

# RiskEye

## Online Reputation Security

We can provide online reputation security services through our Specialist Partner RiskEye. These solutions are available to Aviva customers at preferential rates.

The reputation of any business is key to how customers view them. If their reputation is damaged as a result of online harm, this can cause serious long term financial problems, from which some businesses may never recover.

## Services

- Digital Health check benchmarking – helping you to get your digital house in order.
- 24/7 online reputation protection services – proprietary software and risk analysts that identify, prioritise, and alert a business to risk.
- Mitigation specialists that can help to resolve an online issue before it jeopardises the businesses reputation.
- Online crisis management; specialists at your side, strategic road maps to recovery, incident tracking to resolution and continuity planning.

## Benefits

- Can help to protect the reputation of your business
- Online attacks can be managed in real time
- Provides a business with specialists in online risk
- Can help to make online an asset to a business' reputation and not a risk
- Helps to protect a business' digital profile
- Helps to bring peace of mind through proactive prevention
