## BOARD OF DIRECTORS' AND CONDUCTING OFFICERS REPORT

Dear Shareholders,

The Directors of Aviva Investors SICAV (the “Fund” or the “Company”) have the pleasure of presenting the annual report and audited financial statements to the shareholders for the year ended 31 December 2024.

### Activities during the year:

At year end, the total net assets of the Sub-Funds (the “Sub-Funds”) of the Company were EUR 30,670,061,969 compared to EUR 29,522,666,093 on 31 December 2023, representing an increase of 3.89%.

During the year ended 31 December 2024, the following Share Classes have been launched:

Sub-Fund Name	Share Class	Class Currency	Base Currency	Investment Management Fees	Distribution Fees	Date Launched
Aviva Investors - Emerging Markets Bond Fund	R Share Class Accumulation EUR	EUR	USD	0.00%	0.00%	16 December 2024

Aviva Investors - Short Duration Global High Yield Bond Fund	I Share Class Accumulation Hedged GBP	GBP	USD	22 March 2024

## Changes in the Board of Directors:

Changes to the composition of the Board of Directors (the "Board") are shown on page 7.

## Management Company role and responsibilities:

Aviva Investors Luxembourg S.A. as the Management Company is responsible for the investment management, administration and distribution functions of the Company. Aviva Investors Luxembourg S.A. may delegate part or all of such functions to third parties, subject to overall control and supervision. Please refer to the "Management and administration" section to get more details on delegations in place.

## Conducting officers:

The Management Company has appointed Conducting officers, in charge of the day to day management which are:

- Victoria Kernan
- Martin Bell
- Grégory Nicolas (until 31 May 2024)
- Sophie Vilain
- Cindy Joller
- Justine Losic (until 12 January 2024)
- Matteo Sbrolla (from 22 July 2024)

The Directors of the Company are required to take decisions in the interests of the Company and its Shareholders and to refrain from taking part in any deliberation or decision which creates conflict between their personal interests and those of the Company and its Shareholders.

The Board of Directors meets at least four times a year. The Board requests and receives reports from Aviva Investors Luxembourg S.A. on the various activities including compliance controls and risk management undertaken by the Management Company. Senior Aviva Investors Luxembourg S.A. representatives attend all of the quarterly Board meetings, thus enabling the Board to question the reports presented to it.

The Board reviews the Annual Report, the external audit process, corporate governance issues, agreements with various key service providers and the relationship with the external Auditor, including the recommendation to Shareholders of its appointment and level of fees.

A new director can be co-opted by existing directors of the Company following the resignation of one director. Such co-optation is required to be ratified by the shareholders at the Annual General Meeting ("AGM"). If there is no resignation, the existing directors cannot proceed by way of co-optation, and the approval of the shareholders at an AGM or Extraordinary General Meeting ("EGM") will be required to appoint a new director. Commission de Surveillance du Secteur Financier ("CSSF") approval is required in both circumstances. Directors who are affiliated with Aviva investors and its affiliates and subsidiaries have waived their fees for the year ended 31 December 2024.

The Company is subject to corporate governance based on:

Its obligations as defined by the UCITS Directive 2009/65/EC dated 13 July 2009, as implemented in Luxembourg law which is available for inspection at the registered office of the Company.

Its Articles of Incorporation which are available for inspection at the registered office of the Company and at the Luxembourg corporate and trade register, Registre de Commerce et des Sociétés.

Its rules of conduct which have been adopted pursuant to applicable requirements under CSSF Regulation 10-4 and CSSF Circular 18-698 for which the Company relies on:

- the Association of the Luxembourg Fund Industry ("ALFI") code of conduct for Luxembourg investment funds. The code of conduct sets a framework of high-level principles and best practice recommendations for the governance of Luxembourg investment funds.

The Board of Directors consider that the Fund has been in compliance with this code in all material aspects throughout the year ended 31 December 2024.

## BOARD OF DIRECTORS' AND CONDUCTING OFFICERS REPORT (CONTINUED)

### Environmental, Social & Governance (ESG) Sub-Funds:

On EU Sustainable Finance Disclosure Regulation (SFDR), information about the environmental or social characteristics and sustainable investment objectives, as applicable, are available in the ENVIRONMENTAL, SOCIAL & GOVERNANCE (ESG) SUB-FUNDS (Unaudited) section of the annual report. Further information regarding how the Investment Manager integrates ESG into its investment approach, its proprietary ESG model and how it engages with companies for each Sub-Funds is available on the website <http://www.avivainvestors.com>.

### Annual General Meeting:

The annual general meeting shall be held in the Grand Duchy of Luxembourg at the registered office of the Company, or at such other place in Luxembourg as may be specified in the notice of the meeting, at any date and time decided by the Board but no later than within 6 months from the end of the Company's previous financial year.

### Significant Events:

Effective 17 January 2024, Global Equity Income Fund was launched.

Effective 15 February 2024, Aviva Investors - European Corporate Bond Fund has been liquidated.

Effective 21 May 2024, Aviva Investors - Global Convertibles Fund has been liquidated.

Effective 12 July 2024, Aviva Investors - Asian Equity Income Fund has been liquidated.

Effective 24 October 2024, Aviva Investors - Global Convertibles Absolute Return Fund has been liquidated.

Effective 28 June 2024, Ernst & Young S.A. replaced PricewaterhouseCoopers as Auditor to the Fund.

DocuSigned by:

*Denise Voss*

## MANAGER'S MARKET REVIEW

### 2024 MARKET REVIEW

2024 proved to be a second-consecutive year of strong performance by equities, with the US proving to be the powerhouse once again as it confounded expectations of a 'hard economic landing'. A rally of 21.6% in local currency terms by the MSCI World Index for the calendar year was nevertheless in stark contrast to global government bonds, which produced a flat return amid concerns about raised issuance and higher-for-longer interest rates.

Equities were underpinned by the continuation of broadly positive corporate earnings and hopes that easier monetary conditions were around the corner. Growth was nevertheless uninspiring in most regions, with China offering little evidence that it was emerging from its recent slump, even despite enjoying a manufacturing boom thanks to its clear leadership in the manufacture of EVs. Europe languished in stagnation throughout the year as the performance of its largest economy, Germany, dipped alarmingly. Only the US stood out, thanks in no small measure to both the ongoing boom for artificial intelligence technology and its structural advantage of cheap energy.

In local terms, the leading markets were the US (S&P Composite 25.0%) and Japan Topix (20.5%). The MSCI Europe ex-UK Index returned a more subdued but still respectable 8.1%. Emerging markets generally performed well (MSCI Emerging Markets Index 13.7%) as they benefited from the continued normalisation of global trade and early cuts in interest rates by a number of central banks.

Though touted to be a year of much brighter prospects, 2024 developed into something of a damp squib for sovereign bonds. Concerns that inflation was not returning to target as quickly as had been anticipated caused the central banks to talk down the likelihood of early cuts in interest rates. It was not until June that the European Central Bank became the first of the major monetary custodians to start the process of returning interest rates to a more neutral level. Despite kicking off with an outsized 50 basis point reduction in September, the US Federal Reserve shifted its thinking to a slower pace of easing as stronger-than-expected growth increased the possibility of inflation reaccelerating. This resulted in bonds ending an already disappointing year on a further weak note.

Corporate bonds were more resilient. Although their fortunes are linked closely to sovereign bonds, returns were boosted by a narrowing of yield spreads. Spreads were able to compress from already tight levels because of ongoing solid company fundamentals and strong demand from institutional investors who were keen to lock in higher yields while they were still available.

## Independent auditor's report

To the Shareholders of  
Aviva Investors  
2, rue du Fort Bourbon  
L-1249 Luxembourg  
Grand Duchy of Luxembourg

### Opinion

We have audited the financial statements of Aviva Investors and of each of its sub-funds (the "Fund"), which comprise the combined statement of net assets and the portfolio of investments and other net assets as at 31 December 2024 and the combined statement of operations and changes in net assets for the year then ended, and the notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund and of each of its sub-funds as at 31 December 2024, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

### Basis for Opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (the "Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" ("CSSF"). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements" section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### Other matter

The financial statements of Aviva Investors for the year ended 31 December 2023 were audited by another "réviseur d'entreprises agréé" who expressed an unmodified opinion on those financial statements on 30 April 2024.

**Shape the future  
with confidence**

### **Other information**

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our report of the “réviseur d’entreprises agréé” thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

### **Responsibilities of the Board of Directors of the Fund for the financial statements**

The Board of Directors of the Fund is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund’s and each of its sub-funds’ ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

### **Responsibilities of the “réviseur d’entreprises agréé” for the audit of the financial statements**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the “réviseur d’entreprises agréé” that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

**Shape the future  
with confidence**

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund.
- Conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé". However, future events or conditions may cause the Fund or any of its sub-funds (except for the sub-fund Aviva Investors – Social Transition Global Equity Fund where a decision to close exists) to cease to continue as a going concern.
- In respect of the sub-fund where a decision or an intention to close exists, we conclude on the appropriateness of the Board of Directors of the Fund's use of the non-going concern basis of accounting. We also evaluate the adequacy of the disclosures describing the non-going basis of accounting and reasons for its use. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé".
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

## NOTES ON THE PORTFOLIO OF INVESTMENTS DISCLOSURE:

Please note that the Portfolio of Investments and Other Net Assets has been prepared based on the country of incorporation of each position. To ensure consistency within this report, the same approach has been applied to all categories of investments. A disclosure based on country of risk could lead to a different geographical classification. Investments in China are shown with the suffix 'A' or 'H' which signifies:

China A-Shares

Companies incorporated in mainland China and which are traded in the mainland A-Share markets.

China H-Shares

Companies incorporated in mainland China and listed in Hong Kong and other foreign stock exchanges.

Please also note that the geographical allocation of the portfolios excludes derivatives exposure.

## NOTES TO THE FINANCIAL STATEMENTS

As at 31 December 2024

### 1. GENERAL

#### 1.1 THE COMPANY

Aviva Investors (the "Fund") is a Variable Capital Investment Company (Société d'Investissement à Capital Variable) established in the Grand Duchy of Luxembourg under Part I of the law of 17 December 2010, as amended (UCITS V). The Fund was incorporated in Luxembourg on 16 January 1990 for an unlimited period. The Fund operates as an open ended investment Fund.

The Company is structured to provide both institutional and individual investors with a choice of investment portfolios, each offering different investment objectives designed to meet specific risk expectations and diversification requirements.

As at 31 December 2024, the Fund comprises 18 active Sub-Funds.

Distributions are disclosed in the caption "Dividend distributions" in the Combined Statement of Operations and Changes in Net Assets.

#### 1.2 THE SHARE CLASSES

The Board may issue A, B, C, D, F, H, I, J, K, L, M, R, S, V and Z Share Classes in any currency, as accumulation or distribution share classes, and which may be hedged or unhedged. Accumulation share classes with UK reporting status are designated with "y", distribution share classes are designated with "a", "q" or "m" depending on the dividend distribution frequency, and hedged share classes are designated with "h".

##### 1.2.1 CURRENCY

Share Classes may be available in various currencies (each a "Class Currency") other than the reference currency of the Sub-Fund. Where offered in a currency other than the reference currency of the relevant Sub-Fund, a Share Class is designated as such.

##### 1.2.2 DIVIDEND POLICY

It is intended that all Share Classes with an "a", "q" or "m" in the designation will distribute on an annual (a), quarterly (q) or monthly (m) basis if determined by the Board.

Payment is made in the currency in which the relevant Share Class is denominated.

##### 1.2.3 HEDGED SHARE CLASSES

In accordance with the provisions of the current prospectus, the Fund may offer Share Classes in a Sub-Fund in a currency other than the Sub-Fund's reference currency or in relation to the currencies in which the underlying assets of the Sub-Fund are denominated. The respective Sub-Fund has the ability to hedge such Share Classes in relation to the Sub-Fund's reference currency. Where hedging of this kind is undertaken the latter is designated as such by a reference to "hedged" or ("h"). A Sub-Fund can also choose to manage currency exposure with a reference to a benchmark. Because such a benchmark is only used as a point of reference, a Sub-Fund's exposure to any given currency may be different than that of its benchmark. The Sub-Fund will engage for the exclusive account of such Share Classes, in forward foreign exchange contracts, currency futures, currency options or currency swaps, in order to preserve the value of the Share Class in its reference currency against its value in the Sub-Fund's currency or against the currencies in which the underlying assets of the Sub-Funds are denominated.

Where undertaken, the effects of this hedging is reflected in the Net Asset Value and, therefore, in the performance of the currency Classes. As a result, currency hedging may impact the Net Asset Value of one Class as compared to the Net Asset Value of a Class denominated in another currency. Any profit or loss resulting directly from the forward foreign exchange contracts, currency futures, currency options or currency swaps used to create the hedge is borne by the relevant currency Class in relation to which they have been incurred.

### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The financial statements are prepared and presented in accordance with generally accepted accounting principles in Luxembourg for investment funds on a going concern basis with the exception of Social Transition Global Equity Fund which has been prepared on a non-going concern basis with the assets being at net realisable values and liabilities at estimated settlement amounts, as it liquidated after the year end. The preparation of financial statements requires management to make estimates and assumptions that may affect the amounts reported in the financial statements and the accompanying notes. Actual results may differ from those estimates.

#### 2.1 FOREIGN CURRENCIES

The financial statements of each Sub-Fund of the Fund are expressed in the currency of the Sub-Fund and its accounting records are maintained in that currency. Assets and liabilities in other currencies are translated into the currency of the Sub-Fund using the exchange rate in effect at the year end date. Income and expenses in other currencies are translated into the currency of the Sub-Fund at the exchange rate in effect on the date of the transaction.

The resulting exchange differences are recorded in the Combined Statement of Operations and Changes in Net Assets within the caption "Foreign currency translation difference".

The combined financial statements of the Fund represent the sum of the financial statements of each Sub-Fund. The combined financial statements are presented for information purposes only in EUR, each Sub-Fund using the exchange rates prevailing at the Balance Sheet date.

The exchange difference resulting from the translation of net assets at the beginning of the year using the year end rates is recognised in the Combined Statement of Operation and Changes in Net Assets within the caption "Foreign currency translation difference".

#### 2.2 SWING PRICING

A Sub-Fund may suffer dilution of the Net Asset Value per Share due to investors buying or selling Shares at a price that does not reflect the dealing and other costs that arise when security trades are undertaken by the Investment Manager to accommodate cash inflows or outflows.

## NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

As at 31 December 2024

### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### 2.2 SWING PRICING (CONTINUED)

In order to counter this impact and protect the interests of shareholders, the NAV may be adjusted upward when there is strong demand to buy Sub-Fund Shares and downward when there is strong demand to redeem Sub-Fund Shares.

The adjustment may vary from Sub-Fund to Sub-Fund and will normally not exceed 2% of the original NAV per Share unless exceptional market conditions occur.

The thresholds where swing pricing is triggered are set by the Management Company, and may vary over time and from one Sub-Fund to another.

The swing pricing mechanism may be applied across all Sub-Funds and Share Classes.

The NAV per Share as disclosed in the statistical information is the published NAV per Share whereas the total net assets disclosed in the Combined Statement of Net Assets is the total net asset value excluding any year end swing adjustment.

As at the year end, no swing pricing was applied on the NAV per Share of the Sub-Funds.

#### 2.3 VALUATION OF ASSETS

The value of the assets of the Fund is determined as follows:

(1) The value of any cash in hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued as aforesaid and not yet received shall be deemed to be the full amount thereof, unless in any case the same is unlikely to be received in full, in which case the value thereof shall be arrived at after making such discount as the Board of Directors may consider appropriate in such case to reflect the true value thereof;

(2) The value of securities, Money Market Instruments and/or financial derivative instruments which are quoted or dealt in on any stock exchange is based on the last available price provided that where securities, Money Market Instruments and/or financial derivative instruments are quoted on any stock exchange operating on the basis of separate bid and offer prices mid-market valuations may, as the Board may decide, be applied;

(3) In the event that any of the securities held in the Fund's portfolio on the relevant dealing day are not quoted or dealt in on any stock exchange or regulated market or if, with respect to securities quoted or dealt in on any stock exchange or regulated market, the price as determined pursuant to sub-paragraphs (2) or (3) is not representative of the fair market value of the relevant securities, the value of such securities is determined based on the reasonably foreseeable sales price determined prudently and in good faith by or under the Board of Directors' supervision.

(4) Shares in open-ended UCIs and/or UCITS are valued on the basis of their last Net Asset Value, as reported by such undertakings.

(5) The financial derivative instruments which are not listed on any official stock exchange or traded on any other regulated market are valued in a reliable and verifiable manner on a daily basis and in accordance with market practice, as further detailed below.

(6) Futures

The Fund on behalf of a Sub-Fund may enter into financial futures contracts as part of its investment strategy. Upon entering into a futures contract, the Fund is required to deposit with a broker an amount ("initial margin") equal to a certain percentage of the purchase price indicated in the futures contract. Initial margin is included as part of "Cash at bank and at brokers" in the Combined Statement of Net Assets. Subsequent payments ("variation margin") are made or received by the Sub-Fund each day, depending on the daily fluctuations in the value of the underlying futures contracts. These subsequent payments are recorded for financial reporting purposes as unrealised result by the Sub-Fund. When entering into a closing transaction, the Sub-Fund will realise, for book purposes, a gain or loss equal to the difference between the values of the futures contract to sell and the futures contract to buy. Futures contracts are valued at the last sale price or, in the absence of a sale, the mean between the closing bid and asked quotation or if no bid or asked prices are available, at the last bid price. Certain risks may arise upon entering into futures contracts from the contingency of imperfect market conditions. Please refer to the Portfolio of Investments and Other Net Assets for the details of the contracts outstanding as at 31 December 2024. When a contract is closed, the Sub-Fund records a realised gain or loss equal to the difference between the proceeds from, or cost of, the closing transaction and the initial cost of the contract within the caption "Net realised gain/(loss) on financial futures contracts" in the Combined Statement of Operations and Changes in Net Assets.

(7) Forward currency exchange contracts

All Sub-Funds in connection with the portfolio purchases and sales of securities denominated in a foreign currency or Share Class hedging, may enter into forward currency exchange contracts for the purposes of hedging foreign currency exchange risks. Contracts are recorded at market value based on the forward exchange rate of the underlying currency on the valuation day. Certain risks may arise upon entering into these contracts from the potential inability of counterparties to meet the terms of their contracts. Please refer to the Portfolio of Investments and Other Net Assets for the details of the contracts outstanding as at 31 December 2024. When a contract is closed, the realised gain/(loss) is recorded within the caption "Net realised gain/(loss) on forward currency exchange contracts" in the Combined Statement of Operations and Changes in Net Assets. Unrealised gains or losses are recorded within the caption "Unrealised gain/(loss) on forward currency exchange contracts" in the Combined Statement of Net Assets.

## NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

As at 31 December 2024

### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### 2.3 VALUATION OF ASSETS (CONTINUED)

##### (8) Swaps contracts

A swap is an agreement that obliges two parties to exchange a series of cashflows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset. The payment flows are usually netted against each other at the brokers' level, with the difference being paid by one party to the other, if authorised by the dedicated International Swaps and Derivatives Associations agreements ("ISDA agreements"). Risks may arise as a result of the failure of counterparty to the swap contract to comply with the terms of the swap contract. The loss incurred by the failure of a counterparty is generally limited to the net payment to be received by the Fund, and/or the termination value at the end of the contract. Therefore, the Fund considers the creditworthiness of each counterparty to a swap contract in evaluating potential credit risk. Additionally, risks may arise from unanticipated movements in interest rates or in the value of the underlying securities or indices. Financing leg proceeds received or paid on swap contracts are, respectively, included as part of "Income – Interest on swap contracts" and "Expenses– Interest on swap contracts" in the Combined Statement of Operations and Changes in Net Assets. Unrealised gains or losses on the remaining leg are recorded within the caption "Swap contracts at fair value" in the Combined Statement of Net Assets. The changes in unrealised gains or losses are included in the Combined Statement of Operations and Changes in Net Assets within the caption "Net changes in unrealised appreciation/ (depreciation) on swap contracts". When a contract is closed, the realised gains or losses are recorded within the caption "Net realised gain/(loss) on swap contracts" in the Combined Statement of Operations and Changes in Net Assets.

The cashflows received and paid by the Sub-Fund in connection with swap contracts are converted to present value on the valuation date corresponding to the maturity of these cashflows. The value of the swap contracts is the difference between these two present value conversions. Please refer to the Portfolio of Investments and Other Net Assets for the details of the contracts outstanding as at 31 December 2024.

##### (9) Options

Premiums paid by the Sub-Funds for purchased options are included in the Combined Statement of Net Assets as option purchased. If the option is allowed to expire, the Sub-Fund will lose the entire premium it paid and record a realised loss for the premium amount. Premiums paid for purchased options which are exercised or closed are added to the amounts paid or offset against the proceeds on the underlying investment transaction to determine the realised gain/loss to be booked.

Premiums received by the Sub-Funds for written options are included in the Combined Statement of Net Assets as option written. The Sub-Fund records a realised gain or loss on a written option based on whether the cost of the closing transaction exceeds the premium received.

The realised gain/losses and change in unrealised appreciation/(depreciation) on options are disclosed in the Combined Statement of Operations and Changes in Net Assets, respectively within the captions "Net realised gain/(loss) on options contracts" and "Net changes in unrealised appreciation/ (depreciation) on options contracts".

Options that are not traded on a regulated market or any other regulated market are valued at their liquidation value determined in accordance with the rules set in good faith by the Board of Directors according to standard criteria for each type of contract. Please refer to the Portfolio of Investments and Other Net Assets for the details of the options contracts outstanding and margin deposits as at 31 December 2024. The Sub-Fund can also use options on swaps (swaptions). The market value of these swaptions is shown in the caption "Options purchased contracts at fair value" or "Option written contracts at fair value". For swaptions, the gross premiums to be paid on purchased options (to be received on written options) are included in the caption "Payable on investments purchased" ("Receivable on investments sold") in the Combined Statement of Net Assets.

##### (10) Fair value

Fair Market valuation: Aviva Investors Luxembourg has implemented a fair valuation process for Asia Pacific equities in order to protect the Sub-Funds against market timing practices. In the case a market in which the Sub-Funds invest is closed at the time the Sub-Funds' assets are valued, the latest available price may not reflect the fair value of the Sub-Fund portfolio. In such circumstances, some investors could exploit this gap, which is considered as market timing and deemed "not acceptable" as per CSSF circular 04/146. To limit this, the Sub-Fund should adjust the local closing price of the securities held to reflect the information available at valuation point. The adjustment amount is so included in the market value of securities in scope. At the time of this report, Sub-Funds included in this Fair market valuation process are Global Emerging Markets Core Fund, Global Emerging Markets Index Fund and Global Emerging Markets Equity Unconstrained Fund.

Fair valuation of individual positions: In face of difficult market conditions (e.g. no liquidity, lack of information on trades, etc.), prices obtained for certain investments source may not be representative of fair value. As a result, the Board of Directors of the Fund has implemented fair value techniques to estimate the fair value of these investments. Because of the inherent uncertainties in the fair valuation process, these estimated values may significantly differ from the values that may be ultimately recovered. At the time of this report, Sub-Funds included in this Fair market valuation process are listed below:

Sub-Fund Name	Currency	Number of Securities	Market value of fair valued securities	% of Net Assets
Aviva Investors - Emerging Markets Bond Fund	USD	1	-	-
Aviva Investors - Emerging Markets Corporate Bond Fund	USD	3	-	-
Aviva Investors - Emerging Markets Local Currency Bond Fund	EUR	1	-	-
Aviva Investors - Global Emerging Markets Core Fund	USD	4	-	-
Aviva Investors - Global Emerging Markets Equity Unconstrained Fund	USD	2	-	-
Aviva Investors - Global Emerging Markets Index Fund	USD	34	-	-
Aviva Investors - Multi-Strategy Target Return Fund	EUR	1	-	-

#### 2.4 TREATMENT OF INTEREST INCOME AND DIVIDENDS

Interest income is accrued on a daily basis. Dividend income is recorded on the ex-dividend date. Both are recorded net of withholding tax.

## NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

As at 31 December 2024

**3. COLLATERAL**

Several Sub-Funds received collateral to cover the unrealised results on OTC derivative instruments. Collateral is calculated and settled on a daily basis per counterparty. Cash collaterals cannot be sold, re-invested or pledged.

Sub-Fund Name	Currency	Counterparty	Type of collateral	Collateral received	Collateral pledged

**4. RELATED PARTIES****4.1 INVESTMENT MANAGERS AND MANAGEMENT COMPANY FEES****4.1.1 MANAGEMENT FEES**

The Management Company receives from the Fund a management fee payable in arrears at the end of each month. Investment Managers are paid out of this fee by the Management Company. Please refer to the prospectus for details of the applicable rates per share class.

**4.1.2 PERFORMANCE FEES**

For the Sub-Fund Aviva Investors - Global Convertibles Absolute Return Fund and in accordance with the Fund's prospectus, Investment Managers may receive some performance fees in addition to their investment management fees. The performance fee is charged when the Sub-Fund exceeded its previous high water mark (the NAV on the day the most recent performance fee was paid or, if no performance fee has ever been paid, then the NAV at inception).

The performance fee shown in the table applies only to the portion of the Sub-Fund's performance that is above the performance of its benchmark. For Sub-Fund that has an annual performance fee, the performance period begins 1 January (or any later date at which it first becomes effective) and ends 31 December (or any earlier date on which it ceases to become effective). The Sub-Fund has a quarterly performance fee and each performance period begins on the first business day of the quarter (or any later date at which it first becomes effective) and ends on the last business day of the quarter (or any earlier date on which it ceases to become effective).

A Sub-Fund's performance fee accrues each business day.

## NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

As at 31 December 2024

### 4. RELATED PARTIES (CONTINUED)

#### 4.1 INVESTMENT MANAGERS AND MANAGEMENT COMPANY FEES (CONTINUED)

##### 4.1.2 PERFORMANCE FEES (CONTINUED)

The performance fee is crystallised at the end of each performance period and any amount due for the period is paid to the Investment Manager. Neither the Management Company nor any Investment Manager is permitted to pay money into the Sub-Fund or to any Shareholder for any underperformance. For Shares redeemed during a financial year, the performance fee is calculated as of the date the transaction is processed, and any performance fee due is crystallised at the time of redemption.

Any applicable performance fee is calculated for each Class of the Sub-Fund (except Z Shares, which pay no performance fee). Because different Share Classes may have different NAVs, the actual performance fees paid may vary by Share Class. For Distribution Shares, any distributions paid out are counted as part of performance for purposes of performance fee calculation.

The performance fee rate used for performance fee calculation purposes on the Sub-Fund are as follows:

Sub-Fund Name	Benchmark	Performance fee rate %
Aviva Investors - Global Convertibles Absolute Return Fund	Net positive return over the previous 3 months	10%

Performance fees are shown in the Statement of Operations and Changes in Net Assets within the caption "Performance fees". However, no performance fees were paid during the year.

Aviva Investors - Global Convertibles Absolute Return Fund closed on 21 May 2024.

##### 4.1.3 FIXED FEE

In order to pay its ordinary operating expenses and to seek to protect the investors from fluctuations in these ordinary operating expenses, the Fund will pay a Fixed Fee to the Management Company out of the assets of the Sub-Funds. Please refer to the prospectus for details of the applicable rates per share class per Sub-Fund. The Fixed Fee will be charged at a maximum overall yearly rate, accrued at each valuation day and paid monthly in arrears. The Management Fee and the Fixed Fee do not cover any cost or expense incurred by a share class or Sub-Fund in respect of Distribution fees and other expenses.

Fixed fees include the below fees:

###### 4.1.3.1 ADMINISTRATION FEES

The Fund pays the administrator fees for its services estimated to 0.05% per annum of the average NAV in period. Such fees are payable monthly. Actual rate charged is calculated based on several factors including number of share classes, and complexity of the Sub-Fund.

###### 4.1.3.2 DEPOSITARY FEES

The Fund and its respective Sub-Funds paid depositary fees to The Bank of New York Mellon SA/NV, Luxembourg Branch in respect of its activities as Depositary (including safekeeping, supervision and transaction activities). The fees vary in respect of each Sub-Fund depending on the value of the assets held by the Depositary and the volume of trading in that Sub-Fund and should not exceed a maximum of 0.20% per annum, payable monthly in arrears.

###### 4.1.3.3 DOMICILIARY FEES

As remuneration for services rendered as domiciliary agent, the Management Company receives a fixed annual fee from the Sub-Funds as per the Management Company service agreement. This fee represents an amount of EUR 3,000 per year and per Sub-Fund, payable monthly in arrears.

###### 4.1.3.4 REGISTRAR AND TRANSFER AGENCY FEES

The Fund pays fees to the Registrar and Transfer Agent in respect of its activities as registrar and transfer agent (including maintenance of register, Shareholders services, transaction, dividend processing and commission handling activities). These fees are payable monthly in arrears.

The Fund pays the Registrar and Transfer Agent a fee and reasonable out-of-pocket expenses, not exceeding a maximum of 0.07% per annum of the aggregate average daily Net Asset Value per applicable Share Class.

###### 4.1.3.5 DISTRIBUTION FEES

The Distributor receives from the Fund a distribution fee, payable in arrears at the end of each month, calculated at the annual rate per annum of the aggregate average daily Net Asset Value per applicable Share Class, as detailed in the current prospectus.

### 5. DIRECTOR FEES

All internal directors have decided to waive their remuneration. The total remuneration paid to the external directors amounts to EUR 75,000 gross per annum and is included within the caption "Fixed fee".

## NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

As at 31 December 2024

### 6. TAXATION

#### Luxembourg tax d'abonnement

The Fund is not liable to any Luxembourg income tax, but is liable in Luxembourg to a tax of 0.05% per annum of its net assets for the A, B, J and R Share Classes of all Sub-Funds that invest in non-money market related securities and 0.01% per annum of its net assets for the F, I, K, L, M, S, V and Z Share Classes of all Sub-Funds. Such tax is payable quarterly on the basis of the net assets of the respective Share Class at the end of the relevant quarter. For the Sub-Funds which are investing in Funds already subject to this tax, there will be no double taxation.

Dividends, interest and capital gains on investments held by the Fund may be subject to non-recoverable tax and withholding and capital gains taxes in the country of origin.

#### Withholding tax reclaims

The withholding tax reclaims receivable are disclosed in the Combined Statement of Net Assets. The Board of Directors continuously monitors the recoverability of the reclaims in conjunction with the different tax authorities.

### 7. DIVIDEND DISTRIBUTION

Distributions are disclosed in the caption "Dividend distributions" in the Combined Statement of Operations and Changes in Net Assets.

### 8. CASH HELD IN CLOSED SUB-FUNDS

The Sub-Fund Aviva Investors - European Corporate Bond Fund, Aviva Investors - Global Convertibles Fund, Aviva Investors - Asian Equity Income Fund and Aviva Investors - Global Convertibles Absolute Return Fund were closed on 15 February 2024, 21 May 2024, 12 July 2024 and 24 October 2024 respectively. As at 31 December 2024 cash balances amounting to EUR 20,347, USD 15,994, USD 7,738 and USD 33,040 respectively were held at the custodian bank.

### 9. RUSSIAN CASH HELD

As at 31 December 2024, The Sub-Funds Aviva Investors – Global Emerging Markets Core Fund and Aviva Investors – Global Emerging Markets Index Fund held cash balances amounting to RUB 264,344,832 representing 0.18% of total net assets and RUB 879,934,267 representing 0.18% of total net assets. As the positions held in the respective portfolios, considering the present sanctions and the fact that the sub-funds are not in a position to repatriate those amounts, these cash amounts are held outside of the Funds' NAV. Once the present sanctions are lifted, these cash amounts will be reflected in the NAV.

### 10. SECURITIES LENDING

The Sub-Fund may lend portions of investments to third parties. In return the Sub-Fund receive a fee that is negotiated for each transaction. Such lending may only be effected in accordance with the terms of the Prospectus which reflects requirements of CSSF regulations. Securities are lent within the framework of a standardised lending system organised by a recognised securities clearing body or by a highly rated financial institution specialised in such activities.

During the year, 80% of any incremental income earned from securities lending is accrued to the applicable Sub-Fund, with the remaining 20% payable to the securities lending agent The Bank of New York Mellon SA/NV (BNYM). The income earned from the securities lending program is shown in the respective Sub-Fund's Combined Statement of Operations and Changes in Net Assets. The securities lending agent, BNYM and none of the counterparties are related parties.

The Sub-Funds with lending activity during year are presented in the table below with the balances at year end:

Fund	Agent	Market value of securities on loan in Fund currency	Cash collateral in Fund currency	Non cash collateral in Fund currency	Total collateral in Fund currency	Fund currency	Lending income (gross) in Fund currency	Lending agent fee in Fund currency	Lending income (net) in Fund currency
Aviva Investors - Asian Equity Income Fund	BNYM	-	-	-	-	USD	598	120	478

## NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

As at 31 December 2024

### 11. TRANSACTION COSTS

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial asset or liability. Transaction costs include transaction costs paid to custodians and sub-custodians, and identifiable brokerage charges, commissions, transaction related taxes and other market charges. For the year ended 31 December 2024, the Sub-Funds incurred transactions costs (included in the Fixed Fees caption) as detailed below:

Sub-Fund Name	Base Currency	Total
Aviva Investors – Climate Transition Global Credit Fund	USD	4,849
Aviva Investors – Climate Transition Global Equity Fund	USD	73,719
Aviva Investors – Emerging Markets Bond Fund	USD	60,108
Aviva Investors – Emerging Markets Corporate Bond Fund	USD	450
Aviva Investors – Global Convertibles Absolute Return Fund	USD	1,188
Aviva Investors – Global Emerging Markets Core Fund	USD	1,552,160
Aviva Investors – Global Emerging Markets Equity Unconstrained Fund	USD	325,676
Aviva Investors – Global Emerging Markets Index Fund	USD	873,104
Aviva Investors – Global Equity Endurance Fund	USD	149,061
Aviva Investors – Global Equity Income Fund	USD	144,519
Aviva Investors – Global High Yield Bond Fund	USD	80,566
Aviva Investors – Global Sovereign Bond Fund	EUR	53,739
Aviva Investors – Multi-Strategy Target Return Fund	EUR	208,443
Aviva Investors – Natural Capital Transition Global Equity Fund	USD	4,691
Aviva Investors – Social Transition Global Equity Fund	USD	16,534
Aviva Investors – UK Equity Unconstrained Fund	GBP	116,913

Transaction costs for fixed income securities and financial derivatives are not separately identifiable. For those, transaction costs are included in the purchase and sale prices.

### 12. CROSS-INVESTMENT BETWEEN SUB-FUNDS

As at 31 December 2024, there were no cross-investments between Sub-Funds.

### 13. EXCHANGE RATES

The exchange rates used to convert the Sub-Fund as at 31 December 2024 were:

Currency	Rate
EUR = 1	
GBP	0.8268
USD	1.0355

### 14. SUBSEQUENT EVENTS

Effective 26 February 2025, Aviva Investors - Social Transition Global Equity Fund has been closed.

## OTHER INFORMATION - UNAUDITED

As at 31 December 2024

### 1. THE VAR & LEVERAGE

#### 1.1. THE VAR

As at 31 December 2024, it has been determined to use the Value-at-Risk (VaR) approach for the following Sub-Funds to calculate global exposure. Please see details in the table below. All other Sub-Funds calculate global exposure using the commitment approach.

UCITS	Sub-Fund	Method	Profile Approach	Expected Level of Leverage (as per Prospectus)	Leverage Actual Average 2024	High VaR	Low VaR	Av. VaR	VaR Benchmark High	VaR Benchmark Low	Av. VaR Benchmark
Aviva Investors	Short Duration Global High Yield Bond Fund	Parametric	Relative VaR	150%	61.24%	2.52%	1.06%	1.65%	2.43%	1.40%	1.88%
Aviva Investors	Emerging Markets Local Currency Bond Fund	Parametric	Relative VaR	900%	680.31%	4.59%	3.40%	3.94%	3.83%	3.26%	3.52%
Aviva Investors	Global High Yield Bond Fund	Parametric	Relative VaR	150%	52.67%	3.32%	1.80%	2.50%	3.35%	1.81%	2.50%
Aviva Investors	Global Sovereign Bond Fund	Parametric	Relative VaR	800%	325.49%	3.60%	2.61%	3.15%	3.48%	2.60%	3.02%
Aviva Investors	Multi-Strategy Target Return Fund	Monte Carlo	Absolute VaR	1200%	785.24%	5.23%	2.49%	3.32%	-	-	-
Aviva Investors	Global Investment Grade Corporate Bond Fund	Parametric	Relative VaR	200%	55.87%	4.40%	3.31%	3.90%	4.33%	3.18%	3.74%
Aviva Investors	Climate Transition Global Credit Fund	Parametric	Relative VaR	500%	90.94%	4.53%	3.34%	3.96%	4.33%	3.18%	3.74%

The VaR risk model is based on the:

- Monte Carlo (CMC) simulation methodology. This method for calculating VaR contains no standard distribution assumptions and attempts to accurately capture extreme risk events. The approach models every security individually and their derivatives.

- Parametric Method: The Parametric VaR method calculates the standard deviation of the portfolio's returns and assumes a normal distribution of portfolio returns to show the maximum expected loss within a specified (99%) confidence interval.

There is a pricing function which supports full re-pricing of bonds and derivatives, covers multiple risk factors and uses 250 days of factor returns.

The calculation of the absolute and relative VaR is carried out in accordance with the following parameters:

- one-tailed confidence interval of 99%
- holding period equivalent to 1 month (20 business days)
- effective observation period (history) of risk factors of at least 1 year (250 business days) unless a shorter observation period is justified by a significant increase in price volatility (for instance extreme market conditions) – in practice AIGSL uses an effective observation period of 250 business days.
- quarterly data set updates, or more frequent when market prices are subject to material changes
- at least daily calculation

#### REFERENCE PORTFOLIO FOR RELATIVE VAR

A benchmark index is used for the calculation of the relative VaR on the 2 Sub-Funds below:

Aviva Investors - Emerging Markets Local Currency Bond Fund

J.P. Morgan GBI-EM Global Diversified Index

Aviva Investors – Global Sovereign Bond Fund

Barclays Capital Global Aggregate Index EUR hedged

#### Leverage Calculation

Leverage is the total amount of financial derivatives instruments (“FDI”) commitments out of a Sub Fund’s Total Net Assets.

It is calculated under the sum of notional’s approach to leverage calculation without any netting arrangements.

### 2. SECURITIES FINANCING TRANSACTIONS

As defined in Article 3 of Regulation (EU) 2015/2365, securities financing transactions include repurchase transactions, securities or commodities lending and securities or commodities borrowing, buy-sell back transactions or sell-buy back transactions and margin lending transactions and/or total return swaps. In accordance with Article 13 of the Regulation, the Fund’s only involvement in and exposures related to Securities Lending transactions and Total Return Swaps for the reporting date 31 December 2024 and are detailed in the following tables.

## OTHER INFORMATION - UNAUDITED (CONTINUED)

As at 31 December 2024

### 2. SECURITIES FINANCING TRANSACTIONS (CONTINUED)

#### GLOBAL DATA

##### Amount of securities on loan

The total value of securities on loan as a proportion of the Sub-Funds' total lendable assets, as at the reporting date is detailed below. Total lendable assets represents the aggregate value of asset types forming part of the Sub-Funds' securities lending programme.

Sub-Fund	% of Total Lendable Assets
Aviva Investors – Emerging Markets Bond Fund	1.03
Aviva Investors – Emerging Markets Corporate Bond Fund	0.64
Aviva Investors – Emerging Markets Local Currency Bond Fund	0.91
Aviva Investors – Global Emerging Markets Core Fund	0.22
Aviva Investors – Global Emerging Markets Index Fund	0.25
Aviva Investors – Global High Yield Bond Fund	1.03
Aviva Investors – Global Investment Grade Corporate Bond Fund	0.75
Aviva Investors – Global Sovereign Bond Fund	1.98
Aviva Investors – Short Duration Global High Yield Bond Fund	1.20

##### Amount of assets engaged in securities lending transactions

The following table represents the fair value of assets engaged in each type of SFTs (including Total Return Swaps) in the Sub-Fund currency.

Sub-Fund	Sub-Fund Currency	Market Value of Securities on Loans (in Sub-Fund Currency)	% of AUM
Aviva Investors – Emerging Markets Bond Fund	USD	128,019,640	3.92
Aviva Investors – Emerging Markets Corporate Bond Fund	USD	27,851,875	4.63
Aviva Investors – Emerging Markets Local Currency Bond Fund	EUR	44,567,949	5.07
Aviva Investors – Global Emerging Markets Core Fund	USD	18,829,341	1.38
Aviva Investors – Global Emerging Markets Index Fund	USD	53,365,564	1.20
Aviva Investors – Global High Yield Bond Fund	USD	345,610,827	9.16
Aviva Investors – Global Investment Grade Corporate Bond Fund	USD	390,629,210	6.12
Aviva Investors – Global Sovereign Bond Fund	EUR	1,052,637,297	12.76
Aviva Investors – Short Duration Global High Yield Bond Fund	USD	13,638,613	6.03

None of the counterparties are related parties to the Sub-Funds and the Management Company.

##### Amount of assets engaged in total return swap contracts

The following table represents the total value of assets engaged in total return swaps as at the reporting date.

Sub-Fund	Sub Fund Currency	Market Value of Total Return Swaps (in Sub-Fund Currency)	% of AUM
Aviva Investors – Multi-Strategy Target Return Fund	EUR	(347,088)	(0.05)

None of the counterparties are related parties to the Sub-Funds and the Management Company.

#### CONCENTRATION DATA

##### Ten largest collateral issuers

The following table lists the ten largest issuers by value of non-cash collaterals received by the Sub-Funds across securities lending transactions as at the reporting date. Collateral received in relation to other SFT's and OTC derivative transactions (including total return swaps) are in the form of cash.

Issuer	Collateral Value (in Sub-Fund Currency)
<b>Aviva Investors – Emerging Markets Bond Fund</b>	
<b>USD</b>	
US Treasury	17,385,358
European Investment Bank	17,058,907
Inter-American Development Bank	13,910,091
Netherland Government	12,655,316
Germany Government	10,044,219

## OTHER INFORMATION - UNAUDITED (CONTINUED)

As at 31 December 2024

### 2. SECURITIES FINANCING TRANSACTIONS (CONTINUED)

#### AGGREGATE TRANSACTION DATA (CONTINUED)

##### Maturity tenor of securities lending agreement and total return swap contracts

##### Securities Lending Transactions

The Fund's securities lending transactions have open maturity.

##### Maturity tenor of Total Return Swap Contracts

The following table provides an analysis of the maturity tenor of total return swaps contracts outstanding as at the reporting date.

Maturity	Market Value
	Aviva Investors – Multi-Strategy Target Return Fund EUR
1-4 Weeks	(770,426)
1-3 Months	(87,432)
3-12 Months	13,787
More than 12 Months	496,983

The above maturity tenor analysis has been based on the contractual maturity date of the relevant Total Return Swaps.

##### Settlement and clearing

All Sub-Funds engaged in securities lending agreements utilise bi-lateral settlement and clearing with their respective counterparty.

OTC derivative transactions are entered into by the Fund under an International Swaps and Derivatives Associations, Inc. Master Agreement ("ISDA Master Agreement") or similar agreement. An ISDA Master Agreement is a bilateral agreement between the Fund/s and a counterparty that governs OTC derivative transactions (including total return swaps) entered into by the parties. All OTC derivative transactions entered under an ISDA Master agreement are netted together for collateral purposes, therefore any collateral disclosures provided in this report are in respect of all OTC derivative transactions entered into by the Fund with the applicable TRS counterparties under the ISDA Master agreement, not just total return swaps.

##### Reuse of Collateral

##### Share of collateral received that is reused and reinvestment return

Collateral received in relation to security lending transactions and total return swap contracts cannot be sold, re-invested or pledged.

##### Safekeeping of Collateral

##### Collateral received

All collateral received by the Fund in respect of securities lending & total return swaps transactions as at the reporting date are held by The Bank of New York Mellon SA/NV.

##### Collateral granted

##### Collateral granted

Sub-Fund	Sub-Fund Currency	Collateral Value (in Sub-Fund Currency)
Aviva Investors – Emerging Markets Bond Fund	USD	17,020,000
Aviva Investors – Emerging Markets Local Currency Bond Fund	EUR	986,000
Aviva Investors – Global Sovereign Bond Fund	EUR	47,000
Aviva Investors – Multi-Strategy Target Return Fund	EUR	5,311,000

All collateral granted in respect of total return swaps as at the reporting date are held in segregated accounts.

##### Return and cost

The total income earned from securities lending transactions is split between the relevant Sub-Funds and the securities lending agent. Detail of this split is disclosed in note 10 to the financial statements.

All returns from total return swap contracts will accrue to the Sub-Funds and are not subject to any returns sharing arrangements with the Investment Manager or any other third parties.

### 3. REMUNERATION DISCLOSURE – UCITS

This disclosure has been made in accordance with the Undertakings for Collective Investments in Transferable Securities Directive V ("UCITS V"), which is applicable Aviva Investors Luxembourg ("AI LUX").

#### REMUNERATION GOVERNANCE

##### AVIVA INVESTORS REMUNERATION COMMITTEE

The Aviva Investors Remuneration Committee is responsible for reviewing and making recommendations to the Aviva Group Remuneration Committee and Aviva Investors Holdings Limited Board regarding the Remuneration Policy of Aviva Investors. This Committee reviews individual remuneration packages for all employees to which the Remuneration Codes apply and considers the remuneration policy and structures for all Aviva Investors employees.

## OTHER INFORMATION - UNAUDITED (CONTINUED)

As at 31 December 2024

### 3. REMUNERATION DISCLOSURE – UCITS (CONTINUED)

#### AVIVA INVESTORS REMUNERATION COMMITTEE (CONTINUED)

The Aviva Investors Remuneration Committee is comprised of Non-Executive Director Cheryl Aguis and Independent Non-Executive Directors Mark Burgess (Chair), Sue Amies-King and Alexa Coates. The majority of the members were also members of the Aviva Investors Risk Committee during 2024. The Aviva Investors Remuneration Committee met on five occasions in 2024.

#### AVIVA GROUP REMUNERATION COMMITTEE

The Aviva Group Remuneration Committee oversees Aviva's remuneration policies and practices. The Committee considers alignment between Group strategy and the remuneration of Directors and Material Risk Takers ('MRTs') within Aviva Investors. The Committee also works with the Board Risk Committee to ensure that risk and risk appetite are properly considered in setting the remuneration policy. The full roles and responsibilities of the Aviva Group Remuneration Committee are available on the Investor Relations website, found here:

<http://www.aviva.com/investor-relations/corporate-governance/board-of-directors/board-committees/remuneration-committee/>

The Aviva Group Remuneration Committee is comprised of Independent Non-Executive Directors Pippa Lambert (Chair), Andrea Blance, Patrick Flynn and Jim McConville. Andrea Blance, Patrick Flynn and Jim McConville were also members of the Board Risk Committee during 2024. The Aviva Group Remuneration Committee met on five occasions in 2024.

When setting remuneration policy, the relevant Remuneration Committees take account of the company's strategic objectives and consider the long-term interests of shareholders and other stakeholders.

During 2024 the Aviva Investors Remuneration Committee and Aviva Group Remuneration Committee received independent advice on executive remuneration matters from Deloitte LLP which is a member of the Remuneration Consultants Group and adheres to its Code of Conduct.

#### REMUNERATION POLICY

The Aviva Investors remuneration policy is consistent with Aviva's remuneration principles which support the execution of Aviva Investor's strategy, rewarding sustained performance and growth aligned with our values:

- Performance aligned: We differentiate reward based on performance. Outcomes are aligned with Aviva, business-line and individual performance, both financial and non-financial.
- Competitive: We focus on the total reward package, ensuring that reward programme design and outcomes are market aligned and competitive, enabling the attraction, motivation and retention of high-quality colleagues.
- Simple, transparent and consistent: We operate a 'one Aviva' approach to reward. Our reward programmes are only as complex as necessary. They are easily understood.
- Fair: Our reward programmes and decision-making support Aviva's commitment to create a diverse and inclusive organisation, ensuring that all colleagues are rewarded fairly in view of the results achieved and individual contributions. Our reward approach is designed to attract, motivate and retain high quality colleagues, regardless of gender, ethnicity, age, disability or any other factor unrelated to performance, contribution or experience.
- Doing the right thing: We do the right thing through reward programmes that support Aviva's values, behaviours and sustainability objectives. Outcomes consider expectations of Customers, Colleagues and Shareholders. Our reward programmes are designed to optimise and deliver good outcomes for customers and drive the right behaviours from our people.
- Risk aligned: Reward is designed to promote sound and effective risk management, within a robust internal governance framework.

The remuneration policy is consistent with the principles outlined in the European Securities and Markets Authority guidelines on sound remuneration policies under AIFMD.

The remuneration policy is reviewed and approved annually by the Aviva Investors Remuneration Committee and is subject to annual internal independent review by Compliance. For 2024, no significant findings were observed and there were no material changes to the remuneration policy.

#### LINK BETWEEN PAY AND PERFORMANCE

Performance is measured against a combination of:

Aviva Investors and Group performance: A rounded assessment of performance against key financial and non-financial performance indicators as part of a balanced scorecard. Financial performance indicators include, but are not limited to, operating profit, investment performance and net flows). The assessment of financial performance includes reference to actual results versus prior period results, agreed plans, relativity to competitors and progress towards our long-term target ambition.

Non-financial considerations: Including management of risk (including the integration of sustainability risks in the investment process, where applicable), diversity and inclusion and employee engagement metrics.

Business Unit Performance: Contribution of each business area to the overall success of the Aviva Investors, year on year growth and execution of its strategy; and

Individual Performance: Delivery against individual goals and relative performance in comparison to peers, as well as the extent to which individuals have demonstrated the Aviva values and alignment with conduct and behaviour expectations.

The Performance assessment does not encourage risk taking outside the Aviva Investors stated risk appetite and includes mechanisms by which performance against risk and conduct related measures has a significant impact on the availability and size of business and individual variable awards.

The Risk function provide an independent assessment of risk and control effectiveness to the Aviva Group Remuneration Committee for consideration in setting the bonus pool. The assessment is based on a balanced scorecard with metrics designed to drive and reward good risk management behaviours and outcomes, and measures to ensure appropriate independent challenge and review. The assessment includes consideration of both current and likely future risks facing the business.

As at 31 December 2024

### 3. REMUNERATION DISCLOSURE – UCITS (CONTINUED)

#### LINK BETWEEN PAY AND PERFORMANCE (CONTINUED)

The Risk function also input on any risk and conduct breaches occurring during the year that could impact variable remuneration outcomes on an individual basis. Future risks identified that have a likelihood of materialising may result in withholding or reduction in variable remuneration.

Through Aviva Investors' Global Reward Framework, all investment employees should support responsible investment and integrate Environmental, Social and Governance ('ESG') considerations into their investment processes, including the consideration of Sustainability Risk (as defined by the EU Sustainable Finance Disclosure Regulation). ESG research is integrated into the investment process and forms part of the investment scorecard and annual risk attestation. The Chief Investment Officer, investment desk heads and line managers consider how investment employees demonstrate their commitment to ESG processes as part of the determination of annual performance and pay outcomes.

The remuneration of employees in Control Functions (defined as Risk, Compliance and Audit) is determined independently of the financial results of Aviva Investors in order to reinforce the independence of these functions. To avoid conflicts of interest, no individual is involved in decisions relating to their own remuneration.

#### STRUCTURE OF REMUNERATION

##### FIXED REMUNERATION

Basic Salary – set within an appropriate market range and reflecting a colleague's professional experience and organisational responsibilities. Fixed pay is set at a level which is sufficient to allow the possibility, where performance warrants, that an employee may receive no variable pay.

Benefits – standard benefits are provided that are appropriate to the market, compliant with all legal requirements and intended to provide choice and flexibility to meet individual needs.

##### VARIABLE REMUNERATION

Annual Bonus – a discretionary short-term incentive plan where individuals may receive a bonus based on business and individual performance against targets. All Aviva Investors colleagues who are permanent employees are eligible to be considered for an annual bonus.

Annual bonuses are typically received in cash but awards above certain thresholds are deferred to align the interests of employees with those of the company, its customers, and shareholders and to aid retention. A three-year deferral with pro-rata vesting in Aviva funds and/or Aviva Group Plc shares applies. MRTs are subject to additional deferral requirements, further detail is included below in the section 'MRT Deferrals and Retention Periods'.

Long Term Incentive Awards ('LTIA') – discretionary long-term incentive plan to align reward with long-term investment performance, Aviva Group and Shareholders, and with the additional intention to help retain key talent. All Aviva Investors colleagues who are permanent employees are eligible to receive an LTIA, although LTIA's are typically awarded to a select number of senior colleagues.

LTIA's vest after three years; part in Aviva Investors funds and part in Aviva Restricted Share Units ('RSUs'). For the Aviva Investors CEO, due to his role as a member of the Aviva Group Executive Committee the award of RSUs is subject to additional Aviva Group performance conditions. For MRTs, vesting is subject to a pre-vesting assessment of individual performance, behaviours, and alignment with the company values of Aviva Investors throughout the three-year performance period.

Variable remuneration is discretionary and fully flexible, including the possibility of zero if performance thresholds are not met. Awards may be adjusted based on Group performance to ensure financial sustainability and affordability.

#### MRT DEFERRALS AND RETENTION PERIODS:

For MRTs who have been identified under the Alternative Investment Fund Managers Directive (AIFMD) and Undertakings for Collective Investment in Transferable Securities V (UCITS) Directive are subject to the AIFMD/UCITS V remuneration requirements. The requirements are applied on an apportioned basis, based on activity performed for the regulated entity. Any MRT who has apportioned remuneration over EUR50,000 is subject to the following requirements: 40% of variable remuneration under is deferred over three years and a minimum of 50% of total variable remuneration is delivered in Aviva funds, this applies to both the deferred element and the upfront element (the element that is not subject to deferral).

When setting deferral schedules and retention periods for MRTs, Aviva Investors take into account:

- The firm's business cycle (including length), the nature of its business and its risk profile;
- The activities and responsibilities of MRTs and how these may impact the risk profile of the firm or the assets the firm manages;
- Whether the deferred variable remuneration is paid out in instruments or cash;
- The amount of the variable remuneration and the ratio of variable to fixed remuneration; and
- How long it could take for the risks underlying the staff member's performance to crystallise.

Aviva Investors considers, based on market practice and in consideration that all variable awards are subject to clawback post vesting, that: the proportion of variable remuneration that is deferred is appropriate to align the interest of colleagues with the risk profile of the regulated entities; the retention period is of suitable length post release of the deferred awards (or in the case of an upfront component the award); and, the deferral period and vesting schedule is of an appropriate length.

For all MRTs, malus provisions and leaver conditions will apply during the vesting period. However, these will not apply during the six-month holding period. Clawback provisions continue to apply after the vesting period, including during the holding period.

Colleagues are not permitted to undertake personal hedging strategies in respect of any variable remuneration.

#### MALUS AND CLAWBACK:

All variable pay granted or paid to any Aviva Investors employee is subject to the Aviva's Malus and Clawback Policy. This includes the cash and deferred elements of the annual bonus plan and any LTIA. The circumstances when Malus and Clawback may apply are documented in the Directors Remuneration Policy section of the Annual Report and Accounts, found here:

## OTHER INFORMATION - UNAUDITED (CONTINUED)

As at 31 December 2024

### 3. REMUNERATION DISCLOSURE – UCITS (CONTINUED)

#### MALUS AND CLAWBACK: (CONTINUED)

<https://www.aviva.com/investors/annual-report/>

#### GUARANTEES

Guaranteed awards are only offered for the year of hire in exceptional circumstances and provided the legal entity has a sound and strong capital base. In line with Aviva's policy, guarantees must:

- Not be more generous than necessary and only offered if alternate approaches are not considered appropriate.
- Not be offered to Executive Directors.
- Be subject to a minimum standard of personal performance, behaviour and conduct.

Guarantees are subject to appropriate governance and approvals and are subject to Aviva's Malus and Clawback Policy. Only buyout or guaranteed awards approved in line with the Reward Approvals Framework and formally communicated in writing, are considered valid.

#### SEVERANCE

Any severance payment above and beyond statutory or existing contractual entitlements is at the company's absolute discretion. There is no automatic right to a pro-rata bonus payment in the event of termination of employment by the company or individual. Any bonus payments related to early termination of contracts are at the company's discretion and will reflect performance achieved over time and designed in a way which does not reward poor conduct or failure. Treatment of any unvested share, fund or bonus awards are governed by the relevant plan rules. There is no automatic entitlement to any payment under these plans other than where expressly stated in the plan rules.

The maximum severance pay is based on Aviva applicable policies; in the event of redundancy the maximum severance pay is calculated based on year of service, with each year of service representing a proportion of salary as per Aviva Discretionary Redundancy policies, plus a discretionary pro-rata lost bonus opportunity.

In non-redundancy exits the maximum severance pay is determined based on a number of factors linked to the reason for the exit and the employees' length of service.

#### MATERIAL RISK TAKER (MRTS) IDENTIFICATION

Aviva Investors identifies MRTs in accordance with AIFMD requirements using the following criteria:

- Any member of the Management Board.
- The managers in charge of the control functions (Risk, Compliance, Internal Audit).
- Colleagues responsible for heading the investment management, administration, marketing and people functions.
- Other relevant colleagues whose total remuneration takes them into the same bracket as senior managers and risk takers.
- Branch managers of offices that perform portfolio management activity (e.g. Germany and France; for Branch managers of other branches, activity is restricted to marketing and distribution activity which is not considered as having a material impact on the risks of the management company).

The MRT population is reviewed at least annually by the AI Luxembourg Remuneration Committee and individuals are notified of their status.

#### QUANTITATIVE REMUNERATION DISCLOSURES

There were 16 Material Risk Takers Remunerated from AI Lux as at the end of the 2024 performance year. Aggregate remuneration expenditure in respect of these staff for the 2024 performance year was €2.89 million.

Fixed remuneration represents 81% of this total, with 19% variable remuneration.

AI Lux outsources fund management to Aviva Investors Global Services (AIGSL) Limited and other companies. AIGSL is covered under the UK implementation of Investment Firms Prudential Regime (IFPR) and its fund managers provide services to other Group Companies and Clients.

There were 47 individuals identified as Material Risk Takers for AIGSL, the aggregate remuneration expenditure in respect of these staff for the 2024 performance year was €28.15m. This amount relates to total remuneration and not remuneration specifically apportioned to activities completed on behalf of AI Lux.

Fixed remuneration represents 44% of this total, with 56% variable remuneration.

ANNEX IV

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aviva Investors – Asian Equity Income Fund **Legal entity identifier:** 5493008BD7S5RZVUUC62

Aviva Investors – Asian Equity Income Fund was closed on 12 July 2024.

**Environmental and/or social characteristics**

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> <b>Yes</b>	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ____% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul>
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ____%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The below criteria are binding on the investment process to ensure underlying investments are inclusive of those securities promoting environmental or social characteristics:

The exclusions detailed below will be applied to this universe.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

A. The Investment Manager’s Baseline Exclusions Policy which includes the following exclusions:

- Controversial weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact (“UNGC”); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons, where companies supply state nuclear weapons programmes where the state lacks credible commitments to effective arms controls, disarmament and non-proliferation as outlined in the Treaty on the Non-Proliferation of Nuclear Weapons (NPT) \*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970). Please note, we retain discretion to additionally exclude companies supplying nuclear weapons state programmes within the NPT, if Aviva Investors considers the state to have undermined non-proliferation arms control treaties, conventions and norms.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI’s controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviours since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager’s Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B. The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is met through a combination of the UNGC (as part of the Investment Manager’s Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. Good governance indicators form a substantial component of the Investment Manager’s ESG scoring tools and ESG research.

● ***How did the sustainability indicators perform?***

The fund will continue to be managed in line with the Aviva Investors Baseline Exclusion Policy and any revisions made to it over time, there have been no active breaches of the policy on the fund since implementation.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Adverse sustainability indicator	Metric	Annual Average
GHG Emissions	Scope 1 GHG emissions	29,819.01
	Scope 2 GHG emissions	13,871.30
	Scope 3 GHG emissions	150,506.19
	Total GHG emissions	195,231.59
Carbon Footprint	Carbon footprint	505.79
GHG Intensity of investee companies	GHG intensity of investee companies	1072.00
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	10.71%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	83.37%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	11.83
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	7.23%
Board Gender Diversity	Average ratio of female to male board members in investee companies	24.02

**AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template. Similarly, methodology changes from our third-party data providers may impact year-on-year data.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company’s value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

● **...and compared to previous periods?**

Adverse sustainability indicator	Metric	Annual Average 2023	Annual Average 2024
GHG Emissions	Scope 1 GHG emissions	38,558.69	29,819.01
	Scope 2 GHG emissions	15,144.56	13,871.30
	Scope 3 GHG emissions	193,453.12	150,506.19
	Total GHG emissions	246,380.30	195,231.59
Carbon Footprint	Carbon footprint	633.27	505.79
GHG Intensity of investee companies	GHG intensity of investee companies	1242.65	1072.00
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	14.14%	10.71%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	86.24%	83.37%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.96	11.83
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%	7.23%
Board Gender Diversity	Average ratio of female to male board members in investee companies	22.67	24.02

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

### How did this financial product consider principal adverse impacts on sustainability factors?

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

### What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

1<sup>st</sup> January 2024 – 31<sup>st</sup> December 2024

Largest Investment	Sector	% Asset	Country
TAIWAN SEMICONDUCTOR MANUFACTURING	Information Technology	9.83%	Taiwan (Republic of China)
SAMSUNG ELECTRONICS LTD	Information Technology	5.94%	Korea (South), Republic of
TENCENT HOLDINGS LTD	Communication	3.99%	China
RELIANCE INDUSTRIES LTD	Energy	3.60%	India
USD CASH(Alpha Committed)	Cash Securities	1.88%	United States
SK HYNIX INC	Information Technology	1.85%	Korea (South), Republic of

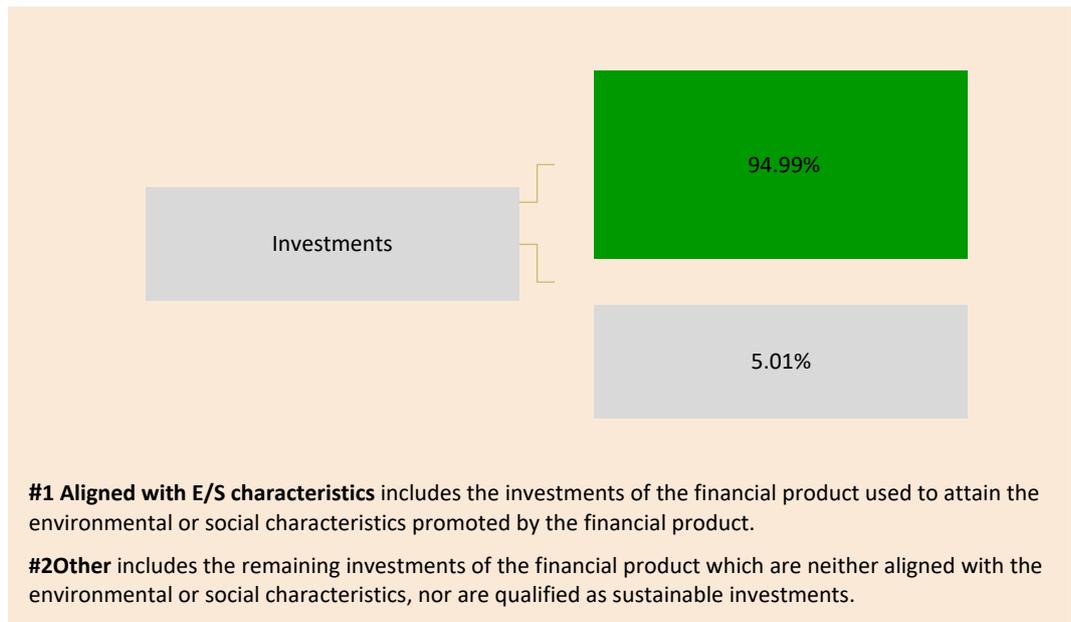

HON HAI PRECISION INDUSTRY LTD	Information Technology	1.84%	Taiwan (Republic of China)
ICICI BANK LTD	Financials	1.79%	India
WESTPAC BANKING CORPORATION CORP	Financials	1.75%	Australia
HYUNDAI MOTOR	Consumer Discretionary	1.70%	Korea (South), Republic of
CHINA CONSTRUCTION BANK CORP H	Financials	1.68%	China
HDFC BANK LTD	Financials	1.53%	India
AIA GROUP LTD	Financials	1.37%	Hong Kong
KB FINANCIAL GROUP INC	Financials	1.29%	Korea (South), Republic of
ALIBABA GROUP HOLDING ADR REPRESENTATIVE	Consumer Discretionary	1.23%	China

### What was the proportion of sustainability-related investments?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

#### ● What was the asset allocation?

The Fund did not commit to holding Sustainable Investments and therefore the Fund's exposure to Sustainable Investments has not been assessed, however, during the reference period, it is possible a percentage of the Fund's investments were aligned with the EU Taxonomy (see the section "To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?" below).

#### ● In which economic sectors were the investments made?

Sector	% Proportion
Information Technology	24.91%
Financials	22.91%
Consumer Discretionary	9.21%

**Asset allocation** describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Communication	7.35%
Materials	6.87%
Energy	6.53%
Industrials	5.37%
Cash Securities	5.01%
Real Estate	3.71%

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas     In nuclear energy

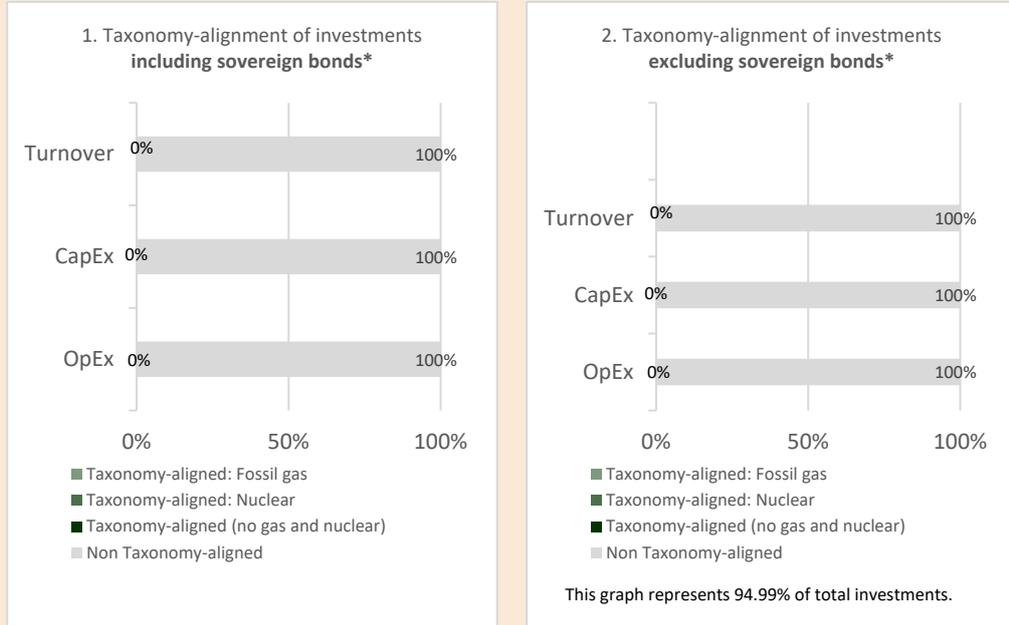

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0%

Enabling Activities: 0%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This is the first period the fund is disclosing Taxonomy alignment, therefore there are no previous periods for comparison purposes.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What was the share of socially sustainable investments?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

There may on occasion be investments in financial techniques and instruments and derivatives used for efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds, cash FX) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

During 2024, we undertook a variety of stewardship related activity. This included engagement and voting activity across climate, earth and people themes. The level of engagement and voting conducted varied depending on the materiality of the issue and its applicability to select companies.

Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

**How did this financial product perform compared to the reference benchmark?**

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

- ***How does the reference benchmark differ from a broad market index?***  
Not Applicable.
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***  
Not Applicable.
- ***How did this financial product perform compared with the reference benchmark?***  
Not Applicable.
- ***How did this financial product perform compared with the broad market index?***  
Not Applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aviva Investors – Climate Transition Global Credit Fund  
**Legal entity identifier:** 5493007VNELBIOF7EH34

**Environmental and/or social characteristics**

**Did this financial product have a sustainable investment objective?**

<input checked="" type="radio"/> <input type="radio"/> <b>Yes</b>	<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul>
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Sub-Fund invests at least 70% of total net assets (excluding derivatives for efficient portfolio management) in bonds of companies from anywhere in the world (including emerging markets) responding to climate change which meet the Investment Manager’s eligibility criteria as described below (the “core” investment).;

In this core investment the Sub-Fund excludes fossil fuel companies and has two investment sleeves:

- A Solutions sleeve, which will invest in corporate bond issuers whose goods and services provide solutions for climate change mitigation and adaptation;

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- A Transition sleeve, which allocates to companies positively aligning to a warmer climate and a low-carbon economy and orientating their business models to be resilient in a warmer climate and a low-carbon economy.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The below criteria are binding on the investment process to ensure underlying investments are inclusive of those securities promoting environmental or social characteristics.

A. The Investment Manager's Baseline Exclusions Policy which includes the following exclusions:

- Controversial weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact ("UNGC"); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons\*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970). We retain discretion within the scope of this screen to additionally exclude companies involved in nuclear weapons, where this supplies nuclear states within the NPT but Aviva Investors considers the state to have undermined widely accepted non-proliferation arms control treaties, conventions and norms. This will predominantly relate to the UN's Nuclear Non-Proliferation Treaty but may extend to other existing conventions where relevant.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI's controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviors since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager's Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B. The Sub-Fund-specific fossil fuel exclusions which are based on:

a. A maximum acceptable percentage of estimated revenue derived from the specific activities; the maximum acceptable percentage of revenue thresholds are:

- Thermal coal at 0%;
- Arctic oil and gas production at 0%;
- Natural gas power generation at 15%;
- Liquid fuel power generation at 10%;
- Unconventional oil and gas production at 0%;
- Conventional oil and gas production at 10%;
- Oil and gas extraction and production at 10%;
- Oil and gas distribution and retail, equipment and services, petrochemicals, pipelines and transportation, refining and trading at 75%.

The Investment Manager will also exclude direct investments in companies which manufacture products that seek to do harm when used as intended. This would include companies manufacturing tobacco products.

b. A maximum acceptable amount of reserves, the maximum reserve thresholds are:

- Thermal coal reserves 0 metric tonnes;
- Shale oil and gas reserves at 0 mmboe;
- Oil shale and tar sands reserves at 0 mmboe;
- Unconventional oil and gas reserves at 0 mmboe;
- Oil and gas reserves and 1000 mmboe

The Sub-Fund may invest up to 10% of total net assets (excluding derivatives for efficient portfolio management) in companies that do not form part of the core investment.

C. The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is considered through the lenses outlined above. For corporates, the good governance principle introduced by SFDR will be met through a combination of the UNGC (as part of the Investment Manager's Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. Good governance indicators form a substantial component of the Investment Manager's ESG scoring tools and ESG research.

### ● **How did the sustainability indicators perform?**

It is anticipated that the sustainability indicators reported on for this Sub-Fund will include, but not be limited to:

1. Portfolio metric of any revenue derived from excluded activity (e.g., thermal coal)
2. UNGC 'severe' and 'very severe' incidents avoided and commentary on any exceptions.
3. Additionally, the Sub-Fund will measure exposure to the Principle Adverse Impacts indicators that the Investment Manager has committed to prioritising in its Principle Adverse Impact Statement. For reference these include:
  1. Indicators relating to Greenhouse Gas (GHG) Emissions
  2. Indicators pertaining to activities negatively affecting biodiversity-sensitive areas
  3. Indicators relating to Board Gender Diversity.

As noted above, ESG characteristics of the Sub-Fund include its two investment sleeves, being the "Solutions" and "Transition" sleeves. The Investment Manager uses the following sustainability indicators to report on these characteristics:

- For the “Solutions” sleeve, the Investment Manager assesses that companies have more than 20% revenue generated from solutions product and services and then reports on the proportion of solution providers in the portfolio;
- For the Transition Sleeve, the Investment Manager will assess the proportion of companies in the Sub-Fund displaying strong climate governance. This may include but not limited to, the percentage of companies attaining a certain Climate Risk Management Score\*, and the percentage of companies setting or committing to emission reduction goals which align to science-based targets.

\*The climate risk management score seeks to measure the quality of climate governance in place at individual companies. The score is created by using multiple data points sourced from third parties or created internally.

The fund will continue to be managed in line with the Aviva Investors Baseline Exclusion policy and any revisions made to it over time; There have been no breaches of the policy on the fund since implementation.

Adverse sustainability indicator	Metric	Annual Average
GHG Emissions	Scope 1 GHG emissions	10,300.30
	Scope 2 GHG emissions	3,973.90
	Scope 3 GHG emissions	155,556.18
	Total GHG emissions	175,216.50
Carbon Footprint	Carbon footprint	396.33
GHG Intensity of investee companies	GHG intensity of investee companies	664.57
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	8.63%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	64.51
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.49
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	9.70%
%Board Gender Diversity	Average ratio of female to male board members in investee companies	38.35%
SBTi Targets Approved	Share of investments in companies that have approved SBTi Targets	41.80%
SBTi Targets Committed	Share of investments in companies that have committed to SBTi Targets	8.89%
CDP Climate Score	Share of investments in companies that have a CDP climate score of A- or above	28.15%
Solutions Revenue	Share of investments in companies within the portfolio that have >20% revenue generated from solutions products	23.81%
Climate Risk Management	Share of investments in companies within the portfolio that have strong climate governance (climate risk management score >B-)	48.68%

**AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which

we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template. Similarly, methodology changes from our third-party data providers may impact year-on-year data.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company’s value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

● **...and compared to previous periods?**

Adverse sustainability indicator	Metric	Annual Average 2023	Annual Average 2024
GHG Emissions	Scope 1 GHG emissions	11,127.56	10,300.30
	Scope 2 GHG emissions	3,378.52	3,973.90
	Scope 3 GHG emissions	88,773.65	155,556.18
	Total GHG emissions	102,928.23	175,216.50
Carbon Footprint	Carbon footprint	237.86	396.33
GHG Intensity of investee companies	GHG intensity of investee companies	671.18	664.57
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	6.21%	8.63%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	63.01%	64.51
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.62	0.49
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%	9.70%
Board Gender Diversity	Average ratio of female to male board members in investee companies	36.74%	38.35%
SBTi Targets Approved	Share of investments in companies that have approved SBTi Targets	31.72%	41.80%
SBTi Targets Committed	Share of investments in companies that have committed to SBTi Targets	15.84%	8.89%
CDP Climate Score	Share of investments in companies that have a CDP climate score of A- or above	41.53%	28.15%
Solutions Revenue	Share of investments in companies within the portfolio that have >20% revenue generated from solutions products	33.19%	23.81%
Climate Risk Management	Share of investments in companies within the portfolio that have strong climate governance (climate risk management score >B-)	65.46%	48.68%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

**How did this financial product consider principal adverse impacts on sustainability factors?**

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

### What were the top investments of this financial product?

Security Description	Sector	% Assets	Country
TREASURY BOND	FI Securities	1.50%	United States
ESSENTIAL UTILITIES INC	Utilities	1.44%	United States
BANK OF AMERICA CORP	Financials	1.29%	United States
STANDARD CHARTERED PLC MTN RegS	Financials	1.26%	United Kingdom
VOLKSWAGEN GROUP OF AMERICA FINANC 144A	Consumer Discretionary	1.26%	United States
NATWEST GROUP PLC MTN RegS	Financials	1.24%	United Kingdom
AUSTRALIA AND NEW ZEALAND BANKING RegS	Financials	1.23%	Australia
IBERDROLA INTERNATIONAL BV RegS	Utilities	1.20%	Netherlands
AIA GROUP LTD MTN RegS	Financials	1.20%	Hong Kong
CELLNEX FINANCE COMPANY SA MTN RegS	Communication	1.18%	Spain
DANSKE BANK A/S 144A	Financials	1.18%	Denmark
CITIGROUP INC MTN RegS	Financials	1.12%	United States
MORGAN STANLEY	Financials	1.10%	United States
PLUXEE NV RegS	Financials	1.08%	Netherlands
ENERGIAS DE PORTUGAL SA RegS	Utilities	1.08%	Portugal

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

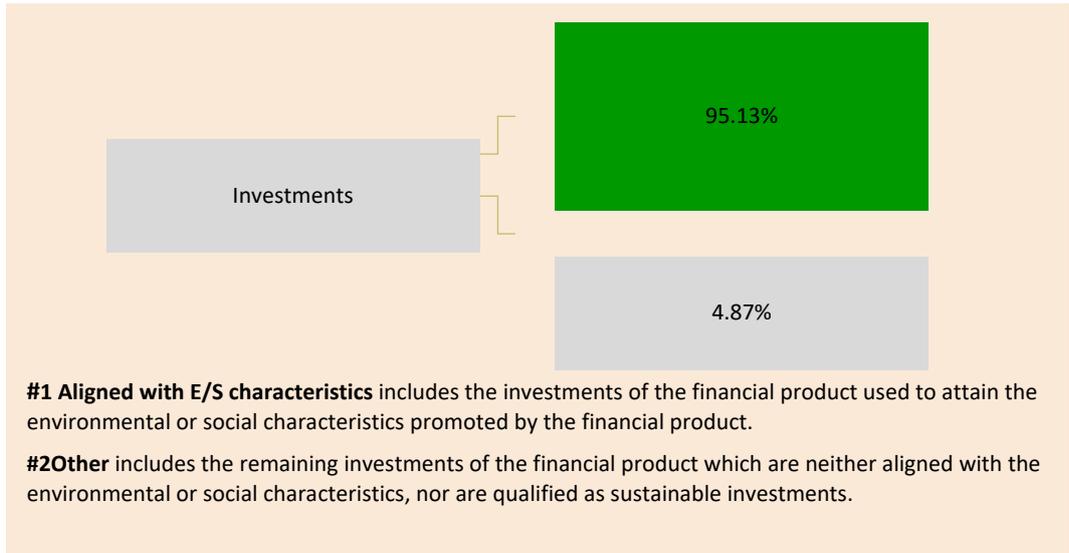

1<sup>st</sup> January 2024 – 31<sup>st</sup> December 2024

### What was the proportion of sustainability-related investments?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

● **What was the asset allocation?**

**Asset allocation** describes the share of investments in specific assets.

The Fund did not commit to holding Sustainable Investments and therefore the Fund's exposure to Sustainable Investments has not been assessed, however, during the reference period, a percentage of the Fund's investments were aligned with the EU Taxonomy (see the section "To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?" below).

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **In which economic sectors were the investments made?**

Sector	Proportion (%)
Financials	39.32%
Communication	14.10%
Utilities	12.27%
Industrials	8.52%
Health Care	5.99%
Consumer Discretionary	4.26%
Cash Securities	4.17%
Materials	3.41%
FI Securities	3.00%
Information Technology	2.88%
FX	0.43%
Real Estate	0.25%
Non-Spendable Cash	0.10%
Other	-0.19%
Consumer Staples	1.48%

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

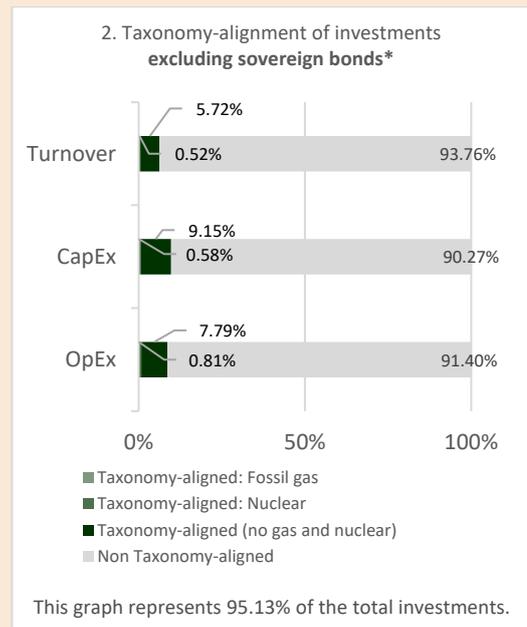

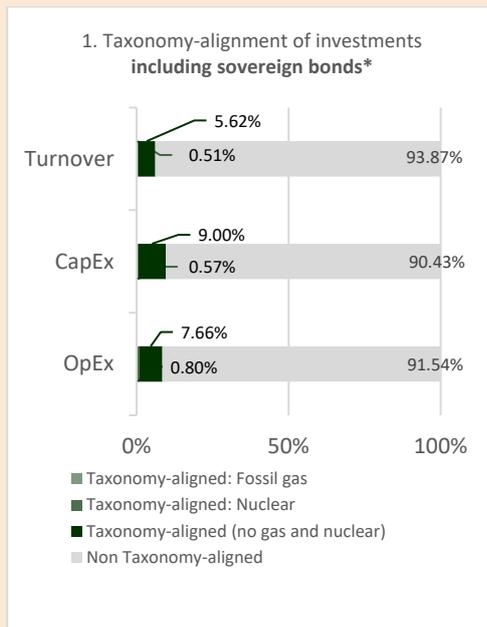

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Please see the following table for the breakdown of EU Taxonomy alignment (inc.Sovereigns):

	Taxonomy-aligned: Fossil gas	Taxonomy-aligned: Nuclear	Taxonomy-aligned (no gas and nuclear)	Non Taxonomy- aligned
OpEx	0	0.80	7.66	91.54
CapEx	0	0.57	9.00	90.43
Turnover	0	0.51	5.62	93.87

Please see the following table for the breakdown of EU Taxonomy alignment (excl.Sovereigns):

	Taxonomy-aligned: Fossil gas	Taxonomy-aligned: Nuclear	Taxonomy-aligned (no gas and nuclear)	Non Taxonomy- aligned
OpEx	0%	0.81%	7.79%	91.40%
CapEx	0%	0.58%	9.15%	90.27%
Turnover	0%	0.52%	5.72%	93.76%

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.92%

Enabling Activities: 2.81%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This is the first period the fund is disclosing Taxonomy alignment, therefore there are no previous periods for comparison purposes.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments defined under SFDR and does not commit to making investments aligned to the EU taxonomy.

**What was the share of socially sustainable investments?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

There may on occasion be investments in financial techniques and instruments and derivatives used for efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds, cash FX) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During 2024, we undertook a variety of stewardship related activity. This included engagement and voting activity across climate, earth and people themes. The level of engagement and voting conducted varied depending on the materiality of the issue and its applicability to select companies.

Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

## How did this financial product perform compared to the reference benchmark?

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

- ***How does the reference benchmark differ from a broad market index?***

Not Applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable.

- ***How did this financial product perform compared with the broad market index?***

Not Applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX V

**Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aviva Investors – Climate Transition Global Equity Fund  
**Legal entity identifier:** 549300KFQIVCVG4XKR35

**Sustainable investment objective**

**Did this financial product have a sustainable investment objective?**

<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>Yes</b>	<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> <b>No</b>
<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 98.53%</b> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul>
<input type="checkbox"/> It made <b>sustainable investments with a social objective: ___%</b>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**To what extent was the sustainable investment objective of this financial product met?**

The Climate Transition Global Equity Fund (the “Sub-Fund”) is part of Aviva Investors’ Sustainable Transition range which aims to support three key sustainable outcomes – relating to People, Climate and Earth (or Natural Capital) – closely aligned to the principles of the UN Sustainable Development Goals (“SDGs”). Each fund in the range follows a common investment philosophy to avoid significant harm, invest in solutions and back transition aligned to its particular theme.

This Sub-Fund focusses on “Climate” (primary SDGs: 7 Affordable and Clean Energy and 13 Climate Action).

Alongside aiming to generate long-term capital growth the Sub-Fund's sustainable investment objective is that it aims to support the transition towards a net zero economy and/or one that is also more resilient to higher temperatures, by investing in equities of companies that are either providing solutions that help tackle the impacts of climate change or transitioning their business models towards a net zero and/or warmer economy, and by engaging with portfolio companies.

A net zero economy is one where the level of GHG emissions is reduced to as close to zero as possible, with any residual amounts emitted matched by removal. An economy that is more resilient to higher temperatures is one that has adjusted to actual and expected climate change and its impacts.

Companies can support the transition by reducing their emissions, adapting their business models to a lower carbon, warmer world or by providing adaptation and mitigation solutions to tackle climate change.

The Sub-Fund invests in "sustainable investments" that contribute to the Sub-Fund's objective, either through the company's products or services ("solutions" companies) or via the company's operations ("transition" companies).

#### **Invest in solutions**

The Sub-Fund invests in "solutions" companies providing goods and services that provide solutions for climate change mitigation and adaptation. Mitigation themes seek to mitigate the risk of climate change and includes, for example, sustainable transport, energy efficiency or renewable energy. Adaptation themes seek to help communities to adapt to the adverse physical impacts of climate change and includes, for example, water, health, forestry and agriculture.

By investing in "solutions" companies in line with these themes, these Sustainable Investments directly contribute towards the Sub-Fund's sustainable investment objective. Companies will be eligible for investment if they derive at least 20% of their revenue from the themes set out above.

The Investment Manager has therefore chosen 20% threshold of revenues based on the sustainable products and services used to select "Solutions" companies in order:

- To reflect that absolute contribution to sustainable activities requires scalable solutions and therefore to not penalise large companies with diverse product/revenue streams but who do provide genuine solutions to sustainable activities
- It is a threshold the Investment Manager believes to demonstrate significant part of any companies revenues (i.e. it is "material" to those companies business strategy)

#### **Back transition**

Aviva Investors believes that the three greatest sustainability challenges of our time are climate change, biodiversity loss and social inequality and that all companies, regardless of sector and geography, have an impact on and are impacted by these immensely complicated and challenging issues. As such, all companies need to change the way they operate if we are going to achieve a sustainable future for both people and planet aligned with our sustainable investment objectives (together, a more socially equitable, nature positive and net zero economy that is also more resilient to higher temperatures). This "transition" of all companies is one of the most important sustainability objectives that must be achieved.

The market needs to allocate capital to those companies leading the transition to a sustainable future in terms of how they operate, not just those providing solutions to the challenges mentioned above through their products and services. In doing so, we are rewarding and backing those companies that are leading their sectors which can have a powerful knock-on effect by raising industry standards and encouraging others to improve.

The Sub-Fund invests in "transition" companies that are demonstrating leadership in the transition towards a net zero economy and/or one that is more resilient to higher temperatures by reducing their impact on climate change through their operations or that are positively aligning to and orientating their business models to be resilient in a warmer climate and a low-carbon economy.

Transition companies are identified using a proprietary Transition Risk (“T-Risk”) framework. The framework provides a measure of the risk exposure of sub-industries to decarbonisation and adaptation issues, providing a quantitative risk metric which is converted into an alphanumeric risk ranking (e.g. high, medium or low). The framework then seeks to measure the quality of climate risk management in place at individual companies. Companies that are in higher T-risk sub-industries are required to demonstrate stronger management of climate issues to be considered for investment by the Sub-Fund. Our T-Risk model thus ensures that firms have taken steps to manage their impact on, and exposure to, climate change; supporting the transition and contributing towards the sustainable investment objective.

The Sub-Fund has a bespoke engagement programme linked to the sustainable investment objective. All companies held in the Sub-Fund are asked to develop and formally validate science-based emission reduction targets (“SBT”) in line with the Science Based Targets Initiative (“SBTi”) criteria and to provide annual public disclosure to the CDP’s Climate Change questionnaire and strive for continually improving performance. If achieved, these asks will result in companies reducing their negative impact on, and effectively managing the risks associated with, climate change, thus supporting the transition towards a net zero economy.

The Investment Manager will conduct an annual assessment of each company’s progress on the engagement programme, scoring them in one of five categories. Where there is insufficient progress, escalating action will be taken which may ultimately lead to divestment from those companies that fail to meet our minimum expectations.

No reference benchmark has been designated for the purposes of meeting the sustainable investment objective.

● **How did the sustainability indicators perform?**

Adverse sustainability indicator	Metric	Annual Average
GHG Emissions	Scope 1 GHG emissions	5,529.91
	Scope 2 GHG emissions	2,409.37
	Scope 3 GHG emissions	30,331.69
	Total GHG emissions	38,105.34
Carbon Footprint	Carbon footprint	123.64
GHG Intensity of investee companies	GHG intensity of investee companies	577.44
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	2.67%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	57.60
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.21
SBTi Targets Approved	Share of investments in companies that have approved SBTi Targets	56.10%
SBTi Targets Committed	Share of investments in companies that have committed SBTi Targets	23.01%
CDP Climate Score	Share of investments in companies that have a CDP climate score of A- or above	38.93%
Solutions Revenue	Share of investments in companies within the portfolio that have >20% revenue generated from solutions products	46.20%
Implied Temperature Rise	Implied Temperature Rise from MSCI ESG Research is an intuitive, forward-looking metric, expressed in degrees Celsius, designed to show the temperature alignment of companies, portfolios and funds with global temperature goals.	2.15

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

Fossil Fuel Reserves	This field identifies companies with evidence of owning fossil fuel reserves regardless of their industries, including companies that own less than 50% of a reserves field.	1.00%
Climate Risk Management	Share of investments in companies within the portfolio that have strong climate governance (climate risk management score >B-)	74.23%

The fund will continue to be managed in line with the Aviva Investors Baseline Exclusion policy and any revisions made to it over time; There have been no active breaches of the policy on the fund since implementation.

The Investment Manager systematically monitors progress against the asks within the Fund’s engagement programme by conducting an annual assessment of companies ranking in categories 1 to 5, with 1 being the leaders. Below is a breakdown of the portfolio into these 5 categories:

- 1. 43%
- 2. 26%
- 3. 17%
- 4. 10%
- 5. 5%

The Investment Manager has an escalation pathway that may lead to divestment if the engagement asks of the Fund’s programme are not met. Aviva Investors does however acknowledge the challenges of implementing these asks and evaluates companies on their ability to demonstrate progress over time. Aviva Investor’s Global Voting Policy provides more details on its approach and perspectives on governance and sustainability best practice, and the Annual Sustainability Review provides more details on the Investment Manager’s approach to escalation. These documents are available on the Aviva Investors website here: <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

**AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template. Similarly, methodology changes from our third-party data providers may impact year-on-year data.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company’s value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

● ***...and compared to previous periods?***

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Adverse sustainability indicator	Metric	Annual Average 2023	Annual Average 2024
GHG Emissions	Scope 1 GHG emissions	6,256.66	5,529.91
	Scope 2 GHG emissions	3,167.17	2,409.37
	Scope 3 GHG emissions	43,013.58	30,331.69
	Total GHG emissions	48,491.63	38,105.34
Carbon Footprint	Carbon footprint	135.36	123.64
GHG Intensity of investee companies	GHG intensity of investee companies	524.73	577.44
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	0.80%	2.67%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	63.45	57.60
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.46	0.21
SBTi Targets Approved	Share of investments in companies that have approved SBTi Targets	45.43%	56.10%
SBTi Targets Committed	Share of investments in companies that have committed SBTi Targets	27.11%	23.01%
CDP Climate Score	Share of investments in companies that have a CDP climate score of A- or above	38.75%	38.93%
Solutions Revenue	Share of investments in companies within the portfolio that have >20% revenue generated from solutions products	55.38%	46.20%
Implied Temperature Rise	Implied Temperature Rise from MSCI ESG Research is an intuitive, forward-looking metric, expressed in degrees Celsius, designed to show the temperature alignment of companies, portfolios and funds with global temperature goals.	1.82	2.15
Fossil Fuel Reserves	This field identifies companies with evidence of owning fossil fuel reserves regardless of their industries, including companies that own less than 50% of a reserves field.	0.00%	1.00%
Climate Risk Management	Share of investments in companies within the portfolio that have strong climate governance (climate risk management score >B-)	71.74%	74.23%

## **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

To ensure that sustainable investments in the sub-fund do not cause significant harm to any environmental or social objective, there are two levels of screening applied:

1. Aviva Investors' Baseline Exclusions Policy, which includes the following exclusions:

- Controversial weapons
- Civilian firearms
- Thermal coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact ("UNGC"); and
- Tobacco.

The exclusions are based on:

a. A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons, where companies supply state nuclear weapons programmes where the state lacks credible commitments to effective arms controls, disarmament and non-proliferation as outlined in the Treaty on the Non-Proliferation of Nuclear Weapons (NPT) \*
- Civilian firearms 5%
- Thermal coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970). We retain discretion within the scope of this screen to additionally exclude companies involved in nuclear weapons, where this supplies nuclear states within the NPT but Aviva Investors considers the state to have undermined widely accepted non-proliferation arms control treaties, conventions and norms. This will predominantly relate to the UN's Nuclear Non-Proliferation Treaty but may extend to other existing conventions where relevant.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b. MSCI's controversy screening data to identify recent controversies to the principles set out under the UN Global Compact. An AI ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviours since the controversy. If we consider failings to be redeemable we will place the company into a structured and time bound engagement program.

Further details on the Investment Manager's Baseline Exclusions Policy is available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>

2. Fund-level screening based on the indicators for principal adverse impacts ("PAI") on sustainability factors. Aviva Investors assesses an issuer's performance against each of the relevant indicators and the sub-fund will not invest where it is considered that an issuer is causing significant harm to an environmental or social objective. Relevant indicators include all the mandatory PAIs as well as those voluntary indicators selected at a firm-level that are relevant to the theme of the Sub-Fund. Please refer to the PAI Statement on Aviva Investors

website for further detail here

<https://www.avivainvestors.com/en-gb/capabilities/sustainable-finance-disclosure-regulation/>

--- *How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Manager has a proprietary framework for taking the PAI indicators into account, which differs depending on the type of indicator. Where applicable, the Investment Manager has assigned a red flag to issuers which are considered to cause significant harm to an environmental or social objective. These issuers will be excluded from the investment universe for this Sub-Fund. Furthermore, due diligence will be carried out on every company by portfolio managers and ESG analysts. Where PAI data does not exist, the team will seek to qualitatively assess Do No Significant Harm on a best-efforts basis. This may include engaging directly with companies to ask them for the missing data.

--- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Investment Manager uses the MSCI overall controversy flag (where a “red” flag is considered a fail) to ensure that sustainable investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (“UNGPBHR”), including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation (“ILO”) on Fundamental Principles and Rights at Work and the International Bill of Human Rights. The MSCI methodology covers violations of the OECD Guidelines, United Nations Global Compact Principles (“UNGC”), the ILO conventions and the UNGPBHR (which references the International Bill of Human Rights), amongst many other global norms and conventions. All issuers with a red flag will be excluded from the investment universe for this Sub-Fund.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:  
1<sup>st</sup> January 2024 – 31<sup>st</sup> December 2024

**How did this financial product consider principal adverse impacts on sustainability factors?**

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Environmental PAI 2 relating to carbon footprint
- Environmental PAI 3 relating to carbon intensity
- Environmental PAI 5 relating to share of non-renewable energy consumption and production
- Environmental PAI 6 relating to energy consumption intensity

**What were the top investments of this financial product?**

Largest Investments	Sector	% Assets	Country
MICROSOFT CORP	Information Technology	7.74%	United States
LINDE PLC	Materials	4.55%	United States
PTC INC	Information Technology	4.27%	United States

MUENCHENER RUECKVERSICHERUNGS-GESE	Financials	4.06%	Germany
NVIDIA CORP	Information Technology	4.02%	United States
TRANE TECHNOLOGIES PLC	Industrials	3.65%	Ireland
WASTE MANAGEMENT INC	Industrials	3.48%	United States
MOODYS CORP	Financials	3.31%	United States
ALPHABET INC CLASS A	Communication	3.27%	United States
HUBBELL INC	Industrials	3.19%	United States
ASM INTERNATIONAL NV	Information Technology	3.16%	Netherlands
RELX PLC	Industrials	3.00%	United Kingdom
VISA INC CLASS A	Financials	3.00%	United States
AUTODESK INC	Information Technology	2.96%	United States
CADENCE DESIGN SYSTEMS INC	Information Technology	2.96%	United States

Taxonomy-aligned activities are expressed as a share of:

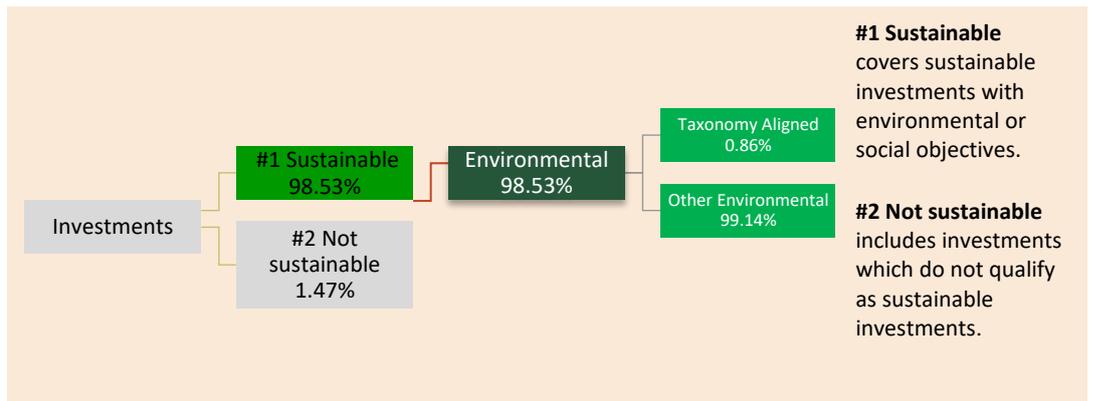

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**Asset allocation** describes the share of investments in specific assets.

### What was the proportion of sustainability-related investments?

#### ● What was the asset allocation?

**#1 Sustainable** covers sustainable investments with environmental or social objectives.

**#2 Not sustainable** includes investments which do not qualify as sustainable investments.

#### ● In which economic sectors were the investments made?

Sector	Proportion (%)
Information Technology	30.49%
Industrials	29.98%
Financials	12.99%
Health Care	8.42%
Materials	6.17%
Communication	4.42%
Consumer Staples	3.52%
Cash Securities	1.47%
Consumer Discretionary	1.45%
Utilities	1.08%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities are economic activities** for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

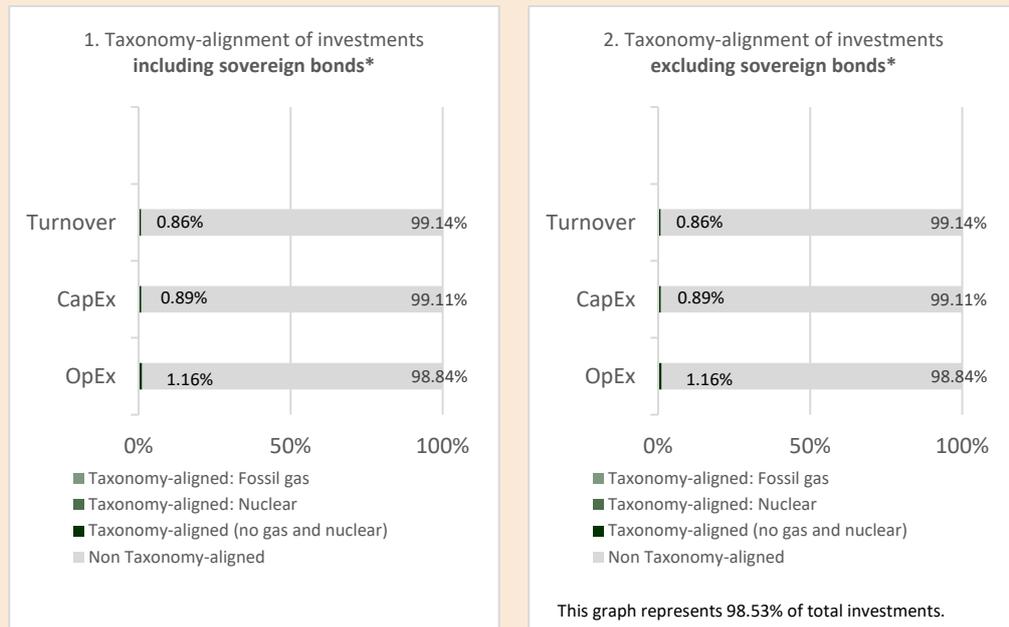

0.86% were aligned to the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No:

Please see the following table for the breakdown of EU Taxonomy alignment (inc.Sovereigns):

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

	Taxonomy-aligned: Fossil gas	Taxonomy-aligned: Nuclear	Taxonomy-aligned (no gas and nuclear)	Non Taxonomy-aligned
OpEx	0	0	1.16	98.84
CapEx	0	0	0.89	99.11

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Turnover	0	0	0.86	99.14
----------	---	---	------	-------

Please see the following table for the breakdown of EU Taxonomy alignment (excl.Sovereigns):

	Taxonomy-aligned: Fossil gas	Taxonomy-aligned: Nuclear	Taxonomy-aligned (no gas and nuclear)	Non Taxonomy-aligned
OpEx	0	0	1.16	98.84
CapEx	0	0	0.89	99.11
Turnover	0	0	0.86	99.14

● **What was the share of investments made in transitional and enabling activities?**

Transitional: 0.01%

Enabling: 0.84%

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

This is the first year the fund has disclosed Taxonomy alignment, therefore there are no previous periods for comparison purposes.

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The Sub-Fund invests at least 90% of total net assets in equities and equity-related securities of companies from anywhere in the world (including emerging markets), except in limited circumstances as explained above. At the point the Sub-Fund makes an investment into such an asset, that asset will qualify as a Sustainable Investment. These investments have an environmental objective but are not actively targeting alignment with the EU Taxonomy.

99.14% of the Sustainable Investments held within the portfolio were not aligned to the EU Taxonomy .

**What was the share of socially sustainable investments?**

The Sub-Fund does not actively invest in sustainable investments with a social objective.

**What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

The Sub-Fund can invest 10% of total net assets in ancillary liquid assets, eligible deposits, money market instruments, money market funds and derivatives used for exposure to equity indices for managing cash flows, or in derivatives used for hedging. Exposure to equity indices would be for a limited amount of time and in limited circumstances to manage cash flows. Such assets would not be deemed as Sustainable Investments. Some but not all of the underlying constituents of the equity indices may nevertheless

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

qualify as sustainable investments. The Sub-Fund may hold more than 10% of total net assets in such investments in limited circumstances, such as if there is a sudden and material subscription during a time of exceptional market conditions that does not allow immediate allocation to Sustainable Investments.

Given the nature of these investments and short-term use, it may not always be possible to apply minimum safeguards due to look through or liquidity. These assets do not affect the delivery of the sustainable investment objective on a continuous basis as they constitute a small proportion of the Sub-Fund's total net assets.

## What actions have been taken to attain the sustainable investment objective during the reference period?

During 2024, we undertook a variety of stewardship related activity. This included engagement and voting activity across climate, earth and people themes. The level of engagement and voting conducted varied depending on the materiality of the issue and its applicability to select companies.

Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

Lonza

We seek to drive real world outcomes at multiple levels to drive long term value for investors. These levels are coordinated across six different layers of include: direct engagement in local communities, to corporate engagement, through to sector-level and value chain engagement, to the country level and with international institutions. We are active owners and lenders, using our voice to drive change in the issuers in which we invest and to which we lend money. We harness insights from our corporate engagements and investment teams to ensure that our macro-level engagement with those who shape markets is robust and well-informed. Conversely, the macro level piece helps foster the policy and regulatory environment for direct engagements to be more effective. We call this holistic stewardship.

Issue:

Lonza produces organic fine chemicals, biocides, active ingredients, and biotechnology products, offering custom chemical manufacturing and fermentation processing for the life sciences, pharmaceuticals, food processing, and agricultural sectors, with production sites in Europe, the United States, and China. Lonza is included within the Climate Transition Global Equity franchise as a transition name, indicating our confidence in the company's climate transition strategy given the level of climate risk it faces. While investment models and reports provide a certain level of detail, meeting directly with the companies we invest in offers invaluable insights.

Action:

We engaged with Lonza and discussed the following topics to gain greater insight into its climate transition strategy; including disclosures, targets, climate related risk assessment and management, operational and value chain decarbonisation, facility and energy management, research & development, insight into product manufacturing processes, and circularity in operations and value chain.

Outcome:

We were particularly pleased to learn that the company has made progress on several fronts with reference to our asks. Firstly, Lonza's site related physical risk assessment utilises a credible database for localised physical climate risks. The physical risk assessments take place at sites covering over 80% of sales and thus enables the company to better understand how they further mitigate their risks on a more granular basis. Additionally, Lonza, together with five other major pharmaceutical companies, entered

into a significant agreement with Envision Energy to secure access to renewable power in China. This initiative will provide 200 GWh of renewable electricity annually, resulting in an estimated reduction of 120,000 tonnes of CO<sub>2</sub>e. Notably, there is increased focus on improving the use-life of solvents in production processes and an ongoing effort to innovatively use end of life equipment, with a specific case study of utilising old equipment to produce PVC flooring in the US.

**How did this financial product perform compared to the reference sustainable benchmark?**

No reference benchmark has been designated for the purpose of attaining the sustainable investment objective.

● ***How did the reference benchmark differ from a broad market index?***

N/A - No reference benchmark has been designated for the purposes of attaining the sustainable investment objective.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

N/A - No reference benchmark has been designated for the purposes of attaining the sustainable investment objective.

● ***How did this financial product perform compared with the reference benchmark?***

N/A - No reference benchmark has been designated for the purposes of attaining the sustainable investment objective.

● ***How did this financial product perform compared with the broad market index?***

N/A - No reference benchmark has been designated for the purposes of attaining the sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Aviva Investors – Emerging Markets Bond Fund Legal entity identifier:549300BBDXSD8IK6QS04

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <b>Yes</b>	<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The ESG analysis and considerations described below are incorporated into the investment process but may not always have a material impact on investments in the Sub-Fund. For detailed information on the impact of the ESG analysis on the Sub-Fund's benchmark at a point in time, please see refer to the Fund impact assessment matrix available on the website [EU Sustainable Finance Disclosure Regulation \(SFDR\) - Aviva Investors](#).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The below criteria are binding elements on the investment process to ensure underlying investments are inclusive of securities promoting environmental or social characteristics.

The exclusions detailed below will be applied to this universe:

A. The Investment Manager’s Baseline Exclusions Policy which includes the following exclusions:

- Controversial weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact (“UNGC”); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons, where companies supply state nuclear weapons programmes where the state lacks credible commitments to effective arms controls, disarmament and non-proliferation as outlined in the Treaty on the Non-Proliferation of Nuclear Weapons (NPT) \*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970). We retain discretion within the scope of this screen to additionally exclude companies involved in nuclear weapons, where this supplies nuclear states within the NPT but Aviva Investors considers the state to have undermined widely accepted non-proliferation arms control treaties, conventions and norms. This will predominantly relate to the UN’s Nuclear Non-Proliferation Treaty but may extend to other existing conventions where relevant.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI’s controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviors since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager’s Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B. ESG Sovereign Assessment on the sustainability characteristics of sovereign issuers and minimum thresholds applied across sovereign issuers based on the Investment Manager’s proprietary ESG scores.

A minimum threshold ESG score for sovereigns at 2.5 is applied to the investment universe, with the aim of screening out those with the worst ESG characteristics.

The scores are derived from the Investment Manager’s proprietary ESG Sovereign Monitor. For issuers scoring between 2.5 and 4 an enhanced due diligence process will operate whereby such issuers will need to pass a

further qualitative assessment to be included in the sub-fund. The considerations for these lower scoring issuers, include but are not limited to, having a positive sustainable GDP gap, or where the ESG analyst considers the data is outdated, inaccurate or incomplete.

The Investment Manager believes providing debt financing to sovereigns supports the pivotal role they play in the transition to a more sustainable future. The Investment Manager also recognises associated sustainability risks. Effective state governance reduces those risks but, where appropriate, sovereigns are excluded from the Sub-Fund’s investment universe, subject to exceptions that mitigate unintended consequences and data limitations.

Assessments are made using: the Investment Manager’s proprietary sovereign ESG model (which assigns ratings on a scale of 0 to 10 where sufficient information is available) as a starting point, external data, and qualitative judgements from the Investment Manager’s in-house ESG specialists. The ESG Sovereign Monitor’s quantitative scoring approach assigns a composite ESG score to over 170 countries. These scores are derived from over 400 individual data points, which form 11 composite indicators.

Following a considered review of these ESG research insights, a decision may be taken to exclude a sovereign issuer from the Sub-Fund’s investment universe in order to mitigate the Investment Manager’s judgement of sustainability risks and falling below the Investment Manager’s minimum standard.

More information on the Investment Manager’s proprietary sovereign ESG model and the rating methodology can be found on the website: <http://www.avivainvestors.com/en-lu/about/responsible-investment/>

C.The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is met through a combination of the UNGC (as part of the Investment Manager’s Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. For sovereigns, good governance will be covered through the ESG assessment and minimum Sovereign monitor scores. Good governance indicators form a substantial component of the Investment Manager’s ESG scoring tools and ESG research.

● **How did the sustainability indicators perform?**

The fund will continue to be managed in line with the Aviva Investors baseline exclusions policy and any revisions made to it over time, there have been no active breaches of the policy on the fund since implementation.

<b>Adverse sustainability indicator</b>	<b>Metric</b>	<b>Annual Average</b>
GHG Emissions	Scope 1 GHG emissions	70,304.54
	Scope 2 GHG emissions	8,342.41
	Scope 3 GHG emissions	409,103.37
	Total GHG emissions	438,411.39
Carbon Footprint	Carbon footprint	135.43
GHG Intensity of investee companies	GHG intensity of investee companies	2,506.20
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	9.11%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	93.77
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	1.94
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.04

Board Gender Diversity	Average ratio of female to male board members in investee companies	20.21
GHG intensity	GHG intensity of investee countries	664.50
ESG Sovereign Monitor	Scores below 4	5.34%
	Score between 4 and 6	41.46%
	Scores above 6	16.01%

Countries	ESG Sovereign Monitor Good Governance Review (Scores below 4)
ANGOLA (REPUBLIC OF)	AI ESG score below 4, sustainable GDP gap negative. Good governance assessment as Amber - governance weaker than peers but showing mitigating actions. Although Angola performs weaker than its peers (particularly on institutional aspects such as judicial effectiveness and corruption) these issues do not present an immediate sustainability or investment risk. Positive steps have been taken, including in anti-corruption efforts, fiscal government improvements, and a new penal code.
BENIN (REPUBLIC OF)	AI ESG score below 4, sustainable GDP gap is positive. The latter represents an override to Article 8 exclusion criteria we implement. The sustainable GDP gap is a theoretical measure we adopted from Beyond Ratings which shows whether a country's ESG scores are in line, higher or lower than estimated by the level of its economic development. If higher, i.e. sustainable GDP gap is positive, the country's ESG performance is better than the level expected based on its level of economic development.
EGYPT (ARAB REPUBLIC OF)	AI ESG score below 4, sustainable GDP gap negative. Good governance assessment as Amber - governance weaker than peers but showing mitigating actions. Although Egypt performs weaker than its peers (particularly on institutional aspects such as judicial effectiveness, as well as corruption and human rights) these issues do not present an immediate sustainability or investment risk. Positive steps have been taken, including in anti-corruption and human rights strategy).
EGYPT GOVERNMENT INTERNATIONAL BOND	AI ESG score below 4, sustainable GDP gap negative. Good governance assessment as Amber - governance weaker than peers but showing mitigating actions. Although Egypt performs weaker than its peers (particularly on institutional aspects such as judicial effectiveness, as well as corruption and human rights) these issues do not present an immediate sustainability or investment risk. Positive steps have been taken, including in anti-corruption and human rights strategy).
GUATEMALA REPUBLIC OF (GOVERNMENT)	AI ESG score below 4, sustainable GDP gap is positive. The latter represents an override to Article 8 exclusion criteria we implement. The sustainable GDP gap is a theoretical measure we adopted from Beyond Ratings which shows whether a country's ESG scores are in line, higher or lower than estimated by the level of its economic development. If higher, i.e. sustainable GDP gap is positive, the country's ESG performance is better than the level expected based on its level of economic development.
KENYA (REPUBLIC OF)	AI ESG score below 4, sustainable GDP gap is positive. The latter represents an override to Article 8 exclusion criteria we implement. The sustainable GDP gap is a theoretical measure we adopted from Beyond Ratings which shows whether a country's ESG scores are in line, higher or lower than estimated by the level of its economic development. If higher, i.e. sustainable GDP gap is positive, the country's ESG performance is better than the level expected based on its level of economic development.
NIGERIA (FEDERAL REPUBLIC OF)	AI ESG score below 4, sustainable GDP gap negative. Good governance assessment as Amber - governance weaker than peers but showing mitigating actions. Although Nigeria performs weaker than its peers (particularly on institutional aspects such as state fragility, as well as corruption and human rights) these issues do not present an immediate sustainability or investment risk. Positive steps have been taken, including reforms of public institutions, fiscal governance and social outcomes .
PAKISTAN (ISLAMIC REPUBLIC OF)	AI ESG score below 4, sustainable GDP gap negative. Good governance assessment as Amber - governance weaker than peers but showing mitigating actions. Although Pakistan performs weaker than its peers (particularly on institutional aspects such as state fragility, as well as corruption and human rights) these issues do not present an immediate sustainability or investment risk. Positive steps have been taken, including reforms of public institutions, fiscal governance and social outcomes.

ZAMBIA (REPUBLIC OF)	AI ESG score below 4, sustainable GDP gap is positive. The latter represents an override to Article 8 exclusion criteria we implement. The sustainable GDP gap is a theoretical measure we adopted from Beyond Ratings which shows whether a country's ESG scores are in line, higher or lower than estimated by the level of its economic development. If higher, i.e. sustainable GDP gap is positive, the country's ESG performance is better than the level expected based on its level of economic development.
-------------------------	--

**AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template. Similarly, methodology changes from our third-party data providers may impact year-on-year data.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company's value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

● **...and compared to previous periods?**

Adverse sustainability indicator	Metric	Annual Average 2023	Annual Average 2024
GHG Emissions	Scope 1 GHG emissions	86,715.36	70,304.54
	Scope 2 GHG emissions	15,067.62	8,342.41
	Scope 3 GHG emissions	213,877.13	409,103.37
	Total GHG emissions	314,474.10	438,411.39
Carbon Footprint	Carbon footprint	90.43	135.43
GHG Intensity of investee companies	GHG intensity of investee companies	4,276.64	2,506.20
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	8.59%	9.11%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	93.03	93.77
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	1.96	1.94
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00	0.04

Board Gender Diversity	Average ratio of female to male board members in investee companies	19.30	20.21
GHG intensity	GHG intensity of investee countries	868.67	664.50
ESG Sovereign Monitor	Scores below 4	5.99%	5.34%
	Score between 4 and 6	46.32%	41.46%
	Scores above 6	12.76%	16.01%

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

### How did this financial product consider principal adverse impacts on sustainability factors?

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

### What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

1<sup>st</sup> January 2024 – 31<sup>st</sup> December 2024

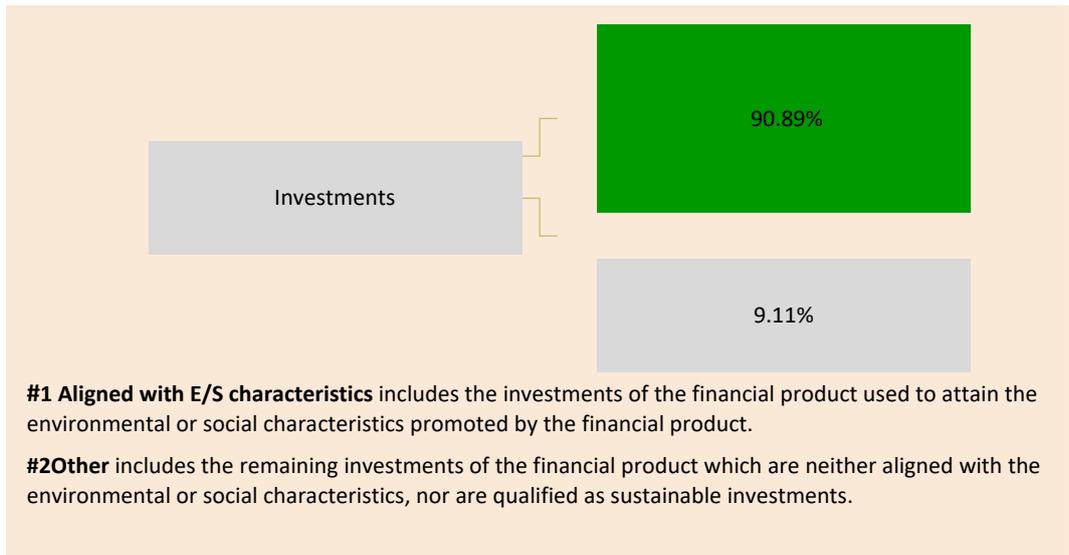

Largest Investment	Sector	% Assets	Country
TREASURY NOTE (OLD)	FI Securities	5.59%	United States
MEXICO (UNITED MEXICAN STATES) (GO	FI Securities	2.55%	Mexico
USD CASH(Alpha Committed)	Cash Securities	2.47%	United States
BRAZIL FEDERATIVE REPUBLIC OF (GOV	FI Securities	1.93%	Brazil
OMAN SULTANATE OF (GOVERNMENT) RegS	FI Securities	1.89%	Oman
MEXICO (UNITED MEXICAN STATES) (GO	FI Securities	1.49%	Mexico
BRAZIL FEDERATIVE REPUBLIC OF (GOV	FI Securities	1.45%	Brazil
IVORY COAST RegS	FI Securities	1.45%	Cote D'Ivoire
PETROLEOS MEXICANOS MTN	Energy	1.40%	Mexico
PETROLEOS MEXICANOS	Energy	1.38%	Mexico
SAUDI ARABIA (KINGDOM OF) RegS	FI Securities	1.33%	Saudi Arabia
MEXICO (UNITED MEXICAN STATES) (GO	FI Securities	1.29%	Mexico
TURKEY (REPUBLIC OF)	FI Securities	1.23%	Turkey
PERTAMINA PERSERO PT MTN RegS	Energy	1.08%	Indonesia
PANAMA REPUBLIC OF (GOVERNMENT)	FI Securities	1.07%	Panama

### What was the proportion of sustainability-related investments?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

● **What was the asset allocation?**

**Asset allocation** describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The Fund did not commit to holding Sustainable Investments and therefore the Fund's exposure to Sustainable Investments has not been assessed, however, during the reference period, it is possible a percentage of the Fund's investments were aligned with the EU Taxonomy (see the section "To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?" below).

● **In which economic sectors were the investments made?**

Sector	Proportion (%)
FI Securities	59.64%
Financials	12.75%
Energy	11.84%
Cash Securities	8.39%
Utilities	3.63%
Communication	1.60%
Materials	1.39%
Non-Spendable Cash	0.40%
Other	0.18%
FX	0.05%
Industrials	0.13%

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

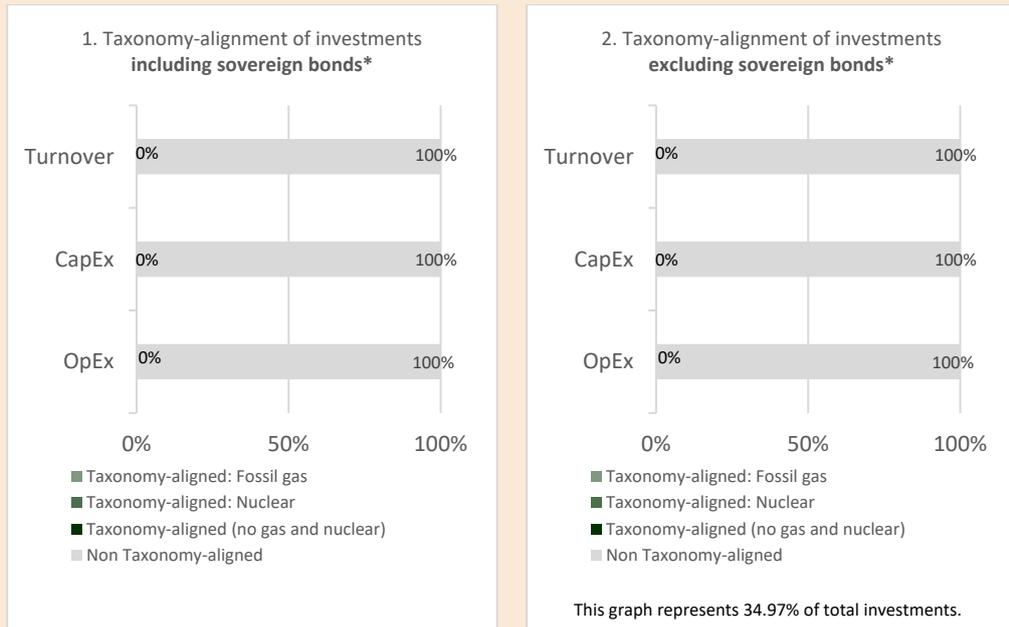

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%

Enabling activities: 0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This is the first period the fund is disclosing Taxonomy alignment, therefore there are no previous periods for comparison purposes.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund does not commit to making Sustainable Investments defined under SFDR and does not commit to making investments aligned to the EU taxonomy. As a result, this is not applicable.

### What was the share of socially sustainable investments?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

There will be investments in financial techniques and instruments and derivatives used for investment purposes, hedging or efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During 2024, we undertook a variety of stewardship related activity. This included engagement and voting activity across climate, earth and people themes. The level of engagement and voting conducted varied depending on the materiality of the issue and its applicability to select companies.

Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

### How did this financial product perform compared to the reference benchmark?

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

- **How does the reference benchmark differ from a broad market index?**

Not Applicable.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not Applicable.

- **How did this financial product perform compared with the reference benchmark?**

Not Applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the broad market index?***

Not Applicable.

ANNEX IV

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aviva Investors – Emerging Markets Corporate Bond Fund  
**Legal entity identifier:** 549300UFGNR1QI15DZ68

**Environmental and/or social characteristics**

**Did this financial product have a sustainable investment objective?**

<input checked="" type="radio"/> <input type="radio"/> <b>Yes</b>	<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul>
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The ESG analysis and considerations described below are incorporated into the investment process but may not always have a material impact on investments in the Sub-Fund. For detailed information on the impact of the ESG analysis on the Sub-Fund’s benchmark at a point in time, please see refer to the Fund impact assessment matrix available on the website [EU Sustainable Finance Disclosure Regulation \(SFDR\) - Aviva Investors](#).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The below criteria are binding elements on the investment process to ensure underlying investments are inclusive of securities promoting environmental or social characteristics.

The exclusions detailed below will be applied to this universe:

A. The Investment Manager’s Baseline Exclusions Policy which includes the following exclusions:

- Controversial weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact (“UNGC”); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons, where companies supply state nuclear weapons programmes where the state lacks credible commitments to effective arms controls, disarmament and non-proliferation as outlined in the Treaty on the Non-Proliferation of Nuclear Weapons (NPT) \*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970). We retain discretion within the scope of this screen to additionally exclude companies involved in nuclear weapons, where this supplies nuclear states within the NPT but Aviva Investors considers the state to have undermined widely accepted non-proliferation arms control treaties, conventions and norms. This will predominantly relate to the UN’s Nuclear Non-Proliferation Treaty but may extend to other existing conventions where relevant.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI’s controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviors since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager’s Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B. ESG Sovereign Assessment on the sustainability characteristics of sovereign issuers and minimum thresholds applied across sovereign issuers based on the Investment Manager’s proprietary ESG scores.

A minimum threshold ESG score for sovereigns at 2.5 is applied to the investment universe, with the aim of screening out those with the worst ESG characteristics.

The scores are derived from the Investment Manager’s proprietary ESG Sovereign Monitor. For issuers scoring between 2.5 and 4 an enhanced due diligence process will operate whereby such issuers will need to pass a

further qualitative assessment to be included in the sub-fund. The considerations for these lower scoring issuers, include but are not limited to, having a positive sustainable GDP gap, or where the ESG analyst considers the data is outdated, inaccurate or incomplete.

The Investment Manager believes providing debt financing to sovereigns supports the pivotal role they play in the transition to a more sustainable future. The Investment Manager also recognises associated sustainability risks. Effective state governance reduces those risks but, where appropriate, sovereigns are excluded from the Sub-Fund’s investment universe, subject to exceptions that mitigate unintended consequences and data limitations.

Assessments are made using: the Investment Manager’s proprietary sovereign ESG model (which assigns ratings on a scale of 0 to 10 where sufficient information is available) as a starting point, external data, and qualitative judgements from the Investment Manager’s in-house ESG specialists. The ESG Sovereign Monitor’s quantitative scoring approach assigns a composite ESG score to over 170 countries. These scores are derived from over 400 individual data points, which form 11 composite indicators.

Following a considered review of these ESG research insights, a decision may be taken to exclude a sovereign issuer from the Sub-Fund’s investment universe in order to mitigate the Investment Manager’s judgement of sustainability risks and falling below the Investment Manager’s minimum standard.

More information on the Investment Manager’s proprietary sovereign ESG model and the rating methodology can be found on the website: <http://www.avivainvestors.com/en-lu/about/responsible-investment/>

C.The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is met through a combination of the UNGC (as part of the Investment Manager’s Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. For sovereigns, good governance will be covered through the ESG assessment and minimum Sovereign monitor scores. Good governance indicators form a substantial component of the Investment Manager’s ESG scoring tools and ESG research.

● **How did the sustainability indicators perform?**

The fund will continue to be managed in line with the Aviva Investors Baseline Exclusion policy and any revisions made to it over time, there have been no active breaches of the policy on the fund since implementation.

<b>Adverse sustainability indicator</b>	<b>Metric</b>	<b>Annual Average</b>
GHG Emissions	Scope 1 GHG emissions	60,828.05
	Scope 2 GHG emissions	12,050.72
	Scope 3 GHG emissions	319,280.37
	Total GHG emissions	386,407.74
Carbon Footprint	Carbon footprint	643.96
GHG Intensity of investee companies	GHG intensity of investee companies	2,081.68
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	18.09%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	82.17%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.94
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	4.24%

Board Gender Diversity	Average ratio of female to male board members in investee companies	21.92%
GHG intensity	GHG intensity of investee countries	744.57
ESG Sovereign Monitor	Scores below 4	0.00%
	Score between 4 and 6	0.01%
	Scores above 6	1.29%

**AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template. Similarly, methodology changes from our third-party data providers may impact year-on-year data.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company’s value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

● **...and compared to previous periods?**

Adverse sustainability indicator	Metric	Annual Average 2023	Annual Average 2024

	Score between 4 and 6	0.00%	0.01%
	Scores above 6	2.81%	1.29%

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

### How did this financial product consider principal adverse impacts on sustainability factors?

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

### What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

1<sup>st</sup> January 2024 – 31<sup>st</sup> December 2024

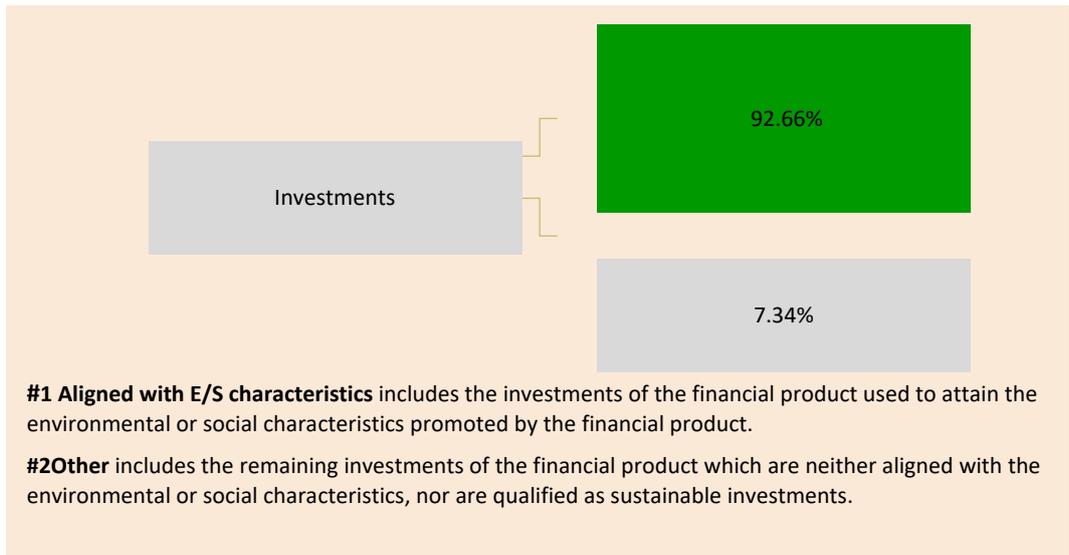

Largest Investment	Sector	% Assets	Country
BBVA BANCOMER SA (TEXAS BRANCH) RegS	Financials	1.98%	Mexico
BANGKOK BANK PCL/HK MTN RegS	Financials	1.52%	Thailand

TURKIYE GARANTI BANKASI AS RegS	Financials	1.09%	Turkey
BUFFALO ENERGY MX HLDGS RegS	Utilities	1.08%	Mexico

### What was the proportion of sustainability-related investments?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

● **What was the asset allocation?**

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The Fund did not commit to holding Sustainable Investments and therefore the Fund's exposure to Sustainable Investments has not been assessed, however, during the reference period, a percentage of the Fund's investments were aligned with the EU Taxonomy (see the section "To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?" below).

● **In which economic sectors were the investments made?**

Sector	Proportion (%)
Financials	27.44%
Energy	22.67%
Utilities	8.14%
Industrials	7.34%
Cash Securities	7.18%
Communication	6.21%
Consumer Discretionary	6.16%
Materials	5.98%
FI Securities	2.26%
Consumer Staples	1.99%
Information Technology	1.91%
Real Estate	1.80%
Health Care	0.75%
Other	0.17%

**Asset allocation** describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not make sustainable investments and the percentage of Taxonomy alignment of the Sub-Fund's portfolio is currently 0%.

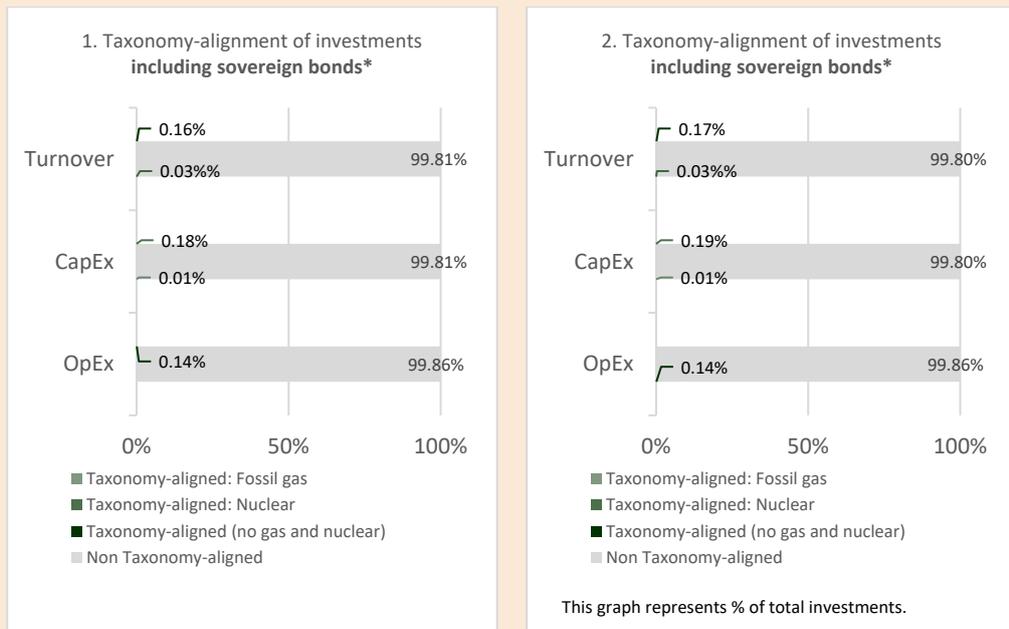

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas  In nuclear energy

No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Please see the below breakdown re Taxonomy alignment (incl.Sovereigns):

	Taxonomy-aligned: Fossil gas	Taxonomy-aligned: Nuclear	Taxonomy-aligned (no gas and nuclear)	Non Taxonomy-aligned
OpEx	0	0	0.14	99.86

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

CapEx	0	0.01	0.18	99.81
Turnover	0	0.03	0.16	99.81

Please see the below breakdown re Taxonomy alignment (excl.Sovereigns):

	Taxonomy-aligned: Fossil gas	Taxonomy-aligned: Nuclear	Taxonomy-aligned (no gas and nuclear)	Non Taxonomy-aligned
OpEx	0	0	0.14	99.86
CapEx	0	0.01	0.19	99.80
Turnover	0	0.03	0.17	99.80

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.03%

Enabling activities: 0.10%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This is the first period the fund is disclosing Taxonomy alignment, therefore there are no previous periods for comparison purposes

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments defined under SFDR and does not commit to making investments aligned to the EU taxonomy. As a result, this is not applicable.

**What was the share of socially sustainable investments?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

There will be investments in financial techniques and instruments and derivatives used for investment purposes, hedging or efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

During 2024, we undertook a variety of stewardship related activity. This included engagement and voting activity across climate, earth and people themes. The level of engagement and voting conducted varied

depending on the materiality of the issue and its applicability to select companies. Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

## How did this financial product perform compared to the reference benchmark?

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

- ***How does the reference benchmark differ from a broad market index?***

Not Applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable.

- ***How did this financial product perform compared with the broad market index?***

Not Applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aviva Investors - Emerging Markets Local Currency Bond Fund  
**Legal entity identifier:** 549300Q33WLRUTDX084

**Environmental and/or social characteristics**

**Did this financial product have a sustainable investment objective?**

**Yes**

It made **sustainable investments with an environmental objective:** \_\_\_%

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_%

**No**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The ESG analysis and considerations described below are incorporated into the investment process but may not always have a material impact on investments in the Sub-Fund. For detailed information on the impact of the ESG analysis on the Sub-Fund's benchmark at a point in time, please see refer to the Fund impact assessment matrix available on the website [EU Sustainable Finance Disclosure Regulation \(SFDR\) - Aviva Investors](#).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The below criteria are binding elements on the investment process to ensure underlying investments are inclusive of securities promoting environmental or social characteristics.

The exclusions detailed below will be applied to this universe:

A. The Investment Manager’s Baseline Exclusions Policy which includes the following exclusions:

- Controversial weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact (“UNGC”); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons, where companies supply state nuclear weapons programmes where the state lacks credible commitments to effective arms controls, disarmament and non-proliferation as outlined in the Treaty on the Non-Proliferation of Nuclear Weapons (NPT) \*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970). We retain discretion within the scope of this screen to additionally exclude companies involved in nuclear weapons, where this supplies nuclear states within the NPT but Aviva Investors considers the state to have undermined widely accepted non-proliferation arms control treaties, conventions and norms. This will predominantly relate to the UN’s Nuclear Non-Proliferation Treaty but may extend to other existing conventions where relevant.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI’s controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviors since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager’s Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B. ESG Sovereign Assessment on the sustainability characteristics of sovereign issuers and minimum thresholds applied across sovereign issuers based on the Investment Manager’s proprietary ESG scores.

A minimum threshold ESG score for sovereigns at 2.5 is applied to the investment universe, with the aim of screening out those with the worst ESG characteristics.

The scores are derived from the Investment Manager’s proprietary ESG Sovereign Monitor. For issuers scoring between 2.5 and 4 an enhanced due diligence process will operate whereby such issuers will need to pass a

further qualitative assessment to be included in the sub-fund. The considerations for these lower scoring issuers, include but are not limited to, having a positive sustainable GDP gap, or where the ESG analyst considers the data is outdated, inaccurate or incomplete.

The Investment Manager believes providing debt financing to sovereigns supports the pivotal role they play in the transition to a more sustainable future. The Investment Manager also recognises associated sustainability risks. Effective state governance reduces those risks but, where appropriate, sovereigns are excluded from the Sub-Fund’s investment universe, subject to exceptions that mitigate unintended consequences and data limitations.

Assessments are made using: the Investment Manager’s proprietary sovereign ESG model (which assigns ratings on a scale of 0 to 10 where sufficient information is available) as a starting point, external data, and qualitative judgements from the Investment Manager’s in-house ESG specialists. The ESG Sovereign Monitor’s quantitative scoring approach assigns a composite ESG score to over 170 countries. These scores are derived from over 400 individual data points, which form 11 composite indicators.

Following a considered review of these ESG research insights, a decision may be taken to exclude a sovereign issuer from the Sub-Fund’s investment universe in order to mitigate the Investment Manager’s judgement of sustainability risks and falling below the Investment Manager’s minimum standard.

More information on the Investment Manager’s proprietary sovereign ESG model and the rating methodology can be found on the website: <http://www.avivainvestors.com/en-lu/about/responsible-investment/>

C.The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is met through a combination of the UNGC (as part of the Investment Manager’s Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. For sovereigns, good governance will be covered through the ESG assessment and minimum Sovereign monitor scores. Good governance indicators form a substantial component of the Investment Manager’s ESG scoring tools and ESG research.

● **How did the sustainability indicators perform?**

The fund will continue to be managed in line with the Aviva Investors Baseline Exclusion policy and any revisions made to it over time, there have been no active breaches of the policy on the fund since implementation.

<b>Adverse sustainability indicator</b>	<b>Metric</b>	<b>Annual Average</b>
GHG Emissions	Scope 1 GHG emissions	0.21
	Scope 2 GHG emissions	1.11
	Scope 3 GHG emissions	234.15
	Total GHG emissions	205.67
Carbon Footprint	Carbon footprint	0.17
GHG Intensity of investee companies	GHG intensity of investee companies	280.11
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	0.00%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	72.64%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.32
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%

Board Gender Diversity	Average ratio of female to male board members in investee companies	29.32%
GHG intensity	GHG intensity of investee countries	826.80
ESG Sovereign Monitor	Scores below 4	5.83%
	Score between 4 and 6	61.25%
	Scores above 6	22.38%

Countries	ESG Sovereign Monitor Good Governance Review (Scores below 4)
EGYPT (ARAB REPUBLIC OF)	AI ESG score below 4, sustainable GDP gap negative. Good governance assessment as Amber - governance weaker than peers but showing mitigating actions. Although Egypt performs weaker than its peers (particularly on institutional aspects such as judicial effectiveness, as well as corruption and human rights) these issues do not present an immediate sustainability or investment risk. Positive steps have been taken, including in anti-corruption and human rights strategy).
INDIA (REPUBLIC OF)	AI ESG score below 4, sustainable GDP gap is positive. The latter represents an override to Article 8 exclusion criteria we implement. The sustainable GDP gap is a theoretical measure we adopted from Beyond Ratings which shows whether a country's ESG scores are in line, higher or lower than estimated by the level of its economic development. If higher, i.e. sustainable GDP gap is positive, the country's ESG performance is better than the level expected based on its level of economic development.

**AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template. Similarly, methodology changes from our third-party data providers may impact year-on-year data.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company's value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

● **...and compared to previous periods?**

Adverse sustainability indicator	Metric	Annual Average 2023	Annual Average 2024
GHG Emissions	Scope 1 GHG emissions	0.44	0.21
	Scope 2 GHG emissions	2.30	1.11
	Scope 3 GHG emissions	524.80	234.15
	Total GHG emissions	512.11	205.67
Carbon Footprint	Carbon footprint	0.30	0.17
GHG Intensity of investee companies	GHG intensity of investee companies	371.04	280.11
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	0.00%	0.00%

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	51.06%	72.64%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.02	0.32
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%	0.00%
Board Gender Diversity	Average ratio of female to male board members in investee companies	17.65%	29.32%
GHG intensity	GHG intensity of investee countries	883.20	826.80
ESG Sovereign Monitor	Scores below 4	1.29%	5.83%
	Score between 4 and 6	62.73%	61.25%
	Scores above 6	27.08%	22.38%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

### How did this financial product consider principal adverse impacts on sustainability factors?

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

### What were the top investments of this financial product?

Largest Investment	Sector	% Assets	Country
INDIA (REPUBLIC OF)	Industrials	3.96%	India
SOUTH AFRICA (REPUBLIC OF)	Financials	2.77%	South Africa
INDONESIA (REPUBLIC OF)	FI Securities	2.65%	Indonesia
CHINA GOVERNMENT BOND	Real Estate	2.59%	China
PERU GOVERNMENT BOND 144A	FI Securities	2.35%	Peru
ROMANIA (REPUBLIC OF)	Financials	2.33%	Romania
REPUBLIC OF SOUTH AFRICA	Financials	2.11%	South Africa
THAILAND KINGDOM OF (GOVERNMENT)	FI Securities	2.05%	Thailand
BRAZIL FEDERATIVE REPUBLIC OF (GOV	FI Securities	1.91%	Brazil
MEXICO (UNITED MEXICAN STATES) (GO	FI Securities	1.90%	Mexico
CZECH REPUBLIC	FI Securities	1.90%	Czech Republic
BRAZIL (FEDERATIVE REPUBLIC OF)	FI Securities	1.81%	Brazil
THAILAND KINGDOM OF (GOVERNMENT)	FI Securities	1.68%	Thailand
INDONESIA (REPUBLIC OF)	FI Securities	1.68%	Indonesia
TURKEY (REPUBLIC OF)	FI Securities	1.65%	Turkey

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

1<sup>st</sup> January 2024 – 31<sup>st</sup> December 2024

## What was the proportion of sustainability-related investments?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

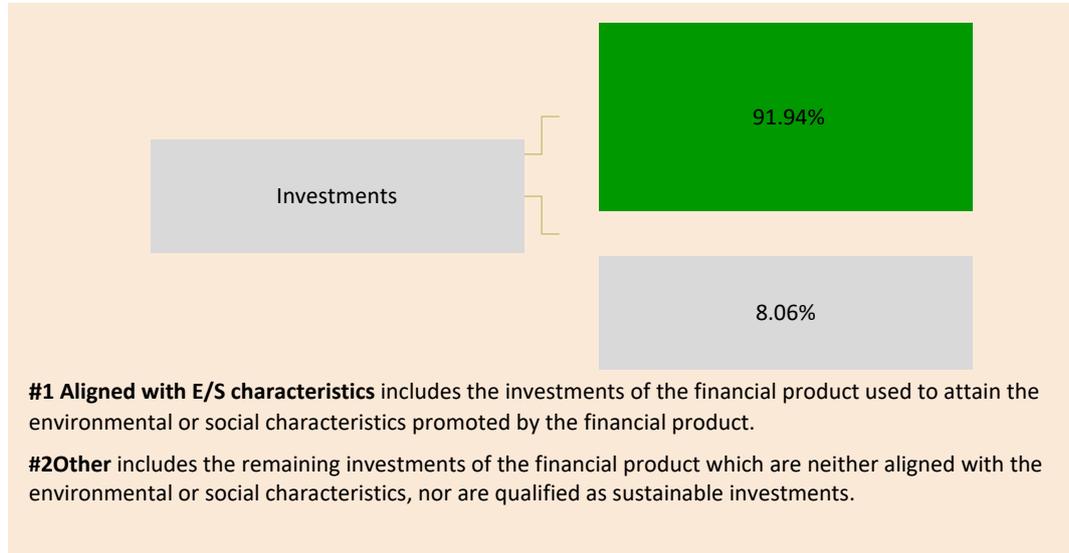

**Asset allocation** describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### ● What was the asset allocation?

The Fund did not commit to holding Sustainable Investments and therefore the Fund's exposure to Sustainable Investments has not been assessed, however, during the reference period, a percentage of the Fund's investments were aligned with the EU Taxonomy (see the section "To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?" below).

### ● In which economic sectors were the investments made?

Sector	Proportion (%)
FI Securities	57.95%
Real Estate	13.93%
Financials	12.73%
Industrials	6.61%
Cash Securities	5.77%
Non-Spendable Cash	1.17%
Communication	1.01%
FX	0.73%
Other	0.11%

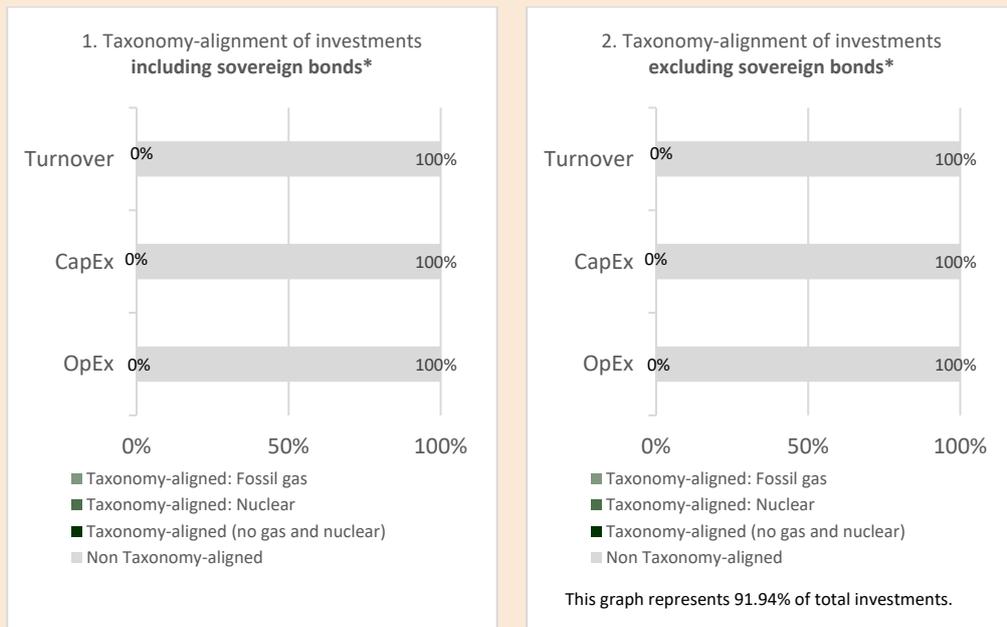

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not make sustainable investments and the percentage of Taxonomy alignment of the Sub-Fund's portfolio is currently 0%.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### ● What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This is the first period the fund is disclosing Taxonomy alignment, therefore there are no previous periods for comparison purposes.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments defined under SFDR and does not commit to making investments aligned to the EU taxonomy. As a result, this is not applicable.

**What was the share of socially sustainable investments?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

There will be investments in financial techniques and instruments and derivatives used for investment purposes, hedging or efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

During 2024, we undertook a variety of stewardship related activity. This included engagement and voting activity across climate, earth and people themes. The level of engagement and voting conducted varied depending on the materiality of the issue and its applicability to select companies.

Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

**How did this financial product perform compared to the reference benchmark?**

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

● **How does the reference benchmark differ from a broad market index?**

Not Applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable.

- ***How did this financial product perform compared with the broad market index?***

Not Applicable.

ANNEX IV

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aviva Investors – Global Convertibles Absolute Return Fund  
**Legal entity identifier:** WF12PPY6L5PG3ALG1243

**Environmental and/or social characteristics**

**Did this financial product have a sustainable investment objective?**

<input checked="" type="radio"/> <input type="radio"/> <b>Yes</b>	<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The ESG analysis and considerations described below are incorporated into the investment process but may not always have a material impact on investments in the Sub-Fund. For detailed information on the impact of the ESG analysis on the Sub-Fund’s benchmark at a point in time, please see refer to the Fund impact assessment matrix available on the website [EU Sustainable Finance Disclosure Regulation \(SFDR\) - Aviva Investors](#).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The below criteria are binding elements on the investment process to ensure underlying investments are inclusive of securities promoting environmental or social characteristics.

The exclusions detailed below will be applied to this universe:

A. The Investment Manager’s Baseline Exclusions Policy which includes the following exclusions:

- Controversial weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact (“UNGC”); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons, where companies supply state nuclear weapons programmes where the state lacks credible commitments to effective arms controls, disarmament and non-proliferation as outlined in the Treaty on the Non-Proliferation of Nuclear Weapons (NPT) \*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970). We retain discretion within the scope of this screen to additionally exclude companies involved in nuclear weapons, where this supplies nuclear states within the NPT but Aviva Investors considers the state to have undermined widely accepted non-proliferation arms control treaties, conventions and norms. This will predominantly relate to the UN’s Nuclear Non-Proliferation Treaty but may extend to other existing conventions where relevant.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI’s controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviors since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager’s Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B. ESG Sovereign Assessment on the sustainability characteristics of sovereign issuers and minimum thresholds applied across sovereign issuers based on the Investment Manager’s proprietary ESG scores.

A minimum threshold ESG score for sovereigns at 2.5 is applied to the investment universe, with the aim of screening out those with the worst ESG characteristics.

The scores are derived from the Investment Manager’s proprietary ESG Sovereign Monitor. For issuers scoring between 2.5 and 4 an enhanced due diligence process will operate whereby such issuers will need to pass a

further qualitative assessment to be included in the sub-fund. The considerations for these lower scoring issuers, include but are not limited to, having a positive sustainable GDP gap, or where the ESG analyst considers the data is outdated, inaccurate or incomplete.

The Investment Manager believes providing debt financing to sovereigns supports the pivotal role they play in the transition to a more sustainable future. The Investment Manager also recognises associated sustainability risks. Effective state governance reduces those risks but, where appropriate, sovereigns are excluded from the Sub-Fund’s investment universe, subject to exceptions that mitigate unintended consequences and data limitations.

Assessments are made using: the Investment Manager’s proprietary sovereign ESG model (which assigns ratings on a scale of 0 to 10 where sufficient information is available) as a starting point, external data, and qualitative judgements from the Investment Manager’s in-house ESG specialists. The ESG Sovereign Monitor’s quantitative scoring approach assigns a composite ESG score to over 170 countries. These scores are derived from over 400 individual data points, which form 11 composite indicators.

Following a considered review of these ESG research insights, a decision may be taken to exclude a sovereign issuer from the Sub-Fund’s investment universe in order to mitigate the Investment Manager’s judgement of sustainability risks and falling below the Investment Manager’s minimum standard.

More information on the Investment Manager’s proprietary sovereign ESG model and the rating methodology can be found on the website: <http://www.avivainvestors.com/en-lu/about/responsible-investment/>

C.The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is met through a combination of the UNGC (as part of the Investment Manager’s Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. For sovereigns, good governance will be covered through the ESG assessment and minimum Sovereign monitor scores. Good governance indicators form a substantial component of the Investment Manager’s ESG scoring tools and ESG research.

● **How did the sustainability indicators perform?**

The fund will continue to be managed in line with the Aviva Investors Baseline Exclusion policy and any revisions made to it over time, there have been no active breaches of the policy on the fund since implementation.

<b>Adverse sustainability indicator</b>	<b>Metric</b>	<b>Annual Average</b>
GHG Emissions	Scope 1 GHG emissions	1,302.59
	Scope 2 GHG emissions	3,054.09
	Scope 3 GHG emissions	68,059.68
	Total GHG emissions	71,094.49
Carbon Footprint	Carbon footprint	106.50
GHG Intensity of investee companies	GHG intensity of investee companies	472.85
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	0.00%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	78.39%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.13
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.53%

Board Gender Diversity	Average ratio of female to male board members in investee companies	27.25%
GHG intensity	GHG intensity of investee countries	472.82
ESG Sovereign Monitor	Scores below 4	0.00%
	Score between 4 and 6	0.00%
	Scores above 6	17.55%

**AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template. Similarly, methodology changes from our third-party data providers may impact year-on-year data.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company’s value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

● **...and compared to previous periods?**

Adverse sustainability indicator	Metric	Annual Average 2023	Annual Average 2024
GHG Emissions	Scope 1 GHG emissions	13,227.63	1,302.59
	Scope 2 GHG emissions	6,827.63	3,054.09
	Scope 3 GHG emissions	155,481.59	68,059.68
	Total GHG emissions	175,101.80	71,094.49
Carbon Footprint	Carbon footprint	172.75	106.50
GHG Intensity of investee companies	GHG intensity of investee companies	457.89	472.85
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	1.08%	0.00%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	75.95%	78.39%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.16	0.13
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.23%	0.53%
Board Gender Diversity	Average ratio of female to male board members in investee companies	27.88%	27.25%

GHG intensity	GHG intensity of investee countries	302.59	472.82
ESG Sovereign Monitor	Scores below 4	0.00%	0.00%
	Score between 4 and 6	0.00%	0.00%
	Scores above 6	15.08%	17.55%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

— — **How were the indicators for adverse impacts on sustainability factors taken into account?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

applicable to the fund for the reference period of January – December 2024.

— — **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

### How did this financial product consider principal adverse impacts on sustainability factors?

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

### What were the top investments of this financial product?

Largest Investment	Sector	% Assets	Country
TREASURY BILL	Cash Securities	4.13%	United States
TREASURY BILL	Cash Securities	4.13%	United States
TREASURY BILL	Cash Securities	3.43%	United States
WIX.COM LTD	Information Technology	2.97%	Israel
MEITUAN RegS	Consumer Discretionary	2.95%	Cayman Islands
SPOTIFY USA INC	Communication	2.84%	United States
DRAFTKINGS INC	Consumer Discretionary	2.76%	United States
RIVIAN AUTOMOTIVE INC	Consumer Discretionary	2.66%	United States
TRIP.COM GROUP LTD RegS	Consumer Discretionary	2.63%	Cayman Islands
UNITY SOFTWARE INC	Information Technology	2.47%	United States
NUVASIVE INC.	Health Care	2.41%	United States
ON SEMICONDUCTOR CORPORATION	Information Technology	2.26%	United States
ASCENDIS PHARMA A/S	Health Care	2.24%	Denmark
OKTA INC	Information Technology	2.24%	United States
BLOCK INC	Financials	2.10%	United States

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

1<sup>st</sup> January 2024 – 31<sup>st</sup> December 2024

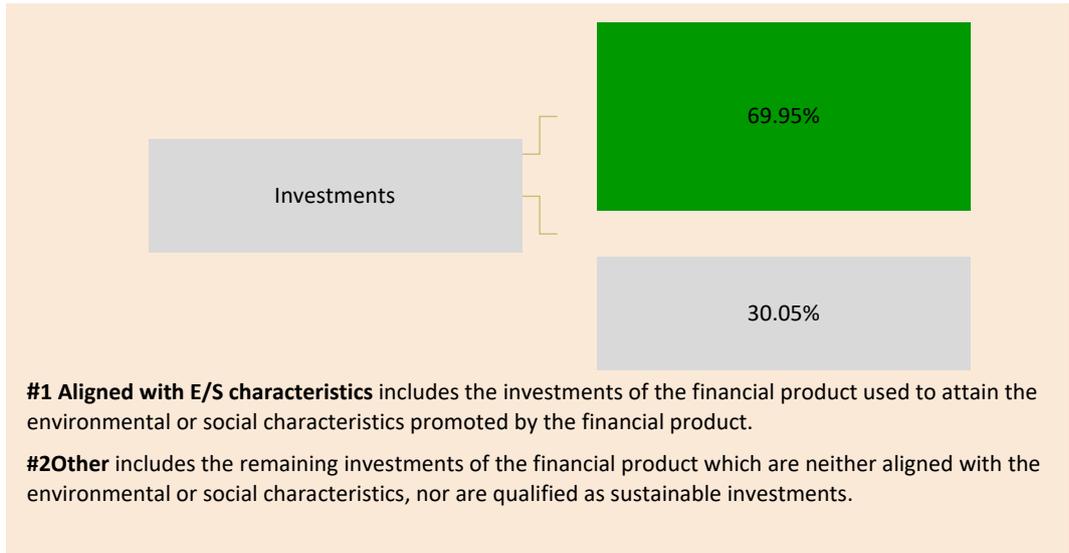

### What was the proportion of sustainability-related investments?

The Fund does not commit to making Sustainable Investments defined under SFDR and does not commit to making investments aligned to the EU taxonomy. As a result, this is not applicable.

● **What was the asset allocation?**

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

The Fund did not commit to holding Sustainable Investments and therefore the Fund's exposure to Sustainable Investments has not been assessed, however, during the reference period, a percentage of the Fund's investments were aligned with the EU Taxonomy (see the section "To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?" below).

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **In which economic sectors were the investments made?**

Sector	Proportion (%)
Cash Securities	30.72%
Information Technology	17.91%
Consumer Discretionary	16.94%
Health Care	14.19%
Communication	9.22%
Financials	5.28%
Industrials	4.23%
Materials	1.75%
Real Estate	0.43%
FX	0.03%
Non-Spendable Cash	-0.69%

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments defined under SFDR and does not commit to making investments aligned to the EU taxonomy. As a result, this is not applicable.

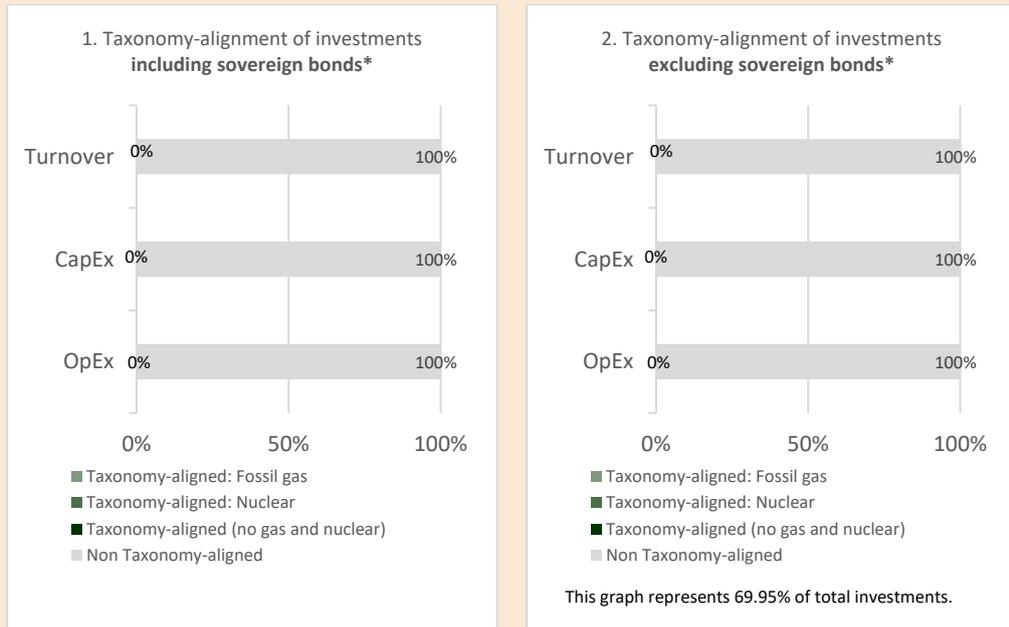

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

Transitional activities: 0.00%

Enabling activities: 0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

This is the first reference period the fund has disclosed alignment with the EU Taxonomy, as such there is no comparison to be made to previous periods.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments defined under SFDR and does not commit to making investments aligned to the EU taxonomy. As a result, this is not applicable.

### **What was the share of socially sustainable investments?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

There will be investments in financial techniques and instruments and derivatives used for investment purposes, hedging or efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

During 2024, we undertook a variety of stewardship related activity. This included engagement and voting activity across climate, earth and people themes. The level of engagement and voting conducted varied depending on the materiality of the issue and its applicability to select companies.

Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

### **How did this financial product perform compared to the reference benchmark?**

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

- ***How does the reference benchmark differ from a broad market index?***

Not Applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable.

- ***How did this financial product perform compared with the broad market index?***

Not Applicable.

ANNEX IV

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aviva Investors – Global Convertibles Fund  
**Legal entity identifier:** 549300NYEIC5SS63DO03

Aviva Investors – Global Convertibles Fund was closed on 21 May 2024.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <b>Yes</b>	<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ____% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ____%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The ESG analysis and considerations described below are incorporated into the investment process but may not always have a material impact on investments in the Sub-Fund. For detailed information on the impact of the ESG analysis on the Sub-Fund's benchmark at a point in time, please see refer to the Fund impact

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

assessment matrix available on the website [EU Sustainable Finance Disclosure Regulation \(SFDR\) - Aviva Investors](#).

The below criteria are binding elements on the investment process to ensure underlying investments are inclusive of securities promoting environmental or social characteristics.

The exclusions detailed below will be applied to this universe:

A. The Investment Manager's Baseline Exclusions Policy which includes the following exclusions:

- Controversial weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact ("UNGC"); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons, where companies supply state nuclear weapons programmes where the state lacks credible commitments to effective arms controls, disarmament and non-proliferation as outlined in the Treaty on the Non-Proliferation of Nuclear Weapons (NPT) \*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970). We retain discretion within the scope of this screen to additionally exclude companies involved in nuclear weapons, where this supplies nuclear states within the NPT but Aviva Investors considers the state to have undermined widely accepted non-proliferation arms control treaties, conventions and norms. This will predominantly relate to the UN's Nuclear Non-Proliferation Treaty but may extend to other existing conventions where relevant.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI's controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviors since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager's Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B. ESG Sovereign Assessment on the sustainability characteristics of sovereign issuers and minimum thresholds applied across sovereign issuers based on the Investment Manager's proprietary ESG scores.

A minimum threshold ESG score for sovereigns at 2.5 is applied to the investment universe, with the aim of screening out those with the worst ESG characteristics.

The scores are derived from the Investment Manager’s proprietary ESG Sovereign Monitor. For issuers scoring between 2.5 and 4 an enhanced due diligence process will operate whereby such issuers will need to pass a further qualitative assessment to be included in the sub-fund. The considerations for these lower scoring issuers, include but are not limited to, having a positive sustainable GDP gap, or where the ESG analyst considers the data is outdated, inaccurate or incomplete.

The Investment Manager believes providing debt financing to sovereigns supports the pivotal role they play in the transition to a more sustainable future. The Investment Manager also recognises associated sustainability risks. Effective state governance reduces those risks but, where appropriate, sovereigns are excluded from the Sub-Fund’s investment universe, subject to exceptions that mitigate unintended consequences and data limitations.

Assessments are made using: the Investment Manager’s proprietary sovereign ESG model (which assigns ratings on a scale of 0 to 10 where sufficient information is available) as a starting point, external data, and qualitative judgements from the Investment Manager’s in-house ESG specialists. The ESG Sovereign Monitor’s quantitative scoring approach assigns a composite ESG score to over 170 countries. These scores are derived from over 400 individual data points, which form 11 composite indicators.

Following a considered review of these ESG research insights, a decision may be taken to exclude a sovereign issuer from the Sub-Fund’s investment universe in order to mitigate the Investment Manager’s judgement of sustainability risks and falling below the Investment Manager’s minimum standard.

More information on the Investment Manager’s proprietary sovereign ESG model and the rating methodology can be found on the website: <http://www.avivainvestors.com/en-lu/about/responsible-investment/>

C.The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is met through a combination of the UNGC (as part of the Investment Manager’s Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. For sovereigns, good governance will be covered through the ESG assessment and minimum Sovereign monitor scores. Good governance indicators form a substantial component of the Investment Manager’s ESG scoring tools and ESG research.

● **How did the sustainability indicators perform?**

The fund will continue to be managed in line with the Aviva Investors Baseline Exclusion policy and any revisions made to it over time, there have been no active breaches of the policy on the fund since implementation.

<b>Adverse sustainability indicator</b>	<b>Metric</b>	<b>Annual Average</b>
GHG Emissions	Scope 1 GHG emissions	758.26
	Scope 2 GHG emissions	198.00
	Scope 3 GHG emissions	6,230.47
	Total GHG emissions	7,182.55
Carbon Footprint	Carbon footprint	223.75
GHG Intensity of investee companies	GHG intensity of investee companies	532.79
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	0.00%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	65.05%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.45
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	2.71%

Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance /complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	4.41%
Board Gender Diversity	Average ratio of female to male board members in investee companies	33.19%
ESG Sovereign Monitor	Scores below 4	0.00%
	Score between 4 and 6	0.00%
	Scores above 6	0.00%

**AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template. Similarly, methodology changes from our third-party data providers may impact year-on-year data.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company’s value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

● **...and compared to previous periods?**

Adverse sustainability indicator	Metric	Annual Average 2023	Annual Average 2024

	Scope 2 GHG emissions	3,084.85	198.00
	Scope 3 GHG emissions	43,757.25	6,230.47
	Total GHG emissions	62,634.16	7,182.55
Carbon Footprint	Carbon footprint	333.99	223.75
GHG Intensity of investee companies	GHG intensity of investee companies	669.00	532.79
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	4.91%	0.00%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	74.27%	65.05%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	1.29	0.45
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas	0.00%	2.71%

	where activities of those investee companies negatively affect those areas		
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance /complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	69.03%	4.41%
Board Gender Diversity	Average ratio of female to male board members in investee companies	30.45%	33.19%
ESG Sovereign Monitor	Scores below 4	0.00%	0.00%
	Score between 4 and 6	0.00%	0.00%
	Scores above 6	0.00%	0.00%

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

### How did this financial product consider principal adverse impacts on sustainability factors?

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

### What were the top investments of this financial product?

Largest Investment	Sector	% Assets	Country
FORD MOTOR COMPANY	Consumer Discretionary	4.20%	United States
BENTLEY SYSTEMS INCORPORATED	Information Technology	3.78%	United States
ADVANCED ENERGY IND 144A	Information Technology	3.71%	United States
JAZZ INVESTMENTS I LTD	Health Care	3.50%	Bermuda
LG CHEM LTD RegS	Materials	3.42%	Korea (South), Republic of
DROPBOX INC	Information Technology	3.38%	United States
CERIDIAN HCM HOLDING INC	Industrials	3.27%	United States
STMICROELECTRONICS NV RegS	Information Technology	3.12%	Netherlands
WELLTOWER OP LLC 144A	Real Estate	2.92%	United States
HALOZYME THERAPEUTICS INC	Health Care	2.73%	United States
ENVESTNET INC	Information Technology	2.56%	United States
OKTA INC	Information Technology	2.55%	United States
UBER TECHNOLOGIES INC	Industrials	2.54%	United States
WAYFAIR INC	Consumer Discretionary	2.41%	United States
NICE LTD	Information Technology	2.38%	Israel

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

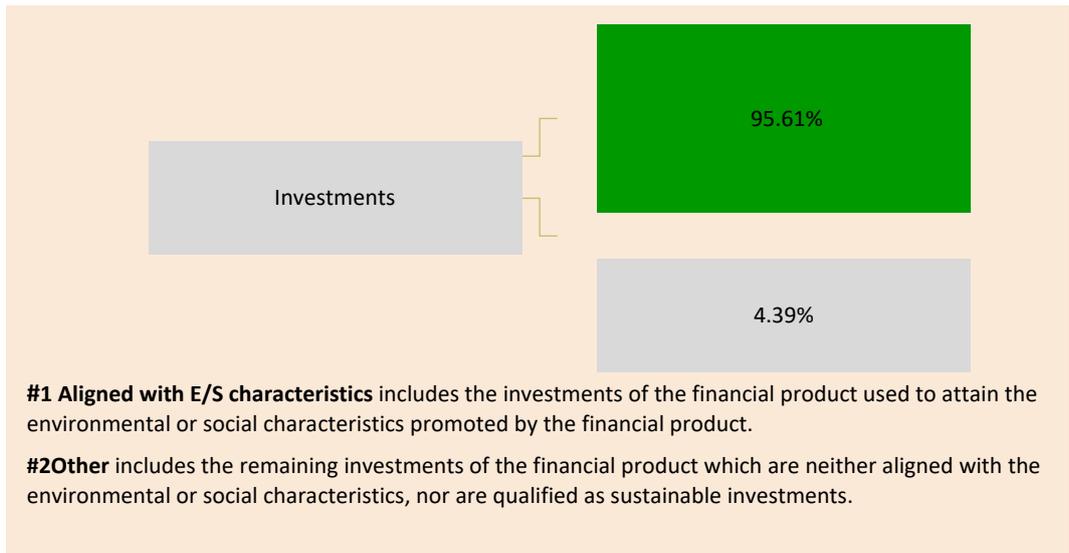

1<sup>st</sup> January 2024 – 31<sup>st</sup> December 2024

### What was the proportion of sustainability-related investments?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

● **What was the asset allocation?**

**Asset allocation** describes the share of investments in specific assets.

The Fund did not commit to holding Sustainable Investments and therefore the Fund's exposure to Sustainable Investments has not been assessed, however, during the reference period, a percentage of the Fund's investments were aligned with the EU Taxonomy (see the section "To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?" below).

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **In which economic sectors were the investments made?**

Sector	Proportion (%)
Information Technology	30.19%
Health Care	20.11%
Consumer Discretionary	14.24%
Industrials	12.77%
Cash Securities	4.38%
Financials	3.84%
Communication	3.77%
Real Estate	3.50%
Materials	3.42%
Consumer Staples	1.86%
Utilities	1.29%
Energy	0.63%
FX	0.01%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

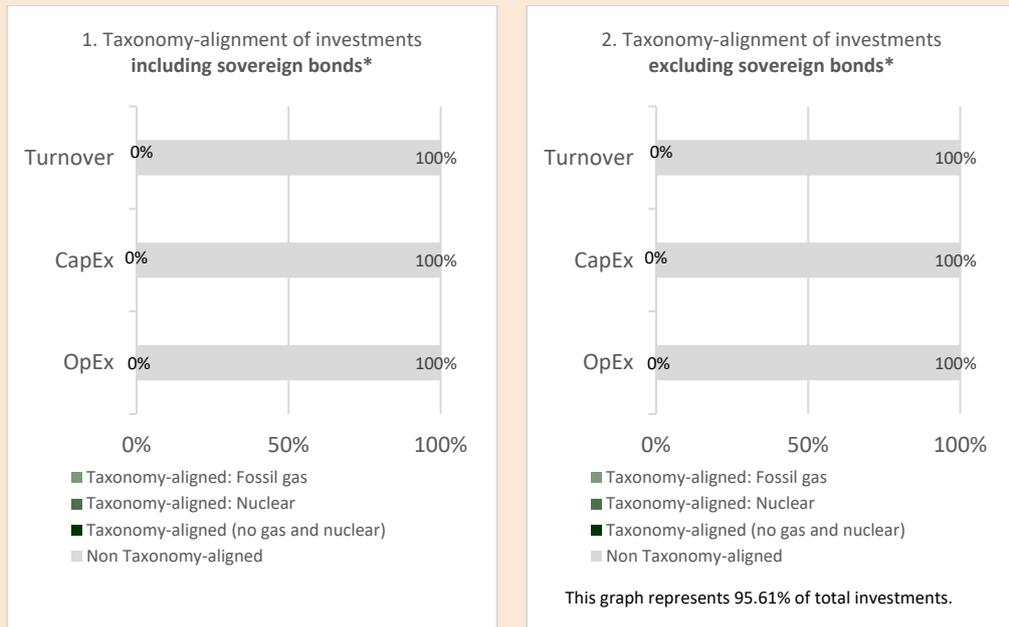

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%

Enabling activities: 0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This is the first reference period the fund has disclosed alignment with the EU Taxonomy, as such there is no comparison to be made to previous periods.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund does not commit to making Sustainable Investments defined under SFDR and does not commit to making investments aligned to the EU taxonomy. As a result, this is not applicable.

### What was the share of socially sustainable investments?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

There will be investments in financial techniques and instruments and derivatives used for investment purposes, hedging or efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During 2024, we undertook a variety of stewardship related activity. This included engagement and voting activity across climate, earth and people themes. The level of engagement and voting conducted varied depending on the materiality of the issue and its applicability to select companies.

Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

### How did this financial product perform compared to the reference benchmark?

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

- **How does the reference benchmark differ from a broad market index?**

Not Applicable.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not Applicable.

- **How did this financial product perform compared with the reference benchmark?**

Not Applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● ***How did this financial product perform compared with the broad market index?***

Not Applicable.

ANNEX IV

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aviva Investors–Global Emerging Markets Core **Legal entity identifier:**54930022EX53KYAXKW51

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<span style="color: green;">●●</span> <input type="checkbox"/> <b>Yes</b>	<span style="color: grey;">●</span> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The below criteria are binding on the investment process to ensure underlying investments are inclusive of those securities promoting environmental or social characteristics:

The exclusions detailed below will be applied to this universe.

- A. The Investment Manager’s Baseline Exclusions Policy which includes the following exclusions:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- Controversial weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact (“UNGC”); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons, where companies supply state nuclear weapons programmes where the state lacks credible commitments to effective arms controls, disarmament and non-proliferation as outlined in the Treaty on the Non-Proliferation of Nuclear Weapons (NPT)\*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970). We retain discretion within the scope of this screen to additionally exclude companies involved in nuclear weapons, where this supplies states within the NPT but Aviva Investors considers the state to have undermined widely accepted non-proliferation arms control treaties, conventions and norms. This will predominantly relate to the UN’s Nuclear Non-Proliferation Treaty but may extend to other existing conventions where relevant.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI’s controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviours since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager’s Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B.The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is met through a combination of the UNGC (as part of the Investment Manager’s Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. Good governance indicators form a substantial component of the Investment Manager’s ESG scoring tools and ESG research.

### ● **How did the sustainability indicators perform?**

The fund will continue to be managed in line with the Aviva Investors Baseline Exclusion policy and any revisions made to it over time, there have been no active breaches of the policy on the fund since implementation.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Adverse sustainability indicator	Metric	Annual Average
GHG Emissions	Scope 1 GHG emissions	77,767.79
	Scope 2 GHG emissions	43,024.62
	Scope 3 GHG emissions	541,183.22
	Total GHG emissions	658,351.17
Carbon Footprint	Carbon footprint	491.75
GHG Intensity of investee companies	GHG intensity of investee companies	977.95
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	8.14%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	83.38%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.59
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	4.41%
Board Gender Diversity	Average ratio of female to male board members in investee companies	20.18

**AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template. Similarly, methodology changes from our third-party data providers may impact year-on-year data.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company’s value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

● **...and compared to previous periods?**

Adverse sustainability indicator	Metric	Annual Average 2023	Annual Average 2024
GHG Emissions	Scope 1 GHG emissions	114,939.99	77,767.79
	Scope 2 GHG emissions	49,764.07	43,024.62
	Scope 3 GHG emissions	609,594.86	541,183.22
	Total GHG emissions	768,622.00	658,351.17
Carbon Footprint	Carbon footprint	604.71	491.75
GHG Intensity of investee companies	GHG intensity of investee companies	1,002.52	977.95

Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	11.05%	8.14%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	84.57%	83.38%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	1.10	0.59
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%	4.41%
Board Gender Diversity	Average ratio of female to male board members in investee companies	18.46	20.18

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

— **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

### How did this financial product consider principal adverse impacts on sustainability factors?

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

### What were the top investments of this financial product?

Largest Investment	Sector	% Asset	Country
TAIWAN SEMICONDUCTOR MANUFACTURING	Information Technology	9.82%	Taiwan (Republic of China)
SAMSUNG ELECTRONICS LTD	Information Technology	5.05%	Korea (South), Republic of
TENCENT HOLDINGS LTD	Communication	4.46%	China
ISHARES MSCI SAUDI ARABIA CAPPED U	Financials	3.88%	Ireland
RELIANCE INDUSTRIES LTD	Energy	3.20%	India
ALIBABA GROUP HOLDING ADR REPRESENTATIVE	Consumer Discretionary	2.36%	China
INFOSYS LTD	Information Technology	2.04%	India
ICICI BANK LTD	Financials	1.90%	India
CHINA CONSTRUCTION BANK CORP H	Financials	1.85%	China
HDFC BANK LTD	Financials	1.82%	India
HON HAI PRECISION INDUSTRY LTD	Information Technology	1.64%	Taiwan (Republic of China)
SK HYNIX INC	Information Technology	1.52%	Korea (South), Republic of
HYUNDAI MOTOR	Consumer Discretionary	1.44%	Korea (South), Republic of
ASHOK LEYLAND LTD	Industrials	1.40%	India
MEITUAN	Consumer Discretionary	1.36%	China

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1<sup>st</sup> January 2024 – 31<sup>st</sup> December 2024

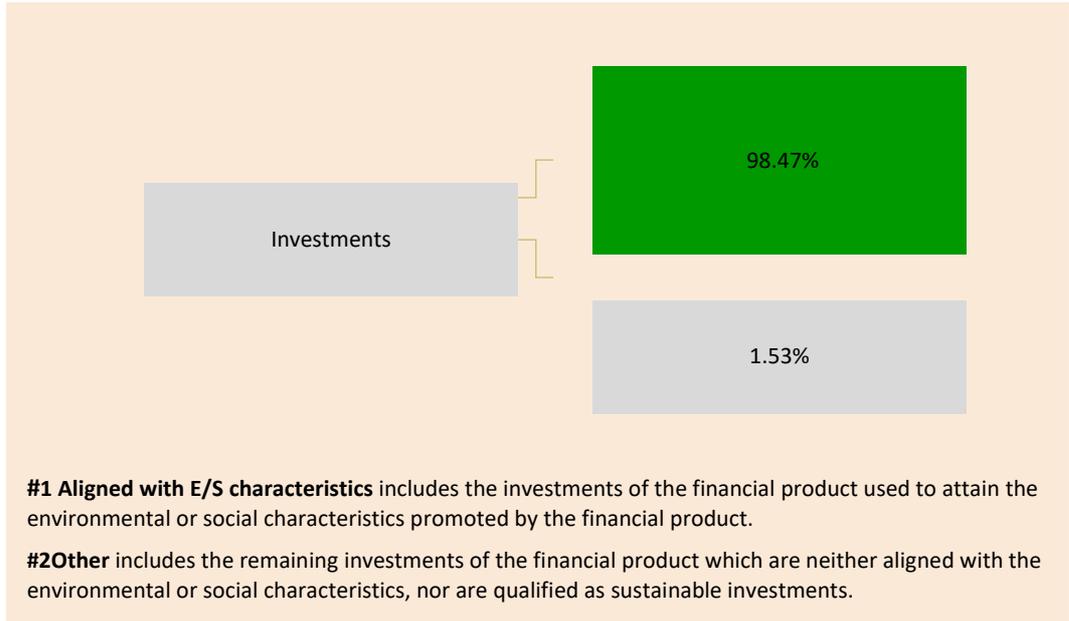

### What was the proportion of sustainability-related investments?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

● **What was the asset allocation?**

**Asset allocation**

describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

The Fund did not commit to holding Sustainable Investments and therefore the Fund's exposure to Sustainable Investments has not been assessed, however, during the reference period, a percentage of the Fund's investments were aligned with the EU Taxonomy (see the section "To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?" below).

**Enabling activities**

directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are**

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **In which economic sectors were the investments made?**

Sector	% Proportion
Financials	24.97%
Information Technology	24.94%
Consumer Discretionary	14.22%
Communication	8.33%
Energy	5.87%
Materials	5.45%
Industrials	4.96%
Consumer Staples	3.45%
Real Estate	2.23%
Utilities	2.07%
Cash Securities	1.41%
Health Care	1.17%
ETFs	0.92%

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

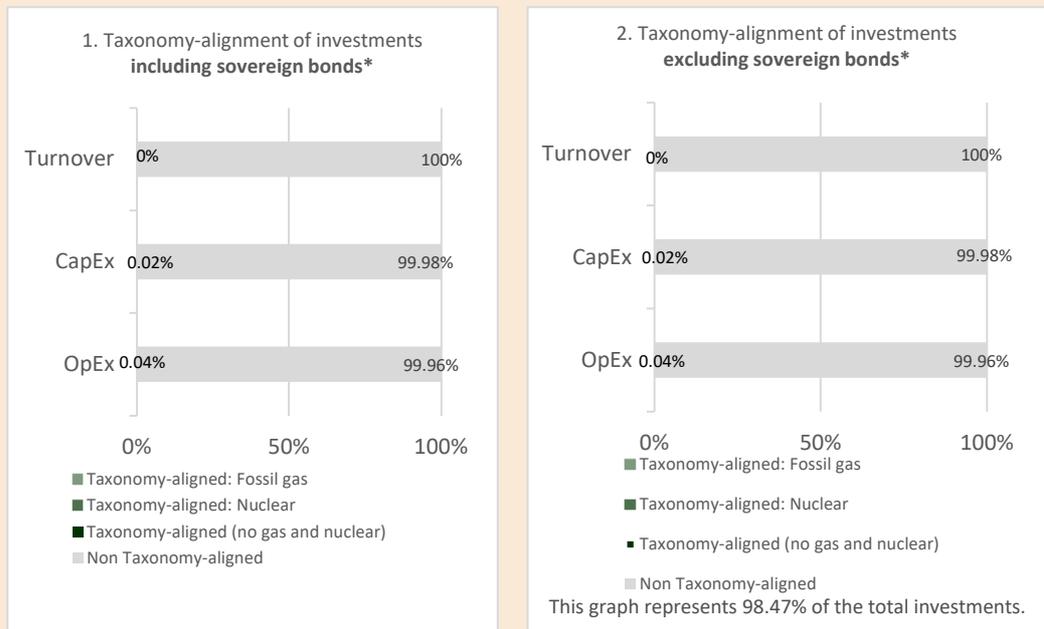

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

For the reference period, the Fund’s investment alignment with EU Taxonomy is shown in the graphs below.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%

Enabling activities: 0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

This is the first period the fund is disclosing Taxonomy alignment, therefore there are no previous periods for comparison purposes.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What was the share of socially sustainable investments?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

There may on occasion be investments in financial techniques and instruments and derivatives used for efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds, cash FX) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

During 2024, we undertook a variety of stewardship related activity. This included engagement and voting activity across climate, earth and people themes. The level of engagement and voting conducted varied depending on the materiality of the issue and its applicability to select companies.

Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

**How did this financial product perform compared to the reference benchmark?**

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

● **How does the reference benchmark differ from a broad market index?**

Not Applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable.

- ***How did this financial product perform compared with the broad market index?***

Not Applicable.

ANNEX IV

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aviva Investors–Global Emerging Markets Equity Unconstrained Fund **Legal entity identifier:** 549300WP5K20FSXRG005

## Environmental and/or social characteristics

<b>Did this financial product have a sustainable investment objective?</b>	
<p style="text-align: center;">●● <input type="checkbox"/> <b>Yes</b></p> <p><input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___%</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <p><input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%</p>	<p style="text-align: center;">●● <input checked="" type="checkbox"/> <b>No</b></p> <p><input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b></p>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The below criteria are binding on the investment process to ensure underlying investments are inclusive of those securities promoting environmental or social characteristics:

The exclusions detailed below will be applied to this universe.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

A. The Investment Manager’s Baseline Exclusions Policy which includes the following exclusions:

- Controversial weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact (“UNGC”); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons, where companies supply state nuclear weapons programmes where the state lacks credible commitments to effective arms controls, disarmament and non-proliferation as outlined in the Treaty on the Non-Proliferation of Nuclear Weapons (NPT) \*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970). Please note, we retain discretion to additionally exclude companies supplying nuclear weapons state programmes within the NPT, if Aviva Investors considers the state to have undermined non-proliferation arms control treaties, conventions and norms.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI’s controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviours since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager’s Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B. The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is met through a combination of the UNGC (as part of the Investment Manager’s Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. Good governance indicators form a substantial component of the Investment Manager’s ESG scoring tools and ESG research.

● ***How did the sustainability indicators perform?***

The fund will continue to be managed in line with the Aviva Investors Baseline Exclusion policy and any revisions made to it over time, there have been no active breaches of the policy on the fund since implementation.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Adverse sustainability indicator	Metric	Annual Average
GHG Emissions	Scope 1 GHG emissions	9,626.84
	Scope 2 GHG emissions	5,046.41
	Scope 3 GHG emissions	49,868.55
	Total GHG emissions	64,414.50
Carbon Footprint	Carbon footprint	417.15
GHG Intensity of investee companies	GHG intensity of investee companies	916.99
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	7.93%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	84.55%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.42
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	2.41%
Board Gender Diversity	Average ratio of female to male board members in investee companies	20.46%

**AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template. Similarly, methodology changes from our third-party data providers may impact year-on-year data.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company’s value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

● **...and compared to previous periods?**

Adverse sustainability indicator	Metric	Annual Average 2023	Annual Average 2024
GHG Emissions	Scope 1 GHG emissions	17,745.81	9,626.84
	Scope 2 GHG emissions	5,628.90	5,046.41
	Scope 3 GHG emissions	59,088.68	49,868.55
	Total GHG emissions	81,971.31	64,414.50
Carbon Footprint	Carbon footprint	507.74	417.15
GHG Intensity of investee companies	GHG intensity of investee companies	959.18	916.99

Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	11.67%	7.93%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	86.04%	84.55%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.99	0.42
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.61%	2.41%
Board Gender Diversity	Average ratio of female to male board members in investee companies	18.60%	20.46%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

— — — **How were the indicators for adverse impacts on sustainability factors taken into account?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

— — — **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

### How did this financial product consider principal adverse impacts on sustainability factors?

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

### What were the top investments of this financial product?

Largest Investment	Sector	% Asset	Country
TAIWAN SEMICONDUCTOR MANUFACTURING	Information Technology	9.79%	Taiwan (Republic of China)
SAMSUNG ELECTRONICS LTD	Information Technology	4.94%	Korea (South), Republic of
ISHARES MSCI SAUDI ARABIA CAPPED U	Financials	3.53%	Ireland

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

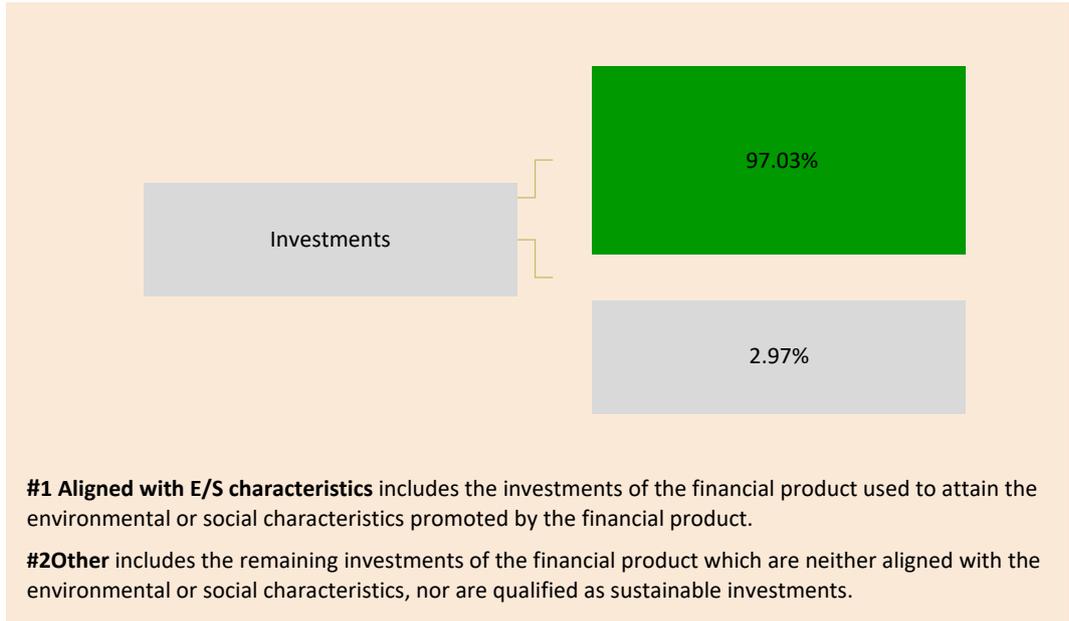

1<sup>st</sup> January 2024 – 31<sup>st</sup> December 2024

### What was the proportion of sustainability-related investments?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

● **What was the asset allocation?**

**Asset allocation** describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The Fund did not commit to holding Sustainable Investments and therefore the Fund's exposure to Sustainable Investments has not been assessed, however, during the reference period, a percentage of the Fund's investments were aligned with the EU Taxonomy (see the section "To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?" below).

● **In which economic sectors were the investments made?**

Sector	% Proportion
Information Technology	25.76%
Financials	24.02%
Consumer Discretionary	18.16%
Energy	6.01%
Communication	5.66%
Industrials	4.38%
Materials	4.21%
Consumer Staples	4.01%
Cash Securities	2.97%
Health Care	2.33%
Utilities	1.16%
Real Estate	0.69%
ETFs	0.63%

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Taxonomy-aligned activities are expressed as a share of:

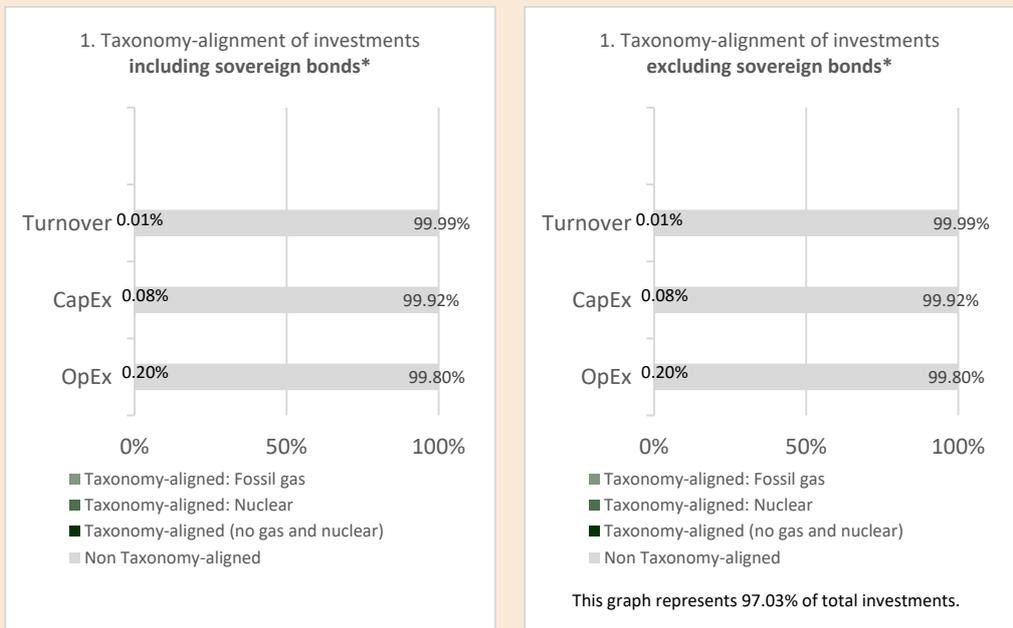

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

For the reference period, the Fund’s investment alignment with EU Taxonomy is shown in the graphs below.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%

Enabling activities: 0.00%

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This is the first period the fund is disclosing Taxonomy alignment, therefore there are no previous periods for comparison purposes.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What was the share of socially sustainable investments?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

There may on occasion be investments in financial techniques and instruments and derivatives used for efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds, cash FX) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

During 2024, we undertook a variety of stewardship related activity. This included engagement and voting activity across climate, earth and people themes. The level of engagement and voting conducted varied depending on the materiality of the issue and its applicability to select companies.

Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

**How did this financial product perform compared to the reference benchmark?**

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

● **How does the reference benchmark differ from a broad market index?**

Not Applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable.

- ***How did this financial product perform compared with the broad market index?***

Not Applicable.

ANNEX IV

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aviva Investors – Global Equity Endurance Fund **Legal entity identifier:** 549300UY3TDNW0Y6U652

## Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?**

<span style="color: green;">●●</span> <input type="checkbox"/> <b>Yes</b>	<span style="color: grey;">●</span> <span style="color: white;">●</span> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The below criteria are binding on the investment process to ensure underlying investments are inclusive of those securities promoting environmental or social characteristics:

The exclusions detailed below will be applied to this universe.

- A. The Investment Manager’s Baseline Exclusions Policy which includes the following exclusions:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- Controversial weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact (“UNGC”); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons, where companies supply state nuclear weapons programmes where the state lacks credible commitments to effective arms controls, disarmament and non-proliferation as outlined in the Treaty on the Non-Proliferation of Nuclear Weapons (NPT) \*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970). Please note, we retain discretion to additionally exclude companies supplying nuclear weapons state programmes within the NPT, if Aviva Investors considers the state to have undermined non-proliferation arms control treaties, conventions and norms.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI’s controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviours since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager’s Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B.The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is met through a combination of the UNGC (as part of the Investment Manager’s Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. Good governance indicators form a substantial component of the Investment Manager’s ESG scoring tools and ESG research.

### ● **How did the sustainability indicators perform?**

The fund will continue to be managed in line with the Aviva Investors Baseline Exclusion policy and any revisions made to it over time, there have been no active breaches of the policy on the fund since implementation.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Adverse sustainability indicator	Metric	Annual Average
GHG Emissions	Scope 1 GHG emissions	898.08
	Scope 2 GHG emissions	1,094.81
	Scope 3 GHG emissions	34,027.95
	Total GHG emissions	35,806.04
Carbon Footprint	Carbon footprint	48.18
GHG Intensity of investee companies	GHG intensity of investee companies	220.56
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	3.24%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	61.15%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.06
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.50%
Board Gender Diversity	Average ratio of female to male board members in investee companies	35.13%

**AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template. Similarly, methodology changes from our third-party data providers may impact year-on-year data.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company’s value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

● **...and compared to previous periods?**

Adverse sustainability indicator	Metric	Annual Average 2023	Annual Average 2024
GHG Emissions	Scope 1 GHG emissions	834.45	898.08
	Scope 2 GHG emissions	952.57	1,094.81
	Scope 3 GHG emissions	41,858.46	34,027.95
	Total GHG emissions	42,917.57	35,806.04
Carbon Footprint	Carbon footprint	51.25	48.18
GHG Intensity of investee companies	GHG intensity of investee companies	194.57	220.56

Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	2.44%	3.24%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	59.14%	61.15%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.06	0.06
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%	0.50%
Board Gender Diversity	Average ratio of female to male board members in investee companies	35.94%	35.13%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

— **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

### How did this financial product consider principal adverse impacts on sustainability factors?

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

### What were the top investments of this financial product?

Largest Investment	Sector	% Asset	Country
ALPHABET INC CLASS C	Communication	6.63%	United States
VISA INC CLASS A	Financials	6.37%	United States
UNITEDHEALTH GROUP INC	Health Care	5.17%	United States
LONDON STOCK EXCHANGE GROUP PLC	Financials	4.90%	United Kingdom
ARTHUR J GALLAGHER	Financials	4.65%	United States
ELEVANCE HEALTH INC	Health Care	4.52%	United States

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

1<sup>st</sup> January 2024 – 31<sup>st</sup> December 2024

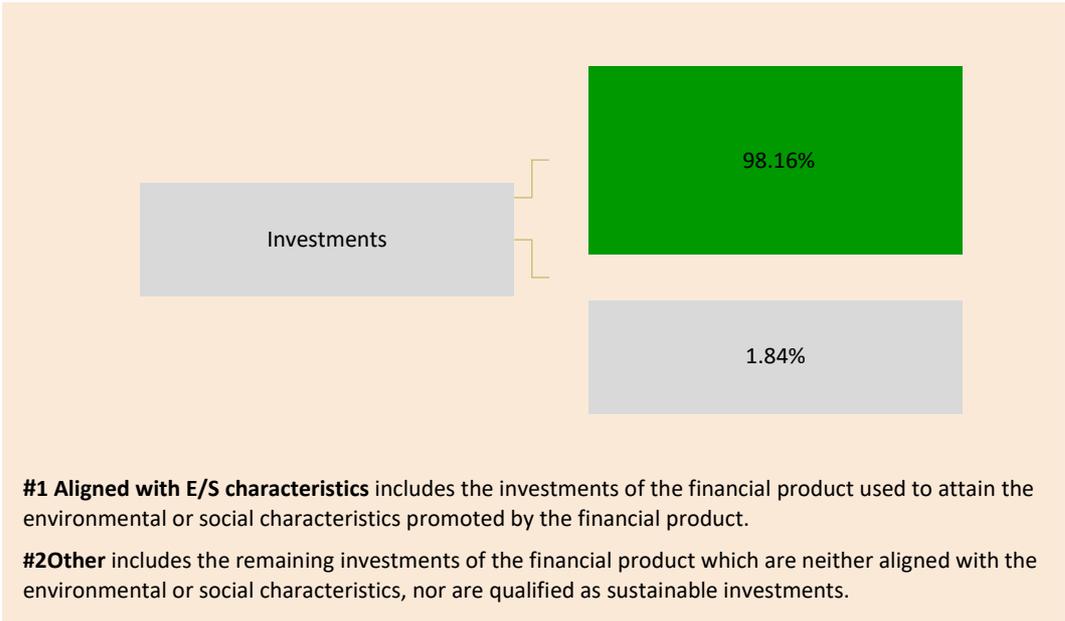

### What was the proportion of sustainability-related investments?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

● **What was the asset allocation?**

**Asset allocation** describes the share of investments in specific assets.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The taxonomy alignment percentage in the above diagram represents the percentage of investments held by the Fund in EU Taxonomy-aligned activities through Sustainable Investments with an environmental objective. It does not include the taxonomy alignment achieved through the Fund's other investments. For the taxonomy alignment of the Fund's total investments, see the bar chart below.

● **In which economic sectors were the investments made?**

Sector	% Proportion
Financials	31.10%
Industrials	21.07%
Information Technology	14.94%
Health Care	14.42%
Communication	6.63%
Consumer Discretionary	5.61%
Consumer Staples	2.45%
Cash Securities	1.84%
Real Estate	1.47%
Materials	0.49%

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

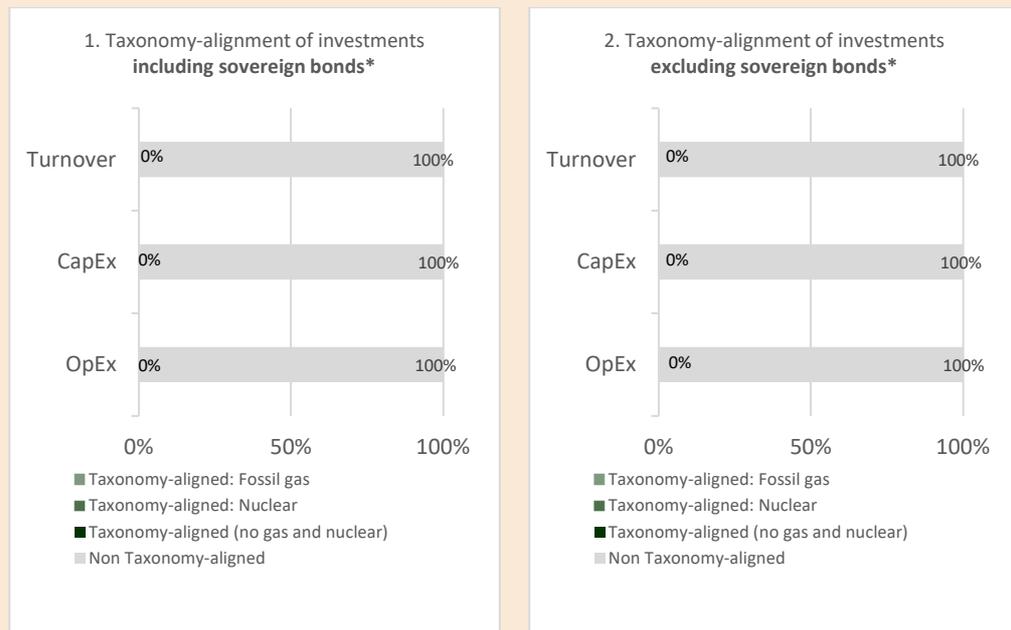

- Yes:
  - In fossil gas
  - In nuclear energy
- No

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
  - **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
  - **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%  
 Enabling activities: 0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This is the first period the fund is disclosing Taxonomy alignment, therefore there are no previous periods for comparison purposes.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What was the share of socially sustainable investments?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

There may on occasion be investments in financial techniques and instruments and derivatives used for efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds, cash FX) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

During 2024, we undertook a variety of stewardship related activity. This included engagement and voting activity across climate, earth and people themes. The level of engagement and voting conducted varied depending on the materiality of the issue and its applicability to select companies.

Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

**How did this financial product perform compared to the reference benchmark?**

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

● ***How does the reference benchmark differ from a broad market index?***

Not Applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable.

- ***How did this financial product perform compared with the broad market index?***

Not Applicable.

ANNEX IV

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aviva Investors–Global Equity Income Fund **Legal entity identifier:** 5493000583RFQMZ2NL72

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<span style="color: green;">●●</span> <input type="checkbox"/> <b>Yes</b>	<span style="color: grey;">●</span> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul>
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The below criteria are binding on the investment process to ensure underlying investments are inclusive of those securities promoting environmental or social characteristics:

The exclusions detailed below will be applied to this universe.

- A. The Investment Manager’s Baseline Exclusions Policy which includes the following exclusions:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- Controversial weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact (“UNGC”); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons, where companies supply state nuclear weapons programmes where the state lacks credible commitments to effective arms controls, disarmament and non-proliferation as outlined in the Treaty on the Non-Proliferation of Nuclear Weapons (NPT) \*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970). We retain discretion within the scope of this screen to additionally exclude companies involved in nuclear weapons, where this supplies nuclear states within the NPT but Aviva Investors considers the state to have undermined widely accepted non-proliferation arms control treaties, conventions and norms. This will predominantly relate to the UN’s Nuclear Non-Proliferation Treaty but may extend to other existing conventions where relevant.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI’s controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviours since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager’s Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B. The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is met through a combination of the UNGC (as part of the Investment Manager’s Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. Good governance indicators form a substantial component of the Investment Manager’s ESG scoring tools and ESG research.

### ● **How did the sustainability indicators perform?**

The fund will continue to be managed in line with the Aviva Investors Baseline Exclusion policy and any revisions made to it over time, there have been no active breaches of the policy on the fund since implementation.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Adverse sustainability indicator	Metric	Annual Average
GHG Emissions	Scope 1 GHG emissions	1,917.06
	Scope 2 GHG emissions	598.89
	Scope 3 GHG emissions	15,476.42
	Total GHG emissions	17,958.17
Carbon Footprint	Carbon footprint	236.64
GHG Intensity of investee companies	GHG intensity of investee companies	556.99
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	9.47%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	66.69
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.21
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	8.08%
Board Gender Diversity	Average ratio of female to male board members in investee companies	39.66

**AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template. Similarly, methodology changes from our third-party data providers may impact year-on-year data.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company’s value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

● **...and compared to previous periods?**

This is the first period the fund has disclosed the sustainability indicators performance, as such there are no previous periods to compare.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

**How did this financial product consider principal adverse impacts on sustainability factors?**

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

### What were the top investments of this financial product?

Largest Investment	Sector	% Asset	Country
DEUTSCHE TELEKOM N AG	Communication	3.53%	Germany
BROADCOM INC	Information Technology	3.45%	United States
MICROSOFT CORP	Information Technology	3.23%	United States
NATIONAL GRID PLC	Utilities	3.19%	United Kingdom
TOTALENERGIES	Energy	3.10%	France
BAE SYSTEMS PLC	Industrials	3.08%	United Kingdom
TAIWAN SEMICONDUCTOR MANUFACTURING	Information Technology	2.92%	Taiwan (Republic of China)
UNITEDHEALTH GROUP INC	Health Care	2.81%	United States
AXA SA	Financials	2.77%	France
NXP SEMICONDUCTORS NV	Information Technology	2.72%	Netherlands
MUENCHENER RUECKVERSICHERUNGSGESE	Financials	2.64%	Germany
SIEMENS N AG	Industrials	2.62%	Germany
AUTOMATIC DATA PROCESSING INC	Industrials	2.60%	United States
COMPAGNIE FINANCIERE RICHEMONT SA	Consumer Discretionary	2.54%	Switzerland
MARSH & MCLENNAN INC	Financials	2.49%	United States

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

1<sup>st</sup> January 2024 – 31<sup>st</sup> December 2024

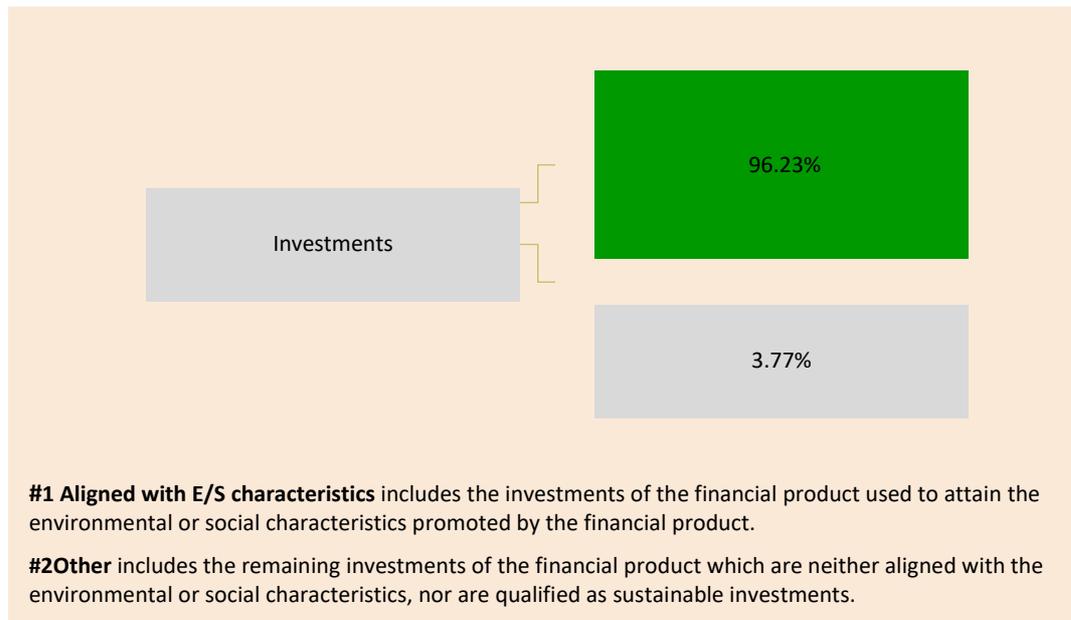

### What was the proportion of sustainability-related investments?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

#### ● What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The Fund did not commit to holding Sustainable Investments and therefore the Fund's exposure to Sustainable Investments has not been assessed, however, during the reference period, a percentage of the Fund's investments were aligned with the EU Taxonomy (see the section "To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?" below).

● **In which economic sectors were the investments made?**

Sector	% Proportion
Industrials	23.36%
Information Technology	17.90%
Health Care	13.49%
Financials	12.82%
Consumer Staples	8.36%
Utilities	5.66%
Consumer Discretionary	5.15%
Communication	4.08%
Cash Securities	3.77%
Energy	3.10%
Materials	2.32%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

For the reference period, the Fund's investment alignment with EU Taxonomy is shown in the graphs below.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

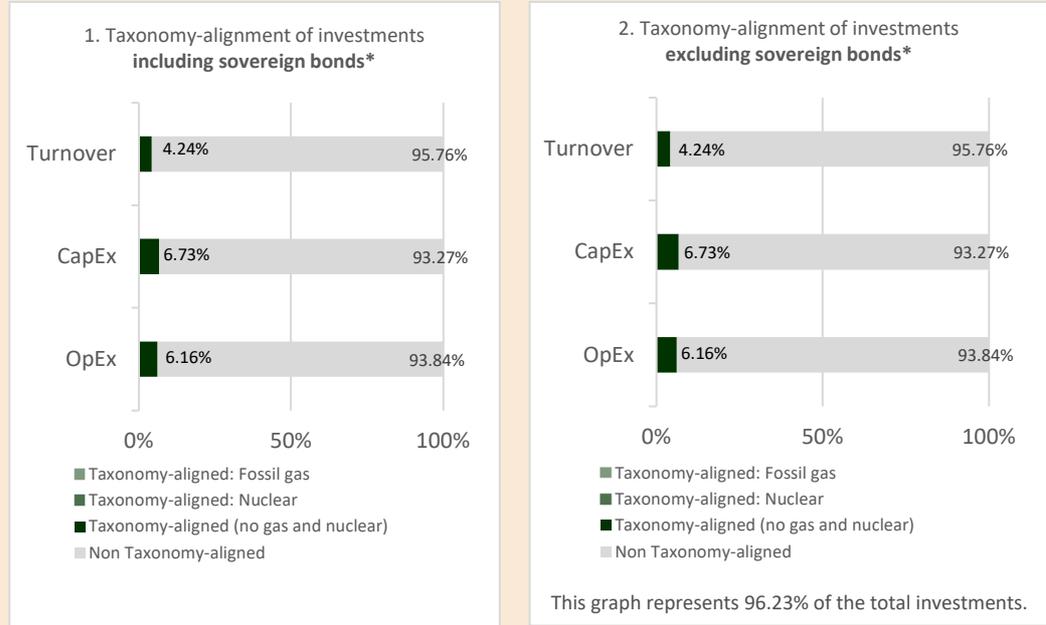

- Yes:
  - In fossil gas
  - In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.01%

Enabling activities: 3.26%

**How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This is the first period the fund is disclosing Taxonomy alignment, therefore there are no previous periods for comparison purposes.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What was the share of socially sustainable investments?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

There may on occasion be investments in financial techniques and instruments and derivatives used for efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds, cash FX) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

During 2024, we undertook a variety of stewardship related activity. This included engagement and voting activity across climate, earth and people themes. The level of engagement and voting conducted varied depending on the materiality of the issue and its applicability to select companies.

Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

**How did this financial product perform compared to the reference benchmark?**

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

- ***How does the reference benchmark differ from a broad market index?***  
Not Applicable.
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***  
Not Applicable.
- ***How did this financial product perform compared with the reference benchmark?***  
Not Applicable.
- ***How did this financial product perform compared with the broad market index?***  
Not Applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Aviva Investors – Global High Yield Bond Fund

Legal entity identifier: 6YIQK8L8Y5ACSM7N4R36

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <b>Yes</b>	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The below criteria are binding on the investment process to ensure underlying investments are inclusive of those securities promoting environmental or social characteristics:

The exclusions detailed below will be applied to this universe.

- A. The Investment Manager’s Baseline Exclusions Policy which includes the following exclusions:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- Controversial weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact (“UNGC”); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons, where companies supply state nuclear weapons programmes where the state lacks credible commitments to effective arms controls, disarmament and non-proliferation as outlined in the Treaty on the Non-Proliferation of Nuclear Weapons (NPT) \*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970). We retain discretion within the scope of this screen to additionally exclude companies involved in nuclear weapons, where this supplies nuclear states within the NPT but Aviva Investors considers the state to have undermined widely accepted non-proliferation arms control treaties, conventions and norms. This will predominantly relate to the UN’s Nuclear Non-Proliferation Treaty but may extend to other existing conventions where relevant.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI’s controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviors since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager’s Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B. The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is met through a combination of the UNGC (as part of the Investment Manager’s Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. Good governance indicators form a substantial component of the Investment Manager’s ESG scoring tools and ESG research.

● **How did the sustainability indicators perform?**

fund will continue to be managed in line with the Aviva Investors Baseline Exclusion policy and any revisions made to it over time, there have been no active breaches of the policy on the fund since implementation.

Adverse sustainability indicator	Metric	Annual Average
GHG Emissions	Scope 1 GHG emissions	189,626.94

	Scope 2 GHG emissions	38,875.34
	Scope 3 GHG emissions	1,403,955.55
	Total GHG emissions	1,574,549.01
Carbon Footprint	Carbon footprint	431.79
GHG Intensity of investee companies	GHG intensity of investee companies	1,239.75
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	6.70%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	76.78%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	1.02
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	4.25%
Board Gender Diversity	Average ratio of female to male board members in investee companies	29.86%

**AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template. Similarly, methodology changes from our third-party data providers may impact year-on-year data.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company’s value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

● **...and compared to previous periods?**

Adverse sustainability indicator	Metric	Annual Average 2023	Annual Average 2024
GHG Emissions	Scope 1 GHG emissions	227,933.44	189,626.94
	Scope 2 GHG emissions	42,242.46	38,875.34
	Scope 3 GHG emissions	1,680,037.75	1,403,955.55
	Total GHG emissions	1,911,386.44	1,574,549.01
Carbon Footprint	Carbon footprint	544.03	431.79

GHG Intensity of investee companies	GHG intensity of investee companies	1,306.58	1,239.75
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	9.47%	6.70%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	74.67%	76.78%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	1.99	1.02
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.07%	4.25%
Board Gender Diversity	Average ratio of female to male board members in investee companies	29.32%	29.86%

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

### How did this financial product consider principal adverse impacts on sustainability factors?

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

### What were the top investments of this financial product?

Largest Investment	Sector	% Assets	Country
ISHARES \$ HIGH YIELD CORP BOND UCI	Financials	1.69%	Ireland

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

1<sup>st</sup> January 2024 – 31<sup>st</sup> December 2024

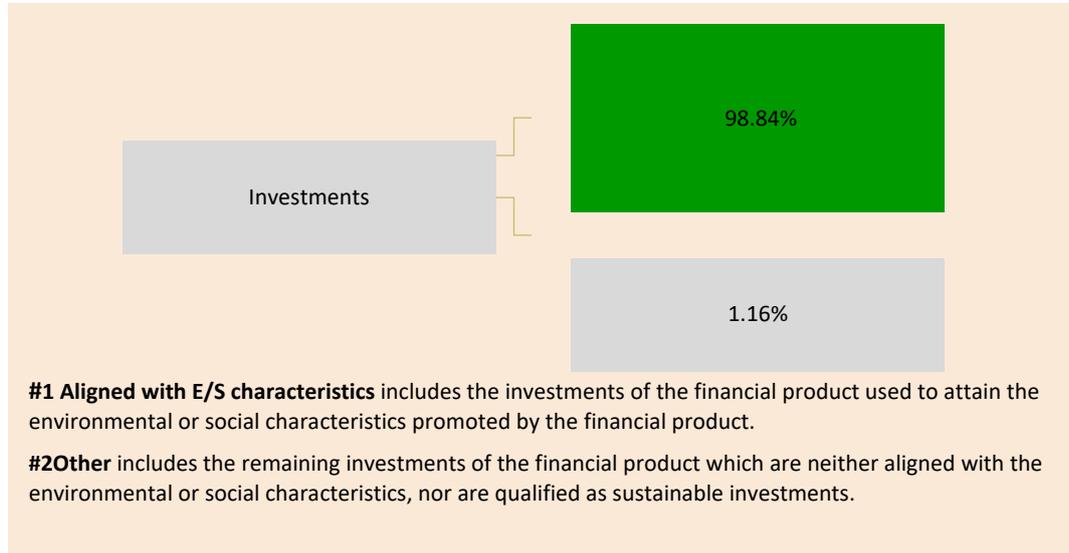

### What was the proportion of sustainability-related investments?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**Asset allocation** describes the share of investments in specific assets.

● **What was the asset allocation?**

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

The Fund did not commit to holding Sustainable Investments and therefore the Fund's exposure to Sustainable Investments has not been assessed, however, during the reference period, a percentage of the Fund's investments were aligned with the EU Taxonomy (see the section "To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?" below).

● **In which economic sectors were the investments made?**

Sector	Proportion (%)
Financials	16.70%
Consumer Discretionary	15.90%
Communication	13.65%
Industrials	13.03%
Materials	9.62%
Energy	6.50%
Health Care	6.30%
Utilities	5.10%
Consumer Staples	4.88%
Information Technology	3.42%
Real Estate	2.40%
FI Securities	1.45%
Cash Securities	0.82%
FX	0.35%
Non-Spendable Cash	0.12%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

Other

-0.25%

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

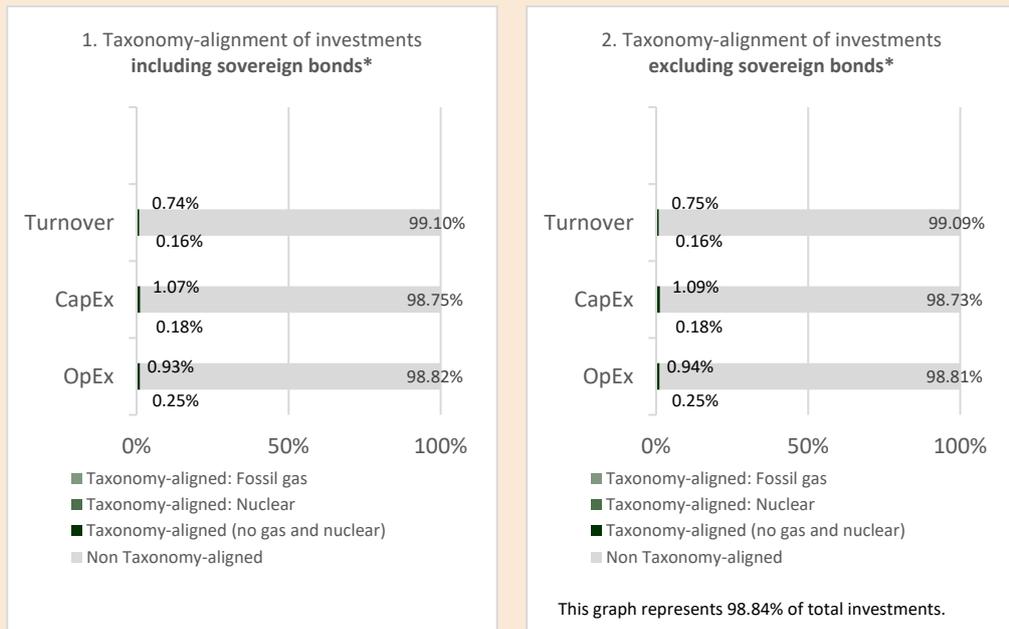

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas  In nuclear energy

No

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Please see the following table for the breakdown of EU Taxonomy alignment (inc.Sovereigns):

	Taxonomy-aligned: Fossil gas	Taxonomy-aligned: Nuclear	Taxonomy-aligned (no gas and nuclear)	Non Taxonomy-aligned

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

OpEx	0	0.25	0.93	98.82
CapEx	0	0.18	1.07	98.75
Turnover	0	0.16	0.74	99.10

Please see the following table for the breakdown of EU Taxonomy alignment (excl.Sovereigns):

	Taxonomy-aligned: Fossil gas	Taxonomy-aligned: Nuclear	Taxonomy-aligned (no gas and nuclear)	Non Taxonomy-aligned
OpEx	0	0.25	0.94	98.81
CapEx	0	0.18	1.09	98.73
Turnover	0	0.16	0.75	99.09

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.04%

Enabling activities: 0.11%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This is the first period the fund is disclosing Taxonomy alignment, therefore there are no previous periods for comparison purposes.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments defined under SFDR and does not commit to making investments aligned to the EU taxonomy. As a result, this is not applicable.

**What was the share of socially sustainable investments?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

There will be investments in financial techniques and instruments and derivatives used for investment purposes, hedging or efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

During 2024, we undertook a variety of stewardship related activity. This included engagement and voting activity across climate, earth and people themes. The level of engagement and voting conducted varied depending on the materiality of the issue and its applicability to select companies.

Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

## How did this financial product perform compared to the reference benchmark?

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

- ***How does the reference benchmark differ from a broad market index?***

Not Applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable.

- ***How did this financial product perform compared with the broad market index?***

Not Applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aviva Investors - Global Investment Grade Corporate Bond Fund  
**Legal entity identifier:** 549300XKOU4KF9B TSA87

**Environmental and/or social characteristics**

**Did this financial product have a sustainable investment objective?**

<input checked="" type="radio"/> <input type="radio"/> <b>Yes</b>	<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul>
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The ESG analysis and considerations described below are incorporated into the investment process but may not always have a material impact on investments in the Sub-Fund. For detailed information on the impact of the ESG analysis on the Sub-Fund's benchmark at a point in time, please see refer to the Fund impact assessment matrix available on the website [EU Sustainable Finance Disclosure Regulation \(SFDR\) - Aviva Investors](#).

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The below criteria are binding elements on the investment process to ensure underlying investments are inclusive of securities promoting environmental or social characteristics.

The exclusions detailed below will be applied to this universe:

A. The Investment Manager’s Baseline Exclusions Policy which includes the following exclusions:

- Controversial weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact (“UNGC”); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons, where companies supply state nuclear weapons programmes where the state lacks credible commitments to effective arms controls, disarmament and non-proliferation as outlined in the Treaty on the Non-Proliferation of Nuclear Weapons (NPT) \*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970). We retain discretion within the scope of this screen to additionally exclude companies involved in nuclear weapons, where this supplies nuclear states within the NPT but Aviva Investors considers the state to have undermined widely accepted non-proliferation arms control treaties, conventions and norms. This will predominantly relate to the UN’s Nuclear Non-Proliferation Treaty but may extend to other existing conventions where relevant.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI’s controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviors since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager’s Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B. ESG Sovereign Assessment on the sustainability characteristics of sovereign issuers and minimum thresholds applied across sovereign issuers based on the Investment Manager’s proprietary ESG scores.

A minimum threshold ESG score for sovereigns at 2.5 is applied to the investment universe, with the aim of screening out those with the worst ESG characteristics.

The scores are derived from the Investment Manager’s proprietary ESG Sovereign Monitor. For issuers scoring between 2.5 and 4 an enhanced due diligence process will operate whereby such issuers will need to pass a

further qualitative assessment to be included in the sub-fund. The considerations for these lower scoring issuers, include but are not limited to, having a positive sustainable GDP gap, or where the ESG analyst considers the data is outdated, inaccurate or incomplete.

The Investment Manager believes providing debt financing to sovereigns supports the pivotal role they play in the transition to a more sustainable future. The Investment Manager also recognises associated sustainability risks. Effective state governance reduces those risks but, where appropriate, sovereigns are excluded from the Sub-Fund’s investment universe, subject to exceptions that mitigate unintended consequences and data limitations.

Assessments are made using: the Investment Manager’s proprietary sovereign ESG model (which assigns ratings on a scale of 0 to 10 where sufficient information is available) as a starting point, external data, and qualitative judgements from the Investment Manager’s in-house ESG specialists. The ESG Sovereign Monitor’s quantitative scoring approach assigns a composite ESG score to over 170 countries. These scores are derived from over 400 individual data points, which form 11 composite indicators.

Following a considered review of these ESG research insights, a decision may be taken to exclude a sovereign issuer from the Sub-Fund’s investment universe in order to mitigate the Investment Manager’s judgement of sustainability risks and falling below the Investment Manager’s minimum standard.

More information on the Investment Manager’s proprietary sovereign ESG model and the rating methodology can be found on the website: <http://www.avivainvestors.com/en-lu/about/responsible-investment/>

C.The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is met through a combination of the UNGC (as part of the Investment Manager’s Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. For sovereigns, good governance will be covered through the ESG assessment and minimum Sovereign monitor scores. Good governance indicators form a substantial component of the Investment Manager’s ESG scoring tools and ESG research.

● **How did the sustainability indicators perform?**

The fund will continue to be managed in line with the Aviva Investors Baseline Exclusion policy and any revisions made to it over time, there have been no active breaches of the policy on the fund since implementation.

<b>Adverse sustainability indicator</b>	<b>Metric</b>	<b>Annual Average</b>
GHG Emissions	Scope 1 GHG emissions	230,321.66
	Scope 2 GHG emissions	51,100.12
	Scope 3 GHG emissions	2,184,018.54
	Total GHG emissions	2,457,873.79
Carbon Footprint	Carbon footprint	433.97
GHG Intensity of investee companies	GHG intensity of investee companies	990.08
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	18.46%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	69.22%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.57
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	5.94%
Board Gender Diversity	Average ratio of female to male board members in investee companies	36.71%
GHG intensity	GHG intensity of investee countries	264.27

ESG Sovereign Monitor	Scores below 4	0.00%
	Score between 4 and 6	0.00%
	Scores above 6	4.69%

**AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template. Similarly, methodology changes from our third-party data providers may impact year-on-year data.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company’s value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

● **...and compared to previous periods?**

Adverse sustainability indicator	Metric	Annual Average 2023	Annual Average 2024
GHG Emissions	Scope 1 GHG emissions	186,968.80	230,321.66
	Scope 2 GHG emissions	33,897.60	51,100.12
	Scope 3 GHG emissions	1,816,696.10	2,184,018.54
	Total GHG emissions	2,039,150.14	2,457,873.79
Carbon Footprint	Carbon footprint	477.27	433.97
GHG Intensity of investee companies	GHG intensity of investee companies	970.81	990.08
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	14.12%	18.46%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	60.54%	69.22%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.73	0.57
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%	5.94%
Board Gender Diversity	Average ratio of female to male board members in investee companies	34.60%	36.71%
GHG intensity	GHG intensity of investee countries	412.33	264.27
ESG Sovereign Monitor	Scores below 4	0.00%	0.00%

Score between 4 and 6	0.40%	0.00%
Scores above 6	8.79%	4.69%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

— **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

## What were the top investments of this financial product?

Largest Investment	Sector	% Assets	Country
TREASURY BOND	FI Securities	1.92%	United States
TREASURY NOTE (OLD)	FI Securities	1.24%	United States
TREASURY BOND	FI Securities	1.12%	United States
BANK OF AMERICA CORP MTN	Financials	0.97%	United States
MORGAN STANLEY	Financials	0.97%	United States
STANDARD CHARTERED PLC RegS	Financials	0.88%	United Kingdom
NEW YORK LIFE GLOBAL FUNDING MTN 144A	Financials	0.88%	United States
WARNERMEDIA HOLDINGS INC	Communication	0.87%	United States
CITIGROUP INC	Financials	0.85%	United States
VOLKSWAGEN GROUP OF AMERICA FINANC 144A	Consumer Discretionary	0.84%	United States
WELLS FARGO & COMPANY FX-FRN MTN	Financials	0.83%	United States
CITIGROUP INC	Financials	0.83%	United States
NEXTERA ENERGY CAPITAL HOLDINGS IN	Utilities	0.83%	United States
WELLS FARGO & COMPANY MTN	Financials	0.81%	United States
CHENIERE ENERGY INC	Energy	0.78%	United States

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

1<sup>st</sup> January 2024 – 31<sup>st</sup> December 2024

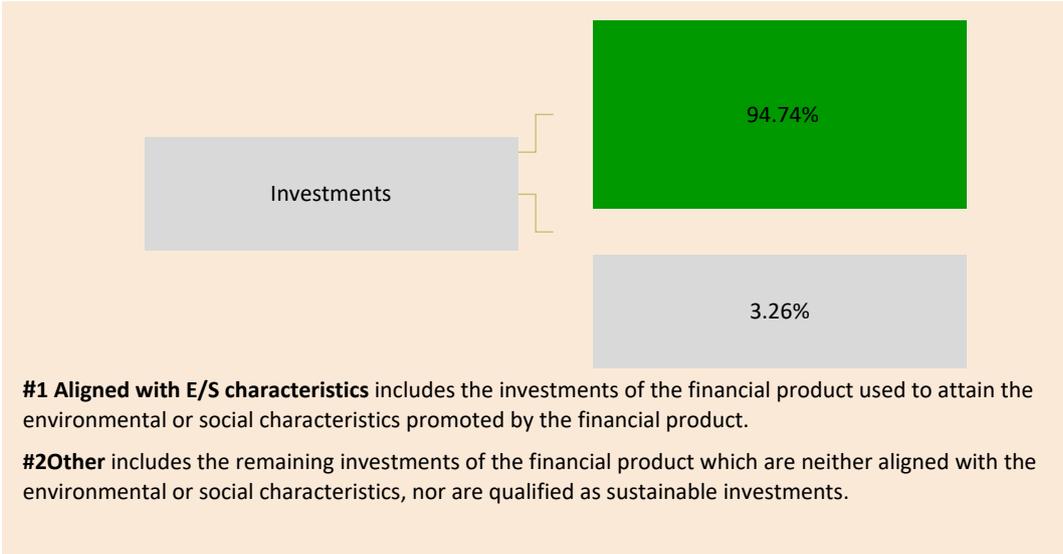

## What was the proportion of sustainability-related investments?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

● **What was the asset allocation?**

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

The Fund did not commit to holding Sustainable Investments and therefore the Fund's exposure to Sustainable Investments has not been assessed, however, during the reference period, a percentage of the Fund's investments were aligned with the EU Taxonomy (see the section "To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?" below).

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **In which economic sectors were the investments made?**

Sector	Proportion (%)
Financials	41.25%
Communication	11.31%
Utilities	10.72%
Energy	9.00%
Health Care	6.75%
Industrials	5.83%
FI Securities	4.69%
Cash Securities	2.86%
Consumer Discretionary	2.58%
Consumer Staples	1.83%
Materials	1.54%
Information Technology	1.29%
FX	0.29%
Real Estate	0.14%
Non-Spendable Cash	0.09%
Other	-0.17%

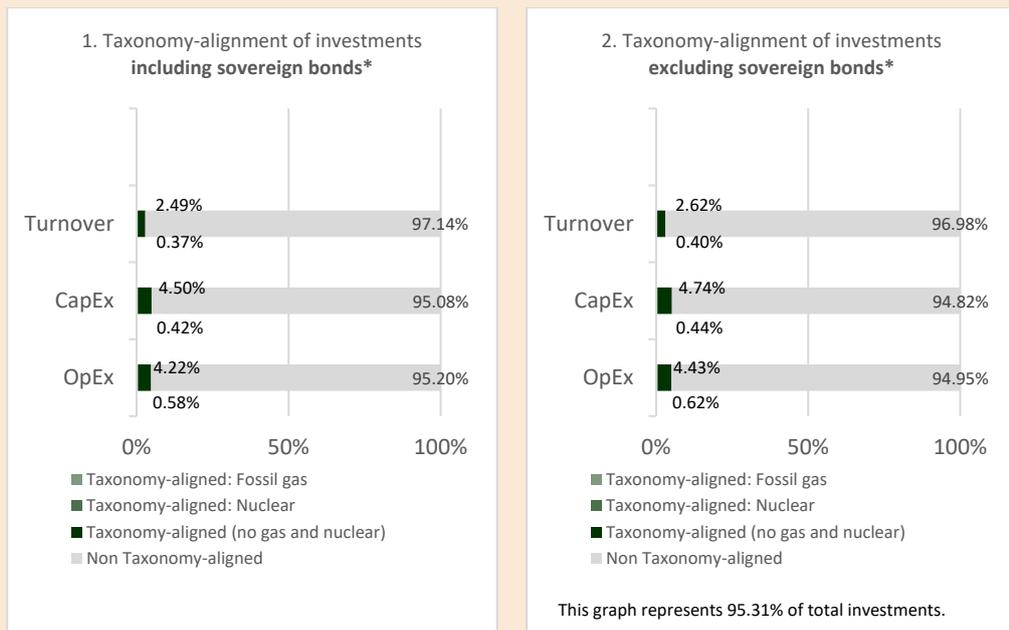

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to making Sustainable Investments defined under SFDR and does not commit to making investments aligned to the EU taxonomy. As a result, this is not applicable.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Please see the following table for the breakdown of EU Taxonomy alignment (inc.Sovereigns):

	Taxonomy-aligned: Fossil gas	Taxonomy-aligned: Nuclear	Taxonomy-aligned (no gas and nuclear)	Non Taxonomy-aligned
OpEx	0	0.58	4.22	95.20
CapEx	0	0.42	4.50	95.08
Turnover	0	0.37	2.49	97.14

Please see the following table for the breakdown of EU Taxonomy alignment (excl.Sovereigns):

	Taxonomy-aligned: Fossil gas	Taxonomy-aligned: Nuclear	Taxonomy-aligned (no gas and nuclear)	Non Taxonomy-aligned
OpEx	0	0.62	4.43	94.95
CapEx	0	0.44	4.74	94.82
Turnover	0	0.40	2.62	96.98

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.17%

Enabling activities: 1.46%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This is the first period the fund is disclosing Taxonomy alignment, therefore there are no previous periods for comparison purposes.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments defined under SFDR and does not commit to making investments aligned to the EU taxonomy. As a result, this is not applicable.

**What was the share of socially sustainable investments?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

There will be investments in financial techniques and instruments and derivatives used for investment purposes, hedging or efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During 2024, we undertook a variety of stewardship related activity. This included engagement and voting activity across climate, earth and people themes. The level of engagement and voting conducted varied depending on the materiality of the issue and its applicability to select companies.

Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

## How did this financial product perform compared to the reference benchmark?

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

- ***How does the reference benchmark differ from a broad market index?***  
Not Applicable.
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***  
Not Applicable.
- ***How did this financial product perform compared with the reference benchmark?***  
Not Applicable.
- ***How did this financial product perform compared with the broad market index?***  
Not Applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Aviva Investors - Global Sovereign Bond Fund Legal entity identifier: ZYBR0GI2DCOB4RV8NO37

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<p><input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___%</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <p><input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%</p>	<p><input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b></p>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The ESG analysis and considerations described below are incorporated into the investment process but may not always have a material impact on investments in the Sub-Fund. For detailed information on the impact of the ESG analysis on the Sub-Fund's benchmark at a point in time, please see refer to the Fund impact assessment matrix available on the website [EU Sustainable Finance Disclosure Regulation \(SFDR\) - Aviva Investors](#).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The below criteria are binding elements on the investment process to ensure underlying investments are inclusive of securities promoting environmental or social characteristics.

The exclusions detailed below will be applied to this universe:

A. The Investment Manager’s Baseline Exclusions Policy which includes the following exclusions:

- Controversial weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact (“UNGC”); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons, where companies supply state nuclear weapons programmes where the state lacks credible commitments to effective arms controls, disarmament and non-proliferation as outlined in the Treaty on the Non-Proliferation of Nuclear Weapons (NPT )\*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970). We retain discretion within the scope of this screen to additionally exclude companies involved in nuclear weapons, where this supplies nuclear states within the NPT but Aviva Investors considers the state to have undermined widely accepted non-proliferation arms control treaties, conventions and norms. This will predominantly relate to the UN’s Nuclear Non-Proliferation Treaty but may extend to other existing conventions where relevant.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI’s controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviors since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager’s Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B. ESG Sovereign Assessment on the sustainability characteristics of sovereign issuers and minimum thresholds applied across sovereign issuers based on the Investment Manager’s proprietary ESG scores.

A minimum threshold ESG score for sovereigns at 2.5 is applied to the investment universe, with the aim of screening out those with the worst ESG characteristics.

The scores are derived from the Investment Manager’s proprietary ESG Sovereign Monitor. For issuers scoring between 2.5 and 4 an enhanced due diligence process will operate whereby such issuers will need to pass a

further qualitative assessment to be included in the sub-fund. The considerations for these lower scoring issuers, include but are not limited to, having a positive sustainable GDP gap, or where the ESG analyst considers the data is outdated, inaccurate or incomplete.

The Investment Manager believes providing debt financing to sovereigns supports the pivotal role they play in the transition to a more sustainable future. The Investment Manager also recognises associated sustainability risks. Effective state governance reduces those risks but, where appropriate, sovereigns are excluded from the Sub-Fund’s investment universe, subject to exceptions that mitigate unintended consequences and data limitations.

Assessments are made using: the Investment Manager’s proprietary sovereign ESG model (which assigns ratings on a scale of 0 to 10 where sufficient information is available) as a starting point, external data, and qualitative judgements from the Investment Manager’s in-house ESG specialists. The ESG Sovereign Monitor’s quantitative scoring approach assigns a composite ESG score to over 170 countries. These scores are derived from over 400 individual data points, which form 11 composite indicators.

Following a considered review of these ESG research insights, a decision may be taken to exclude a sovereign issuer from the Sub-Fund’s investment universe in order to mitigate the Investment Manager’s judgement of sustainability risks and falling below the Investment Manager’s minimum standard.

More information on the Investment Manager’s proprietary sovereign ESG model and the rating methodology can be found on the website: <http://www.avivainvestors.com/en-lu/about/responsible-investment/>

C.The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is met through a combination of the UNGC (as part of the Investment Manager’s Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. For sovereigns, good governance will be covered through the ESG assessment and minimum Sovereign monitor scores. Good governance indicators form a substantial component of the Investment Manager’s ESG scoring tools and ESG research.

● **How did the sustainability indicators perform?**

The fund will continue to be managed in line with the Aviva Investors Baseline Exclusion policy and any revisions made to it over time, there have been no active breaches of the policy on the fund since implementation.

Adverse sustainability indicator	Metric	Annual Average 2024
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	0.00%
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%
GHG intensity	GHG intensity of investee countries	334.78
ESG Sovereign Monitor	Scores below 4	0.00%
	Score between 4 and 6	12.07%
	Scores above 6	80.22%

**AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in

connection with this template. Similarly, methodology changes from our third-party data providers may impact year-on-year data.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company’s value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

● **...and compared to previous periods?**

Adverse sustainability indicator	Metric	Annual Average 2023	Annual Average 2024
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	0.00%	0.00%
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%	0.00%
GHG intensity	GHG intensity of investee countries	353.45	334.78
ESG Sovereign Monitor	Scores below 4	0.00%	0.00%
	Score between 4 and 6	9.97%	12.07%
	Scores above 6	81.59%	80.22%

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

### How did this financial product consider principal adverse impacts on sustainability factors?

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

### What were the top investments of this financial product?

Largest Investment	Sector	% Assets	Country
TREASURY NOTE	FI Securities	1.71%	United States
TREASURY NOTE (2OLD)	FI Securities	1.63%	United States
TREASURY NOTE (2OLD)	FI Securities	1.47%	United States
CHINA PEOPLES REPUBLIC OF (GOVERNMENT	Real Estate	1.33%	China
CHINA PEOPLES REPUBLIC OF (GOVERNMENT	Real Estate	1.30%	China
JAPAN (GOVERNMENT OF) 10YR #343	FI Securities	1.21%	Japan
TREASURY NOTE	FI Securities	1.10%	United States
JAPAN (GOVERNMENT OF) 10YR #347	FI Securities	1.04%	Japan
SPAIN (KINGDOM OF) RegS	Financials	1.02%	Spain
TREASURY NOTE	FI Securities	1.01%	United States
JAPAN (GOVERNMENT OF) 2YR #442	FI Securities	0.92%	Japan

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

1<sup>st</sup> January 2024 – 31<sup>st</sup> December 2024

EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

JAPAN (GOVERNMENT OF) 2YR #464  
 CHINA PEOPLES REPUBLIC OF (GOVERNMENT OF) TREASURY (CPI) NOTE  
 JAPAN (GOVERNMENT OF) 10YR #342

FI Securities	0.90%	Japan
Real Estate	0.86%	China
FI Securities	0.85%	United States
FI Securities	0.84%	Japan

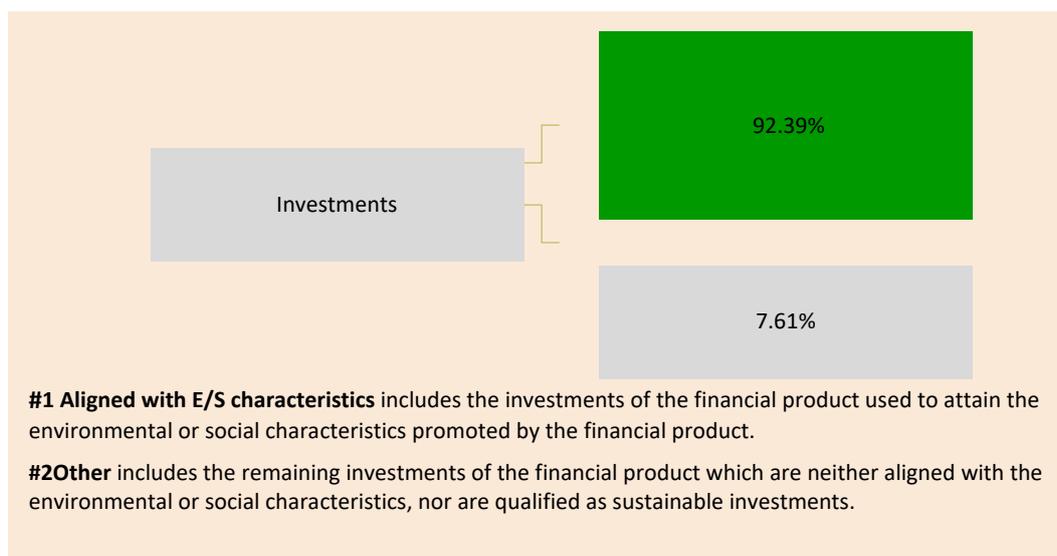

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

## What was the proportion of sustainability-related investments?

### ● What was the asset allocation?

The Fund did not commit to holding Sustainable Investments and therefore the Fund's exposure to Sustainable Investments has not been assessed, however, during the reference period, a percentage of the Fund's investments were aligned with the EU Taxonomy (see the section "To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?" below).

### ● In which economic sectors were the investments made?

Sector	Proportion (%)
FI Securities	68.62%
Financials	13.60%
Real Estate	10.22%
Cash Securities	6.86%
Non-Spendable Cash	0.72%
Other	0.15%
FX	-0.17%

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Taxonomy-aligned activities are expressed as a share of:

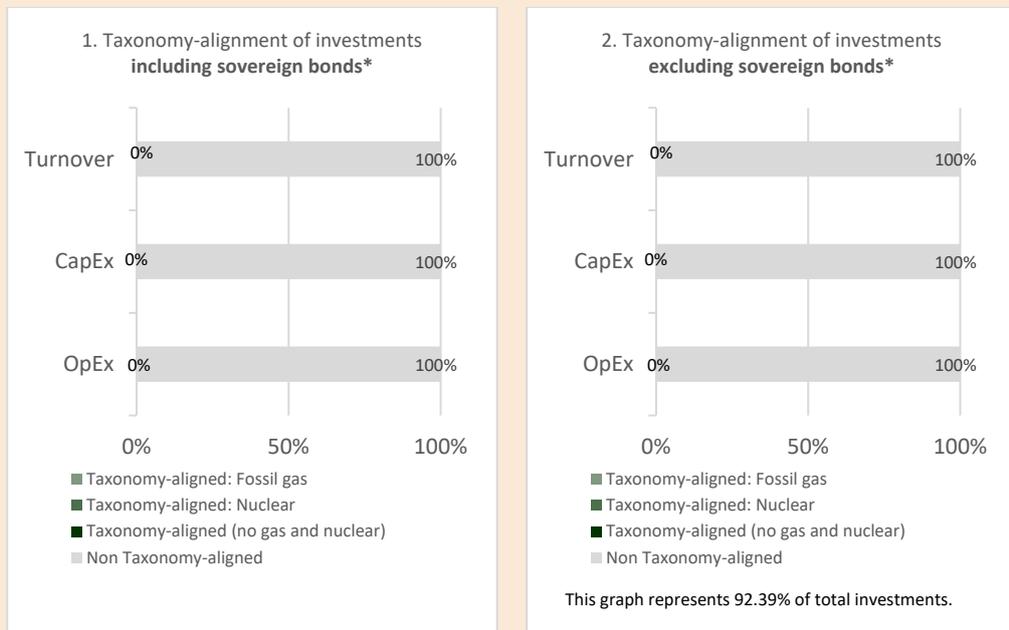

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The Sub-Fund does not make sustainable investments and the percentage of Taxonomy alignment of the Sub-Fund’s portfolio is currently 0%.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%

Enabling activities: 0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

This is the first period the fund is disclosing Taxonomy alignment, therefore there are no previous periods for comparison purposes.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments defined under SFDR and does not commit to making investments aligned to the EU taxonomy. As a result, this is not applicable.

### **What was the share of socially sustainable investments?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

There will be investments in financial techniques and instruments and derivatives used for investment purposes, hedging or efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

During 2024, we undertook a variety of stewardship related activity. This included engagement and voting activity across climate, earth and people themes. The level of engagement and voting conducted varied depending on the materiality of the issue and its applicability to select companies.

Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

### **How did this financial product perform compared to the reference benchmark?**

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

- ***How does the reference benchmark differ from a broad market index?***

Not Applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable.

- ***How did this financial product perform compared with the broad market index?***

Not Applicable.

ANNEX IV

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aviva Investors - Multi-Strategy Target Return Fund  
**Legal entity identifier:** 549300LVG2Y9VF6GWX06

**Environmental and/or social characteristics**

**Did this financial product have a sustainable investment objective?**

<input checked="" type="radio"/> <input type="radio"/> <b>Yes</b>	<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ____% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul>
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ____%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The ESG analysis and considerations described below are incorporated into the investment process but may not always have a material impact on investments in the Sub-Fund. For detailed information on the impact of the ESG analysis on the Sub-Fund's benchmark at a point in time, please see refer to the Fund impact assessment matrix available on the website [EU Sustainable Finance Disclosure Regulation \(SFDR\) - Aviva Investors](#).

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The below criteria are binding elements on the investment process to ensure underlying investments are inclusive of securities promoting environmental or social characteristics.

The exclusions detailed below will be applied to this universe:

A. The Investment Manager’s Baseline Exclusions Policy which includes the following exclusions:

- Controversial weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact (“UNGC”); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons, where companies supply state nuclear weapons programmes where the state lacks credible commitments to effective arms controls, disarmament and non-proliferation as outlined in the Treaty on the Non-Proliferation of Nuclear Weapons (NPT) \*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970). We retain discretion within the scope of this screen to additionally exclude companies involved in nuclear weapons, where this supplies nuclear states within the NPT but Aviva Investors considers the state to have undermined widely accepted non-proliferation arms control treaties, conventions and norms. This will predominantly relate to the UN’s Nuclear Non-Proliferation Treaty but may extend to other existing conventions where relevant.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI’s controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviors since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager’s Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B. ESG Sovereign Assessment on the sustainability characteristics of sovereign issuers and minimum thresholds applied across sovereign issuers based on the Investment Manager’s proprietary ESG scores.

A minimum threshold ESG score for sovereigns at 2.5 is applied to the investment universe, with the aim of screening out those with the worst ESG characteristics.

The scores are derived from the Investment Manager’s proprietary ESG Sovereign Monitor. For issuers scoring between 2.5 and 4 an enhanced due diligence process will operate whereby such issuers will need to pass a

further qualitative assessment to be included in the sub-fund. The considerations for these lower scoring issuers, include but are not limited to, having a positive sustainable GDP gap, or where the ESG analyst considers the data is outdated, inaccurate or incomplete.

The Investment Manager believes providing debt financing to sovereigns supports the pivotal role they play in the transition to a more sustainable future. The Investment Manager also recognises associated sustainability risks. Effective state governance reduces those risks but, where appropriate, sovereigns are excluded from the Sub-Fund’s investment universe, subject to exceptions that mitigate unintended consequences and data limitations.

Assessments are made using: the Investment Manager’s proprietary sovereign ESG model (which assigns ratings on a scale of 0 to 10 where sufficient information is available) as a starting point, external data, and qualitative judgements from the Investment Manager’s in-house ESG specialists. The ESG Sovereign Monitor’s quantitative scoring approach assigns a composite ESG score to over 170 countries. These scores are derived from over 400 individual data points, which form 11 composite indicators.

Following a considered review of these ESG research insights, a decision may be taken to exclude a sovereign issuer from the Sub-Fund’s investment universe in order to mitigate the Investment Manager’s judgement of sustainability risks and falling below the Investment Manager’s minimum standard.

More information on the Investment Manager’s proprietary sovereign ESG model and the rating methodology can be found on the website: <http://www.avivainvestors.com/en-lu/about/responsible-investment/>

C.The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is met through a combination of the UNGC (as part of the Investment Manager’s Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. For sovereigns, good governance will be covered through the ESG assessment and minimum Sovereign monitor scores. Good governance indicators form a substantial component of the Investment Manager’s ESG scoring tools and ESG research.

● **How did the sustainability indicators perform?**

The fund will continue to be managed in line with the Aviva Investors Baseline Exclusion policy and any revisions made to it over time, there have been no active breaches of the policy on the fund since implementation.

<b>Adverse sustainability indicator</b>	<b>Metric</b>	<b>Annual Average</b>
GHG Emissions	Scope 1 GHG emissions	5,468.82
	Scope 2 GHG emissions	1,051.39
	Scope 3 GHG emissions	41,613.38
	Total GHG emissions	47,839.63
Carbon Footprint	Carbon footprint	67.07
GHG Intensity of investee companies	GHG intensity of investee companies	828.23
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	1.51%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	73.35%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.09
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	3.48%

Board Gender Diversity	Average ratio of female to male board members in investee companies	27.71%
GHG intensity	GHG intensity of investee countries	777.14
ESG Sovereign Monitor	Scores below 4	0.00%
	Score between 4 and 6	0.00%
	Scores above 6	0.00%

**AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template. Similarly, methodology changes from our third-party data providers may impact year-on-year data.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company’s value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

● **...and compared to previous periods?**

Adverse sustainability indicator	Metric	Annual Average 2023	Annual Average 2024
GHG Emissions	Scope 1 GHG emissions	20,295.68	5,468.82
	Scope 2 GHG emissions	3,209.99	1,051.39
	Scope 3 GHG emissions	151,693.30	41,613.38
	Total GHG emissions	172,833.25	47,839.63
Carbon Footprint	Carbon footprint	229.11	67.07
GHG Intensity of investee companies	GHG intensity of investee companies	822.32	828.23
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	2.61%	1.51%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	72.61%	73.35%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.19	0.09
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%	3.48%
Board Gender Diversity	Average ratio of female to male board members in investee companies	24.95%	27.71%

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

GHG intensity	GHG intensity of investee countries	933.14	777.14

	Score between 4 and 6	0.00%	0.00%
	Scores above 6	0.00%	0.00%

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

— ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

## How did this financial product consider principal adverse impacts on sustainability factors?

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

## What were the top investments of this financial product?

Largest Investment	Sector	% Assets	Country
LANDESBANK BADEN-WUERTTEMBERG EURO	Cash Securities	3.79%	Germany

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

1<sup>st</sup> January 2024 – 31<sup>st</sup> December 2024

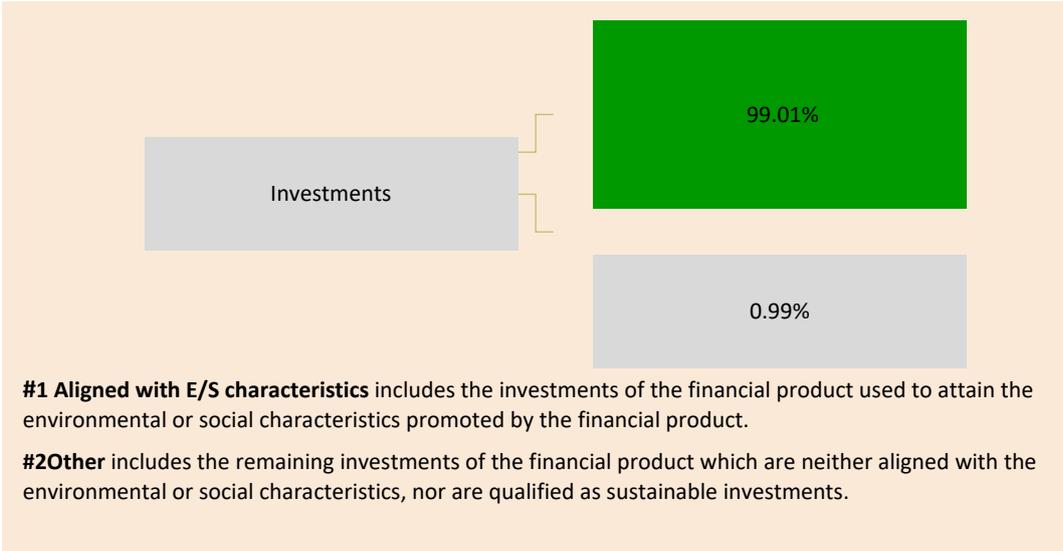

## What was the proportion of sustainability-related investments?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

● **What was the asset allocation?**

**Asset allocation** describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

The Fund did not commit to holding Sustainable Investments and therefore the Fund's exposure to Sustainable Investments has not been assessed, however, during the reference period, a percentage of the Fund's investments were aligned with the EU Taxonomy (see the section "To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?" below).

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **In which economic sectors were the investments made?**

Sector	Proportion (%)
Cash Securities	77.40%
Financials	7.84%
Mutual Funds / Unit Investment Trust	5.80%
Non-Spendable Cash	3.43%
Industrials	1.39%
Consumer Discretionary	0.80%
Equity Options / Warrants	0.70%
Information Technology	0.58%
Materials	0.46%
Health Care	0.45%
Energy	0.40%
Other	0.25%
Consumer Staples	0.24%
Utilities	0.23%
Communication	0.21%
Futures	0.00%
Real Estate	-0.06%
FX	-0.13%

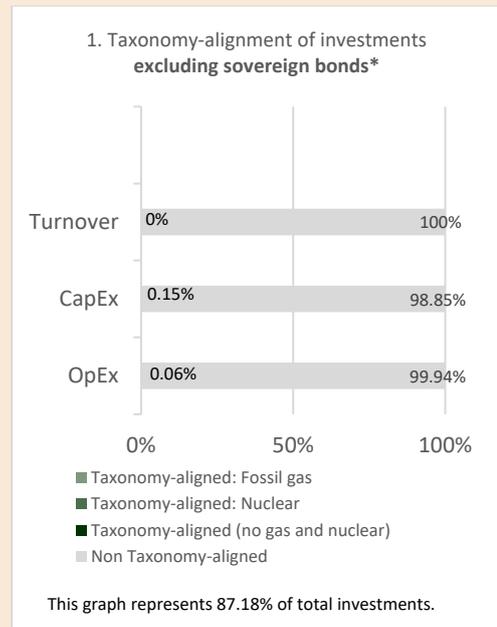

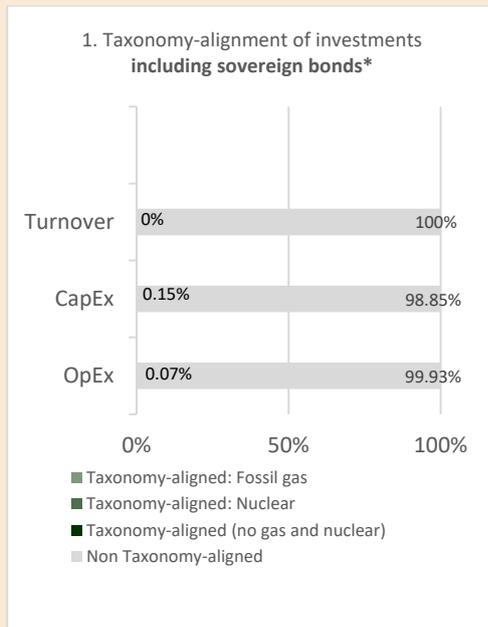

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Please see the following table for the breakdown of EU Taxonomy alignment (inc.Sovereigns):

	Taxonomy-aligned: Fossil gas	Taxonomy-aligned: Nuclear	Taxonomy-aligned (no gas and nuclear)	Non Taxonomy-aligned
OpEx	0	0	0.07	99.93
CapEx	0	0	0.15	99.85
Turnover	0	0	0	100.00

Please see the following table for the breakdown of EU Taxonomy alignment (excl.Sovereigns):

	Taxonomy-aligned: Fossil gas	Taxonomy-aligned: Nuclear	Taxonomy-aligned (no gas and nuclear)	Non Taxonomy-aligned
OpEx	0	0	0.06	99.94
CapEx	0	0	0.15	99.85
Turnover	0	0	0	100.00

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.02%

Enabling activities: 0.01%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This is the first period the fund is disclosing Taxonomy alignment, therefore there are no previous periods for comparison purposes.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments defined under SFDR and does not commit to making investments aligned to the EU taxonomy. As a result, this is not applicable.

**What was the share of socially sustainable investments?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

There will be investments in financial techniques and instruments and derivatives used for hedging or efficient portfolio management purposes or liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds) which would fall within “#2 Other” There will also be certain derivatives used for investment purposes, for which look through is not possible to confirm alignment with the ESG characteristics and therefore these will fall within the “#2 Other” bucket. Minimum safeguard tests will be applied to investments falling within the “#2 Other” category where appropriate. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguards tests to such investments.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During 2024, we undertook a variety of stewardship related activity. This included engagement and voting activity across climate, earth and people themes. The level of engagement and voting conducted varied depending on the materiality of the issue and its applicability to select companies.

Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

## How did this financial product perform compared to the reference benchmark?

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

- ***How does the reference benchmark differ from a broad market index?***  
Not Applicable.
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***  
Not Applicable.
- ***How did this financial product perform compared with the reference benchmark?***  
Not Applicable.
- ***How did this financial product perform compared with the broad market index?***  
Not Applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX V

**Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aviva Investors – Natural Capital Transition Global Equity Fund

**Legal entity identifier:** 549300JGN73VMRYW3O92

## Sustainable investment objective

**Did this financial product have a sustainable investment objective?**

<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>Yes</b>	<input type="radio"/> <input type="radio"/> <input type="checkbox"/> <b>No</b>
<p><input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> 98.13%</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <p><input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ____%</p>	<p><input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <p><input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b></p>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**To what extent was the sustainable investment objective of this financial product met?**

The Natural Capital Transition Global Equity Fund (the “Sub-Fund”) is part of Aviva Investors Sustainable Transition range which aims to support three key sustainable outcomes – relating to People, Climate and Earth (or Natural Capital) – closely aligned to the UN Sustainable Development Goals (“SDGs”). Each fund in the range follows a common investment philosophy to avoid significant harm, invest in solutions and back transition aligned to its particular theme.

This Sub-Fund focusses on “Natural Capital” which is a term used to describe the world’s stocks of natural assets, including all living things, soil, air, water and geology (primarily aligned to the principles of SDGs: 12 Responsible Consumption and Production, 13 Climate Action, 14 Life Below Water and 15 Life on Land).

Alongside aiming to generate long-term capital growth the Sub-Fund's sustainable investment objective is that it aims to support the transition towards a nature positive economy, by investing in equities of companies that are providing solutions to reduce human impact on nature or transitioning their business models towards a more nature positive economy, and by engaging with portfolio companies.

A nature positive economy is one where the loss of nature and biodiversity is reversed so that the health, abundance, diversity and resilience of species and ecosystems recover and improve.

Companies can support the transition by reducing the water, waste, emissions, resource and energy use, and wider biodiversity impacts, of their operations, their products and their supply chain; by providing solutions to reduce human impact on nature; and by contributing to the restoration of key ecosystems.

The Sub-Fund invests in "sustainable investments" that contribute to the Sub-Fund's objective, either through the company's products or services ("solutions" companies) or via the company's operations ("transition" companies).

### **Invest in solutions**

The Sub-Fund invests in "solutions" companies providing goods and services that reduce human impact on nature. It invests across four principal themes aligned with the principle of the UN Sustainable Development Goals:

- i.Sustainable land
- ii.Sustainable ocean
- iii.Circular economy
- iv.The fight against climate change

By investing in "solutions" companies in line with these four themes, these sustainable investments directly contribute towards the sub-fund's sustainable investment objective. Companies will be eligible for investment if they derive at least 20% of their revenue aligned with the themes set out above. The Sub-Fund is also permitted to invest up to 10% of the portfolio in solutions companies with less than 20% revenue. This is in recognition of the fact that nature-based solutions are in their relative infancy, and there is a need to allocate capital to those companies producing new, important and innovative solutions to tackle the environmental crisis. For clarity, these companies will still be subject to the same Do No Significant Harm, Good Governance and Minimum Safeguards tests.

The Investment Manager has therefore chosen 20% threshold of revenues based on the sustainable products and services used to select "Solutions" companies in order:

- To reflect that absolute contribution to sustainable activities requires scalable solutions and therefore to not penalise large companies with diverse product/revenue streams but who do provide genuine solutions to sustainable activities
- It is a threshold the Investment Manager believes to demonstrate significant part of any companies revenues (i.e. it is "material" to those companies business strategy)

### **Back transition**

Aviva Investors believes that the three greatest sustainability challenges of our time are climate change, biodiversity loss and social inequality and that all companies, regardless of sector and geography, have an impact on and are impacted by these immensely complicated and challenging issues. As such, all companies need to change the way they operate if we are going to achieve a sustainable future for both people and planet aligned with our sustainable investment objectives (together, a more socially equitable, nature positive and net zero economy that is also more resilient to higher temperatures). This "transition" of all companies is one of the most important sustainability objectives that must be achieved.

The market needs to allocate capital to those companies leading the transition to a sustainable future in terms of how they operate, not just those providing solutions to the challenges mentioned above through their

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

products and services. In doing so, we are rewarding and backing those companies that are leading their sectors which can have a powerful knock-on effect by raising industry standards and encouraging others to improve.

The Sub-Fund invests in “transition” companies that are demonstrating leadership in the transition towards a nature positive economy by reducing their negative impacts on natural capital through their operations.

Transition companies are identified using a proprietary Transition Risk (“T-Risk”) framework. For each sector, there is a tailored range of natural capital-related indicators, which differ by sector depending on the nature of that sector’s impacts. A wide range of data sources are used, supplementing data from key research providers with an extensive range of NGO rankings on specific issues, for example deforestation, plastics and sustainable protein. This is supplemented by qualitative research to determine the most appropriate transition candidates that are contributing to the sustainable investment objective.

The Sub-Fund has a bespoke engagement programme linked to the sustainable investment objective. All companies held in the Sub-Fund are asked to carry out a biodiversity impact assessment, set quantified biodiversity targets within a specific timeframe and improve performance in a particular area of weakness related to biodiversity as identified by the team. If achieved, these asks will result in companies reducing their negative impacts on natural capital, thus supporting the transition towards a nature positive economy.

The Investment Manager will conduct an annual assessment of each company’s progress on the engagement programme, scoring them in one of five categories. Where there is insufficient progress, escalating action will be taken, which may ultimately lead to divestment from those companies that fail to meet minimum expectations.

No reference benchmark has been designated for the purposes of meeting the sustainable investment objective.

● **How did the sustainability indicators perform?**

The Investment Manager will measure and report a suite of metrics across the following three areas:

1. Capital allocation

The Investment Manager will measure and report on various indicators aligning to its philosophy to avoid significant harm, invest in solutions and back transition. The Investment Manager’s annual sustainability report will include, where possible:

- Solutions revenue
- Relevant PAI indicators:
  - Activities negatively affecting biodiversity
  - Emissions to water
  - Hazardous waste ratio
- Other indicators:
  - o Top Quartile Environmental management scores
  - o Science Based Targets
  - o Positive Contribution to natural capital
  - o CDP Climate Scores

The expectation is to see an improvement in the Sub-Fund’s performance on these metrics on a year-by-year basis. However, there is no guarantee this data will show an annual improvement over time, as during different periods the Investment Manager will have different holdings at different stages of their transition plans. Some

metrics will use the Sub-Fund’s performance Prospectus Page 260 of 287 Aviva Investors benchmark – the MSCI All Country World Index – as a reference point or comparator and any such reporting will make clear when this is the case. These metrics will be used to gauge progress, not to define or categorise sustainable investments.

2. Active ownership

Each portfolio company has a bespoke, timebound engagement plan linked to the sustainable investment objective focusing on Biodiversity impact assessment and quantified biodiversity targets.

Progress against asks will be systematically monitored, by conducting an annual assessment of companies ranking them on a scale from one to five. There is also an escalation pathway ultimately leading to divestment if the company fails to make sufficient progress. The Investment Manager will report on both these aspects, as well as any successful engagements, as part of its annual outcomes report.

The Investment Manager systematically monitors progress against the asks within the Fund’s engagement programme by conducting an annual assessment of companies ranking in categories 1 to 5, with 1 being the leaders. Below is a breakdown of the portfolio into these 5 categories:

- 1. 2%
- 2. 17%
- 3. 15%
- 4. 39%
- 5. 27%

The fund will continue to be managed in line with Aviva Investors Baseline Exclusion policy and any revisions made to it over time; There have been no active breaches of the policy on the fund since implementation.

Adverse sustainability indicator	Metric	Annual Average 2024
GHG Emissions	Scope 1 GHG emissions	557.41
	Scope 2 GHG emissions	315.25
	Scope 3 GHG emissions	5,153.34
	Total GHG emissions	6,016.62
Carbon Footprint	Carbon footprint	170.43
GHG Intensity of investee companies	GHG intensity of investee companies	599.17
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	4.82%
Emissions to water	Tonnes of emissions to water generated by investee companies per million EUR invested, expressed as a weighted average	0.00
Hazardous waste ratio	Tonnes of hazardous waste generated by investee companies per million EUR invested, expressed as a weighted average	0.41
SBTi Targets Approved	Share of investments in companies that have approved SBTi Targets	59.75%
CDP Climate Score	Share of investments in companies that have a CDP climate score of A- or above	46.18%
Solutions Revenue	Share of investments in companies within the portfolio that have >20% revenue generated from solutions products	40.93%
Positive Contribution to natural capital	Capital Overall Contribution (Positive / Highly Positive)	62.60%
Environmental Management Score	1	73.72%
	2	15.98%

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

	3	6.17%
	4	4.13%

**AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template. Similarly, methodology changes from our third-party data providers may impact year-on-year data.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company's value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers

● **...and compared to previous periods?**

Adverse sustainability indicator	Metric	Annual Average 2023	Annual Average 2024
GHG Emissions	Scope 1 GHG emissions	570.51	557.41
	Scope 2 GHG emissions	262.14	315.25
	Scope 3 GHG emissions	4,609.17	5,153.34
	Total GHG emissions	5,242.26	6,016.62
Carbon Footprint	Carbon footprint	196.19	170.43
GHG Intensity of investee companies	GHG intensity of investee companies	589.85	599.17
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	3.67%	4.82%
Emissions to water	Tonnes of emissions to water generated by investee companies per million EUR invested, expressed as a weighted average	0.00	0.00
Hazardous waste ratio	Tonnes of hazardous waste generated by investee companies per million EUR invested, expressed as a weighted average	0.18	0.41
SBTi Targets Approved	Share of investments in companies that have approved SBTi Targets	57.99%	59.75%
CDP Climate Score	Share of investments in companies that have a CDP climate score of A- or above	49.79%	46.18%
Solutions Revenue	Share of investments in companies within the portfolio that have >20% revenue generated from solutions products	28.76%	40.93%
Positive Contribution to natural capital	Capital Overall Contribution (Positive / Highly Positive)	67.35%	62.60%
Environmental Management Score	1	51.59%	73.72%
	2	28.57%	15.98%
	3	15.50%	6.17%
	4	4.34%	4.13%

**How did the sustainable investments not cause significant harm to any sustainable investment objective?**

To ensure that sustainable investments in the sub-fund do not cause significant harm to any environmental or social objective, there are two levels of screening applied:

1. Aviva Investors’ Baseline Exclusions Policy, which includes the following exclusions:

- Controversial weapons
- Civilian firearms
- Thermal coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact (“UNGC”); and
- Tobacco.

The exclusions are based on:

a. A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons, where companies supply state nuclear weapons programmes where the state lacks credible commitments to effective arms controls, disarmament and non-proliferation as outlined in the Treaty on the Non-Proliferation of Nuclear Weapons (NPT) \*
- Civilian firearms 5%
- Thermal coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970). We retain discretion within the scope of this screen to additionally exclude companies involved in nuclear weapons, where this supplies nuclear states within the NPT but Aviva Investors considers the state to have undermined widely accepted non-proliferation arms control treaties, conventions and norms. This will predominantly relate to the UN’s Nuclear Non-Proliferation Treaty but may extend to other existing conventions where relevant.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b. MSCI’s controversy screening data to identify recent controversies to the principles set out under the UN Global Compact. An AI ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviours since the controversy. If we consider failings to be redeemable we will place the company into a structured and time bound engagement program.

Further details on the Investment Manager’s Baseline Exclusions Policy is available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>

2. Fund-level screening based on the indicators for principal adverse impacts (“PAI”) on sustainability factors. Aviva Investors assesses an issuer’s performance against each of the relevant indicators and the sub-fund will not invest where it is considered that an issuer is causing significant harm to an environmental or social objective. Relevant indicators include all

the mandatory PAIs as well as those voluntary indicators selected at a firm-level that are relevant to the theme of the Sub-Fund. Please refer to the PAI Statement on Aviva Investors website for further detail here

<https://www.avivainvestors.com/en-gb/capabilities/sustainable-finance-disclosure-regulation/>

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Manager has a proprietary framework for taking the PAI indicators into account, which differs depending on the type of indicator. Where applicable, the Investment Manager has assigned a red flag to issuers which are considered to cause significant harm to an environmental or social objective. These issuers will be excluded from the investment universe for this Sub-Fund. Furthermore, due diligence will be carried out on every company by portfolio managers and ESG analysts. Where PAI data does not exist, the team will seek to qualitatively assess Do No Significant Harm on a best-efforts basis. This may include engaging directly with companies to ask them for the missing data.

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Investment Manager uses the MSCI overall controversy flag (where a “red” flag is considered a fail) to ensure that sustainable investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (“UNGPBHR”), including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation (“ILO”) on Fundamental Principles and Rights at Work and the International Bill of Human Rights. The MSCI methodology covers violations of the OECD Guidelines, United Nations Global Compact Principles (“UNGC”), the ILO conventions and the UNGPBHR (which references the International Bill of Human Rights), amongst many other global norms and conventions. All issuers with a red flag will be excluded from the investment universe for this Sub-Fund.

**How did this financial product consider principal adverse impacts on sustainability factors?**

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Biodiversity PAI 7 relating to activities negatively affecting biodiversity sensitive areas (exclusions relating to thermal coal and unconventional fossil fuels limit the share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas. Although this doesn’t place a limit on the fund potential exposure to investments negatively affecting biodiversity sensitive areas it does prevent a significant part of the mining sector impact being investible, the arctic oil based exclusions being particularly relevant to the protection of the delicate arctic ecosystem
- Environmental PAI 8 relating to emissions to water
- Environmental PAI 9 relating to hazardous waste ratio

### What were the top investments of this financial product?

Largest Investments	Sector	% Assets	Country
MICROSOFT CORP	Information Technology	6.80%	United States
WASTE MANAGEMENT INC	Industrials	4.03%	United States

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

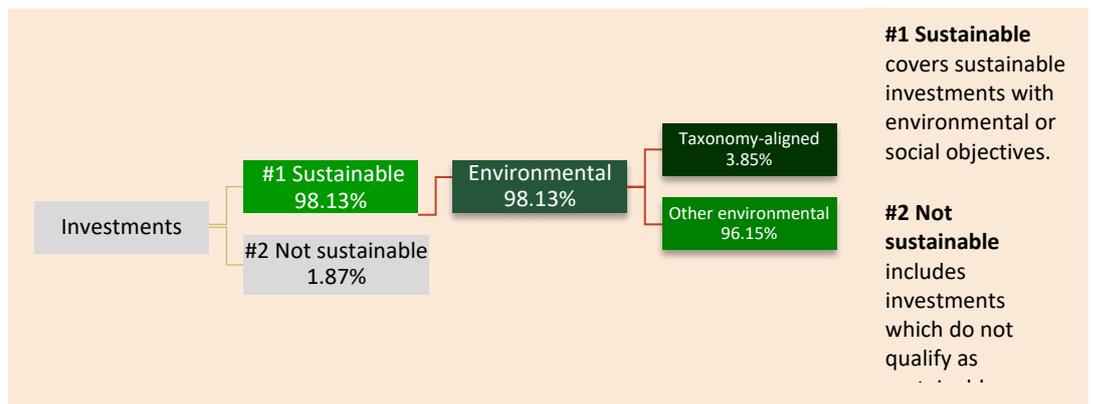

1<sup>st</sup> January 2024 – 31<sup>st</sup> December 2024

Asset allocation describes the share of investments in specific assets.

### What was the proportion of sustainability-related investments?

● **What was the asset allocation?**

● **In which economic sectors were the investments made?**

Sector	Proportion (%)
Information Technology	22.69%
Industrials	20.86%
Financials	14.62%
Health Care	12.67%

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

Materials	9.72%
Consumer Staples	4.89%
Consumer Discretionary	4.65%
Utilities	4.33%
Communication	3.69%
Cash Securities	1.87%

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The fund was aligned to the EU Taxonomy by 3.85% for the Jan 01-Dec31st 2024 reference period.

**● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas     In nuclear energy

No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

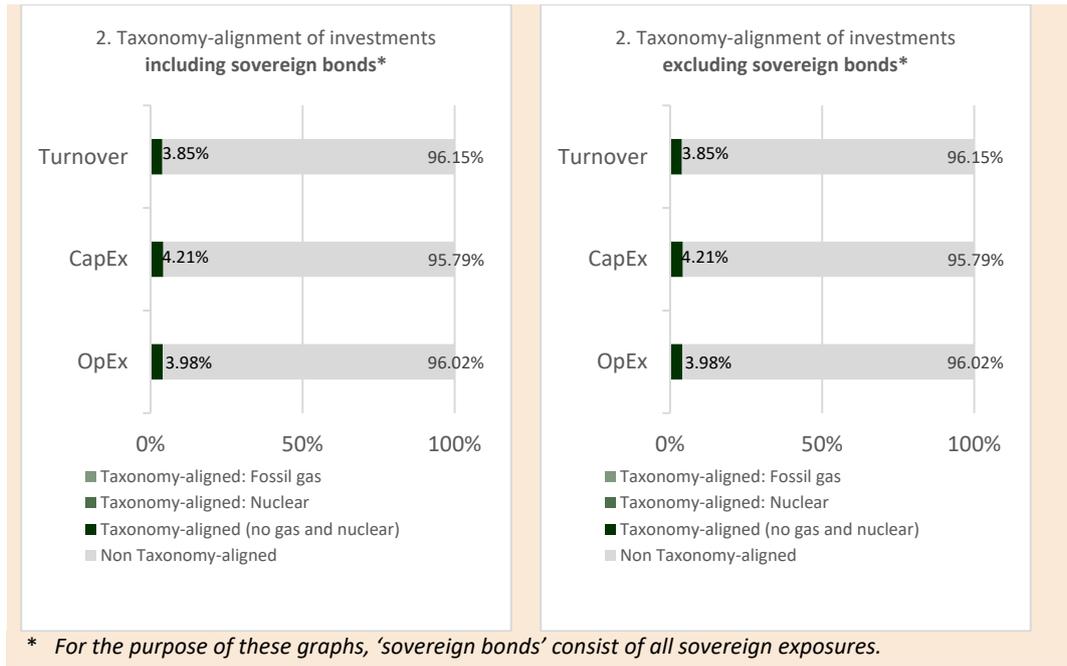

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities are economic activities** for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

investments made by investee companies, e.g. for a transition to a green economy.  
 - **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **What was the share of investments made in transitional and enabling activities?**

Transitional Activities: 0.00%

Enabling Activities: 2.23%

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

This is the first year the fund has disclosed Taxonomy alignment metrics, therefore there are no previous years for comparison purposes.

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The Sub-Fund invests at least 90% of total net assets in equities and equity-related securities of companies from anywhere in the world (including emerging markets), except in limited circumstances as explained above. At the point the Sub-Fund makes an investment into such an asset, that asset will qualify as a Sustainable Investment. These investments have an environmental objective but are not actively targeting alignment with the EU Taxonomy.

At the date of this document, it is not yet possible to commit to the Sub-Funds' minimum alignment with the Taxonomy Regulation. 96.15% of Sustainable Investments within the portfolio were not aligned to the EU Taxonomy.

**What was the share of socially sustainable investments?**

The Sub-Fund does not actively invest in sustainable investments with a social objective.

### **What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

The Sub-Fund can invest 10% of total net assets in ancillary liquid assets, eligible deposits, money market instruments, money market funds and derivatives used for exposure to equity indices for managing cash flows, or in derivatives used for hedging. Exposure to equity indices would be for a limited amount of time and in limited circumstances to manage cash flows. Such assets would not be deemed as Sustainable Investments. Some but not all of the underlying constituents of the equity indices may nevertheless qualify as sustainable investments. The Sub-Fund may hold more than 10% of total net assets in such investments in limited circumstances, such as if there is a sudden and material subscription during a time of exceptional market conditions that does not allow immediate allocation to Sustainable Investments.

Given the nature of these investments and short-term use, it may not always be possible to apply minimum safeguards due to look through or liquidity. These assets do not affect the delivery of the sustainable investment objective on a continuous basis as they constitute a small proportion of the Sub-Fund’s total net assets.

### **What actions have been taken to attain the sustainable investment objective during the reference period?**

During 2024, we undertook a variety of stewardship related activity. This included engagement and voting activity across climate, earth and people themes. The level of engagement and voting conducted varied depending on the materiality of the issue and its applicability to select companies.

Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

Kering

We seek to drive real world outcomes at multiple levels to drive long term value for investors. These levels are coordinated across six different layers of include: direct engagement in local communities, to corporate engagement, through to sector-level and value chain engagement, to the country level and with international institutions. We are active owners and lenders, using our voice to drive change in the issuers in which we invest and to which we lend money. We harness insights from our corporate engagements and investment teams to ensure that our macro-level engagement with those who shape markets is robust and well-informed. Conversely, the macro level piece helps foster the policy and regulatory environment for direct engagements to be more effective. We call this holistic stewardship.

Issue:

Sustainable sourcing – the process of selecting products, materials and services through socially and environmentally responsible business ways – is crucial as we aim to decarbonise, in particular through reducing Scope 3 emissions. There is also an economic incentive to transition to sourcing sustainably, given that in the UK, the market for ethically and sustainably sourced goods in 2019 was worth £41 billion, its value having risen almost fourfold within 20 years[1].

Action:

We have been engaging with Kering as part of our nature engagement programme. Specifically, we have been encouraging the company to identify and disclose the most material impacts and dependencies on biodiversity in their value chain, to set ambitious SMART targets covering their most material biodiversity impacts, in line with emerging guidance from the Science-Based Targets for Nature (SBTN), and set a target to make sustainable certification the standard requirement for high-risk commodity raw materials, rather than just the “preferred” option, and extend sustainable sourcing to other raw materials in the supply chain (e.g. leather, gold).

Outcome:

We are extremely pleased that Kering have published a policy named ‘Kering Standards and Guidance for Sustainable Production’, which sets a framework for the company, and its sub-brands, and suppliers to measure progress and outcomes on traceability, social welfare and environmental protection by 2025. Targets include 100% traceability of key raw materials, the creation of a Kering Supplier Index of Sustainability which ensures the visibility of each supplier’s sustainability performance and the contribution to a positive social impact across the entire supply chain. Going forward, we will continue to engage with Kering on progress made on these targets, to help continue to inform investment decisions. ### How did this financial product perform compared to the reference sustainable benchmark?

No reference benchmark has been designated for the purpose of attaining the sustainable investment objective.

- **How did the reference benchmark differ from a broad market index?**

N/A - No reference benchmark has been designated for the purposes of attaining the sustainable investment objective.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

N/A - No reference benchmark has been designated for the purposes of attaining the sustainable investment objective.

- **How did this financial product perform compared with the reference benchmark?**

N/A - No reference benchmark has been designated for the purposes of attaining the sustainable investment objective.

- **How did this financial product perform compared with the broad market index?**

N/A - No reference benchmark has been designated for the purposes of attaining the sustainable investment objective.

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

ANNEX IV

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aviva Investors–Short Duration Global High Yield Bond Fund **Legal entity identifier:** 54930045VI7H84B2VW88

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<span style="color: green;">●●</span> <input type="checkbox"/> <b>Yes</b>	<span style="color: grey;">●</span> <span style="color: white;">●</span> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The below criteria are binding on the investment process to ensure underlying investments are inclusive of those securities promoting environmental or social characteristics:

The exclusions detailed below will be applied to this universe.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

A. The Investment Manager’s Baseline Exclusions Policy which includes the following exclusions:

- Controversial weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact (“UNGC”); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons, where companies supply state nuclear weapons programmes where the state lacks credible commitments to effective arms controls, disarmament and non-proliferation as outlined in the Treaty on the Non-Proliferation of Nuclear Weapons (NPT) \*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970). Please note, we retain discretion to additionally exclude companies supplying nuclear weapons state programmes within the NPT, if Aviva Investors considers the state to have undermined non-proliferation arms control treaties, conventions and norms.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI’s controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviours since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager’s Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>. B. The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is met through a combination of the UNGC (as part of the Investment Manager’s Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. Good governance indicators form a substantial component of the Investment Manager’s ESG scoring tools and ESG research.

● ***How did the sustainability indicators perform?***

The fund will continue to be managed in line with the Aviva Investors Baseline Exclusion policy and any revisions made to it over time, there have been no active breaches of the policy on the fund since implementation.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Adverse sustainability indicator	Metric	Annual Average
GHG Emissions	Scope 1 GHG emissions	11,282.78
	Scope 2 GHG emissions	3,124.26
	Scope 3 GHG emissions	100,722.44
	Total GHG emissions	112,475.47
Carbon Footprint	Carbon footprint	405.78
GHG Intensity of investee companies	GHG intensity of investee companies	1,190.80
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	8.27%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	78.28%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	1.70
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	3.97%
Board Gender Diversity	Average ratio of female to male board members in investee companies	29.26%

**AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template. Similarly, methodology changes from our third-party data providers may impact year-on-year data.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company’s value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

**● ...and compared to previous periods?**

Adverse sustainability indicator	Metric	Annual Average 2023	Annual Average 2024
GHG Emissions	Scope 1 GHG emissions	16,962.23	11,282.78
	Scope 2 GHG emissions	3,956.09	3,124.26
	Scope 3 GHG emissions	121,431.55	100,722.44
	Total GHG emissions	139,611.63	112,475.47
Carbon Footprint	Carbon footprint	460.14	405.78
GHG Intensity of investee companies	GHG intensity of investee companies	1,123.62	1,190.80

Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	9.19%	8.27%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	75.30%	78.28%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	2.19	1.70
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%	3.97%
Board Gender Diversity	Average ratio of female to male board members in investee companies	30.10%	29.26%

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

— **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any*

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

### How did this financial product consider principal adverse impacts on sustainability factors?

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

### What were the top investments of this financial product?

Largest Investment	Sector	% Asset	Country
VENTURE GLOBAL LNG INC 144A	Utilities	1.47%	United States
EQUIPMENTSHARECOM INC 144A	Industrials	1.15%	United States
MINERAL RESOURCES LTD 144A	Materials	1.09%	Australia
GLOBAL AUTO HOLDINGS LTD 144A	Consumer	0.94%	United Kingdom
ALLIED UNIVERSAL HOLDCO LLC 144A	Discretionary	0.90%	United States
HEIMSTADEN BOSTAD TREASURY BV MTN RegS	Industrials	0.88%	Netherlands
OLYMPUS WTR US HLDG CORP SR RegS	Real Estate	0.84%	United States
DOMTAR CORP 144A	Materials	0.82%	United States
GENESIS ENERGY LP	Energy	0.81%	United States
BANCO DE SABADELL SA MTN RegS	Financials	0.79%	Spain
BANCO BPM SPA MTN RegS	Financials	0.78%	Italy
TAPESTRY INC	Consumer	0.76%	United States
CIVITAS RESOURCES INC 144A	Discretionary	0.76%	United States
HANNON ARMSTRONG SUSTAINABLE INFRA 144A	Energy	0.72%	United States
NCL CORPORATION LTD 144A	Financials	0.72%	United States
	Communication	0.71%	Bermuda

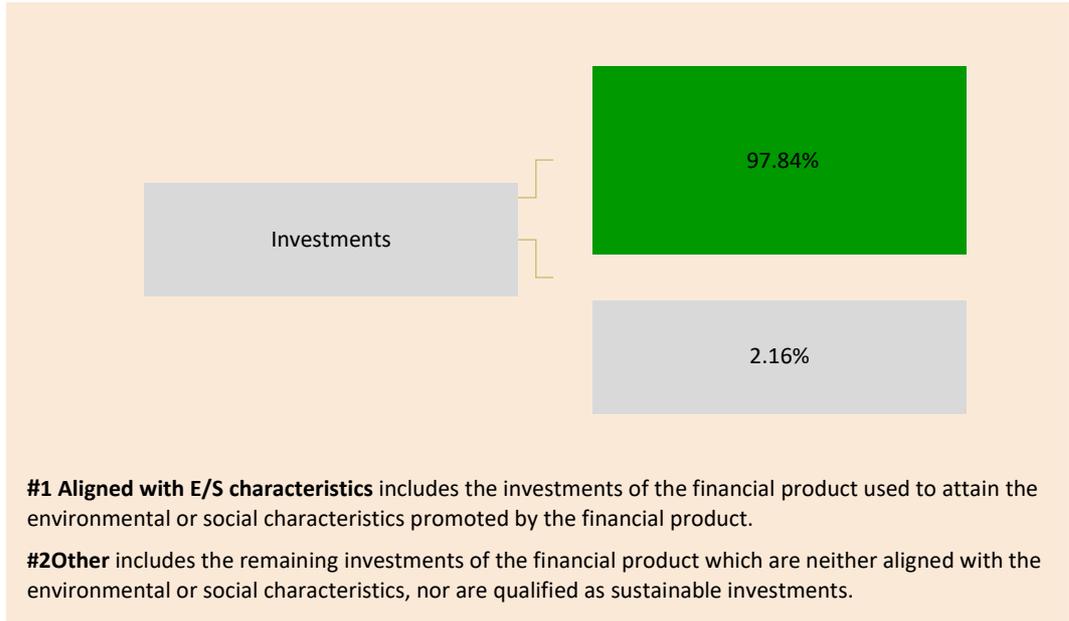

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:  
1<sup>st</sup> January 2024 – 31<sup>st</sup> December 2024

### What was the proportion of sustainability-related investments?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

● **What was the asset allocation?**

The taxonomy alignment percentage in the above diagram represents the percentage of investments held by the Fund in EU Taxonomy-aligned activities through Sustainable Investments with an environmental objective. It does not include the taxonomy alignment achieved through the Fund's other investments. For the taxonomy alignment of the Fund's total investments, see the bar chart below.

● **In which economic sectors were the investments made?**

Sector	% Proportion
Consumer Discretionary	19.10%
Communication	14.41%
Financials	13.27%
Industrials	13.22%
Materials	10.86%
Energy	7.15%
Health Care	5.82%
Consumer Staples	5.30%
Utilities	3.61%
Real Estate	3.16%
Information Technology	2.14%
Cash Securities	1.51%
FX	0.45%

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

**Asset allocation** describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

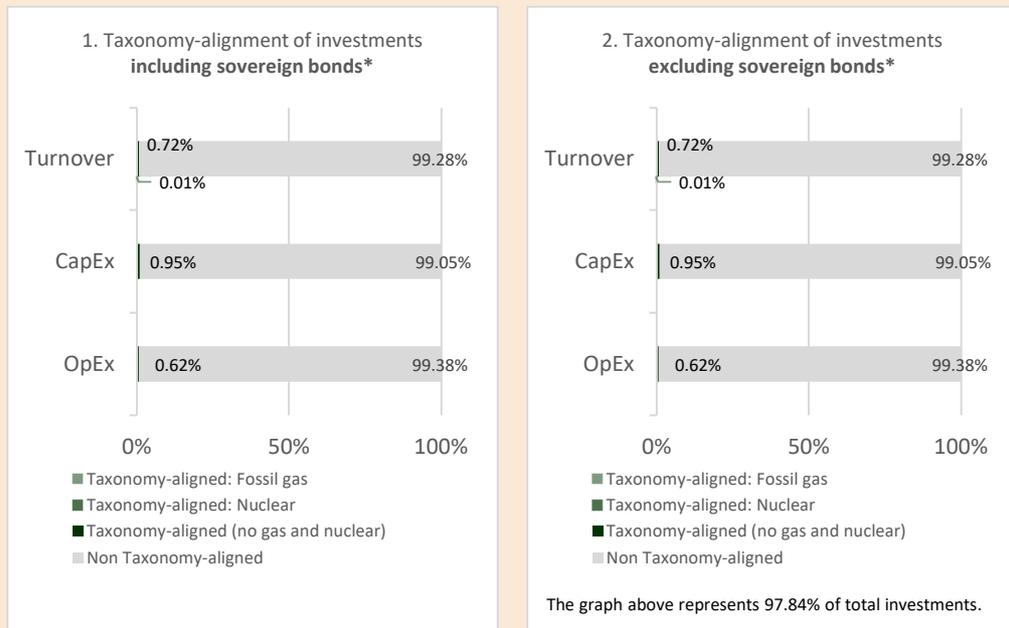

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Please see the following table for the breakdown of EU Taxonomy alignment (inc.Sovereigns):

	Taxonomy-aligned: Fossil gas	Taxonomy-aligned: Nuclear	Taxonomy-aligned (no gas and nuclear)	Non Taxonomy-aligned
OpEx	0	0	0.62	99.38
CapEx	0	0	0.95	99.95
Turnover	0	0.01	0.72	99.27

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Please see the following table for the breakdown of EU Taxonomy alignment (excl.Sovereigns):

	Taxonomy-aligned: Fossil gas	Taxonomy-aligned: Nuclear	Taxonomy-aligned (no gas and nuclear)	Non Taxonomy-aligned
OpEx	0	0	0.62	99.38
CapEx	0	0	0.95	99.95
Turnover	0	0.01	0.72	99.27

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%

Enabling activities: 0.18%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This is the first period the fund is disclosing Taxonomy alignment, therefore there are no previous periods for comparison purposes.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What was the share of socially sustainable investments?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

There may on occasion be investments in financial techniques and instruments and derivatives used for efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds, cash FX) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

During 2024, we undertook a variety of stewardship related activity. This included engagement and voting activity across climate, earth and people themes. The level of engagement and voting conducted varied depending on the materiality of the issue and its applicability to select companies.

Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We

maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

### **How did this financial product perform compared to the reference benchmark?**

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***  
Not Applicable.
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***  
Not Applicable.
- ***How did this financial product perform compared with the reference benchmark?***  
Not Applicable.
- ***How did this financial product perform compared with the broad market index?***  
Not Applicable.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

ANNEX V

**Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aviva Investors – Social Transition Global Equity Fund

**Legal entity identifier:** 549300QBFBTBNCT2J16

## Sustainable investment objective

**Did this financial product have a sustainable investment objective?**

<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>Yes</b>	<input type="radio"/> <input type="radio"/> <input type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: %</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul>
<input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 97.58%</b>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**To what extent was the sustainable investment objective of this financial product met?**

The Social Transition Global Equity Fund (the “Sub-Fund”) is part of Aviva Investors Sustainable Transition range which aims to support three key sustainable outcomes – relating to People, Climate and Earth (or Natural Capital) – closely aligned to the UN Sustainable Development Goals (“SDGs”). Each fund in the range follows a common investment philosophy to avoid significant harm, invest in solutions and back transition aligned to its particular theme.

This Sub-Fund focusses on “People” (primarily aligned to the principles of SDGs: 1 No Poverty, 3 Good Health and Well-Being, 4 Quality Education, 5 Gender Equality, 6 Clean Water and Sanitation, 8 Decent Work and Economic Growth and 10 Reduced Inequalities).

Alongside aiming to generate long-term capital growth the Sub-Fund’s sustainable investment objective is that it aims to support the transition towards a more socially equitable economy, by investing in global equities of companies that are either providing solutions to tackle social inequality or transitioning their business models towards a more socially equitable economy, and by engaging with portfolio companies.

A more socially equitable economy is one where there is universal respect for human rights and access to essential resources and services, so that people can live dignified and healthy lives.

Companies can support the transition by respecting human rights, providing decent work, acting as responsible corporate citizens and by providing access to education, health and finance to underserved stakeholder groups.

The Sub-Fund invests in “sustainable investments” that contribute to the Sub-Fund’s objective, either through the company’s products or services (“solutions” companies) or via the company’s operations (“transition” companies).

**Invest in solutions**

The Sub-Fund invests in “solutions” companies providing goods and services that tackle social inequality. It invests across three principal themes which are social needs relating to rights as set out in the International Bill of Rights, which are linked to the UN Sustainable Development Goals:

- i. Access to education
- ii. Access to health
- iii. Access to finance

By investing in “solutions” companies that meet one of these three social needs, these sustainable investments directly contribute towards the sub-fund’s sustainable investment objective. Companies will be eligible for investment if they derive at least 20% of their revenue aligned with the themes set out above. The Sub-Fund is also permitted to invest up to 10% of the portfolio in solutions companies with less than 20% revenue from such themes where the Investment Manager believes those companies are developing or producing important and innovative solutions, or emerging technologies aligned to the themes above.

The Investment Manager has therefore chosen 20% threshold of revenues based on the sustainable products and services used to select “Solutions” companies in order:

- To reflect that absolute contribution to sustainable activities requires scalable solutions and therefore to not penalise large companies with diverse product/revenue streams but who do provide genuine solutions to sustainable activities
- It is a threshold the Investment Manager believes to demonstrate significant part of any companies revenues (i.e. it is “material” to those companies business strategy)

**Back transition**

Aviva Investors believes the three greatest sustainability challenges of our time are climate change, biodiversity loss and social inequality and that all companies, regardless of sector and geography, have an impact on and are impacted by these immensely complicated and challenging issues. As such, all companies need to change the way they operate if we are going to achieve a sustainable future for both people and planet aligned with Aviva Investors sustainable investment objectives (together, a more socially equitable, nature positive and net zero economy that is also more resilient to higher temperatures). This “transition” of all companies is one of the most important sustainability objectives that must be achieved.

Aviva Investors therefore believe that the market needs to allocate capital to those companies leading the transition to a sustainable future in terms of how they operate, not just those providing solutions to the challenges mentioned above through their products and services. In doing so, we are rewarding and backing those companies that are leading their sectors which can have a powerful knock-on effect by raising industry standards and encouraging others to improve.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

The Sub-Fund invests in “transition” companies that are demonstrating leadership in the transition towards a more socially equitable economy through their operations.

Transition companies are identified using the proprietary Transition Risk (“T-Risk”) framework. This involves analysing potential candidates using a range of social-related indicators from a wide range of data sources, including data providers and NGOs benchmarks and assessments, across three areas: respect human rights, provide decent work and act as responsible corporate citizens. This is supplemented by qualitative research to determine the most appropriate transition candidates that are contributing to the sustainable investment objective.

The Sub-Fund has a bespoke engagement programme linked to the sustainable investment objective. All companies held in the Sub-Fund are asked to carry out human rights due diligence and to pay a living wage. If achieved, these asks will result in companies reducing their negative impact and increasing their positive impact on people, thus supporting the transition towards a more socially equitable economy.

The Investment Manager will conduct an annual assessment of each company’s progress on the engagement programme, scoring them in one of five categories. Where there is insufficient progress, escalating action will be taken, which may ultimately lead to divestment from those companies that fail to meet minimum expectations.

No reference benchmark has been designated for the purposes of meeting the sustainable investment objective.

The Investment Manager systematically monitors progress against the asks within the Fund’s engagement programme by conducting an annual assessment of companies ranking in categories 1 to 5, with 1 being the leaders. Below is a breakdown of the portfolio into these 5 categories:

- 1. 22%
- 2. 19%
- 3. 35%
- 4. 16%
- 5. 9%

Aviva Investor’s Global Voting Policy provides more details on its approach and perspectives on governance and sustainability best practice, and the Annual Sustainability Review provides more details on the Investment Manager’s approach to escalation. These documents are available on the Aviva Investors website here: <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

● **How did the sustainability indicators perform?**

The fund will continue to be managed in line with the Aviva Investors Baseline Exclusion policy and any revisions made to it over time; There have been no active breaches of the policy on the fund since implementation.

Adverse sustainability indicator	Metric	Annual Average
GHG Emissions	Scope 1 GHG emissions	628.44
	Scope 2 GHG emissions	231.11
	Scope 3 GHG emissions	3,805.54
	Total GHG emissions	4,569.46
Carbon Footprint	Carbon footprint	131.86
GHG Intensity of investee companies	GHG intensity of investee companies	469.72
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	5.53%

Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance /complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.69%
Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies	9.54
Board Gender Diversity	Average ratio of female to male board members in investee companies	38.21
Due Dilligence	Share of investments in companies that perform due dilligence	74.99%
	Share of investments in companies that do not perform due dilligence	25.01%
Solutions Revenue	Share of investments in companies within the portfolio that have >20% revenue generated from solutions products	23.55%
Human Rights Due Diligence	Company has defined processes, set targets or reports achievements for monitoring the effectiveness of its human rights policy.	74.99%

**AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template. Similarly, methodology changes from our third-party data providers may impact year-on-year data.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company’s value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

● **...and compared to previous periods?**

Adverse sustainability indicator	Metric	Annual Average 2023	Annual Average 2024
GHG Emissions	Scope 1 GHG emissions	644.83	628.44
	Scope 2 GHG emissions	242.85	231.11
	Scope 3 GHG emissions	3,667.19	3,805.54
	Total GHG emissions	4,324.39	4,569.46
Carbon Footprint	Carbon footprint	149.57	131.86
GHG Intensity of investee companies	GHG intensity of investee companies	452.08	469.72
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	6.86%	5.53%

Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance /complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	32.33%	0.69%
Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies	4.30	9.54
Board Gender Diversity	Average ratio of female to male board members in investee companies	37.51%	38.21
Due Dilligence	Share of investments in companies that perform due dilligence	71.14%	74.99%
	Share of investments in companies that do not perform due dilligence	28.86%	25.01%
Solutions Revenue	Share of investments in companies within the portfolio that have >20% revenue generated from solutions products	20.50%	23.55%
Human Rights Due Diligence	Company has defined processes, set targets or reports achievements for monitoring the effectiveness of its human rights policy.	71.14%	74.99%

**How did the sustainable investments not cause significant harm to any sustainable investment objective?**

To ensure that sustainable investments in the sub-fund do not cause significant harm to any environmental or social objective, there are two levels of screening applied:

1. Aviva Investors’ Baseline Exclusions Policy, which includes the following exclusions:

- Controversial weapons
- Civilian firearms
- Thermal coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact (“UNGC”); and
- Tobacco.

The exclusions are based on:

a. A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons, where companies supply state nuclear weapons programmes where the state lacks credible commitments to effective arms controls, disarmament and non-proliferation as outlined in the Treaty on the Non-Proliferation of Nuclear Weapons (NPT) \*
- Civilian firearms 5%
- Thermal coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use,maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this

supplies nuclear states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970). We retain discretion within the scope of this screen to additionally exclude companies involved in nuclear weapons, where this supplies nuclear states within the NPT but Aviva Investors considers the state to have undermined widely accepted non-proliferation arms control treaties, conventions and norms. This will predominantly relate to the UN's Nuclear Non-Proliferation Treaty but may extend to other existing conventions where relevant.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b. MSCI's controversy screening data to identify recent controversies to the principles set out under the UN Global Compact. An AI ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviours since the controversy. If we consider failings to be redeemable we will place the company into a structured and time bound engagement program.

Further details on the Investment Manager's Baseline Exclusions Policy is available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>

2. Fund-level screening based on the indicators for principal adverse impacts ("PAI") on sustainability factors. Aviva Investors assesses an issuer's performance against each of the relevant indicators and the sub-fund will not invest where it is considered that an issuer is causing significant harm to an environmental or social objective. Relevant indicators include all the mandatory PAIs as well as those voluntary indicators selected at a firm-level that are relevant to the theme of the Sub-Fund. Please refer to the PAI Statement on Aviva Investors website for further detail here <https://www.avivainvestors.com/en-gb/capabilities/sustainable-finance-disclosure-regulation/>

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Manager has a proprietary framework for taking the PAI indicators into account, which differs depending on the type of indicator. Where applicable, the Investment Manager has assigned a red flag to issuers which are considered to cause significant harm to an environmental or social objective. These issuers will be excluded from the investment universe for this Sub-Fund. Furthermore, due diligence will be carried out on every company by portfolio managers and ESG analysts. Where PAI data does not exist, the team will seek to qualitatively assess Do No Significant Harm on a best-efforts basis. This may include engaging directly with companies to ask them for the missing data.

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Investment Manager uses the MSCI overall controversy flag (where a "red" flag is considered a fail) to ensure that sustainable investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights ("UNGPBHR"), including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation ("ILO") on Fundamental Principles and Rights at Work and the International Bill of Human Rights. The MSCI methodology covers violations of the OECD Guidelines, United Nations Global Compact Principles ("UNGC"), the ILO conventions and the UNGPBHR (which references the International Bill of Human Rights), amongst many other global norms and conventions. All issuers with a red flag will be excluded from the investment universe for this Sub-Fund.

## How did this financial product consider principal adverse impacts on sustainability factors?

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Social PAI 11 relating to lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- Social PAI 12 relating to unadjusted gender pay gap
- Social PAI 13 relating to board gender diversity

## What were the top investments of this financial product?

Largest Investment	Sector	% Assets	Country
MICROSOFT CORP	Information Technology	7.10%	United States
HALOZYME THERAPEUTICS INC	Health Care	3.88%	United States
VISA INC CLASS A	Financials	3.72%	United States
UNILEVER PLC	Consumer Staples	3.72%	United Kingdom
SAP	Information Technology	3.69%	Germany
SCHNEIDER ELECTRIC	Industrials	3.53%	France
NXP SEMICONDUCTORS NV	Information Technology	3.43%	Netherlands
DANAHER CORP	Health Care	3.40%	United States
RELX PLC	Industrials	3.34%	United Kingdom
CENTENE CORP	Health Care	3.29%	United States
UNITED RENTALS INC	Industrials	3.24%	United States
ADOBE INC	Information Technology	3.24%	United States
LINDE PLC	Materials	3.09%	United States
QIAGEN NV	Health Care	3.05%	Netherlands
ROCHE HOLDING PAR AG	Health Care	3.02%	Switzerland

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

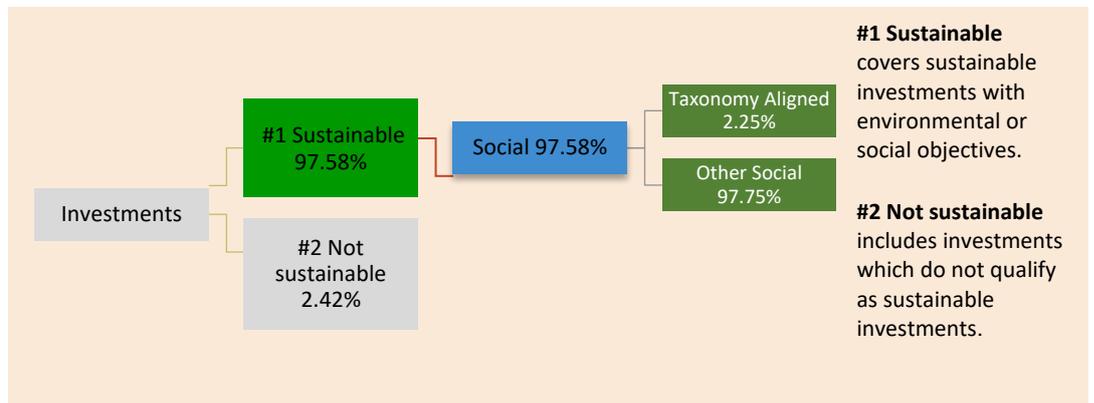

1<sup>st</sup> January 2024 – 31<sup>st</sup> December 2024

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### In which economic sectors were the investments made?

Sector	Proportion (%)
Health Care	24.30%
Information Technology	18.52%
Industrials	17.17%
Financials	14.63%
Consumer Staples	9.09%
Utilities	5.65%
Consumer Discretionary	5.13%
Materials	3.09%
Cash Securities	2.42%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sub fund does not make sustainable investments with an environmental objective and so this is not applicable.

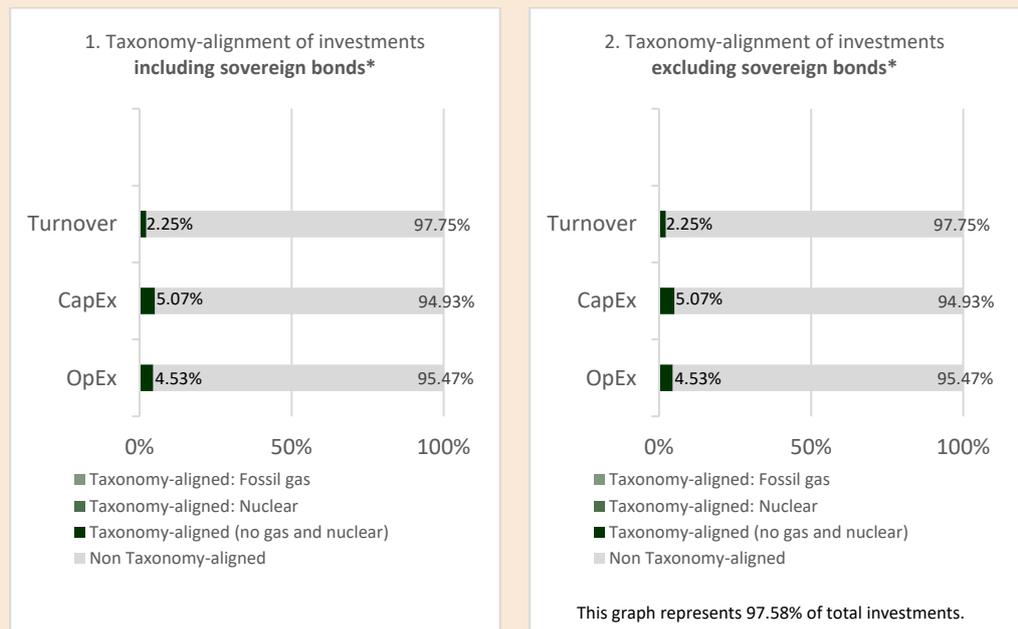

**Transitional activities are economic activities** for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- Yes:
  - In fossil gas
  - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%

Enabling activities: 1.41%

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

This is the first year the fund has disclosed transitional and enabling activities, therefore there are no previous years for comparison purposes.

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The Sub-Fund does not actively invest in sustainable investments with an environmental objective and so this is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### What was the share of socially sustainable investments?

The Sub-Fund invests at least 90% of total net assets in equities and equity-related securities of companies from anywhere in the world (including emerging markets), except in limited circumstances as explained above. At the point the Sub-Fund makes an investment into such an asset, that asset will qualify as a Sustainable Investment. These investments have a social objective but are not actively targeting alignment with the EU Taxonomy.

At the date of this document, it is not yet possible to commit to the Sub-Funds' minimum alignment with the Taxonomy Regulation, as there is no Taxonomy for socially sustainable activities. 97.75% of the Sustainable Investments within the portfolio were not aligned to the EU Taxonomy, with 2.25% of the sustainable investment within the portfolio aligning to the environmental objectives of the EU Taxonomy.

### What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund can invest 10% of total net assets in ancillary liquid assets, eligible deposits, money market instruments, money market funds and derivatives used for exposure to equity indices for managing cash flows, or in derivatives used for hedging. Exposure to equity indices would be for a limited amount of time and in limited circumstances to manage cash flows. Such assets would not be deemed as Sustainable Investments. Some but not all of the underlying constituents of the equity indices may nevertheless qualify as sustainable investments. The Sub-Fund may hold more than 10% of total net assets in such investments in limited circumstances, such as if there is a sudden and material subscription during a time of exceptional market conditions that does not allow immediate allocation to Sustainable Investments.

Given the nature of these investments and short-term use, it may not always be possible to apply minimum safeguards due to look through or liquidity. These assets do not affect the delivery of the sustainable investment objective on a continuous basis as they constitute a small proportion of the Sub-Fund's total net assets.

### What actions have been taken to attain the sustainable investment objective during the reference period?

During 2024, we undertook a variety of stewardship related activity. This included engagement and voting activity across climate, earth and people themes. The level of engagement and voting conducted varied depending on the materiality of the issue and its applicability to select companies.

Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

#### Visa

We seek to drive real world outcomes at multiple levels to drive long term value for investors. These levels are coordinated across six different layers of include: direct engagement in local communities, to corporate engagement, through to sector-level and value chain engagement, to the country level and with international institutions. We are active owners and lenders, using our voice to drive change in the issuers in which we invest and to which we lend money. We harness insights from our corporate engagements and investment teams to ensure that our macro-level engagement with those who shape markets is robust and

well-informed. Conversely, the macro level piece helps foster the policy and regulatory environment for direct engagements to be more effective. We call this holistic stewardship.

**Issue**

Boards and board committees are likely to make better decisions if there is strong independence and diversity amongst the members. Previously, we encouraged Visa to separate the roles of CEO and Chair and to improve the composition of the Board more broadly. Further, Visa is part of our bespoke thematic engagement programme focused on supporting the transition towards a more socially just and equitable society and we had set out our expectations for improvement, such as requesting evidence of progress against a number of issues including human rights risks and impacts. When we deem progress on such issues to fall short of our expectations, we will hold the most appropriate directors to account by voting against their re-election.

**Action**

We wrote to Visa around the time of its AGM to advise that whilst we welcome improvements in Board composition, we voted against the Board Chair to reflect the lack of Company progress on human rights risks and impacts; the Chair of the remuneration committee as an escalation measure given we have had ongoing concerns over executive remuneration arrangements that have not been satisfactorily addressed; and another non-executive to reflect concerns that they remain on the remuneration committee despite, in our view, not being independent.

**Outcome**

We advised the company that following our engagement in 2023, we welcome the roles of CEO and Chair are now separate, and also that the Company has addressed our concerns over the lack of gender diversity on the Board. However, we hope to see the broader governance issues addressed over 2024 and we will reflect the progress made in our votes at the Visa 2025 AGM.

**How did this financial product perform compared to the reference sustainable benchmark?**

No reference benchmark has been designated for the purpose of attaining the sustainable investment objective.

● ***How did the reference benchmark differ from a broad market index?***

N/A - No reference benchmark has been designated for the purposes of attaining the sustainable investment objective.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

N/A - No reference benchmark has been designated for the purposes of attaining the sustainable investment objective.

● ***How did this financial product perform compared with the reference benchmark?***

N/A - No reference benchmark has been designated for the purposes of attaining the sustainable investment objective.

● ***How did this financial product perform compared with the broad market index?***

N/A - No reference benchmark has been designated for the purposes of attaining the sustainable investment objective.

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

ANNEX IV

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aviva Investors–UK Equity Unconstrained Fund **Legal entity identifier:** 5493000583RFQMZ2NL72

## Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?**

<span style="color: green;">●●</span> <input type="checkbox"/> <b>Yes</b>	<span style="color: grey;">●</span> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The below criteria are binding on the investment process to ensure underlying investments are inclusive of those securities promoting environmental or social characteristics:

The exclusions detailed below will be applied to this universe.

- A. The Investment Manager’s Baseline Exclusions Policy which includes the following exclusions:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- Controversial weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact (“UNGC”); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons, where companies supply state nuclear weapons programmes where the state lacks credible commitments to effective arms controls, disarmament and non-proliferation as outlined in the Treaty on the Non-Proliferation of Nuclear Weapons (NPT) \*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970). Please note, we retain discretion to additionally exclude companies supplying nuclear weapons state programmes within the NPT, if Aviva Investors considers the state to have undermined non-proliferation arms control treaties, conventions and norms.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI’s controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviours since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager’s Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B. The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is met through a combination of the UNGC (as part of the Investment Manager’s Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. Good governance indicators form a substantial component of the Investment Manager’s ESG scoring tools and ESG research.

### ● **How did the sustainability indicators perform?**

The fund will continue to be managed in line with the Aviva Investors Baseline Exclusion policy and any revisions made to it over time, there have been no active breaches of the policy on the fund since implementation.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Adverse sustainability indicator	Metric	Annual Average
GHG Emissions	Scope 1 GHG emissions	948.61
	Scope 2 GHG emissions	307.18
	Scope 3 GHG emissions	16,018.52
	Total GHG emissions	17,230.76
Carbon Footprint	Carbon footprint	437.47
GHG Intensity of investee companies	GHG intensity of investee companies	640.46
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	12.38%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	72.06%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.14
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	13.01%
Board Gender Diversity	Average ratio of female to male board members in investee companies	41.46%

**AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template. Similarly, methodology changes from our third-party data providers may impact year-on-year data.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company’s value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

**● ...and compared to previous periods?**

Adverse sustainability indicator	Metric	Annual Average 2023	Annual Average 2024
GHG Emissions	Scope 1 GHG emissions	2,026.45	948.61
	Scope 2 GHG emissions	980.37	307.18
	Scope 3 GHG emissions	40,199.08	16,018.52
	Total GHG emissions	43,296.14	17,230.76
Carbon Footprint	Carbon footprint	549.48	437.47
GHG Intensity of investee companies	GHG intensity of investee companies	986.06	640.46

Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	11.68%	12.38%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	72.88%	72.06%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.34	0.14
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%	13.01%
Board Gender Diversity	Average ratio of female to male board members in investee companies	39.84%	41.46%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2024.

### How did this financial product consider principal adverse impacts on sustainability factors?

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

### What were the top investments of this financial product?

Largest Investment	Sector	% Asset	Country
UNILEVER PLC	Consumer Staples	5.91%	United Kingdom
SAGE GROUP PLC	Information Technology	5.01%	United Kingdom
SHELL PLC	Energy	4.88%	United Kingdom
BAE SYSTEMS PLC	Industrials	3.85%	United Kingdom
INTERMEDIATE CAPITAL GROUP PLC	Financials	3.80%	United Kingdom
GLAXOSMITHKLINE	Health Care	3.76%	United Kingdom
COMPASS GROUP PLC	Consumer Discretionary	3.71%	United Kingdom
RELX PLC	Industrials	3.70%	United Kingdom
NATIONAL GRID PLC	Utilities	3.42%	United Kingdom
LONDON STOCK EXCHANGE GROUP PLC	Financials	3.24%	United Kingdom
RENTOKIL INITIAL PLC	Industrials	3.16%	United Kingdom
ASHTREAD GROUP PLC	Industrials	2.87%	United Kingdom
RECKITT BENCKISER GROUP PLC	Consumer Staples	2.65%	United Kingdom
QINETIQ GROUP PLC	Industrials	2.49%	United Kingdom
HSBC HOLDINGS PLC	Financials	1.96%	United Kingdom

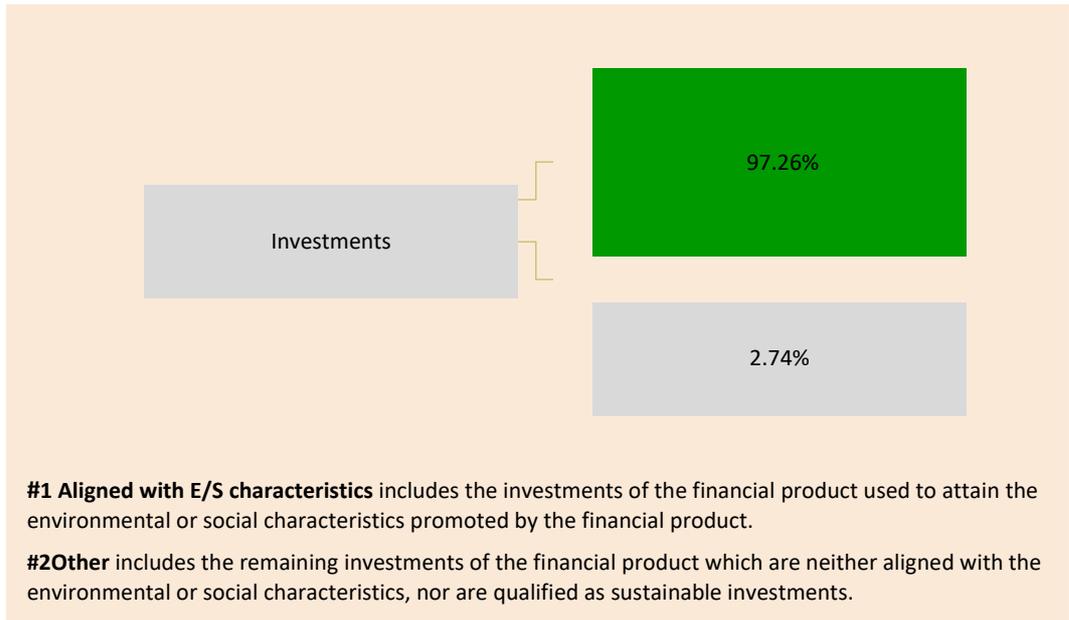

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:  
  
1<sup>st</sup> January 2024 – 31<sup>st</sup> December 2024

### What was the proportion of sustainability-related investments?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

● **What was the asset allocation?**

**Asset allocation** describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The Fund did not commit to holding Sustainable Investments and therefore the Fund's exposure to Sustainable Investments has not been assessed, however, during the reference period, a percentage of the Fund's investments were aligned with the EU Taxonomy (see the section "To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?" below).

● **In which economic sectors were the investments made?**

Sector	% Proportion
Industrials	24.79%
Consumer Staples	16.89%
Consumer Discretionary	12.43%
Financials	10.87%
Information Technology	8.70%
Communication	7.62%
Health Care	5.32%
Energy	4.88%
Utilities	3.84%
Cash Securities	2.66%
Materials	1.18%
Real Estate	0.83%

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

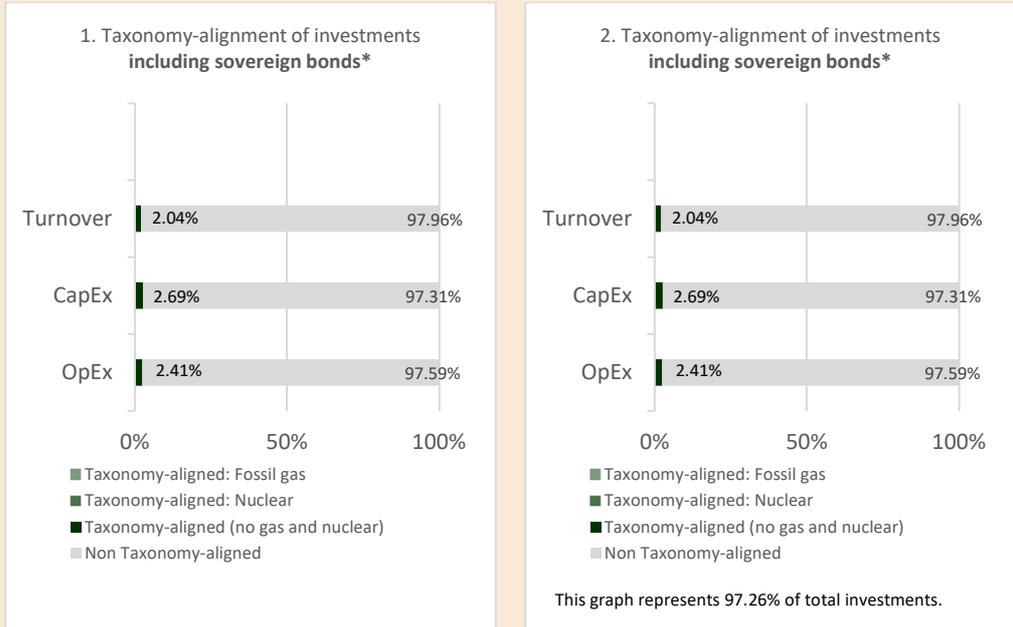

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%

Enabling activities: 1.42%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

This is the first period the fund is disclosing Taxonomy alignment, therefore there are no previous periods for comparison purposes.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What was the share of socially sustainable investments?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

There may on occasion be investments in financial techniques and instruments and derivatives used for efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds, cash FX) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

During 2024, we undertook a variety of stewardship related activity. This included engagement and voting activity across climate, earth and people themes. The level of engagement and voting conducted varied depending on the materiality of the issue and its applicability to select companies.

Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

**How did this financial product perform compared to the reference benchmark?**

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

● **How does the reference benchmark differ from a broad market index?**

Not Applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable.

- ***How did this financial product perform compared with the broad market index?***

Not Applicable.
