REPORT OF THE AUTHORISED CORPORATE DIRECTOR

THE COMPANY

Aviva Investors Portfolio Funds ICVC ("the Company") is an Open-Ended Investment Company (OEIC) with variable capital incorporated in England and Wales on 5 March 2007. The property of the Company is entrusted to J.P. Morgan Europe Limited ("the Depositary"). The shareholders are not liable for any debts of the Company.

The object of the Company is to invest the Scheme Property in transferable securities, money market instruments, cash and near cash, units in collective investment schemes, deposits, derivatives and forward transactions, immovable property and gold in accordance with the COLL Sourcebook (which may include stock lending, borrowing, cash holdings, hedging and using other investment techniques permitted in the COLL Sourcebook) with the aim of spreading investment risk and giving its Shareholders the benefit of the results of the management of that property.

The Company has an umbrella structure which means that it contains many sub-funds ("Funds"), each with a different investment objective. In the financial statements you will find an investment review for each Fund which includes details of the investment objectives. There are currently eight Funds in the Aviva Investors Portfolio Funds ICVC.

AUTHORISED STATUS

From 5 March 2007 the Company was authorised as an Open-Ended Investment Company under Regulation 12 of the Open-Ended Investment Companies Regulations 2001 ("Regulations").

The Company is authorised to operate as a "Non-UCITS Retail Scheme" for the purposes of the COLL Sourcebook and as an Alternative Investment Fund ("AIF") for the purposes of the FUND Sourcebook. These sourcebooks form part of the regulatory handbook issued by the Financial Conduct Authority ("FCA").

THE FINANCIAL STATEMENTS

We are pleased to present the annual financial statements of the Company for the year ended 28 February 2019. As required by the Regulations, information for each of the Funds has also been included in these financial statements. On the following pages we review the performance of each of those Funds during the year. We hope that you find our review useful and informative.

ANNUAL GENERAL MEETINGS

The Company will not be holding any Annual General Meetings.

SIGNIFICANT INFORMATION

On 11 May 2018, the Prospectus was amended to include wording setting out for investors the circumstances in which unclaimed client money will be paid to charity in accordance with the FCA's rules.

On 4 June 2018, we made a number of changes to our entire fund range, including the Funds of the Company. This resulted in us replacing a variety of separate fees, costs and expenses of operating and administering our funds with a simple single fee called the "Fund Management Fee" or "FMF". In connection with this, we also lowered fees on a large number of our funds and reduced entry charges to zero on all but one of our funds. We also renamed certain share classes of certain funds and closed other share classes and moved any investors into an alternative share class of the same fund. The review of a Fund notes if it was affected by such a share class merger or renaming.

On 1 December 2018, the Depositary, Citibank Europe plc, UK Branch, was replaced by J.P. Morgan Europe Limited. J.P. Morgan Europe Limited is registered at 25 Bank Street, Canary Wharf, London E14 5JP. J.P. Morgan Europe Limited is authorised and regulated by the Financial Conduct Authority.

Remuneration

In line with the requirements of the Undertakings for Collective Investment in Transferable Securities Directive V ("UCITS V"), Aviva Investors UK Fund Services Limited ("AIUKFSL") is subject to a remuneration policy which is consistent with the principles outlined in the European Securities and Markets Authority guidelines on sound remuneration policies under the UCITS Directive.

Aviva Investors' remuneration framework is based on a total reward approach and is designed to reflect the success or failure against a range of personal and company performance objectives. There are four components of pay: base salary; annual bonus (including deferred bonus); long term incentive plan; and benefits. Aviva believes in rewarding strong performance and the achievement of our business and individual goals; however, the manner in which these goals are achieved is also an important factor in determining outcomes. Annual bonus awards are discretionary and where bonuses are £75,000 and over, a 3 year deferral with pro-rata vesting in Aviva Investors funds and/or Aviva Group plc shares occurs.

The extent to which each aspect of performance affects the overall payment level depends on the role and responsibilities of the individual. Performance is measured against personal objectives, including Risk and Control objectives, as well as Aviva Investors' and the business unit's performance against agreed targets, a combination of individual, business unit, Aviva Investors and Group performance over an appropriate period.

- The financial considerations include the following comparisons:
 - Actual results vs. prior period results
 - Actual results vs. agreed plans
 - Actual results relative to competitors
 - Actual results vs., and progress towards, our long-term target ambition.

REPORT OF THE AUTHORISED CORPORATE DIRECTOR (CONTINUED)

Remuneration (continued)

- The non-financial considerations include risk, conduct, culture, customer and employee engagement metrics, with Aviva values clearly underpinning all our decisions. In certain roles, adherence to Responsible Investment and ESG principles will also be a consideration.
- The Performance assessment does not encourage risk taking outside the Aviva Investors stated risk appetite, and includes mechanisms by which performance against risk and conduct related measures has a significant impact on the availability and size of business and individual variable awards.

The remuneration policies are designed to ensure that any relevant conflicts of interest can be managed appropriately at all times and that the remuneration of its senior staff is in line with the risk policies and objectives of the UCITS funds it manages, and takes into account the promotion of sound and effective risk management and the achievement of fair outcomes for all customers.

AIUKFSL has no employees but is a wholly owned subsidiary of Aviva Investors Holdings Limited. For the year to 31 December 2018, apportioned remuneration based on the time assessed to be spent on AIUKFSL UCITS activity paid by Aviva Plc, the ultimate parent of AIUKFSL, to its senior management team, and staff whose actions have a material impact on the risk profile of AIUKFSL ("Code staff"), is as follows:

	Senior Management	Other Code Staff
Total Remuneration:	£0.36m	£0.38m
Of which, Fixed Remuneration	34%	39%
Variable Remuneration	60%	54%
Pension/Benefits	6%	7%
Number of Code staff:	10	7

STATEMENT OF CROSS HOLDINGS

There are no cross holdings as at 28 February 2019.

POLICIES AND RISKS

ACCOUNTING POLICIES

a Basis of accounting

The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Practice for UK Authorised Funds issued by The Investment Management Association (now the 'The Investment Association') in May 2014 (SORP 2014), and in accordance with United Kingdom Generally Accepted Accounting Practice as defined within FRS 102, the Financial Reporting Standard applicable in the UK and Republic of Ireland. Both of which became effective for the accounting periods commencing 1 January 2015.

All of the Funds have been prepared on a going concern basis.

b Share classes

The Funds have three types of share classes; retail shares (class 1), institutional shares (class 2) and shares held by associated undertakings of Aviva Plc (classes 3 and 9). Each class bears different charges and consequently the level of revenue allocated to each share class will differ. Some share classes consist of either accumulation or income shares, whilst others consist of both accumulation and income shares.

For the five Multi-Asset Funds, for all share classes excluding share class 9, the total Fund Management Fee, borne by each share class is currently capped at 0.25%. For share class 9 of the five Multi-Asset Funds, the total of all charges (direct and synthetic) is capped at the Fund Management Fee (0.35%).

c Recognition of revenue

Revenue received and accumulated from Collective Investment Schemes (CIS) is recognised when the CIS is quoted ex-dividend. Revenue received from offshore CIS is recognised when the CIS is quoted ex-dividend. Any excess reportable income notified after the accounting year end date of the offshore CIS is recognised when the notification is received.

Management fee rebates from CIS are accrued daily and are recognised as revenue or capital according to the treatment of the expense in the underlying CIS.

Interest on debt securities and bank deposits is recognised on an accruals basis. In the case of debt securities, any difference between acquisition cost and maturity value is recognised as revenue over the life of the security using the effective yield basis of calculating amortisation.

Revenue received from investing in Aviva Investors Tax Transparent Funds (TTFs) is accounted for daily on a look-through basis and is recognised as per the same classification as in the underlying TTF.

d Treatment of derivatives

In determining the accounting treatment for derivatives, consideration is given to the instrument itself and the Funds' objectives for investment in derivative instruments.

Where positions are held to protect capital, the returns are treated as capital. Where positions are held to generate revenue, the returns are treated as revenue. Where positions generate total returns, these returns are apportioned between capital and revenue to reflect the nature of the transaction.

e Dilution Levy Policy

The Company reserves the right to charge a dilution levy (Investor Protection Fee) to protect existing investors in a fund from the costs of buying or selling investments that may result from the sale and/or purchase of shares in that fund. The amount of any such dilution levy is calculated by reference to the estimated costs of dealing in the underlying investments, including any dealing spreads, broker commissions and taxes. When the Company impose a dilution levy on a particular investor or group of investors, this is paid into the Fund and helps to protect existing investors from the costs of the resultant transactions. For details of the circumstances in which a dilution levy may be imposed, dilution levies applied in a fund historically, and on what values, please see that fund's Prospectus.

f Basis of valuation of investments

Quoted investments

The quoted investments of the Company have been valued at bid value at 9am on the last working day of the accounting period for the three Multi-Manager Funds and at 2pm for the five Multi-Asset Funds.

Unquoted and unapproved investments

The unquoted and unapproved investments of the Company have been valued by the Investment Manager using available information, such as recent transaction prices, valuations from reliable sources, financial performance and other relevant factors, to arrive at an estimated fair value.

Suspended securities

Suspended securities have been valued at the suspended market price per share or valued by the Investment Manager using available information to arrive at an estimated fair value.

Delisted securities

Delisted securities have been valued by the Investment Manager using available information to arrive at an estimated fair value.

Forward foreign currency contracts

The Company's forward foreign currency positions on the last working day of the accounting period are included in the portfolio statement as an asset or liability so as to reflect the value of each contract.

Over the counter (OTC) derivatives

OTC derivatives are either valued by the relevant counterparty or by the investment manager using available information to arrive at an estimated fair value.

Exchange traded derivatives (ETDs)

ETDs are included at the aggregate unrealised market value of the open contracts.

CIS investments

CIS investments are valued at the last sale price available at the valuation point.

Investments into Tax Transparent Funds (TTF)

Where a fund invests into Tax Transparent Funds (TTF), for example multi-asset funds the valuation will be on a look through basis or a mirror set of Unit Class accounts to provide the transparency to the ultimate Investor Beneficial Owner (UBO), the Fund. The Fund Accounting book of record is the Golden source of the data – this reflects the Fund's externally audited financial book of record and for the Investors the Price the Fund can buy or sell units as well as the source for their share of the Fund's net assets and Taxable income and expenses.

POLICIES AND RISKS (CONTINUED)

ACCOUNTING POLICIES (CONTINUED)

g Exchange rates

Assets and liabilities held in foreign currencies are translated at the rate ruling at 9am on the last working day of the accounting period for the three Multi-Manager Funds and at 2pm for the five Multi-Asset Funds. Revenue and expenditure items are translated at the rate ruling at the date of transaction.

h Taxation and deferred taxation

Provision for Corporation Tax is based at the current rate, as appropriate, on the excess of taxable revenue over allowable expenses, with relief for overseas taxation taken as appropriate. Deferred taxation is provided using the liability method on all timing differences that have originated but not reversed at the balance sheet date, calculated at the rate for the period in which it is anticipated the timing differences will reverse, based on rates that have been enacted or substantially enacted at the balance sheet date. Deferred tax assets are recognised only when, on the basis of available evidence, it is more likely than not that there will be taxable profits in the future against which the deferred tax asset can be offset.

i Cash equivalents

In accordance with the AIFMD requirements, the Fund has treated some investments in the Portfolio Statement as Cash equivalents for the purposes of the Balance Sheet disclosure. Investments are regarded as Cash equivalents if they meet all of the following criteria:

- highly liquid investments held in sterling that are readily convertible to a known amount of cash;
- are subject to an insignificant risk of change in value; and
- provide a return no greater than the rate of a three month high quality government bond.

k Unclaimed distributions

Any distribution remaining unclaimed after a period of six years is paid back to the relevant Fund and forms part of the capital property of the Fund.

DISTRIBUTION POLICIES

a Distribution policy

Where appropriate the Company will pay any surplus revenue as a revenue distribution or accumulation to capital. None of the Funds were more than 60% invested in qualifying investments and so have proposed dividend distributions. Full details are set out in the distribution tables.

b Treatment of management expenses

All expenses, except those relating to the purchase and sale of investments and transaction charges are charged to the revenue property of the respective Funds, on an accruals basis.

c Treatment of equalisation from underlying CIS

Equalisation received as part of the revenue from CIS is deducted from the cost of the investment.

FINANCIAL INSTRUMENTS

The Company's financial instruments, other than derivatives, comprise securities and other investments, cash balances and debtors and creditors that arise directly from its operations, for example, in respect of sales and purchases awaiting settlement, amounts receivable for issue of shares and payable for cancellation of shares, and debtors for accrued revenue.

Whilst certain Funds of the Company have the investment powers to invest in derivatives for investment, efficient portfolio management and hedging purposes, currently all Funds only use derivatives for hedging and efficient portfolio management. The Company enters into derivative transactions in the form of forward foreign currency contracts and stock index futures. Forward foreign currency contracts are used to manage currency risk arising from holdings of overseas securities. Stock index futures are used to manage market risk arising from the time lag between funds being receivable or payable by the Company and investment or disinvestment in underlying securities.

In accordance with requirements set out in the Collective Investment Schemes Sourcebook (COLL) of the Financial Conduct Authority, such scheme transactions must be economically appropriate, any exposure must be fully covered and the transactions must be entered into with the aim of reducing risk and/or costs and/or generating additional capital or revenue for the scheme with no, or an acceptably low level of risk. The derivatives transactions the Company enters into are not permitted if their purpose could reasonably be regarded as speculative. The Company's use of financial instruments satisfies these requirements and no trading for investment purposes in derivatives is undertaken.

There have been no changes to the Risk Management systems during the period. There have been no breaches to the relevant risk.

The Company has exposure to a number of different risks to varying degrees. The main risks it faces from its financial instruments and the Manager's policies for managing these risks are summarised below:

a Foreign currency risk

The Funds can be exposed to foreign currency risk as a result of investing in assets denominated in currencies other than Sterling. Where the Manager deems it necessary, this exposure to foreign currency fluctuations is mitigated by the use of forward foreign currency contracts. Where significant, numerical disclosures can be found in the notes to the financial statements for each Fund.

POLICIES AND RISKS (CONTINUED)

FINANCIAL INSTRUMENTS (CONTINUED)

b Interest rate risk

The value of debt securities may be affected by interest rate movements or the expectation of such movements in the future. Interest receivable on bank deposits or payable on bank overdraft positions will be affected by fluctuations in interest rates. The Manager manages this risk by maintaining a balanced portfolio with due consideration to interest rate and redemption profiles. Interest rate risk is also managed by ensuring that deposits mature within a relatively short period. Where exposure is significant, numerical disclosures can be found in the notes to the financial statements for each Fund.

c Market risk

The Funds' investment portfolios are exposed to market price fluctuations which are monitored by the Manager in pursuance of the investment objectives and policies of the Funds. Adherence to investment and borrowing powers set out in the Instrument of Incorporation and in the Collective Investment Schemes Sourcebook of the Financial Conduct Authority mitigates the risk of excessive exposure to any particular type of security or issuer. Further information on the investment portfolios is set out in the investment reports and portfolio statements, of the individual Funds.

d Credit risk

The Funds restrict their exposure to credit losses on derivative instruments by trading via International Swaps and Derivatives Association (ISDA) Master Agreements with each counterparty.

e Liquidity risk

This is the risk that there is insufficient liquidity which restricts a Fund's investment opportunities or ability to pay liabilities at short notice. This risk is managed by ensuring that overdrafts are monitored and maintained within investment limits and exposure to unquoted or illiquid securities is limited. The majority of each Fund's liabilities relate to liabilities to shareholders and, as such, liquidity risk is not considered significant.

f Counterparty Risk

There is a risk that the Counterparty will not be able to settle its obligations under the agreement. This is mitigated by an assessment of the credit worthiness of the Counterparty, and the use of multiple counterparties to ensure that no more than 20% of the Fund value is exposed to one counterparty.

The Funds' current and potential risks are assessed through a quantitative and qualitative process known as IMMMR (Identify Measure Manage Monitor and Report). This process incorporates the following measures: Tracking Error, Volatility, VaR, leverage (Gross/Netted), Geographic Concentration, Covenant Scores (Cove Lite), Duration, Spread Duration, Number of Days to Liquidate (Aviva Proprietary Model), Monthly Trading as % of NAV, % NAV Cash, Curve Positions (Steepener/Flattener/Butterfly).

The Policy covers all the measurements which are available to monitor the risks to the Funds

Further information on the investment portfolio is set out in the investment reports and portfolio statements.

AVIVA INVESTORS MULTI-MANAGER FLEXIBLE FUND

INVESTMENT OBJECTIVE

The Fund aims to provide long term capital growth by investing in other eligible Collective Investment Schemes (the Target Funds).

INVESTMENT POLICY

Investment will be made in shares or units of the Target Funds, which invest in any geographical area or industry sector. Investments may also be made in derivatives for hedging purposes. The Fund will normally be invested in Target Funds whose objectives are equity investment. The Target Funds may however also invest in bonds, property securities, and money market instruments.

FUND MANAGER'S REPORT

Performance

Over the twelve months ended 28 February 2019, the Fund returned -2.56% (net of fees). The Fund's Investment Association peer group returned -1.03% over the same period.

Review

Growth assets struggled to make headway as investors downgraded their economic and corporate earnings outlooks for 2019. Specifically, there were some concerns over how the global economy will respond to tighter policy settings in the US – interest rates were raised four times during 2018, adding to the four hikes from the prior year. The introduction of tariffs on goods imported into the US also affected sentiment towards growth assets. Investors suggested this could dampen global trade volumes and, in turn, affect profitability among global manufacturers. Collectively, growth assets sold off quite sharply in late 2018 although a rebound in early 2019 saw the Fund recover most of its earlier lost ground.

A smaller allocation to defensive and uncorrelated assets is held. These investments performed rather better than equity markets and provided effective diversification during a challenging period for growth assets. Bond yields were quite volatile during the year, initially rising to multi-year highs before turning lower towards the end of the year. The reversal reflected a change in commentary from the Federal Reserve, which surprised markets by announcing an intended pause in its monetary policy tightening process.

Outlook

The pace of global growth is expected to moderate in 2019, but appears likely to remain above trend. At the same time, major central banks are expected to tighten policy, but perhaps less than initially expected last year. Growth assets should be able to make positive progress against this background, while more subdued returns are anticipated from defensive assets. Valuations continue to be monitored closely, with a view of amending portfolio positioning when opportunities are identified and where relative value emerges.

March 2019

* Fund performance figures – share class 1, source Lipper, net of fees, net income reinvested in GBP, as at 28 February 2019.

As noted above, the performance figures in this commentary have been sourced from an external party and are based on published prices. The performance figures quoted in the comparative tables on page 10 are based on the net asset value per the published accounts and may be different due to post year end accounting adjustments.

Any opinions expressed are those of the Fund manager. They should not be viewed as a guarantee of a return from an investment in the Funds. The content of the commentary should not be viewed as a recommendation to invest nor buy or sell any securities. Past performance is not a guide to the future. The value of a fund and the income from it may go down as well as up, and the investor may not get back the original amount invested.

Synthetic Risk and Reward Indicator

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at www.avivainvestors.com or from the ACD on request.

Class 1	1.81%**	2.23%
Class 2	1.56%	1.48%
Class 3	1.31%	1.23%

* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the year. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme. The OCF includes a synthetic charge of 0.66% (28.02.18: 0.58%) in respect of the underlying investments.

** Following the update to the Prospectus and the change in charging structure of the Fund part way through the period, the ongoing charges figure has been based on the revised fee structure and therefore is not on an ex-post basis.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

5 Taxation**a Analysis of tax charge**

	Year ended 28.02.19 £000	Year ended 28.02.18 £000
Corporation tax	–	–
Total tax for the year (see note 5b)	–	–

b Factors affecting current tax charge

The tax assessed for the year is lower (2018: lower) than the standard rate of corporation tax in the UK for an Authorised Investment Fund (20%) (2018: 20%).

The differences are explained below:

	Year ended 28.02.19 £000	Year ended 28.02.18 £000
Net revenue before taxation	519	385
Corporation tax at 20%	104	77
Effects of:		
Franked distributions not subject to corporation tax	(109)	(88)
Movement in excess management expenses	36	(227)
Overseas dividends not subject to corporation tax	(37)	(9)
Tax relief on investment manager fee rebates	6	5
Tax relief on realised gain on offshore funds	–	87
Tax relief on unrealised gain on offshore funds	–	155
Total tax for the year (see note 5a)	–	–

Authorised Investment Funds are exempt from tax on capital gains. Therefore, any capital return is not included in the above reconciliation.

c Deferred tax

There was no provision for deferred tax at the year end (2018: £nil).

After claiming relief against accrued income taxable on receipt, the Fund has unrelieved excess expenses of £1,716,625 (2018: £1,538,574*) creating a potential deferred tax asset of £343,325 (2018: £307,715*). It is unlikely that the Fund will generate taxable profits in the future to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

* Restated figures to agree to final tax computation.

Net revenue after taxation	519	385

Details of the distributions per share are set out in the distribution tables on page 22.

7 Fair value hierarchy

Valuation technique	As at 28.02.19		As at 28.02.18	
	Assets £000	Liabilities £000	Assets £000	Liabilities £000
Level 1: Quoted prices	10,494	(175)	351	(121)
Level 2: Observable market data	63,011	–	78,656	–
Total	73,505	(175)	79,007	(121)

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities.

The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority is given to unobservable inputs. Disclosure is required of the value in each category in order to give an insight into the extent to which fair value measurements are subjective.

The disclosure is split into the following categories:

Level 1: Unadjusted quoted price in an active market for an identical instrument;

Level 2: Valuation techniques using observable inputs other than quoted prices within level 1;

Level 3: Valuation techniques using unobservable inputs.

13 Related party transactions

Aviva Investors UK Fund Services Limited, Aviva Investors Global Services Limited and the Aviva group are deemed to be related parties per section 33.10 of FRS 102 as they are entities with control, joint control or significant influence over the entity.

ACD periodic charges/Fund Management Fee paid to Aviva Investors UK Fund Services Limited ("the ACD") are shown in note 4 and details of shares issued and cancelled by the ACD are shown in the statement of change in net assets attributable to shareholders. The balance due to the ACD at the year end in respect of ACD periodic charges/Fund Management Fee was £38,297 (2018: £39,093). Any balance due from the ACD in respect of issues is shown in note 8. Any balance due to the ACD in respect of cancellations is shown in note 11.

Distributions payable to the ACD and related parties of the ACD during the year amounted to £495,950 (2018: £367,004). The amount outstanding at the year end was £225,533 (2018: £19,611). Related parties of the ACD are deemed to be all companies under the control of Aviva Plc. This will include companies which hold shares in the Fund on behalf of other external investors.

Any investments managed and advised by Aviva Investors Global Services Limited or associated with the Aviva Group are identified on the portfolio statement.

The total purchases and sales on these investments during the year amounted to £22,064,197 (2018: £24,477,251) and £35,541,146 (2018: £25,035,960) respectively. The income received during the year amounted to £84,722 (2018: £94,365). The rebates from ACD during the year amounted to £51,659 (2018: £69,272).

Holdings at the year end and movements during the year are as follows:

16 Derivatives and other financial instruments

The policies applied in the management of financial instruments are set out on pages 7 and 8.

Fair value of financial assets and financial liabilities

There is no significant difference between the carrying values of the financial assets and liabilities and their fair values (2018: £nil).

Currency risk

At the year end date, 15.68% (2018: 22.11%) of the net assets of the Fund were denominated in currencies other than sterling with the effect that the balance sheet and total return can be significantly affected by currency movements. If currency rates were to change by 10.00%, the value of the Fund would change by 1.57% (2018: 2.21%).

16 Derivatives and other financial instruments (continued)**Interest rate risk**

At the year end date 1.17% (2018: 12.10%) of the net assets of the Fund were interest bearing and as such the interest rate risk is not considered significant.

The interest rate profile of the Fund's financial assets and liabilities at 28 February 2018 was:

Currency 28.02.18	Floating Rate £000	Fixed Rate £000	None £000	Total £000
Financial Assets				
Sterling	9,821	–	58,226	68,047

US dollar	–	–	(1,097)	(1,097)
Total	9,609	–	69,824	79,433

The floating rate on bank balances is linked to the Depositary's base rate.

Market price risk

At the year end date, 98.61% (2018: 87.64%) of the net assets of the Fund were invested in CIS which primarily invest in stocks admitted to an official stock exchange. If the market value were to change by 10%, the value of the Fund would change by 9.86% (2018: 8.76%).

17 Counterparty exposure**Financial derivative exposure**

The types of derivatives held at the year end date were forward currency contracts and futures contracts. Details of individual contracts are disclosed in the Portfolio Statement and the total position by counterparty at the year end date was as follows:

	Forward currency contracts £000	Futures contracts £000	Total £000
28.02.19			
Barclays	23	–	23

The counterparty exposure on forward currency contracts is reported at their mark to market values but for futures contracts it is only the positive mark to market values that are reported.

Collateral

At the year end date no collateral was held or pledged by the Fund or on behalf of the counterparties in respect of the above (2018: £nil).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

18 Direct transaction costs

In the case of shares, broker commissions and transfer taxes, stamp duty is paid by the Fund on each transaction. In addition, there is a dealing spread between buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of the dealing spread.

Interim distribution

Group 1 shares are those shares purchased at or before 9am on 28 February 2018.

Group 2 shares are those shares purchased after 9am on 28 February 2018.

Equalisation

Equalisation applies only to Group 2 shares, in other words shares purchased during the period. It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

AVIVA INVESTORS MULTI-MANAGER 40-85% SHARES FUND

INVESTMENT OBJECTIVE

The Fund aims to provide long-term capital growth together with income by investing in other eligible Collective Investment Schemes (the Target Funds).

INVESTMENT POLICY

Investment will be made in shares or units of the Target Funds, which invest in any geographical area or industry sector. Investments may also be made in derivatives for hedging purposes. Although the Target Funds may invest in equities, bonds, property securities, or money market instruments, it is anticipated that up to 85% of the Fund will be invested in Target Funds whose objectives are equity investment.

FUND MANAGER'S REPORT

Performance

Over the twelve months ended 28 February 2019, the Fund returned -2.22% (net of fees). The Fund's Investment Association peer group returned -0.13% over the same period.

Review

Growth assets struggled to make headway as investors downgraded their economic and corporate earnings outlooks for 2019. Specifically, there were some concerns over how the global economy will respond to tighter policy settings in the US – interest rates were raised four times during 2018, adding to the four hikes from the prior year. The introduction of tariffs on goods imported into the US also affected sentiment towards growth assets. Investors suggested this could dampen global trade volumes and, in turn, affect profitability among global manufacturers. Collectively, growth assets sold off quite sharply in late 2018 although a rebound in early 2019 saw the Fund recover most of its earlier lost ground.

Defensive and uncorrelated assets performed rather better and helped preserve capital during a challenging period for growth assets. Bond yields were quite volatile during the year, initially rising to multi-year highs before turning lower towards the end of the year. The reversal reflected a change in commentary from the Federal Reserve, which surprised markets by announcing an intended pause in its monetary policy tightening process. At the same time, inflation in the US continued to gather pace – this supported returns from the Fund's investment in inflation-protected Treasuries.

Outlook

The pace of global growth is expected to moderate in 2019, but appears likely to remain above trend. At the same time, major central banks are expected to tighten policy, but perhaps less than initially expected last year. Growth assets should be able to make positive progress against this background, while more subdued returns are anticipated from defensive assets. Valuations continue to be monitored closely, with a view of amending portfolio positioning when opportunities are identified and where relative value emerges.

* Fund performance figures – share class 1, source Lipper, net of fees, net income reinvested in GBP, as at 28 February 2019.

As noted above, the performance figures in this commentary have been sourced from an external party and are based on published prices. The performance figures quoted in the comparative tables on pages 24 and 25 are based on the net asset value per the published accounts and may be different due to post year end accounting adjustments.

Any opinions expressed are those of the Fund manager. They should not be viewed as a guarantee of a return from an investment in the Funds. The content of the commentary should not be viewed as a recommendation to invest nor buy or sell any securities. Past performance is not a guide to the future. The value of a fund and the income from it may go down as well as up, and the investor may not get back the original amount invested.

Synthetic Risk and Reward Indicator

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at www.avivainvestors.com or from the ACD on request.

(a) Changes to fee rates were made during the year and the Ongoing Charge Figure has been amended to be future proofed for this change.

(b) The ongoing charge has been annualised for a share class that has not yet been open for a full year.

[#] The direct transaction costs have been stated after deducting, in the case of single-priced funds, the proportion of the amounts collected from dilution adjustments or dilution levies that relates to direct transaction costs and, in the case of dual-priced funds, the amounts collected in relation to direct transaction costs added to, or subtracted from, the valuations by virtue of COLL 6.3.6 G (4).

[≈] The high and low prices disclosed are the high and low prices for the accounting period and not the calendar year. The net asset value per share is based on the net asset value in the published accounts and may be different due to post year end accounting adjustments.

Class 1	1.75%**	2.16%
Class 2	1.50%	1.41%
Class 3	1.25%	1.16%

* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the year. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme. The OCF includes a synthetic charge of 0.61% (2018: 0.52%) in respect of underlying investments.

** Following the update to the Prospectus and the change in charging structure of the Fund part way through the period, the ongoing charges figure has been based on the revised fee structure and therefore is not on an ex-post basis.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

5 Taxation**a Analysis of tax charge**

	Year ended 28.02.19 £000	Year ended 28.02.18 £000
Corporation tax	(177)	229
Adjustments in respect of prior period	(137)	(1)
Overseas tax suffered	(2)	(2)
Total current tax	(316)	226
Deferred tax (see note 5c)	(327)	(159)
Total tax for the year (see note 5b)	(643)	67

b Factors affecting current tax charge

The tax assessed for the year is lower (2018: lower) than the standard rate of corporation tax in the UK for an Authorised Investment Fund (20%) (2018: 20%).

The differences are explained below:

	Year ended 28.02.19 £000	Year ended 28.02.18 £000
Net revenue before taxation	1,337	1,185
Corporation tax at 20%	267	237
Effects of:		
Adjustments in respect of prior period	(314)	(1)
Deferred tax	(327)	(159)
Franked distributions not subject to corporation tax	(227)	(172)
Movement in excess management expenses	18	–
Overseas tax suffered	(2)	(2)
Revenue from offshore investments not subject to corporation tax	(70)	(19)
Tax relief on investment manager fee rebates	12	6
Tax relief on realised gain on offshore funds	–	177
Current tax charge (see note 5a)	(643)	67

Authorised Investment Funds are exempt from tax on capital gains. Therefore, any capital return is not included in the above reconciliation.

c Deferred tax

	Year ended 28.02.19 £000	Year ended 28.02.18 £000
Provision at start of year	327	486
(Credit) for the year	(327)	(159)
Provision at end of year	–	327

After claiming relief against accrued income taxable on receipt, the Fund has unrelieved excess expenses of £89,087 (2018: £nil) creating a potential deferred tax asset of £17,817 (2018: £nil). It is unlikely that the Fund will generate taxable profits in the future to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities.

The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority is given to unobservable inputs. Disclosure is required of the value in each category in order to give an insight into the extent to which fair value measurements are subjective.

The disclosure is split into the following categories:

Level 1: Unadjusted quoted price in an active market for an identical instrument;

Level 2: Valuation techniques using observable inputs other than quoted prices within level 1;

Level 3: Valuation techniques using unobservable inputs.

17 Derivatives and other financial instruments

The policies applied in the management of financial instruments are set out on pages 7 and 8.

Fair value of financial assets and financial liabilities

There is no significant difference between the carrying values of the financial assets and liabilities and their fair values (2018: £nil).

Currency risk

At the year end date, 8.31% (2018:12.80%) of the net assets of the Fund were denominated in currencies other than sterling with the effect that the balance sheet and total return can be significantly affected by currency movements. If currency rates were to change by 10.00%, the value of the Fund would change by 0.83% (2018: 1.28%).

Interest rate risk

At the year end date 6.17% (2018: 17.53%) of the net assets of the Fund were interest bearing and as such the interest rate risk is not considered significant.

The interest rate profile of the Fund's financial assets and liabilities at 28 February 2018 was:

Currency 28.02.18	Floating Rate £000	Fixed Rate £000	None £000	Total £000
Financial Assets				
Sterling	34,932	–	150,263	185,195

US dollar	–	–	(12,513)	(12,513)
Total	34,528	–	162,438	196,966

The floating rate on bank balances is linked to the Depositary's base rate.

The Fund invests in some collective investment schemes (CIS) which predominantly invest in debt securities. The revenue of the Fund and the value of debt securities may be significantly affected by interest rate movements in the future. At the year end date 21.90% (2018: 13.51%) of the assets of the Fund were invested in CIS which predominantly invest in debt securities.

Market price risk

At the year end date, 93.71% (2018: 81.97%) of the net assets of the Fund were invested in CIS which primarily invest in stocks admitted to an official stock exchange. If the market value were to change by 10%, the value of the Fund would change by 9.37% (2018: 8.20%).

19 Direct transaction costs

In the case of shares, broker commissions and transfer taxes, stamp duty is paid by the Fund on each transaction. In addition, there is a dealing spread between buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of the dealing spread.

Group 2 shares are those shares purchased after 9am on 28 February 2018.

Equalisation

Equalisation applies only to Group 2 shares, in other words shares purchased during the period. It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

AVIVA INVESTORS MULTI-MANAGER 20-60% SHARES FUND

INVESTMENT OBJECTIVE

The Fund aims to provide long-term capital growth and income by investing in other eligible Collective Investment Schemes (the Target Funds).

INVESTMENT POLICY

Investment will be made in shares or units of the Target Funds, which invest in any geographical area or industry sector. Investments may also be made in derivatives for hedging purposes. Although the Target Funds may invest in equities, bonds, property securities, or money market instruments, it is anticipated that up to 60% of the Fund will be invested in Target Funds whose objectives are equity investment.

FUND MANAGER'S REPORT

Performance

Over the twelve months ended 28 February 2019, the Fund returned -1.90%* (net of fees). The Fund's Investment Association Mixed Investment 40-85% Shares peer group returned -0.14% over the same period.

Review

Growth assets struggled to make headway as investors downgraded their economic and corporate earnings outlooks for 2019. Specifically, there were some concerns over how the global economy will respond to tighter policy settings in the US – interest rates were raised four times during 2018, adding to the four hikes from the prior year. The introduction of tariffs on goods imported into the US also affected sentiment towards growth assets. Investors suggested this could dampen global trade volumes and, in turn, affect profitability among global manufacturers. Collectively, growth assets sold off quite sharply in late 2018 although a rebound in early 2019 saw the Fund recover most of its earlier lost ground.

Defensive and uncorrelated assets performed rather better and helped preserve capital during a challenging period for growth assets. Bond yields were quite volatile during the year, initially rising to multi-year highs before turning lower towards the end of the year. The reversal reflected a change in commentary from the Federal Reserve, which surprised markets by announcing an intended pause in its monetary policy tightening process. At the same time, inflation in the US continued to gather pace – this supported returns from the Fund's investment in inflation-protected Treasuries.

Outlook

The pace of global growth is expected to moderate in 2019, but appears likely to remain above trend. At the same time, major central banks are expected to tighten policy, but perhaps less than initially expected last year. Growth assets should be able to make positive progress against this background, while more subdued returns are anticipated from defensive assets. Valuations continue to be monitored closely, with a view of amending portfolio positioning when opportunities are identified and where relative value emerges.

* Fund performance figures – share class 1, source Lipper, net of fees, net income reinvested in GBP, as at 28 February 2019.

As noted above, the performance figures in this commentary have been sourced from an external party and are based on published prices. The performance figures quoted in the comparative tables on pages 40 and 41 are based on the net asset value per the published accounts and may be different due to post year end accounting adjustments.

Any opinions expressed are those of the Fund manager. They should not be viewed as a guarantee of a return from an investment in the Funds. The content of the commentary should not be viewed as a recommendation to invest nor buy or sell any securities. Past performance is not a guide to the future. The value of a fund and the income from it may go down as well as up, and the investor may not get back the original amount invested.

Synthetic Risk and Reward Indicator

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at www.avivainvestors.com or from the ACD on request.

* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the year. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme. The OCF includes a synthetic charge of 0.51% (2018: 0.44%) in respect of underlying investments..

** Following the update to the Prospectus and the change in charging structure of the Fund part way through the period, the ongoing charges figure has been based on the revised fee structure and therefore is not on an ex-post basis.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

5 Taxation

a Analysis of tax charge

	Year ended 28.02.19 £000	Year ended 28.02.18 £000
Adjustments in respect of prior period	(574)	8
Corporation tax	83	410
Overseas tax suffered	(3)	(4)
Total current tax	(494)	414
Deferred tax (see note 5c)	(214)	(138)
Total tax for the year (see note 5b)	(708)	276

b Factors affecting current tax charge

The tax assessed for the year is lower (2018: lower) than the standard rate of corporation tax in the UK for an Authorised Investment Fund (20%) (2018: 20%).

The differences are explained below:

	Year ended 28.02.19 £000	Year ended 28.02.18 £000
Net revenue before taxation	1,332	2,047
Corporation tax at 20%	266	409
Effects of:		
Adjustments in respect of prior period	(574)	8
Deferred tax	(214)	(138)
Franked distributions not subject to corporation tax	(151)	(136)
Overseas dividends not subject to corporation tax	(39)	(13)
Overseas tax suffered	(3)	(4)
Tax relief on investment manager fee rebates	7	3
Tax relief on realised gain on offshore funds	–	147
Total tax for the year (see note 5a)	(708)	276

Authorised Investment Funds are exempt from tax on capital gains. Therefore, any capital return is not included in the above reconciliation.

c Deferred tax

	Year ended 28.02.19 £000	Year ended 28.02.18 £000
The deferred tax provision is made up as follows:		
Provision at start of year	214	352
(Credit) for the year	(214)	(138)
Provision at end of year	–	214

Interim distribution	609	1,439
Final distribution	1,202	339
	1,811	1,778
Add: Revenue deducted on cancellation of shares	37	67
Deduct: Revenue received on issue of shares	(15)	(53)
Total distributions	1,833	1,792
Reconciliation of distributions for the year to net revenue after taxation		
Distributions for the year	1,833	1,792
Revenue deficit transferred to capital	–	(9)
Tax relief on investment manager fee rebates	(7)	(3)
Tax relief on offshore gain	214	(9)
Net revenue after taxation	2,040	1,771

Details of the distributions per share are set out in the distribution tables on page 54.

7 Fair value hierarchy

Valuation technique	As at 28.02.19		As at 28.02.18	
	Assets £000	Liabilities £000	Assets £000	Liabilities £000
Level 1: Quoted prices	23,833	(400)	788	(476)
Level 2: Observable market data	138,628	–	158,101	–
Total	162,461	(400)	158,889	(476)

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities.

The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority to unobservable inputs. Disclosure is required of the value in each category in order to give an insight into the extent to which fair value measurements are subjective.

The disclosure is split into the following categories:

Level 1: Unadjusted quoted price in an active market for an identical instrument;

Level 2: Valuation techniques using observable inputs other than quoted prices within level 1;

Level 3: Valuation techniques using unobservable inputs.

17 Derivatives and other financial instruments

The policies applied in the management of financial instruments are set out on pages 7 and 8.

Fair value of financial assets and financial liabilities

There is no significant difference between the carrying values of the financial assets and liabilities and their fair values (2018: £nil).

Currency risk

At the year end date, (0.04)% (2018: 3.83%) of the net assets of the Fund were denominated in currencies other than sterling and as such the currency risk is not considered significant.

Interest rate risk

At the year end date 16.80% (2018: 27.23%) of the net assets of the Fund were interest bearing.

The interest rate profile of the Fund's financial assets and liabilities at 28 February 2019 was:

Currency 28.02.19	Floating Rate £000	Fixed Rate £000	None £000	Total £000
Financial Assets

US dollar	–	–	(17,327)	(17,327)
Total	48,129	–	128,639	176,768

The floating rate on bank balances is linked to the Depositary's base rate.

The Fund invests in some collective investment schemes (CIS) which predominantly invest in debt securities. The revenue of the Fund and the value of debt securities may be significantly affected by interest rate movements in the future. At the year end date 30.79% (2018: 17.75%) of the assets of the Fund were invested in CIS which predominantly invest in debt securities.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

17 Derivatives and other financial instruments (continued)**Interest rate exposures**

The Aviva Investors Investment Risk Team performs regular stress testing across all portfolios to determine market sensitivities and risk exposures using BlackRock's Aladdin risk model and stress testing methodology. Under this methodology, if 5Y GBP interest rates had increased by 1% as at the balance sheet date, the net asset value of the Fund would have decreased by £4,078,329 (2018: £3,260,275). If interest rates had decreased by 1% as at the balance sheet date, the net asset value of the Fund would have increased by £4,078,329 (2018: £3,260,275). These calculations assume the interest rate shock is propagated to all risk factors the Fund is exposed to, based on historical market correlations and volatilities between factors.

Market price risk

At the year end date, 82.63% (2018: 73.07%) of the net assets of the Fund were invested in CIS which primarily invest in stocks admitted to an official stock exchange. If the market value were to change by 10%, the value of the Fund would change by 8.26% (2018: 7.31%).

18 Counterparty exposure**Financial derivative exposure**

The types of derivatives held at the year end date were forward currency contracts and futures contracts. Details of individual contracts are disclosed in the Portfolio Statement and the total position by counterparty at the year end date was as follows:

	Forward currency contracts £000	Futures contracts £000	Total £000
28.02.19			
Barclays	49	–	49
Goldman Sachs	492	–	492

Royal Bank of Scotland	632	–	632
UBS	–	788	788
Total	639	788	1,427

The counterparty exposure on forward currency contracts is reported at their mark to market values but for futures contracts it is only the positive mark to market values that are reported.

Collateral

At the year end date no collateral was held or pledged by the company or on behalf of the counterparties in respect of the above (2018: £nil).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

19 Direct transaction costs

In the case of shares, broker commissions and transfer taxes, stamp duty is paid by the Fund on each transaction. In addition, there is a dealing spread between buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of the dealing spread.

Interim distribution

Group 1 shares are those shares purchased at or before 9am on 28 February 2018.

Group 2 shares are those shares purchased after 9am on 28 February 2018.

Equalisation

Equalisation applies only to Group 2 shares, in other words shares purchased during the period. It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

AVIVA INVESTORS MULTI-ASSET FUND I

INVESTMENT OBJECTIVE

The Fund aims to provide returns through a combination of capital growth and income.

INVESTMENT POLICY

The Fund aims to achieve the investment objective by employing a blend of both strategic and tactical asset allocation across a diversified range of global asset classes.

The Fund may invest in securities, fixed income assets, Exchange Traded Funds, collective investment schemes, warrants, money market instruments, deposits, cash, near cash, property and commodities. Exposure to property and commodities will be via collective investment schemes and Exchange Traded Funds. The Fund may also invest directly in derivative instruments (including commodity futures) for the purposes of investment and efficient portfolio management.

By combining diversified and relatively uncorrelated assets, investment risk is controlled and kept in line with the Fund's 'defensive' risk profile.

Details about the Fund's 'defensive' risk profile are available in the Prospectus.

FUND MANAGER'S REPORT

On 4 June 2018, share class 4 of this Fund was closed and merged into share class 1 and share class R3 of this Fund was renamed as share class 2.

Performance

Over the twelve months ended 28 February 2019, the Fund returned -0.33% (net of fees).

Review

The Fund's bond holdings helped preserve capital during a challenging period for equity markets.

Growth assets struggled for much of the year as investors appeared concerned about a potential slowdown in global economic activity and, in turn, how that might affect corporate profitability. The Fund's tactical overweight exposure to growth assets adversely affected returns.

Allocations to European and emerging market equities detracted from performance, as the introduction of tariffs on goods imported into the US threatened to curtail trade volumes and profitability among manufacturers. Elsewhere, increased investment in US equities was rewarded as they outperformed those in other regions; benefiting from a healthy economic background and strong company profitability.

Defensive assets fared relatively well over the year, helping to offset equity market weakness. The allocation to corporate bonds was increased towards the end of the year as valuations had become more appealing. Healthy economic conditions and company tax cuts are supporting corporate profitability in the US, underlining the appeal of an allocation to credit. An underweight position in government bonds is held, reflecting the possibility of policy settings being tightened by global central banks in the remainder of this year.

Uncorrelated assets detracted from performance. Portfolio positioning reflected the likelihood of rising interest rates, continuing solid economic growth and a normalisation of inflation. These views were expressed through various equity markets, including European mid-caps, emerging market smaller-companies and global financials, as well as through long inflation and short duration strategies. Collectively these strategies performed less well than anticipated over the year, although the Fund's allocation to uncorrelated assets is expected to add value over time.

Outlook

The pace of global growth is expected to moderate in 2019, while remaining above trend. At the same time, major central banks are expected to tighten policy, but perhaps less than initially expected last year. As a result, overweight exposure to growth assets continues to be held. Valuations in all areas of the market are monitored closely and portfolio positioning will be amended as and when opportunities are identified and where relative value emerges.

March 2019

* Fund performance figures – share class 1, source Lipper, net of fees, net income reinvested in GBP, as at 28 February 2019.

As noted above, the performance figures in this commentary have been sourced from an external party and are based on published prices. The performance figures quoted in the comparative tables on pages 57 and 58 are based on the net asset value per the published accounts and may be different due to post year end accounting adjustments.

Any opinions expressed are those of the Fund manager. They should not be viewed as a guarantee of a return from an investment in the Funds. The content of the commentary should not be viewed as a recommendation to invest nor buy or sell any securities. Past performance is not a guide to the future. The value of a fund and the income from it may go down as well as up, and the investor may not get back the original amount invested.

AVIVA INVESTORS MULTI-ASSET FUND I (CONTINUED)

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean ‘risk free’.
- Further information on the risks applicable to the Fund is detailed in the Fund’s Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at www.avivainvestors.com or from the ACD on request.

[‡] The operating charges are calculated on an ex-post basis and as such may differ from the Ongoing Charge Figure where:

(a) Changes to fee rates were made during the year and the Ongoing Charge Figure has been amended to be future proofed for this change.

(b) The ongoing charge has been annualised for a share class that has not yet been open for a full year.

[#] The direct transaction costs have been stated after deducting, in the case of single-priced funds, the proportion of the amounts collected from dilution adjustments or dilution levies that relates to direct transaction costs and, in the case of dual-priced funds, the amounts collected in relation to direct transaction costs added to, or subtracted from, the valuations by virtue of COLL 6.3.6 G (4).

[≈] The high and low prices disclosed are the high and low prices for the accounting period and not the calendar year. The net asset value per share price is based on the net asset value in the published accounts and may be different due to post year end accounting adjustments.

Ongoing Charges Figure*

Share class	28.02.19	28.02.18
Class 1	0.82%**	1.33%
Class 2	0.56%	0.58%
Class 3	0.62%	0.63%
Class 9	0.31%	0.35%

* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the year. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

The OCF on share class 2 is capped at 0.60%, though the actual figure may be lower. The OCF on share class 9 is capped at 0.35%, though the actual figure may be lower. The OCF includes a synthetic charge of 0.07% (28.02.18: 0.09%) in respect of the underlying investments.

** Following the update to the Prospectus and the change in charging structure of the Fund part way through the period, the ongoing charges figure has been based on the revised fee structure and therefore is not on an ex-post basis.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

Overseas tax suffered	3	(4)
Total current tax (see note 5b)	290	159
Deferred tax (see note 5c)	(15)	15
Total tax for the year	275	174

b Factors affecting current tax charge

The tax assessed for the year is lower than (2018: lower than) than the standard rate of corporation tax in the UK for an Authorised Investment Fund (20%) (2018: 20%)

The differences are explained below:

	Year ended 28.02.19 £000	Year ended 28.02.18 £000
Net revenue before taxation	1,823	1,096
Corporation tax at 20%	365	219
Effects of:		
Adjustments in respect of prior period	28	12
Capital taxable revenue not included in net revenue	–	3
Deferred tax	(15)	15
Franked distributions not subject to corporation tax	(37)	(46)
Overseas dividends not subject to corporation tax	(69)	(25)
Overseas tax suffered	3	(4)
Current tax charge (see note 5a)	275	174

Authorised Investment Funds are exempt from tax on capital gains. Therefore, any capital return is not included in the above reconciliation.

c Deferred tax

	Year ended 28.02.19 £000	Year ended 28.02.18 £000
The deferred tax provision is made up as follows:		
Provision at start of year	15	–
(Credit)/Charge for the year	(15)	15
Provision at end of the year	–	15

Details of the distributions per share are set out in the distribution tables on page 71.

7 Fair value hierarchy

Valuation technique	As at 28.02.19		As at 28.02.18	
	Assets £000	Liabilities £000	Assets £000	Liabilities £000
Level 1: Quoted prices	3,398	(442)	23,650	(489)
Level 2: Observable market data	166,840	–	119,930	–
Total value	170,238	(442)	143,580	(489)

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities.

The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority is given to unobservable inputs. Disclosure is required of the value in each category in order to give an insight into the extent to which fair value measurements are subjective.

The disclosure is split into the following categories:

Level 1: Unadjusted quoted price in an active market for an identical instrument;

Level 2: Valuation techniques using observable inputs other than quoted prices within level 1;

Level 3: Valuation techniques using unobservable inputs.

17 Derivatives and other financial instruments

The policies applied in the management of financial instruments are set out on pages 7 and 8.

Fair value of financial assets and financial liabilities

There is no significant difference between the carrying values of the financial assets and liabilities and their fair values (2018: £nil).

Currency risk

At the year end date, (5.19%) (2018: 1.38%) of the net assets of the Fund were denominated in currencies other than sterling and as such the currency risk is not considered significant.

Interest rate risk

At the year end date 44.93% (2018: 55.56%) of the net assets of the Fund were interest bearing.

The interest rate profile of the Fund's financial assets and liabilities at 28 February 2019 was:

Currency 28.02.19	Floating Rate £000	Fixed Rate £000	None £000	Total £000
Financial Assets

Total	61,783	23,068	67,875	152,726

The floating rate on bank balances is linked to the Depositary's base rate.

The Fund invests in some collective investment schemes (CIS) which predominantly invest in debt securities. The revenue of the Fund and the value of debt securities may be affected by interest rate movements in the future. At the year end date 35.67% (2018: 19.95%) of the assets of the Fund were invested in CIS which predominantly invest in debt securities.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

17 Derivatives and other financial instruments (continued)**Interest rate exposures**

The Aviva Investors Investment Risk Team performs regular stress testing across all portfolios to determine market sensitivities and risk exposures using BlackRock's Aladdin risk model and stress testing methodology. Under this methodology, if 5Y GBP interest rates had increased by 1% as at the balance sheet date, the net asset value of the Fund would have decreased by £7,292,896 (2018: £5,565,818). If interest rates had decreased by 1% as at the balance sheet date, the net asset value of the Fund would have increased by £7,292,896 (2018: £5,565,818). These calculations assume the interest rate shock is propagated to all risk factors the Fund is exposed to, based on historical market correlations and volatilities between factors.

Market price risk

At the year end date, 67.82% (2018: 58.29%) of the net assets of the Fund were invested in CIS (which primarily invest in stocks admitted to an official stock exchange) and debt securities admitted to an official stock exchange. If the market value were to change by 10%, the value of the Fund would change by 6.78% (2018: 5.83%).

18 Counterparty exposure**Financial derivative exposure**

The types of derivatives held at the year end date were forward currency contracts and futures contracts. Details of individual contracts are disclosed in the Portfolio Statement and the total position by counterparty at the year end date was as follows:

	Forward currency contracts £000	Futures contracts £000	Total £000
28.02.19			
Barclays	57	–	57
Goldman Sachs	746	–	746
J.P. Morgan	49	–	49

Royal Bank of Canada	9	–	9
Royal Bank of Scotland	650	–	650
UBS	–	583	583
Total	677	583	1,260

The counterparty exposure on forward currency contracts is reported at their mark to market values but for futures contracts it is only the positive mark to market values that are reported.

Collateral

At the year end date no collateral was held or pledged by the company or on behalf of the counterparties in respect of the above (2018: £nil).

19 Direct transaction costs

In the case of shares, broker commissions and transfer taxes, stamp duty is paid by the Fund on each transaction. In addition, there is a dealing spread between buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of the dealing spread.

Group 1 shares are those shares purchased at or before 2pm on 28 February 2018.

Group 2 shares are those shares purchased after 2pm on 28 February 2018.

Equalisation

Equalisation applies only to Group 2 shares, in other words shares purchased during the period. It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

AVIVA INVESTORS MULTI-ASSET FUND II

INVESTMENT OBJECTIVE

The Fund aims to provide returns through a combination of capital growth and income.

INVESTMENT POLICY

The Fund aims to achieve the investment objective by employing a blend of both strategic and tactical asset allocation across a diversified range of global asset classes.

The Fund may invest in securities, fixed income assets, Exchange Traded Funds, collective investment schemes, warrants, money market instruments, deposits, cash, near cash, property and commodities. Exposure to property and commodities will be via collective investment schemes and Exchange Traded Funds. The Fund may also invest directly in derivative instruments (including commodity futures) for the purposes of investment and efficient portfolio management.

By combining diversified and relatively uncorrelated assets, investment risk is controlled and kept in line with the Fund's 'cautious' risk profile.

Details about the Fund's 'cautious' risk profile are available in the Prospectus.

FUND MANAGER'S REPORT

On 4 June 2018, share class 4 of this Fund was closed and merged into share class 1 and share class R3 of this Fund was renamed as share class 2.

Performance

Over the twelve months ended 28 February 2019, the Fund returned -1.23%* (net of fees).

Review

Growth assets struggled for much of the year as investors appeared concerned about a potential slowdown in global economic activity and, in turn, how that might affect corporate profitability. The Fund's tactical overweight exposure to growth assets adversely affected returns.

Allocations to European and emerging market equities detracted from performance, as the introduction of tariffs on goods imported into the US threatened to curtail trade volumes and profitability among manufacturers. Elsewhere, increased investment in US equities was rewarded as they outperformed those in other regions; benefiting from a healthy economic background and strong company profitability.

Defensive assets fared relatively well over the year, helping to offset some of the weakness in equity markets. The allocation to corporate bonds was increased towards the end of the year as valuations had become more appealing. Healthy economic conditions and company tax cuts are supporting corporate profitability in the US, underlining the appeal of an allocation to both investment grade and high yield credit. An underweight position in government bonds is held, reflecting the possibility of policy settings being tightened by global central banks in the remainder of this year.

Uncorrelated assets detracted from performance. Portfolio positioning reflected the likelihood of rising interest rates, continuing solid economic growth and a normalisation of inflation. These views were expressed through various equity markets, including European mid-caps, emerging market smaller-companies and global financials, as well as through long inflation and short duration strategies. Collectively these strategies performed less well than anticipated over the year, although the Fund's allocation to uncorrelated assets is expected to add value over time.

Outlook

The pace of global growth is expected to moderate in 2019, while remaining above trend. At the same time, major central banks are expected to tighten policy, but perhaps less than initially expected last year. As a result, overweight exposure to growth assets continues to be held. Valuations in all areas of the market are monitored closely and portfolio positioning will be amended as and when opportunities are identified and where relative value emerges.

AVIVA INVESTORS MULTI-ASSET FUND II (CONTINUED)

Synthetic Risk and Reward Indicator

The Fund has been allocated a risk number based on the higher of the historic volatility of its share price, the historic volatility of its current asset classes or its intended maximum risk levels.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- The value of investments and the income from them will change over time.
- The Fund price may fall as well as rise and as a result you may not get back the original amount you invested.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at www.avivainvestors.com or from the ACD on request.

[‡] The operating charges are calculated on an ex-post basis and as such may differ from the Ongoing Charge Figure where:

(a) Changes to fee rates were made during the year and the Ongoing Charge Figure has been amended to be future proofed for this change.

(b) The ongoing charge has been annualised for a share class that has not yet been open for a full year.

[#] The direct transaction costs have been stated after deducting, in the case of single-priced funds, the proportion of the amounts collected from dilution adjustments or dilution levies that relates to direct transaction costs and, in the case of dual-priced funds, the amounts collected in relation to direct transaction costs added to, or subtracted from, the valuations by virtue of COLL 6.3.6 G (4).

[≈] The high and low prices disclosed are the high and low prices for the accounting period and not the calendar year. The net asset value per share price is based on the net asset value in the published accounts and may be different due to post year end accounting adjustments.

Ongoing Charges Figure*

Share class	28.02.19	28.02.18
Class 1	0.80%**	1.32%
Class 2	0.57%	0.57%
Class 3	0.60%	0.62%
Class 9	0.32%	0.35%

* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the year. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

The OCF on share class 2 is capped at 0.60%, though the actual figure may be lower. The OCF on share class 9 is capped at 0.35%, though the actual figure may be lower. The OCF includes a synthetic charge of 0.07% (2018: 0.09%) in respect of underlying investments.

** Following the update to the Prospectus and the change in charging structure of the Fund part way through the period, the ongoing charges figure has been based on the revised fee structure and therefore is not on an ex-post basis.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

Corporation tax	564	233
Adjustments in respect of prior period	60	18
Overseas tax suffered	128	(11)
Total current tax	752	240
Deferred tax (see note 5c)	(54)	54
Total tax for the year (see note 5b)	698	294

b Factors affecting current tax charge

The tax assessed for the year is lower (2018: lower) than the standard rate of corporation tax in the UK for an Authorised Investment Fund (20%) (2018: 20%).

The differences are explained below:

	Year ended 28.02.19 £000	Year ended 28.02.18 £000
Net revenue before taxation	10,559	3,909
Corporation tax at 20%	2,112	782
Effects of:		
Adjustments in respect of prior period	60	18
Deferred tax	(54)	54
Franked distributions not subject to corporation tax	(502)	(371)
Overseas dividends not subject to corporation tax	(1,046)	(215)
Overseas tax suffered	128	(11)
Tax relief on realised gain on offshore funds	–	37
Total tax for the year (see note 5a)	698	294

Authorised Investment Funds are exempt from tax on capital gains. Therefore, any capital return is not included in the above reconciliation.

c Deferred tax

	Year ended 28.02.19 £000	Year ended 28.02.18 £000
Movement in deferred tax for the year (Note 5(a))	(54)	54

Total distributions	9,819	3,745
Reconciliation of distributions for the year to net revenue after taxation		
Distributions for the year	9,819	3,745
ACD's periodic charge borne by the capital account	(16)	–
Revenue deficit transferred to capital	–	(39)
Tax relief on capitalised ACD's periodic charge	3	–
Tax relief on offshore gain	54	(91)
Undistributed revenue carried forward	1	–
Net revenue after taxation	9,861	3,615

Details of the distributions per share are set out in the distribution tables on page 88.

7 Fair value hierarchy

Valuation technique	As at 28.02.19		As at 28.02.18	
	Assets £000	Liabilities £000	Assets £000	Liabilities £000
Level 1: Quoted prices	37,800	(2,043)	65,410	(2,151)
Level 2: Observable market data	689,935	–	614,378	(5)
Total	727,735	(2,043)	679,788	(2,156)

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities.

The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority is given to unobservable inputs. Disclosure is required of the value in each category in order to give an insight into the extent to which fair value measurements are subjective.

The disclosure is split into the following categories:

Level 1: Unadjusted quoted price in an active market for an identical instrument;

Level 2: Valuation techniques using observable inputs other than quoted prices within level 1;

Level 3: Valuation techniques using unobservable inputs.

8 Debtors

17 Derivatives and other financial instruments

The policies applied in the management of financial instruments are set out on pages 7 and 8.

Fair value of financial assets and financial liabilities

There is no significant difference between the carrying values of the financial assets and liabilities and their fair values (2018: £nil).

Currency risk

At the year end date, (2.08)% (2018: 2.54%) of the net assets of the Fund were denominated in currencies other than sterling and as such, the currency risk is not considered significant.

Interest rate risk

At the year end date 23.52% (2018: 36.23%) of the net assets of the Fund were interest bearing.

The interest rate profile of the Fund's financial assets and liabilities at 28 February 2019 was:

Interest rate exposures

The Aviva Investors Investment Risk Team performs regular stress testing across all portfolios to determine market sensitivities and risk exposures using BlackRock's Aladdin risk model and stress testing methodology. Under this methodology, if 5Y GBP interest rates had increased by 1% as at the balance sheet date, the net asset value of the Fund would have decreased by £19,574,699 (2018: £14,885,975). If interest rates had decreased by 1% as at the balance sheet date, the net asset value of the Fund would have increased by £19,574,699 (2018: £14,885,975). These calculations assume the interest rate shock is propagated to all risk factors the Fund is exposed to, based on historical market correlations and volatilities between factors.

Market price risk

At the year end date, 84.40% (2018: 70.57%) of the net assets of the Fund were invested in CIS (which primarily invest in stocks admitted to an official stock exchange) and debt securities. If the market value were to change by 10%, the value of the Fund would change by 8.44% (2018: 7.06%).

18 Counterparty exposure

Financial derivative exposure

The types of derivatives held at the year end date were forward currency contracts and futures contracts. Details of individual contracts are disclosed in the Portfolio Statement and the total position by counterparty at the year end date was as follows:

	Forward currency contracts £000	Futures contracts £000	Total £000
28.02.19			
Barclays	214	–	214
Goldman Sachs	1,519	–	1,519

19 Direct transaction costs

In the case of shares, broker commissions and transfer taxes, stamp duty is paid by the Fund on each transaction. In addition, there is a dealing spread between buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of the dealing spread.

Group 2 shares are those shares purchased after 2pm on 28 February 2018.

Equalisation

Equalisation applies only to Group 2 shares, in other words shares purchased during the period. It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

AVIVA INVESTORS MULTI-ASSET FUND III

INVESTMENT OBJECTIVE

The Fund aims to provide returns through a combination of capital growth and income.

INVESTMENT POLICY

The Fund aims to achieve the investment objective by employing a blend of both strategic and tactical asset allocation across a diversified range of global asset classes.

The Fund may invest in securities, fixed income assets, Exchange Traded Funds, collective investment schemes, warrants, money market instruments, deposits, cash, near cash, property and commodities. Exposure to property and commodities will be via collective investment schemes and Exchange Traded Funds. The Fund may also invest directly in derivative instruments (including commodity futures) for the purposes of investment and efficient portfolio management.

By combining diversified and relatively uncorrelated assets, investment risk is controlled and kept in line with the Fund's 'moderately cautious' risk profile.

Details about the Fund's 'moderately cautious' risk profile are available in the Prospectus.

FUND MANAGER'S REPORT

On 4 June 2018, share class 4 of this Fund was closed and merged into share class 1 and share class R3 of this Fund was renamed as share class 2.

Performance

Over the twelve months ended 28 February 2019, The Fund returned -1.47% (net of fees).

Review

Growth assets struggled for much of the year as investors appeared concerned about a potential slowdown in global economic activity and, in turn, how that might affect corporate profitability. The Fund's tactical overweight exposure to growth assets adversely affected returns.

Allocations to European and emerging market equities detracted from performance, as the introduction of tariffs on goods imported into the US threatened to curtail trade volumes and profitability among manufacturers. Elsewhere, increased investment in US equities was rewarded as they outperformed those in other regions; benefiting from a healthy economic background and strong company profitability.

Defensive assets fared relatively well over the year, helping to offset some of the weakness in equity markets. The allocation to corporate bonds was increased towards the end of the year as valuations had become more appealing. Healthy economic conditions and company tax cuts are supporting corporate profitability in the US, underlining the appeal of an allocation to both investment grade and high yield credit. An allocation to hard currency emerging market bonds was also added to the portfolio during the year.

Uncorrelated assets detracted from performance. Portfolio positioning reflected the likelihood of rising interest rates, continuing solid economic growth and a normalisation of inflation. These views were expressed through various equity markets, including European mid-caps, emerging market smaller-companies and global financials, as well as through long inflation and short duration strategies. Collectively these strategies performed less well than anticipated over the year, although the Fund's allocation to uncorrelated assets is expected to add value over time.

Outlook

The pace of global growth is expected to moderate in 2019, while remaining above trend. At the same time, major central banks are expected to tighten policy, but perhaps less than initially expected last year. As a result, overweight exposure to growth assets continues to be held. Valuations in all areas of the market are monitored closely and portfolio positioning will be amended as and when opportunities are identified and where relative value emerges.

March 2019

* Fund performance figures – share class 1, source Lipper, net of fees, net income reinvested in GBP, as at 28 February 2019.

As noted above, the performance figures in this commentary have been sourced from an external party and are based on published prices. The performance figures quoted in the comparative tables on pages 91 and 92 are based on the net asset value per the published accounts and may be different due to post year end accounting adjustments.

Any opinions expressed are those of the Fund manager. They should not be viewed as a guarantee of a return from an investment in the Funds. The content of the commentary should not be viewed as a recommendation to invest nor buy or sell any securities. Past performance is not a guide to the future. The value of a fund and the income from it may go down as well as up, and the investor may not get back the original amount invested.

Synthetic Risk and Reward Indicator

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- Further information on the risks applicable to the Fund is detailed in the Fund's Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at www.avivainvestors.com or from the ACD on request.

[‡] The operating charges are calculated on an ex-post basis and as such may differ from the Ongoing Charge Figure where:

(a) Changes to fee rates were made during the year and the Ongoing Charge Figure has been amended to be future proofed for this change.

(b) The ongoing charge has been annualised for a share class that has not yet been open for a full year.

[#] The direct transaction costs have been stated after deducting, in the case of single-priced funds, the proportion of the amounts collected from dilution adjustments or dilution levies that relates to direct transaction costs and, in the case of dual-priced funds, the amounts collected in relation to direct transaction costs added to, or subtracted from, the valuations by virtue of COLL 6.3.6 G (4).

[≈] The high and low prices disclosed are the high and low prices for the accounting period and not the calendar year. The net asset value per share price is based on the net asset value in the published accounts and may be different due to post year end accounting adjustments.

Ongoing Charges Figure*

Class 1	0.80%**	1.31%
Class 2	0.57%	0.56%
Class 3	0.60%	0.61%
Class 9	0.32%	0.35%

* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the year. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

The OCF on share class 2 is capped at 0.60%, though the actual figure may be lower. The OCF on share class 9 is capped at 0.35%, though the actual figure may be lower. The OCF includes a synthetic charge of 0.07% (28.02.18: 0.09%) in respect of the underlying investments.

** Following the update to the Prospectus and the change in charging structure of the Fund part way through the period, the ongoing charges figure has been based on the revised fee structure and therefore is not on an ex-post basis.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

5 Taxation**a Analysis of tax charge**

	Year ended 28.02.19 £000	Year ended 28.02.18 £000
Overseas tax suffered	230	(13)
Total tax for the year (see note 5b)	230	(13)

b Factors affecting current tax charge

The tax assessed for the year is lower (2018: lower) than the standard rate of corporation tax in the UK for an Authorised Investment Fund (20%) (2018: 20%).

The differences are explained below:

	Year ended 28.02.19 £000	Year ended 28.02.18 £000
Net revenue before taxation	13,792	4,839
Corporation tax at 20%	2,758	968
Effects of:		
Franked distributions not subject to corporation tax	(874)	(700)
Movement in excess management expenses	(55)	71
Overseas dividends not subject to corporation tax	(1,829)	(463)
Overseas tax suffered	230	(13)
Tax relief on realised gain on offshore funds	–	45
Tax relief on unrealised gain on offshore funds	–	79
Current tax charge (see note 5a)	230	(13)

Authorised Investment Funds are exempt from tax on capital gains. Therefore, any capital return is not included in the above reconciliation.

c Deferred tax

There was no material unprovided deferred tax (2018: £nil).

After claiming relief against accrued income taxable on receipt, the Fund has unrelieved excess expenses of £399,347 (2018: £672,128*) creating a potential deferred tax asset of £79,869 (2018: £134,426*). It is unlikely that the Fund will generate taxable profits in the future to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

* Restated figures to agree to final tax computation.

Total distributions	13,587	4,879
Reconciliation of distributions for the year to net revenue after taxation		
Distributions for the year	13,587	4,879
ACD's periodic charge borne by the capital account	(28)	–
Equalisation on conversions	3	–
Revenue deficit transferred to capital	–	(27)
Net revenue after taxation	13,562	4,852

Details of the distributions per share are set out in the distribution tables on page 105.

7 Fair value hierarchy

Valuation technique	As at 28.02.19		As at 28.02.18	
	Assets £000	Liabilities £000	Assets £000	Liabilities £000
Level 1: Quoted prices	63,495	(2,572)	68,305	(2,565)
Level 2: Observable market data	903,929	–	825,364	(8)
Total	967,424	(2,572)	893,669	(2,573)

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities.

The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority is given to unobservable inputs. Disclosure is required of the value in each category in order to give an insight into the extent to which fair value measurements are subjective.

The disclosure is split into the following categories:

Level 1: Unadjusted quoted price in an active market for an identical instrument;

Level 2: Valuation techniques using observable inputs other than quoted prices within level 1;

Level 3: Valuation techniques using unobservable inputs.

16 Derivatives and other financial instruments

The policies applied in the management of financial instruments are set out on pages 7 and 8.

Fair value of financial assets and financial liabilities

There is no significant difference between the carrying values of the financial assets and liabilities and their fair values (2018: £nil).

Currency risk

At the year end date, 6.21% (2018: 3.13%) of the net assets of the Fund were denominated in currencies other than sterling and as such, the currency risk is not considered significant.

Interest rate risk

At the year end date 14.91% (2018: 26.94%) of the net assets of the Fund were interest bearing.

The interest rate profile of the Fund's financial assets and liabilities at 28 February 2019 was:

The floating rate on bank balances is linked to the Depositary's base rate.

The Fund invests in some collective investment schemes (CIS) which predominantly invest in debt securities. The revenue of the Fund and the value of debt securities may be affected by interest rate movements in the future. At the year end date 25.85% (2018: 11.26%) of the assets of the Fund were invested in CIS which predominantly invest in debt securities.

Interest rate exposures

The Aviva Investors Investment Risk Team performs regular stress testing across all portfolios to determine market sensitivities and risk exposures using BlackRock's Aladdin risk model and stress testing methodology. Under this methodology, if 5Y GBP interest rates had increased by 1% as at the balance sheet date, the net asset value of the Fund would have decreased by £19,513,273 (2018: £14,747,919). If interest rates had decreased by 1% as at the balance sheet date, the net asset value of the Fund would have increased by £19,513,273 (2018: £14,747,919). These calculations assume the interest rate shock is propagated to all risk factors the Fund is exposed to, based on historical market correlations and volatilities between factors.

Market price risk

At the year end date, 91.90% (2018: 78.13%) of the net assets of the Fund were invested in CIS (which primarily invest in stocks admitted to an official stock exchange) and debt securities. If the market value were to change by 10%, the value of the Fund would change by 9.19%.(2018:7.81%).

18 Direct transaction costs

In the case of shares, broker commissions and transfer taxes, stamp duty is paid by the Fund on each transaction. In addition, there is a dealing spread between buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of the dealing spread.

Interim distribution

Group 1 shares are those shares purchased at or before 2pm on 28 February 2018.

Group 2 shares are those shares purchased after 2pm on 28 February 2018.

Equalisation

Equalisation applies only to Group 2 shares, in other words shares purchased during the period. It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

AVIVA INVESTORS MULTI-ASSET FUND IV

INVESTMENT OBJECTIVE

The Fund aims to provide capital growth.

INVESTMENT POLICY

The Fund aims to achieve the investment objective by employing a blend of both strategic and tactical asset allocation across a diversified range of global asset classes.

The Fund may invest in securities, fixed income assets, Exchange Traded Funds, collective investment schemes, warrants, money market instruments, deposits, cash, near cash, property and commodities. Exposure to property and commodities will be via collective investment schemes and Exchange Traded Funds. The Fund may also invest directly in derivative instruments (including commodity futures) for the purposes of investment and efficient portfolio management.

By combining diversified and relatively uncorrelated assets, investment risk is controlled and kept in line with the Fund's 'balanced' risk profile.

Details about the Fund's 'balanced' risk profile are available in the Prospectus.

FUND MANAGER'S REPORT

On 4 June 2018, share class 4 of this Fund was closed and merged into share class 1 and share class R3 of this Fund was renamed as share class 2.

Performance

Over the twelve months ended 28 February 2019, the Fund returned -1.72% (net of fees).

Review

Growth assets struggled for much of the year as investors appeared concerned about a potential slowdown in global economic activity and, in turn, how that might affect corporate profitability. The Fund's tactical overweight exposure to growth assets adversely affected returns.

Allocations to European and emerging market equities detracted from performance, as the introduction of tariffs on goods imported into the US threatened to curtail trade volumes and profitability among manufacturers. Elsewhere, increased investment in US equities was rewarded as they outperformed those in other regions; benefiting from a healthy economic background and strong company profitability.

Defensive assets fared relatively well over the year, helping to offset some of the weakness in equity markets. The allocation to corporate bonds was increased towards the end of the year as valuations had become more appealing. Healthy economic conditions and company tax cuts are supporting corporate profitability in the US, underlining the appeal of an allocation to both investment grade and high yield credit. An allocation to hard currency emerging market bonds was also added to the portfolio during the year.

Uncorrelated assets detracted from performance. Portfolio positioning reflected the likelihood of rising interest rates, continuing solid economic growth and a normalisation of inflation. These views were expressed through various equity markets, including European mid-caps, emerging market smaller-companies and global financials, as well as through long inflation and short duration strategies. Collectively these strategies performed less well than anticipated over the year, although the Fund's allocation to uncorrelated assets is expected to add value over time.

Outlook

The pace of global growth is expected to moderate in 2019, while remaining above trend. At the same time, major central banks are expected to tighten policy, but perhaps less than initially expected last year. As a result, overweight exposure to growth assets continues to be held. Valuations in all areas of the market are monitored closely and portfolio positioning will be amended as and when opportunities are identified and where relative value emerges.

AVIVA INVESTORS MULTI-ASSET FUND IV (CONTINUED)

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean ‘risk free’.
- Further information on the risks applicable to the Fund is detailed in the Fund’s Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at www.avivainvestors.com or from the ACD on request.

(a) Changes to fee rates were made during the year and the Ongoing Charge Figure has been amended to be future proofed for this change.

(b) The ongoing charge has been annualised for a share class that has not yet been open for a full year.

[#] The direct transaction costs have been stated after deducting, in the case of single-priced funds, the proportion of the amounts collected from dilution adjustments or dilution levies that relates to direct transaction costs and, in the case of dual-priced funds, the amounts collected in relation to direct transaction costs added to, or subtracted from, the valuations by virtue of COLL 6.3.6 G (4).

[≈] The high and low prices disclosed are the high and low prices for the accounting period and not the calendar year. The net asset value per share is based on the net asset value in the published accounts and may be different due to post year end accounting adjustments.

Class 2	0.58%	0.56%
Class 3	0.60%	0.61%
Class 9	0.33%	0.35%

* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the year. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

The OCF on share class 2 is capped at 0.60%, though the actual figure may be lower. The OCF on share class 9 is capped at 0.35%, though the actual figure may be lower. The OCF includes a synthetic charge of 0.07% (2018: 0.08%) in respect of underlying investments.

** Following the update to the Prospectus and the change in charging structure of the Fund part way through the period, the ongoing charges figure has been based on the revised fee structure and therefore is not on an ex-post basis.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

5 Taxation**a Analysis of tax charge**

	Year ended 28.02.19 £000	Year ended 28.02.18 £000
Overseas tax suffered	167	(1)
Total tax for the year (see note 5b)	167	(1)

b Factors affecting current tax charge

The tax assessed for the year is lower (2018: lower) than the standard rate of corporation tax in the UK for an Authorised Investment Fund (20%) (2018: 20%).

The differences are explained below:

	Year ended 28.02.19 £000	Year ended 28.02.18 £000
Net revenue before taxation	10,680	3,074
Corporation tax at 20%	2,136	615
Effects of:		
Franked distributions not subject to corporation tax	(643)	(503)
Movement in excess management expenses	(98)	128
Overseas dividends not subject to corporation tax	(1,395)	(317)
Overseas tax suffered	167	(1)
Tax relief on realised gain on offshore funds	–	30
Tax relief on unrealised gain on offshore funds	–	47
Current tax charge (see note 5a)	167	(1)

Authorised Investment Funds are exempt from tax on capital gains. Therefore, any capital return is not included in the above reconciliation.

c Deferred tax

There was no material unprovided deferred tax (2018: £nil).

After claiming relief against accrued income taxable on receipt, the Fund has unrelieved excess expenses of £2,463,429 (2018: £2,953,268) creating a potential deferred tax asset of £492,686 (2018: £590,654). It is unlikely that the Fund will generate taxable profits in the future to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

6 Distributions

	Year ended 28.02.19 £000	Year ended 28.02.18 £000
The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:		
Interim distribution	7,047	2,710
Final distribution	3,474	885
	10,521	3,595
Add: Revenue deducted on cancellation of shares	181	26
Deduct: Revenue received on issue of shares	(172)	(451)
Total distributions	10,530	3,170
Reconciliation of distributions for the year to net revenue after taxation		
Distributions for the year	10,530	3,170
ACD's periodic charge borne by the capital account	(20)	–
Equalisation on conversions	2	–
Revenue deficit transferred to capital	–	(95)
Undistributed revenue carried forward	1	–
Net revenue after taxation	10,513	3,075

Details of the distributions per share are set out in the distribution tables on page 121.

7 Fair value hierarchy

Valuation technique	As at 28.02.19		As at 28.02.18	
	Assets £000	Liabilities £000	Assets £000	Liabilities £000
Level 1: Quoted prices	43,728	(1,505)	33,161	(1,555)

Total	567,667	(1,505)	566,600	(1,562)

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities.

The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority is given to unobservable inputs. Disclosure is required of the value in each category in order to give an insight into the extent to which fair value measurements are subjective.

The disclosure is split into the following categories:

Level 1: Unadjusted quoted price in an active market for an identical instrument;

Level 2: Valuation techniques using observable inputs other than quoted prices within level 1;

Level 3: Valuation techniques using unobservable inputs.

16 Derivatives and other financial instruments

The policies applied in the management of financial instruments are set out on pages 7 and 8.

Fair value of financial assets and financial liabilities

There is no significant difference between the carrying values of the financial assets and liabilities and their fair values (2018: £nil).

Currency risk

At the year end date, 0.01% (2018: 3.86%) of the net assets of the Fund were denominated in currencies other than sterling and as such, the currency risk is not considered significant.

Interest rate risk

At the year end date 8.17% (2018: 20.04%) of the net assets of the Fund were interest bearing and as such the interest rate risk is not considered significant.

The interest rate profile of the Fund's financial assets and liabilities at 28 February 2018 was:

Currency 28.02.18	Floating Rate £000	Fixed Rate £000	None £000	Total £000
Financial Assets				
Sterling	87,602	–	463,268	550,870

US dollar	–	–	(29,549)	(29,549)
Total	85,398	29,302	457,758	572,458

The floating rate on bank balances is linked to the Depositary's base rate.

The Fund invests in some collective investment schemes (CIS) which predominantly invest in debt securities. The revenue of the Fund and the value of debt securities may be affected by interest rate movements in the future. At the year end date 21.6% (2018: 8.33%) of the assets of the Fund were invested in CIS which predominantly invest in debt securities.

Market price risk

At the year end date, 97.93% (2018: 83.76%) of the net assets of the Fund were invested in ordinary shares or stock units or debt securities admitted to an official stock exchange. If the market value were to change by 10%, the value of the Fund would change by 9.79% (2018: 8.38%).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

17 Counterparty exposure**Financial derivative exposure**

The types of derivatives held at the year end date were forward currency contracts and futures contracts. Details of individual contracts are disclosed in the Portfolio Statement and the total position by counterparty at the year end date was as follows:

UBS	–	3,859	3,859
Total	1,021	3,859	4,880

The counterparty exposure on forward currency contracts is reported at their mark to market values but for futures contracts it is only the positive mark to market values that are reported.

Collateral

At the year end date no collateral was held or pledged by the company or on behalf of the counterparties in respect of the above (2018: £nil).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

18 Direct transaction costs

In the case of shares, broker commissions and transfer taxes, stamp duty is paid by the Fund on each transaction. In addition, there is a dealing spread between buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of the dealing spread.

Interim distribution

Group 1 shares are those shares purchased at or before 2pm on 28 February 2018.

Group 2 shares are those shares purchased after 2pm on 28 February 2018.

Equalisation

Equalisation applies only to Group 2 shares, in other words shares purchased during the period. It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

AVIVA INVESTORS MULTI-ASSET FUND V

INVESTMENT OBJECTIVE

The Fund aims to provide capital growth.

INVESTMENT POLICY

The Fund aims to achieve the investment objective by employing a blend of both strategic and tactical asset allocation across a diversified range of global asset classes.

The Fund may invest in securities, fixed income assets, Exchange Traded Funds, collective investment schemes, warrants, money market instruments, deposits, cash, near cash, property and commodities. Exposure to property and commodities will be via collective investment schemes and Exchange Traded Funds. The Fund may also invest directly in derivative instruments (including commodity futures) for the purposes of investment and efficient portfolio management.

By combining diversified and relatively uncorrelated assets, investment risk is controlled and kept in line with the Fund's 'adventurous' risk profile.

Details about the Fund's 'adventurous' risk profile are available in the Prospectus.

FUND MANAGER'S REPORT

On 4 June 2018, share class 4 of this Fund was closed and merged into share class 1 and share class R3 of this Fund was renamed as share class 2.

Performance

Over the twelve months ended 28 February 2019, the Fund returned -2.34% (net of fees).

Review

Growth assets struggled for much of the year as investors appeared concerned about a potential slowdown in global economic activity and, in turn, how that might affect corporate profitability.

The introduction of tariffs on goods imported into the US also had an adverse influence on sentiment in some regions. Emerging markets and European stocks struggled for example, reflecting a slowdown in export demand and concerns over the associated impact on manufacturers' profitability. Tactical overweight positions in these asset classes were held, which detracted from performance.

Elsewhere, increased investment in US equities was rewarded as they outperformed those in other regions; benefiting from a healthy economic background and strong company profitability. Brexit-related uncertainties clouded the outlook for UK stocks for much of the year and while exposure was increased slightly, the Fund maintained limited exposure to the domestic share market.

The Fund does not typically hold significant investments in fixed income markets, although an allocation to hard currency emerging market bonds was added to the portfolio during the year. Exposure to high yield corporate bonds was also increased after valuations had become more attractive.

Outlook

The pace of global growth is expected to moderate in 2019, while remaining above trend. Growth assets are expected to make positive progress against this background. Valuations in all areas of the market are monitored closely and portfolio positioning will be amended as and when opportunities are identified and where relative value emerges.

March 2019

* Fund performance figures – share class 1, source Lipper, net of fees, net income reinvested in GBP, as at 28 February 2019.

As noted above, the performance figures in this commentary have been sourced from an external party and are based on published prices. The performance figures quoted in the comparative tables on pages 124 and 125 are based on the net asset value per the published accounts and may be different due to post year end accounting adjustments.

Any opinions expressed are those of the Fund manager. They should not be viewed as a guarantee of a return from an investment in the Funds. The content of the commentary should not be viewed as a recommendation to invest nor buy or sell any securities. Past performance is not a guide to the future. The value of a fund and the income from it may go down as well as up, and the investor may not get back the original amount invested.

AVIVA INVESTORS MULTI-ASSET FUND V (CONTINUED)

The Fund has been allocated a risk number based on the historic volatility of its share price. Where insufficient share price information is available, the risk number has been based on the historic volatility of the asset classes appropriate to the Fund.

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean ‘risk free’.
- Further information on the risks applicable to the Fund is detailed in the Fund’s Key Investor Information Document, and a full description is set out in the Prospectus, both of which are available on the internet at www.avivainvestors.com or from the ACD on request.

[‡] The operating charges are calculated on an ex-post basis and as such may differ from the Ongoing Charge Figure where:

(a) Changes to fee rates were made during the year and the Ongoing Charge Figure has been amended to be future proofed for this change.

(b) The ongoing charge has been annualised for a share class that has not yet been open for a full year.

[§] The direct transaction costs have been stated after deducting, in the case of single-priced funds, the proportion of the amounts collected from dilution adjustments or dilution levies that relates to direct transaction costs and, in the case of dual-priced funds, the amounts collected in relation to direct transaction costs added to, or subtracted from, the valuations by virtue of COLL 6.3.6 G (4).

[¶] The high and low prices disclosed are the high and low prices for the accounting period and not the calendar year. The net asset value per share is based on the net asset value in the published accounts and may be different due to post year end accounting adjustments.

[§] The share class was closed on 1 June 2018.

Ongoing Charges Figure*

Share class	28.02.19	28.02.18
Class 1	0.81%**	1.31%
Class 2	0.59%	0.56%
Class 3	0.61%	0.61%
Class 9	0.34%	0.35%

* The Ongoing Charges Figure (OCF) is calculated as the ratio of the total ongoing charges to the average net asset value of the Fund over the year. The OCF is made up of the Fund Management Fee and, where a fund invests a substantial portion of its assets in other funds, an amount for the pro-rated charges of those other funds (referred to as "synthetic charges" or the "synthetic" part of the ongoing charge). The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment scheme.

The OCF on share class 2 is capped at 0.60%, though the actual figure may be lower. The OCF on share class 9 is capped at 0.35%, though the actual figure may be lower. The OCF includes a synthetic charge of 0.06% (2018: 0.07%) in respect of underlying investments.

** Following the update to the Prospectus and the change in charging structure of the Fund part way through the period, the ongoing charges figure has been based on the revised fee structure and therefore is not on an ex-post basis.

Please remember that past performance is not a guide to future performance and it might not be repeated. The value of investments and the revenue from them may go down as well as up and investors may not get back the amount originally invested. Because of this, you are not certain to make a profit on your investments and you may lose money.

5 Taxation

a Analysis of tax charge

	Year ended 28.02.19 £000	Year ended 28.02.18 £000
Overseas tax suffered	56	–
Total tax for the year (see note 5b)	56	–

b Factors affecting current tax charge

The tax assessed for the year is lower (2018: lower) than the standard rate of corporation tax in the UK for an Authorised Investment Fund (20%) (2018: 20%).

The differences are explained below:

	Year ended 28.02.19 £000	Year ended 28.02.18 £000
Net revenue before taxation	2,752	426
Corporation tax at 20%	550	85
Effects of:		
Franked distributions not subject to corporation tax	(160)	(97)
Movement in excess management expenses	46	89
Overseas dividends not subject to corporation tax	(436)	(94)
Overseas tax suffered	56	–
Tax relief on realised gain on offshore funds	–	7
Tax relief on unrealised gain on offshore funds	–	10
Current tax charge (see note 5a)	56	–

Authorised Investment Funds are exempt from tax on capital gains. Therefore, any capital return is not included in the above reconciliation.

c Deferred tax

There is no material unprovided deferred tax (2018: £nil).

After claiming relief against accrued income taxable on receipt, the Fund has unrelieved excess expenses of £1,458,130 (2018: £1,230,610*) creating a potential deferred tax asset of £291,626 (2018: £246,122*). It is unlikely that the Fund will generate taxable profits in the future to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

* Restated figures to agree to final tax computation.

6 Distributions

	Year ended 28.02.19 £000	Year ended 28.02.18 £000
The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:		
Interim distribution	1,940	504
Final distribution	780	35
	2,720	539
Add: Revenue deducted on cancellation of shares	40	12
Deduct: Revenue received on issue of shares	(58)	(77)
Total distributions	2,702	474
Reconciliation of distributions for the year to net revenue after taxation		
Distributions for the year	2,702	474
ACD's periodic charge borne by the capital account	(6)	–
Revenue deficit transferred to capital	–	(48)
Net revenue after taxation	2,696	426

Details of the distributions per share are set out in the distribution tables on page 136.

7 Fair value hierarchy

Valuation technique	As at 28.02.19		As at 28.02.18	
	Assets £000	Liabilities £000	Assets £000	Liabilities £000
Level 1: Quoted prices	18,532	(333)	1,019	(390)
Level 2: Observable market data	129,706	(36)	133,019	(3)
Total	148,238	(369)	134,038	(393)

The purpose of the fair value hierarchy is to prioritise the inputs that should be used to measure the fair value of assets and liabilities.

The highest priority is given to quoted prices at which a transaction can be entered into and the lowest priority is given to unobservable inputs. Disclosure is required of the value in each category in order to give an insight into the extent to which fair value measurements are subjective.

The disclosure is split into the following categories:

Level 1: Unadjusted quoted price in an active market for an identical instrument;

Level 2: Valuation techniques using observable inputs other than quoted prices within level 1;

Level 3: Valuation techniques using unobservable inputs.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

16 Derivatives and other financial instruments

The policies applied in the management of financial instruments are set out on pages 7 and 8.

Fair value of financial assets and financial liabilities

There is no significant difference between the carrying values of the financial assets and liabilities and their fair values (2018: £nil).

Currency risk

At the year end date, 2.08% (2018: 5.01%) of the net assets of the Fund were denominated in currencies other than sterling and as such, the currency risk is not considered significant.

Interest rate risk

At the year end date 3.17% (2018: 5.82%) of the net assets of the Fund were interest bearing and as such the interest rate risk is not considered significant.

The floating rate on bank balances is linked to the Depositary's base rate.

The Fund invests in some collective investment schemes (CIS) which predominantly invest in debt securities. The revenue of the Fund and the value of debt securities may be affected by interest rate movements in the future. At the year end date 12.37% (2018: 8.90%) of the assets of the Fund were invested in CIS which predominantly invest in debt securities.

Market price risk

At the year end date, 95.98% (2018: 93.46%) of the net assets of the Fund were invested in in CIS (which primarily invest in stocks admitted to an official stock exchange) and debt securities. If the market value were to change by 10%, the value of the Fund would change by 9.60% (2018: 9.35%).

17 Counterparty exposure

Financial derivative exposure

The types of derivatives held at the year end date were forward currency contracts and futures contracts. Details of individual contracts are disclosed in the Portfolio Statement and the total position by counterparty at the year end date was as follows:

	Forward currency contracts £000	Futures contracts £000	Total £000
28.02.19			
Barclays	43	–	43
Goldman Sachs	(36)	–	(36)
J.P. Morgan	43	–	43

Citibank	(1)	–	(1)
Royal Bank of Canada	49	–	49
UBS	–	1,019	1,019
Total	48	1,019	1,067

The counterparty exposure on forward currency contracts is reported at their mark to market values but for futures contracts it is only the positive mark to market values that are reported.

Collateral

At the year end date no collateral was held or pledged by the company or on behalf of the counterparties in respect of the above (2018: £nil).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

18 Direct transaction costs

In the case of shares, broker commissions and transfer taxes, stamp duty is paid by the Fund on each transaction. In addition, there is a dealing spread between buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of the dealing spread.

Dealing spread

As at 28 February 2019, the average portfolio dealing spread was nil% (2018: nil%). This spread represents the difference between the values determined respectively by reference to the bid and offer prices of investments expressed as a percentage of the value determined by reference to the offer price.

19 Post balance sheet events

There are no post balance sheet events which require adjustment or disclosure at the year end (2018: £nil).

Interim distribution

Group 1 shares are those shares purchased at or before 2pm on 28 February 2018.

Group 2 shares are those shares purchased after 2pm on 28 February 2018.

Equalisation

Equalisation applies only to Group 2 shares, in other words shares purchased during the period. It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

STATEMENT OF THE AUTHORISED CORPORATE DIRECTOR'S RESPONSIBILITIES

The Collective Investment Schemes Sourcebook of the Financial Conduct Authority requires the Authorised Corporate Director (ACD) to prepare financial statements for each accounting period which give a true and fair view of the financial position of the Company at the period end and of the net revenue and net gains or losses on the scheme property of the Company for the period then ended.

In preparing the financial statements the ACD is required to:

- follow applicable accounting standards;
- make judgements and estimates that are reasonable and prudent;
- select suitable accounting policies and then apply them consistently;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in operation for the foreseeable future; and
- comply with the Instrument of Incorporation of the Company and the Statement of Recommended Practice for Authorised Funds.

The ACD is required to keep proper accounting records and to manage the Company in accordance with the Regulations and the Instrument of Incorporation.

The ACD is responsible for taking reasonable steps for the prevention and detection of fraud and other irregularities.

AUTHORISED CORPORATE DIRECTOR'S STATEMENT

We hereby approve the Report and Financial Statements of Aviva Investors Portfolio Funds ICVC for the year ended 28 February 2019 on behalf of Aviva Investors UK Fund Services Limited in accordance with the requirements of the Collective Investment Schemes Sourcebook of the Financial Conduct Authority.

STATEMENT OF THE DEPOSITARY'S RESPONSIBILITIES

The Depositary is responsible for the safe keeping of all the property of the company (other than tangible moveable property) which is entrusted to it and for the collection of revenue that arises from that property.

It is the duty of the Depositary to take reasonable care to ensure that the Company is managed by the Authorised Corporate Director in accordance with the Financial Conduct Authority's Collective Investment Schemes Sourcebook ("the COLL Sourcebook"), the Open-Ended Investment Companies Regulations 2001 (SI 2001/1228) ("the OEIC Regulations") and the Company's Instrument of Incorporation and Prospectus, as appropriate, in relation to the pricing of, and dealings in, shares in the Company; the application of income of the Company; and the investment and borrowing powers of the Company.

DEPOSITARY'S REPORT TO THE SHAREHOLDERS

Having carried out such procedures as we consider necessary to discharge our responsibilities as Depositary of the Company, it is our opinion, based on the information available to us and the explanations provided, that in all material respects the Authorised Corporate Director:

- (i) has carried out the issue, sale, redemption and cancellation, and calculation of the price of the Company's shares and the application of the Company's income in accordance with the COLL Sourcebook, as appropriate, and, where applicable, the OEIC Regulations and the Company's Instrument of Incorporation and Prospectus; and
- (ii) has observed the investment and borrowing powers and restrictions applicable to the Company.

INDEPENDENT AUDITORS' REPORT TO THE SHAREHOLDERS OF AVIVA INVESTORS PORTFOLIO FUNDS ICVC

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS

OPINION

In our opinion, Aviva Investors Portfolio Funds ICVC's financial statements:

- give a true and fair view of the financial position of the Company and each of the sub-funds as at 28 February 2019 and of the net revenue and the net capital losses on the scheme property of the Company and each of the sub-funds for the year then ended; and
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards, comprising FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland", and applicable law), the Statement of Recommended Practice for UK Authorised Funds, the Collective Investment Schemes sourcebook and the Instrument of Incorporation.

Aviva Investors Portfolio Funds ICVC (the "company") is an Open Ended Investment Company ('OEIC') with 8 sub-funds. The financial statements of the company comprise the financial statements of each of the sub-funds. We have audited the financial statements, included within the Annual Report and Financial Statements (the "Annual Report"), which comprise: the balance sheets as at 28 February 2019; the statements of total return and the statements of change in net assets attributable to shareholders for the year then ended; the distribution tables; the accounting policies (within Policies and Risks); and the notes to the financial statements.

BASIS FOR OPINION

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities under ISAs (UK) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, which includes the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

CONCLUSIONS RELATING TO GOING CONCERN

ISAs (UK) require us to report to you when:

- the Authorised Corporate Directors' use of the going concern basis of accounting in the preparation of the financial statements is not appropriate; or
- the Authorised Corporate Director has not disclosed in the financial statements any identified material uncertainties that may cast significant doubt about the Company's or any of the sub-funds' ability to continue to adopt the going concern basis of accounting for a period of at least twelve months from the date when the financial statements are authorised for issue.

We have nothing to report in respect of the above matters.

However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the Company's or any of the sub-funds' ability to continue as a going concern. For example, the terms on which the United Kingdom may withdraw from the European Union are not clear and it is difficult to evaluate all of the potential implications on the Company's or any of the sub-funds' business and the wider economy.

REPORTING ON OTHER INFORMATION

The other information comprises all of the information in the Annual Report other than the financial statements and our auditors' report thereon. The Authorised Corporate Director is responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

Report of the Authorised Corporate Director

In our opinion, the information given in the Authorised Corporate Director's Report for the financial year for which the financial statements are prepared is consistent with the financial statements.

INDEPENDENT AUDITORS' REPORT TO THE SHAREHOLDERS OF AVIVA INVESTORS PORTFOLIO FUNDS ICVC (CONTINUED)

RESPONSIBILITIES FOR THE FINANCIAL STATEMENTS AND THE AUDIT

Responsibilities of the Authorised Corporate Director for the financial statements

As explained more fully in the Statement of the Authorised Corporate Director's Responsibilities set out on page 137, the Authorised Corporate Director is responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view. The Authorised Corporate Director is also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Authorised Corporate Director is responsible for assessing the company's and each of the sub-funds ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the Authorised Corporate Director either intends to wind up or terminate the company or individual sub-fund, or has no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the Company's shareholders as a body in accordance with paragraph 4.5.12 of the Collective Investment Schemes sourcebook as required by paragraph 67(2) of the Open-Ended Investment Companies Regulations 2001 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

OTHER REQUIRED REPORTING

OPINION ON MATTER REQUIRED BY THE COLLECTIVE INVESTMENT SCHEMES SOURCEBOOK

In our opinion, we have obtained all the information and explanations we consider necessary for the purposes of the audit.

COLLECTIVE INVESTMENT SCHEMES SOURCEBOOK EXCEPTION REPORTING

Under the Collective Investment Schemes sourcebook we are also required to report to you if, in our opinion:

- proper accounting records have not been kept; or
- the financial statements are not in agreement with the accounting records.

We have no exceptions to report arising from this responsibility.
