

Aviva Risk Management Solutions

What your clients can expect from us when building a safer business.

Why choose ARMS?

Aviva Risk Management Solutions offer customised risk management and prevention solutions and services, for businesses of all shapes and sizes.

The world is increasingly complex, unpredictable and interconnected, making the ability to manage existing and emerging risks more important than ever. Among our team we have a range of technical specialists who can help identify, evaluate and quantify the risks your clients face. From property, liability and motor to business continuity, we can help you build safer, more robust businesses.

Five reasons to choose ARMS:

1. We have over 100 expert risk consultants, who can look at the key risks to your clients' businesses – and help put in place measures to combat them
2. We provided continuous and timely communication and resources throughout the pandemic to help brokers and businesses manage the ever-changing risk landscape – including regular news, insights and updates from risk experts
3. Through our back to business campaign and beyond, we produced multiple resources, including 170+ [Loss Prevention Standards](#) (45+ of which were COVID-19-specific), as well as guides, podcasts and webinars
4. Our Specialist Partner Network gives Aviva customers access to the latest prevention solutions at discounted rates
5. We can offer virtual risk assessments and have kept supporting our customers through Aviva Self Assess tools and Virtual Risk Management surveys

And five ways we're becoming even better:

1. In partnership with SafetyCulture, we offer our customers access to 'return to work' education modules via EdAPP, an e-learning platform that helps organisations get back to business
2. Our new [ARMS](#) website offers easier navigation, improved search functionality and makes all resources available to anyone, free of charge
3. We've updated and rebranded all our Risk Management Guides, so customers always have access to the latest advice when they need it
4. In future, we'll be focusing more on our renewable energy and supply chain prevention offering to support the sustainability agenda
5. We're launching a new Hot Work Site Induction Tool – powered by the RISC Authority – to tackle the real issue of Hot Work-related incidents
