
Current tax charge (see note 5a)	235	451

Authorised Investment Funds are exempt from tax on capital gains. Therefore, any capital return is not included in the above reconciliation.

c Deferred tax

At the balance sheet date, there is a potential deferred tax asset of £340,986 (2018: £146,597) in respect of unutilised management expenses of £1,704,932 (2018: £732,985). It is unlikely the Fund will generate sufficient taxable profits in the future to utilise this amount and therefore no deferred tax asset has been recognised in the year or prior period.

6 Distributions

	Year ended 15.10.19 £000	Period ended 15.10.18 [§] £000
The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:		
Final distribution	3,035	2,434
	3,035	2,434
Add: Revenue deducted on cancellation of shares	4	–
Deduct: Revenue received on issue of shares	(2)	(57)
Total distributions	3,037	2,377

Details of the distributions per share are set out in the distribution tables on page 273.

[§] Fund launched on 19 December 2017.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

7 Fair value hierarchy

Valuation technique	As at 15.10.19 £000	As at 15.10.18 £000
Level 1: Quoted prices	234,574	193,457
Level 2: Observable market data	10,037	–
Total value	244,611	193,457

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities.

The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority to unobservable inputs. Disclosure is required of the value in each category in order to give an insight into the extent to which fair value measurements are subjective.

The disclosure is split into the following categories:

Level 1: Unadjusted quoted price in an active market for an identical instrument;

Level 2: Valuation techniques using observable inputs other than quoted prices within level 1;

Level 3: Valuation techniques using unobservable inputs.

8 Debtors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued revenue	206	158
Amounts receivable on issue of shares	4	–
Overseas tax recoverable	132	81
Sales awaiting settlement	–	5,267
Total debtors	342	5,506

9 Cash and bank balances

	As at 15.10.19 £000	As at 15.10.18 £000
Cash and bank balances	226	13,790
Total cash and bank balances	226	13,790

10 Other creditors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued expenses	44	118
Amounts payable for cancellation of shares	–	9
Purchases awaiting settlement	–	5,943
Total other creditors	44	6,070

11 Contingent liabilities and commitments

There were no contingent liabilities or commitments at the year end (2018: £nil).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

12 Related party transactions

Aviva Investors UK Fund Services Limited, Aviva Investors Global Services Limited and the Aviva Group are deemed to be related parties per section 33.10 of FRS 102 as they are entities with control, joint control or significant influence over the entity.

Fund Management Fee/ACD periodic charges paid to Aviva Investors UK Fund Services Limited ("the ACD") are shown in note 4 and details of shares issued and cancelled by the ACD are shown in the statement of change in net assets attributable to shareholders. The balance due to the ACD at the year end in respect of Fund Management Fee/ACD periodic charges was £44,359 (2018: £118,165). Any balance due from the ACD in respect of issues is shown in note 8. Any balance due to the ACD in respect of cancellations is shown in note 10.

Distributions payable to the ACD and related parties of the ACD during the year amounted to £3,031,038 (2018: £2,431,620). The amount outstanding at the year end was £3,031,038 (2018: £2,431,620). Related parties of the ACD are deemed to be all companies under the control of Aviva Plc. This will include companies which hold shares in the Fund on behalf of other external investors.

Any investments managed and advised by Aviva Investors Global Services Limited or associated with the Aviva Group are identified on the portfolio statement.

Holdings at the year end and movements during the year are as follows:

	Holdings at 15.10.19 (shares)	Movement (shares)	Holdings at 15.10.18 (shares)
ACD and related parties (Class 2 Accumulation shares)	6,424	5,245	1,179
ACD and related parties (Class 3 Accumulation shares)	208,658,736	(2,089,296)	210,748,032

The ACD and related parties of the ACD are ineligible to vote at any general meeting.

13 Shareholder funds

The Fund currently has three share classes: Class 6 (Retail), Class 2 (Institutional) and Class 3 (Associated undertakings of Aviva Plc). The Fund Management Fees are as follows:

Class 2: 0.92%
Class 3: 0.47%
Class 6: 1.17%

The net asset value of the share class, the net asset value per share and the number of shares in the class are shown on page 262. The distributions per share are given in the distribution tables on page 273. All the share classes have the same rights on winding up.

14 Shares in issue reconciliation

	Number of shares in issue at 15.10.18	Number of shares issued	Number of shares cancelled	Number of shares converted	Number of shares in issue at 15.10.19
Class 2 Accumulation shares	229,086	208,391	(62,155)	–	375,322
Class 3 Accumulation shares	210,748,032	205,213	(2,294,509)	–	208,658,736

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

15 Derivatives and other financial instruments

The policies applied in the management of financial instruments are set out on pages 9 and 10.

Fair value of financial assets and financial liabilities

There is no significant difference between the carrying values of the financial assets and liabilities and their fair values (2018: £nil).

Currency risk

At the year end date, 87.89% (2018: 83.72%) of the net assets of the Fund were denominated in currencies other than sterling with the effect that the balance sheet and total return can be significantly affected by currency movements. If currency rates were to change by 10.00%, the value of the Fund would change by 8.79% (2018: 8.37%).

Currency	Net foreign currency assets					
	Monetary exposure £000		Non monetary exposure £000		Total £000	
	15.10.19	15.10.18	15.10.19	15.10.18	15.10.19	15.10.18
Danish krone	12	652	–	–	12	652
Euro	239	(355)	51,669	38,005	51,908	37,650
Hong Kong dollar	3	–	2,584	–	2,587	–
South African rand	58	(196)	2,903	2,559	2,961	2,363
Swedish krona	1	9	9,694	9,402	9,695	9,411
US dollar	98	11,402	148,200	111,275	148,298	122,677

Interest rate risk

The Fund does not invest in either fixed or floating rate securities and interest rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions which will be affected by fluctuations in interest rates.

At the year end date 0.09% (2018: 6.52%) of the net assets of the Fund were interest bearing and as such the interest rate risk is not considered significant.

The floating rate on bank balances is linked to the Depositary's base rate.

Market price risk

At the year end date, 99.79% (2018: 93.75%) of the net assets of the Fund were invested in ordinary shares or stock units admitted to an official stock exchange. If the market value were to change by 10%, the value of the Fund would change by 9.98% (2018: 9.38%).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

16 Direct transaction costs

In the case of shares, broker commissions and transfer taxes, stamp duty is paid by the Fund on each transaction. In addition, there is a dealing spread between buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of the dealing spread.

Dealing spread

As at 15 October 2019, the average portfolio dealing spread was 0.04% (2018: 0.03%). This spread represents the difference between the values determined retrospectively by reference to the bid and offer prices of investments expressed as a percentage of the value determined by reference to the offer price.

17 Post balance sheet events

There are no post balance sheet events which require adjustment or disclosure at the year end (2018: £nil).

DISTRIBUTION TABLES

Final distribution payable in pence per share for the year ended 15 October 2019

Accumulation shares		Gross revenue	Equalisation	Final distribution payable 15 December 2019	Final distribution paid 15 December 2018
Class 2 Accumulation shares	Group 1	0.9569	–	0.9569	0.8227
	Group 2	0.4288	0.5281	0.9569	0.8227
Class 3 Accumulation shares	Group 1	1.4526	–	1.4526	1.1538
	Group 2	1.3234	0.1292	1.4526	1.1538
Class 6 Accumulation shares	Group 1	0.7075	–	0.7075	0.6145
	Group 2	0.4901	0.2174	0.7075	0.6145

Final distribution

Group 1 shares are those shares purchased at or before 12:00 noon on 15 October 2018.

Group 2 shares are those shares purchased after 12:00 noon on 15 October 2018.

Equalisation

Equalisation applies only to Group 2 shares, in other words shares purchased during the period. It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

AVIVA INVESTORS GLOBAL EQUITY INCOME FUND

INVESTMENT OBJECTIVE

The Fund aims to grow your investment through a combination of income and capital growth over the long term (5 years or more) by investing in shares of global companies.

Within this combined return, the Fund aims to deliver an income equivalent of at least 125% of the income return of the MSCI® All Country World Index (GBP)[†], over any given 12-month period (before charges and taxes).

INVESTMENT POLICY

Core investment: At least 80% of the Fund will be invested in shares of global companies. "Global companies" means companies in any country across the globe, including with up to 20% of the Fund invested in emerging markets.

Other investments: The Fund may also invest in other shares, other funds (including funds managed by Aviva Investors companies), cash and deposits.

Derivatives, such as futures, may be used from time to time, to gain a particular market exposure which would otherwise be difficult or costly to achieve, or to manage the Fund's cash flows in a cost-effective manner. Derivatives may also be used to reduce risk, such as foreign currency risk within the Fund, which is hedged using Forward Foreign Exchange contracts. This type of derivative usage is called "efficient portfolio management".

Strategy: The Fund is actively managed, and the Investment Manager will adopt a high conviction (strong belief) approach aiming to generate the Fund's target income. This will focus on opportunities across what the Investment Manager considers to be mature companies which potentially offer sustainably high dividends, or those which are felt able to steadily grow their dividends while showing financial strength and/or low levels of debt, with a strong management capability. The Fund will also take advantage of businesses in the early stages of development, where high cash generation is driving strong dividend growth. The Investment Manager will aim to invest in companies which have a diversified range of successful products, and which are active in a range of geographical markets.

Environmental, Social & Governance (ESG): ESG factors are integrated into the investment process and are considered alongside a range of financial metrics and research, but the Investment Manager retains discretion over which investments are selected. We also actively engage with companies and use voting rights with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in the prospectus.

Performance & Risk Measurement: The Fund's income return target is measured against the MSCI® All Country World Index (the "Index"), and the Fund's overall performance is also compared against the Index.

The Fund does not base its investment process upon the Index, so will not hold every company in the Index and may also hold companies that do not form part of it.

The Fund uses a "tracking error" to measure the consistency between the Fund's returns and the returns of the Index. In general, the lower the tracking error, the more consistent the Fund's returns are relative to the Index, and vice-versa. The Fund is expected to have an average yearly tracking error of between 2% and 6% when compared to the Index. In certain conditions the Fund may be outside of this range.

The Index comprises large and medium sized companies, as determined by their market capitalisation (total market value of a company's outstanding shares), from both developed and emerging markets, and the Index is designed to provide a broad measure of global equity market performance.

The Index has been selected as a benchmark for the income target and performance and risk measurement because it is representative of the type of companies in which the Fund is likely to invest, and it is therefore an appropriate comparator for the Fund's performance.

FUND MANAGER'S REPORT

Performance

Over the twelve months ended 15 October 2019, the Aviva Investors Global Equity Income Fund delivered a total return of 12.52% (share class 1), net of fees. The Funds benchmark, the MSCI® All Country World Index delivered an average return of 11.96%.

Investment Review

Escalating trade tensions between the US and China and concerns that the US Federal Reserve (Fed) had tightened monetary policy too aggressively unsettled investors, particularly during the fourth quarter of 2018 when equity markets worldwide recorded sharp falls. Since the turn of the year, markets have rallied as the Fed changed course and loosened monetary policy, with the European Central Bank (ECB) following suit, although volatility resurfaced in May and August in response to an escalation in the US-China trade dispute. In January, the Fed signalled interest rates had peaked, citing slowing global growth, the ongoing US-China trade dispute and tighter financial conditions, and subsequently reduced its key Fed Funds rate in July and September. In response to a sharp economic slowdown in the Eurozone, the ECB announced it would recommence QE (quantitative easing), with effect from November, at €20 billion a month and maintain this policy until inflation returns to its 2% target. Overall, global economic indicators have weakened over the period, reflecting a slowdown in manufacturing and trade.

In the US, the resilience of the domestic economy has underpinned equities, although investors have scaled back earnings expectations as the one-off impact of tax cuts has run its course. The UK equity market underperformed global indices as uncertainty over Brexit negotiations increased scepticism amongst investors globally that the UK's withdrawal from the European Union can be resolved in a timely and efficient manner. European equities gained ground although political concerns resurfaced as the year progressed, most notably in Italy, where the ruling coalition fragmented and subsequently a new administration was formed. In Asia, markets produced firm gains but underperformed global indices. This reflected disappointing relative returns early in the review period, particularly during bouts of risk aversion amid concerns that the region's export-oriented economies are most exposed to trade barriers arising from the US-China trade dispute. Japan produced relatively poor returns as the country's exports have now declined for ten consecutive months. Emerging market equities delivered positive returns, performing broadly in line with global markets.

AVIVA INVESTORS GLOBAL EQUITY INCOME FUND (CONTINUED)

FUND MANAGER'S REPORT (CONTINUED)

Notwithstanding bouts of underperformance as trade tensions spiralled, optimism that talks will ultimately reduce trade friction, and interest rate cuts late in the period, lent support to emerging markets.

Fund Review

The Fund has outperformed its benchmark over the period. Overall, stock selection has been the main contributory factor, most notably holdings in the consumer discretionary, industrials, materials and technology sectors.

Amongst consumer stocks, fast food chain McDonalds was a strong contributor following positive results which highlighted ongoing global sales momentum. This stock is a core holding with the company having grown their annual dividend for 42 consecutive years. US DIY retailer Home Depot was another key contributor as a combination of robust consumer confidence, an ageing housing stock and low mortgage rates underpin a healthy environment for the US home improvement sector. In the industrials sector, our holding in French construction company Vinci performed well over the reporting period. The company announced encouraging interim results, driven by solid performance from its fast-growing airports and motorway concessions businesses and reaffirmed its forecasts for the full-year.

Our holding in mining group Rio Tinto made a positive contribution. The company announced a \$1 billion special dividend, after reporting its best interim results for five years on the back of a sharp rise in iron ore prices due to a series of supply disruptions. In the technology sector, semiconductor supplier Texas Instruments rose sharply as results highlighted that demand from China remained robust, despite the headwind of an ongoing trade war between the US and China. Cisco Systems also performed well, although not without volatility in the company's share price. After first quarter earnings exceeded expectations, the US networking equipment company downgraded revenue guidance as although China is only a small part of their revenues, the trade dispute with the US is having a material impact on the business. We retained our holding given the strength of Cisco's core businesses in the US and EMEA, and the potential to benefit from their increasing footprint in software and cybersecurity.

Elsewhere, in the utilities sector our holding in US utility company NextEra Energy rose strongly. We continued to build our position as we view this an attractive business in both the regulated utility (with their Florida Power and Light division) and renewables divisions. Nextera are the US leader in terms of market share in both offshore wind and solar, which we believe makes them exceptionally well-placed to capitalise on new renewables projects. The company has grown its dividend for 25 years, and at a near 10% year-on-year increase over the past decade. In the real estate sector, CoreSite Realty, which provides data centres and interconnection solutions across the US, was another positive. The company offers an attractive dividend yield, and continues to benefit from the increasing demand for data storage across the globe as companies look to outsource data to the cloud.

The main factors that detracted from the Fund's performance over the reporting period were positioning in the financials and healthcare sectors. French banking group BNP Paribas reported a sharp fall in trading revenues during the fourth quarter of 2018 although subsequently its investment banking division has recovered as fixed income revenues have picked up. However, the sluggish performance of financials generally, and disappointing results from some of its European peers, have held back the shares.

In the healthcare sector, our holding in US medical insurer UnitedHealth detracted as US Presidential hopeful Elizabeth Warren continues to rise in the polls. However, the key obstacle to passing 'Medicare for All' legislation is the Senate, where the Democrats are three short of a majority and the election odds of winning the chamber next year have remained consistently against, even as Warren's fortunes have improved. We exited our position in US drug company Pfizer, given revenue growth remains challenged from their legacy drug portfolio, switching into Swiss drug manufacturer Novartis, which has a stronger drug pipeline and is less impacted by potential US drug price reforms.

Elsewhere, we initiated a position in aerospace and defence supplier United Technologies. Their Collins Aerospace and Pratt & Whitney engine divisions are benefitting from the increased demand for narrowbody planes from Airbus and Boeing. In addition, we see significant value in their elevators (Otis), and heating and ventilation (Carrier) businesses, noting the company is looking to spin both these divisions out in 2020 which should help crystallise some of this value.

We sold out of medical and personal health equipment manufacturer Philips. The company's personal health division continues to deliver healthy organic growth, but we noted margin growth expectations had become quite elevated in the market and decided to take profits. We switched the position into US medtech company Medtronic, who we feel are well-placed to benefit from recent product launches in heart valve replacement and pacemakers. The company has delivered impressive double-digit dividend growth over the past 5 years and we view this as sustainable over the longer term given their ability to grow cash flow.

Outlook

We remain cautious in general on the outlook for equity markets in the short to medium term, largely due to the decelerating environment for corporate earnings in the US and Europe. We are also seeing companies reticent to embark on significant investment programs, although this may be largely down to the uncertainty regarding US and China trade, as well as Brexit. From a longer-term perspective, we are still finding income-paying stocks with exciting prospects in terms of future dividend growth but we remain disciplined in terms of valuations we are looking to pay for these in the light of the re-rating we have seen in global equity markets year-to-date.

Synthetic Risk and Reward Indicator

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- The value of investments will be affected by changes in exchange rates.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at www.avivainvestors.com or from the ACD on request.

[‡] The operating charges are calculated on an ex-post basis and as such may differ from the Ongoing Charge Figure where:

(a) Changes to fee rates were made during the year and the Ongoing Charge Figure has been amended to be future proofed for this change.

(b) The Ongoing Charge has been annualised for a share class that has not yet been open for a full year.

[#] The direct transaction costs have been stated after deducting, in the case of single-priced funds, the proportion of the amounts collected from dilution adjustments or dilution levies that relates to direct transaction costs and, in the case of dual-priced funds, the amounts collected in relation to direct transaction costs added to, or subtracted from, the valuations by virtue of COLL 6.3.6 G (4).

[≈] The high and low prices disclosed are the high and low prices for the accounting period and not the calendar year and are based on published prices. The net asset value per share price is based on the net asset value in the published accounts and may be different due to post year end accounting adjustments.

Ongoing Charges Figure*

Share class	15.10.19	15.10.18
Class 1	1.17%	1.17%
Class 2	0.92%	0.92%
Class 3	0.47%	0.47%

* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the year. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

NOTES TO THE FINANCIAL STATEMENTS

1 Accounting basis and policies

Please see pages 8 to 10 for accounting basis and policies.

2 Net capital gains

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Net capital gains on investment during the year comprise:		
Currency gains/(losses)	78	(70)
Non-derivative securities gains	21,856	5,328
Net capital gains	21,934	5,258

3 Revenue

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Bank and deposit interest	26	11
Overseas dividends	5,479	5,746
UK dividends	1,534	1,501
Total revenue	7,039	7,258

4 Expenses

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Payable to the Authorised Corporate Director ("ACD"), associates of the ACD or agents of either of them:		
Fund Management Fee/ACD's periodic charge*	1,278	1,295
Registration fees	–	22
	1,278	1,317
Payable to the Depositary, associates of the Depositary or agents of either of them:		
Depositary's fee	–	20
Interest payable	2	1
Safe custody fee	–	17
	2	38
Other expenses:		
Audit fee**	–	7
Total expenses	1,280	1,362

* From 4 June 2018 the Fund changed to a single fixed charge known as the Fund Management Fee (FMF). The FMF covers fees and expenses in relation to the operation and administration of the Company and the Fund.

** The audit fee was £8,897 (2018: £8,555) net of VAT. With effect from 4 June 2018, the audit fee was no longer accrued for separately and now forms part of the FMF.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

5 Taxation**a Analysis of tax charge**

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Overseas tax suffered	614	619
Total current tax (see note 5b)	614	619

b Factors affecting current tax charge

The tax assessed for the year is lower (2018: lower) than the standard rate of corporation tax in the UK for an Authorised Investment Fund (20%) (2018: 20%).

The differences are explained below:

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Net revenue before taxation	5,759	5,896
Corporation tax at 20%	1,152	1,179
Effects of:		
Movement in excess management expenses	228	246
Overseas dividends not subject to corporation tax	(1,069)	(1,121)
Overseas tax credit	(4)	(4)
Overseas tax suffered	614	619
UK dividends not subject to corporation tax	(307)	(300)
Current tax charge (see note 5a)	614	619

Authorised Investment Funds are exempt from tax on capital gains. Therefore, any capital return is not included in the above reconciliation.

c Deferred tax

There was no provision for deferred tax at the year end (2018: £nil).

After claiming relief against accrued income taxable on receipt, the Fund has unrelieved excess expenses of £8,125,848 (2018: £6,985,221) creating a potential deferred tax asset of £1,625,170 (2018: £1,397,044). It is unlikely that the Fund will generate taxable profits in the future to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

6 Distributions

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:		
Net dividend distribution for the three months ended 15 January	1,165	1,147
Net dividend distribution for the three months ended 15 April	1,726	1,692
Net dividend distribution for the three months ended 15 July	2,083	2,299
Net dividend distribution for the three months ended 15 October	1,338	1,310
	6,312	6,448
Add: Revenue deducted on cancellation of shares	166	163
Deduct: Revenue received on issue of shares	(80)	(50)
Total distributions	6,398	6,561
Reconciliations of distributions for the year to net revenue after taxation		
Distributions for the year	6,398	6,561
ACD's periodic charge borne by the capital account	(1,278)	(1,295)
Tax relief on capitalised ACD's periodic charge	25	11
Net revenue after taxation	5,145	5,277

Details of the distributions per share are set out in the distribution tables on pages 289 and 290.

7 Fair value hierarchy

Valuation technique	Assets at 15.10.19 £000	Assets at 15.10.18 £000
Level 1: Quoted prices	207,558	204,624
Total value	207,558	204,624

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities.

The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority to unobservable inputs. Disclosure is required of the value in each category in order to give an insight into the extent to which fair value measurements are subjective.

The disclosure is split into the following categories:

Level 1: Unadjusted quoted price in an active market for an identical instrument;

Level 2: Valuation techniques using observable inputs other than quoted prices within level 1;

Level 3: Valuation techniques using unobservable inputs.

8 Debtors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued revenue	151	158
Amounts receivable on issue of shares	74	137
Overseas tax recoverable	161	98
Sales awaiting settlement	210	4,795
Total debtors	596	5,188

9 Cash and bank balances

	As at 15.10.19 £000	As at 15.10.18 £000
Cash and bank balances	11,468	10,229
Total cash and bank balances	11,468	10,229

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

10 Other creditors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued expenses	51	153
Amounts payable for cancellation of shares	49	8,163
Purchases awaiting settlement	–	2,840
Total other creditors	100	11,156

11 Contingent liabilities and commitments

There were no contingent liabilities or commitments at the year end (2018: £nil).

12 Related party transactions

Aviva Investors UK Fund Services Limited, Aviva Investors Global Services Limited and the Aviva Group are deemed to be related parties per section 33.10 of FRS 102 as they are entities with control, joint control or significant influence over the entity.

Fund Management Fee/ACD periodic charges paid to Aviva Investors UK Fund Services Limited ("the ACD") are shown in note 4 and details of shares issued and cancelled by the ACD are shown in the statement of change in net assets attributable to shareholders. The balance due to the ACD at the year end in respect of Fund Management Fee/ACD periodic charges was £51,273 (2018: £152,921). Any balance due from the ACD in respect of issues is shown in note 8. Any balance due to the ACD in respect of cancellations is shown in note 10.

Distributions payable to the ACD and related parties of the ACD during the year amounted to £5,140,155 (2018: £5,441,879). The amount outstanding at the year end was £1,072,476 (2018: £1,097,142). Related parties of the ACD are deemed to be all companies under the control of Aviva Plc. This will include companies which hold shares in the Fund on behalf of other external investors.

Any investments managed and advised by Aviva Investors Global Services Limited or associated with the Aviva Group are identified on the portfolio statement.

Holdings at the year end and movements during the year are as follows:

	Holdings at 15.10.19 (shares)	Movement (shares)	Holdings at 15.10.18 (shares)
ACD and related parties (Class 2 Income shares)	744,123	148,531	595,592
ACD and related parties (Class 3 Income shares)	111,223,886	(11,564,942)	122,788,828
ACD and related parties (Class 2 Accumulation shares)	1,997,641	429,964	1,567,677
ACD and related parties (Class 3 Accumulation shares)	1,120	(562)	1,682

The ACD and related parties of the ACD are ineligible to vote at any general meeting.

13 Shareholder funds

The Fund currently has three share classes: Class 1 (Retail), Class 2 (Institutional) and Class 3 (Associated undertakings of Aviva Plc). The Fund Management Fees are as follows:

Class 1: 1.17%

Class 2: 0.92%

Class 3: 0.47%

The net asset value of the share class, the net asset value per share and the number of shares in the class are shown on pages 277 and 278. The distributions per share are given in the distribution tables on pages 289 and 290. All the share classes have the same rights on winding up.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

14 Shares in issue reconciliation

	Number of shares in issue at 15.10.18	Number of shares issued	Number of shares cancelled	Number of shares converted	Number of shares in issue at 15.10.19
Class 1 Income shares	354,326	172,824	(76,641)	(12,965)	437,544
Class 2 Income shares	1,686,009	1,274,350	(408,406)	12,431	2,564,384
Class 3 Income shares	123,088,773	3,093,565	(14,958,452)	–	111,223,886
Class 1 Accumulation shares	17,642,675	4,156,331	(2,433,081)	(80,604)	19,285,321
Class 2 Accumulation shares	4,276,153	1,727,450	(401,106)	71,990	5,674,487
Class 3 Accumulation shares	1,682	–	(562)	–	1,120

15 Derivatives and other financial instruments

The policies applied in the management of financial instruments are set out on pages 9 and 10.

Fair value of financial assets and financial liabilities

There is no significant difference between the carrying values of the financial assets and liabilities and their fair values (2018: £nil).

Currency risk

At the year end date, 82.74% (2018: 84.64%) of the net assets of the Fund were denominated in currencies other than sterling with the effect that the balance sheet and total return can be significantly affected by currency movements. If currency rates were to change by 10.00%, the value of the Fund would change by 8.27% (2018: 8.46%).

Currency	Net foreign currency assets					
	Monetary exposure £000		Non-monetary exposure £000		Total £000	
	15.10.19	15.10.18	15.10.19	15.10.18	15.10.19	15.10.18
Canadian dollar	–	30	–	3,884	–	3,914
Danish krone	37	49	–	–	37	49
Euro	5,026	(215)	40,853	40,346	45,879	40,131
Norwegian krone	–	5	–	–	–	5
Swiss franc	–	–	5,949	–	5,949	–
US dollar	480	2,885	128,398	128,885	128,878	131,770

Interest rate risk

The Fund does not invest in either fixed or floating rate securities and interest rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions which will be affected by fluctuations in interest rates.

At the year end date 5.25% (2018: 4.92%) of the net assets of the Fund were interest bearing and as such the interest rate risk is not considered significant.

The floating rate on bank balances is linked to the Depositary's base rate.

The floating rate on deposits is linked to LIBOR or its overseas equivalent.

Market price risk

At the year end date, 95.01% (2018: 98.48%) of the net assets of the Fund were invested in ordinary shares or stock units or debt securities admitted to an official stock exchange. If the market value were to change by 10%, the value of the Fund would change by 9.50% (2018: 9.85%).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

16 Direct transaction costs

In the case of shares, broker commissions and transfer taxes, stamp duty is paid by the Fund on each transaction. In addition, there is a dealing spread between buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of the dealing spread.

Dealing spread

As at 15 October 2019, the average portfolio dealing spread was 0.03% (2018: 0.02%). This spread represents the difference between the values determined retrospectively by reference to the bid and offer prices of investments expressed as a percentage of the value determined by reference to the offer price.

17 Post balance sheet events

There are no post balance sheet events which require adjustment or disclosure at the year end (2018: £nil).

DISTRIBUTION TABLES

Interim distribution

Group 1 shares are those shares purchased at or before 12:00 noon on 15 October 2018.

Group 2 shares are those shares purchased after 12:00 noon on 15 October 2018.

Equalisation

Equalisation applies only to Group 2 shares, in other words shares purchased during the relevant period. It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

AVIVA INVESTORS GLOBAL EQUITY UNCONSTRAINED FUND

The Fund launched on 1 August 2019.

INVESTMENT OBJECTIVE

The Fund aims to grow your investment over the long term (5 years or more) by investing in shares of global companies.

INVESTMENT POLICY

Core investment: At least 90% of the Fund will be invested in shares of global companies. "Global companies" means companies in any country across the globe, including in emerging markets.

Other investments: The Fund may also invest in other funds (including funds managed by Aviva Investors companies), cash, and deposits. Derivatives, such as futures, may be used from time to time, to gain market exposure which may be difficult or costly to achieve directly, or to manage the Fund's cash flows in a cost-effective manner. Derivatives may also be used to reduce risk, such as foreign currency risk within the Fund, which may be hedged using Forward Foreign Exchange contracts. This type of derivative usage is called "efficient portfolio management".

Strategy: The Fund is actively managed with an unconstrained and flexible investment style, allowing the Investment Manager the freedom to invest in selected companies of any size, and at any stage of the business cycle. This will include investing in market leading and mature companies with the potential for superior earnings growth and sustainable dividends respectively, as well as identifying companies which are out of favour at a particular point in time, but where there is a specific opportunity for the company's value to increase in the future.

Environmental, Social & Governance (ESG) factors: ESG factors are integrated into the investment process and are considered alongside a range of financial metrics and research, but the Investment Manager retains discretion over which investments are selected. We also actively engage with companies and use voting rights with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in the prospectus.

Performance and Risk Measurement: The Fund's performance is compared against the MSCI® All Countries World Index* ("the Index").

The Fund's investment process is not constrained by the Index, so it will not hold every company in the Index and may also hold companies that do not form part of it.

The Fund uses a "tracking error" to measure the consistency between the Fund's returns and the returns of the Index. In general, the lower the tracking error, the more consistent the Fund's returns are relative to the Index, and vice-versa. The Fund is expected to have an average yearly tracking error of between 3% and 8% when compared to the Index. However, as the Fund is unconstrained by the range, it could operate outside of it and the Investment Manager has discretion on how best to position the Fund in seeking to achieve its outcome. Therefore, the Fund's returns could be very similar to, or very different from the Index.

The Index comprises large and medium sized companies, as determined by their market capitalisation (total market value of a company's outstanding shares), from both 23 developed and 24 emerging markets, and the Index is designed to provide a broad measure of global equity market performance.

The Index has been selected as a benchmark for performance and risk measurement because it is representative of the type of companies in which the Fund is likely to invest, and it is therefore an appropriate comparator for the Fund's performance.

* MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used as a basis for other indices or any securities or financial products. This prospectus is not approved, endorsed, reviewed or produced by MSCI. None of the MSCI data is intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such.

FUND MANAGER'S REPORT

Over the period from 1 August 2019 to 15 December 2019, the Aviva Investors Global Equity Unconstrained Fund delivered a total return of -1.73% (share class 1), net of fees. The Fund's benchmark, the MSCI® All Countries World Index, returned -3.64% over the same period.

Market Review

The Fund launched on 1 August 2019. Global equity markets became increasingly volatile during August as the trade dispute between the US and China escalated. Concerns over the implications for global economic growth, particularly as data softened further in export sensitive economies such as Germany and China, saw markets lose ground. Nevertheless, central bank monetary policy remained supportive given the continuing benign inflationary backdrop. The US Federal Reserve (Fed) sanctioned a further interest rate cut in September, and the European Central Bank (ECB) announced several measures to stimulate economic growth including the recommencement of its quantitative easing programme. As a result, the subsequent recovery saw equities partially regain lost ground, and safe havens such as major government bond markets retreat, a combination that was particularly supportive for financial stocks, while we also saw some rotation away from defensive sectors such as consumer staples towards more cyclical stocks.

Fund Review

Over the reporting period since the Fund's launch, our holdings in the technology sector made a positive contribution towards relative performance against the benchmark index. As the market became more optimistic about prospects for a recovery in the semiconductor demand cycle, our holdings in Skyworks and Murata performed well, driven by signs of improvement in smartphone demand and the benefits of transition to 5G for radio-frequency (RF) components. Our holding in GVC, the UK-listed online gaming company, contributed positively as well, as the market increasingly recognised the value of its US sports betting business. Our holding in United Health also performed well. The US medical insurer had sold off earlier in the year on the worries about political pressure affecting the health insurance sector in the US, but strong results reported by the company offset these concerns.

On the negative side, our holding in Heineken underperformed on lacklustre results, and our position in IQVIA, a US clinical research outsourcing company, also disappointed – although results were good, they did not meet more optimistic market expectations. Both stocks were also affected by a degree of sector rotation away from defensives towards cyclicals.

AVIVA INVESTORS GLOBAL EQUITY UNCONSTRAINED FUND (CONTINUED)

FUND MANAGER'S REPORT (CONTINUED)

Outlook

We remain cautious in general on the outlook for equity markets in the short to medium term, largely due to the decelerating environment for corporate earnings in the US and Europe. We are also seeing companies reticent to embark on significant investment programs, although this may be largely down to the uncertainty regarding US and China trade, as well as Brexit. However, from a longer-term perspective, we can identify stocks with exciting prospects in terms of future earnings growth but we remain disciplined in terms of valuations we are looking to pay for these in the light of the re-rating we have seen in global equity markets year-to-date.

November 2019

Sources: Fund and peer group performance figures – Lipper, a Thomson Reuters Company, mid to mid basis with net income reinvested in GBP, with no initial charges applied. Market data – Bloomberg.

As noted above, the performance figures in this commentary have been sourced from an external party and are based on published prices. The performance figures quoted in the comparative tables on pages 293 and 294 are based on the net asset value per the published accounts and may be different due to post year end accounting adjustments.

Any opinions expressed are those of the Fund manager. They should not be viewed as a guarantee of a return from an investment in the Funds. The content of the commentary should not be viewed as a recommendation to invest nor buy or sell any securities. Past performance is not a guide to the future. The value of an investment and any income from it can go down as well as up. Investors may not get back the original amount invested.

Novartis	

There were only 8 sales during the period.

Synthetic Risk and Reward Indicator

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- The value of investments will be affected by changes in exchange rates.
- The Fund price may fall as well as rise and as a result you may not get back the original amount you invested.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at www.avivainvestors.com or from the ACD on request.

§ The Fund launched 1 August 2019.

‡ The operating charges are calculated on an ex-post basis and as such may differ from the Ongoing Charge Figure where:

(a) Changes to fee rates were made during the year and the Ongoing Charge Figure has been amended to be future proofed for this change.

(b) The Ongoing Charge has been annualised for a share class that has not yet been open for a full year.

The direct transaction costs have been stated after deducting, in the case of single-priced funds, the proportion of the amounts collected from dilution adjustments or dilution levies that relates to direct transaction costs and, in the case of dual-priced funds, the amounts collected in relation to direct transaction costs added to, or subtracted from, the valuations by virtue of COLL 6.3.6 G (4).

≈ The high and low prices disclosed are the high and low prices for the accounting period and not the calendar year and are based on published prices. The net asset value per share price is based on the net asset value in the published accounts and may be different due to post year end accounting adjustments.

Ongoing Charges Figure*

Share class	01.08.19 to 15.10.19
Class 1	0.63%
Class 2	0.48%
Class 3	0.40%
Class 4	0.48%

* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the period. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

The ACD will apply a discount to the Fund Management Fee for 18 months from the date of the Fund's launch (the "Discount Period"). When the Discount Period ends, the Fund Management Fee will revert to the full published rate without further notice to shareholders.

The Discount Period for the fund will apply from 1 August 2019 until 31 January 2021. Please see the Prospectus for full details.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

* Fund launched on 1 August 2019.

NOTES TO THE FINANCIAL STATEMENTS

1 Accounting basis and policies

Please see pages 8 to 10 for accounting basis and policies.

2 Net capital losses

	Period ended 15.10.19 [§] £000
Net capital losses on investment during the period comprise:	
Currency gains	23
Non-derivative securities losses	(209)
Net capital losses	(186)

3 Revenue

	Period ended 15.10.19 [§] £000
Overseas dividends	26
UK dividends	2
Total revenue	28

4 Expenses

	Period ended 15.10.19 [§] £000
Payable to the Authorised Corporate Director ("ACD"), associates of the ACD or agents of either of them:	
Fund Management Fee	8
Total expenses	8

The audit fee was £9,546. The audit fee forms part of the FMF.

[§] Fund launched on 1 August 2019.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

5 Taxation**a Analysis of tax charge**

	Period ended 15.10.19 [§] £000
Overseas tax suffered	3
Total current tax (see note 5b)	3

b Factors affecting current tax charge

The tax assessed for the period is lower than the standard rate of corporation tax in the UK for an Authorised Investment Fund (20%).

The differences are explained below:

	Period ended 15.10.19 [§] £000
Net revenue before taxation	20
Corporation tax at 20%	4
Effects of:	
Movement in excess management expenses	2
Overseas dividends not subject to corporation tax	(5)
Overseas tax suffered	3
UK dividends not subject to corporation tax	(1)
Current tax charge (see note 5a)	3

Authorised Investment Funds are exempt from tax on capital gains. Therefore, any capital return is not included in the above reconciliation.

c Deferred tax

At the balance sheet date, there is a potential deferred tax asset of £1,641 in respect of unutilised management expenses of £8,205. It is unlikely the Fund will generate sufficient taxable profits in the future to utilise this amount and therefore no deferred tax asset has been recognised in the period.

6 Distributions

	Period ended 15.10.19 [§] £000
The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:	
Final distribution	18
	18
Deduct: Revenue received on issue of shares	(1)
Total distributions	17

Details of the distributions per share are set out in the distribution table on page 305.

[§] Fund launched on 1 August 2019.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

7 Fair value hierarchy

	As at 15.10.19 Assets at £000
Valuation technique	
Level 1: Quoted prices	9,787
Total value	9,787

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities

The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority to unobservable inputs. Disclosure is required of the value in each category in order to give an insight into the extent to which fair value measurements are subjective.

The disclosure is split into the following categories:

Level 1: Unadjusted quoted price in an active market for an identical instrument;

Level 2: Valuation techniques using observable inputs other than quoted prices within level 1;

Level 3: Valuation techniques using unobservable inputs.

8 Debtors

	As at 15.10.19 £000
Accrued revenue	7
Overseas tax recoverable	1
Total debtors	8

9 Cash and bank balances

	As at 15.10.19 £000
Cash and bank balances	445
Total cash and bank balances	445

10 Other creditors

	As at 15.10.19 £000
Accrued expenses	1
Total other creditors	1

11 Contingent liabilities and commitments

There were no contingent liabilities or commitments at the period end.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

12 Related party transactions

Aviva Investors UK Fund Services Limited, Aviva Investors Global Services Limited and the Aviva Group are deemed to be related parties per section 33.10 of FRS 102 as they are entities with control, joint control or significant influence over the entity.

Fund Management Fee paid to Aviva Investors UK Fund Services Limited ("the ACD") are shown in note 4 and details of shares issued and cancelled by the ACD are shown in the statement of change in net assets attributable to shareholders. The balance due to the ACD at the year end in respect of Fund Management Fee was £1,103. Any balance due from the ACD in respect of issues is shown in note 8. Any balance due to the ACD in respect of cancellations is shown in note 10.

Distributions payable to the ACD and related parties of the ACD during the period amounted to £17,412. The amount outstanding at the year end was £17,412. Related parties of the ACD are deemed to be all companies under the control of Aviva Plc. This will include companies which hold shares in the Fund on behalf of other external investors.

Any investments managed and advised by Aviva Investors Global Services Limited or associated with the Aviva Group are identified on the portfolio statement.

Holdings at the year end and movements during the period are as follows:

	Holdings at 15.10.19 (shares)	Movement (shares)	Holdings at 15.10.18 (shares)
ACD and related parties (Class 3 Accumulation shares)	10,001,000	10,001,000	–

The ACD and related parties of the ACD are ineligible to vote at any general meeting.

13 Shareholder funds

The Fund currently has four share classes: Class 1 (Retail), Class 2 and Class 4 (Institutional) and Class 3 (Associated undertakings of Aviva Plc). The Fund Management Fees are as follows:

Class 1: 0.63%
 Class 2: 0.48%
 Class 3: 0.40%
 Class 4: 0.48%

The net asset value of the share class, the net asset value per share and the number of shares in the class are shown on pages 309 to 310. The distributions per share are given in the distribution table on pages 305. All the share classes have the same rights on winding up.

14 Shares in issue reconciliation

	Number of shares in issue at 15.10.18	Number of shares issued	Number of shares cancelled	Number of shares converted	Number of shares in issue at 15.10.19
Class 1 Accumulation shares	–	2,039	–	–	2,039
Class 2 Accumulation shares	–	413,587	(868)	–	412,719
Class 3 Accumulation shares	–	10,001,000	–	–	10,001,000
Class 4 Accumulation shares	–	1,000	–	–	1,000

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

15 Derivatives and other financial instruments

The policies applied in the management of financial instruments are set out on pages 9 and 10.

Fair value of financial assets and financial liabilities

There is no significant difference between the carrying values of the financial assets and liabilities and their fair values.

Currency risk

At the year end date, 88.18% of the net assets of the Fund were denominated in currencies other than sterling with the effect that the balance sheet and total return can be significantly affected by currency movements. If currency rates were to change by 10.00%, the value of the Fund would change by 8.82%.

Currency	Net foreign currency assets		
	Monetary exposure £000	Non-monetary exposure £000	Total £000
	15.10.19	15.10.19	15.10.19
Euro	1	1,625	1,626
Hong Kong dollar	–	381	381
Japanese yen	5	233	238
South Korean won	–	447	447
Swedish krona	–	212	212
Swiss franc	29	506	535
US dollar	11	5,579	5,590

Interest rate risk

The Fund does not invest in either fixed or floating rate securities and interest rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions which will be affected by fluctuations in interest rates.

At the year end date 4.35% of the net assets of the Fund were interest bearing and as such the interest rate risk is not considered significant.

The floating rate on bank balances is linked to the Depositary's base rate.

Market price risk

At the year end date, 95.59% of the net assets of the Fund were invested in ordinary shares or stock units admitted to an official stock exchange. If the market value were to change by 10%, the value of the Fund would change by 9.56%.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

16 Direct transaction costs

In the case of shares, broker commissions and transfer taxes, stamp duty is paid by the Fund on each transaction. In addition, there is a dealing spread between buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of the dealing spread.

	Principal before costs £000	Commission £000	Taxes £000	Total after costs £000	Commission as % of principal	Taxes as % of principal
15.10.19						
Purchases						
Equities	(10,337)	(2)	(4)	(10,343)	0.02%	0.04%
	(10,337)	(2)	(4)	(10,343)		
Sales						
Equities	347	–	–	347	0.00%	0.00%
	347	–	–	347		
Total		(2)	(4)			
Percentage of Fund average net assets		0.02%	0.05%			

Dealing spread

As at 15 October 2019, the average portfolio dealing spread was 0.05%. This spread represents the difference between the values determined respectively by reference to the bid and offer prices of investments expressed as a percentage of the value determined by reference to the offer price.

17 Post balance sheet events

There are no post balance sheet events which require adjustment or disclosure at the year end.

DISTRIBUTION TABLES

Final distribution payable in pence per share for the year ended 15 October 2019

Accumulation shares		Net revenue	Equalisation	Final distribution payable 15 December 2019
Class 1 Accumulation shares	Group 1	0.1309	–	0.1309
	Group 2	0.1240	0.0069	0.1309
Class 2 Accumulation shares	Group 1	0.1726	–	0.1726
	Group 2	0.0000	0.1726	0.1726
Class 3 Accumulation shares	Group 1	0.1741	–	0.1741
	Group 2	0.1741	0.0000	0.1741
Class 4 Accumulation shares	Group 1	0.1780	–	0.1780
	Group 2	0.1780	0.0000	0.1780

Final distribution

Group 1 shares are those shares purchased at or before 12:00 noon on 1 August 2019.

Group 2 shares are those shares purchased after 12:00 noon on 1 August 2019.

Equalisation

Equalisation applies only to Group 2 shares, in other words shares purchased during the period. It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

AVIVA INVESTORS GLOBAL EMERGING MARKETS EQUITY UNCONSTRAINED FUND

The Fund launched on 29 July 2019.

INVESTMENT OBJECTIVE

The Fund aims to grow your investment over the long term (5 years or more) by investing in shares of emerging market companies.

INVESTMENT POLICY

Core investment: At least 80% of the Fund will be invested in shares of emerging market (EM) companies.

Other investments: The Fund may also invest in other shares, other funds (including funds managed by Aviva Investors companies), cash, and deposits. Derivatives, such as futures, may be used from time to time, to gain market exposure which may be difficult or costly to achieve directly, or to manage the Fund's cash flows in a cost-effective manner. Derivatives may also be used to reduce risk, such as foreign currency risk within the Fund, which may be hedged using Forward Foreign Exchange contracts. This type of derivative usage is called "efficient portfolio management".

Strategy: The Fund is actively managed with an unconstrained and flexible investment style, allowing the Investment Manager the freedom to invest in selected companies of any size, and at any stage of the business cycle. This will include investing in market leading and mature companies which offer the potential for superior earnings growth and sustainable dividends respectively, as well as identifying companies which are out of favour at a particular point in time, but where there is a specific opportunity for the company's value to increase in the future.

Environmental, Social & Governance (ESG) factors: ESG factors are integrated into the investment process and are considered alongside a range of financial metrics and research, but the Investment Manager retains discretion over which investments are selected. We also actively engage with companies and use voting rights with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in the prospectus.

Performance and Risk Measurement: The Fund's performance is compared against the MSCI® Emerging Market Index* ("the Index").

The Fund's investment process is not constrained by the Index, so it will not hold every company in the Index and may also hold companies that do not form part of it.

The Fund uses a "tracking error" to measure the consistency between the Fund's returns and the returns of the Index. In general, the lower the tracking error, the more consistent the Fund's returns are relative to the Index, and vice-versa. The Fund is expected to have an average yearly tracking error of between 3% and 8% when compared to the Index. However, as the Fund is unconstrained by the range, it could operate outside of it and the Investment Manager has discretion on how best to position the Fund in seeking to achieve its outcome. Therefore, the Fund's returns could be very similar to or very different from the Index.

The Index comprises large and medium sized companies, as determined by their market capitalisation (total market value of a company's outstanding shares), from 24 emerging markets, and the Index is designed to provide a broad measure of global emerging markets equity market performance.

The Index has been selected as a benchmark for performance and risk measurement because it is representative of the type of companies in which the Fund is likely to invest, and it is therefore an appropriate comparator for the Fund's performance.

* MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used as a basis for other indices or any securities or financial products. This prospectus is not approved, endorsed, reviewed or produced by MSCI. None of the MSCI data is intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such.

FUND MANAGER'S REPORT

Over the period from 29 July 2019 to 15 December 2019, the Aviva Investors Global Emerging Markets Equity Unconstrained Fund delivered a total return of -3.91% (share class 1), net of fees. The Fund's benchmark, the MSCI® Emerging Market Index ("the Index"), returned -6.24% over the same period.

Market Review

The Fund launched on 29 July 2019. Global equity markets became increasingly volatile during August as the trade dispute between the US and China escalated. Concerns over the implications for global economic growth, particularly as data softened further in export sensitive economies such as Germany and China, saw emerging markets underperform developed markets and lose ground over the reporting period since the Fund's launch.

From a regional perspective, Latin America was weakest, while emerging Asian markets held up relatively well. In Latin America, the Argentine market halved in value during August following a shock defeat for incumbent President Macri in the primary elections, raising concerns over political instability and a return to populism in the forthcoming presidential elections in October. Subsequently, the market recovered from August's lows despite the government announcing capital controls in the foreign exchange market. In Brazil, economic data continues to show a very slow recovery, even though second quarter growth surprised to the upside. Combined with low inflation, this allowed the central bank to start the easing cycle and indicate that more interest rate cuts are on the way. In Asia, Korea and Taiwan, both technology-oriented exchanges, performed relatively well. In Korea, the market was boosted by a significant inflow of money from pension funds and local institutions. Technology stocks led the gains, as investors began to price in an upturn in semiconductor demand. This benefited the Taiwanese market, which has a substantial weighting in technology stocks, notably in suppliers to Apple. In EMEA, Turkey gained ground as the central bank cut interest rates by 3.25% in September, which was well above economists' expectations. In contrast, the Russian market lost ground as the oil price drifted lower.

Fund Review

Since launch, the Fund has outperformed its benchmark index in market conditions where we have seen much bigger disparities at the country level than at the sector level. The Fund benefited from no exposure to the weak Saudi Arabian, Thai and Argentinian markets, while in Turkey our truck exporter Ford Otosan proved resilient to the fragile market thanks to its foreign currency revenue base. Stock selection in Brazil also made a positive contribution to relative performance, as all six of our holdings – Bradesco, Petrobras, Petrobras Distribuidora, education provider YDUQS and consumer stocks M Dias Branco and CBD – all outperformed the local benchmark.

AVIVA INVESTORS GLOBAL EMERGING MARKETS EQUITY UNCONSTRAINED FUND (CONTINUED)

FUND MANAGER'S REPORT (CONTINUED)

Fund Review (continued)

In addition, the Fund does not own Chinese internet heavyweight Tencent, which continues to see weak earnings momentum within a flaccid domestic advertising environment. We see better investment opportunities in technology stocks which are not as well researched by the broader investment community. Our holdings in Korean mid-caps Wonik IPS, a provider of semiconductor production equipment, and software and cloud services specialist Douzone Bizon performed well.

Amongst financials, Indonesian micro-lender Bank Tabungan Pensiunan Nasional rose sharply on the back of excellent results and new sell-side broker coverage; this high growth niche financial services provider is still largely unknown by international investors.

Changes to the portfolio have been relatively restrained. We recently switched from Bradesco to Banco do Brasil within the Brazilian banking sector, seeing more internal improvement and valuation appeal at the latter. A new position was taken in Russian gas giant Gazprom where we detect signs of change in the company's capex and dividend priorities. Our technology weighting was increased through the purchase of Yageo. This Taiwanese capacitor maker has seen a volatile couple of years, but with the capacitor competitive landscape becoming more segmented and the prospect of structural demand growth from 5G there is the potential for more sustained cashflow growth going forward.

Outlook

The downside risks to global economic growth from a trade dispute escalation between the US and China have risen and are, in our view, not fully appreciated by markets. China's efforts to stabilise growth remain critical for both for the global economy, and for commodity markets. Beijing's credit tightening of 2018 has been reversed, while income tax cuts are supporting retail sales. However, although the purchasing managers' indices rebounded in Q1, data softened in Q2 and surveys have showed signs of further weakness in recent months. With the US/China trade conflict persisting and broadening to other countries, confidence has again been rattled, while Chinese economic growth for the second quarter was well below expectations. As a result, we are cautious on the near-term outlook for emerging markets.

November 2019

Sources: Fund and peer group performance figures – Lipper, a Thomson Reuters Company, mid to mid basis with net income reinvested in GBP, with no initial charges applied. Market data – Bloomberg.

As noted above, the performance figures in this commentary have been sourced from an external party and are based on published prices. The performance figures quoted in the comparative tables on pages 309 and 310 are based on the net asset value per the published accounts and may be different due to post year end accounting adjustments.

Any opinions expressed are those of the Fund manager. They should not be viewed as a guarantee of a return from an investment in the Funds. The content of the commentary should not be viewed as a recommendation to invest nor buy or sell any securities. Past performance is not a guide to the future. The value of an investment and any income from it can go down as well as up. Investors may not get back the original amount invested.

Synthetic Risk and Reward Indicator

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- The value of investments will be affected by changes in exchange rates.
- The Fund price may fall as well as rise and as a result you may not get back the original amount you invested.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at www.avivainvestors.com or from the ACD on request.

§ The Fund launched on 29 July 2019.

‡ The operating charges are calculated on an ex-post basis and as such may differ from the Ongoing Charge Figure where:

(a) Changes to fee rates were made during the year and the Ongoing Charge Figure has been amended to be future proofed for this change.

(b) The Ongoing Charge has been annualised for a share class that has not yet been open for a full year.

The direct transaction costs have been stated after deducting, in the case of single-priced funds, the proportion of the amounts collected from dilution adjustments or dilution levies that relates to direct transaction costs and, in the case of dual-priced funds, the amounts collected in relation to direct transaction costs added to, or subtracted from, the valuations by virtue of COLL 6.3.6 G (4).

≈ The high and low prices disclosed are the high and low prices for the accounting period and not the calendar year and are based on published prices. The net asset value per share price is based on the net asset value in the published accounts and may be different due to post year end accounting adjustments.

Ongoing Charges Figure*

Share class	29.07.19 to 15.10.19
Class 1	0.63%
Class 2	0.48%
Class 3	0.40%
Class 4	0.48%

* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the period. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

The ACD will apply a discount to the Fund Management Fee for 18 months from the date of the Fund's launch (the "Discount Period"). When the Discount Period ends, the Fund Management Fee will revert to the full published rate without further notice to shareholders.

The Discount Period for the fund will apply from 29 July 2019 until 28 January 2021. Please see the Prospectus for full details.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

NOTES TO THE FINANCIAL STATEMENTS

1 Accounting basis and policies

Please see pages 8 to 10 for accounting basis and policies.

2 Net capital losses

	Period ended 15.10.19 [§] £000
Net capital losses on investment during the period comprise:	
Currency losses	(27)
Derivative contracts losses	(47)
Non-derivative securities losses	(479)
Net capital losses	(553)

3 Revenue

	Period ended 15.10.19 [§] £000
Bank and deposit interest	1
Overseas dividends	72
Total revenue	73

4 Expenses

	Period ended 15.10.19 [§] £000
Payable to the Authorised Corporate Director ("ACD"), associates of the ACD or agents of either of them:	
Fund Management Fee	11
Total expenses	11

The audit fee was £9,546. The audit fee forms part of the FMF.

[§] Fund launched on 29 July 2019.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

5 Taxation**a Analysis of tax charge**

	Period ended 15.10.19 [§] £000
Overseas tax suffered	2
Total current tax (see note 5b)	2

b Factors affecting current tax charge

The tax assessed for the period is lower than the standard rate of corporation tax in the UK for an Authorised Investment Fund (20%).

The differences are explained below:

	Period ended 15.10.19 [§] £000
Net revenue before taxation	62
Corporation tax at 20%	12
Effects of:	
Movement in excess management expenses	1
Overseas dividends not subject to corporation tax	(13)
Overseas tax suffered	2
Current tax charge (see note 5a)	2

Authorised Investment Funds are exempt from tax on capital gains. Therefore, any capital return is not included in the above reconciliation.

c Deferred tax

At the balance sheet date, there is a potential deferred tax asset of £1,025 in respect of unutilised management expenses of £5,124. It is unlikely the Fund will generate sufficient taxable profits in the future to utilise this amount and therefore no deferred tax asset has been recognised in the period.

6 Distributions

	Period ended 15.10.19 [§] £000
The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:	
Final distribution	62
	62
Deduct: Revenue received on issue of shares	(2)
Total distributions	60

Details of the distributions per share are set out in the distribution table on page 321.

[§] Fund launched on 29 July 2019.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

7 Fair value hierarchy

	As at 15.10.19 Assets at £000
Valuation technique	
Level 1: Quoted prices	11,792
Total value	11,792

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities

The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority to unobservable inputs. Disclosure is required of the value in each category in order to give an insight into the extent to which fair value measurements are subjective.

The disclosure is split into the following categories:

Level 1: Unadjusted quoted price in an active market for an identical instrument;

Level 2: Valuation techniques using observable inputs other than quoted prices within level 1;

Level 3: Valuation techniques using unobservable inputs.

8 Debtors

	As at 15.10.19 £000
Accrued revenue	15
Amounts receivable on issue of shares	47
Overseas tax recoverable	3
Sales awaiting settlement	346
Total debtors	411

9 Cash and bank balances

	As at 15.10.19 £000
Cash and bank balances	524
Total cash and bank balances	524

10 Other creditors

	As at 15.10.19 £000
Accrued expenses	1
Purchases awaiting settlement	372
Total other creditors	373

11 Contingent liabilities and commitments

There were no contingent liabilities or commitments at the period end.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

12 Related party transactions

Aviva Investors UK Fund Services Limited, Aviva Investors Global Services Limited and the Aviva Group are deemed to be related parties per section 33.10 of FRS 102 as they are entities with control, joint control or significant influence over the entity.

Fund Management Fee paid to Aviva Investors UK Fund Services Limited ("the ACD") are shown in note 4 and details of shares issued and cancelled by the ACD are shown in the statement of change in net assets attributable to shareholders. The balance due to the ACD at the year end in respect of Fund Management Fee was £698. Any balance due from the ACD in respect of issues is shown in note 8. Any balance due to the ACD in respect of cancellations is shown in note 10.

Distributions payable to the ACD and related parties of the ACD during the period amounted to £48,259. The amount outstanding at the year end was £48,259. Related parties of the ACD are deemed to be all companies under the control of Aviva Plc. This will include companies which hold shares in the Fund on behalf of other external investors.

Any investments managed and advised by Aviva Investors Global Services Limited or associated with the Aviva Group are identified on the portfolio statement.

Holdings at the year end and movements during the period are as follows:

	Holdings at 15.10.19 (shares)	Movement (shares)	Holdings at 15.10.18 (shares)
ACD and related parties (Class 2 Accumulation shares)	13,651	13,651	–
ACD and related parties (Class 3 Accumulation shares)	10,001,000	10,001,000	–

The ACD and related parties of the ACD are ineligible to vote at any general meeting.

13 Shareholder funds

The Fund currently has four share classes: Class 1 (Retail), Class 2 and Class 4 (Institutional) and Class 3 (Associated undertakings of Aviva Plc). The Fund Management Fees are as follows:

Class 1: 0.63%
 Class 2: 0.48%
 Class 3: 0.40%
 Class 4: 0.48%

The net asset value of the share class, the net asset value per share and the number of shares in the class are shown on pages 309 to 310. The distributions per share are given in the distribution table on pages 321. All the share classes have the same rights on winding up.

14 Shares in issue reconciliation

	Number of shares in issue at 28.07.19	Number of shares issued	Number of shares cancelled	Number of shares converted	Number of shares in issue at 15.10.19
Class 1 Accumulation shares	–	2,052	–	–	2,052
Class 2 Accumulation shares	–	14,651	–	–	14,651
Class 3 Accumulation shares	–	10,001,000	–	–	10,001,000
Class 4 Accumulation shares	–	2,947,333	(101,488)	–	2,845,845

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

15 Derivatives and other financial instruments

The policies applied in the management of financial instruments are set out on pages 9 and 10.

Fair value of financial assets and financial liabilities

There is no significant difference between the carrying values of the financial assets and liabilities and their fair values.

Currency risk

At the year end date, 93.99% of the net assets of the Fund were denominated in currencies other than sterling with the effect that the balance sheet and total return can be significantly affected by currency movements. If currency rates were to change by 10.00%, the value of the Fund would change by 9.40%.

Currency	Net foreign currency assets		
	Monetary exposure £000	Non-monetary exposure £000	Total £000
	15.10.19	15.10.19	15.10.19
Brazilian real	–	372	372
Chinese yuan	3	–	3
Hong Kong dollar	21	2,231	2,252
Hungarian forint	–	186	186
Indonesian rupiah	–	462	462
Malaysian ringgit	–	382	382
Polish zloty	3	197	200
Russian ruble	3	–	3
South African rand	6	431	437
South Korean won	2	1,834	1,836
Taiwan dollar	3	975	978
Thailand baht	–	233	233
Turkish lira	–	152	152
US dollar	9	4,106	4,115

Interest rate risk

The Fund does not invest in either fixed or floating rate securities and interest rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions which will be affected by fluctuations in interest rates.

At the year end date 4.24% of the net assets of the Fund were interest bearing and as such the interest rate risk is not considered significant.

The floating rate on bank balances is linked to the Depositary's base rate.

Market price risk

At the year end date, 95.45% of the net assets of the Fund were invested in ordinary shares or stock units admitted to an official stock exchange. If the market value were to change by 10%, the value of the Fund would change by 9.55%.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

16 Direct transaction costs

In the case of shares, broker commissions and transfer taxes, stamp duty is paid by the Fund on each transaction. In addition, there is a dealing spread between buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of the dealing spread.

	Principal before costs £000	Commission £000	Taxes £000	Total after costs £000	Commission as % of principal	Taxes as % of principal
15.10.19						
Purchases

	(13,475)	(6)	(5)	(13,486)		
Sales						
Equities	280	–	–	280	0.00%	0.00%
Funds	935	–	–	935	0.00%	0.00%
	1,215	–	–	1,215		
Total		(6)	(5)			
Percentage of Fund average net assets		0.05%	0.04%			

Dealing spread

As at 15 October 2019, the average portfolio dealing spread was 0.17%. This spread represents the difference between the values determined respectively by reference to the bid and offer prices of investments expressed as a percentage of the value determined by reference to the offer price.

17 Post balance sheet events

There are no post balance sheet events which require adjustment or disclosure at the year end.

DISTRIBUTION TABLES

Final distribution payable in pence per share for the year ended 15 October 2019

Accumulation shares		Net revenue	Equalisation	Final distribution payable 15 December 2019
Class 1 Accumulation shares	Group 1	0.4473	–	0.4473
	Group 2	0.4284	0.0189	0.4473
Class 2 Accumulation shares	Group 1	0.4734	–	0.4734
	Group 2	0.0692	0.4042	0.4734
Class 3 Accumulation shares	Group 1	0.4819	–	0.4819
	Group 2	0.4819	0.0000	0.4819
Class 4 Accumulation shares	Group 1	0.4677	–	0.4677
	Group 2	0.4167	0.0510	0.4677

Final distribution

Group 1 shares are those shares purchased at 12:00 noon on 29 July 2019.

Group 2 shares are those shares purchased after 12:00 noon on 29 July 2019.

Equalisation

Equalisation applies only to Group 2 shares, in other words shares purchased during the period. It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

AVIVA INVESTORS MANAGED HIGH INCOME FUND

INVESTMENT OBJECTIVE

The Fund will invest in bonds issued by companies and aims to provide an income of at least 110% of the income return of the benchmark, and an overall net return greater than the benchmark over the long term (5 years or more).

The benchmark (the "Index") is a composite index, as detailed below.

INVESTMENT POLICY

Core investment: At least 80% of the Fund will be invested in bonds (including those issued by governments and supranational organisations) issued in Sterling or hedged to Sterling, including exposure to emerging markets. A maximum of 70% of the Fund may be invested in sub-investment grade bonds, which have been independently rated as sub-investment grade with a credit rating below BBB-/Baa3.

Sub-investment grade bonds are typically regarded as being of lower quality than "investment grade" bonds, but typically offer a higher yield.

Other investments: The Fund may also invest in other bonds, shares of companies, other funds (including funds managed by Aviva Investors companies), cash and deposits.

Derivatives, such as futures, may be used from time to time, to gain a particular market exposure which would otherwise be difficult or costly to achieve, or to manage the Fund's cash flows in a cost-effective manner. Derivatives may also be used to reduce risk, such as foreign currency risk within the Fund, which is hedged using Forward Foreign Exchange contracts. This type of derivative usage is called "efficient portfolio management".

Strategy: The Fund is actively managed with a flexible investment allocation approach across global bond markets. The Investment Manager will make high conviction (strong belief) investments at both a company and sector level, basing their investment selection process on a long-term outlook, whilst looking to deliver optimum risk adjusted-returns. The Investment Manager will focus on identifying what they judge to be higher quality investment grade or sub-investment grade bonds through assessment of the business strengths and risks associated with the underlying companies, the valuation of the bonds relative to the market, the views of independent risk rating agencies, and any other relevant factors, whilst also taking advantage of short-term opportunities when they arise.

Environmental, Social and Governance (ESG) factors:

ESG factors are integrated into the investment process and are considered alongside a range of financial metrics and research, but the Investment Manager retains discretion over which investments are selected. We also actively engage with companies with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in the prospectus.

Performance & Risk Measurement: The Fund's performance is measured against the Index, a composite benchmark of 40% Markit iBoxx® Sterling Non-Gilts Index, 50% Bloomberg Barclays® Global High Yield Index ex CMBS ex EMG 2% Issuer Capped (Sterling Hedged) and 10% JPM® Emerging Markets Bond Index (Sterling Hedged) after charges and taxes, whilst the income target is measured before charges and taxes.

The Fund does not base its investment process upon the Index, which is only a representation of the investment universe, therefore the Fund will hold bonds that are not part of the Index, and will only hold a relatively small proportion of bonds relative to the number in the Index.

The Index represents the performance of a broad range of global bonds (approximately 3,600).

The Index has been selected as a benchmark for performance measurement because it is representative of the type of bonds in which the Fund is likely to invest, and it is therefore an appropriate measure for the Fund's performance.

FUND MANAGER'S REPORT

Performance

Over the twelve months ended 15 October 2019, the Aviva Managed High Income Fund posted a total return of 7.61% (share class 1) net of fees. The Fund's composite benchmark*, 40% Markit iBoxx Sterling Non-Gilts Index, 50% Bloomberg Barclays Global High Yield Index ex CMBS ex EMG 2% issuer capped and 10% JPM Emerging Markets Bond Index, returned 7.33%.

Review

The Fund posted an attractive total return in what was a positive twelve months for fixed income markets. In the latter stages of 2018, when the corporate bond market was under significant pressure because of worries about possible interest rate hikes in an environment of slowing global growth, we held a cautious stance in terms of the Fund's duration (sensitivity to changes in interest rates). We gradually unwound this position when bond prices recovered in early 2019 and added credit risk to the portfolio, thereby taking advantage of cheaper valuations for many bonds. From spring into the period end, both credit risk and duration were held close to the benchmark. In sector terms, exposure to banks (Citigroup, HSBC), telecommunications (Verizon, AT&T) and subordinated insurance debt (AXA, Aviva) added value, while Tesco contributed well after a strong operating recovery saw its credit rating restored to investment-grade. Overall, exposure to longer-dated bonds profited from the change in interest rate guidance to looser policy. On the negative side, exposure to tobacco company Imperial Brands detracted as vaping attracted negative publicity, while weaker commodity prices and a weak second quarter earnings report led to weakness from Antero Resources.

AVIVA INVESTORS MANAGED HIGH INCOME FUND (CONTINUED)

FUND MANAGER'S REPORT (CONTINUED)

Outlook

With the outlook for the global economy clouded by trade and political uncertainties, we expect fixed income markets to be supported by further stimulus. In 2020 we foresee at least one more interest rate cut by the US Federal Reserve and a further expansion of monetary support by the European Central Bank. This could be complemented by governments stepping up fiscal policy, with increased public spending and tax cuts to stimulate growth. We are nevertheless concerned about corporate bond market fundamentals, and in particular the high levels of debt carried by some issuers going into an environment of slowing growth. Uncertainty over trade is negative for some areas of the credit market and we are therefore avoiding cyclical companies and instead focusing on stable businesses in the higher-quality areas. While we believe that credit spreads will widen next year as the contraction in the global economy becomes more obvious, in the shorter term we expect further positive performance, not least because investor flows into the asset class have picked up significantly from twelve months ago. The market is also underpinned by the restarting of the European Central Bank's quantitative easing (QE) programme, which is scheduled for November. High-yield bonds are likely to be supported by investors' ongoing hunt for income in a low-yield environment. However, total returns on a twelve-month view are likely to be modest given the potential for rising defaults as global growth slows.

November 2019

* The benchmark was changed on 7 August 2019.

Sources: Fund and peer group performance figures – Lipper, a Thomson Reuters Company, mid to mid basis with net income reinvested in GBP, with no initial charges applied. Market data – Bloomberg.

As noted above, the performance figures in this commentary have been sourced from an external party and are based on published prices. The performance figures quoted in the comparative tables on page 324 are based on the net asset value per the published accounts and may be different due to post year end accounting adjustments.

Any opinions expressed are those of the Fund manager. They should not be viewed as a guarantee of a return from an investment in the Funds. The content of the commentary should not be viewed as a recommendation to invest nor buy or sell any securities. Past performance is not a guide to the future. The value of an investment and any income from it can go down as well as up. Investors may not get back the original amount invested.

Synthetic Risk and Reward Indicator

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- Bond values are affected by changes in interest rates, and the bond issuer's creditworthiness. Bonds that produce a higher level of income usually have a greater risk of default.
- The value of investments will be affected by changes in exchange rates.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at www.avivainvestors.com or from the ACD on request.

[‡] The operating charges are calculated on an ex-post basis and as such may differ from the Ongoing Charge Figure where:

(a) Changes to fee rates were made during the year and the Ongoing Charge Figure has been amended to be future proofed for this change.

(b) The Ongoing Charge has been annualised for a share class that has not yet been open for a full year.

[#] The direct transaction costs have been stated after deducting, in the case of single-priced funds, the proportion of the amounts collected from dilution adjustments or dilution levies that relates to direct transaction costs and, in the case of dual-priced funds, the amounts collected in relation to direct transaction costs added to, or subtracted from, the valuations by virtue of COLL 6.3.6 G (4).

[≈] The high and low prices disclosed are the high and low prices for the accounting period and not the calendar year and are based on published prices. The net asset value per share price is based on the net asset value in the published accounts and may be different due to post year end accounting adjustments.

Ongoing Charges Figure*

Share class	15.10.19	15.10.18
Class 1	0.87%	0.87%
Class 2	0.62%	0.62%
Class 3	0.32%	0.32%

* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the year. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

NOTES TO THE FINANCIAL STATEMENTS

1 Accounting basis and policies

Please see pages 8 to 10 for accounting basis and policies.

2 Net capital gains/(losses)

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Net capital gains/(losses) on investment during the year comprise:		
Compensation items	1	–
Currency losses	(2,272)	(28)
Derivative contracts (losses)/gains	(16)	28
Expenses relating to the purchase and sale of investments	–	(5)
Forward currency contracts losses	(611)	(827)
Non-derivative securities gains/(losses)	6,941	(8,022)
Net capital gains/(losses)	4,043	(8,854)

3 Revenue

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Bank and deposit interest	16	–
Interest on debt securities	6,320	7,112
Income from derivatives	–	(23)
Revenue from offshore funds	716	706
Total revenue	7,052	7,795

4 Expenses

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Payable to the Authorised Corporate Director ("ACD"), associates of the ACD or agents of either of them:		
Fund Management Fee/ACD periodic charges*	677	819
Registration fees	–	36
	677	855
Payable to the Depositary, associates of the Depositary or agents of either of them:		
Depositary's fee	–	13
Interest payable	6	3
Safe custody fee	–	8
	6	24
Other expenses:		
Audit fee**	–	7
Statement fees	–	3
	–	10
Total expenses	683	889

* From 4 June 2018 the Fund changed to a single fixed charge known as the Fund Management Fee (FMF). The FMF covers fees and expenses in relation to the operation and administration of the Company and the Fund.

** The audit fee was £9,790 (2018: £9,413) net of VAT. With effect from 4 June 2018, the audit fee was no longer accrued for separately and now forms part of the FMF.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

5 Taxation**a Analysis of tax charge**

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Corporation tax	–	–
Total current tax (see note 5b)	–	–

b Factors affecting current tax charge

The tax assessed for the year is lower (2018: lower) than the standard rate of corporation tax in the UK for an Authorised Investment Fund (20%) (2018: 20%).

The differences are explained below:

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Net revenue before taxation	6,369	6,906
Corporation tax at 20%	1,274	1,381
Effects of:		
Tax deductible on interest distributions	(1,274)	(1,381)
Current tax charge (see note 5a)	–	–

Authorised Investment Funds are exempt from tax on capital gains. Therefore, any capital return is not included in the above reconciliation.

c Deferred tax

There was no provision for deferred tax at the year end (2018: £nil).

6 Distributions

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:		
Gross interest distribution for the six months ended 15 April	3,082	3,185
Gross interest distribution for the five months ended 15 September	2,602	3,104
Gross interest distribution for the month ended 15 October	669	594
	6,353	6,883
Add: Revenue deducted on cancellation of shares	32	38
Deduct: Revenue received on issue of shares	(16)	(15)
Total distributions	6,369	6,906

Details of the distributions per share are set out in the distribution tables on pages 338 to 341.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

7 Fair value hierarchy

Valuation technique	As at 15.10.19		As at 15.10.18	
	Assets at £000	Liabilities at £000	Assets at £000	Liabilities at £000
Level 1: Quoted prices	48	(18)	107	(44)
Level 2: Observable market data	124,486	(131)	131,560	(164)
Level 3: Unobservable data	591	–	–	–
Total value	125,125	(149)	131,667	(208)

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities.

The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority is given to unobservable inputs. Disclosure is required of the value in each category in order to give an insight into the extent to which fair value measurements are subjective.

The disclosure is split into the following categories:

Level 1: Unadjusted quoted price in an active market for an identical instrument;

Level 2: Valuation techniques using observable inputs other than quoted prices within level 1;

Level 3: Valuation techniques using unobservable inputs.

8 Debtors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued revenue	1,661	2,143
Amounts receivable on issue of shares	–	34
Sales awaiting settlement	206	89
Total debtors	1,867	2,266

9 Cash and bank balances

	As at 15.10.19 £000	As at 15.10.18 £000
Amounts held at futures clearing house and brokers	26	109
Cash and bank balances	9,537	2,660
Total cash and bank balances	9,563	2,769

10 Other creditors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued expenses	26	80
Amounts payable for cancellation of shares	171	234
Purchases awaiting settlement	1,339	68
Total other creditors	1,536	382

11 Contingent liabilities and commitments

There were no contingent liabilities or commitments at the year end (2018: £nil).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

12 Related party transactions

Aviva Investors UK Fund Services Limited, Aviva Investors Global Services Limited and the Aviva Group are deemed to be related parties per section 33.10 of FRS 102 as they are entities with control, joint control or significant influence over the entity.

Fund Management Fee/ACD periodic charges paid to Aviva Investors UK Fund Services Limited ("the ACD") are shown in note 4 and details of shares issued and cancelled by the ACD are shown in the statement of change in net assets attributable to shareholders. The balance due to the ACD at the year end in respect of Fund Management Fee/ACD periodic charges was £25,521 (2018: £79,542). Any balance due from the ACD in respect of issues is shown in note 8. Any balance due to the ACD in respect of cancellations is shown in note 10.

Distributions payable to the ACD and related parties of the ACD during the year amounted to £4,207,864 (2018: £4,618,616). The amount outstanding at the year end was £681,477 (2018: £682,558). Related parties of the ACD are deemed to be all companies under the control of Aviva Plc. This will include companies which hold shares in the Fund on behalf of other external investors.

Any investments managed and advised by Aviva Investors Global Services Limited or associated with the Aviva Group are identified on the portfolio statement. The total sales on these investments during the year amounted to £1,093,917 (2018: £nil). The income received during the year amounted to £822,063 (2018: £816,367).

Holdings at the year end and movements during the year are as follows:

	Holdings at 15.10.19 (shares)	Movement (shares)	Holdings at 15.10.18 (shares)
ACD and related parties (Class 2 Income shares)	2,366,611	(113,443)	2,480,054
ACD and related parties (Class 3 Income shares)	80,257,018	(3,282,652)	83,539,670

The ACD and related parties of the ACD are ineligible to vote at any general meeting.

13 Shareholder funds

The Fund currently has three share classes: Class 1 (Retail), Class 2 (Institutional) and Class 3 (Associated undertakings of Aviva Plc). The Fund Management Fees are as follows:

Class 1: 0.87%

Class 2: 0.62%

Class 3: 0.32%

The net asset value of the share class, the net asset value per share and the number of shares in the class are shown on page 324. The distributions per share are given in the distribution tables on pages 338 to 341. All the share classes have the same rights on winding up.

14 Shares in issue reconciliation

	Number of shares in issue at 15.10.18	Number of shares issued	Number of shares cancelled	Number of shares converted	Number of shares in issue at 15.10.19
Class 1 Income shares	78,708,566	1,071,676	(5,011,924)	(60,558)	74,707,760
Class 2 Income shares	14,938,263	3,105,965	(3,047,698)	40,429	15,036,959
Class 3 Income shares	83,539,670	5,357,975	(8,640,627)	–	80,257,018

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

15 Derivatives and other financial instruments

The policies applied in the management of financial instruments are set out on pages 9 and 10.

Fair value of financial assets and financial liabilities

There is no significant difference between the carrying values of the financial assets and liabilities and their fair values (2018: £nil).

Currency risk

At the year end date, (0.48)% (2018: (0.04)%) of the net assets of the Fund were denominated in currencies other than sterling and such the currency risk is not considered significant.

Interest rate risk

The interest rate profile of the Fund's financial assets and liabilities at 15 October 2019 was:

Currency 15.10.19	Floating Rate £000	Fixed Rate £000	None £000	Total £000
Financial Assets				
Euro	1,583	9,750	13,295	24,628
Sterling	6,897	50,348	81,430	138,675
US dollar	2,980	46,683	3,463	53,126
Financial Liabilities				
Euro	–	–	(24,653)	(24,653)
Sterling	–	–	(4,294)	(4,294)
US dollar	–	–	(53,742)	(53,742)
Total	11,460	106,781	15,499	133,740

The interest rate profile of the Fund's financial assets and liabilities at 15 October 2018 was:

Currency 15.10.18	Floating Rate £000	Fixed Rate £000	None £000	Total £000
Financial Assets				
Euro	595	7,188	13,307	21,090
Sterling	3,360	56,219	76,945	136,524
US dollar	1,006	50,935	837	52,778
Financial Liabilities				
Euro	–	–	(21,281)	(21,281)
Sterling	–	–	(1,497)	(1,497)
US dollar	–	–	(52,641)	(52,641)
Total	4,961	114,342	15,670	134,973

The floating rate on bank balances is linked to the Depositary's base rate.

The floating rate on deposits is linked to LIBOR or its overseas equivalent.

The floating rate financial assets comprise investments in variable interest rate paying corporate debt and bank balances that bear interest on LIBOR or its equivalent.

Interest rate exposures

The Aviva Investors Investment Risk Team performs regular stress testing across all portfolios to determine market sensitivities and risk exposures using BlackRock's Aladdin risk model and stress testing methodology. Under this methodology, if 5Y GBP interest rates had increased by 1% as at the balance sheet date, the net asset value of the Fund would have decreased by £7,923,655 (2018: £7,377,759). If interest rates had decreased by 1% as at the balance sheet date, the net asset value of the Fund would have increased by £7,923,655 (2018: £7,377,759). These calculations assume the interest rate shock is propagated to all risk factors the Fund is exposed to, based on historical market correlations and volatilities between factors.

Market price risk

At the year end date, 93.45% (2018: 97.40%) of the net assets of the Fund were invested in stock units or debt securities admitted to an official stock exchange. If the market value were to change by 10%, the value of the Fund would change by 9.35% (2018: 9.74%).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

16 Counterparty exposure**Financial derivative exposure**

The types of derivatives held at the year end date were forward currency contracts, futures contracts and credit default swaps. Details of individual contracts are disclosed in the Portfolio Statement and the total position by counterparty at the year end date was as follows:

	Forward currency contracts £000	Futures contracts £000	Total £000
15.10.19			
Goldman Sachs	915	–	915
J.P. Morgan	7	48	55
Merrill Lynch	2	–	2
Royal Bank of Canada	2,371	–	2,371
Société Générale	20	–	20
UBS	(3)	–	(3)
Total	3,312	48	3,360

	Forward currency contracts £000	Futures contracts £000	Total £000
15.10.18			
BNP Paribas	1	–	1
Goldman Sachs	602	–	602
JPMorgan	–	33	33
Merrill Lynch	(19)	–	(19)
Royal Bank of Scotland	1,456	–	1,456
Standard Chartered	(8)	–	(8)
Total	2,032	33	2,065

The counterparty exposure on forward currency contracts is reported at their mark to market values but for futures contracts and credit default swaps it is only the positive mark to market values that are reported.

Collateral

At the year end date no collateral was held or pledged by the Fund or on behalf of the counterparties in respect of the above (2018: £nil).

17 Debt security credit analysis

	Market value £000		Total net assets %	
	15.10.19	15.10.18	15.10.19	15.10.18
Investment grade securities	39,760	45,723	29.76%	33.90%
Below investment grade securities	66,187	67,056	49.45%	49.67%
Unrated securities	2,731	3,754	2.05%	2.77%
Total debt securities	108,678	116,533	81.26%	86.34%

Credit rating designations BBB or above are considered investment grade whereas credit rating designations BB or lower are considered below investment grade.

18 Direct transaction costs

Due to the nature of the investments held, no transaction costs or taxes were incurred on the Fund's purchases or sales during the current year ended 15 October 2019 (2018: £nil). The total purchases for the year amounted to £52,295,361 (2018: £54,681,518) and the total sales amounted to £66,884,403 (2018: £70,455,891).

Dealing spread

As at 15 October 2019, the average portfolio dealing spread was 0.61% (2018: 0.76%). This spread represents the difference between the values determined retrospectively by reference to the bid and offer prices of investments expressed as a percentage of the value determined by reference to the offer price.

19 Post balance sheet events

There are no post balance sheet events which require adjustment or disclosure at the year end (2018: £nil).

Group 2 shares are those shares purchased after 12:00 noon on 15 October 2018.

Equalisation

Equalisation applies only to Group 2 shares, in other words shares purchased during the relevant period. It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

AVIVA INVESTORS MONTHLY INCOME PLUS FUND

INVESTMENT OBJECTIVE

The Fund will invest in bonds issued by companies and aims to provide an income equivalent to the benchmark, and an overall net return greater than the benchmark over the long term (5 years or more).

The benchmark (the "Index") is the Markit iBoxx® Sterling Non-Gilts Total Return Index.

INVESTMENT POLICY

Core investment: At least 80% of the Fund will be invested in bonds which have been independently rated as "investment grade" with a credit rating of BBB-/Baa3 or above, issued by companies and supranational organisations in Sterling or hedged to Sterling.

Other investments: The Fund may also invest in other bonds, including those issued by governments, shares of companies, other funds (including funds managed by Aviva Investors companies), cash and deposits.

Derivatives, such as futures, may be used from time to time, to gain a particular market exposure which would otherwise be difficult or costly to achieve, or to manage the Fund's cash flows in a cost-effective manner. Derivatives may also be used to reduce risk, such as foreign currency risk within the Fund, which is hedged using Forward Foreign Exchange contracts. This type of derivative usage is called "efficient portfolio management".

Strategy: The Fund is actively managed, and the Investment Manager will make high conviction (strong belief) investments at both a company and sector level, basing their investment selection process on a long-term outlook, whilst looking to deliver optimum risk adjusted-returns. The Investment Manager will focus on identifying what they judge to be higher quality corporate bonds through assessment of the business strengths and risks associated with the underlying companies, the valuation of the bonds relative to the market, the views of independent risk rating agencies, and any other relevant factors, whilst also taking advantage of short-term opportunities when they arise.

Environmental, Social and Governance (ESG) factors: ESG factors are integrated into the investment process and are considered alongside a range of financial metrics and research, but the Investment Manager retains discretion over which investments are selected. We also actively engage with companies with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in the prospectus.

Performance & Risk Measurement: The Fund's performance is measured against the Index, after charges and taxes, whilst the income target is measured before charges and taxes.

The Fund does not base its investment process upon the Index, which is only a representation of the investment universe, therefore the Fund will hold bonds that are not part of the Index, and will only hold a relatively small proportion of bonds relative to the number in the Index.

The Index represents the performance of a broad range of investment grade bonds issued by companies and denominated in Sterling, with a date to maturity date exceeding 1 year, but excludes government bonds.

The Index has been selected as a benchmark for performance measurement because it is representative of the type of bonds in which the Fund is likely to invest, and it is therefore an appropriate measure for the Fund's performance.

FUND MANAGER'S REPORT

Performance

Over the twelve months ended 15 October 2019, the Aviva Investors Monthly Income Plus Fund delivered a total return of 9.05% (share class 1) net of fees. The Fund's benchmark, the Markit iBoxx Sterling Non-Gilts Total Return Index, returned 8.95%.

Review

The Fund posted an attractive total return in what was a positive twelve months for fixed income markets. In the latter stages of 2018, when the corporate bond market was under significant pressure because of worries about possible interest rate hikes in an environment of slowing global growth, we held a cautious stance in terms of the Fund's duration (sensitivity to changes in interest rates). We gradually unwound this position when bond prices recovered in early 2019 and added credit risk to the portfolio, thereby taking advantage of cheaper valuations for many bonds. From spring into the period end, both credit risk and duration were held close to the benchmark. Fund returns were boosted by holdings of corporate hybrids (a mixture of debt and equity), with long-dated issues from Telefonica, Enel and Orange performing strongly over the year. Exposure to gilts was also helpful given the market's strong rally on hopes for looser monetary policy globally. In sector terms, exposure to UK banks (Barclays, HSBC) and subordinated insurance debt (AXA, Aviva) added value, while Tesco contributed well after a strong operating recovery saw its credit rating restored to investment-grade.

A notable detractor was roadside recovery group AA, which only belatedly regained momentum after announcing weak profits in 2018. Uncertainty about the prospects for UK retailers also led to disappointing returns by the shopping centre operator Intu Metrocentre.

AVIVA INVESTORS MONTHLY INCOME PLUS FUND (CONTINUED)

FUND MANAGER'S REPORT (CONTINUED)

Outlook

We are concerned about corporate bond market fundamentals, and in particular the high levels of debt carried by some issuers going into an environment of slowing growth. Uncertainty over trade is negative for some areas of the credit market and we are therefore avoiding cyclical companies and instead focusing on stable businesses in the higher-quality areas. While we believe that credit spreads will widen next year as the contraction of the global economy becomes more obvious, in the shorter term we expect further positive performance, not least because investor flows into the asset class have picked up significantly from twelve months ago. The market is also underpinned by the restarting of the European Central Bank's quantitative easing (QE) programme, which is scheduled for November. Although the composition of the asset repurchasing has not yet been announced, the fact that the ECB is already close to its limits in terms of sovereign bond buying means that corporate bonds are likely to be included. During the last round of QE, this proved to be highly supportive of the credit markets, including sterling.

Synthetic Risk and Reward Indicator

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- Bond values are affected by changes in interest rates, and the bond issuer's creditworthiness. Bonds that produce a higher level of income usually have a greater risk of default.
- The value of investments will be affected by changes in exchange rates.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at www.avivainvestors.com or from the ACD on request.

Highest share price	189.95	174.36	174.13
Lowest share price	169.00	169.55	161.24

[‡] The operating charges are calculated on an ex-post basis and as such may differ from the Ongoing Charge Figure where:

(a) Changes to fee rates were made during the year and the Ongoing Charge Figure has been amended to be future proofed for this change.

(b) The Ongoing Charge has been annualised for a share class that has not yet been open for a full year.

[#] The direct transaction costs have been stated after deducting, in the case of single-priced funds, the proportion of the amounts collected from dilution adjustments or dilution levies that relates to direct transaction costs and, in the case of dual-priced funds, the amounts collected in relation to direct transaction costs added to, or subtracted from, the valuations by virtue of COLL 6.3.6 G (4).

[≈] The high and low prices disclosed are the high and low prices for the accounting period and not the calendar year and are based on published prices. The net asset value per share price is based on the net asset value in the published accounts and may be different due to post year end accounting adjustments.

Ongoing Charges Figure*

Share class	15.10.19	15.10.18
Class 1	0.88%	0.88%
Class 2	0.63%	0.63%
Class 3	0.33%	0.33%

* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the year. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

NOTES TO THE FINANCIAL STATEMENT

1 Accounting basis and policies

Please see pages 8 to 10 for accounting basis and policies.

2 Net capital gains/(losses)

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Net capital gains/(losses) on investment during the year comprise:		
Currency losses	(286)	(343)
Derivative contracts gains/(losses)	876	(18)
Expenses relating to the purchase and sale of investments	–	(3)
Forward currency contracts gains/(losses)	161	(7)
Non-derivative securities gains/(losses)	13,827	(8,552)
Net capital gains/(losses)	14,578	(8,923)

3 Revenue

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Bank and deposit interest	25	10
Interest on debt securities	9,698	10,229
Income from derivatives	32	90
Total revenue	9,755	10,329

4 Expenses

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Payable to the Authorised Corporate Director ("ACD"), associates of the ACD or agents of either of them:		
Fund Management Fee/ACD's periodic charge*	2,054	2,284
Registration fees	–	162
	2,054	2,446
Payable to the Depositary, associates of the Depositary or agents of either of them:		
Depositary's fee	–	23
Interest payable	9	9
Safe custody fee	–	16
	9	48
Other expenses:		
Audit fee**	–	8
Statement fees	–	6
	–	14
Total expenses	2,063	2,508

* From 4 June 2018 the Fund changed to a single fixed charge known as the Fund Management Fee (FMF). The FMF covers fees and expenses in relation to the operation and administration of the Company and the Fund.

** The audit fee was £10,347 (2018: £9,949) net of VAT. With effect from 4 June 2018, the audit fee was no longer accrued for separately and now forms part of the FMF.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

5 Taxation**a Analysis of tax charge**

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Corporation tax	–	–
Total current tax (see note 5b)	–	–

b Factors affecting current tax charge

The tax assessed for the year is lower (2018: lower) than the standard rate of corporation tax in the UK for an Authorised Investment Fund (20%) (2018: 20%).

The differences are explained below:

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Net revenue before taxation	7,692	7,821
Corporation tax at 20%	1,538	1,564
Effects of:		
Tax deductible on interest distributions	(1,538)	(1,564)
Current tax charge (see note 5a)	–	–

Authorised Investment Funds are exempt from tax on capital gains. Therefore, any capital return is not included in the above reconciliation.

c Deferred tax

There was no provision for deferred tax at the year end (2018: £nil).

6 Distributions

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:		
Gross interest distribution for the six months ended 15 April	3,637	3,445
Gross interest distribution for the five months ended 15 September	3,108	3,404
Gross interest distribution for the month ended 15 October	911	938
	7,656	7,787
Add: Revenue deducted on cancellation of shares	56	68
Deduct: Revenue received on issue of shares	(20)	(34)
Total distributions	7,692	7,821

Details of the distributions per share are set out in the distribution tables on pages 357 to 362.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

7 Fair value hierarchy

Valuation technique	As at 15.10.19		As at 15.10.18	
	Assets at £000	Liabilities at £000	Assets at £000	Liabilities at £000
Level 1: Quoted prices	43	–	145	(101)
Level 2: Observable market data	252,093	(29)	237,153	(284)
Total value	252,136	(29)	237,298	(385)

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities.

The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority to unobservable inputs. Disclosure is required of the value in each category in order to give an insight into the extent to which fair value measurements are subjective.

The disclosure is split into the following categories:

Level 1: Unadjusted quoted price in an active market for an identical instrument;

Level 2: Valuation techniques using observable inputs other than quoted prices within level 1;

Level 3: Valuation techniques using unobservable inputs.

8 Debtors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued revenue	3,564	3,921
Amounts receivable on issue of shares	63	22
Overseas tax recoverable	–	3
Sales awaiting settlement	1,068	2,330
Total debtors	4,695	6,276

9 Cash and bank balances

	As at 15.10.19 £000	As at 15.10.18 £000
Amounts held at futures clearing house and brokers	–	389
Cash and bank balances	8,828	10,085
Total cash and bank balances	8,828	10,474

10 Other creditors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued expenses	82	244
Amounts payable for cancellation of shares	584	415
Purchases awaiting settlement	5,922	–
Total other creditors	6,588	659

11 Contingent liabilities and commitments

There were no contingent liabilities or commitments at the year end (2018: £nil).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

12 Related party transactions

Aviva Investors UK Fund Services Limited, Aviva Investors Global Services Limited and the Aviva Group are deemed to be related parties per section 33.10 of FRS 102 as they are entities with control, joint control or significant influence over the entity.

Fund Management Fee/ACD periodic charges paid to Aviva Investors UK Fund Services Limited ("the ACD") are shown in note 4 and details of shares issued and cancelled by the ACD are shown in the statement of change in net assets attributable to shareholders. The balance due to the ACD at the year end in respect of Fund Management Fee/ACD periodic charges was £81,551 (2018: £243,920). Any balance due from the ACD in respect of issues is shown in note 8. Any balance due to the ACD in respect of cancellations is shown in note 10.

Distributions payable to the ACD and related parties of the ACD during the year amounted to £575,461 (2018: £561,447). The amount outstanding at the year end was £96,718 (2018: £92,923). Related parties of the ACD are deemed to be all companies under the control of Aviva Plc. This will include companies which hold shares in the Fund on behalf of other external investors.

Any investments managed and advised by Aviva Investors Global Services Limited or associated with the Aviva Group are identified on the portfolio statement.

The total purchases and sales on these investments during the year amounted to £1,237,005 (2018: £nil) and £nil (2018: £nil) respectively. The income received during the year amounted to £249,049 (2018: £214,276).

Holdings at the year end and movements during the year are as follows:

	Holdings at 15.10.19 (shares)	Movement (shares)	Holdings at 15.10.18 (shares)
ACD and related parties (Class 1 Income shares)	311,071	311,071	–
ACD and related parties (Class 2 Income shares)	537,214	(80,858)	618,072
ACD and related parties (Class 1 Accumulation shares)	19,896	3,615	16,281
ACD and related parties (Class 2 Accumulation shares)	1,018,113	(175,606)	1,193,719
ACD and related parties (Class 3 Accumulation shares)	8,121,552	(147,582)	8,269,134

The ACD and related parties of the ACD are ineligible to vote at any general meeting.

13 Shareholder funds

The Fund currently has three share classes: Class 1 (Retail), Class 2 (Institutional) and Class 3 (Associated undertakings of Aviva Plc). The Fund Management Fees are as follows:

Class 1: 0.88%
Class 2: 0.63%
Class 3: 0.33%

The net asset value of the share class, the net asset value per share and the number of shares in the class are shown on pages 344 and 345. The distributions per share are given in the distribution tables on pages 357 to 362. All the share classes have the same rights on winding up.

14 Shares in issue reconciliation

	Number of shares in issue at 15.10.18	Number of shares issued	Number of shares cancelled	Number of shares converted	Number of shares in issue at 15.10.19
Class 1 Income shares	211,169,853	467,917	(14,988,150)	(355,373)	196,294,247
Class 2 Income shares	21,826,048	7,555,944	(1,837,774)	164,523	27,708,741
Class 1 Accumulation shares	56,897,862	27,089	(4,412,658)	(99,601)	52,412,692
Class 2 Accumulation shares	15,141,230	994,525	(3,621,585)	113,810	12,627,980
Class 3 Accumulation shares	8,269,134	856,551	(1,004,133)	–	8,121,552

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

15 Derivatives and other financial instruments

The policies applied in the management of financial instruments are set out on pages 9 and 10.

Fair value of financial assets and financial liabilities

There is no significant difference between the carrying values of the financial assets and liabilities and their fair values (2018: £nil).

Currency risk

At the year end date, 0.01% (2018: (0.05)%) of the net assets of the Fund were denominated in currencies other than sterling and as such the currency risk is not considered significant.

Interest rate risk

The interest rate profile of the Fund's financial assets and liabilities at 15 October 2019 was:

Currency 15.10.19	Floating Rate £000	Fixed Rate £000	None £000	Total £000
Financial Assets				
Euro	2,920	7,236	931	11,087
Sterling	11,442	234,630	15,545	261,617
US dollar	1,282	2,955	31	4,268
Financial Liabilities				
Euro	(24)	–	(11,114)	(11,138)
Sterling	20	–	(3,347)	(3,327)
US dollar	–	–	(4,198)	(4,198)
Total	15,640	244,821	(2,152)	258,309

The interest rate profile of the Fund's financial assets and liabilities at 15 October 2018 was:

Currency 15.10.18	Floating Rate £000	Fixed Rate £000	None £000	Total £000
Financial Assets				
Euro	2,660	3,887	117	6,664
Sterling	10,874	221,272	21,734	253,880
US Dollar	5,324	3,104	155	8,583
Financial Liabilities				
Euro	–	–	(6,685)	(6,685)
Sterling	–	–	(1,554)	(1,554)
US Dollar	–	–	(8,679)	(8,679)
Total	18,858	228,263	5,088	252,209

The floating rate on bank balances is linked to the Depositary's base rate.

The floating rate financial assets comprise investments in variable interest rate paying corporate debt and bank balances that bear interest on LIBOR or its equivalent.

Interest rate exposures

The Aviva Investors Investment Risk Team performs regular stress testing across all portfolios to determine market sensitivities and risk exposures using BlackRock's Aladdin risk model and stress testing methodology. Under this methodology, if 5Y GBP interest rates had increased by 1% as at the balance sheet date, the net asset value of the Fund would have decreased by £19,801,765 (2018: £17,352,485). If interest rates had decreased by 1% as at the balance sheet date, the net asset value of the Fund would have increased by £19,801,765 (2018: £17,352,485). These calculations assume the interest rate shock is propagated to all risk factors the Fund is exposed to, based on historical market correlations and volatilities between factors.

Market price risk

At the year end date, 97.60% (2018: 93.94%) of the net assets of the Fund were invested in ordinary shares or stock units or debt securities admitted to an official stock exchange. If the market value were to change by 10%, the value of the Fund would change by 9.76% (2018: 9.39%).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

16 Counterparty exposure**Financial derivative exposure**

The types of derivatives held at the year end date were forward currency contracts, futures contracts and credit default swaps. Details of individual contracts are disclosed in the Portfolio Statement and the total position by counterparty at the year end date was as follows:

	Forward currency contracts £000	Futures contracts £000	Total £000
15.10.19			
Goldman Sachs	238	–	238
J.P. Morgan	–	43	43
Royal Bank of Canada	189	–	189
Total	427	43	470

	Forward currency contracts £000	Futures contracts £000	Total £000
15.10.18			
Goldman Sachs	198	–	198
JPMorgan	–	145	145
Royal Bank of Scotland	303	–	303
UBS	(32)	–	(32)
Total	469	145	614

The counterparty exposure on forward currency contracts is reported at their mark to market values but for futures contracts and credit default swaps it is only the positive mark to market values that are reported.

Collateral

At the year end date no collateral was held or pledged by the Fund or on behalf of the counterparties in respect of the above (2018: £nil).

17 Debt security credit analysis

	Market value £000		Total net assets %	
	15.10.19	15.10.18	15.10.19	15.10.18
Investment grade securities	219,568	197,853	85.01%	78.45%
Below investment grade securities	30,164	36,874	11.67%	14.62%
Unrated securities	1,905	1,920	0.74%	0.76%
Total debt securities	251,637	236,647	97.42%	93.83%

Credit rating designations BBB or above are considered investment grade whereas credit rating designations BB or lower are considered below investment grade.

18 Direct transaction costs

Due to the nature of the investments held, no transaction costs or taxes were incurred on the Fund's purchases or sales during the current year ended 15 October 2019 (2018: £nil). The total purchases for the year amounted to £131,530,368 (2018: £134,263,561) and the total sales amounted to £128,809,462 (2018: £159,193,416).

Dealing spread

As at 15 October 2019, the average portfolio dealing spread was 0.79% (2018: 0.68%). This spread represents the difference between the values determined retrospectively by reference to the bid and offer prices of investments expressed as a percentage of the value determined by reference to the offer price.

19 Post balance sheet events

There are no post balance sheet events which require adjustment or disclosure at the year end (2018: £nil).

DISTRIBUTION TABLES

Final distribution payable in pence per share for the month ended 15 October 2019

	Group 2	0.4198	0.1004	0.5202	0.5648

Interim distribution

Group 1 shares are those shares purchased at or before 12:00 noon on 15 October 2018.

Group 2 shares are those shares purchased after 12:00 noon on 15 October 2018.

Equalisation

Equalisation applies only to Group 2 shares, in other words shares purchased during the relevant period. It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

AVIVA INVESTORS STRATEGIC BOND FUND

INVESTMENT OBJECTIVE

The Fund will aim to grow your investment through a combination of income and capital returns by investing in bonds issued by companies, governments or supranational organisations, whilst aiming to provide a net return greater than the benchmark over the long term (5 years or more).

The benchmark (the "Index") is a Bloomberg® Barclays® Composite Index, as detailed below.

INVESTMENT POLICY

Core investment: At least 80% of the Fund will be invested in bonds, issued in Sterling or hedged to Sterling, and no more than 50% of the Fund will be invested in bonds which have been independently rated as sub-investment grade with a credit rating below BBB-/Baa3.

Sub-investment grade bonds are typically regarded as being of lower quality and therefore higher risk than "investment grade" bonds, but typically offer a higher yield.

Other investments: The Fund may also invest in shares of companies, other funds (including funds managed by Aviva Investors companies), cash and deposits. Derivatives may be used for investment purposes or to gain a particular market exposure which would otherwise be difficult or costly to achieve, or to manage the Fund's cash flows in a cost-effective manner. Derivatives may also be used to reduce risk, such as foreign currency risk within the Fund.

Strategy: The Fund is actively managed, with a flexible asset allocation approach across global bond markets. The Investment Manager will seek to blend the key asset classes including government, investment grade and sub-investment grade bonds to effectively manage the overall risk and reward profile of the Fund.

The Fund's allocation to these asset classes will vary over time, reflecting the Investment Manager's view of both the changing longer-term market outlook and shorter-term opportunities. The Investment Manager will focus on identifying what they judge to be higher quality investment grade or sub-investment grade bonds through assessment of the business strengths and risks associated with the underlying companies, the valuation of the bonds relative to the market, the views of independent risk rating agencies, and any other relevant factors, whilst also taking advantage of short-term opportunities when they arise.

Environmental, Social and Governance (ESG) factors: ESG factors are integrated into the investment process and are considered alongside a range of financial metrics and research, but the Investment Manager retains discretion over which investments are selected. We also actively engage with companies with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in the prospectus.

Performance & Risk Measurement: The Fund's performance is measured against the Index a composite benchmark of one third Bloomberg® Barclays® Treasury G7 Index (Sterling Hedged), one third Bloomberg® Barclays® Global Aggregate Corporate Index (Sterling Hedged), and one third Bloomberg® Barclays® Global High Yield Index ex CMBS ex EMG 2% Issuer Capped (Sterling Hedged), after charges and taxes.

The Fund does not base its investment process upon the Index, which is only a representation of the investment universe, therefore the Fund will hold bonds that are not part of the Index, and will only hold a relatively small proportion of bonds relative to the number in the Index.

The Index represents the performance of a broad range of global bonds.

The Index has been selected as a benchmark for performance measurement because it is representative of the type of bonds in which the Fund is likely to invest, and it is therefore an appropriate measure for the Fund's performance.

FUND MANAGER'S REPORT

Performance

Over the twelve months ended 15 October 2019, the Aviva Investors Strategic Bond Fund delivered a total return of 4.38%, (share class 1) net of fees. The Fund's composite benchmark*, one third Bloomberg Barclays Treasury G7 Index, one third Bloomberg Barclays Global Aggregate Corporate Index and one third Bloomberg Barclays Global High Yield Index ex CMBS ex EMG 2% issuer capped, returned 8.01%.

Review

The Fund posted a steady total return in what was a positive twelve months for fixed income markets. However, the Fund underperformed its benchmark, mostly as a consequence of its 'short duration' stance. Duration is a measure of a bond portfolio's sensitivity to changes in interest rates and during the period we felt it prudent to position the Fund cautiously given the uncertain economic and monetary policy environment as well as the relatively stretched nature of bond valuations. In the event, the surprise move by the US Federal Reserve to change its guidance and move to looser monetary policy triggered a sharp rally by longer duration assets. This being said, the returns generated from the Fund's relatively low risk profile were encouraging. In terms of security selection, strategy within the high-yield portion of the Fund was a little disappointing. The main detractors were heat exchanger maker Galapagos and plastic films manufacturer Kloeckner Pentaplast. We had purchased Galapagos in the expectation that it would benefit from higher oil prices. However, while oil prices did indeed rise in the first half of the period, its bonds suffered as the company's restructuring programme failed to be completed as quickly as hoped. Against our expectations, Kloeckner has been unable to pass on higher input costs to its customers. The investment-grade portion of the Fund nevertheless added value, largely through its exposure to insurance (Aviva, AXA, Prudential) and banks (Barclays, HSBC).

AVIVA INVESTORS STRATEGIC BOND FUND (CONTINUED)

FUND MANAGER'S REPORT (CONTINUED)

Outlook

With the outlook for the global economy clouded by trade and political uncertainties, we expect fixed income markets to be supported by further stimulus. In 2020 we foresee at least one more interest rate cut by the US Federal Reserve and a further expansion of monetary support by the European Central Bank. This could be complemented by governments stepping up fiscal policy, with increased public spending and tax cuts to stimulate growth. We are nevertheless concerned about corporate bond market fundamentals, and in particular the high levels of debt carried by some issuers going into an environment of slowing growth. Uncertainty over trade is negative for some areas of the credit market and we are therefore avoiding cyclical companies and instead focusing on stable businesses in the higher-quality areas. While we believe that credit spreads will widen next year as the contraction in the global economy becomes more obvious, in the shorter term we expect further positive performance, not least because investor flows into the asset class have picked up significantly from twelve months ago. The market is also underpinned by the restarting of the European Central Bank's quantitative easing (QE) programme, which is scheduled for November. High-yield bonds are likely to be supported by investors' ongoing hunt for income in a low-yield environment. However, total returns on a twelve-month view are likely to be modest given the potential for rising defaults as global growth slows.

November 2019

* The benchmark was changed on 7 August 2019.

Synthetic Risk and Reward Indicator

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- Bond values are affected by changes in interest rates, and the bond issuer's creditworthiness. Bonds that produce a higher level of income usually have a greater risk of default.
- The value of investments will be affected by changes in exchange rates.
- Where a third party appointed to manage transactions or ensure the safe keeping of assets fails in their duty a loss may occur.
- Financial derivatives may only require a low initial deposit relative to the asset exposure, a relatively small price movement in the underlying asset may result in substantial losses to the Fund.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at www.avivainvestors.com or from the ACD on request.

§ Class 5 was launched on 28 October 2016.

‡ The operating charges are calculated on an ex-post basis and as such may differ from the Ongoing Charge Figure where:

(a) Changes to fee rates were made during the year and the Ongoing Charge Figure has been amended to be future proofed for this change.

(b) The Ongoing Charge has been annualised for a share class that has not yet been open for a full year.

The direct transaction costs have been stated after deducting, in the case of single-priced funds, the proportion of the amounts collected from dilution adjustments or dilution levies that relates to direct transaction costs and, in the case of dual-priced funds, the amounts collected in relation to direct transaction costs added to, or subtracted from, the valuations by virtue of COLL 6.3.6 G (4).

≈ The high and low prices disclosed are the high and low prices for the accounting period and not the calendar year and are based on published prices. The net asset value per share price is based on the net asset value in the published accounts and may be different due to post year end accounting adjustments.

Ongoing Charges Figure*

Share class	15.10.19	15.10.18
Class 1	0.88%	0.88%
Class 2	0.63%	0.63%
Class 3	0.33%	0.33%
Class 5	0.58%	0.58%

* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the year. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

NOTES TO THE FINANCIAL STATEMENTS

1 Accounting basis and policies

Please see pages 8 to 10 for accounting basis and policies.

2 Net capital gains/(losses)

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Net capital gains/(losses) on investment during the year comprise:		
Currency (losses)/gains	(4,483)	15
Derivative contracts (losses)/gains	(9,947)	1,456
Expenses relating to the purchase and sale of investments	–	(5)
Forward currency contracts losses	(496)	(3,348)
Non-derivative securities gains/(losses)	18,521	(25,735)
Net capital gains/(losses)	3,595	(27,617)

3 Revenue

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Bank and deposit interest	92	–
Interest on debt securities	17,540	23,465
Income from derivatives	(99)	(514)
Total revenue	17,533	22,951

4 Expenses

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Payable to the Authorised Corporate Director ("ACD"), associates of the ACD or agents of either of them:		
Fund Management Fee/ACD's periodic charge*	2,037	2,539
Registration fees	–	256
	2,037	2,795
Payable to the Depositary, associates of the Depositary or agents of either of them:		
Depositary's fee	–	40
Interest payable	33	23
Safe custody fee	–	31
	33	94
Other expenses:		
Audit fee**	–	7
Printing and postage expenses	–	1
Statement fees	–	8
	–	16
Total expenses	2,070	2,905

* From 4 June 2018 the Fund changed to a single fixed charge known as the Fund Management Fee (FMF). The FMF covers fees and expenses in relation to the operation and administration of the Company and the Fund.

** The audit fee was £9,455 (2018: £9,091) net of VAT. With effect from 4 June 2018, the audit fee was no longer accrued for separately and now forms part of the FMF.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

5 Taxation

a Analysis of tax charge

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Corporation tax	–	–
Total current tax (see note 5b)	–	–

b Factors affecting current tax charge

The tax assessed for the year is lower (2018: lower) than the standard rate of corporation tax in the UK for an Authorised Investment Fund (20%) (2018: 20%).

The differences are explained below:

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Net revenue before taxation	15,463	20,046
Corporation tax at 20%	3,093	4,009
Effects of:		
Tax deductible on interest distributions	(3,093)	(4,009)
Current tax charge (see note 5a)	–	–

Authorised Investment Funds are exempt from tax on capital gains. Therefore, any capital return is not included in the above reconciliation.

c Deferred tax

There was no provision for deferred tax at the year end (2018: £nil).

6 Distributions

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:		
Gross interest distribution for the three months ended 15 January	4,519	5,402
Gross interest distribution for the three months ended 15 April	4,011	4,517
Gross interest distribution for the three months ended 15 July	3,817	4,725
Gross interest distribution for the three months ended 15 October	2,702	4,814
	15,049	19,458
Add: Revenue deducted on cancellation of shares	499	819
Deduct: Revenue received on issue of shares	(85)	(231)
Total distributions	15,463	20,046
Reconciliations of distributions for the year to net revenue after taxation		
Distributions for the year	15,463	20,046
Net revenue after taxation	15,463	20,046

Details of the distributions per share are set out in the distribution tables on pages 379 and 380.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

7 Fair value hierarchy

Valuation technique	As at 15.10.19		As at 15.10.18	
	Assets at £000	Liabilities at £000	Assets at £000	Liabilities at £000
Level 1: Quoted prices	1,648	–	1,045	–
Level 2: Observable market data	367,840	(282)	415,255	(673)
Level 3: Unobservable data	429	–	–	–
Total value	369,917	(282)	416,300	(673)

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities

The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority to unobservable inputs. Disclosure is required of the value in each category in order to give an insight into the extent to which fair value measurements are subjective.

The disclosure is split into the following categories:

Level 1: Unadjusted quoted price in an active market for an identical instrument;

Level 2: Valuation techniques using observable inputs other than quoted prices within level 1;

Level 3: Valuation techniques using unobservable inputs.

8 Debtors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued revenue	4,995	6,728
Amounts receivable on issue of shares	22	362
Overseas tax recoverable	–	95
Prepaid expenses	54	–
Sales awaiting settlement	2,427	3,616
Total debtors	7,498	10,801

9 Cash and bank balances

	As at 15.10.19 £000	As at 15.10.18 £000
Amounts held at futures clearing house and brokers	–	11
Cash and bank balances	9,010	26,422
Total cash and bank balances	9,010	26,433

10 Other creditors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued expenses	–	265
Amounts payable for cancellation of shares	2,662	542
Purchases awaiting settlement	8,621	1,489
Total other creditors	11,283	2,296

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

11 Contingent liabilities and commitments

There were no contingent liabilities or commitments at the year end (2018: £nil).

12 Related party transactions

Aviva Investors UK Fund Services Limited, Aviva Investors Global Services Limited and the Aviva Group are deemed to be related parties per section 33.10 of FRS 102 as they are entities with control, joint control or significant influence over the entity.

Fund Management Fee/ACD periodic charges paid to Aviva Investors UK Fund Services Limited ("the ACD") are shown in note 4 and details of shares issued and cancelled by the ACD are shown in the statement of change in net assets attributable to shareholders. The balance due from the ACD at the year end in respect of Fund Management Fee/ACD periodic charges was £54,230 (2018: Due to the ACD £265,009). Any balance due from the ACD in respect of issues is shown in note 8. Any balance due to the ACD in respect of cancellations is shown in note 10.

Distributions payable to the ACD and related parties of the ACD during the year amounted to £6,826,466 (2018: £7,562,087). The amount outstanding at the year end was £1,276,878 (2018: £2,115,799). Related parties of the ACD are deemed to be all companies under the control of Aviva Plc. This will include companies which hold shares in the Fund on behalf of other external investors.

Any investments managed and advised by Aviva Investors Global Services Limited or associated with the Aviva Group are identified on the portfolio statement.

The total purchases and sales on these investments during the year amounted to £168,700,000 (2018: £249,400,000) and £164,900,000 (2018: £264,200,000) respectively. The income received during the year amounted to £352,063 (2018: £344,225).

Holdings at the year end and movements during the year are as follows:

	Holdings at 15.10.19 (shares)	Movement (shares)	Holdings at 15.10.18 (shares)
ACD and related parties (Class 1 Income shares)	3,093,435	(7,253,565)	10,347,000
ACD and related parties (Class 3 Accumulation shares)	74,082,601	(10,763,474)	84,846,075

The ACD and related parties of the ACD are ineligible to vote at any general meeting.

13 Shareholder funds

The Fund currently has four share classes: Class 1 (Retail), Class 2 and Class 5 (Institutional) and Class 3 (Associated undertakings of Aviva Plc). The Fund Management Fees are as follows:

Class 1: 0.88%
 Class 2: 0.63%
 Class 3: 0.33%
 Class 5: 0.58%

The net asset value of the share class, the net asset value per share and the number of shares in the class are shown on pages 366 and 367. The distributions per share are given in the distribution tables on pages 379 and 380. All the share classes have the same rights on winding up.

14 Shares in issue reconciliation

	Number of shares in issue at 15.10.18	Number of shares issued	Number of shares cancelled	Number of shares converted	Number of shares in issue at 15.10.19
Class 1 Income shares	1,008,569	129,840	(196,752)	13,500	955,157

Class 5 Income shares	104,629,856	4,320,309	(16,906,454)	1,542,559	93,586,270
Class 3 Accumulation shares	84,846,075	778,771	(11,542,245)	–	74,082,601

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

15 Derivatives and other financial instruments

The policies applied in the management of financial instruments are set out on pages 9 and 10.

Value at risk

The Fund enters into derivative transactions in the form of forward currency contracts, futures and credit default swaps for the purpose of efficient portfolio management. The commitment approach has been used to calculate the global exposure.

The Investment Adviser assesses the market risk of the Fund's investments, including derivative exposure, using historical simulation methodology. This process provides an estimate of the maximum potential loss that could be expected to occur as a result of changes in market prices over a given period of time in all but a given percentage of circumstances. The VaR is calculated on a 99% confidence level with a 20 day horizon & 250 days of history.

The VaR calculated for the year ended 15 October 2019 was as follows:

	15.10.19 %	15.10.18 %
As at 15 October, the company's value at risk is		
During the financial year, the highest utilisation of value at risk was	1.90	1.63
During the financial year, the average utilisation of value at risk was	1.49	1.44
During the financial year, the lowest utilisation of value at risk was	1.21	1.21

Leverage

Average leverage is calculated as the sum of the net asset value and the incremental exposure generated through the use of derivatives (calculated in accordance with the commitment approach (CESR/10-788)) divided by the net asset value.

At the year end date the average leverage was 67% (2018: 50%).

Market price risk

At the year end date, 99.01% (2018: 92.82%) of the net assets of the Fund were invested in ordinary shares or stock units or debt securities admitted to an official stock exchange. If the market value were to change by 10%, the value of the Fund would change by 9.90% (2018: 9.28%).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

16 Counterparty exposure**Financial derivative exposure**

The types of derivatives held at the year end date were forward currency contracts, futures contracts and credit default swaps. Details of individual contracts are disclosed in the Portfolio Statement and the total position by counterparty at the year end date was as follows:

	Forward currency contracts £000	Futures contracts £000	Total £000
15.10.19			
Citibank	(33)	–	(33)
Goldman Sachs	2,567	–	2,567
HSBC	(107)	–	(107)
J.P. Morgan	24	1,648	1,672
Merrill Lynch	2	–	2
Morgan Stanley	(122)	–	(122)
Royal Bank of Canada	4,221	–	4,221
Royal Bank of Scotland	(7)	–	(7)
Total	6,545	1,648	8,193

	Forward currency contracts £000	Futures contracts £000	Total £000
15.10.18			
Citibank	(77)	–	(77)
Goldman Sachs	1,581	–	1,581
JPMorgan	–	1,045	1,045
Royal Bank of Scotland	2,987	–	2,987
UBS	(53)	–	(53)
Total	4,438	1,045	5,483

The counterparty exposure on forward currency contracts is reported at their mark to market values but for futures contracts and credit default swaps it is only the positive mark to market value that are reported.

Collateral

At the year end date no collateral was held or pledged by the Fund or on behalf of the counterparties in respect of the above (2018: £nil).

17 Debt security credit analysis

	Market value £000		Total net assets %	
	15.10.19	15.10.18	15.10.19	15.10.18
Investment grade securities	246,688	243,144	66.08%	54.30%
Below investment grade securities	107,278	163,600	28.74%	36.54%
Unrated securities	1,276	1,543	0.34%	0.34%
Total debt securities	355,242	408,287	95.16%	91.18%

Credit rating designations BBB or above are considered investment grade whereas credit rating designations BB or lower are considered below investment grade.

18 Direct transaction costs

Due to the nature of the investments held, no transaction costs or taxes were incurred on the Fund's purchases or sales during the current year ended 15 October 2019 (2018: £nil). The total purchases for the year amounted to £376,774,778 (2018: £480,809,468) and the total sales amounted to £443,702,432 (2018: £611,454,766).

Dealing spread

As at 15 October 2019, the average portfolio dealing spread was 0.75% (2018: 0.74%). This spread represents the difference between the values determined retrospectively by reference to the bid and offer prices of investments expressed as a percentage of the value determined by reference to the offer price.

19 Post balance sheet events

There are no post balance sheet events which require adjustment or disclosure at the year end (2018: £nil).

DISTRIBUTION TABLES

Final distribution payable in pence per share for the three months ended 15 October 2019

Income shares		Gross revenue	Equalisation	Final distribution payable 15 December 2019	Final distribution paid 15 December 2018
Class 1 Income shares	Group 1	0.4378	–	0.4378	0.6789
	Group 2	0.2988	0.1390	0.4378	0.6789

	Group 2	0.6308	0.4173	1.0481	0.9346
Class 5 Income shares	Group 1	0.9688	–	0.9688	0.8660
	Group 2	0.5257	0.4431	0.9688	0.8660

Accumulation shares		Gross revenue	Equalisation	Interim distribution paid 15 March 2019	Interim distribution paid 15 March 2018
Class 3 Accumulation shares	Group 1	2.2876	–	2.2876	1.9922
	Group 2	0.8708	1.4168	2.2876	1.9922

Interim distribution

Group 1 shares are those shares purchased at or before 12:00 noon on 15 October 2018.

Group 2 shares are those shares purchased after 12:00 noon on 15 October 2018.

Equalisation

Equalisation applies only to Group 2 shares, in other words shares purchased during the relevant period. It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

AVIVA INVESTORS SUSTAINABLE INCOME & GROWTH FUND

The Fund launched on 10 July 2019.

INVESTMENT OBJECTIVE

The Fund aims to provide a yearly income yield of 5% with the potential for capital growth over the long-term (5 years or more). It will invest in a broad range of global asset classes focussed on long-term sustainability. The income aim is measured before the deduction of Fund taxes.

INVESTMENT POLICY

Core investment: The Fund will invest in shares of both developed and emerging market companies, listed infrastructure companies, listed real estate companies, and developed and emerging market bonds issued by companies, governments, or large institutional organisations. The Fund will hold less than 60% of its assets in interest bearing securities such as bonds.

Other investments: The Fund may also invest in cash, deposits and other funds, (including funds managed by Aviva Investors companies). Derivatives, such as futures, may be used from time to time, to gain market exposure which may be difficult or costly to achieve directly, or to manage the Fund's cash flows in a cost-effective manner. Derivatives may also be used to reduce risk, such as foreign currency risk within the Fund, which may be hedged using Forward Foreign Exchange contracts. This type of derivative usage is called "efficient portfolio management".

Strategy: The Fund is actively managed to blend traditional income producing assets, such as corporate and government bonds, with companies that have prospects for dividend growth, such as shares and listed real asset companies including Real Estate Investment Trusts (REITs). The Fund will seek to diversify risk and is not constrained by geography, asset class or sector.

Environmental, Social & Governance (ESG): The Investment Manager selects investments for the Fund based on its opinion of their income and sustainability characteristics in line with the Fund's objectives. At least 90% of the Fund's investments (other than bonds issued by governments) will be assessed according to our proprietary ESG model, which will assist the Investment Manager in making investment decisions alongside the Investment Manager's assessment of ESG factors. The Fund will need to meet an overall threshold by reference to the ESG model. Integration of these ESG factors in the investment process aims to identify market leading and mature companies which are considered to offer superior earnings growth and sustainable dividends, whilst also demonstrating a sustainable business approach. Investment decisions are supported by active engagement with these companies and use of voting rights, with the intention of positively influencing company behaviour to contribute to competitive returns. The constituents of the Composite Index will be subject to assessment using MSCI® ESG Ratings, and companies in the bottom 20% of the Composite Index by MSCI® ESG Rating will be excluded from eligibility for investment by the Fund. There are further specific eligibility exclusions related to coal, tobacco and controversial weapons. Further information regarding the Fund's ESG eligibility exclusions, how we integrate ESG into our investment approach, our proprietary ESG model, and how we engage with companies is available on our website and in the prospectus.

Performance and Risk Measurement: The Fund's performance will be judged on whether it has met its income and capital growth aims. To provide market context when evaluating the returns of the Fund, performance is also compared against a composite index comprised of 60% MSCI®* All Country World Index (Net) GBP and 40% Bloomberg Barclays®** Global-Aggregate Total Return Index Unhedged GBP ("the Composite Index").

The Fund does not base its investment process on the Composite Index, so will not hold every asset in the Composite Index (in particular it cannot hold companies ranked in the bottom 20% of the Composite Index by MSCI ESG Rating as set out above) and may also hold companies that do not form part of it. The Fund's returns could therefore be very different from those of the Composite Index.

The Fund uses a "tracking error" to measure the consistency between the Fund's returns and the returns of the Composite Index. In general, the lower the tracking error, the more consistent the Fund's returns are relative to the Composite Index, and vice-versa. The Fund is expected to have an average yearly tracking error of between 2% and 6% when compared to the Composite Index. The Fund could operate outside of this range, and the Investment Manager has discretion on how best to position the Fund in seeking to achieve its outcomes.

The MSCI® All Country World Index comprises large and medium-sized companies, as determined by their market capitalisation (total market value of a company's outstanding shares), from both developed and emerging markets, and the index is designed to provide a broad measure of global equity market performance. The Bloomberg Barclays Global Aggregate Bond Index is a measure of global investment grade debt from twenty-four local currency markets.

The Composite Index has been selected as a benchmark for performance and risk measurement because it is representative of the type of companies in which the Fund is likely to invest, and it is therefore an appropriate comparator for the Fund's performance.

AVIVA INVESTORS SUSTAINABLE INCOME & GROWTH FUND (CONTINUED)

FUND MANAGER'S REPORT

Performance

Over the period 10 July 2019 to 15 October 2019, the Aviva Investors Sustainable Income & Growth Fund delivered a total return of 0.22% (share class 1), net of fees. The Fund's benchmark, 60% MSCI® All Countries World Index, returned -1.70% over the same period.

Review

The Fund launched on 10 July 2019. Following challenging conditions in July and August, strong performance in September brought the Fund into positive territory.

It was a mixed period for markets. Credit and government bond markets started the period on the front foot, notably in Europe where government yields fell and a proposed resumption of the Corporate Sector Purchase Programme was very supportive for credit. Equity markets proved more variable, with UK and NASDAQ index strength being counterbalanced by weakness elsewhere. Markets became increasingly volatile in August as trade war concerns escalated. Data softened further in export sensitive economies such as Germany and China, and a flight to safety drove the stock of negative yielding government bonds hit a record high of USD17 trillion. The subsequent recovery saw equities advance, and safe havens such as major government bond markets retreat, a combination that was particularly supportive for financial stocks.

Against a backdrop of volatile equity markets, the Fund's equity positions detracted from performance. Losses in our emerging market portfolio was partially offset by exposure to developed market equities. However, sterling weakness meant that there was strong performance across the board in our credit and real asset portfolios; which are largely denominated in overseas currencies, and therefore benefitted from the strength of these versus sterling. With bond yields generally falling and credit boosted, with the exception of emerging market corporates, all these sub-portfolios delivered positive returns.

More generally performance at portfolio level reflects the diversification that we expected from our multi-asset positioning. While individual positions may lose or make money, we are for example encouraged with the way that losses on banks and insurance companies in our equity holdings are offset by gains from real assets, benefitting from expectations for lower interest rates.

Outlook

Following the strong run in equities in September, valuations of some developed market equities looked stretched. We have reduced exposure here and recycled the proceeds into Global High Yield. Furthermore within equities, we have rebalanced away from Value stocks towards Quality. While focused on bottom-up valuations, we believe that the portfolio is well positioned for an environment of slowing growth, but one in which policy makers can engineer a soft landing and avoid recession.

November 2019

Synthetic Risk and Reward Indicator

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- The value of investments will be affected by changes in exchange rates.
- The Fund price may fall as well as rise and as a result you may not get back the original amount you invested.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at www.avivainvestors.com or from the ACD on request.

§ The Fund launched on 10 July 2019.

‡ The operating charges are calculated on an ex-post basis and as such may differ from the Ongoing Charge Figure where:

(a) Changes to fee rates were made during the year and the Ongoing Charge Figure has been amended to be future proofed for this change.

(b) The Ongoing Charge has been annualised for a share class that has not yet been open for a full year.

The direct transaction costs have been stated after deducting, in the case of single-priced funds, the proportion of the amounts collected from dilution adjustments or dilution levies that relates to direct transaction costs and, in the case of dual-priced funds, the amounts collected in relation to direct transaction costs added to, or subtracted from, the valuations by virtue of COLL 6.3.6 G (4).

≈ The high and low prices disclosed are the high and low prices for the accounting period and not the calendar year and are based on published prices. The net asset value per share price is based on the net asset value in the published accounts and may be different due to post year end accounting adjustments.

Ongoing Charges Figure*

Share class	10.07.19 to 15.10.19
Class 1	0.63%
Class 2	0.48%
Class 3	0.40%
Class 4	0.48%

* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the period. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

The ACD will apply a discount to the Fund Management Fee for 18 months from the date of the Fund's launch (the "Discount Period"). When the Discount Period ends, the Fund Management Fee will revert to the full published rate without further notice to shareholders.

The Discount Period for the Fund will apply from 10 July 2019 until 9 January 2021. Please see the Prospectus for full details.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

NOTES TO THE FINANCIAL STATEMENTS

1 Accounting basis and policies

Please see pages 8 to 10 for accounting basis and policies.

2 Net capital losses

	Period ended 15.10.19 [§] £000
Net capital losses on investment during the period comprise:	
Currency gains	16
Non-derivative securities losses	(45)
Net capital losses	(29)

3 Revenue

	Period ended 15.10.19 [§] £000
Interest on debt securities	28
Overseas dividends	15
Property income distributions	1
UK dividends	5
Total revenue	49

4 Expenses

	Period ended 15.10.19 [§] £000
Payable to the Authorised Corporate Director ("ACD"), associates of the ACD or agents of either of them:	
Fund Management Fee	5
Total expenses	5

The audit fee was £9,546. The audit fee forms part of the FMF.

[§] Fund launched on 10 July 2019.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

5 Taxation**a Analysis of tax charge**

	Period ended 15.10.19 [§] £000
Corporation tax	5
Overseas tax suffered	2
Total current tax (see note 5b)	7

b Factors affecting current tax charge

The tax assessed for the period is lower than the standard rate of corporation tax in the UK for an Authorised Investment Fund (20%).

The differences are explained below:

	Period ended 15.10.19 [§] £000
Net revenue before taxation	44
Corporation tax at 20%	9
Effects of:	
Double tax relief	(1)
Overseas dividends not subject to corporation tax	(2)
Overseas tax suffered	2
UK dividends not subject to corporation tax	(1)
Current tax charge (see note 5a)	7

Authorised Investment Funds are exempt from tax on capital gains. Therefore, any capital return is not included in the above reconciliation.

c Deferred tax

Fund has immaterial deferred tax at the period end.

6 Distributions

	Period ended 15.10.19 [§] £000
The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:	
Net dividend distribution for the two months ended 15 September	26
Net dividend distribution for the month ended 15 October	15
	41
Total distributions	41
Reconciliation of distributions for the period to net revenue after taxation	
Distributions for the period	41
Fund Management Fee borne by the capital account	(5)
Tax relief on capitalised Fund Management Fee	1
Net revenue after taxation	37

Details of the distributions per share are set out in the distribution tables on pages 398 and 400.

[§] Fund launched on 10 July 2019.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

7 Fair value hierarchy

	As at 15.10.19 Assets at £000
Valuation technique	
Level 1: Quoted prices	3,011
Level 2: Observable market data	1,793
Total value	4,804

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities

The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority to unobservable inputs. Disclosure is required of the value in each category in order to give an insight into the extent to which fair value measurements are subjective.

The disclosure is split into the following categories:

Level 1: Unadjusted quoted price in an active market for an identical instrument;

Level 2: Valuation techniques using observable inputs other than quoted prices within level 1;

Level 3: Valuation techniques using unobservable inputs.

8 Debtors

	As at 15.10.19 £000
Accrued revenue	25
Amounts receivable on issue of shares	10
Sales awaiting settlement	248
Total debtors	283

9 Cash and bank balances

	As at 15.10.19 £000
Cash and bank balances	27
Total cash and bank balances	27

10 Other creditors

	As at 15.10.19 £000
Accrued expenses	2
Corporation tax payable	5
Purchases awaiting settlement	58
Total other creditors	65

11 Contingent liabilities and commitments

There were no contingent liabilities or commitments at the period end.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

12 Related party transactions

Aviva Investors UK Fund Services Limited, Aviva Investors Global Services Limited and the Aviva Group are deemed to be related parties per section 33.10 of FRS 102 as they are entities with control, joint control or significant influence over the entity.

Fund Management Fee paid to Aviva Investors UK Fund Services Limited ("the ACD") are shown in note 4 and details of shares issued and cancelled by the ACD are shown in the statement of change in net assets attributable to shareholders. The balance due to the ACD at the period end in respect of Fund Management Fee was £1,758. Any balance due from the ACD in respect of issues is shown in note 8. Any balance due to the ACD in respect of cancellations is shown in note 10.

Distributions payable to the ACD and related parties of the ACD during the period amounted to £40,972. The amount outstanding at the period end was £14,568. Related parties of the ACD are deemed to be all companies under the control of Aviva Plc. This will include companies which hold shares in the Fund on behalf of other external investors.

Any investments managed and advised by Aviva Investors Global Services Limited or associated with the Aviva Group are identified on the portfolio statement.

Holdings at the year end and movements during the period are as follows:

	Holdings at 15.10.19 (shares)	Movement (shares)	Holdings at 15.10.18 (shares)
ACD and related parties (Class 3 Income shares)	1,000	1,000	–
ACD and related parties (Class 2 Accumulation shares)	2,317	2,317	–
ACD and related parties (Class 3 Accumulation shares)	5,001,000	5,001,000	–

The ACD and related parties of the ACD are ineligible to vote at any general meeting.

13 Shareholder funds

The Fund currently has four share classes: Class 1 (Retail), Class 2 and Class 4 (Institutional) and Class 3 (Associated undertakings of Aviva Plc). The Fund Management Fees are as follows:

Class 1: 0.63%
 Class 2: 0.48%
 Class 3: 0.40%
 Class 4: 0.48%

The net asset value of the share class, the net asset value per share and the number of shares in the class are shown on pages 384 and 385. The distributions per share are given in the distribution tables on pages 398 and 400. All the share classes have the same rights on winding up.

14 Shares in issue reconciliation

	Number of shares in issue at 10.07.19	Number of shares issued	Number of shares cancelled	Number of shares converted	Number of shares in issue at 15.10.19

Class 2 Accumulation shares	–	48,305	(14,553)	–	33,752
Class 3 Accumulation shares	–	5,001,000	–	–	5,001,000
Class 4 Accumulation shares	–	1,000	–	–	1,000

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

15 Derivatives and other financial instruments

The policies applied in the management of financial instruments are set out on pages 9 and 10.

Fair value of financial assets and financial liabilities

There is no significant difference between the carrying values of the financial assets and liabilities and their fair values.

Currency risk

At the year end date, 89.80% of the net assets of the Fund were denominated in currencies other than sterling with the effect that the balance sheet and total return can be significantly affected by currency movements. If currency rates were to change by 10.00%, the value of the Fund would change by 8.98%.

Currency	Net foreign currency assets		
	Monetary exposure £000	Non-monetary exposure £000	Total £000
	15.10.19	15.10.19	15.10.19
Australian dollar	–	12	12
Euro	4	908	912
Hong Kong dollar	2	277	279
Indonesian rupiah	–	55	55
South African rand	2	74	76
Swedish krona	–	56	56
US dollar	95	3,049	3,144

Interest rate risk

The interest rate profile of the Fund's financial assets and liabilities at 15 October 2019 was:

Currency 15.10.19	Floating Rate £000	Fixed Rate £000	None £000	Total £000
Financial Assets				
Australian dollar	–	–	12	12
Euro	–	–	971	971
Hong Kong dollar	3	–	276	279
Indonesian rupiah	–	–	55	55
South African rand	2	–	74	76
Sterling	16	–	505	521
Swedish krona	–	–	56	56
US dollar	6	1,794	1,344	3,144
Financial Liabilities				
Euro	–	–	(59)	(59)
Sterling	–	–	(6)	(6)
Total	27	1,794	3,228	5,049

The floating rate on bank balances is linked to the Depositary's base rate.

The floating rate on deposits is linked to LIBOR or its overseas equivalent.

Market price risk

At the period end date, 95.15% of the net assets of the Fund were invested in ordinary shares or stock units or debt securities admitted to an official stock exchange. If the market value were to change by 10%, the value of the Fund would change by 9.52%.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

16 Direct transaction costs

In the case of shares, broker commissions and transfer taxes, stamp duty is paid by the Fund on each transaction. In addition, there is a dealing spread between buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of the dealing spread.

	Principal before costs £000	Commission £000	Taxes £000	Total after costs £000	Commission as % of principal	Taxes as % of principal
15.10.19						
Purchases						
Bonds	(2,001)	–	–	(2,001)	0.00%	0.00%

Interim distribution

Group 1 shares are those shares purchased at 12:00 noon on 10 July 2019.

Group 2 shares are those shares purchased after 12:00 noon on 10 July 2019.

Equalisation

Equalisation applies only to Group 2 shares, in other words shares purchased during the period. It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

AVIVA INVESTORS MULTI-STRATEGY TARGET RETURN FUND

INVESTMENT OBJECTIVE

To deliver a positive return over rolling three year periods regardless of the prevailing stock market environment. The Fund aims to generate a positive return, on average 5% per annum above the Bank of England Base Rate before the deduction of charges, over rolling three year periods. In seeking to target this level of return the Fund also aims to manage volatility to a target of less than half the volatility of global equities, measured over the same rolling three year periods. These aims, however, are not guaranteed and it may not always be possible to achieve positive returns or to achieve the target level of volatility over rolling three year periods, or over any period of investment. Consequently, investors' capital is at risk.

INVESTMENT POLICY

Core Investment: The Fund invests across a broad range of global asset classes (including emerging markets) that may include shares of companies, bonds (both corporate and government), cash, commodities, indirect property, and currencies. Other funds (including funds managed by Aviva Investors companies) may also be used to gain exposure to these asset classes. The Fund will make significant use of derivative instruments for investment purposes including: futures, options, swaps, swaptions and forwards.

Strategy: The Fund is actively managed and the Investment Manager may take both long and synthetic short positions and derivative usage may include but is not limited to derivatives on interest rates, inflation rates, bonds, credit, equity, financial indices, volatility, dividend payments and currencies. Derivatives usage may be for the purposes of hedging, efficient portfolio management, or investment purposes and may be exchange traded or traded off exchange through market counterparties. The use of derivative instruments as part of the investment policy will mean that the Fund may, from time to time, have substantial holdings in liquid assets including deposits and money market instruments.

Environmental, Social and Governance (ESG) factors: ESG factors are integrated into the investment process and are considered alongside a range of financial metrics and research, but the Investment Manager retains discretion over which investments are selected. We also actively engage with companies and use voting rights with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with companies is available on our website and in the prospectus.

Performance & Risk Measurement: The Fund aims to generate returns which exceed the Bank of England base rate, which has been chosen as the market standard indicator of the risk-free rate of return. The Fund targets 5% above this rate because that is the level of outperformance that the Investment Manager believes to be realistic for this strategy alongside the volatility aim.

The Fund is managed to a defined risk target – linked to the volatility of global equities. Volatility measures how much the returns of the Fund may fluctuate and is an indicator of the level of risk taken by the Investment Manager.

The Fund is expected to operate with a volatility no greater than 50% of that of global equities, however, there may be times where the Fund operates above this target. The Index we use to represent global equities is the MSCI® All Country World Index GBP (the "Index"). The Fund's volatility is compared against the Index's monthly volatility, annualised, over 3-year rolling periods.

The Index comprises large and medium sized companies, as determined by their market capitalisation (total market value of a company's outstanding shares), from both developed and emerging markets, and the Index is designed to provide a broad measure of global equity market performance.

The Index has been selected as a benchmark due to the broad range of companies that it represents, and it is therefore an appropriate measure of the volatility of global equities.

FUND MANAGER'S REPORT

Performance

Over the twelve months ended 15 October 2019, the Aviva Investors Multi-Strategy Target Return Fund delivered a total return of 1.89% (share class 1) net of fees. The Fund's benchmark, the Bank of England Base Rate Plus 5%, returned 4.75%.

Review

Performance over the year under review can effectively be broken down into two periods: a challenging finish to 2018 versus a strong rebound in the Fund's performance in 2019.

The last quarter of 2018 was turbulent as investors rapidly priced in an unfeasibly pessimistic macro-economic outlook, partly driven by thin liquidity caused by seasonal and technical factors. Over this period, our long equity, long inflation and short duration positions (predominantly in the US) detracted the most as equity markets, inflation expectations and bond yields repriced lower.

The sharp market sell-off that took place at the end of 2018 was quickly reversed in the first quarter of 2019, with a change in interest rate guidance from the US central bank being one of the most notable catalysts. Maintaining our main risk exposures through December resulted in the Fund performing very strongly in the first quarter of the year, with Market Return strategies being the dominant driver of performance. We saw meaningfully positive contributions from our long equity and property positions.

The Fund's performance continued on a robust path in the subsequent two quarters, successfully capturing market upside while simultaneously limiting drawdowns in more challenging months such as May and August. The decision to strengthen the Risk-Reducing section of the portfolio at the start of the year proved to be particularly timely. In particular, taking on more risks in fixed income investments worked particularly well as the combination of looser monetary policy and uncertainty around trade negotiations led to a steep fall in bond yields, thereby pushing up asset prices. Our positive stance towards US government bonds and our increased exposure to a strategy anticipating Asian currencies to weaken also proved to be effective risk-reducers, most notably in May and August when trade tensions escalated.

Over the course of the year, we progressively rotated part of our exposure away from equities into higher yielding credit strategies. The latter performed particularly well, in large part supported by investors' incessant hunt for yield and accommodative monetary policy. The fact that we had reduced equity risk to the lowest end of the range since the Fund's launch meant that losses from our equity strategies were relatively contained during the May and August sell-offs.

AVIVA INVESTORS MULTI-STRATEGY TARGET RETURN FUND (CONTINUED)

FUND MANAGER'S REPORT (CONTINUED)

Outlook

Following a sharp slowdown over the course of 2018, we expect global growth to remain soft in 2019 and 2020. While the strength of labour markets and associated elevated levels of consumer confidence have been the bright spots throughout the current expansion, global economic repercussions could arise should there be any spill over from weakening business confidence into hiring intentions. Against this backdrop, we prefer to allocate risk to credit strategies, most notably emerging market debt hard currency and European financial subordinated debt, as they should remain supported in a low-yield environment.

November 2019

Sources: Fund and peer group performance figures – Lipper Hindsight, mid to mid basis with net income reinvested in GBP, with no initial charges applied. Market data – Bloomberg.

As noted above, the performance figures in this commentary have been sourced from an external party and are based on published prices. The performance figures quoted in the comparative tables on pages 403 and 404 are based on the net asset value per the published accounts and may be different due to post year end accounting adjustments.

Any opinions expressed are those of the Fund manager. They should not be viewed as a guarantee of a return from an investment in the Funds. The content of the commentary should not be viewed as a recommendation to invest nor buy or sell securities. Past performance is not a guide to the future. The value of an investment and any income from it can go down as well as up. Investors may not get back the original amount invested.

* Benchmark – Bank of England Base Rate (plus 5%)

*** Please note that up to (but not including) 24 October 2016, the fees costs and expenses of operating and running the Company and the Funds were incurred on a more traditional charging method which, amongst other things, included an annual management charge that was paid to the ACD in respect of Class 5 (previously named Class 3) in the Aviva Investors Multi-Strategy Target Return Fund in the amount of 0.10%. Although the charges continued to be incurred on this more traditional charging method for the remainder of each of the performance periods referred to above (i.e. because they relate to periods before we introduced the Fund Management Fee), from that date such annual management charge was 0.67% and the performance figures for Class 5 (previously named Class 3) reflect the charges applicable to each period.

Source for all data: Aviva Investors/Lipper, a Thomson Reuters company, this is based on index provider data where applicable. Fund return data is mid to mid, net income reinvested, net of all ongoing charges and fees in sterling, net of tax payable by the Fund to 31 December 2018. The figures do not include the effect of the Entry Charge and any Exit Charge.

Synthetic Risk and Reward Indicator

The Fund has been allocated a risk number based on the higher of the historic volatility of its share price, the historic volatility of its current asset classes or its intended maximum risk levels.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- Bond values are affected by changes in interest rates, and the bond issuer's creditworthiness. Bonds that produce a higher level of income usually have a greater risk of default.
- The value of investments will be affected by changes in exchange rates.
- Where a third party appointed to manage transactions or ensure the safe keeping of assets fails in their duty a loss may occur.
- Financial derivatives may only require a low initial deposit relative to the asset exposure, a relatively small price movement in the underlying asset may result in substantial losses to the Fund.
- Developing market investments can be less easy to buy and sell, and their values may be influenced by the economic and political risks of the countries of issue.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at www.avivainvestors.com or from the ACD on request.

[‡] The operating charges are calculated on an ex-post basis and as such may differ from the Ongoing Charge Figure where:

(a) Changes to fee rates were made during the year and the Ongoing Charge Figure has been amended to be future proofed for this change.

(b) The Ongoing Charge has been annualised for a share class that has not yet been open for a full year.

[#] The direct transaction costs have been stated after deducting, in the case of single-priced funds, the proportion of the amounts collected from dilution adjustments or dilution levies that relates to direct transaction costs and, in the case of dual-priced funds, the amounts collected in relation to direct transaction costs added to, or subtracted from, the valuations by virtue of COLL 6.3.6 G (4).

[≈] The high and low prices disclosed are the high and low prices for the accounting period and not the calendar year and are based on published prices. The net asset value per share price is based on the net asset value in the published accounts and may be different due to post year end accounting adjustments.

Ongoing Charges Figure*

Share class	15.10.19	15.10.18
Class 1	1.10%	1.10%
Class 2	0.85%	0.85%
Class 3	0.59%	0.59%
Class 5	0.70%	0.70%
Class 9	0.80%	0.80%

* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the year. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

Total revenue	107,919	114,065

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

4 Expenses

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Payable to the Authorised Corporate Director ("ACD"), associates of the ACD or agents of either of them:		
Fund Management Fee/ACD's periodic charge*	31,341	35,231
Registration fees	–	589
	31,341	35,820
Payable to the Depositary, associates of the Depositary or agents of either of them:		
Depositary's fee	–	382
Interest payable	1,987	4
Safe custody fee	–	443
	1,987	829
Other expenses:		
Audit fee**	–	13
Dividend collection charges	–	12
Printing and postage expenses	–	7
Professional fee	–	4
Statement fee	–	24
	–	60
Total expenses	33,328	36,709
Less those expenses rebated by the ACD	–	(154)
Net expenses	33,328	36,555

* From 4 June 2018 the Fund changed to a single fixed charge known as the Fund Management Fee (FMF). The FMF covers fees and expenses in relation to the operation and administration of the Company and the Fund.

** The audit fee was £18,166 (2018: £17,467) net of VAT. With effect from 4 June 2018, the audit fee was no longer accrued for separately and now forms part of the FMF.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

5 Taxation**a Analysis of tax charge**

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Corporation tax	8,410	7,719
Adjustments in respect of prior period	(9)	69
Overseas tax suffered	5,187	5,837
Total current tax (see note 5b)	13,588	13,625
Deferred tax (see note 5c)	(395)	399
Total tax for the year	13,193	14,024

b Factors affecting current tax charge

The tax assessed for the year is lower (2018: lower) than the standard rate of corporation tax in the UK for an Authorised Investment Fund (20%) (2018: 20%).

The differences are explained below:

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Net revenue before taxation	74,591	77,510
Corporation tax at 20%	14,918	15,502
Effects of:		
Adjustments in respect of prior period	(9)	69
Deferred tax	(395)	399
Double tax relief	(2,758)	(2,022)
Expenses not deductible for tax purposes	–	(2)
Overseas dividends not subject to corporation tax	(4,046)	(4,523)
Overseas tax suffered	5,187	5,837
Revenue taxable in different periods	798	(807)
Stock dividends not subject to corporation tax	–	(1)
UK dividends not subject to corporation tax	(502)	(428)
Current tax charge (see note 5a)	13,193	14,024

Authorised Investment Funds are exempt from tax on capital gains. Therefore, any capital return is not included in the above reconciliation.

c Deferred tax

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
Provision at the start of the year	399	–
Movement in deferred tax for the year (Note 5(a))	(395)	399
Provision at the end of the year	4	399

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

6 Distributions

	Year ended 15.10.19 £000	Year ended 15.10.18 £000
The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:		
Final distribution	53,155	60,907
	53,155	60,907
Add: Revenue deducted on cancellation of shares	9,123	4,725
Deduct: Revenue received on issue of shares	(880)	(2,156)
Total distributions	61,398	63,476
Reconciliations of distributions for the year to net revenue after taxation		
Reconciliation of distribution for the year to net revenue after taxation	61,398	63,476
Distributions for the year	–	9
Other fees borne by capital account	(2)	(1)
Undistributed revenue brought forward	2	2
Undistributed revenue carried forward	61,398	63,486

Details of the distributions per share are set out in the distribution tables on page 432.

7 Fair value hierarchy

Valuation technique	As at 15.10.19		As at 15.10.18	
	Assets at £000	Liabilities at £000	Assets at £000	Liabilities at £000
Level 1: Quoted prices	488,727	(14,421)	1,617,449	(14,691)
Level 2: Observable market data	3,298,443	(143,779)	3,446,696	(300,776)
Total value	3,787,170	(158,200)	5,064,145	(315,467)

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities

The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority to unobservable inputs. Disclosure is required of the value in each category in order to give an insight into the extent to which fair value measurements are subjective.

The disclosure is split into the following categories:

Level 1: Unadjusted quoted price in an active market for an identical instrument;

Level 2: Valuation techniques using observable inputs other than quoted prices within level 1;

Level 3: Valuation techniques using unobservable inputs.

8 Debtors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued revenue	14,981	11,465
Amounts receivable on issue of shares	76	96
Overseas tax recoverable	1,205	882
Sales awaiting settlement	38,723	404,429
Total debtors	54,985	416,872

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

9 Cash and bank balances

	As at 15.10.19 £000	As at 15.10.18 £000
Amounts held at futures clearing house and brokers	44,939	–
Cash and bank balances	710,646	719,969
Total cash and bank balances	755,585	719,969

10 Provisions for liabilities

	As at 15.10.19 £000	As at 15.10.18 £000
Deferred taxation	4	399
Total provisions for liabilities	4	399

11 Other creditors

	As at 15.10.19 £000	As at 15.10.18 £000
Accrued expenses	1,084	3,938
Amounts payable for cancellation of shares	29,817	19,974
Corporation tax payable	3,989	3,381
Purchases awaiting settlement	123,664	617,633
Total other creditors	158,554	644,926

12 Contingent liabilities and commitments

The contingent liabilities and commitments at the year end date are as follows:

	As at 15.10.19 £000	As at 15.10.18 £000
Cellnex Telecom Rights 25/10/2019	543	–
Total contingent liabilities	543	–

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

13 Related party transactions

Aviva Investors UK Fund Services Limited, Aviva Investors Global Services Limited and the Aviva Group are deemed to be related parties per section 33.10 of FRS 102 as they are entities with control, joint control or significant influence over the entity.

Fund Management Fee/ACD periodic charges paid to Aviva Investors UK Fund Services Limited ("the ACD") are shown in note 4 and details of shares issued and cancelled by the ACD are shown in the statement of change in net assets attributable to shareholders. The balance due to the ACD at the year end in respect of Fund Management Fee/ACD periodic charges was £1,084,316 (2018: £3,937,668). Any balance due from the ACD in respect of issues is shown in note 8. Any balance due to the ACD in respect of cancellations is shown in note 11.

Distributions payable to the ACD and related parties of the ACD during the year amounted to £36,718,132 (2018: £42,261,712). The amount outstanding at the year end was £36,718,132 (2018: £42,261,712). Related parties of the ACD are deemed to be all companies under the control of Aviva Plc. This will include companies which hold shares in the Fund on behalf of other external investors.

Any investments managed and advised by Aviva Investors Global Services Limited or associated with the Aviva Group are identified on the portfolio statement.

The total purchases and sales on these investments during the year amounted to £nil (2018: £nil) and £nil (2018: £nil) respectively. The income received during the year amounted to £nil (2018: £nil).

Holdings at the year end and movements during the year are as follows:

	Holdings at 15.10.19 (shares)	Movement (shares)	Holdings at 15.10.18 (shares)
ACD and related parties (Class 1 Accumulation shares)	–	(25,704)	25,704
ACD and related parties (Class 2 Accumulation shares)	23,534,622	(50,573,861)	74,108,483
ACD and related parties (Class 3 Accumulation shares)	2,524,230,292	(576,583,622)	3,100,813,914
ACD and related parties (Class 9 Accumulation shares)	26,745,481	(20,902,637)	47,648,118

The ACD and related parties of the ACD are ineligible to vote at any general meeting.

14 Shareholder funds

The Fund currently has five share classes: Class 1 (Retail), Classes 2 and 5 (Institutional) and Classes 3 and 9 (Associated undertakings of Aviva Plc). The Fund Management Fees are as follows:

Class 1:	1.10%
Class 2:	0.85%
Class 3:	0.59%
Class 5:	0.70%
Class 9:	0.80%

The net asset value of the share class, the net asset value per share and the number of shares in the class are shown on pages 403 and 404. The distributions per share are given in the distribution tables on page 432. All the share classes have the same rights on winding up.

15 Shares in issue reconciliation

	Number of shares in issue at 15.10.18	Number of shares issued	Number of shares cancelled	Number of shares converted	Number of shares in issue at 15.10.19
Class 1 Accumulation shares	1,506,945	52,313	(680,430)	–	878,828

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

16 Derivatives and other financial instruments

The policies applied in the management of financial instruments are set out on pages 9 and 10.

Fair value of financial assets and financial liabilities

There is no significant difference between the carrying values of the financial assets and liabilities and their fair values (2018: £nil).

Value at risk

The Fund enters into derivative transactions in the form of forward currency contracts, futures, options and swaps for the purpose of efficient portfolio management. The commitment approach has been used to calculate the global exposure.

The Investment Adviser assesses the market risk of the Fund's investments, including derivative exposure, using historical simulation methodology. This process provides an estimate of the maximum potential loss that could be expected to occur as a result of changes in market prices over a given period of time in all but a given percentage of circumstances. The VaR is calculated on a 99% confidence level with a 20 day horizon & 250 days of history.

The VaR calculated for the year ended 15 October 2019 was as follows:

	15.10.19 %	15.10.18 %
As at 15 October, the company's value at risk is		
During the financial year, the highest utilisation of value at risk was	4.80	4.90
During the financial year, the average utilisation of value at risk was	2.52	3.79
During the financial year, the lowest utilisation of value at risk was	1.13	2.24

Leverage

Average leverage is calculated as the sum of the net asset value and the incremental exposure generated through the use of derivatives (calculated in accordance with the commitment approach (CESR/10-788)) divided by the net asset value.

At the year end date the average leverage was 470% (2018: 637%).

Market price risk

At the year end date, 84.85% (2018: 90.67%) of the net assets of the Fund were invested in ordinary shares or stock units or debt securities admitted to an official stock exchange. If the market value were to change by 10%, the value of the Fund would change by 8.49% (2018: 9.07%).

17 Counterparty exposure and collateral**Financial derivative exposure**

The types of derivatives held at the year end date were forward currency contracts, futures contracts, credit default swaps, interest rate swaps, total return swaps, inflation linked swaps, option contracts and equity variance swap. Details of individual contracts are disclosed in the Portfolio Statement and the total position by counterparty at the year end date was as follows:

	Forward currency contracts £000	Future contracts £000	Total Return swaps £000	Interest rate swaps £000	Inflation linked swaps £000	Option contracts £000	Equity Variance Swap £000	Cash collateral held £000	Total £000

Royal Bank of Canada	916	–	–	–	–	–	–	–	916
Royal Bank of Scotland	256	–	–	–	–	–	–	–	256
Société Générale	4,114	–	–	11,148	–	–	11,886	2,320	29,468
Standard Chartered	(2,776)	–	–	–	–	–	–	–	(2,776)
UBS	–	53,317	–	–	47	6,346	1,863	573	62,146
Total	20,491	53,317	–	376,442	18,046	18,551	32,496	65,302	584,645

The counterparty exposure on forward currency contracts is reported at their mark to market values but for futures contracts, total return swaps, interest rate swaps, inflation linked swaps, option contracts and equity variance swap it is only the positive mark to market values that are reported.

18 Debt security credit analysis

	Market value £000		Total net assets %	
	15.10.19	15.10.18	15.10.19	15.10.18
Investment grade securities	523,791	393,121	12.26%	7.51%
Below investment grade securities	585,926	–	13.69%	–
Total debt securities	1,109,717	393,121	25.95%	7.51%

Credit rating designations BBB or above are considered investment grade whereas credit rating designations BB or lower are considered below investment grade.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

19 Direct transaction costs

In the case of shares, broker commissions and transfer taxes, stamp duty is paid by the Fund on each transaction. In addition, there is a dealing spread between buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of the dealing spread.

Dealing spread

As at 15 October 2019, the average portfolio dealing spread was 0.15% (2018: 0.10%). This spread represents the difference between the values determined retrospectively by reference to the bid and offer prices of investments expressed as a percentage of the value determined by reference to the offer price.

20 Post balance sheet events

There are no post balance sheet events which require adjustment or disclosure at the year end (2018: £nil).

DISTRIBUTION TABLE

Final distribution payable in pence per share for the year ended 15 October 2019

Income shares		Net revenue	Equalisation	Final distribution payable 15 December 2019	Final distribution paid 15 December 2018
Class 1 Accumulation shares	Group 1	0.9726	–	0.9726	0.8483
	Group 2	0.3759	0.5967	0.9726	0.8483
Class 2 Accumulation shares	Group 1	1.1948	–	1.1948	1.0672
	Group 2	0.7818	0.4130	1.1948	1.0672
Class 3 Accumulation shares	Group 1	1.4303	–	1.4303	1.3203
	Group 2	1.0059	0.4244	1.4303	1.3203
Class 5 Accumulation shares	Group 1	1.3445	–	1.3445	1.2241
	Group 2	1.0288	0.3157	1.3445	1.2241
Class 9 Accumulation shares	Group 1	1.2446	–	1.2446	1.1135
	Group 2	0.7856	0.4590	1.2446	1.1135

Final distribution

Group 1 shares are those shares purchased at or before 12:00 noon on 15 October 2018.

Group 2 shares are those shares purchased after 12:00 noon on 15 October 2018.

Equalisation

Equalisation applies only to Group 2 shares, in other words shares purchased during the relevant period. It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

SECURITIES FINANCING TRANSACTIONS (UNAUDITED)

As defined in Article 3 of Regulation (EU) 2015/2365, Securities Financing Transactions ("SFT's") include repurchase transactions, securities or commodities lending and securities or commodities borrowing, buy-sell back transactions or sell-buy back transactions and margin lending transactions. The only Fund impacted by this regulation is the Aviva Investors Multi-Strategy Target Return Fund. Whilst the Fund does not engage in such SFT's, it does engage in Total Return Swaps ("TRS") therefore, in accordance with Article 13 of the Regulation, the Fund's involvement in and exposures related to TRS for the accounting period ended 15 October 2019 are detailed below.

Amount of assets engaged in TRS

The following table represents the fair value of assets engaged in TRS as at the balance sheet date:

	Value £000	% of AUM
TRS	759	0.02

TEN LARGEST COLLATERAL ISSUERS

All collateral received or pledged in relation to TRS positions is in the form of cash. As a result of this there is no requirement to list the top 10 non-cash collateral issuers.

Counterparties

The following table provides details of the top ten counterparties, their country of incorporation and the gross volume of outstanding transactions (underlying exposure per counterparty, on a gross absolute basis), in respect of TRS, as at the balance sheet date.

Counterparty	Country of incorporation	Value £000
Citigroup	United States	88,122

Type and quality of collateral

All collateral received and provided by the Fund in respect of OTC ("Over The Counter") derivatives (including TRS) with the counterparty noted (Citigroup) as at the balance sheet date is in the form of cash and is therefore open maturity.

Currency of collateral

The following table provides an analysis of the currency profile of collateral received and provided in respect of OTC derivatives (including TRS) with the counterparties noted (Citigroup) as at the balance sheet date.

	Collateral Received	Value £000
Currency		
EUR		162
		162

Maturity tenor of TRS

The following table provides an analysis of the maturity tenor of open TRS positions as at the balance sheet date.

	Value £000
Maturity	
3 to 12 months	759
	759

The above maturity tenor analysis has been based on the contractual maturity date of the relevant TRS.

SECURITIES FINANCING TRANSACTIONS (UNAUDITED)

Settlement and clearing

OTC derivative transactions are entered into by the Fund under an International Swaps and Derivatives Association, Inc. Master Agreement ("ISDA Master Agreement") or similar agreement. An ISDA Master Agreement is a bilateral agreement between the Fund and a counterparty that governs OTC derivative transactions (including TRS) entered into by the parties. All OTC derivative transactions entered under an ISDA Master agreement are netted together for collateral purposes, therefore any collateral disclosures provided in this report are in respect of all OTC derivative transactions entered into by the Fund with the applicable TRS counterparties under the ISDA Master agreement, not just TRS.

Share of collateral received that is reused and reinvestment return

As at the balance sheet date, all cash collateral received in respect of OTC derivative transactions (including TRS) with the counterparty noted (Citigroup) was re-invested in other instruments in accordance with prospectus provisions. Returns generated by the Fund from the reinvestment of cash collateral, net of any interest payable to the relevant counterparty, for the period ended 15 October 2019 is included in Note 2 to the financial statements for the Aviva Investors Multi-Strategy Target Return Fund.

Safekeeping of collateral

All collateral received and provided by the Fund in respect of OTC derivative transactions as at the reporting date is cash, held by Citibank N.A.

Return and cost

All returns from TRS will accrue to the Fund and are not subject to any return sharing arrangements with the Authorised Fund Manager, Investment Manager or any other third parties. Returns from those instruments are disclosed in Note 2 and Note 3 to the financial statements for the Aviva Investors Multi-Strategy Target Return Fund.

STATEMENT OF THE AUTHORISED CORPORATE DIRECTOR'S RESPONSIBILITIES

The Collective Investment Schemes Sourcebook of the Financial Conduct Authority requires the Authorised Corporate Director (ACD) to prepare financial statements for each accounting period which give a true and fair view of the financial position of the Company at the period end and of the net income and net gains or losses on the scheme property of the Company for the period then ended.

In preparing the financial statements the ACD is required to:

- follow applicable accounting standards;
- make judgements and estimates that are reasonable and prudent;
- select suitable accounting policies and then apply them consistently;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in operation for the foreseeable future; and
- comply with the Instrument of Incorporation and the Statement of Recommended Practice for Authorised Funds.

The ACD is required to keep proper accounting records and to manage the Company in accordance with the Regulations and the Instrument of Incorporation.

The ACD is responsible for taking reasonable steps for the prevention and detection of fraud and other irregularities.

AUTHORISED CORPORATE DIRECTOR'S STATEMENT

We hereby approve the Report and Financial Statements of Aviva Investors Investment Funds ICVC for the year ended 15 October 2019 on behalf of Aviva Investors UK Fund Services Limited in accordance with the requirements of the Collective Investment Schemes Sourcebook of the Financial Conduct Authority.

I Buckle
Director

S Ebenston
Director
14 February 2020

STATEMENT OF THE DEPOSITARY'S RESPONSIBILITIES AND DEPOSITARY'S REPORT TO THE SHAREHOLDERS

The Depositary must ensure that the Company is managed in accordance with the Financial Conduct Authority's Collective Investment Schemes Sourcebook, the Open-Ended investment Companies Regulations 2001 (SI 2001/1228), as amended, the Financial Services and Markets Act 2000, as amended, (together 'the regulations'), the Company's Instrument of Incorporation and Prospectus (together 'the Scheme documents') as detailed below.

The Depositary must in the context of its role act honestly, fairly, professionally, independently and in the interests of the Company and its investors.

The Depositary is responsible for the safekeeping of all custodial assets and maintaining a record of all other assets of the Company in accordance with the regulations.

The Depositary must ensure that:

- the Company's cash flows are properly monitored and that cash of the Company is booked into the cash accounts in accordance with the regulations;
- the sale, issue, repurchase, redemption and cancellation of shares are carried out in accordance with the regulations;
- the value of shares of the Company are calculated in accordance with the regulations;
- any consideration relating to transactions in the Company's assets is remitted to the Company within the usual time limits;
- the Company's income is applied in accordance with the regulations; and the instructions of the Authorised Corporate Director ('the ACD'), which is the UCITS Management Company, are carried out (unless they conflict with the regulations).

The Depositary also has a duty to take reasonable care to ensure that Company is managed in accordance with the regulations and Scheme documents in relation to the investment and borrowing powers applicable to the Company.

Having carried out such procedures as we consider necessary to discharge our responsibilities as depositary of the Company, it is our opinion, based on the information available to us and the explanations provided, that in all material respects the Company, acting through the AFM:

- (i) has carried out the issue, sale, redemption and cancellation, and calculation of the price of the Company's shares and the application of the Company's income in accordance with the regulations and the Scheme documents of the Company; and
- (ii) has observed the investment and borrowing powers and restrictions applicable to the Company.

INDEPENDENT AUDITORS' REPORT TO THE SHAREHOLDERS OF AVIVA INVESTORS INVESTMENT FUNDS ICVC

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS

OUR OPINION

In our opinion, the financial statements of Aviva Investors Investment Funds ICVC (the "Company"):

- give a true and fair view of the financial position of the Company and each of the sub-funds as at 15 October 2019 and of the net revenue and the net capital gains/losses on the scheme property of the Company and each of the sub-funds for the respective periods then ended ("respective periods" is defined as 16 October 2018 to 15 October 2019 for all sub-funds except Aviva Investors Sustainable Income & Growth Fund with a period 10 July 2019 to 15 October 2019; Aviva Investors Emerging Markets Equity Unconstrained Fund with a period 29 July 2019 to 15 October 2019; and Aviva Investors Global Equity Unconstrained Fund with a period 1 August 2019 to 15 October 2019); and
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards, comprising FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland", and applicable law), the Statement of Recommended Practice for UK Authorised Funds, the Collective Investment Schemes sourcebook and the Instrument of Incorporation.

Aviva Investors Investment Funds ICVC is an Open Ended Investment Company ('OEIC') with 20 sub-funds. The financial statements of the company comprise the financial statements of each of the sub-funds. We have audited the financial statements, included within the Annual Report and Financial Statements (the "Annual Report"), which comprise: the balance sheets as at 15 October 2019; the statements of total return and the statements of changes in net assets attributable to shareholders for the respective periods then ended; the distribution tables; the accounting policies (within the Policies and Risks section); and the notes to the financial statements.

BASIS FOR OPINION

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities under ISAs (UK) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, which includes the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

CONCLUSIONS RELATING TO GOING CONCERN

ISAs (UK) require us to report to you when:

- the Authorised Corporate Directors' use of the going concern basis of accounting in the preparation of the financial statements is not appropriate; or
- the Authorised Corporate Director has not disclosed in the financial statements any identified material uncertainties that may cast significant doubt about the company's or any of the sub-funds' ability to continue to adopt the going concern basis of accounting for a period of at least twelve months from the date when the financial statements are authorised for issue.

We have nothing to report in respect of the above matters. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the Company's or any of the sub-funds' ability to continue as a going concern. For example, the terms of the United Kingdom withdrawal from the European Union are not clear and it is difficult to evaluate all of the potential implications on the Company's or any of the sub-funds' business and the wider economy.

REPORTING ON OTHER INFORMATION

The other information comprises all of the information in the Annual Report other than the financial statements and our auditors' report thereon. The Authorised Corporate Director is responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

Authorised Corporate Director's Report

In our opinion, the information given in the Authorised Corporate Director's Report for the financial year for which the financial statements are prepared is consistent with the financial statements.

INDEPENDENT AUDITORS' REPORT TO THE SHAREHOLDERS OF AVIVA INVESTORS INVESTMENT FUNDS ICVC (CONTINUED)

RESPONSIBILITIES FOR THE FINANCIAL STATEMENTS AND THE AUDIT

Responsibilities of the Authorised Corporate Director for the financial statements

As explained more fully in the Statement of the Authorised Corporate Director's Responsibilities set out on page 435, the Authorised Corporate Director is responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view. The Authorised Corporate Director is also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Authorised Corporate Director is responsible for assessing the company's and each of the sub-funds ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the Authorised Corporate Director either intends to wind up or terminate the company or individual sub-fund, or has no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the Company's shareholders as a body in accordance with paragraph 4.5.12 of the Collective Investment Schemes sourcebook as required by paragraph 67(2) of the Open-Ended Investment Companies Regulations 2001 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

OTHER REQUIRED REPORTING

OPINION ON MATTER REQUIRED BY THE COLLECTIVE INVESTMENT SCHEMES SOURCEBOOK

In our opinion, we have obtained all the information and explanations we consider necessary for the purposes of the audit.

COLLECTIVE INVESTMENT SCHEMES SOURCEBOOK EXCEPTION REPORTING

Under the Collective Investment Schemes sourcebook we are also required to report to you if, in our opinion:

- proper accounting records have not been kept; or
- the financial statements are not in agreement with the accounting records.

We have no exceptions to report arising from this responsibility.

PricewaterhouseCoopers LLP

GENERAL INFORMATION

Investments in Aviva Investors Investment Funds ICVC are intended to be medium to long term investments and should not be considered as a short term investment.

Past performance is not a guide to the future.

The value of an investment in the funds and the revenue from it may go down as well as up, and you may not get back the original amount invested.

Where funds are invested abroad, the value of your investment may rise and fall purely on account of movement in exchange rates.

Please refer to the Prospectus (which is available on the internet at www.avivainvestors.com or from the ACD on request) for a full description of the risks involved when investing in the Funds.

Any future returns and opinions expressed are those of the Investment Manager and should not be relied upon as indicating any guarantee of return from investment in the funds.

The performance figure given for each fund (source: Aviva Investors) is based on midday values (with the exception of Aviva Investors UK Index Tracking Fund which is based on 5 p.m values and Aviva Investors Multi-Strategy Target Return Fund with is based on 11:59 p.m values). The performance figure given for each comparative index (source: Lipper) is based on close of business values. Hence any over/under performance may be adversely or favourably affected by this time difference.

VALUE ASSESSMENT APPROACH

AVIVA INVESTORS UK FUND SERVICES LIMITED ("THE COMPANY")

INTRODUCTION

An Authorised Fund Manager ('AFM') must conduct an assessment of value for each share class in each of the Funds that it manages at least annually. The Financial Conduct Authority (FCA) rules prescribe a minimum set of components which need to be considered to determine if 'value' is being provided to investors, and that costs and charges are justified in this context. The following describes how the Company, as AFM of the Funds, approaches the assessment and the range of factors considered by the Company's board of directors ('the Board') for each component.

This annual exercise is performed in addition to and in conjunction with the regular Fund reviews which the Company undertakes in line with its product governance obligations. The Fund reviews include extensive assessments of service and performance for each of the Funds, with appropriate action taken throughout the course of the year. If the result of the value assessment is that charges are not considered to be justified in the context of overall value, appropriate action will be taken by the Company.

THE COMPONENTS OF THE VALUE ASSESSMENT

1. Quality of Service

Consideration is given to the range, nature, extent and quality of the services provided directly to investors or those services undertaken on their behalf, and whether investors have benefited appropriately from the services. This covers the services performed by the Company and its suppliers, as well as their reputation, expertise, resources and relative capabilities. This includes:

- The quality of the Investment Manager, including their processes (trading, risk management, compliance, technology, research and operational capabilities) and any Environmental, Social & Governance (ESG) factors which are integrated into the investment process.
- The quality of the administrative and investor services provided to the Fund, using appropriate investor satisfaction surveys, complaints and data relating to operational accuracy to assess the positioning of the Company and its products and services over time, and relative to other similar firms.
- The timely delivery of clear communications, and the appropriateness of information provided to investors to assist them in making informed decisions regarding their investments.

2. Performance

Consideration is given to whether Fund performance, before and after deduction of expenses, is within a reasonable range of outcomes relative to its objective, policy and strategy when measured over appropriate time periods. The time periods assessed will be any specific time period expressed in the investment objective or policy of the Fund, and performance over 1, 3, 5 and 7 years, or since inception if there is not a full first year's performance data. Performance is also considered in the context of the relevant peer group and whether the Fund operated in accordance with its respective risk limits and investment restrictions.

Performance as measured against the respective Fund's objectives is assessed in the regularly scheduled Fund review, and this will be taken into account in reaching the Fund performance conclusions for the value assessment.

If the performance is not considered to be satisfactory then the following may be taken into account where relevant:

- Explanations for any underperformance provided by the Investment Manager as part of the Company's fund performance governance model; and
- Any appropriate steps (such as consideration of changing the investment objective, policy, strategy or investment personnel) that have been taken or are intended to be made and aim to improve Fund performance.

The Company could consider changing the Investment Manager or closing the Fund where no other viable options are available.

Further information on the specific performance of individual Funds is included in the Fund Manager Report section of the Report & Accounts covering the period relevant to that report. More topical information is available in the regular fund fact sheets and fund updates available on our website.

3. AFM Costs and Charges

Consideration is given to whether charges are reasonable taking into account the underlying costs for the services provided and the performance objectives set for the Fund.

The Company undertook a thorough review of charges across the fund range in 2018 which resulted in the introduction of a single Fund Management Fee ('FMF'). The FMF is the only direct charge deducted from the Funds and is a simpler charging basis for investors. The review resulted in a number of charges being lowered.

The underlying fees, costs and expenses covered by the FMF are expressly listed in the Prospectus of the relevant Fund, but in summary cover the following payments:

- the fees and expenses of the Company as AFM;
- the fees and expenses of the Investment Manager;
- the fees and expenses of the Depositary;
- the fees and expenses of the Custodian;
- the fees and expenses of the Auditor;
- the permitted costs in connection with periodic statements and accounts; and
- FCA fees.

To assist with the value assessment, a costs and charges model is used which enables the Company to assess the costs attributable to each Fund. The model is refreshed semi-annually and enables a comparison of the FMF for each respective Fund against all elements of cost which must be paid out of the proceeds of the FMF. This enables the Company to determine whether the FMF is a fair reflection of the costs of the services provided for the relevant share class of each Fund, with an appropriate allowance for the level of income earned for the Company from these activities.

4. Economies of Scale

Consideration is given to whether investors have participated appropriately in any savings or benefits derived from the size of the Fund. Consideration is also given to whether investors have benefited from the scale of the Aviva Group and the ability to negotiate favourable pricing with service providers due to the wide range of other products and services offered across the Group along with the scale and range of other funds and assets managed by the Company.

VALUE ASSESSMENT APPROACH (CONTINUED)

The Board considers whether economies of scale have been realised in relation to the costs and operating expenses of each share class and the extent to which investors in the Funds might also reasonably benefit from any financial savings that result. For example, whether the FMF fairly reflects the fees charged in respect of the third party supplied services – which should be competitive due to the scale of Aviva and the potential breadth of other Aviva product ranges which the third-party supplier also provides services for.

The assessment of the underlying service costs of running the Fund, and the appropriate level of FMF, takes place on an annual basis. Any changes to the underlying costs will therefore be reflected in this analysis, and may result in a change to the FMF.

In looking at whether investors have benefited appropriately, either directly or indirectly, in any savings or benefits in relation to the management of the Fund, the Board acknowledges the wider, albeit intangible benefits to investors, such as the reputation, brand, and financial strength of the Aviva Group.

The Board may also deem it appropriate to reinvest scale-driven cost savings directly into the Company in order to finance product development or retain savings from a commercial perspective. Consideration will be given to the drivers of the scale generated in determining whether benefits should be shared or reinvested.

5. Comparable Market Rates

Consideration is given to whether the fees paid for each service provided to the Funds by the Company or on its behalf are reasonable compared to fees for similar services in the market.

An independent consultant is engaged to carry out a periodic survey of the main expenses of the Funds and those of a large number of other fund management groups. The survey provides benchmarks for each of the main expense items associated with running a Fund to help the Board determine whether the Funds are paying a reasonable price for each of the services to which the expenses relate.

The expenses that comprise the survey include the following:

- Transfer agency fees
- Fund accounting fees
- Investment management fees
- Custodian fees
- Depositary fees
- Audit fees

Direct comparisons may be difficult because comparative information is not generally publicly available and is affected by numerous factors. Where specific expenses are highlighted to be outliers in the report, the reasons for this will be considered to determine the extent to which they are appropriate.

The review will also consider the overall costs of comparable products, by benchmarking each Fund against a suitable peer group which will be made up of funds with broadly similar characteristics to the Fund. Where the aggregate charges as calculated by the Ongoing Charges Figure are greater than the average cost of equivalent peer group funds, consideration will be given to whether it would be appropriate to adjust the FMF.

6. Comparable Services

The Board considers whether the fees charged by the Company for the services it performs for the Fund are consistent with those fees charged by the Company and other companies within the wider Aviva Group. This gives consideration to other similar funds or services operated by the Aviva Group that are available in the UK, are of a comparable size, and are managed to similar objectives and policies to the Fund.

As stated in section 3 above, the Company undertook a thorough review of its charging mechanism across the Fund range in 2018 which resulted in the introduction of a single FMF. Part of this exercise was to ensure the fees charged by the Company were appropriate across its UK range of regulated Funds considering their relative nature, investment objectives and the services provided.

7. Classes of Units

The Board assesses whether investors hold shares in the most appropriate share class for their investment, in terms of the fees applied.

As part of the review of its charging mechanism in 2018, the Company undertook an exercise to ensure that investors were invested in the most appropriate share class. The review prompted the closure or merger of a number of share classes, along with the amendment of some minimum investment limits and share class eligibility criteria, and the removal of trail commission to advisers. This resulted in some investors being moved into alternative share classes that either had fees of an equivalent level, or lower than they had been paying previously where an appropriate share class was available.

In addition, the Company operates a process to identify any investors who would be eligible for a share class with lower fees. If any such investors are identified, steps are taken to move them into that share class if possible.

Other factors may be considered by the Company in determining the conclusion of the value assessment, as deemed appropriate by the Board. If such other factors are considered, details will be provided in the value assessment report for the relevant Fund.

VALUE ASSESSMENT REPORTS

AVIVA INVESTORS UK INDEX TRACKING FUND (THE “FUND”)

In line with the requirement to conduct an assessment of value, the following summarises the conclusions reached by the Company's board of directors ('the Board') having considered the range of factors as set out in the 'Value Assessment Approach' (see the preceding pages of this Report) which describes how we carry out the value assessment. This applies to all share classes in the Fund unless we have specifically noted share class exceptions.

1. Quality of Service

The range, nature, extent and quality of the services provided to investors has been assessed and the Fund's operating model was considered to be working effectively over the period. Investors received clear communications and relevant information at appropriate times to enable them to make informed decisions regarding their investment, and the service delivered has been timely and of an appropriate quality.

2. Performance

The Fund's overall performance after charges, relative to its investment objectives, policy and strategy was deemed to be within a reasonable range of outcomes based on the various time periods reviewed and the information considered in the assessment. A detailed explanation of the last 12 months performance is included in the Fund Manager's Report included in this Report and Accounts.

3. AFM Costs and Charges

The Fund Management Fee (FMF) is the single charge paid to the Authorised Fund Manager and although it is considered to be reasonable when taking into account the underlying costs for the services provided and the performance objectives set for the Fund, we will be making changes to the FMF as detailed in the assessment conclusion below.

4. Economies of Scale

The specific benefits derived from economies of scale are returned to investors in various ways including through the FMF review process as referred to in the Value Assessment Approach. The Board concluded that all investors participated appropriately in the general economies of scale derived from investing with the Company based on a range of benefits and services provided and the overall fees charged. There has not been a material change in the size of the Fund during the previous 12 months and as such no additional savings have been identified.

5. Comparable Market Rates

The fees paid for each of the services provided to the Fund (internal or externally) were reviewed, and as a result of the ongoing exercise that the Company undertakes to benchmark fees against equivalent funds run by other firms, a decision has been taken to lower the fees charged in order to provide greater value for investors. Further details can be found in the assessment conclusion below.

6. Comparable Services

On the basis of the available information and the comparable services considered, the fees were deemed to be reasonable compared to the fees charged by associated companies within the Aviva Group for any comparable products of an equivalent size and with a similar investment objective and policy to the Fund.

7. Classes of Units

The pricing of each Share Class of the Fund is considered to be reasonable based on the different Share Class eligibility criteria and target investor for each Share Class. All investors are invested appropriately in the Share Class they are eligible to hold in the Fund at the date of the assessment.

OVERALL ASSESSMENT CONCLUSION

In conclusion, the Board confirms all components of the assessment have been considered and the charges for each of the Share Classes are justified in the context of overall value being delivered to investors. This conclusion takes into account the decision to lower the FMFs for Share Classes 1, 2 and 3 on 1 April 2020, due to the market rates benchmarking exercise which has been undertaken.

The fee reductions will be as follows;

Share Class 1 – FMF will be reduced from 0.48% to 0.41%

Share Class 2 – FMF will be reduced from 0.23% to 0.20%

Share Class 3 – FMF will be reduced from 0.23% to 0.20%

Past performance is not a guide to the future. The value of an investment and any income from it can go down as well as up. Investors may not get back the original amount invested.

VALUE ASSESSMENT REPORTS (CONTINUED)

AVIVA INVESTORS UK LISTED EQUITY INCOME FUND (THE "FUND")

In line with the requirement to conduct an assessment of value, the following summarises the conclusions reached by the Company's board of directors ('the Board') having considered the range of factors as set out in the 'Value Assessment Approach' (see the preceding pages of this Report) which describes how we carry out the value assessment. This applies to all share classes in the Fund unless we have specifically noted share class exceptions.

1. Quality of Service

The range, nature, extent and quality of the services provided to investors has been assessed and the Fund's operating model was considered to be working effectively over the period. Investors received clear communications and relevant information at appropriate times to enable them to make informed decisions regarding their investment, and the service delivered has been timely and of an appropriate quality.

2. Performance

The Fund's overall performance after charges, relative to its investment objectives, policy and strategy was deemed to be within a reasonable range of outcomes based on the various time periods reviewed and the information considered in the assessment. A detailed explanation of the last 12 months performance is included in the Fund Manager's Report included in this Report and Accounts.

3. AFM Costs and Charges

The Fund Management Fee (FMF) is the single charge paid to the Authorised Fund Manager and is considered to be reasonable when taking into account the underlying costs for the services provided and the performance objectives set for the Fund.

4. Economies of Scale

The specific benefits derived from economies of scale are returned to investors in various ways including through the FMF review process as referred to in the Value Assessment Approach. The Board concluded that all investors participated appropriately in the general economies of scale derived from investing with the Company based on a range of benefits and services provided and the overall fees charged. There has not been a material change in the size of the Fund during the previous 12 months, and as such no additional savings have been identified.

5. Comparable Market Rates

The fees paid for each of the services provided to the Fund (internally or externally) were considered to be competitive relative to those charged by similar competitor funds within the UK regulated funds market.

6. Comparable Services

On the basis of the available information and the comparable services considered, the fees were deemed to be reasonable compared to the fees charged by associated companies within the Aviva Group for any comparable products available in the UK of an equivalent size and with a similar investment objective and policy to the Fund.

7. Classes of Units

The pricing of each Share Class of the Fund is considered to be reasonable based on the different Share Class eligibility criteria and target investor for each Share Class. All investors are invested appropriately in the Share Class they are eligible to hold in the Fund at the date of the assessment.

OVERALL ASSESSMENT CONCLUSION

In conclusion, the Board confirms all components of the assessment have been considered and the charges for each of the Share Classes are justified in the context of overall value being delivered to investors.

Past performance is not a guide to the future. The value of an investment and any income from it can go down as well as up. Investors may not get back the original amount invested.

VALUE ASSESSMENT REPORTS (CONTINUED)

AVIVA INVESTORS UK LISTED EQUITY UNCONSTRAINED FUND (THE “FUND”)

In line with the requirement to conduct an assessment of value, the following summarises the conclusions reached by the Company's board of directors ('the Board') having considered the range of factors as set out in the 'Value Assessment Approach' (see the preceding pages of this Report) which describes how we carry out the value assessment. This applies to all share classes in the Fund unless we have specifically noted share class exceptions.

1. Quality of Service

The range, nature, extent and quality of the services provided to investors has been assessed and the Fund's operating model was considered to be working effectively over the period. Investors received clear communications and relevant information at appropriate times to enable them to make informed decisions regarding their investment, and the service delivered has been timely and of an appropriate quality.

2. Performance

The Fund's overall performance, relative to its investment objectives, policy and strategy, was at the lower end of the range of expected outcomes for an actively managed fund over the last 3 years. However the Fund had performed well over longer time periods, which aligns with the Fund's stated objective, and how we believe investment performance should be judged.

The Fund aims to grow your investment through a combination of capital growth and income over the long term (5 years or more) by investing in shares of UK companies.

Despite the challenging 12 months to 15 October 2019, the value of the Fund has increased over the last 5 years at an average annual rate of 7.25% (net of fees)*, which compares favourably with other similar Funds in its peer group.

The Board acknowledged that following the appointment of a new Chief Investment Officer for the Equities team in 2018, there has been a significant investment in the resources and processes dedicated to the investment management and research capabilities of the Fund during 2019. A new clearly defined investment philosophy has been implemented, with the aim of improving the relative performance of the Fund. The Board therefore remains confident that the Investment Manager's continued management of this Fund is in the long term interests of investors.

A detailed explanation of the last 12 months performance is included in the Fund Manager's Report included in this Report and Accounts.

3. AFM Costs and Charges

The Fund Management Fee (FMF) is the single charge paid to the Authorised Fund Manager, and is considered to be reasonable when taking into account the underlying costs for the services provided and the performance objectives set for the Fund.

4. Economies of Scale

The specific benefits derived from economies of scale are returned to investors in various ways including through the FMF review process, as referred to in the Value Assessment Approach. The Board concluded that all investors participated appropriately in the general economies of scale derived from investing with the Company based on a range of benefits and services provided and the overall fees charged. There has been a reduction in the size of the Fund during the previous 12 months, and as such no additional savings have been identified.

5. Comparable Market Rates

The fees paid for each of the services provided to the Fund (internally or externally) were considered to be competitive relative to those charged by similar competitor funds within the UK regulated funds market.

6. Comparable Services

On the basis of the available information and the comparable services considered, the fees were deemed to be reasonable compared to the fees charged by associated companies within the Aviva Group for any comparable products which are available in the UK of an equivalent size and with a similar investment objective and policy to the Fund.

7. Classes of Units

The pricing of each Share Class of the Fund is considered to be reasonable based on the different Share Class eligibility criteria and target investor for each Share Class. All investors are invested appropriately in the Share Class they are eligible to hold in the Fund at the date of the assessment.

OVERALL ASSESSMENT CONCLUSION

In conclusion, the Board confirms all components of the assessment have been considered and the charges for each of the Share Classes are justified in the context of overall value being delivered to investors.

* Performance figures based on Share Class 1, net income reinvested, net of fees and taxes for the period specified to 15 October 2019. Past performance is not a guide for future performance, the value of your investment can go down as well as up and you may not get back the amount invested.

VALUE ASSESSMENT REPORTS (CONTINUED)

AVIVA INVESTORS UK LISTED SMALL AND MID-CAP FUND (THE "FUND")

In line with the requirement to conduct an assessment of value, the following summarises the conclusions reached by the Company's board of directors ('the Board') having considered the range of factors as set out in the 'Value Assessment Approach' (see the preceding pages of this Report) which describes how we carry out the value assessment. This applies to all share classes in the Fund unless we have specifically noted share class exceptions.

1. Quality of Service

The range, nature, extent and quality of the services provided to investors has been assessed and the Fund's operating model was considered to be working effectively over the period. Investors received clear communications and relevant information at appropriate times to enable them to make informed decisions regarding their investment, and the service delivered has been timely and of an appropriate quality.

2. Performance

The Fund's overall performance after charges, relative to its investment objectives, policy and strategy was deemed to be within a reasonable range of outcomes based on the various time periods reviewed and the information considered in the assessment. A detailed explanation of the last 12 months performance is included in the Fund Manager's Report included in this Report and Accounts.

3. AFM Costs and Charges

The Fund Management Fee (FMF) is the single charge paid to the Authorised Fund Manager and is considered to be reasonable when taking into account the underlying costs for the services provided and the performance objectives set for the Fund.

4. Economies of Scale

The specific benefits derived from economies of scale are returned to investors in various ways including through the FMF review process as referred to in the Value Assessment Approach. The Board concluded that all investors participated appropriately in the general economies of scale derived from investing with the Company based on a range of benefits and services provided and the overall fees charged. There has not been a material change in the size of the Fund during the previous 12 months, and as such no additional savings have been identified.

5. Comparable Market Rates

The fees paid for each of the services provided to the Fund (internally or externally) were considered to be competitive relative to those charged by similar competitor funds within the UK regulated funds market.

6. Comparable Services

On the basis of the available information and the comparable services considered, the fees were deemed to be reasonable compared to the fees charged by associated companies within the Aviva Group for any comparable products which are available in the UK of an equivalent size and with a similar investment objective and policy to the Fund.

7. Classes of Units

The pricing of each Share Class of the Fund is considered to be reasonable based on the different Share Class eligibility criteria and target investor for each Share Class. All investors are invested appropriately in the Share Class they are eligible to hold in the Fund at the date of the assessment.

OVERALL ASSESSMENT CONCLUSION

In conclusion, the Board confirms all components of the assessment have been considered and the charges for each of the Share Classes are justified in the context of overall value being delivered to investors.

Past performance is not a guide to the future. The value of an investment and any income from it can go down as well as up. Investors may not get back the original amount invested.

VALUE ASSESSMENT REPORTS (CONTINUED)

AVIVA INVESTORS UK SMALLER COMPANIES FUND (THE "FUND")

In line with the requirement to conduct an assessment of value, the following summarises the conclusions reached by the Company's board of directors ('the Board') having considered the range of factors as set out in the 'Value Assessment Approach' (see the preceding pages of this Report) which describes how we carry out the value assessment. This applies to all share classes in the Fund unless we have specifically noted share class exceptions.

1. Quality of Service

The range, nature, extent and quality of the services provided to investors has been assessed and the Fund's operating model was considered to be working effectively over the period. Investors received clear communications and relevant information at appropriate times to enable them to make informed decisions regarding their investment, and the service delivered has been timely and of an appropriate quality.

2. Performance

The Fund's overall performance after charges, relative to its investment objectives, policy and strategy was deemed to be within a reasonable range of outcomes based on the various time periods reviewed and the information considered in the assessment. A detailed explanation of the last 12 months performance is included in the Fund Manager's Report included in this Report and Accounts.

3. AFM Costs and Charges

The Fund Management Fee (FMF) is the single charge paid to the Authorised Fund Manager and is considered to be reasonable when taking into account the underlying costs for the services provided and the performance objectives set for the Fund.

4. Economies of Scale

The specific benefits derived from economies of scale are returned to investors in various ways including through the FMF review process as referred to in the Value Assessment Approach. The Board concluded that all investors participated appropriately in the general economies of scale derived from investing with the Company based on a range of benefits and services provided and the overall fees charged. There has been a reduction in the size of the Fund during the previous 12 months, and as such no additional savings have been identified.

5. Comparable Market Rates

The fees paid for each of the services provided to the Fund (internally or externally) were considered to be competitive relative to those charged by similar competitor funds within the UK regulated funds market.

6. Comparable Services

On the basis of the available information and the comparable services considered, the fees were deemed to be reasonable compared to the fees charged by associated companies within the Aviva Group for any comparable products which are available in the UK of an equivalent size and with a similar investment objective and policy to the Fund.

7. Classes of Units

The pricing of each Share Class of the Fund is considered to be reasonable based on the different Share Class eligibility criteria and target investor for each Share Class. All investors are invested appropriately in the Share Class they are eligible to hold in the Fund at the date of the assessment.

OVERALL ASSESSMENT CONCLUSION

In conclusion, the Board confirms all components of the assessment have been considered and the charges for each of the Share Classes are justified in the context of overall value being delivered to investors.

Past performance is not a guide to the future. The value of an investment and any income from it can go down as well as up. Investors may not get back the original amount invested.

VALUE ASSESSMENT REPORTS (CONTINUED)

AVIVA INVESTORS CONTINENTAL EUROPEAN EQUITY FUND (THE "FUND")

In line with the requirement to conduct an assessment of value, the following summarises the conclusions reached by the Company's board of directors ('the Board') having considered the range of factors as set out in the 'Value Assessment Approach' (see the preceding pages of this Report) which describes how we carry out the value assessment. This applies to all share classes in the Fund unless we have specifically noted share class exceptions.

1. Quality of Service

The range, nature, extent and quality of the services provided to investors has been assessed and the Fund's operating model was considered to be working effectively over the period. Investors received clear communications and relevant information at appropriate times to enable them to make informed decisions regarding their investment, and the service delivered has been timely and of an appropriate quality.

2. Performance

The Fund's overall performance, relative to its investment objectives, policy and strategy, was at the lower end of the range of expected outcomes for an actively managed fund over the last 3 years. However the Fund has performed well over longer time periods, which aligns with the Fund's stated objective and how we believe investment performance should be judged.

The Fund aims to grow your investment over the long term (5 years or more) by investing in shares of European companies, and despite a challenging 12 months to 15 October 2019, the value of the Fund has increased over the last 5 years at an average annual rate of 10.39% (net of fees)*, which compares favourably with other similar funds in its peer group.

The Board also acknowledged that following the appointment of a new Chief Investment Officer for the Equities team in 2018 there has been a significant investment in the resources and processes dedicated to the investment management and research capabilities of the Fund during 2019. A new, clearly defined investment philosophy has been implemented with the aim of improving the relative performance of the Fund. The Board therefore remains confident that the Investment Manager's continued management of this Fund is in the long-term interests of investors.

A detailed explanation of the last 12 months performance is included in the Fund Manager's Report included in this Report and Accounts.

3. AFM Costs and Charges

The Fund Management Fee (FMF) is the single charge paid to the Authorised Fund Manager, and is considered to be reasonable when taking into account the underlying costs for the services provided and the performance objectives set for the Fund.

4. Economies of Scale

The specific benefits derived from economies of scale are returned to investors in various ways including through the FMF review process, as referred to in the Value Assessment Approach. The Board concluded that all investors participated appropriately in the general economies of scale derived from investing with the Company based on a range of benefits and services provided and the overall fees charged. There has been a reduction in the size of the Fund during the previous 12 months, and as such no additional savings have been identified.

5. Comparable Market Rates

The fees paid for each of the services provided to the Fund (internally or externally) were considered to be competitive relative to those charged by similar competitor funds within the UK regulated funds market.

6. Comparable Services

On the basis of the available information and the comparable services considered, the fees were deemed to be reasonable compared to the fees charged by associated companies within the Aviva Group for any comparable products which are available in the UK of an equivalent size and with a similar investment objective and policy to the Fund.

7. Classes of Units

The pricing of each Share Class of the Fund is considered to be reasonable based on the different Share Class eligibility criteria and target investor for each Share Class. All investors are invested appropriately in the Share Class they are eligible to hold in the Fund at the date of the assessment.

OVERALL ASSESSMENT CONCLUSION

In conclusion, the Board confirms all components of the assessment have been considered and the charges for each of the Share Classes are justified in the context of overall value being delivered to investors.

* Performance figures based on Share Class 1, net income reinvested, net of fees and taxes for the periods specified to 15 October 2019. Past performance is not a guide for future performance, the value of your investment can go down as well as up and you may not get back the amount invested.

VALUE ASSESSMENT REPORTS (CONTINUED)

AVIVA INVESTORS CORPORATE BOND FUND (THE "FUND")

In line with the requirement to conduct an assessment of value, the following summarises the conclusions reached by the Company's board of directors ('the Board') having considered the range of factors as set out in the 'Value Assessment Approach' (see the preceding pages of this Report) which describes how we carry out the value assessment. This applies to all share classes in the Fund unless we have specifically noted share class exceptions.

1. Quality of Service

The range, nature, extent and quality of the services provided to investors has been assessed and the Fund's operating model was considered to be working effectively over the period. Investors received clear communications and relevant information at appropriate times to enable them to make informed decisions regarding their investment, and the service delivered has been timely and of an appropriate quality.

2. Performance

The Fund's overall performance, relative to its investment objectives, policy and strategy, was at the lower end of the range of expected outcomes for an actively managed fund during the periods considered by the review, which can partly be attributed to the decision to position the Fund's investments cautiously given the uncertain economic and monetary policy environment.

The Fund aims to grow your investment through a combination of income and capital returns by investing in bonds issued by companies, whilst aiming to provide a net return greater than the benchmark over the long term (5 years or more).

Although the Fund has not beaten the benchmark on a net basis over the periods under consideration, the value of the Fund has increased over the last 5 years at an average annual rate of 3.91% and returned 8.27% over the last 12 months (both net of fees and taxes)*, which given the current interest rate environment, has provided investors with an attractive positive return.

As a result, the Board is satisfied that the Fund will remain an important solution for many investors. However it is acknowledged that investors may wish to consider other funds in the range if this Fund's cautious investment philosophy does not meet their investment requirements.

A detailed explanation of the last 12 months performance is included in the Fund Manager's Report included in this Report and Accounts.

3. AFM Costs and Charges

The Fund Management Fee (FMF) is the single charge paid to the Authorised Fund Manager, and is considered to be reasonable when taking into account the underlying costs for the services provided and the performance objectives set for the Fund.

4. Economies of Scale

The specific benefits derived from economies of scale are returned to investors in various ways including through the FMF review process as referred to in the Value Assessment Approach. The Board concluded that all investors participated appropriately in the general economies of scale derived from investing with the Company based on a range of benefits and services provided and the overall fees charged. Although there has been an increase in the size of the Fund during the previous 12 months, there will not be any fee changes as a direct result of the Economies of Scale review as no material scale savings have been identified.

5. Comparable Market Rates

The fees paid for each of the services provided to the Fund (internally or externally) were considered to be competitive relative to those charged by similar competitor funds within the UK regulated funds market.

6. Comparable Services

On the basis of the available information and the comparable services considered, the fees were deemed to be reasonable compared to the fees charged by associated companies within the Aviva Group for any comparable products which are available in the UK of an equivalent size and with a similar investment objective and policy to the Fund.

7. Classes of Units

The pricing of each Share Class of the Fund is considered to be reasonable based on the different Share Class eligibility criteria and target investor for each Share Class. All investors are invested appropriately in the Share Class they are eligible to hold in the Fund at the date of the assessment.

OVERALL ASSESSMENT CONCLUSION

In conclusion, the Board confirms all components of the assessment have been considered and the charges for each of the Share Classes are justified in the context of overall value being delivered to investors.

* Performance figures based on Share Class 1, net income reinvested, net of fees and taxes for the periods specified to 15 October 2019. Past performance is not a guide for future performance, the value of your investment can go down as well as up and you may not get back the amount invested.

VALUE ASSESSMENT REPORTS (CONTINUED)

AVIVA INVESTORS DISTRIBUTION FUND (THE "FUND")

In line with the requirement to conduct an assessment of value, the following summarises the conclusions reached by the Company's board of directors ('the Board') having considered the range of factors as set out in the 'Value Assessment Approach' (see the preceding pages of this Report) which describes how we carry out the value assessment. This applies to all share classes in the Fund unless we have specifically noted share class exceptions.

1. Quality of Service

The range, nature, extent and quality of the services provided to investors has been assessed and the Fund's operating model was considered to be working effectively over the period. Investors received clear communications and relevant information at appropriate times to enable them to make informed decisions regarding their investment, and the service delivered has been timely and of an appropriate quality.

2. Performance

The Fund's overall performance after charges, relative to its investment objectives, policy and strategy was deemed to be within a reasonable range of outcomes based on the various time periods reviewed and the information considered in the assessment. A detailed explanation of the last 12 months performance is included in the Fund Manager's Report included in this Report and Accounts.

3. AFM Costs and Charges

The Fund Management Fee (FMF) is the single charge paid to the Authorised Fund Manager and is considered to be reasonable when taking into account the underlying costs for the services provided and the performance objectives set for the Fund.

4. Economies of Scale

The specific benefits derived from economies of scale are returned to investors in various ways including through the FMF review process as referred to in the Value Assessment Approach. The Board concluded that all investors participated appropriately in the general economies of scale derived from investing with the Company based on a range of benefits and services provided and the overall fees charged. There has not been a material change in the size of the Fund during the previous 12 months, and as such no additional savings have been identified.

5. Comparable Market Rates

The fees paid for each of the services provided to the Fund (internally or externally) were considered to be competitive relative to those charged by similar competitor funds within the UK regulated funds market.

6. Comparable Services

On the basis of the available information and the comparable services considered, the fees were deemed to be reasonable compared to the fees charged by associated companies within the Aviva Group for any comparable products which are available in the UK of an equivalent size and with a similar investment objective and policy to the Fund.

7. Classes of Units

The pricing of each Share Class of the Fund is considered to be reasonable based on the different Share Class eligibility criteria and target investor for each Share Class. All investors are invested appropriately in the Share Class they are eligible to hold in the Fund at the date of the assessment.

OVERALL ASSESSMENT CONCLUSION

In conclusion, the Board confirms all components of the assessment have been considered and the charges for each of the Share Classes are justified in the context of overall value being delivered to investors.

Past performance is not a guide to the future. The value of an investment and any income from it can go down as well as up. Investors may not get back the original amount invested.

VALUE ASSESSMENT REPORTS (CONTINUED)

AVIVA INVESTORS HIGH YIELD BOND FUND (THE "FUND")

In line with the requirement to conduct an assessment of value, the following summarises the conclusions reached by the Company's board of directors ('the Board') having considered the range of factors as set out in the 'Value Assessment Approach' (see the preceding pages of this Report) which describes how we carry out the value assessment. This applies to all share classes in the Fund unless we have specifically noted share class exceptions.

1. Quality of Service

The range, nature, extent and quality of the services provided to investors has been assessed and the Fund's operating model was considered to be working effectively over the period. Investors received clear communications and relevant information at appropriate times to enable them to make informed decisions regarding their investment, and the service delivered has been timely and of an appropriate quality.

2. Performance

The Fund's overall performance, relative to its investment objectives, policy and strategy, was at the lower end of the range of expected outcomes for an actively managed fund over the last 3 years, however the Fund had performed well over longer time periods.

The Fund aims to grow your investment through a combination of income and capital returns by investing in bonds issued by companies, whilst aiming to provide a net return greater than the benchmark over the long term (5 years or more).

Although the Fund hasn't achieved its objective of beating the benchmark on a net basis over the periods under consideration, the value of the Fund has increased over the last 5 years at an average annual rate of 3.88% (net of fees and taxes)*, which compares favourably with other similar funds in its peer group.

A number of changes have been made to the investment process over recent months which are designed to result in an improvement in the performance of the Fund, and as a consequence the Board considers that the Investment Manager's continued management of this Fund should still benefit the Fund and its investors.

A detailed explanation of the last 12 months performance is included in the Fund Manager's Report included in this Report and Accounts.

3. AFM Costs and Charges

The Fund Management Fee (FMF) is the single charge paid to the Authorised Fund Manager, and is considered to be reasonable when taking into account the underlying costs for the services provided and the performance objectives set for the Fund.

4. Economies of Scale

The specific benefits derived from economies of scale are returned to investors in various ways including through the FMF review process, as referred to in the Value Assessment Approach. The Board concluded that all investors participated appropriately in the general economies of scale derived from investing with the Company based on a range of benefits and services provided and the overall fees charged. There has been a reduction in the size of the Fund during the previous 12 months, and as such no additional savings have been identified.

5. Comparable Market Rates

The fees paid for each of the services provided to the Fund (internally or externally) were considered to be competitive relative to those charged by similar competitor funds within the UK regulated funds market.

6. Comparable Services

On the basis of the available information and the comparable services considered, the fees were deemed to be reasonable compared to the fees charged by associated companies within the Aviva Group for any comparable products which are available in the UK of an equivalent size and with a similar investment objective and policy to the Fund.

7. Classes of Units

The pricing of each Share Class of the Fund is considered to be reasonable based on the different Share Class eligibility criteria and target investor for each Share Class. All investors are invested appropriately in the Share Class they are eligible to hold in the Fund at the date of the assessment.

OVERALL ASSESSMENT CONCLUSION

In conclusion, the Board confirms all components of the assessment have been considered and the charges for each of the Share Classes are justified in the context of overall value being delivered to investors.

* Performance figures based on Share Class 1, net income reinvested, net of fees and taxes for the period specified to 15 October 2019. Past performance is not a guide for future performance, the value of your investment can go down as well as up and you may not get back the amount invested.

VALUE ASSESSMENT REPORTS (CONTINUED)

AVIVA INVESTORS HIGHER INCOME PLUS FUND (THE "FUND")

In line with the requirement to conduct an assessment of value, the following summarises the conclusions reached by the Company's board of directors ('the Board') having considered the range of factors as set out in the 'Value Assessment Approach' (see the preceding pages of this Report) which describes how we carry out the value assessment. This applies to all share classes in the Fund unless we have specifically noted share class exceptions.

1. Quality of Service

The range, nature, extent and quality of the services provided to investors has been assessed and the Fund's operating model was considered to be working effectively over the period. Investors received clear communications and relevant information at appropriate times to enable them to make informed decisions regarding their investment, and the service delivered has been timely and of an appropriate quality.

2. Performance

The Fund's overall performance after charges, relative to its investment objectives, policy and strategy was deemed to be within a reasonable range of outcomes based on the various time periods reviewed and the information considered in the assessment. A detailed explanation of the last 12 months performance is included in the Fund Manager's Report included in this Report and Accounts.

3. AFM Costs and Charges

The Fund Management Fee (FMF) is the single charge paid to the Authorised Fund Manager and is considered to be reasonable when taking into account the underlying costs for the services provided and the performance objectives set for the Fund.

4. Economies of Scale

The specific benefits derived from economies of scale are returned to investors in various ways including through the FMF review process as referred to in the Value Assessment Approach. The Board concluded that all investors participated appropriately in the general economies of scale derived from investing with the Company based on a range of benefits and services provided and the overall fees charged. There has not been a material change in the size of the Fund during the previous 12 months, and as such no additional savings have been identified.

5. Comparable Market Rates

The fees paid for each of the services provided to the Fund (internally or externally) were considered to be competitive relative to those charged by similar competitor funds within the UK regulated funds market.

6. Comparable Services

On the basis of the available information and the comparable services considered, the fees were deemed to be reasonable compared to the fees charged by associated companies within the Aviva Group for any comparable products which are available in the UK of an equivalent size and with a similar investment objective and policy to the Fund.

7. Classes of Units

The pricing of each Share Class of the Fund is considered to be reasonable based on the different Share Class eligibility criteria and target investor for each Share Class. All investors are invested appropriately in the Share Class they are eligible to hold in the Fund at the date of the assessment.

OVERALL ASSESSMENT CONCLUSION

In conclusion, the Board confirms all components of the assessment have been considered and the charges for each of the Share Classes are justified in the context of overall value being delivered to investors.

Past performance is not a guide to the future. The value of an investment and any income from it can go down as well as up. Investors may not get back the original amount invested.

VALUE ASSESSMENT REPORTS (CONTINUED)

AVIVA INVESTORS INTERNATIONAL INDEX TRACKING FUND (THE “FUND”)

In line with the requirement to conduct an assessment of value, the following summarises the conclusions reached by the Company's board of directors ('the Board') having considered the range of factors as set out in the 'Value Assessment Approach' (see the preceding pages of this Report) which describes how we carry out the value assessment. This applies to all share classes in the Fund unless we have specifically noted share class exceptions.

1. Quality of Service

The range, nature, extent and quality of the services provided to investors has been assessed and the Fund's operating model was considered to be working effectively over the period. Investors received clear communications and relevant information at appropriate times to enable them to make informed decisions regarding their investment, and the service delivered has been timely and of an appropriate quality.

2. Performance

The Fund's overall performance after charges, relative to its investment objectives, policy and strategy was deemed to be within a reasonable range of outcomes based on the various time periods reviewed and the information considered in the assessment. A detailed explanation of the last 12 months performance is included in the Fund Manager's Report included in this Report and Accounts.

3. AFM Costs and Charges

The Fund Management Fee (FMF) is the single charge paid to the Authorised Fund Manager and although it is considered to be reasonable when taking into account the underlying costs for the services provided and the performance objectives set for the Fund, we will be making changes to the FMF as detailed in the assessment conclusion below.

4. Economies of Scale

The specific benefits derived from economies of scale are returned to investors in various ways including through the FMF review process as referred to in the Value Assessment Approach. The Board concluded that all investors participated appropriately in the general economies of scale derived from investing with the Company based on a range of benefits and services provided and the overall fees charged. There has not been a material change in the size of the Fund during the previous 12 months, and as such no additional savings have been identified.

5. Comparable Market Rates

The fees paid for each of the services provided to the Fund (internal or externally) were reviewed, and as a result of the ongoing exercise that the Company undertakes to benchmark fees against equivalent funds run by other firms, a decision has been taken to lower the fees charged in order to provide greater value for investors. Further details can be found in the assessment conclusion below.

6. Comparable Services

On the basis of the available information and the comparable services considered, the fees were deemed to be reasonable compared to the fees charged by associated companies within the Aviva Group for any comparable products which are available in the UK of an equivalent size and with a similar investment objective and policy to the Fund.

7. Classes of Units

The pricing of each Share Class of the Fund is considered to be reasonable based on the different Share Class eligibility criteria and target investor for each Share Class. All investors are invested appropriately in the Share Class they are eligible to hold in the Fund at the date of the assessment.

OVERALL ASSESSMENT CONCLUSION

In conclusion, the Board confirms all components of the assessment have been considered and the charges for each of the Share Classes are justified in the context of overall value being delivered to investors. This conclusion has taken into account the decision to lower the FMFs for Share Classes 1, 2 and 3 on 1 April 2020, due to the market rates benchmarking exercise which has been undertaken.

The fee reductions will be as follows;

Share Class 1 – FMF will be reduced from 0.56% to 0.45%

Share Class 2 – FMF will be reduced from 0.31% to 0.25%

Share Class 3 – FMF will be reduced from 0.31% to 0.20%

Past performance is not a guide to the future. The value of an investment and any income from it can go down as well as up. Investors may not get back the original amount invested.

VALUE ASSESSMENT REPORTS (CONTINUED)

AVIVA INVESTORS GLOBAL EQUITY ENDURANCE FUND (THE “FUND”)

In line with the requirement to conduct an assessment of value, the following summarises the conclusions reached by the Company's board of directors ('the Board') having considered the range of factors as set out in the 'Value Assessment Approach' (see the preceding pages of this Report) which describes how we carry out the value assessment. This applies to all share classes in the Fund unless we have specifically noted share class exceptions.

1. Quality of Service

The range, nature, extent and quality of the services provided to investors has been assessed and the Fund's operating model was considered to be working effectively over the period. Investors received clear communications and relevant information at appropriate times to enable them to make informed decisions regarding their investment, and the service delivered has been timely and of an appropriate quality.

2. Performance

The Fund's overall performance after charges, relative to its investment objectives, policy and strategy was deemed to be within a reasonable range of outcomes based on the various time periods reviewed and the information considered in the assessment. A detailed explanation of the last 12 months performance is included in the Fund Manager's Report included in this Report and Accounts.

3. AFM Costs and Charges

The Fund Management Fee (FMF) is the single charge paid to the Authorised Fund Manager and is considered to be reasonable when taking into account the underlying costs for the services provided and the performance objectives set for the Fund. However, some cost savings have been identified that will be passed on to investors as part of the fee reductions detailed in the assessment conclusion below.

4. Economies of Scale

The specific benefits derived from economies of scale are returned to investors in various ways including through the FMF review process as referred to in the Value Assessment Approach. The Board concluded that all investors participated appropriately in the general economies of scale derived from investing with the Company based on a range of benefits and services provided and the overall fees charged. There has not been a material change in the size of the Fund during the previous 12 months, and as such no additional savings have been identified.

5. Comparable Market Rates

The fees paid for each of the services provided to the Fund (internally or externally) were considered to be competitive relative to those charged by similar competitor funds within the UK regulated funds market.

6. Comparable Services

On the basis of the available information and the comparable services considered, the fees were deemed to be reasonable compared to the fees charged by associated companies within the Aviva Group for any comparable products which are available in the UK of an equivalent size and with a similar investment objective and policy to the Fund.

7. Classes of Units

The pricing of each Share Class of the Fund is considered to be reasonable based on the different Share Class eligibility criteria and target investor for each Share Class. All investors are invested appropriately in the Share Class they are eligible to hold in the Fund at the date of the assessment.

OVERALL ASSESSMENT CONCLUSION

In conclusion, the Board confirms all components of the assessment have been considered and the charges for each of the Share Classes are justified in the context of overall value being delivered to investors. This conclusion has taken into account the decision to lower the FMF for all Share Classes by 0.05% on 1 April 2020, due to cost savings which have been identified specifically for this Fund.

Past performance is not a guide to the future. The value of an investment and any income from it can go down as well as up. Investors may not get back the original amount invested.

VALUE ASSESSMENT REPORTS (CONTINUED)

AVIVA INVESTORS GLOBAL EQUITY INCOME FUND (THE "FUND")

In line with the requirement to conduct an assessment of value, the following summarises the conclusions reached by the Company's board of directors ('the Board') having considered the range of factors as set out in the 'Value Assessment Approach' (see the preceding pages of this Report) which describes how we carry out the value assessment. This applies to all share classes in the Fund unless we have specifically noted share class exceptions.

1. Quality of Service

The range, nature, extent and quality of the services provided to investors has been assessed and the Fund's operating model was considered to be working effectively over the period. Investors received clear communications and relevant information at appropriate times to enable them to make informed decisions regarding their investment, and the service delivered has been timely and of an appropriate quality.

2. Performance

The Fund's overall performance after charges, relative to its investment objectives, policy and strategy was deemed to be within a reasonable range of outcomes based on the various time periods reviewed and the information considered in the assessment. A detailed explanation of the last 12 months performance is included in the Fund Manager's Report included in this Report and Accounts.

3. AFM Costs and Charges

The Fund Management Fee (FMF) is the single charge paid to the Authorised Fund Manager and is considered to be reasonable when taking into account the underlying costs for the services provided and the performance objectives set for the Fund. However, some cost savings have been identified that will be passed on to investors as part of the fee reductions detailed in the assessment conclusion below.

4. Economies of Scale

The specific benefits derived from economies of scale are returned to investors in various ways including through the FMF review process as referred to in the Value Assessment Approach. The Board concluded that all investors participated appropriately in the general economies of scale derived from investing with the Company based on a range of benefits and services provided and the overall fees charged. There has not been a material change in the size of the Fund during the previous 12 months, and as such no additional savings have been identified.

5. Comparable Market Rates

The fees paid for each of the services provided to the Fund (internally or externally) were considered to be competitive relative to those charged by similar competitor funds within the UK regulated funds market.

6. Comparable Services

On the basis of the available information and the comparable services considered, the fees were deemed to be reasonable compared to the fees charged by associated companies within the Aviva Group for any comparable products which are available in the UK of an equivalent size and with a similar investment objective and policy to the Fund.

7. Classes of Units

The pricing of each Share Class of the Fund is considered to be reasonable based on the different Share Class eligibility criteria and target investor for each Share Class. All investors are invested appropriately in the Share Class they are eligible to hold in the Fund at the date of the assessment.

OVERALL ASSESSMENT CONCLUSION

In conclusion, the Board confirms all components of the assessment have been considered and the charges for each of the Share Classes are justified in the context of overall value being delivered to investors. This conclusion has taken into account the decision to lower the FMF for all Share Classes by 0.05% on 1 April 2020, due to cost savings which have been identified specifically for this Fund.

Past performance is not a guide to the future. The value of an investment and any income from it can go down as well as up. Investors may not get back the original amount invested.

VALUE ASSESSMENT REPORTS (CONTINUED)

AVIVA INVESTORS GLOBAL EQUITY UNCONSTRAINED FUND (THE “FUND”)

In line with the requirement to conduct an assessment of value, the following summarises the conclusions reached by the Company's board of directors ('the Board') having considered the range of factors as set out in the 'Value Assessment Approach' (see the preceding pages of this Report) which describes how we carry out the value assessment. This applies to all share classes in the Fund unless we have specifically noted share class exceptions.

It should be noted that this Fund launched on 1 August 2019, so this assessment has been completed with limited reference data. The conclusions are, therefore, in a large part dependent upon the product feasibility assessment that was completed prior to launch which evidenced that the Fund's long term objective and fees were appropriate for a Fund with this strategy.

1. Quality of Service

The range, nature, extent and quality of the services provided to investors has been assessed and the Fund's operating model was considered to be working effectively over the period. Investors received clear communications and relevant information at appropriate times to enable them to make informed decisions regarding their investment, and the service delivered has been timely and of an appropriate quality.

2. Performance

The Fund's overall performance after charges, relative to its investment objectives, policy and strategy was deemed to be within a reasonable range of outcomes based on the period since launch, and further detailed explanation of the Funds performance is included in the Fund Manager's Report included in this Report and Accounts.

3. AFM Costs and Charges

The Fund Management Fee (FMF) is the single charge paid and is considered to be reasonable when taking into account the underlying costs for the services provided and the performance objectives set for the Fund.

4. Economies of Scale

The specific benefits derived from economies of scale are returned to investors in various ways including through the FMF review process as referred to in the Value Assessment Approach. The Board concluded that all investors participated appropriately in the general economies of scale derived from investing with the Company based on a range of benefits and services provided and the overall fees charged. As this Fund launched on 1 August 2019, the FMF has been set based on the target size of the Fund, which has not yet been reached, and therefore there are no economies of scale cost savings that have been achieved.

5. Comparable Market Rates

The fees paid for each of the services provided to the Fund (internally or externally) were considered to be competitive relative to those charged by similar competitor funds within the UK regulated funds market.

6. Comparable Services

On the basis of the available information and the comparable services considered, the fees were deemed to be reasonable compared to the fees charged by associated companies within the Aviva Group for any comparable products which are available in the UK of an equivalent size and with a similar investment objective and policy to the Fund.

7. Classes of Units

The pricing of each Share Class of the Fund is considered to be reasonable based on the different Share Class eligibility criteria and target investor for each Share Class. All investors are invested appropriately in the Share Class they are eligible to hold in the Fund at the date of the assessment.

OVERALL ASSESSMENT CONCLUSION

In conclusion, the Board confirms all components of the assessment have been considered and the charges for each of the Share Classes are justified in the context of overall value being delivered to investors.

Past performance is not a guide to the future. The value of an investment and any income from it can go down as well as up. Investors may not get back the original amount invested.

VALUE ASSESSMENT REPORTS (CONTINUED)

AVIVA INVESTORS GLOBAL EMERGING MARKETS EQUITY UNCONSTRAINED FUND (THE "FUND")

In line with the requirement to conduct an assessment of value, the following summarises the conclusions reached by the Company's board of directors ('the Board') having considered the range of factors as set out in the 'Value Assessment Approach' (see the preceding pages of this Report) which describes how we carry out the value assessment. This applies to all share classes in the Fund unless we have specifically noted share class exceptions.

It should be noted that this Fund launched on 29 July 2019, so this assessment has been completed with limited reference data. The conclusions are, therefore, in a large part dependent upon the product feasibility assessment that was completed prior to launch which evidenced that the Fund's long term objective and fees were appropriate for a Fund with this strategy.

1. Quality of Service

The range, nature, extent and quality of the services provided to investors has been assessed and the Fund's operating model was considered to be working effectively over the period. Investors received clear communications and relevant information at appropriate times to enable them to make informed decisions regarding their investment, and the service delivered has been timely and of an appropriate quality.

2. Performance

The Fund's overall performance after charges, relative to its investment objectives, policy and strategy was deemed to be within a reasonable range of outcomes based on the period since launch, and further detailed explanation of the Funds performance is included in the Fund Manager's Report included in this Report and Accounts.

3. AFM Costs and Charges

The Fund Management Fee (FMF) is the single charge paid and is considered to be reasonable when taking into account the underlying costs for the services provided and the performance objectives set for the Fund.

4. Economies of Scale

The specific benefits derived from economies of scale are returned to investors in various ways including through the FMF review process as referred to in the Value Assessment Approach. The Board concluded that all investors participated appropriately in the general economies of scale derived from investing with the Company based on a range of benefits and services provided and the overall fees charged. As this Fund launched on 29 July 2019, the FMF has been set based on the target size of the Fund, which has not yet been reached, and therefore there are no economies of scale cost savings that have been achieved.

5. Comparable Market Rates

The fees paid for each of the services provided to the Fund (internally or externally) were considered to be competitive relative to those charged by similar competitor funds within the UK regulated funds market.

6. Comparable Services

On the basis of the available information and the comparable services considered, the fees were deemed to be reasonable compared to the fees charged by associated companies within the Aviva Group for any comparable products which are available in the UK of an equivalent size and with a similar investment objective and policy to the Fund.

7. Classes of Units

The pricing of each Share Class of the Fund is considered to be reasonable based on the different Share Class eligibility criteria and target investor for each Share Class. All investors are invested appropriately in the Share Class they are eligible to hold in the Fund at the date of the assessment.

OVERALL ASSESSMENT CONCLUSION

In conclusion, the Board confirms that all components of the assessment have been considered and that the charges of each of the Share Classes are justified in the context of overall value being delivered to investors.

Past performance is not a guide to the future. The value of an investment and any income from it can go down as well as up. Investors may not get back the original amount invested.

VALUE ASSESSMENT REPORTS (CONTINUED)

AVIVA INVESTORS MANAGED HIGH INCOME FUND (THE "FUND")

In line with the requirement to conduct an assessment of value, the following summarises the conclusions reached by the Company's board of directors ('the Board') having considered the range of factors as set out in the 'Value Assessment Approach' (see the preceding pages of this Report) which describes how we carry out the value assessment. This applies to all share classes in the Fund unless we have specifically noted share class exceptions.

1. Quality of Service

The range, nature, extent and quality of the services provided to investors has been assessed and the Fund's operating model was considered to be working effectively over the period. Investors received clear communications and relevant information at appropriate times to enable them to make informed decisions regarding their investment, and the service delivered has been timely and of an appropriate quality.

2. Performance

The Fund's overall performance after charges, relative to its investment objectives, policy and strategy was deemed to be within a reasonable range of outcomes based on the various time periods reviewed and the information considered in the assessment. A detailed explanation of the last 12 months performance is included in the Fund Manager's Report included in this Report and Accounts.

3. AFM Costs and Charges

The Fund Management Fee (FMF) is the single charge paid to the Authorised Fund Manager and is considered to be reasonable when taking into account the underlying costs for the services provided and the performance objectives set for the Fund.

4. Economies of Scale

The specific benefits derived from economies of scale are returned to investors in various ways including through the FMF review process as referred to in the Value Assessment Approach. The Board concluded that all investors participated appropriately in the general economies of scale derived from investing with the Company based on a range of benefits and services provided and the overall fees charged. There has been a reduction in the size of the Fund during the previous 12 months, and as such no additional savings have been identified.

5. Comparable Market Rates

The fees paid for each of the services provided to the Fund (internally or externally) were considered to be competitive relative to those charged by similar competitor funds within the UK regulated funds market.

6. Comparable Services

On the basis of the available information and the comparable services considered, the fees were deemed to be reasonable compared to the fees charged by associated companies within the Aviva Group for any comparable products which are available in the UK of an equivalent size and with a similar investment objective and policy to the Fund.

7. Classes of Units

The pricing of each Share Class of the Fund is considered to be reasonable based on the different Share Class eligibility criteria and target investor for each Share Class. All investors are invested appropriately in the Share Class they are eligible to hold in the Fund at the date of the assessment.

OVERALL ASSESSMENT CONCLUSION

In conclusion, the Board confirms all components of the assessment have been considered and the charges for each of the Share Classes are justified in the context of overall value being delivered to investors.

Past performance is not a guide to the future. The value of an investment and any income from it can go down as well as up. Investors may not get back the original amount invested.

VALUE ASSESSMENT REPORTS (CONTINUED)

AVIVA INVESTORS MONTHLY INCOME PLUS FUND (THE "FUND")

In line with the requirement to conduct an assessment of values, the following summarises the conclusions reached by the Company's board of directors ('the Board') having considered the range of factors as set out in the 'Value Assessment Approach' (see the preceding pages of this Report) which describes how we carry out the value assessment. This applies to all share classes in the Fund unless we have specifically noted share class exceptions.

1. Quality of Service

The range, nature, extent and quality of the services provided to investors has been assessed and the Fund's operating model was considered to be working effectively over the period. Investors received clear communications and relevant information at appropriate times to enable them to make informed decisions regarding their investment, and the service delivered has been timely and of an appropriate quality.

2. Performance

The Fund's overall performance after charges, relative to its investment objectives, policy and strategy was deemed to be within a reasonable range of outcomes based on the various time periods reviewed and the information considered in the assessment. A detailed explanation of the last 12 months performance is included in the Fund Manager's Report included in this Report and Accounts.

3. AFM Costs and Charges

The Fund Management Fee (FMF) is the single charge paid to the Authorised Fund Manager and is considered to be reasonable when taking into account the underlying costs for the services provided and the performance objectives set for the Fund.

4. Economies of Scale

The specific benefits derived from economies of scale are returned to investors in various ways including through the FMF review process as referred to in the Value Assessment Approach. The Board concluded that all investors participated appropriately in the general economies of scale derived from investing with the Company based on a range of benefits and services provided and the overall fees charged. There has not been a material change in the size of the Fund during the previous 12 months, and as such no additional savings have been identified.

5. Comparable Market Rates

The fees paid for each of the services provided to the Fund (internally or externally) were reviewed, and as a result of the ongoing exercise that the Company undertakes to benchmark fees against equivalent funds run by other firms, a decision has been taken to lower some of the fees charged in order to provide greater value for investors. Further details can be found in the assessment conclusion below.

6. Comparable Services

On the basis of the available information and the comparable services considered, the fees were deemed to be reasonable compared to the fees charged by associated companies within the Aviva Group for any comparable products which are available in the UK of an equivalent size and with a similar investment objective and policy to the Fund.

7. Classes of Units

The pricing of each Share Class of the Fund is considered to be reasonable based on the different Share Class eligibility criteria and target investor for each Share Class. All investors are invested appropriately in the Share Class they are eligible to hold in the Fund at the date of the assessment.

OVERALL ASSESSMENT CONCLUSION

In conclusion, the Board confirms all components of the assessment have been considered and the charges for each of the Share Classes are justified in the context of overall value being delivered to investors. This conclusion has taken into account the decision to lower the FMF for Share Class 1 from 0.88% to 0.77% on 1 April 2020, due to the market rates benchmarking exercise which has been undertaken. The charges for all other Share Classes remain unchanged.

Past performance is not a guide to the future. The value of an investment and any income from it can go down as well as up. Investors may not get back the original amount invested.

VALUE ASSESSMENT REPORTS (CONTINUED)

AVIVA INVESTORS STRATEGIC BOND FUND (THE "FUND")

In line with the requirement to conduct an assessment of value, the following summarises the conclusions reached by the Company's board of directors ('the Board') having considered the range of factors as set out in the 'Value Assessment Approach' (see the preceding pages of this Report) which describes how we carry out the value assessment. This applies to all share classes in the Fund unless we have specifically noted share class exceptions.

1. Quality of Service

The range, nature, extent and quality of the services provided to investors has been assessed and the Fund's operating model was considered to be working effectively over the period. Investors received clear communications and relevant information at appropriate times to enable them to make informed decisions regarding their investment, and the service delivered has been timely and of an appropriate quality.

2. Performance

The Fund's overall performance, relative to its investment objectives, policy and strategy, was at the lower end of the range of expected outcomes for an actively managed fund during the periods under consideration, which can partly be attributed to the decision to position the Fund cautiously given the uncertain economic and monetary policy environment. In addition, the Fund held a number of distressed bonds which have significantly underperformed in the last 12 months. Therefore, a number of steps have been taken in recent months to enhance the credit review process, which is designed to reduce the likelihood of significant losses arising from individual default events in the future.

The Fund aims to grow your investment through a combination of income and capital returns by investing in bonds issued by companies, governments or supranational organisations, whilst aiming to provide a net return greater than the benchmark over the long term (5 years or more).

Although the Fund hasn't achieved its objective of beating the benchmark on a net basis over the periods under consideration, the value of the Fund has increased over the last 5 years at an average annual rate of 2.63% (net of fees & taxes)*, which given the current interest rate environment has provided investors with a reasonable risk adjusted return. The strategy is specifically designed with a flexible asset allocation, and the Investment Manager will judge how best to position the portfolio given the changing longer-term market outlook, which in recent periods has been tilted towards low risk assets.

As a consequence the Board considers that the Investment Manager's continued management of this Fund should still benefit the Fund and its investors.

A detailed explanation of the last 12 months performance is included in the Fund Manager's Report included in this Report and Accounts.

3. AFM Costs and Charges

The Fund Management Fee (FMF) is the single charge paid to the Authorised Fund Manager, and is considered to be reasonable when taking into account the underlying costs for the services provided and the performance objectives set for the Fund.

4. Economies of Scale

The specific benefits derived from economies of scale are returned to investors in various ways including through the FMF review process, as referred to in the Value Assessment Approach. The Board concluded that all investors participated appropriately in the general economies of scale derived from investing with the Company based on a range of benefits and services provided and the overall fees charged. There has been a reduction in the size of the Fund during the previous 12 months, and as such no additional savings have been identified.

5. Comparable Market Rates

The fees paid for each of the services provided to the Fund (internally or externally) were considered to be competitive relative to those charged by similar competitor funds within the UK regulated funds market.

6. Comparable Services

On the basis of the available information and the comparable services considered, the fees were deemed to be reasonable compared to the fees charged by associated companies within the Aviva Group for any comparable products which are available in the UK of an equivalent size and with a similar investment objective and policy to the Fund.

7. Classes of Units

The pricing of each Share Class of the Fund is considered to be reasonable based on the different Share Class eligibility criteria and target investor for each Share Class. All investors are invested appropriately in the Share Class they are eligible to hold in the Fund at the date of the assessment.

OVERALL ASSESSMENT CONCLUSION

In conclusion, the Board confirms all components of the assessment have been considered and the charges for each of the Share Classes are justified in the context of overall value being delivered to investors.

* Performance figures based on Share Class 1, net income reinvested, net of fees and taxes for the period specified to 15 October 2019. Past performance is not a guide for future performance, the value of your investment can go down as well as up and you may not get back the amount invested.

VALUE ASSESSMENT REPORTS (CONTINUED)

AVIVA INVESTORS SUSTAINABLE INCOME & GROWTH FUND (THE "FUND")

In line with the requirement to conduct an assessment of value, the following summarises the conclusions reached by the Company's board of directors ('the Board') having considered the range of factors as set out in the 'Value Assessment Approach' (see the preceding pages of this Report) which describes how we carry out the value assessment. A detailed explanation of the last 12 months performance is included in the Fund Manager's Report included in this Report and Accounts.

It should be noted that this Fund launched on 10 July 2019, so this assessment has been completed with limited reference data. The conclusions are, therefore, in a large part dependent upon the product feasibility assessment that was completed prior to launch which evidenced that the Fund's long term objective and fees are appropriate for a Fund with this strategy.

1. Quality of Service

The range, nature, extent and quality of the services provided to investors has been assessed and the Fund's operating model was considered to be working effectively over the period. Investors received clear communications and relevant information at appropriate times to enable them to make informed decisions regarding their investment, and the service delivered has been timely and of an appropriate quality.

2. Performance

The Fund's overall performance after charges, relative to its investment objectives, policy and strategy was deemed to be within a reasonable range of outcomes based on the period since launch, and further detailed explanation of the Funds performance is included in the Fund Manager's Report included in this Report and Accounts.

3. AFM Costs and Charges

The Fund Management Fee (FMF) is the single charge paid and is considered to be reasonable when taking into account the underlying costs for the services provided and the performance objectives set for the Fund.

4. Economies of Scale

The specific benefits derived from economies of scale are returned to investors in various ways including through the FMF review process as referred to in the Value Assessment Approach. The Board concluded that all investors participated appropriately in the general economies of scale derived from investing with the Company based on a range of benefits and services provided and the overall fees charged. As this Fund launched on 10 July 2019, the FMF has been set based on the target size of the Fund, which has not yet been reached, and therefore there are no economies of scale cost savings that have been achieved.

5. Comparable Market Rates

The fees paid for each of the services provided to the Fund (internally or externally) were considered to be competitive relative to those charged by similar competitor funds within the UK regulated funds market.

6. Comparable Services

On the basis of the available information and the comparable services considered, the fees were deemed to be reasonable compared to the fees charged by associated companies within the Aviva Group for any comparable products which are available in the UK of an equivalent size and with a similar investment objective and policy to the Fund.

7. Classes of Units

The pricing of each Share Class of the Fund is considered to be reasonable based on the different Share Class eligibility criteria and target investor for each Share Class. All investors are invested appropriately in the Share Class they are eligible to hold in the Fund at the date of the assessment.

OVERALL ASSESSMENT CONCLUSION

In conclusion, the Board confirms all components of the assessment have been considered and the charges for each of the Share Classes are justified in the context of overall value being delivered to investors.

Past performance is not a guide to the future. The value of an investment and any income from it can go down as well as up. Investors may not get back the original amount invested.

VALUE ASSESSMENT REPORTS (CONTINUED)

AVIVA INVESTORS MULTI-STRATEGY TARGET RETURN FUND (THE "FUND")

In line with the requirement to conduct an assessment of value, the following summarises the conclusions reached by the Company's board of directors ('the Board') having considered the range of factors as set out in the 'Value Assessment Approach' (see the preceding pages of this Report) which describes how we carry out the value assessment. A detailed explanation of the last 12 months performance is included in the Fund Manager's Report included in this Report and Accounts.

1. Quality of Service

The range, nature, extent and quality of the services provided to investors has been assessed and the Fund's operating model was considered to be working effectively over the period. Investors received clear communications and relevant information at appropriate times to enable them to make informed decisions regarding their investment, and the service delivered has been timely and of an appropriate quality.

2. Performance

The Fund's overall performance, relative to its investment objectives, policy and strategy, was at the lower end of the range of expected outcomes over the time periods considered by the review.

The Board acknowledged that the Investment Manager has made changes to the investment personnel, with greater day to day involvement from senior staff in investment decisions, and improvements to the investment process, which has resulted in an improvement in the Fund's performance as described below.

The Fund aims to deliver on average 5% per year above the Bank of England base rate before the deduction of charges over rolling three-year periods ('Return Target') whilst aiming to manage volatility to a target of less than half the volatility of global equities measured over the same rolling three year periods ('Volatility Target').

Although the Fund has not achieved the Return Target element of this objective, there has been some improvement in the Fund's performance - both since launch and in the more recent period, and is successfully delivering against its Volatility Target over all periods.

- There have been a number of successful periods of performance relative to its Return Target since launch, including in 2019, which as at 15 October 2019 has returned 8% (net of charges and taxes)*, recovering the losses incurred at the end of 2018.
- The Fund has achieved its Volatility Target since launch, by remaining below the target of half the volatility of global equities.
- As a diversification of risk against the broader markets the Fund has been successful in remaining fairly unconnected to the returns and volatility of the wider market, with the exception of the significant negative performance experienced by the Fund at the end of 2018.

A further key consideration is that the Fund's direct peer group, which is made up of funds with broadly similar characteristics to the Fund, have also struggled to deliver their targeted performance during recent periods, indicating that market conditions have been challenging during these periods for this type of Fund.

As a consequence the Board considers that the Investment Manager's continued management should still benefit the Fund and its investors.

A detailed explanation of the last 12 months performance is included in the Fund Manager's Report included in this Report and Accounts.

3. AFM Costs and Charges

The Fund Management Fee (FMF) is the single charge paid to the Authorised Fund Manager, and is considered to be reasonable when taking into account the underlying costs for the services provided and the performance objectives set for the Fund.

4. Economies of Scale

The specific benefits derived from economies of scale are returned to investors in various ways including through the FMF review process, as referred to in the Value Assessment Approach. The Board concluded that all investors participated appropriately in the general economies of scale derived from investing with the Company based on a range of benefits and services provided and the overall fees charged. There has been a reduction in the size of the Fund during the previous 12 months, and as such no additional savings have been identified.

5. Comparable Market Rates

The fees paid for each of the services provided to the Fund (internally or externally) were considered to be competitive relative to those charged by similar competitor funds within the UK regulated funds market.

6. Comparable Services

On the basis of the available information and the comparable services considered, the fees were deemed to be reasonable compared to the fees charged by associated companies within the Aviva Group for any comparable products which are available in the UK of an equivalent size and with a similar investment objective and policy to the Fund.

7. Classes of Units

The pricing of each Share Class of the Fund is considered to be reasonable based on the different Share Class eligibility criteria and target investor for each Share Class. All investors are invested appropriately in the Share Class they are eligible to hold in the Fund at the date of the assessment.

OVERALL ASSESSMENT CONCLUSION

In conclusion, the Board confirms all components of the assessment have been considered and the charges for each of the Share Classes are justified in the context of overall value being delivered to investors.

* Performance figures based on Share Class 1, net income reinvested, net of fees and taxes for the period specified to 15 October 2019. Past performance is not a guide for future performance, the value of your investment can go down as well as up and you may not get back the amount invested.
